A BUILDER IN COLLINGSWORTH COUNTY

VOLUME XXI. Wellington, Collingsworth County, Texas, Thursday, August 15, 1929. NUMBER 4

Wholesale Grocery To Locate In Wellington

Mile Parade To Be Feature On Day Fair Opens

Entire Community Will Cooperate To Make Parade Success

Four Bands Here

Organizations Will Have Floats; Prizes Given For Best Display

BY E. L. WINN

Inquiries coming to the chamber of commerce office denote much interest and enthusiasm in the Mile-Long-Parade to be staged Thursday, September 12, the first day of the Collingsworth County Fair. Business firms, county and civic organizations, as well as communities and individuals are all putting forth an effort to make the parade one of the greatest ever to be held in the Panhandle. This is as it should be for the parade introduces a new and inexpensive means of unique advertising and at the same time it also has a great civic pride value.

A number of towns including Hollis, Shamrock, and Childress are planning to enter a band in the parade to assist the Wellington band to properly do homage to the numerous entries on this occasion. Rural schools in the county are getting ready to enter "rural school floats" which will be not only beautiful and pleasing but effective as prize winners. Each of the four classes in the Wellington high school are working in secret to put one over on the other classes to be represented by the "high school float." The ladies of the various clubs over the county are getting material together and are going forward to show something with their "step saving kitchen" and "living room floats." A number of other civic clubs are busy working out details for their "educational" float with which they hope to show the service of their organization to the community Census enumerators are already at work in a number of the rural communities gathering data to see if they can enter the "largest representation" in the parade. Business firms and individuals are bending every effort to make this parade one of the best ever to be staged in Wellington. There will be plenty of music, plenty of fun, plenty of excitement all along the whole mile of this parade. It is one of the free attractions which goes with the Collingsworth County Fair. The Wellington chamber of commerce will maintain a service department to assist those who desire information concerning this parade. This department is at your command.

Large Crowds Are Feature as M. E. Revival Continues

With the size of the crowds increasing each night, the second week of the Methodist revival is reported to be most successful by Rev. I. A. Smith, local pastor. The Thompson Twins, evangelistic team who are holding the meeting, have been faced with exceptionally good crowds from the very first and the meeting, as a whole, is a credit to the church and to the community, Rev. Smith said.

The revival meeting began August 4, and will continue until August 20 or longer. The extended length of the revival is due to the interest of the people have in their reception of the gospel offered by the Thompson Twins, Rev. Smith said.

Mr. and Mrs. Sam Young and little daughter, Irma Lee of Hollis visited in the homes of Mrs. J. B. McKnight and Mr. and Mrs. A. P. Lowrie Sunday.

Mr. and Mrs. C. C. Bishop and family returned from a week's vacation in Colorado Saturday.

Has Been a "Wall Flower" Long Enough

Light Showers Fall Over The County Sunday

Hail in Quail Vicinity Monday Night Cause Slight Damage

Bumper Crop Sure

Rain Gives Assurance Of Good Cotton Crop In Neighborhood

Heavy rains and hail fell in the Quail vicinity late Monday afternoon causing only slight damage to the crops. The heaviest part of the hail fell about three miles this side of Quail, and is reported to have damaged the cotton to a limited extent. In general, the rain was well distributed over West Texas and good crops are now assured.

Light rains and showers, generally distributed, were welcomed by the inhabitants of Collingsworth county and the local community Sunday night. Rain in the immediate vicinity of Wellington was somewhat lighter than that reported by the surrounding communities,

Heavy rains, varying from one to two inches, fell in and near Wellington late Monday afternoon. This was the part of the county that received the least amount of rain Sunday night and the part that needed it the most, the rest of the county having received showers at various other times.

Although rain was not absolutely essentiial to the present cotton crop, the arid condition was beginning to attract some attention and a general rain was needed over the entire county. Bumper crops are now assured in the surrounding communities.

Several light showers Sunday afternoon and Sunday night served to cheer the local faremrs, despite the fact that less than one-half inch of rain was reported in the immediate vicinity of Wellington. Heavier rains were reported in the neighboring towns and on the plains.

Aberdeen is reported to have received the best rain of any of the neighboring localities, heavy rains being spotted between Wellington and Shamrock.

A one-half inch rain was reported at Quail, which due to the sandy nature of the soil, is expected to be of much help to the community in general.

"Three cotton showers Sunday night," was the report given at Dodsonville and the rain was said to have varied from one-half to one inch.

Loco, Plymouth, Lutie and other communities receieved about the same amount of rain that fell around Wellington.

Youth Offers to Compensate for News Item

"Here are some people that are visiting us and we want to get their names put in the paper," were the words of a youngster who entered the Leader office Monday morning.

"How much will it be?" was his next question.

Somewhat to his dismay he found out that there was no costs and that The Leader was always glad to get locals which may either be phoned directly to the office or given to Mrs. Laura Campbell.

Fall Session Of Public Schools Begins Sept. 9

Students To Be Examined And Classified On September 5-6-7

To open the 1929-1930 school session on September 9, was the unanimous decision of the Wellington school board at their meeting Monday night, August 5. The following announcements were also made in connection to the school work for the following year.

"The teachers in our schools will attend the teachers institute at Canyon on September 2, 3, 4, and will return to Wellington for the purpose of classifying the pupils on the 5, 6, and 7. All of the teachers in the Wellington schools will attend the Canyon institute according to a decision reached between our superintendent and the school board. Therefore our teachers should carefully bear this item in mind.

"According to present intentions the Seniors of the Wellington high school will be classified during Thursday, September 5. All those who belong in the senior class for the coming year (that is, all who hold as many as eleven affiliated credits) must report at the high school on this particular day for the purpose of getting their course arranged for the year and of receiving their books and other directions.

"In like manner the Juniors will be taken care of on Friday 6 and Sophomores and Freshmen on Saturday 7.

"We wish to say to pupils who anticipate entering the Wellington high school from unaffiliated schools that our entrance examinations will be given on the 5, 6, and 7 and those pupils who wish to take these examinations should declare their intentions in writing to G. L. Farrar, box 196, Wellington. We do not require these tests in order to enter the freshman class. But those who wish advanced standing in our high school will take examinations in such subjects

(Continued on Page 6)

Wholesale Firm May Locate In City This Fall

Wholesale Grocery Company Plans Branch House Here

Plan to Open Soon

Local Grocerymen Make Trip to Wichita In Interest of Project

A wholesale grocery that will make Wellington a central point and supply the adjoining West Texas towns, is the latest outlook toward the betterment of Wellington. The chamber of commerce states that Goodner Wholesale Grocery Co., is planning on a location here by September 1.

Tuesday, several of the business men of Wellington went to Wichita Falls on the invitaion of P. F. Gwin and held conference with him. The report was that Wellington seemed a most favorable point and that the inspection which had already been made was wholly in favor of Wellington as the central location.

"Next week there will be another committe here to consider a locaion for the building site and to lay further plans toward the completion of the enterprice," E. L. Winn, secretary of the chamber of commerce, announced Wednesday morning. "Wellington is an ideal location for a wholesale grocery and the benefits that the city will receive from such a project can hardly be estimated."

The Goodner Grocery company is organized on the "cash and carry" plan and has other houses in Wichita Falls and Vernon. This plan of distributing groceries is proving most successful because it reduces the direct retail cost of the groceries by relieving the whole sale grocery and the jobber of much of the risk which they ordinarily run. With Wellington as a center, the company plans to also supply many of the surrounding towns such as Shamock, Memphis, Hollis and Childress. This has been their plan of progress in Wichita Falls and Vernon.

Naturally the benefits received by the community will be many if the company decides to build here. Not only will the prices of staple groceries be lowered and quicker service assured, but it enable the inhaitants of Wellington to have fresher groceries of the more select type, a class that has been very inconvenient to handle because of freighting conditions and length of time necessary to import such products. Having such a business in Wellington will also mean an addition to the commercial and industrial progress of the city.

The men who have been promoting the project and who visited Mr. Gwinn at Wichita Falls are: E. F. Lewis, J. S. Dorn, I. E. Fox, Frank Mitchell, W. H. Lynn, and E. L. Winn. If the grocery company locates here much of the credit should be given to these men for their interest and initiative.

Wellington Boys Leave For Scout Camp at Claude

Camp Warner Is An Ideal Location for Camp; Boys Are Safe

Sixteen boys, including more than half of the local boy scout troup, left Wellington to attend the area boy scout camp at Camp Warner Sunday, August 11. The camp is held each year and will last ten days. Sixty boys are now attending the camp.

Camp Warner is located in the Palo Duro canyon near Claude, and was given to the boy scouts by Mrs. Phoebe K. Warner and her husband, Dr. Warner, for the purpose of holding the annual scout encanmpment. Formerly the encampment was held close to Amarilla, but wa snot improved nearly so well as the present location.

The purpose of the annual encampment is to afford an outing for the boys in which they may study their scout work, become acquainted and associate with other scouts in the neighboring towns, and enjoy a few days of outdoor life without running the risks that usually accompany such outings.

Leaders and executives from all parts of West Texas will attend the camp and every possible precaution has been takn to insure the safety of the boys. A test of the drinking water has been sent to the state board of health and Kennedy Lane will serve as life saver and swimming director. Dr. Warner of Claude, will serve as camp physician and Rev. W. B. Wilkins will be camp pastor.

Boys who are attending from Wellington are: Elmer Knox Jones, Dale Watkins, Edwin Parker, Joe Parker, Firman Goforth, Cecil Masten, James Sullivan, John Ben Castleberry, J. M. Strong jr., Garland Hampton, Jack Miller, Odus Riley, Howard Riley, Clifford Dickenson, Clifford Campbell, J. N. Cook, Buster Swafford, Edwin Parker and Garland Hampton will serve as junior officers while in camp, the office coming from merit shown by them in the camp during the past two summers.

Thursday Is Last Day For Vaccination

Dog owners should have their animals vaccinated at once. Today is the last day according to an official announcement posted last week. The slaughter of all dogs that have not been vaccinated is due to start today, so either get your dog fixed up or keep him at home.

Oil Well Found Near County By Wischkaempers

Discovery Well Is Located One-Fourth Mile From County Line

Oil production is coming closer to Collingsworth county all the time due principally to the efforts of Edgar and A. F. Wischkaemper who recently brought in a producing well located one-fourth mile north of the Collingsyorth county line. The well is located in section 28 block 17 of Wheeler county.

A small shot last Tuesday brought in a flow estimated to be 60 barrels an hour. The well bridge after flowing over the top of the derrick for a time. A second shot will be given the) well in the near future, according tto S. R. Norwood of the Dozier community. It is expected that the second shot will bring in a much larger flow.

Mr. Norwood considers this well, which is called the Discovery well, a very important step in the development of the oil fiend of the Panhandle for it is located south of the granite ridge below which many operators claimed there was no oil.

Arrangements have already been made by the Wischkaemper brothers to pipe gas to the Dozier community where gins, business houses and private residences will be supplied.

Church of Christ To Begin Series Of Meetings Fri.

Cled E. Wallace, Temple Evangelist, Will Be Chief Speaker

A series of revival meetings will begin at the Church of Christ, Friday evening August 16, Billy Wolfrum, local pastor announced Tuesday. The meeting will be conducted by Cled E. Wallace of Temple, Texas and is expected to be one of the most successful meetings ever conducted by the local church, Mr. Wolfrum said.

"Mr. Wallace is an able gospel preacher, a college graduate, and a well known writer for our religious weekly paper 'The Firm Foundation.' The public is cordially invited to attend each of our services during the meeting and I am sure that they will not be disappointed when they hear Mr. Wallace. Congregational singing in which all present may participate, will characterize each service," Mr. Wolfrum said.

O. K Wagon Yard Burns Thursday

Historical Landmark and Trading Point Destroyed By Fire

The O. K. wagonyard, last existing relic of the earlier days, of Welington, burned Thursday night with an approximate loss of $16,000 to D. W. Maddox, the present owner. "The exact cause of the fire has not yet been determined, and none of the loss was covered by insurance, Mr. Maddox said.

