DRY RAINS DRENCH COUNTY

Though only an inch and a half of rain has been registered at the government gauge at Allen's, every section of county has been thoroughly drenched by light but steady rain that have fallen since Saturday last week.

Roads are impassable in places. On the South Bennett creek one of the Goldthwaite bridges bogged down Tuesday afternoon and had to be moved over night. Wednesday morning Bennett creek at Crawford's near Center was so deep enough to swim a horse at the crossing.

Work by the WPA men in Goldthwaite has been delayed for better weather. Farm work is at a standstill. The bright side to the clouded weather is that Mills is getting a bottom sea-like anything in recent days and springs are running. There have been dry since the beginning of the century. At Morton's place north of center of strong mineral has broken into his well.

CHURCH NOTICES

The Methodist Church

Some one has said that there are three classes of people in the church. First the "Reliables." These can be counted on always and under every circumstance. They are ready to serve and support the church regularly, liberally and promptly. They seek constantly to know and do the will of God. They regard sacredly their vow to God and the church. They will not be defeated here. The second class the "Unreliable." This class is just what the word indicates. They cannot be depended upon for any active part in the work or program of the church. The hope of the future of the church is certainly not in this class. It is not to this class that the master shall say, "good and faithful servant." Not many of us want it said of us we are unreliable in the various relationships of life, so why should it be said of any in the church?

Baptist Reminder

This is the time of the year when we begin to think of Christmas. We are always anxious to give and receive our gifts. We have around 800 orphan children at Buckner's Orphan Home who are anxious for us to make them happy. The Baptists of Texas are the only parents they have. This coming Sunday, we must do our part to make it a success.

Next week beginning Monday night, December 7 and lasting through Friday night, December 11, we are to observe the Lottie Moon Week of Prayer throughout the association. This is a week set apart once every year by the Baptist women of the South to present the cause of foreign missions. Last year the offering throughout the south was \$175,000, \$100,000 of this amount paid the salaries of 125 missionaries. The remaining \$75,000 was spent in general up keep of churches, schools, etc. It was called the Lottie Moon Week of Prayer in honor of Lottie Moon, one of our very greatest missionaries. You will hear more about it as you hear the speakers throughout the county next week. Under the direction of our county W. M. U. president, Mrs. Watkins, of Mullin. We plan to reach all 15 of our churches in the association by reaching 3 churches each.

ONE TRUCK'S WILD RIDE

Kansas City, Kans. — A 15-ton truck on a wild rampage finally came to a stop at this hardware store. A part of the damaged wall of the building rests on the truck, which cannot be removed until workmen brace the structure so the

wall will not collapse. Such destruction of property, particularly by irresponsible itinerant truckers, is the reason why safety councils nationwide are seeking more stringent laws thoroughly regulating motor transports.

Social Security Cards Mailed From Here

Employees of Goldthwaite's business houses have responded promptly to the requirements of the new Social Security Act by mailing their applications for account numbers.

Saturday is the deadline for turning in the cards which may be secured at any post office. They must be filled out in ink or typewriting, and the information required includes the county as well as town of birth, and if not born in a town, some indication as to the general location. The mother's maiden name—not married name—must be given. If any of the information required is not available, "unknown" must be written in the space.

Employees who have not received application blanks from their employers, may secure them at the post office.

TUESDAY STUDY CLUB

The Tuesday Study club met this week in the home of Mrs. J. M. Campbell with Mrs. Raymond Little as hostess.

Mrs. Paul McCullough gave a resume of H. L. Mencken's treatise on "The American Language." She was assisted by Mrs. Walter Glen Saylor, who gave the derivation and meaning of the given name of each club member and guest.

From Mrs. McCullough's review, which traced the progress of the English language from the first colony at Jamestown, Virginia, to our present news reporters, we learned many interesting things. One of the most surprising facts brought out by the reviewer was this: The American language is generally considered a dialect of the English language but since popular usage has made the former so much more outstanding than the latter Mr. Mencken believes that in the very near future the English will be considered a dialect of the American language.

This review was interesting as well as very informative and Mrs. McCullough is to be commended.

Delicious refreshments were served to club members and the following guests: Miss Grace Moore Skinner, Miss Lillie May Ealey, Mrs. Scott and Mrs. J. M. Campbell.

DINNER BRIDGE

The lovely home of Mr. and Mrs. Walter Fairman was the setting for an elaborate dinner bridge party on Monday evening at seven thirty at which time Mr. and Mrs. C. M. Burch were co-hosts with Mr. and Mrs. Fairman in entertaining a large group of friends.