Since the nature of the electrical wiring eliminated, all suspicion along this line, it is supposed that the fire was a result of carelessness on the part of the inhabitants. The huge loss was due to the progress of the fire before the arrival of the local department, this head way was caused by two thousand bales of hay which were stored in the loft and which formed the chief basis for the financial loss. Damage done to the building was estimated at $1,000 by Mr. Maddox.

Whether the building will be rebuilt or not is still undecided by Mr. Maddox, some friction having arisen from the fact that there is a city ordinance prohibiting the construction of frame buildings within the fire zone of the city.

Featuring one of the most colorful histories in the county, the O. K. wagon yard, former landmark and trading center of the community, after 35 years of successful existance, has burned with out creating an undue amount of excitement. Such a fire would have been considered a disaster to the community by our forefathers 30 years ago. The first wagonyard of the community, once meant to Wellington what the present hoard of filling stations and hotel now mean; the wagonyard was a measure in the devolpment of western civilization.

Founded in one of the town's best locations, the first wagonyard was opened in Wellington by Tom Fuller, on the grounds where the Chevrolet Motor company now stands. After changing owners six times and being in four different locations, the city's first and last wagonyard was moved to its present location in 1908 and was purchased by D. W. Maddox from his brother D. D. Maddox in 1925.

The Haralson wagonyard, abandoned by its owner in 1927, was practically the only competition that the O. K. wagonyard has known.

Baseball Series Slated for Fair

One of the features on the second day of the Collingsworth County Fair will be a baseball tournament between four of the picked clubs of the county. J. N. Wallace who is in charge of the tournament, says that Plymouth, Quail and Bean Hill have already definitely entered, and that the fourth club may be composed of a combination of Rolla and Salt Fork players.

The baseball team which wins the tournament will be awarded $100 in cash. At first it was decided to offer the prize money on a 60-40 basis, but the teams that had entered wanted to play with the winner taking all. All school children in the county will be admitted free on the day of the baseball tournament, which is also school day.

$2.00 A YEAR INSIDE OF TRADE TERRITORY
$3.50 A YEAR OUTSIDE OF TRADE TERRITORY

AT IT AGAIN

Governor Moody is still bearing his cross. It is nothing less than another dilemma. Never was the course of an officeholder at $4,000 a year so beset with dilemmas, like rocking chairs cluttering the path of the householder who rises in the dark to put the cat out, or something. The latest dilemma against which the Governor has barked his shins is the great question whether or not to veto the Small public land withdrawal bill which has as its purpose the prevention of land office filings on any tract which may be technically established as "vacant" by resurveys shortly to be carried out.

It will be remembered that this bill, one of the several prepared by Senator Small of Wellington for meeting a situation in which was involved the states good faith in sales of public lands to private purchasers was enacted during the closing days of the last of the series of called sessions, to take care of the tag ends left by the Small "riverbed" bill passed earlier. The withdrawal bill was designed to supplement the riverbed bill and to aid in carrying out the intent of that bill, which intent was that no purchaser of land from the state in good faith should be injured by any kind of actual or technical "welching" by the state on its bargain. The riverbed bill provided for validating of titles to land where survey lines crossed watercourses which by reason of a strained interpretation of the "navigable streams" provision of the constitution became technically rivers upon which steamships might ply.

None of the watercourses affected would float a good sized ship every day in the year; many of them indeed. have not had a drop of surface water in them within the memory of man except after a cloudburst. The states surveyors in the old days, recognizing what everyone knows, that these dry watercourses could not possibly be navigable, ran their lines right across them and the "beds" of these "navigable streams" were sold along with the land on each side. Then the famous Red River case came along with a ruling which, carried to the ultimate limit of interpretation, included all these dry washes among the list of navigable streams, whose beds are reserved to the state and across which surveyors are forbidden to run lines.

Common sense as well as justice demanded that the state confirm the purchasers of land in these "riverbeds" in the titles which the state had granted upon surveys which its official surveyors had made. Accordingly, Senator Small's riverbed bill was introduced and passed by overwhelming majorities in both houses. It was vetoed by Mr. Moody. Then it was repassed with increased majorities, amounting to unanimity, over the veto. Thus the legislature emphasized its view that the state should not take advantage of a technicality to profit at the expense of its citizens.

Then the question arose to "vacancies" which might occur as a result of recasting survey lines on account of the riverbed law, and of vacancies which might occur generally through the re-running of lines. Surveys, it has been found, are not always accurate. Nearly every time a line is re-run, its location is altered. The present situation along the Eastern Panhandle boundary is a case in point. Re-running of a meridian here has thrown some 28,500 acres of land, formerly regarded as being in Oklahoma, into Texas. where technically it would become "vacant" public land and subject to filing by the first man who got into the land office at Austin with the necessary papers.

There are many instances of survey errors all over the state, each of them creating "vacancies" running from a few square feet of land to several hundred acres. The hunting out of such "vacancies" and claiming them through filing has been a profitable sideline for a number of individuals.

The Small public lands withdrawal bill would stop this industry by an omnibus declaration that no more vacancy filing would be permitted. Since all the public lands available have already been filed on, there is no longer any need for continuing the filing law. The only chance for a filing now is a survey error which establishes a technical vacancy on land already granted by the state to a private purchaser and kept by that purchaser for many years in complete confidence that it belonged to him legally as well as morally. The Small withdrawal bill is admittedly a temporary measure, designed to prevent a sort of piracy upon the lands of private owners until more detailed laws providing or confirming of titles or for development as state school or university lands can be enacted.—Fort Worth Star-Telegram.

TEXAS & TEXANS

By Will H. Mayes

Oil Development Increases

During the first half of the year 2,571 new producing oil wells were brought in in Texas and 224 new gas wells. Texas is now only slightly behind California in oil production and is likely to take the lead in the next six month.

The most sensational developments recently have been in Caldwell and Gaudalupe counties near Luling and Seguin, but in practically every oil field in the state work has been stimulated the last few months by the slight advance in the price of oil.

* * *

Big Irrigation Project

A permit has been granted by the Texas Board of Water Engineers to a citizen of Edinburg to irrigate 88,000 acres in Hidalgo county with storm and flood waters from the Rio Grande, the board requiring storage of not less than one-acre foot for each acre to be irrigated.

This is just another of the immense projects that is rapidly making the Lower Rio Grande Valley one of the richest areas of the world.

* * *

Honey Crop Gathered

The bee men of Texas had a great meeting at College Station during the Farmers' Short Course and decided to form a buying and marketing association as an aid to the honey industry. Texas has become noted for its fine honey, with Uvalde probably the center of the largest producing area.

More than 70 per cent of the year's honey crop of the section has been gathered and marketed, the price paid there being around 10 and 12 cents a pound. Bees are profitable almost anywhere in Texas when properly cared for.

* * *

Must Help Each Other

In our enthusiastic interets in our immediate town or locality we are inclined to overlook the fact that any great development of Texas—and every part of Texas will profit by the growth of the state as a whole—must come from united effort for the entire state. Homer D. Wade expressed an almost axiomatic truth when he said that the growth and development of Texas can only be brought about through state-wide concerted effort.

* * *

Taking in New Mexico

The West Texas Chamber of Commerce is spreading out to include New Mexico and is sponsoring a subsidiary organization for that state, as though West Texas does not afford a field large enough for its activities. This writer may not be far-seeing, thinks that what is needed most for Texas now is a closer co-ordination of its own regional chambers of commerce in matters pertaining to the good of the entire state.

* * *

Constitutional Amendments

It did not take much political foresight to forsee the defeat of the constitutional amendments to increase the Supreme Court bench from three to nine members and to raise the salary of the Governor from $4,000 to $10,000. The average taxpayer thinks that when there are at least half a hundred Texans seeking the office at the present salary it is folly to pay more.

He knows also that with the "perquisites" the salary is already nearer $10,000 than $4,000. A proposal to increase the Supreme Court from three to five members and to decrease the vacation period from three months to not exceeding one month would meet with more favor. An idea previals that Texas court officials do not work enough and that court expenses are for that reason much higher than they should be.

* * *

Baird Creamery

Baird has decided to keep up with the progress of the rest of the state by encouraging dairying through the establishment and "maintenance" of a creamery. The Baird Star commends the enterprise of course, and says it deserves the support of the entire citizenship of the town, adding that "their patronage is necessary for the successful operation of local industries."

There is the rub in many local industries. Too many people are indifferent to their support and spend their money away from home. I heard of a druggist recently who bought all his aprons and towels for use at his soda fountain from a jobber in another town to save a few cents, although the dry goods store next door was the best customer of the soda fountain and the cigar stand in the drug store.

* * *

Van Zandt Not Slow

The idea once prevailed that Van Zandt county was a bit slow, but if that was ever true, conditions have changed. The people there do big things in a big way. A bond issue of $1,500,000 for good roads has been voted by a majority of two to one. There are now nine miles of concrete road in the county, and the people have decided it pays to have plenty of good roads over which to reach the markets with the bumper crops they grow.

* * *

Longiew Builds Hotel

Of course it had to happen after the East Texas Chamber of Commerce located there, and Longview is now assured a $150,000 hotel, five stories high, bath in every room, elevators, big dining room and cafeteria, and everything else a modern hotel has. Those who have had to stop overnight at Longview any time in the last fifty years will be glad to see that hotel.

* * *

Memphis Gets Airport

Memphis was without an airport. Colonel Art Goebel wanted to land there on his tour, but there was no place where a safe landing could be made. Citizens got together and leased a site near town for a year and hurriedly put it in shape. It isn't much airport yet, but is a start in that direction and will likely result in a permanent landing field of the right kind. Aviation will soon be almost as general as travel by automobile. Why not be ready for it?

The Great American Home

Press Clips

Fifty percent of a man's business depends upon his business initiative—the other fifty percent upon general community prosperity. No individual, working alone, can control this latter fifty percent. It can only be done by men working together as a unit. Pool your interests with that of the other people in town and it will be the best single investment that you have made toward the promotion of your own enterprise. — Clovis News-Journal.

Premature graves are being filled rapidly these hot days. Automobile accidents are furnishing the victims. The hot dry weather has caused the piling up of fine dust along the shoulders of the highways and an auto turning out to pass another strikes the loose dirt and over it goes. Auto drivers should use extra precaution in passing cars on the roads during this dry weather spell.—Olney Enterprise.

Winter's survey of Saturday traffic revealed 377 cars parged on the streets and 233 of them Fords, Chevrolets was second with a total of 58, and Dodge and Whippet with 18 each. Chrysler was represented 7 times, Pontiac 6, Oakland 6, Nash 5, Buicks 4, Hudson 2, Oldsmobiles 2, Stars 2, and DeSoto, Franklin, Dort, Willys-Knight and Cadillacs once each.—Merkel (Texas) Mail.

Bankers have figured it out that the nation spent $75,000,000 celebrating the Fourth of July. The matter is important only in that it shows what the country will do for amusement. This amount would build a hard surfaced road entirely across the country. It would build three hard surfaced roads across Kansas north and south and three hard surfaced roads east and west. After all, the fret abount spending money for good roads is all hokum. The way to build a good road system is just to think of it as a big celebration and go to it. Three days afterward no one would miss the money the roads cost.—Claude News.

Another case of taking too much for granted is reported from Wappinger's Falls, N. Y. Oscar Widmer had been annoyed by petting couples parking near his home, so on a dark night he slipped up to a parked car and crowned the driver with a stick. The victim was not a petter, but an old friend who had stopped to chat with a neighbor. Widmer is held under $1,000 bond on a charge of assault. —Stamford American.

I like to do all I can for home industries. For that reason I always buy the City Bakery's Golden Crust bread and Carson County Creamery milk and butter. They are a wonderful combination. Golden Crust toast and Coronet butter, or pasteuerized milk toast. But there is one of our home industries that seems to be flourishing without my encouragement—I refer to the production of weeds.—Panhandle Herald.

A neighboring paper remarks that stories about the wild pioneer days and the stirring times they had, hurt the development of this country more than anything else. We want to tell the world there has been some changes in this country, Mr. Prospective Settler.

For instance drunk men used to shoot up a town. Nowadays they run cars into ditches and against other cars, and hurt people in that manner.

Really the old fashioned condition is preferable.—Dalhart Texan.

Instead of our highway markers, we might post the following tourist information: "To Reach Plainview, follow the string of empty sardine cans and cracked boxes."—Floyd County Hesperian.

There are now said to be fifteen candidates for governor of Texas in spite of the fact that the proposed salary raise was defeated. The only way we can see to get the salary boost amendment put over is for everybody refuse to run—just go out on a strike.—Henrietta Independent.

Business is one of the strongest controlling forces in the nation and its dictates rank with those of the most powerful moral agencies. The man who controls wages controls the habits of his workmen, for he has the authority to demand clear brains and steady hands.—Pampa Daily News.

"Keep Cool" is an expression one has often heard. We'd like to find that fellow so he can tell us how.—Olney Enterprise.

Mac — By Irving

DECK'S Didactics

By H. D. W.

Sometimes the most innocent of actions bring harsh criticism. No sooner had the paper come out in which I announced a wager of fifty cents on the possibilities of rain before Saturday night, than two separate individuals brought me a report that someone said I was trying to make money out of the prayers of the Nazarene people. All I was trying to do was to help get a rain. I don't know who started the report, but I am willing to lay it on Joe Hardy. He is viscious enough to do something like that.

* * *

The telephone wires in the alley back of my house, and in a number of other alleys for that matter, are resting on the electric wires. Good natured people like myself may never do anything about it, but some irate patron of the telephone company is going to get his pants shocked off some day when he answers the phone, and then there is liable to be a lawsuit. In time the wind will cause the telephone wires to wear through the insulation of the electric wires. When they do somebody will be shocked and it may include the telephone company.

* * *

Thursday is the day the war starts for the brunos and the fidos. If your dog has not been vaccinated against rabies, you ought to have it done, for the mayor has issued an order to shoot all loose dogs that are not vaccinated. Get your dog vaccinated and be sure the tag is put on his collar. If you don't want to do that you should at least keep him at home.

* * *

The burning of the O. K. wagon yard last Thursday night brings reminders of the important part that place and others of its kind once played in the life of this community. Fifteen years ago, a fire in a wagon yard would have been equivalent to the loss of a hotel, a garage, a filling station and a mill and feed barn. It was a stopping place for tourists, a supply station for farmers and ranked second only to the court house as a community center. There people met and swapped horses, stored their farm products, exchanged stories and went on their way after having once again made a vital contact with the existing civilization.

* * *

I can still remember the smell of the wagonyard, and I love it yet. The sweet scent of hay and the strong odor of horses linger with me. I would go down to Mr. Scagg's wagon yard with my father, and while he was trading mules I would be inspecting the beautiful saddle horses. They had better horses in the county in those days than they do now. An ordinary horse would sell for a hundred dollars, and a real good cutting horse has been known to bring two and three hundred dollars.

* * *

On one of our trips to the wagon yard, my father bought a race horse for me. He was a thoroughbred, and the owner said we would get the papers on him by writing to some place, but papa never wrote and I hardly knew how; so I had to content myself with telling Bill Godfrey, Dutch Higgins and Luther Sullivan that the horse was a full blood. I named the horse Lightfoot and tried to make a cowhorse out of him, but it wasn't a success. All that horse wanted to do was out run the cow; he didn't care much about turning them.

* * *

Thinking of that horse reminds me of how I used to long to go swimming. There were no swimming holes anywhere near town. I used to saddle up my horse and ride fourteen miles just to go swimming at O. M. We had a Boy Scout camp there one summer, and it was the happiest week I ever spent up until my eighteenth year.

* * *

Last week William Russell Clark published what was to my notion a very interesting issue of the Memphis Democrat, but it did not meet with the approval of some reader who sent in a caustic anonymous letter saying that he would quit if he couldn't do better. In all probability that particular writer couldn't get out a four page paper, and it is likely that he made a trip some place and was sore because it was overlooked in the columns of The Democrat.

* * *

My earnest hope is that by the time you read this a cool, refreshing, widespread and prolonged rain will have fallen over this county. It if doesn't, don't lose hope, because I have Ruffian Cocke's word for it that this county will make 40,000 bales of cotton even if it doesn't rain until December.

lary Dugan Trial 'Be Shown Soon Ritz Theatre

Seen Version of Great ay Will Show Monday And Tuesday

e first presentation in Wellon of "The Trial of Mary Dug Metro-Goldwyn-Mayer all-tang screen version of Bayard Veer's melodramatic stage hit, hbeen set for Monday at the R theatre.

[ary Dugan" ran for more th a full season at the National Ttre in New York City, conclng its engagement on Broadwlast summer. Before the end ofs run, however, four domestic rccompanies had been organized athe success of the play outsiof New York was fully as stng as its Broadway popularit At the present time there are fd road companies still touring thUnited States, with two in End, four in Germany, four in Hnd, two in Norway and Swedend one in France.

. Veiller, whose earlier succs include "Within the Law" a"The Thirteenth Chair," signeccontract with Metro-Goldwyn-Mr to direct personally the allgue film version of his play. was by no means his first ha experience, since he had director-general of the old o company for three years. It his first encounter with the ies," however, and he returned ew York from Hollywood an siastic advocate of the new tainment medium.

cast combining screen and talent, with Norma Shearer he title role, was selected by Veiller, in conference with M- for the picturization of the Miss Shearer had never aped before a microphone or had talking film experience, yet oice was said to be one of the so far discovered among Hold's erstwhile silent players.

ymond Hackett, who succeeded ate Rex Cherryman in the role ary's brother on the stage, has ame part in the picture, while important roles are played by . Warner, Lewis Stone, Olive Lilyan Tashman, DeWitt Jen-, Mary Doran, Adrienne D'court, Wilfrid North, Landers ns, Mary Dorne, Myra Hamp-Wescott Clarke, Charles Moore Claud Allister.

ky Gardiner prepared the huity for the screen version.

nen the film had its premiere the Embassy Theatre in New rk City, unanimity of opinion vailed among the critics that it the outstanding all-talking of its kind. It duplicated in ramatic guise the smashing ss of the all-talking musical Broadway Meloday."

he most expert piece of work has been delivered to the talkcreen," commented the Morn-Telegraph, New York's thel newspaper, and other newss expressed a similar opinion equal force.

cial praise was voiced by rers for Norma Shearer's splenecording voice and for the ng work of Lewis Stone, H. arner and Raymond Hackett.

ding Method f Horses Very Important Matter

method of feeding, as well feed itself, has a good deal with keeping the horse in condition. A horse that bolts should be made to eat it slowThis may be done either by ding the grain out in a large ox, or by placing several h stones in the feed box, or xing the grain with bran, cut r similar feed. Some horses te hay by pulling it out and apling it under foot. This is n caused by feeding two kinds ay, one of which is especially able. In this case, the hay e fed so that the horse will e more palatable first; or od hay may be withheld unother is eaten. Overfeeding, than underfeeding is a comistake when horses are workregular. The amount of feed vary not only between wind summer but from day to cording to the work.

One Candle for 100 Years

When John R. Voorhis, grand sachem of Tammany Hall, observed his 100th birthday, one lone candle was placed on his birthday cake to represent his 100 years. Voorhis is shown, above, cutting the cake as John F. Curry of Tammany Hall watches.

NOTICE OF PENDING SUIT

To all creditors who furnished labor or material in the erection of the building for independent school district of Wellington, Texas by J. D. Singleton during the year 1928:

You are hereby notified that United States Fidelity & Guaranty company has instituted suit in the United States district court for the Northern district of Texas, at Amarillo in clause No. 276 Equity, which suit is filed in accordance with Title 83, Chapter 4 of the Revised Civil Statutes of Texas, requiring all persons having claims for labor or material in the erection of said building to answer therein and set up their claims as required by said statute.

Said suit as filed by said plaintiff is against H. M. Singleton and others, the purpose of same being to procure a proper distribution of the funds remaining in the hands of the trustees of said Wellington Independent School District among the creditors entitled to receive same, and that all rights, claims and liabilities of any and all persons connected with said transaction shall be settled in one suit.

Said suit will be heard at the next regular term of the United States District Court for the Northern District of Texas, at Amarillo, Texas, beginning on the 2nd Monday in September, 1929, and all interested creditors are required to intervene in said court, all of which you will take due notice.

CITATION BY PUBLICATION

Citation by pubication to minors on application for discharge of guardian.

THE STATE OF TEXAS
County of Colingsworth

To the sherif of any constable of Collingsworth county, greeting:

D. B. Tattum, guardian of the person and estate of Edgar Tatum, Vema Straughn, nee Velma Tatum, Vera King, nee Vera Tatum, Ruth Wallace, nee Ruth Carpenter, Myrtle Bigham, nee Myrtle Carpenter, having filed in our county court his final account of the condition of the estate of said wards, together with an application to be discharged from said guardianship, you are hereby commanded, that by publication of this writ for twenty days in a newspaper regularly published in the county of Colingsworth, you give due notice to all persons interested in the account for final settlement of said estate, to file their objections thereto, if any they have, on or before the September term A. D. 1929 of said county court, commencing and to be holden at the court house of said county, in the town of Wellington, Texas, on the first Monday in September, A. D. 1929, same being the 2nd day of September, A. D. 1929, when said account and application will be considered by said court.

Witness, Marguerite Bartlett, clerk of the county court of Collingsworth county.

Given under my hand and seal of said court, at my office in the town of Wellington, Texas, this the 6 day of August, A. D. 1929.

MARGUERITE BARTLETT
Clerk of the County Court of Collingsworth County, Texas. 4-4tc

NOTICE OF APPLICATION FOR LETTERS OF GUARDIANSHIP THE STATE OF TEXAS

To the sheriff or any constable of Collingsworth county, greeting:

You are hereby commanded to cause the following notice to be published in a newspaper of general circulation which has been continuously and regularly published for a period of not less than one year preceding the date of the notice in the county of Collingsworth, state of Texas and you shall cause said notice to be printed at least once each week for the period of ten days exclusive of the first day of publication before the return day hereof:

Notice of Application for Letters—Guardianship

THE STATE OF TEXAS,

To all persons interested in the welfare of Charles Martin Bean; Lula Bean; John Millard Bean, and Nellie V. Bean, minors. A. E. Bean has filed in the county court of Collingsworth county, an application for letters of guardianship upon the persons and estate of said minors, Charles Martin Bean, Lula Bean, John Millard Bean, and Nellie V. Bean, which said applicatiton will be heard at the next term of said court, commencing on the first Monday in Septeember A. D. 1929, the same being the 2nd day of Sept. A. D. 1929, at the court house thereof in Wellington, Texas, at which time all persons intterested in the welfare of said minors may appear and contest said application, if they see proper to do so.

Herein fail not, but have you before said court on the first day of the next term thereof, this writ, with your return thereon, showing how you have executed the same.

Give nunder my hand and the seal of said court, at office in Wellington, Texas, this the 6 day of August A. D. 1929.

MARGUERITE BARTLETT
Clerk County Court, Collingsworth County, Texas. 4-3tc

Night Club Host Will Play Star Role in Picture

Ritz Presents Texas Guinam in Queen of Night Clubs this Week

Texas Guinan gives one of the most authentic characterization yet to reach the screen in "Queen of the Night Club," Warner Brothers' latest production in which she is starred, and which comes to the Ritz theatre next Friday and Saturday.

Miss Guinan gives so true a portrayal of a night club impresario, because she is simply being herself in the atmosphere in which she is familiar.

"Queen of th Night Clubs," in addition to the frivolous side of Broadway's stage and night club life, portrays the deeper side—bringing before us the loves, ambitions, troubles and joys of the actors in the play.

The playmakers go behind the the scenes of Broadway's show world and night club life, giving it with authenticity and stark realism.

"Queen of the Night Clubs" is an original story by the famous collaborations, Murray Roth and Addison Burkhart. The cast includes, in addition to Texas Guinan, such stage and screen celebrities as Lila Lee, Eddie Foy, jr,. Jack Norworth, John Davidson, John Miljan, William Davidson, Arthur Housman, Jimmie Phillips, Lee Shumway and others. The interest is sustained throughout the entire length of this startling picture which was directed by Bryan Foy.