Nine tables were laid in festive array, symbolic of the approaching Christmas holidays. Covers and place cards embellished with poinsettias, red candles and miniature Santa Claus figures and gorgeous white chrysanthemums added to the gala spirit of the evening.

Partners for the dinner were assigned in a novel manner and after places were found a delicious three course dinner was served, roast turkey being the entree.

The tables were cleared at the close of the feast and score cards

CONGRESSMAN F. L. CRAWFORD OFFERS GOLDTHWAITE LIONS HIS AID ON FLOOD CONTROL

Goldthwaite Lions club decided Tuesday night to continue the custom established several years ago of erecting a lighted Christmas tree on the square. The entire town is urged to participate in this expression of the holiday spirit by erecting trees and displaying wreaths and colored lights.

At this meeting of the club, Congressman F. L. Crawford, who represents the Sixth Michigan District in the national congress at Washington, was the guest of honor and principal speaker. Mr. Crawford is a native of Erath county, Texas but has resided in Saginaw, Michigan for many years, and represents that populous section in Washington. He was the only Republican in his county to survive the Democratic landslide in the November elections. As the owner of a large tract of land on the Colorado river at Rafter-Crawford's Mill—he expressed himself as keenly interested from a personal as well as public standpoint in the success of the flood control measures that are being sought by the Mills County Conservation Flood Control Association. He stated that a measure should be introduced in congress without delay authorizing a preliminary survey of the Colorado river watershed, including Mills county, and declared that when such a measure was presented, he would gladly secure for it the support of the Michigan delegation in congress.

GILCHRIST IS NAMED TO INTERNATIONAL GROUP

President Roosevelt has named Gibb Gilchrist, state highway engineer, a United States representative on the permanent international commission of the international association of road congresses.

Mr. Crawford discussed the new social security act at length, and announced that he favored extending its benefits to farm laborers. He is well known as a sound economist, and his talk to the Lions showed that his reputation for clear thinking is well deserved. He also went into the subject of government finances and left his hearers in a maze of billions of dollars.

Tolbert Patterson and S. J. Casey of Mullin also were visitors to the club and made brief talks. F. P. Bowman talked of the football game at San Saba last week and the desirability of securing a lighted athletic field here. L. B. Porter talked about the newly organized band.

MRS. ARTHUR J. MOORE TO VISIT GOLDTHWAITE

A special invitation is extended to the women of the Methodist church to meet with Mrs. Arthur J. Moore, wife of Bishop Arthur J. Moore of San Antonio, for supper Saturday evening at 6:30 o'clock in the basement of the church. A turkey supper will be served free of charge. Mrs. Moore is a most interesting and appealing speaker and we are honored to have her with us. This will be a time of great inspiration and every woman of the church should put forth an effort to be present. Please consider this a personal invitation to come. Mrs. Moore is in demand, not only throughout our West Texas Conference, but throughout other conferences of our state.

D. 1934 married to the defendant Perry Salling in Refugio county, Texas. That by reason of the fraud and misrepresentations perpetrated by the Defendant herein and hereinafter set forth the said marriage was void or at least voidable at law. OIL-PLATE YOUR ENGINE

This is exactly true: Oil-Plating supplies lubrication in LESS THAN NO TIME AT ALL!

Faster than "instantly"... faster than the fastest-flowing Winter oil might even begin to flow, Oil-Plating is ready to lubricate.

That's because a genuine Plating of Conoco Germ Processed oil is always left firmly bonded to every working part. Like any other real Plating, this Oil-Plating cannot run off. After hours or days of standing in the cold, Oil-Plating

is still perfectly ready-to-go.

Now these days you read on every side, how poorly-oiled starting causes most engine wear, and how fast a Winter oil ought to flow. But you cannot have even a doubt of sure starting-lubrication, when it is always UP IN ADVANCE. That's Oil-Plating... a plain, straight, economic reason for changing to your correct free-flowing Winter grade of Conoco Germ Processed oil—patented. Costs no more than changing by hunch.

ES WIN OVER RIVALS

Eagles have fulfilled one desire in life, to beat madillos in San Saba. This was accomplished last Tuesday, November 3, with a 13 to 0 score in the Eagles' game with the Eagles. This game was the climax for the 1936 season of the Eagles. Goldthwaite rejoiced at the news.

Primary reason that the eagle team came out on top was the determination with the Eagles played, and the reason was that they played the best game they ever played. They not only won the score, but by penetrating first downs and yardage. These following figures show: Penetrations—San Saba, 5; Goldthwaite, 11; yards gained—San Saba, 150; Goldthwaite, 284. Figures prove, as those who know, that the Eagles simply were not able to stand the battering of the line that the Eagles played, and the San Saba did not come out unscathed, as the 13 to 0 score.