If the young heifer is handled occasionally and gets accustomed to the halter and stanchion, she will be much easier handled when she is put into the milking herd.

Buffalo in South Dakota are on the increase. This year the herd of 140 added 40 more to its number.

Waxing Improves Looks of Linoleum

Waxing or varnishing improves the appearance of lineoleum and makes it last longer. Use wax on the inlaidkinds and varnish on the printed ones, for wax sometimes tends to soften the printed surface.

Coffee stains not more than a few hours old on washable fabrics can be removed by pouring boiling water on the stain from a height of 2 or 3 feet. Stretch the stained part of the fabric over a large bowl.

Cabbage Desirable As Market Product

Small or medium weight cabbage is the most desirable market size. Heads of pointed cabbage weighing from 2 to 4 pounds and heads of Danish and domestic cabbage weighing from 3 to 6 pounds are preferred. Cabbage for immediate shipmnet should be trimmed to 2 to 4 close fitting leaves. The green outer leaves protect the head and may be removed at the destination, if necessary, to give the cabbage a fresh appearance.

WE CAN SUPPLY YOU WITH PURINA CHOWS!
The Profit Building Feeds in Checkerboard Bags

Feeders of poultry and live stock around Wellington will be glad to know that they can now find the complete line of the well-known Purina Chows in our store. For some time we have been investigating various lines of commercial feeds. We have become a local authorized Purina distributor because we are convinced that Purina Chows will make more money for you who feed farm animals.

For 35 years Purina Chows have been lowering feeding costs—increasing egg production—putting more milk into the pail—putting more weight on hogs and steers and sheep in quicker time—keeping horses and mules in finest condition for hard work. What Purina has done elsewhere it can do right around here.

WORK TO WIN — WORK TO WIN

Cotton Crop Of 15,543,000 Bales Is Seen

Agricultural Department Estimates Condition 69.9 Per Cent

Cotton futures on the local exchange broke more than $3 a bale when large blocks of contracts were thrown on the market today after issuance of the Government crop report, forecasting a yield of 15,543,000 bales, as compared with 14,478,000 bales last year.

After closing during receipt of the report, the market reopened active and excited, with Wall street, New Orleans and Southern interests, who had gone long over the report, unloading their holdings, which were but moderately absorbed.

Prices immediately after the reopening slumped 31 to 37 points and later receded to net losses of 45 to 50 points as selling orders poured into the ring from alll directions.

The government cotton crop estimate, showing a larger crop than anticipated, sent cotton down about $3 a bale today on the Dallas market.

The estimate was 15,543,000 bales, as against 15,344,000 bales, as foreseen by private predictions.

The Government estimates the crop is 69.6 per cent normal as of August 1.

Previous to the report, the market ruled erratic, but after its issuance sold off from 44 to 50 points.

October sold at 18.40c. December 18.65c and January 18.65c.

The condition of the cotton crop on August 1 was 69.6 per cent of normal, indicating a total production of 15,478,000 bales, compared with 14,478,000 bales harvested last year, the Agriculture Department announced today.

The department estimated the yield of lint cotton per acre at 159.3 pounds, compared to 152.9 pounds per acre last year.

Census Bureau reports made public simulataneously showed 86,978 running bales, counting round bales as half bales, ginned from the cotton crop of 1920 prior to Aug. 1, compared with 88,761 bales for 1928 and 162,283 bales for 1929.

"While the crop is earlier than in 1928, it is about three days later than the average of the last five years for the belt as a whole," department said. "The advancement of the crop in Louisiana and Mississippi is above the average, but Oklahoma and Arkansas are about seven days late, and the other states two or three days late.

"Fruiting in Louisiana and Mississippi is more advanced than average at this date, Georgia is about average and other states less advanced than average for this date.

"In interpreting conditions as an indication of probable yield the board has made allowance for probable loss due to the boll weevil in accordance with the current reports on the boll weevil activity. These reports indicate that if usual weather prevails during the remainder of the season there will be more weevil damage this year than last in all states except Oklahoma and Arkansas.

"For the United States as a whole present indications point to weevil losses similar to 1927, in which year crop corrrespondents reported that the average yield was reduced 18.5 per cent because of weevils. During the last ten years loss due to weevils as reported has ranged from 4.1 per cent in 1925 to 31.2 in 1921, the average amount loss for the period being 15.8 per cent.

"Weevils are present in practically all parts of the belt and are a real menanceto the crop, but the ultimate losses due to this insect will depend largely upon weather conditions during the remainder of the fruiting season."

The department announced the following cotton conditions and per cent of yield estimates by states as follows:

Conditions indicated.

Percent of yeilds indicated.

State—	Normal	Acres	Yield Bales
Virginia	77	250	46,000
N. Carolina	68	200	787,000
S. Carolina	68	185	909,000
Georgia	69	150	1,182,000
Florida	70	115	25,000
Missouri	81	260	174,000
Tennessee	81	265	468,000
Alabama	71	170	1,317,000
Mississippi	76	215	1,921,000
Louisiana	69	160	715,000
Texas	64	128	4,798,000
Oklahoma	72	140	1,275,000
Arkansas	73	175	1,499,000
N. Mexico	86	376	91,000
Arizona	86	330	153,000
Californai	86	338	223,000
All others	81	201	10,000

Wrecked Planes Tell Own Story

These pictures tell their own story. Above is the damaged bullet-like plane in which Lieutenant Harold Bromley hoped to make a non-stop flight from Tacoma, Wash., to Tokio, Japan. It crashed on the take-off. Pictured below is the wrecked plane in which Captain P. L. Crichton and Owen Haughland, Minnesota flyers trying for a refueling endurance record, were killed when it fell after being in the air 154 hours. LL

Great Free Gate Expected at The Tri-State Fair

Wilbur Hawk Says Many Already Signified Intention to Enter

AMARILLO, Aug. 14.—With 5,000 catalogs sent out all over the Panhandle and Tri-State territory, several prospective exhibitors at the Tri-State Fair, September 23 to 29, have already signified their intentions to enter one or more exhibits at the Fair, Wilbur C. Hawk, president, announced today.

According to Mr. Hawk, present indications point to the greatest Faair i n the history of the exposition. It is believed that there will be nearly one-fourth again as many exhibitors displaying at the Fair as showed products last year.

Considerable interest has been shown from all sections of the territory, Mr. Hawk said, and the free gate, mammoth Hagenbeck-Wallace circus and other attractions are expected to help in breaking all attendance records.

Farmers, stockmen and others who intend to show at the Fair this year and have not already received catalogs are urged to write at once to Wilbur C. Hawk, president, Tri-State Fair association, Amarillo. Any information about the exposition will be furnished free immediately upon request.

Gerlach Has Ne w Battery Service

That they are now handling the Prest-O-Lite line of batteries was announced by the Gerlach Battery and Electric Service Monday. "The Prest-O-Lite Rubber-rib battery is a standard product that is nationally advertised and we are proud that we have the agency for such a battery," Mr. Gerlach said.

At present Prest-O-Lite enjoys the largest U. S. export business in replacement batteries and many of them are used each year by the government.

Byproducts Bring Profit to Farmers

The meat packer makes profitable use of every by-product of the packing business, and the grain farmer can do the same by salvaging the dockage, or screenings, from his grain, and feeding it to livestock. The average screenings are comparable, roughly to oats in composition. Heavy screenings from which the chaffy material has been removed are nearly equal to corn, wheat, or barley in percentages of the various nutrients. To avoid contamination of the soil through weed seeds all screenings used as feed should be thoroughly ground except when fed to sheep.

England Adives Better Cotton

AUSTIN, Texas. — Unless the quality of Texas cotton is improved the time is not far distant when it will be without a market, according to John A. Todd of Liverpool, England, world authority on cotton and principal of the City School of Commerce of that city. He addressed a large gathering of cotton farmers at the Texas State Agricultural and Mechanical College, pointing out the importance of improving the staple.

"In 1921, the American crop was 8,000,000 bales and in 1926 it was 18,000,000," he said. "How can a business carry on with such fluctuations? Your new farm board will be of the greatest possible service if it can smooth out the ways of supply and demand."

Todd declared he was independent of any branch of the business and that if he represented any viewpoint, it was that of the growers. "My self-appointed task is to go about the world, telling one-half what the other half is doing," he said.

Going back to the danger he thinks threatens Texas cotton, he declared that "over there in the old country we are too dependent upon your variable supply. We want to spread cotton over the world. We are succeeding in India. We are now in a fortunate position. When you over here are short, India may have cotton. We are already feeling the relief.

"In India we had trouble with the staple. It was very short a few years ago. Today, out of 6,000,000-bale crop, 1,500,000 to 2,000,000 bales are of at least an inch staple length. A few years ago you had a fine crop of sea island cotton, but that is gone now. In the West Indies we are raising that cotton, making 300 to 350 pounds to the acre of lint, with a staple of an inch or more and getting 50 cents a pound. Incidentally, we have no boll weevil.

"Here in Texas you once had 1 1-8-inch staple cotton, but now that is gone, and we do not know where to replace it.

"Then there is the question of quality. A large proportion of your cotton is what we call 'half and half' varying in its staple, some weak and strong strong, etc. I tell you that you've lost your good cotton and it should be a serious warning to you.

"We have great cotton growing countries like India, where the standard of living is low, and they can prosper by selling for less than you can. India is steadily getting up to the one-inch staple, while you are getting below.

"In the Argentine, East Africa, West Africa, Mesopotamia, Peru and Brazil a new supply is coming into competition with you. Competition is facing you from the Egyptian crop, which is at its very best, and more competition is coming from the Sudan.

"The spinner is rapidly getting to the point where he can pick and choose, and you should sense the graveness of it all."

Two Million Of New Fords Built In Record Time

Second Million Fords Built In Less Time Than Six Months, Says Alley

Completion by the Ford Motor company of the two-millionth Model A automobile has re-emphasized not only the fact that the Ford plants are now the busiest in their history, but has srved also to disclose the speed with which the Model A car has won world wide acceptance, according to E. W. Alley, local dealer.

The first million Model A Fords were built between Oct. 20, 1927, and Feb. 4, 1929, a period of more than fifteen months, during which time the company gradually forged ahead with its production rate and studied and adopted new methods by which greater efficiency and precision coulld be given to automobile manufacturing.

The second million Model A's were produced in less than six months. The rate at which the Ford Motor company is now building automobiles is indicated by the completion of 1,065,630 units in the first six months of the present calendar year, of which 919,549 were manufactured in the United States.

One of the recent chapters in the history of the new Ford has been the manner in which it has demonstrated its performance to the various foreign countries. Quickly recognized at home as a car that gave a new standard of speed, comfort and sturdiness in the low-priced automobile field the Model A Ford has now recorded a series of extraordinary triumphs abroad, many of which brought into competion a large number of cars of both American and European manufacture and design.

Rats Don't Like Certain Smells

Rats appear to have a strong aversion for certain odors, such as cresote, carbolic acid, and other coal and wood-tar derivatives, kerosene and peppermint and wintergreen oils, and this fact may be taken advantage o fin protecting stored grain from the rodents, or in preventing reoccupation of old rat burrows. Flake napthalene scattered on the floor and over the bags of sacked grain will keep the rats away and won't injure the seed. Nonodorous compounds that rats avoid can be used where an odorous material would be objectionable, as where foodstuffs are kept. Among these are powdered sulphur, lime, lye and copperas. Sulphur particularly has been found to be excellent in protecting stored grains from the ravages of rats.

Road Bond Voted In Hall County

Road bonds amounting to $350,00 were voted by two Hall county pr cincts in elections held Saturda The Turkey precinct voted bon for $200,000 while the Estelli precinct voted bonds amounting $150,000.

Improvement on highway No. 1 was assured with the success of th two bonds. This highway is on th proposed route between Oklahom City and Carlsbad, N. M. acro Hall county. Other lateral roa in the section are also expected be improved.

Both counties reported that th bonds carried by an overwhelmi majority, every voting box in ea precinct being carried. This wi result in pavement of the hig way which leads to some of th most important trading territori in the community.

Sept., 12, 13 & 14

The greatest exhibition of livestock, and especially of dairy cattle and poultry ever assembled in this county will be shown at the Collingsworth County Fair.

In addition to three days of splendid entertainment, you will be thrilled to see the advancement that has been made in dairying and poultry raising during the past twelve months. It will mean money to you to learn what your neighbors and other people in this county are doing.

MAKE YOUR PLANS NOW TO BE THERE WITH YOUR ENTIRE FAMILY

Collingsworth County Fair Association

Wellington To Meet Cordell Club In Playoff Series

Jack Knight To Pitch Opening Game of Series

Fighting Team Ready For Four Game Championship Series to Begin

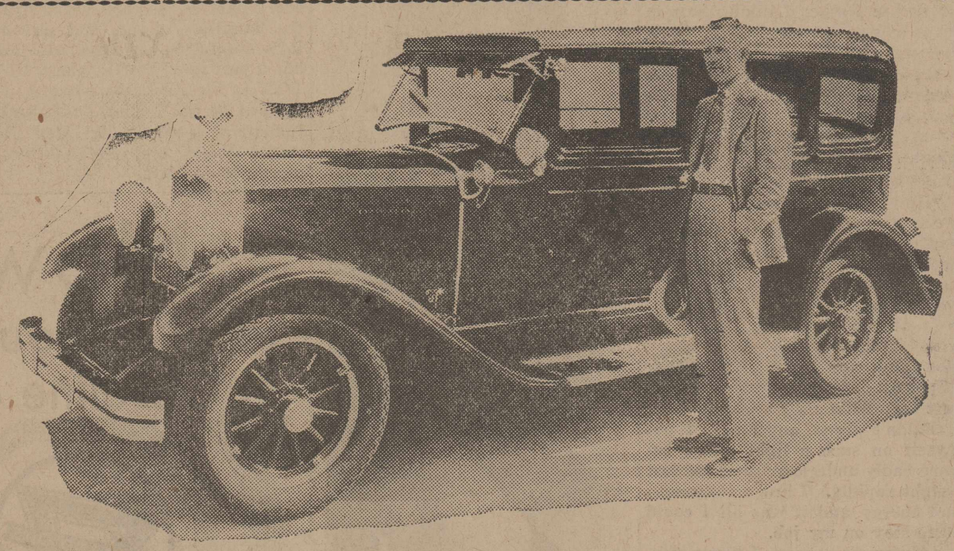

Wellington will meet Cordell in a two game series on Wednesday and Thursday, August 21 and 22 in the first of the play-off to decide the championship of the O. T. league. After the first two games in Wellington the teams will go to Cordell where they will play on Saturday and Sunday. In case both clubs win two games each a final and deciding game will be announced later.

Although Wellington has not be able to maintain the pace she set in the first half, the club is determined to win the pennant. Manager Travis Heatley turned in list of some additional players. Venable may be used to bolster the pitching staff since has been having trouble with his arm, and Red Gaither will be on the hot corner with back at his old stand again.

The changes, which are possibilities, Wellington will present the same lineup as usual with Caldwell behind the plate, Knight on the mound, first, McKenna, second, Mahan, shortstop and Wilson in the field. Gaither, Venable and French will be the hurling staff for the opening game Wednesday and will likely see a mound duel between Jack Knight, who has been pitching this season, and Caldwell, of tournament fame, while the boys are expected to base hits [illegible] Caldwell on the diamond than they did in Amarillo and the fans are praying for Johnnie to duplicate his homer against Caldwell.

It is probable that the merchants of Wellington will be asked to close their doors on the day of the first game in order that a record crowd may be present to see the first clash between the championship contenders.

Durant Schedule Equals That of Fast Express

Equalling the time of the fastest express train between Chicago and Dallas, Texas, a 4-forward speed Durant last week carried L. L. Graham, well known inventor, over the long run through the heart of the country in road tests for a radio set he has devised for automobiles.

Graham, who holds basic patents on all brake testing machines now in use, stopped only for fuel and meals en route. The Durant car, which had previously traveled 27,000 miles, gave him perfect service, the inventor said, and also lent itself admirably to radio reception because of the absence of vibration in the four speed transmission.

The purpose of this trip, Graham stated, was to try out an improved automobile radio receiving set with which he has been experimenting.

The Photograph shows Graham with his Durant sedan. He left Chicago in this car Saturday at 1 p. m., arriving in Dallas at 8:30 o'clock Sunday night, the actual running time being 27 hours and 15 minutes.

Shamrock. Frank Pavlousky.

LOST—A set of ivory dominoes. $2.00 reward will be paid if returned to Buddy Pearson at B. & M. Grocery. 4-?

FOR RENT—Two room house, furnished or unfurnished. 402 Floydada street. 4-1p

LOST—Spare Ford wheel and tire. Wednesday, between Childress, Wellington and Hollis. Reward. Notify this newspaper. 4-1

Experimental work by state and federal research workers indicates the wisdom of feeding young chickens with a mash containing 40 per cent dry skim milk. This tends to prevent losses from coccidiosis. Good feeding builds up an animal's condition.

The wise livestock feeder soon learns that the proper use of all farm by-products, waste, and surplus crops for feed often constitutes the main difference between profit and loss in feeding.

THANKS

FOR YOUR VOTES

I wish to thank the friends who are supporting me in the Whippet race, by the saving of votes in the various ways. I am in the race to the end, and assure you that any support will be highly appreciated.

Miss Puryear Entertains With Dinner Monday

Miss Margaret Puryear entertained with a six o'clock dinner at her home last Monday evening, honoring her guest from Oklahoma University. Those who were present at this delightful dinner were Misses Beverly Harvey of Shamrock; Ruby Farris of Rogers, Texas, Lula Masten and Eula Woodruff. Messrs. Gene Byrd of Dumas Texas, Therman Harris of Portales, N. M., Melvin Howe of Shamrock, Texas and Robert Masten.

Mr. and Mrs. Lewis Entertain Friday Dinner Bridge Club

Last Friday evening Mr. and Mrs. E. N. Lewis entertained the Friday Evening Dinner Bridge club at their home. After a delicious dinner the members enjoyed several games of bridge. At bridge Mrs. W. R. Orr was winner of high score for ladies and Mr. J. B. Stevenson was winner of high score for men. Mrs. Curtis Pickerel of Hunter, Okla., who is a sister of Mrs. Lewis was given a guest prize.

The following members were present Mr. and Mrs. Roy Pinkston, Mr. and Mrs. Pink Sullivan, Dr. and Mrs. W. R. Orr, Senator and Mrs. C. C. Small, Mr. and Mrs. J. B. Stevenson, Mrs. Curtis Pickerel of Hunter, Okla. and Mr. and Mrs. E. N. Lewis hosts.

W. M. U. Meets At Church For Mission Study

The W. M. U. of the first Baptist church met Monday, August 12th, for mission study. Fifteen members were present. Mrs. Leon Hodges, former pastor's wife of the Baptist church, was present and gave a very interesting and helpful talk.

The next meeting will be Aug. 19th, for Bible study. Rev. J. R. Joyner will conduct the lesson next meeting.

Members of the missionary society were very glad to have Mrs. Hodges and Mrs. Clarence Kesler present at the meeting.

Returns From Visit

T. H. Rainer and family returned the first of this week from Craig, Colorado, where they have been for the past two weeks spending their vacation. Mr. Rainer says the rainy weather kept him from doing much fisihng.

T. E. L. Class Entertains With Picnic

Baptist church entertained T. E. L. No. 2 and the ladies of the W. M. U. with a picnic at the J. O. Wells grove Thursday, Aug. 8. Contest games were played and enjoyed by all. A delightful social hour was spent after the games were over. Refreshments of ice cream and cake were served.

APPLICATION TO LEASE

Notice of Guardian's Application to Lease the Lands of his Wards for Oil and Mineral Purposes.

Whereas, on the 9th day of August, 1929, I, A. O. Brewer, guardian of the persons and estate of the minors, Annie May Brewer and J. W. Brewer, did make application to Hon. R. H. Templeton, County Judge of Collingsworth county, Texas, for an order authorizig me to execute an oil, gas and mineral lease upon all interests of said wards in and to an undivided one-twelfth (1-12) interest in and to the Northeast one-half of section 472, S.P.RR.Co. land located in Eastland County, Texas, to George C. Meridith of Weatherford, Parker County, Texas, and

Whereas, the court by its order has designated Sept. 24th, 1929, at 10 o'clock a. m. at the court house in Wellington, Collingsworth county, Texas, at which time and place said application will be heard, I therefore do hereby give notive of the hearing of said application as

Witness my hand, this 13th day above set forth.

of August, A. D. 1929.

Policeman Says Orgatone Helped

Officer Says He Feels Like Different Man Since Taking Ogratone

A. Spencer, residing at 1026 Bass St., Wichita Falls, Texas, one of the best known police officers in this section of Texas, is still another prominent citizen that comes forward with his unqualified endorsement of Orgatone, the medicine that is accomplishing such surprising and gratifying results throughout the south and west.

Patrolman Spencer not only stands high in this community but his acquaintance and popularity extends over a wide area of territory. While on his beat in Wichita Falls, he called at Allison's Drug Store and in relating his experience with Organtone said:

"I have never paid much attention to medicine in general. In fact, I had very little faith in any of them, but I had been keeping up with the Orgatone testimonials and I began taking it because a friend of mine told me it was one of the best medicines he had ever tried. I had been drinking hard water, also irregular meals on the night beat which did not seem to agree with my system and I got in a run down bilious condition. Well, I'm mighty glad now I took it, for the results have been fine and there's nothing too good for me to say for Orgatone. I had tried. draggy feeling for several months, also constitpation and suffered with gas on my stomach. My liver was sluggish, too, and I just felt generally run down.

"I just needed a general all-round building up and Orgatone has certainly done that very thing. I have taken only one bottle so far, but I have already improved until I feel almost like a different man. My appetite is fine and I can eat just anything I want and what I eat is giving me nourishment and strength. Gas don't bother me at all now and my sleep is sound and restful. My liver trouble is gone I'm relieved of constipation and feel more active and energetic than I have in months. Orgatone has done me a world of good and I'm glad to recommend it to my friends and the public."

Genuine Orgatone may be obtained in Wellington at the Palace Drug Company. —Adv.

Grain Machines Remove Weeds In The Wheat Fields

There are now on the market several grain-cleaning devices for removing green weed seeds from combined spring wheat, so that the wheat can be threshed more easily and stored with less danger of heating and damage in storage. Most weed seeds contain from 20 to 50 per cent of moisture at the beginning of the combine harvest, says the U. S. Depjartment of Agriculture, and if stored with the wheat they increase its moisture content and causes loss in storage. Some of the cleaning devices are attached directly to the combine so that the green weed seeds are automatically removed as a part of the combining operation. Green seeds containing high percentage of moisture are usually too large to pass through the standard screens provided in most of the cleaning attachments for combines. Another way of removing the seeds that is used by many growers of spring wheat, is to clean the wheat with a fanning mill or other grain-cleaning device within a few hours after harvest.

Bee Colony Can Be Iencreased By Very Easy Methods

A simple way to increase the number of bee colonies in an apiary, when each colony is to be divided in two, is to remove the lower hive-body containing the queen and brood to a new location. A hive containing empty combs is placed on the old stand, and a queencell containing a queen almost ready to emerge, is placed between the combs in a cell-protector, the second story being put in place. A hive-body with full combs of honey is put on the removed hive containing the queen for the winter food supply. To prevent the return of too many bees of the new colony to their old location, the entrance of the new hive should be closed with green grass. As this dries the bees are released. When the out-apiaries are maintained, the original hive can be divided into two equal parts the queenless portion given a queencell, and one part moved to another apiary to prevent its return to the old stand. Colonies should be increased before early August.

Ho, Hum! Bob Jones Wins Again

It's an old, old story, this scene pictured here. Bobby Jones has won another golf championship and he is being congratulated by Al Espinosa, above right, on his victory. Jones and Espinosa tied at the end of 72 holes for the national open championship and a playoff the next day resulted in a sensational victory for Jones. Below is pictured a scene during the concluding round. Espinosa is shown putting as Jones watches.