Starting line-ups for both teams as follows:

SQUAD DISBANDED

There have been difficulties to the pep squad this year. This organization has to face since 1926, but, of these odds, we are well satisfied with the work. In 1926, there has been an elected leader to guide the squad, but this year we have the girls, Lorine Bledsoe, Martin and Joyce, who had never served before. They have intelligently made this a successful season. The president, Ohlenbusch, also deserves credit. She has been in our school two years, but from the first she has shown the true football spirit in us. We praise these girls for the unyielding spirit which they have carried on.

ATHLETIC FIELD

Still think the boys and girls of Goldthwaite deserve a playground. Don't you. A number of local citizens have expressed themselves in taking some steps to be taken to provide a playground for our school. If you have a feeling to talk to some one else. Let the feeling spread. Not cost a lot of money, but do a lot toward developing character of some boy or girl.

SCHOOL COSTS VS. CRIME COSTS

Oftentimes the cost of public school stands out as a big factor in the minds of the public. And it is a big factor when viewed alone. There is no use to say that it does not require a lot of money to operate the school system of the state of Texas.

But on the other hand let us see if the money spent for school does not take on the appearance of an investment. It costs to paint a house, but who will not say that it is a wise expenditure, or investment.

According to a recent release it costs one thousand dollars to convict a person of crime and sentence them to prison. Then it costs three hundred sixty-five dollars per year to keep them there. As compared with this cost it costs just about fifty dollars to keep a boy or girl in school one year in the public school system of Texas. Maybe you will say what are the relations between the two items. The relation is this: prison records show that less than ten per cent of the inmates have completed the fourth grade in the public school system. Do a little figuring for yourself. Is it not a good investment, considered from the point of money alone, to spend fifty dollars to keep a boy or girl in school a year when by doing so you lower the chances nine to one of him becoming a prison inmate at the much higher cost.

CHATTER COLUMN

There are some things we are afraid to investigate for fear we might be shocked, so we are left wondering:

Why people call Voyd Lee Doggett and Lester Moreland "nursemaids?"

What happened in Dorothy Hartman's living room Sunday night? It seems the cold weather had something to do with it.

What caused Shultz to get a fifteen yard penalty at the Burnett game?

Why Miss Gatlin said, "You little black-eyed—" and stopped without finishing?

We don't know who discovered Troy Berry's whiskers, but we guess it was a girl. Any way, it has been suggested that Troy doesn't stand close enough to the razor.

The gossips say that Mr. Stephens escorted a junior girl to church Sunday night. How about it?

It seems that Lester Moreland and Voyd Lee Doggett have taken a liking to sophomore girls. In fact, Lester tries to step out with two at a time.

We don't know who he is, or where he is from, but we hear that a certain boy is still pining for Jean Goosby. Jean doesn't seem to mind though—thanks to Milton Tate.

STATE TEACHERS MEET

As has already been mentioned a number of our teachers spent the holidays attending the state teachers association in Fort Worth. The program was well planned and ably executed. Some of the strongest educational leaders, as well as some of the big business men of the entire nation, were on the program. As one teacher walked through the corridor Monday he was heard to think that as he goes to more and more of these conventions he is more convinced of the importance of the pupil in the school.

Some folks may wonder what teachers do when they get together in these conventions. They talk shop with each other, discussing their problems and the solution if any they have found. They hear some very inspiring lectures, and some not so inspiring, calculated to give added inspiration and enthusiasm. They have opportunity to see the latest in school equipment and methods, since the leading publishing and supply companies have exhibits of their products.

GRAMMAR SCHOOL GOSSIP

The sixth grade room presented a very interesting Thanksgiving program, the day before Thanksgiving day. The program told of the Mayflower compact, the landing of the Pilgrims, and the first Thanksgiving. The characters were dressed in white cuffs and collars and black breeches. We enjoyed this program very much and wish to thank Mrs. Bigham for directing it.

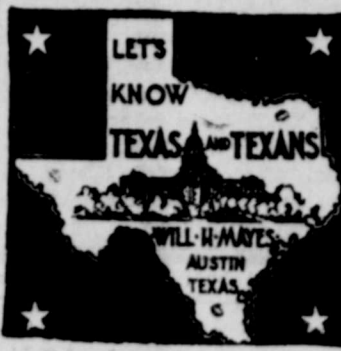

The high school has a gossip column in the paper, so we think we ought to get to tell, also, about our love-sick ones. We intend to hire a couple of gossip hunters for grammar school, so you had better watch out.

Naomi Childress was absent from school all last week due to an acute attack of appendicitis. Naomi's friends hope she will be back in school by the time this report is read.

The freshman class is glad to have two new members, Alene and Ellis Mahan. The new comers attended the Goldthwaite school during their third, fourth and fifth grade years and we are happy to have them back.

The senior class regrets to report the withdrawal of Edgar McNutt from school.

CATTLE BRANDS IN TEXAS HISTORY

Much of the story of Texas centers in the cattle industry. "A Century of Texas Cattle Brands," a book of 64 pages, gives a vast store of information, showing early brands and their owners, these arranged by counties.

The introduction by Peter Molyneux, the sketch of the cattle industry by Frank Reeves, and the foreword by Amon G. Carter contain much information of special interest to cattlemen and other Texans.

THE METHODIST CHURCH—

(Continued from page 1)

Third, the "Liabilities." It is easy to see what spirit controls this class. They are sensitive, selfish, jealous and operate under certain moods, and so often the moods are not favorable. Now just imagine what a wonderful year this would be if every member of the church should go into that first class for one full year.

We believe there are many in that first class already, and that many more will come with these. Each one must classify himself. We want to remind you of the two important church nights, Monday and Tuesday of next week. All members from A to L inclusive will meet Monday evening at 7:00 o'clock with Raymond Little, general chairman, and all from M to Z Tuesday evening with A. H. Smith, general chairman. We trust each division shall have the fullest possible attendance. These two nights should be occasions of delightful fellowship and great inspiration as we talk of the program of the church we love. This is a splendid time for all to be in the "Reliable" class.

Services next Sunday: Sunday school 9:45 a. m. A class for every age.

Preaching 10:50 a. m. by Mrs. Arthur J. Moore of San Antonio. Epworth League 1:30 p. m.

These young people are planning a new and larger program. They mean to grow by going forward. Preaching 7:00 p. m. Subject: "Things That Matter Most."

Mid-week prayer service Wednesday 7:15 p. m. A hearty welcome to worship with us is given to all who do not worship elsewhere. Attend the church of your choice every Sunday.

JOHN K. BEERY, Minister.

Church Of Christ

Our meeting conducted by visiting preachers was a splendid success. The lessons were all enjoyed and we were given something to think about in the days to come.

Services were well attended Sunday and Sunday night. There were thirty-two present for our young people's Bible study. We are pleased with the splendid interest they manifest and the development being made.

Religion is something you do and not something you get. Solomon said, "In all thy getting get an understanding." The thing wrong with modern religion is that people have tried to get religion rather than an understanding that they might know how to do (practice) religion.

You are invited to attend every service of the Church of Christ. You will find a welcome anytime you attend the services. "We are all one in Christ."

E. W. STOVALL, Minister.

Nazarene Remarks

We had excellent attendance in the Sunday school last Sunday considering the weather. While we can't complain about the Sunday night attendance, yet the effect upon the audience caused by the weather seemed more serious at this time than at the morning hour. Don't let the weather keep you away from church or you may let it keep you away from heaven. Yes, and don't let business or other matters that busy you, keep you away or the the same result may occur. Well, that is quite serious isn't it? But notice the one that is always there without an excuse, and you will notice that that one is miles up the road in their experience ahead of the one that just makes an excuse. Try it.

Saturday night, December 5, Rev. J. C. Henson, our district superintendent, will be with us and preach. When we announce the coming of one of these officials, it is often thought by the public that it is just a special meeting for the church, but it is not so on this occasion, but is a special service for the public. Come.

All the regular Sunday services as usual. We invite you to worship with us.

We are very sorry to report that Imogene Moss turned her books in Friday. She is moving to Llano. Imogene will be greatly missed in the school room as well as on the basketball court. For several years Imogene has been a guard on our basketball team and how we will be able to do without her is one of our greatest problems.

Henry Wallace Long spent the week-end with Morris Sellers. Most of the boys in the manual training class have made their first project as well as done quite a bit of repair work.

The junior boys played Center City's junior boys Friday before last. Even though they defeated our boys we are anxious to return the game and defeat them. Those outside of school who witnessed the game were Garland Patterson, Sally Jean Hyslop and Campbell Thompson.

Carlton Renfro started to school last week. Parents be sure and remember that P.T.A. meets Friday (tonight) with a short program. Those who attended the centennial during the holidays were Mr. Doss, Mrs. Long, Duward, Ralph and Johnnie Marvin woods.

PASTURE IMPROVEMENT

Why should stockmen buy or lease more grazing lands when they can carry from three to five times as many stock by improving the pasture they have? This may be done at a reasonable cost by contouring grasslands this winter. This retains the run-off water on the land and its benefits are apparent. Next spring the timber can be killed at a cost of a few cents per acre.