Proper Handling Would Eliminate Big Loss on Hogs

Many dead or crippled hogs arrive at the stockyards each year—a loss that can be largely avoided by proper handling of the swine just before shipment, the U. S. Department of Agriculture believes. When ready for market, hogs should be brought to the loading point long enough before shipping to get rested ,and kept in comfortable pens without crowding. If they are driven to the loading point they should not be rushed on the way; if they are hauled, too many should not be crowded together. Loading chutes should be made secure, not too steep, and with protected sides. Bedding should be provided in the cars, which should be free from broken timber, nails, and other material likely to cause injury. Crowding en route, particularly in hot weather, may result in some of the hogs dying. Loading the animals after a heavy feeding is injurious. There is nothing to be gained in added weight by forced feeding just before shipping. The aim should be to get as many of the hogs as possible to the stockyards in good condition.

Money Lost Yearly Shipping Livestock

The average yearly loss in transit of livestock from "shipping fever" and similar ailments is estimated at fully a million dollars and in some years runs as high as three or four million, according to the U. S. Department of Agriculture, which has recently published leaflet 38-L, Maintaining Health of Livestock in Transit. This leaflet can be secured free from the Department of Agriculture, Washington, D. C.

Immature Corn Is Good for Silage Says Government

When weather conditions such as hail, drought, or frost prevent the maturing of corn for the silo, it may be cut while still immature and produce a fair grade of silage. A good practice is to mix such corn with some which is more mature. Silage made from immature corn will be more sour than usual and more laxative when fed in large quantities so care should be used in efeding it.

Gained 25 Pounds By Taking Sargon

"Before I started taking Sargon I was down in weight to 140 pounds and was badly run down after years of suffering. Since taking Sargon I have gained 25 pounds and am back to my normal weight, which is 165 pounds.

"Up to a few years ago I had always been in fine health, then I commenced to be troubled with indigestion and constipation. It just looked like I couldn't digest anything. I put myself on such a light diet I became badly undernourished and lost weight rapidly. I lost my strength and energy and it was all I could do to stay on my job.

"Almost as soon as I began taking Sargon I started eating again and took on weight rapidly. I tell you it's fine to sit down at the table and eat a man's meal again. I am as full of strength and enery as I ever was and can do more work in one day now than I could in two before.

"The Sargon Pills toned up my liver and I no longer suffer from billiousness and constipation.

"After gaining 25 pounds I am feeling like my old self again and I think that is enough to convince everybody the Sargon treatment is wonderful."—Joe N. Canizard, 348 Washington Boulevard, Beaumont, Texas.

Sargon is now called "The Medicine with a Million Friends." Its marvelous record of achievement is probably without parallel in the history of the drug trade of this country.

Joe Hardy, agent. Adv.

Chrysanthemum

Bon't be fooled—it isn't a Chrysanthemum Marjorie Summers, of SanFrancisco, is holding even though it does look like one. It's a total of 612 pairs of wires "fanned out" which, when smoothed, furnish the interior of the world's largest under-water cable in the world. The cable will be placed between San Francisco and Oakland.

SHERIFF'S SALE

THE STATE OF TEXAS

County of Collingsworth.

Notice is hereby given that by virtue of a certain alias execution issued out of the Honorable Justice Court of Dallas county, on the 10th day of July, 1929, by B. H. Fly, justice of peace of said justice court for the sum of one hundred orty and seven-one-hundredths dollars and costs of suit, under a judgment, in favor of Pittsburgh Plate Glass Co., in a certain cause in said court No. 27627 and styled Pittsburg Plate Glass Co. vs. Ben H. Stover, placed in my hands for service, I, C. E. McKinney as sheriff of Collingsworth county, Texas, did on the 23 day of July, 1929, levy on certain real estate, situated in Collingsworth county, Texas, described as follows, to-wit:

Lots E½ of 21, all 22, 23 and 24, Block 164, city of Wellington, Texas and levied upon as the property of Ben H. Stover and that on the first Tuesday in September 1929, the same being the 3 day of said month, at the court house door of Collingsworth county, in the city of Wellington, Texas, between the hours of 10 a. m. and 4 p. m. by virtue of said levy and alias execution I will sell said above described real estate at public vendue, for cash, to the highest bidder, as the propertyof said Ben H. Stover. And in compliance with law, I give this notice by publication, in the English language, once a week for three consecutive weeks immediately preceeding said day of sale, in the Wellington Leader, a newspaper published in Collingsworth county.

Witness my hand, this 29 day of July, 1929.

C. E. McKINNEY,

Sheriff Collingsworth county, Texas.

By W. H. Stuart, Deputy 2-3c

Chickens from the flock selected as "broilers" should be put on a fattening ration gradually and care taken not to overfeed at the beginning. Keep the birds with a keen appetite for the first few days and gradually increase the quantity fed each time. Toward the latter part of the fattening period they may get all they will eat. Fattening rations may be made up of a variety of grains. Two good one are as follows: 6 parts corn meal, 2 parts rolled oats, and 1 part middlings; or 6 parts of corn meal, 2 parts ground oats (without hulls) and 2 parts middlings. Feed these rations with milk, using 2 pounds of milk to 1 pound of mash. If milk is not available, add one half part of meat scrap to the mash.

Pontiac Climbs Enchanted Rock

An automobile finally has conquered the picturesque Enchanted Rock, a solid granite mountain whose base covers an area of 640 acres in the region south of Llano, Texas.

The huge natural monolith, towering 521 feet above the surrounding coutnry, was scaled a few days ago by a Pontiac Big Six, the first automobile to reach the difficult summit. Previously visitors to the big granite pile had made the climb up to the tortuous mile-long trail either on foot or on the backs of sure-footed western ponies.

The hazardous exploit was achieved by Hildon Bradshaw of Llano who a short time previously had driven the same car in a non-stop run of 100 hours. Followed by a large and expectant gallery, Bradshaw negotiated the boulder-strewn pony trail which was used by the Indians long before the coming of the white wan. At times Bradshaw was forced to place four "running board passengers" on the high side of his Pontiac when the sharp angle of the rough trail threatened to overturn the car.

"I believe that only an automobile of expectional power equipped with full pressure oiling, gas pump and a Cross-Flow radiator can make that trip," declared Bradshaw after completing the equally dangerous descent. "Ample lubrication is a prime essential on such a climb. The fuel pump supplied plenty of gas no matter how steep the angle of scent and the Cross-Flow system conserved the radiator water even when it approached the boiling point."

Although corn is one of the best fattening feeds for hogs, it is not an economical fattening ration when fed alone. It takes about 50 per cent more corn to fatten young hogs when they are fattened on corn alone than when they are fattened on corn balaanced by some feed rich in protein, such as tankage, fish meal, or soybean meal.

CHEVROLET

Another Record!

a Million

SIX CYLINDER CHEVROLETS

on the road in less than eight months!

Less than eight months have elapsed since the first Chevrolet Six was delivered into the hands of an owner—*and already there are more than a million six-cylinder Chevrolets on the road!* And the reasons for this overwhelming success are easy to understand.

Into a price field that had hitherto been occupied exclusively by four-cylinder cars—Chevrolet has introduced a six-cylinder car of amazing quality and value. Not only does it offer the smooth, quiet, velvety performance of a great six-cylinder valve-in-head motor—but, from every standpoint, it is a finer automobile than was ever before thought possible at such low prices! Its beautiful new bodies—which are available in a variety of colors—represent one of Fisher's greatest style triumphs. And its safety and handling ease are so outstanding that it's a sheer delight to sit at the wheel and drive. In fact, the new Chevrolet Six has completely changed every previous idea as to what the buyer of a low-priced car now has a right to expect for his money.

You owe it to yourself, as a careful buyer, to *see* and *drive* this car. For it gives you every advantage of a fine six-cylinder automobile—*in the price range of the four and with economy of better than 20 miles to the gallon!* Come in today!

Two Materials More Stylish Than One In New Frocks That Stress Height

BY HARRIET

The long-limbered look is one smart women are developing in their new clothes.

Length of skirt, high waistlines, dipping panels and much more attention paid to emphasizing the bottom of frocks all accent the height of women. No longer is it enough merely to be a slip of a thing. One should now be youthful looking, subtly slender and possessed of modish curves.

Some Paris frocks use the princess lines without any belts whatever. These feature flares or flying panels from the hiplines so that there is no doubt of width at the bottom of the skirt. For daytime, skirts may be almost to the ankles in back and on the sides. For evening, many of them touch the floor.

One way to make over last year's straightline, short frocks is to introduce godets of contrasting frabric and then add a band of the fabric around the hem, lengthening the garment from one to six inches, as you may desire.

Another way is to introduce a hip-yoke of self-fabric or contrasting fabric and then to let in box pleats of the yoke's material below the yoke.

The big thing to remember about new styles is that the frock of two materials is more stylish than one.

Along with this long-limbered mode comes all manner of changing styles. The short jacket for instance, must be very short or else let its length down to three-quarters. With skirts to old shoe-top length, the jacket that hits just below the waistline is all wrong. Etons, however, with a waistline emphasized and flaring skirt below, are quite chic.

For the same reason, shawls that are full and almost sweep the ground are better than the wisps of chiffon that were short cape length this summer.

A very smart French costume illustrates this. It is a charming afternoon version of the famous tri-colored, red, white and blue. The frock is a bordered print of square dots on blue with a tiny circle in the center of red. The front of the blouse and the collar, cuffs and hem of the skirts use the border of the material. The collar, particularly, deserves a word of mention for its cute turn-down fashion and its red bow tie.

At left, deep fringes increase the length on the cape of a new long-lined frock; at right, a black moire, with princess line for length, uses a modified bristle for variety.

Over this wrap that is really a cape is thrown. It has fringe of red, white and blue that gives a much longer line than just the cape would.

For dressy wear, the French are bringing back the modified bustle, with a flaring skirt below to mark it as 1929. The skirts are very long.

One of these is made of black moire taffeta, with the smartest little pouf in the back. Its sleeves that are long and tight button with silk bullet buttons clear to the elbow. The collar is white with a black and white bow in the back.

An Editor Gets This Fad Going

Latest thing in men's summer garb is this outfit worn by Le Roy Esterdahl of Chicago, disciple of the pamaja-wearing fad started by W. O. Saunders, editor of an Elizabeth City, N. J. weekly newspaper. Esterdahl is enjoying a stroll down famed Michigan avenue.

On Farm Board

Samuel R. McKelvie, above, former governor of Nebraska, represents the wheat interests of President Hoover's new farm board. His home is in Lincoln.

Her Job Is A Man's---And Mrs. Parker Is Famous as an Fxpert Fish Curator

Although she had little knowledge of taxidermy at the death of her husband five years ago, Mrs. C. B. Parker, the only woman fish curator in the world, since that time has become nationally known by her work on Catalina Island, Calif., and now ranks among the best in the profession.

Genial, hearty, she radiates a spirit of cheer towards all and has the enthuasiasm of a child with his first toy about her work. Although she has received commendation upon her art from noted taxidermists as well as many museums, she makes light of praise.

"Of course, it's nice to receive letters praising my work, but the real satisfaction comes from knowing that I have done it all by myself," she says. "From the time the fish leaves the water until it is shipped to the owner, no hands touch it but my own. I even turn to carpentry to build the shipping cases just as I want them."

Although she specializes in the handling of all types of fishes, she has not limited herself to work of that sort. A visit to her shop reveals beautifully mounted specimens of mountain goats, several eagles, ducks, seagulls and a myraid of small birds that infest the island.

Hanging on the walls and suspended from the ceiling in colorful array are fish large and small. In poses so lifelike that one might expect them to jump into the nearby ocean and swim away are Yellow tails, Tuna, Dolphin, Albacore, Bonita, Sea Bass, Swordfish, Sunfish, Octapus, Sharks, Whitefish, Sheepshead and a host of others, all standing as silent testimonial to her art.

Queer denizens of the deep rarely brought to light constitute the favorites in her collection.

"Now here's a funny little fellow," she said, as she pointed to a pecular-looking fish about a foot long with sharp spines projecting from his back. "He is known as a sculpin. The spines on his back are said to be poisonous and I have known people to become delirious with pain from contact with them.

"I have a fish known as a hammerhead shark. His head measures over two feet in width and is very sharp. He swims with great rapidity and stuns his food by striking them with his head, often cutting in two a lesser fish.

"In my eighteen years on the island I have never seen one of these fish alive," she said, exhibiting a huge opalescent-colored flat fish. "It is known as a Japanese Ohap orr Moonfish and evidently comes up here by the Japanese current. Several have been found floating of the water dead, but no ever caught or seen for They must live at a depth.

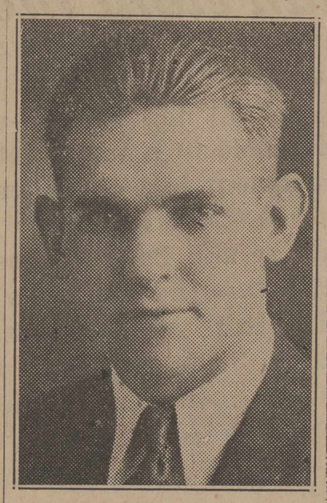

Mrs. C. B. Parker, famous woman taxidermist and fish curator at work in her workshop on Catalina Island, Calif.

Miss Lutie Benson and Ralph Long Are Married in Hollis Last Tuesday

Announcement has been made that Miss Lutie Benson and Ralph Long were married last Tuesday, August 13, at Hollis, Okla. The bride is the daughter of Mrs. Lora Benson of Commanche, Okla.

Ralph is the son of J. B. Long of Wellington and graduated from the Wellington high school with the recent class of 1929. He was president of his senior class, and has four year been a football star on the local gridiron. Recent plans of Ralph were to attend school at the state teachers college in Canyon, where he was to have played football. It is supposed, however, that he will abandon those plans and not appear in any of the college line-ups this year. For the past four years he has played the position of guard on the local team and his loss is realized with much regret on the part of the local football fans.

Miss Benson is the neice of R. H. Templeton, county judge for Collingsworth county and for some time she has been visiting her aunt and uncle. She was formerly a student of Commanche high school where she was distinguished for her social and scholastic activities. Friends of the couple suppose and hope that they will make Wellington their permanent home.

Whenever an animal dies on the farm, hold a post-mortem and try to discover the reason. If in doubt call in a veterinarian to determine the trouble. If several animals or fowls are unthrifty and are not "doing well," kill the sickest and find out the cause.

Fall Session—

(Continued From Page 1)

as English, mathematics, history, science, Spanish, Latin, social sciences, etc. In this particular connection it should be said that we have no intention of trying to exclude any worthy boy or girl from our schools;in fact we are going to test those pupils who come from unaffiliated schools only from a broad general viewpoint and not in the details of the various subjects. But it must be plainly understood that we are in charge with the serious responsibility of maintaining certain standards in our school work, and if we do not maintain these, we are liable at any time to forfeit our affiliation with the State Department of Education at Austin. Again, it is nothing but fair and just that we should ask pupils from unaffiliated schools to do at least some of those things that we require the pupils in the Wellington schools to do before receiving the promotions. At least one of those things is a series of thorough, comprehensive examinations each six weeks and at the end of each semester. All through the last session of school we endeavoured to get these examinations to those from the outside who cared to take them and upon their passing these examinations grant them credits on the same. We promise any pupil from an unaffiliated school credit on the years work if he or she would take and pass our last semester examinations. We have also promised to receive and record credits from the State Department by taking the college entrance examinations gave in May of each year. If the pupils have not taken advantage of at least one of three ways of obtaining advanced standing mentioned above, we shall be compelled to examine him or her before grantingthe classification that may be desired to such pupils. Any boy or girl who is energetic enough to go back and do some good hard work reviewing the subjects on which he or she wishes credit will have no trouble whatever obtaining the credit, if he or she made passing grades on these subjects at the time they were taken in the regular work of his or her school. Beyond these manifestly liberal propositions we are not at the present time prepared to go.

One cup of rice will absorb 3 or 4 cups of milk when cooked in the double boiler and is of course much richer in food value than when boiled in water.

During the summer the heifers needs no supplementary feed if the pasture is good. Late in the season she may need a little hay and grain to keep growing steadily.

Seattle Boy Is "Edison" Winn

It's his smile of victory which Wilbur Huston, Jr., of Seattle, Wash., displays so proudly as he is congratulated by Thomas A. Edison, noted inventor, at East Orange, N. J., as the winner of the Edison Scholarship contest. Huston competed with youths from all states. Henry Ford and Colonel Charles Lindbergh, who served as judges, are pictured here with Edison and the contest winner.

Graf Pays Visit to New York

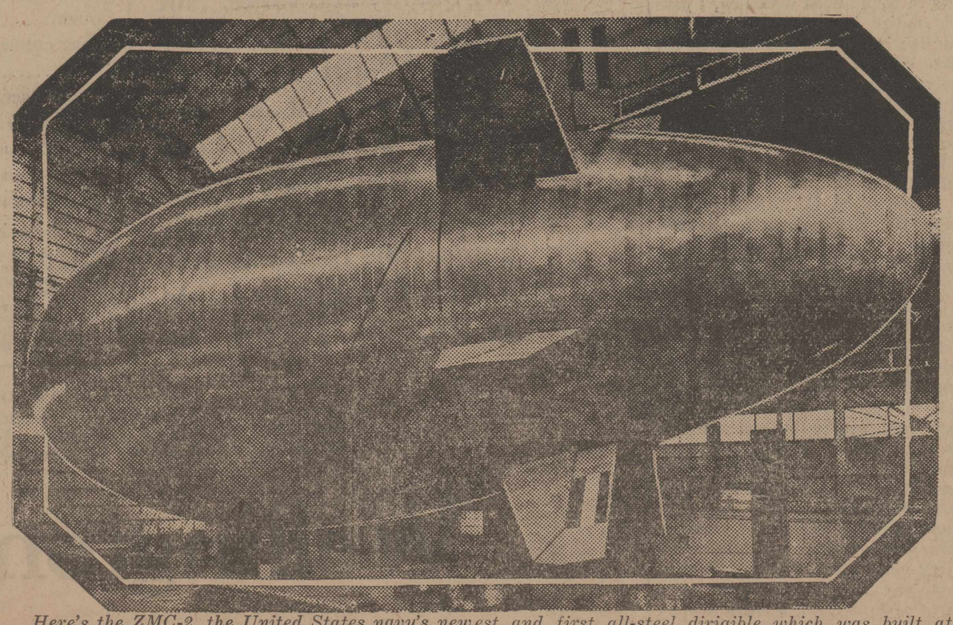

Here's a remarkable view of the huge Graf Zeppelin as it circled over New York's skyline in the gathering darkness before landing at Lakehurst, N. J., to complete its second flight to America from Friedrichshafen, Germany. The Graf presents an impressive picture in this camera shot. Dr. Hugo Eckener, commander of the Graf on both trans-Atlantic flights and who will be in charge during its around the world flight, is pictured in the insert.

Hoover Proclaims Peace Pact

President Hoover officially announced the Kellogg-Briand pact for the abolishment of war to be in effect at an impressive ceremony in the East Room of the White House attended by delegates from the 46 nations that signed the pact. Hoover is pictured here with former President Coolidge, left and former Secretary of State Kellogg, right.

Navy Soon to Get Its First All-Metal Dirigible

Here's the ZMC-2, the United States navy's newest and first all-steel dirigible which was built at Detroit and soon will be delivered. This lighter-than-air craft is controlled by the fins above and below the cigar-like body. The all-metal dirigible will carry a crew of four and a load of 1000 pounds over 1200 miles and has a cruising speed of 55 miles an hour. It is 150 feet long and 50 feet in diameter and is inflated by helium gas. Its weight is about the same as that of a fabric-covered dirigible. This is a stern view.

Millionth 'Chevy' Honored Aug. 14 By Radio Party

H. J. Klingler Makes Talk On the Achievements of Chevrolets

Forty-five radio stations, covering the United States, the Columbia Broadcasting System's network, took the ceremonies at Detroit incidental to the christening of the millionth Chevrolet Six, into the homes of millions on the evening of Wednesday, Aug. 14. The program opened at 8 p. m. eastern standard time, and continued 30 minutes. It was broadcasted directly from Masonic Temple in Detroit with an all-star list of radio performers on the bill.

The program was in connection with the Chevrolet Motor company jubilee banquet, which was attended by the entire Chevrolet sales supervisoroy force of some 2000 men who are in Detroit attending the mammoth Chevrolet sales convention Aug. 14, 15 and 16.

At the height of the banquet the millionth Chevrolet Six built since the present six was announced on January 1, 1929, was unveiled on the stage with H. J. Klingler, vice president and general sales manager of the Chevrolet Motor company, officiating in person. Mr. Klinger said a few words over the radio touching on Chevrolet's achievements.

Jack Donahue of the "Follies," co-star with Marilyn Miller in "Sunny" and "Rosalie," headed the entertainment as master of ceremonies, while Billy Jones and Ernie Hare, known to millions all over the county as "The Happiness Boys," gave some of their best numbers, which have won for them a commanding place in the field of radio entertainment.

Grace Hayes, the "Personality Girl," and one of the most popular radio and stage stars presented a cycle of popular songs. Her crooning voice has won the affections of millions of radio fans. All of these stars were brought to Detroit from New York for this Chevrolet celebration program.

Throughout the program Jean Goldkette, nationally-known symphonic jazz conductor, and his famous 29-piece Victor Recording Orchestra were on the stage and broadcasted some of the snappiest hits of their repertoire. Ted Husing of the Columbia Broadcasting System held the "mike" as announcer.

Texas Sponsors Rail Program

AUSTIN, Texas.—In a review of railroad construction in Texas, Jon A. Smith, member of the state railroad commission, declared that what was done last year and is under way at present form only the beginning of an expansion program by railroads of the state. He said the cost of extensions and new lines now under construction and projected will be more than $50,000,000. He pointed out that there are many counties, rich in agricultural and mineral resources which have not yet been provided with railroad transportation facilities.

"The great railroad construction program in Texas the last few years and projects soon to be undertaken," Smith said, "not only will greatly develop property valuations in areas affected but will enhance the general revenue of the state. More persons will be brought in, towns will build up ,new industries will be established, more resources will be utilized.

"Only recently they have found a new building material in Jeff Davis county on land heretofore considered of little value. I have noted wherever a new line is built products are forthcoming for tonnage that were neglected before.

"We have enjoyed a big railbuilding program in West Texas, but it was only the beginning. Extensions will come rapidly for the next 10 years and longer, perhaps."

There are in Texas 33,000 miles of bus lines, with about 300 authorized companies, while the truck lines are expected to reach 2000, Smith stated. The property valuation of the bus lines will not exceed $6,000,000, while that for the trucks has not yet been determined.

"In nearly every instance," Smith said, "bus and truck lines parallel rails and do not strike out into virgin territory, which makes it all the more apparent that the railroad is our most economic necessity."

About 29 passenger trains have been eliminated in Texas during the last year and a half due to the inroads of private automobiles and busses into the passenger traffic, and application is now pending for concelling two more trains. The rail lines, however, have been able to show a profit every month due to reduction of operating costs and increase in freight, Smith pointed out.

Better Designs In Small Homes

National Survey Shows Trends in Residence Construction

Kitchens are more nearly alike in all houses than any other room. The builtin garage has worked its way down from the more expensive homes into the moderate priced list. The front porch is rapidly going out of style. A sun parlor on the rear of a house has become fairly common and the rear living room is no longer a curosity. The majority of living rooms are tbaut two-thirds as wide as they are long. Dining rooms are usually more nearly square, and bedrooms are larger in two-story houses than in one-story dwellings.