Pasture improvement is of the greatest importance in this section where stock raising is a major agricultural activity. The county agent desires to start a number of demonstrations this month. It is expected that the government program will include benefit payments for pasture improvement next year.

The first of these will be a contouring demonstration at C. A. Smith's ranch 7 miles north of Mullin on Hamilton road, December 8, 1:30 p. m. Meet at Mr. Smith's mail box promptly at that time and we will show that this part of the work is inexpensive.

At this meeting we will make dates with other ranchmen for laying off contour lines.

Date: December 8, 1:30 p. m.

Place: C. A. Smith's ranch, 7 miles north of Mullin.

The theory now gaining

acceptance is that the weather
travels in cycles of cold winters
and warm winters. The cycle in
which our grandparents passed
their youth happened to be one of
the cold ones.

Of still greater importance is a
second conclusion recently arrived
at by meteorologists. It is that we
are at the threshold of a cycle of
cold winters such as those the old
folks talk about.

J. H. Kincer of the Weather Bu-
reau in Washington points to
the interesting thought that cen-
turies, like years, have their winters
and their summers. By this he
means that long sustained periods
of cold weather may be called the
"winter" of the century in which
they occur, just as the prevalence
of warm weather over a period of
years may be termed the "summer"
of a century. Up until last winter
we had been passing through one
of these periodical summers. With
the lower temperatures which made
their appearance then, Mr. Kincer
thinks it likely we may be entering
upon a periodical winter. He ex-
plains that it is a surmise on his
part, not a prophecy.

The reason that little credence
has heretofore been placed in the

fabulous yarns concernings the
tough qualities of old fashioned
winters is that the difference in liv-
ing conditions between the present
and the past would make the ear-
lier era harsher by contrast.

"Why shouldn't the people who
experienced the discomforts of
those times feel convinced in their
own minds that the old time win-
ters were much colder than those
of recent years?" the skeptics have
asked. "Keeping warm used to be
a difficult job; now it is accom-

plished by the simple process of
turning a switch. It is the subcon-
scious comparison between the dis-
comforts of old and the luxuries of
the present which have caused this
delusion." But now it is likely that
skeptics were wrong and old timers
right.

The economic importance of
weather forecasts has grown stead-
ily. All agriculture and all industry
are deeply affected by seasonal
trends. Definite knowledge that a
winter will be either mild or se-

tomobile owners, as they are manu-
factured now, are capable of with-
standing the hardest blows of win-
ter if they are properly protected.

Recent surveys have shown, how-
ever, that owners are more con-
scious that ever of the necessity of
acting in time to avoid the incon-
venience and expense of frozen en-
gines. One of the principal lessons
taken to heart is that the motor
should be protected by the best
anti-freeze obtainable, one of per-
manent type which will not boil
away and leave the owner at the
mercy of the elements. With an old
fashioned winter on its way, auto-
mobile authorities point out that
there is more reason than ever
that this precaution be taken early.

All branches of transportation
railroads, bus lines, airplane com-
panies—are watching closely the
course of weather events in the
light of Mr. Kincer's "surmise" con-
cerning the approach of another
cycle of hard winters. But none
will be more interested than the
family of automobile owners for
they know that the menace of low
temperatures calls for early pre-
cautions.

RATS ARE ECONOMIC AND HEALTH PROBLEM

That rats not only destroy property, but carry disease germs, is a well known fact. Prompt and effective measures by the United States public health service for killing and rat proofing buildings have saved this country from serious epidemics, such as occurred in the Old World in past generations.

It has been estimated that in the United States, rats and mice each year destroy crops and property valued at over \$200,000,000, and even this large amount of money seems small compared to the human misery and loss of life which these small pests may cause.

If rats are in your home or business house, kill them as soon as possible. Because rats increase so rapidly it is useless to expect more than temporary relief from campaigns of riddance restricted to killing only. To be of lasting benefit the work of building rats out of their shelters and away from their food supply must go along with that of trapping, poisoning, and other means of eradication.

Rats eat every known food, both animal and vegetable. The removal of garbage, rubbish, trash and similar material is of importance in rat control as it affords shelter as well as food.

In recent years the use of "red squill" as an effective rat poison has placed in our hands a most effective weapon. In case human beings or domestic animals should eat the bait containing "red squill" they would vomit and rid themselves of the poison, but it seems that rats cannot vomit and they die of a progressive paralysis which kills in from one to four days, thereby giving them time to take to the open, as they commonly will.

A thoroughly and systematic campaign to rid your neighborhood and community of rats will not only save money but will preserve your health and that of your family.