These are present trends in small home construction as discovered by a study undertaken by the divisioon of building and housing of the department of commerce, the results of which were made public by James A. Taylor to members of the home builders and subdividers division of the national association of real estate boards, at the annual convention of the organization. Mr. Taylor, who is acting chief of the divison of building and housing, established by President Hoover, when he became secretary of commerce in 1921, for the promotion of home ownership on a sound economic basis, told the realtors that the survey contained records from 38 cities, with information on about 300 details of more than 200 typical houses is as many subdivisions.

"Most people agree that present home designs is improving steadily" Mr. Taylor said. "One reason for this is that a designer is now more often able to start with a good setting for the house than formerly The efforts of the national association of real estate boards to promote good subdivisions layout and city planning, and the general movement for better planning are bearing fine fruit. Zoning and deed restrictions are aiding to maintain the character of residential neighborhoods. This all gives an incentive to better architecture and designers assume a long life for house and emphasize durability at many points."

The lowest priced houses now being built in quantity in the larger cities to day are five and six rooms with one-story construction apparently predominating for the fiveroom, and two-story for the sixroom size, according to the results of the government check as detailed to the realtor home builders by the division head. The sixroom, two-story house is favored more in eastern cities, whereas in cities of the middle and far west, the five-room bungalow is in the lead in the lowest priced group.

Morever, the survey held forth some reassurance to those decrying the fact that the home has been surrendered a sa place for social life. It evidently hasn't. A fireplace that traditional nucleus for home sentiment, is being built in by far the majority of homes today, and a sun porch, which furnishes additional room for hospitality, is likewise demanded by the majority of home builders and purchasers. Radios, too, Mr. Taylor declared, are serving to retain the home as the center of the family's social life pattern.

"Notwithstanding the fact that American people have become better informed during the past few years as to the points of a good home, most Americans are still much keener judges of motor cars than they are of houses." Mr. Taylor said in conclusion. "A man does not buy his car on the basis of its upholstery; with a limited amount to spend he should not buy a house principally because it has an electric button to open the cellar door, when what a family really needs with a home is a comfortable, cleanly, attractive place to live."

Dairy utensils should be washed with warm water and an alkali or soda-ash washing powder—never with soap. Use a stiff brush for scrubbing them—never a rag.

More fertilizer is used on cotton than any other one crop in the United States. The price, yield, and acreage of cotton one year determines largely the quantity of fertilizer bought for use on the following crop.

NEW FALL COATS

Styled by Madam Lucille

Among our fall showings of nationally advertised merchandise will be found our Redfern coats, styled by Madame Lucille. They come in all the new fall colors, and are trimmed in Southern Mink, Manchurian and Canadian Wolf with both collars and cuffs interpreting the latest mode. J. E. Warrick Co. Is New Purina Chow Dealer

Company Will Make Study of Poultry and Livestock Feeding

Appointment of the J. E. Warrick Mill & Grain Co. as the exclusive distributors here for the famous Purina Chows has just been announced by J. E. Warrick, head of the local concern. This is quite a distinction for his firm, in view of the fact that the Purina mills selects only the outstanding firms to represent them and their products.

"Before taking the Purina line," said Mr. Warrick, "I have become thoroughly convinced that this company, the largest manufacturer of livestock feeds in America, is actually doing more than it claims. For thirty-five years the Purina Mills has been manufacturing feeds with one point always uppermost in mind—to lower the farmers' production cost by increasing the production of milk, eggs, beef, poor and horsepower; to prepare livestock for market in the shortest possible time.

"That they have done that has been proved consistently on the feed lots of America as well as on the experimental farm of the Purina company itself. Notwithstanding this, chemists and nutrition experts of the company are constantly at work, trying still further to improve the Purina products.

"Right here, I want to emphasize the fact that Purina Chows are not intended to take the place of home grown grains. Their purpose is to supplement the home grains and form a complete, balanced ration and to make the home grains worth more."

Warrick states that it will be his aim of his company to render real service to feeders in this territory. "We will not be satisfied to sell the Purina line," he declared. "We want to know what is paying the feeders. For this reason we will call back on the feeders regularly to see that they are feeding for best results. The company is equipped itself to give real advice on all problems of poultry and livestock feed, and the Ralston Purina company is backing us up 100 per cent."

Nitrogen Loss Is Easily Prevented

Nitrogen loss from the soil by leaching is largely avoidable, say soil scientists of the U. S. Department of Agriculture ,if farm practices are planned so as to prevent the accumulation of nitrates during the late summer. This can be done by planning the rotation so that a crop in an active growing condition is present at the time nitrate formation is proceeding most rapidly, or shortly thereafter. Nitrate formation is usually at its maximum during the hot summer months. Cowpeas and soybeans are good hot weather crops, and rye is an excellent fall and winter cover crop. Cowpeas, soybeans, velvet beans, wheat, or rye may be drilled or sown between rows of corn after the last cultivation. These catch or cover crops not only protect the soil from erosion and leaching, but may be used as hay, pasture, or green manure crops.

Graveyard Stuff

By Jimmie Gillentine

"Ego, Ego, Ego," would be a good name for a local play with Richard Cocke, Lester Benge, and Roscoe Sasser as the only characters. The boys may be right about their being "scientific dispensers of carbonated beverages," but in the cotton county they are always called "soda jerkers."

▫ ▫

Willie Scruggs says that these "round ups" the new groom always gets seem silly to her. I suppose that Julius thought it was silly to, but he was not gripping about the $6.03 he made. I just wonder if it would be possible to "get the works" without getting married. Naturally the money would not appeal to me, but every one seems to enjoy themselves so much that the idea does seem worth while.

▫ ▫

Did you ever notice that the persons most interested in these affairs are the ones that have already been married? Self preservation however, seems to play a small part with Bill Leggitt, John D. Glenn, and Willie Dryden, who, led by Sandy Parsons, seem most persistant in the persecution of the newly elected providers.

▫ ▫

In the history of marriages in Wellington, no one can seem to remember when Ralph Lewis took part in one of these affairs. Of course no one will assume that the other boys are more eligible than Ralph; he just does not approve of such actions, I am sure. But really Ralph we would like to know who the lucky girl is.

▫ ▫

Now that Budge Harle, former assistant editor of the leader, has permanetly transferred his home to Hollis, it begins to look like our neighboring city is going to be repaid for all of the pains they have spent to pave the streets and advance the welfare of the community in general. Won't Budge feel good when he sits down in a big chair, puts his feet on the desk and all of the assistants say, "Yes Sir, Mr. Harle." Although the readers are sure to miss him and his Graveyard column here at Wellington, we all recognize the fact that a capable, self made man has advanced to a more responsible position, and despite our loss, let us rejoice in the good luck of our neighbors. Editor Harle, this column and its readers wish to congratulate you.

▫ ▫

The medical profession seems to prosper despite the present drouth. First they operate upon every eligible person in town and then begin to import them. Frances Wooley even came all of the way from Okemah and then when she got here decided to have her tonsils removed. So many other people were having operations, she must have decided that it was one of our old Spanish customs or maybe its just in the atmosphere. If it does not rain soon maybe some other fad will come along before the whole township gets hewed and sliced upon.

▫ ▫

Mr. "Believe-It-or-Not" Ripley says that at Harbin, China on June 29, 1928 a "rain of blood" fell for three hours, leaving the landscape, yiurts, and cattle painted a deep red hue. If it had been as long since they had a rain there as it has here, they would have probably have forgotten how rain was supposed to look and all of the excitement could have been avoided. Wouldn't it be nice for the manufacturers if all of the cotton could be dyed when placed on the market? Red dresses, coats, ties, stockings, and shirts would, no doubt, be the vogue.

▫ ▫

But alas! There could be no more gentlemen, the said species who are supposed to prefer blondes. To be caught, bareheaded in the rain would mean a flaming mass of red hair for those delicate young ladies and no amount of peroxide would restore the natural color. Clara Bow had better hope that they do not develop the picture fad in China.

▫ ▫

Johnnie Wallace and Doctor Jones must have been betting on elections or else have entered some kind of contest, for about sundown each afternoon, either of them may be found industriously watering their lawns. A close observer will always notice, however, that their wives are usually nearby, which may or may not have anything to do with their concentrated efforts.

Oakland Will Continue With Present Lines

Says Forecasting Modes Makes Model Changes Unnecessary

No material mid-season changes will be made in the 1929 models of the Oakland All-American Six andthe Pontiac Big Six, it is announced by W. R. Tracy, vice-president in charge of sales for the Oakland Motor Car company.

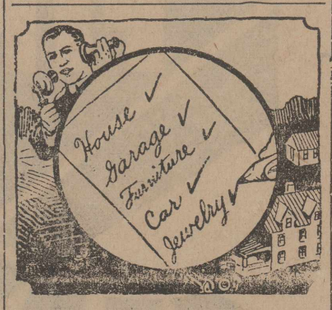

In previous years it had been the policy of the Oakland Motor Car company to introduce a new line of Oakland Sixes in mid-summer and new Pontiac models at the begininng of the year. As a result of this policy the factory recently received many inquiries regarding its plans for the remainder of the year.

"No changes are needed," Mr. Tracy explained. "The sustained demand for these cars offers the best proof that they continue to lead their respective fields in appearance, engineering and performance.

"Model changes invariably are made to keep cars abreast of the popular demand for style and performance. It will be remembered that the present Oakland All-American Six was not introduced in mid-summer but in November of last year. The new Pontiac Bix Six followed last January.

"The fact that we need no mid-season changes denotes a new and important step in the policy of the progressive manufacturer. Today he has become a forecaster. Instead of following the lead of others, he literally forecasts the mode and builds his cars to its requirements. Long before the present Oakland and Pontiac Sixes were designed, the Oakland Motor Car company had carefully determined the trend of public preference. Thousands of reports were received from our dealers and field men. General Motors' stylist and Fisher Body craftsmen independently checked our findings as to what features and designs, what colors combinations and what lines were destined to become popular.

"The Research Laboratories of Geenral Motors, co-operating with our own engineers, had perfected chassis advances that developed new peaks of performance. We knew that we were building more speed and performance into our 1929 cars than were required at that time to meet the current standards expected by the public. But we built to meet a previously determined public preference that we knew eventually would develop. Thus the Oakland All-American Six and the Pontiac Big Six remain the outstanding cars of their respective price classes.

THE NEW AJAX
GOLD BOND
BALLOON
Bonded for A Year and A Half
Against Blowouts, Cuts, Bruises, Accidents And Other Road Hazards!

The AJAX Gold Bond Performance Contract is the most sensational development in the tire industry since the invention of the modern balloon tire!

Now, for the first time, motorists are definitely protected against tire trouble in its most annoying and costly forms.

Only a superfine tire could justify so sweeping a pledge, and the new AJAX Gold Bond Balloon is precisely that kind! The first extra quality tire at popular prices! Our stock is complete.

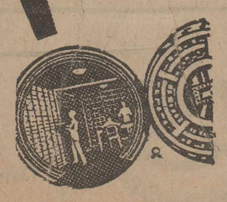

The AJAX Gold Bond Balloon is backed by the strongest, longest-term performance contract ever placed on any passenger car tire.

Warranted for eighteen months, while used on passenger car service, against Blowouts, Cuts, Bruises, Wheels Out of Alignment, Under-inflation, Accidents, and any other road hazards that may render the tire unfit for further service

SAFE!

FROM the cluthes of bandits and burglars. Safe from lurking, destroying flames. A safety deposit box in the First National Bank vault costs you about a penny a day. Is it too high a price for peace of mind.

FIRST NATIONAL BANK

Let the extra miles in CONOCO *gasoline buy it for you . . . .*

IF you keep an accurate record of gasoline costs, you know that every extra mile you get from a gallon is so much velvet. In the aggregate these extra miles represent a handsome saving—enough to pay for those greatly desired accessories you've had in mind; perhaps a pair of new inner tubes or an extra set of spark plugs. That's why it will pay you well to fill only at the Conoco sign—the red triangle—the symbol of extra miles.

Conoco gasoline is refined to produce maximum mileage without in any way sacrificing those other essentials of a good motor fuel—quick starting and rapid acceleration. It functions efficiently at every step in the driving operation with special emphasis on power and mileage.

Look for the new Conoco Red Triangle. Fill 'er up. Then speed away for extra miles.
