General Rain Over County Aid to Crops

Total Within City Limits in 2 Days Over Half an Inch

Midland county crops, beginning to seriously need moisture, have been greatly benefitted in the past two days during which rainfall varying from one-half to two inches have fallen.

According to scattered reports from over the county, almost every section has received rain. Approximately one-half inch was reported at the T. E. Bizzell farm, three miles south of town, with the fall heavier south of here.

At the airport, 10 miles west of town, .60 of an inch was reported, compared to .52 of an inch in the city during the two days.

The precipitation in the city limits amounted to .15 of an inch Tuesday and was increased to slightly more than a half inch yesterday afternoon and last night by a fall that registered .37 of an inch.

Rain was reported heaviest in the county between the airport and Odessa, climaxing in a downpour at Odessa generally estimated in excess of three inches.

Downtown streets of Odessa were reported to have been flooded Wednesday afternoon, and the highway leading out of the town on both the north and south was said under water for approximately a quarter of a mile.

Residents of Odessa living in tents and other temporary structures in the low-lying parts in the east part of town were reported to have suffered heavily from the high waters, several of the tents having been reported on the ground. No loss of life or injuries was reported.

South of Odessa, the good rain extended to the Crane county line. North of Odessa, a good rain was reported in the vicinity of the O. B. Holl ranch.

Northeast of Midland from which direction the rain here came, the heaviest precipitation was in the Tarzan community of Martin county. It also was good around the Stanton-Burns ranch and southward to Germania.

Southwest of Midland, a half inch rain was reported to have fallen at the Roy Parks headquarters, and heavier at his Estes place.

Southeast of Midland, only scattered showers were reported, although roads were slick for a time over a small stretch.

Late News

FORT WORTH, Aug. 19. (P)—The bodies of Hovey Durringer, 34, and his wife, 28, who disappeared Tuesday night, were found floating in Eagle Mountain lake, north of here, today.

LONDON, Aug. 19. (P)—Harry Gindell-Matthews, inventor who claims he possesses a secret "death ray," announced today he would shortly marry Ganna Walksha, Polish opera singer and former wife of Harold Fowler McCormick, Chicago.

WASHINGTON, Aug. 19. (P)—The senate passed the Wheeler-Johnson child labor bill today by unanimous consent and sent it to the house.

Prominent Rancher Of Colorado Dies

COLORADO, Aug. 19. (P)—A career which had been closely connected with West Texas ranching history since 1879 was ended Wednesday morning in the death of R. B. McEntire, Sr., 69, for whom funeral services will be held here this afternoon.

McEntire died at his home near Sweetwater, where he had lived in recent years. He suffered a stroke a week ago.

Besides his wife, he is survived by three sons, E. Fowler McEntire of Sterling City, W. R. McEntire of Colorado, and R. B. McEntire, Jr., of Tulsa; a brother George H. McEntire, Sr., who lives at Sterling City; a sister, Mrs. L. B. Clark, who lives in Dallas. Another son, James McEntire, died in March at Sterling City. Six grandchildren also survive.

Mr. McEntire was an uncle of "Little George" McEntire, local airplane pilot.

MARRIED YESTERDAY

Mr. Buck Marlow of Goldsmith and Miss Patsy Wells, formerly of Midland, were married yesterday afternoon at the court house. Justice of the Peace, J. H. Knowles performed the ceremony. Mr. Marlow's father was witness.

Countess Babs on Heiry Outing at Venice

She's one of the richest girls in the world, but she isn't too rich to enjoy a romp on the beach with her son. That's blonde Barbara Hutton, Countess von Haugwitz-Reventlow, who looks solicitously back at her son, Lance, now 17 months old, when he protests vociferously against her going ashore at Venice's Lido and leaving him with his nurse. This is one of the rare pictures of the baby heir to the Woolworth fortune.

Midland Man To Drill On Edwards Ranch In Ector

By FRANK GARDNER.

Jack D. Bodkins, Midland operator, announced here today that he will drill a wildcat in southeast Ector county on land belonging to Will P. Edwards of Big Spring. The test, which will be started on or before Sept. 20, will be located 330 feet from the south and 2,310 feet from the east line of section 37, block 43, township 3 south, T. & P. survey. It is scheduled to go to 4,800 feet unless oil or gas in commercial quantity or sulphur water in the big lime is encountered at a shallower depth.

Much interest has been attached to the area at the junction of Ector, Crane and Upton counties within the last few months since a geophysical "high" was established by seismograph "reflection" shooting in the extreme southeast corner of Ector. A total of \$72,000 has been spent for leases in the area within the last 30 days.

Acreage on the high is held in checkerboard pattern by Bodkins and several of the major companies. The Texas Company holds leases on 3,520 acres. Bodkins has 2,660 acres, and Atlantic Refining Company and Humble Oil & Refining Company each have 960 acres.

Pecos Deep Test. Cellar and pits have been dug and water well has been drilled for a new 8,000-foot test in extreme northwestern Pecos county. It is the M. L. Benedict No. 1 Test, 330 feet from the south and west lines of section 9, block 8, H. & G. N. survey.

In the western Crane Ordovician area, Sinclair-Prairie et al No. 2 Tubb Community, test 2,310 feet from the south and 330 feet from the west line of section 3, block B-27, public school land, is coring Simpson lime at 5,968 feet.

Farther east, Loffland Brothers No. 3 J. B. Tubb, newest well to show for Ordovician production, cemented 7-inch casing at 5,704 feet with 300 sacks and is standing. It topped Simpson, middle Ordovician, at 5,790 and the Ellenburger at 5,840.

Long-Time Resident Of City Discovered Dead In Bed at Home

W. H. Cox, 88, a resident of Midland since 1898, was found dead in bed last night by his wife, apparently the victim of a heart attack.

He had been in ill health for several years and his death was not totally unexpected, although he had voiced no complaints of feeling worse recently.

Born in Tennessee in 1849, Cox moved to Texas as a young man and had lived in Midland for the past 39 years.

Funeral services will be held at the Ellis Funeral Home tomorrow afternoon at 3 o'clock with the Rev. Cliff M. Epps, pastor of the First Methodist church, officiating. Interment services will be at Fairview cemetery.

Pall bearers will be J. B. Hoskins, Herman Klapproth, Addison Wadley, Clyde Knight, Luther Tidwell, Charles and Harry McClintic and Chas. Siken.

The deceased is survived by his wife and a sister who lives at Llano, Texas.

Gas Pressure on East Texas Wells Said Declining

AUSTIN, Aug. 19. (P)—The Railroad Commission today heard a report from its engineers that gas pressure in the East Texas oil field had declined sharply within the last month.

E. V. Cottingham, chief engineer, said the decline of 13.71 pounds in one month's time was excessive and that withdrawals of oil were too great.

The commission also received a report of the federal bureau of mines estimating the Texas share in the national demand for oil in September at 1,413,600 barrels daily.

Sam Ashburn, 42, San Angelo Writer, Is Victim of Death

SAN ANGELO, Aug. 19. (Spl)—Sam Ashburn, 42, originator and conductor of "The Windmill," livestock column in the San Angelo Standard-Times, died today of a heart attack. He had been connected with the paper since 1923.

Ashburn was probably the best known newspaperman in West Texas, his work daily taking him in contact with persons all over this section.

Known chiefly for his writing on livestock, Ashburn was also a feature writer of note, his stories of the many West Texas towns that have sprung up through the production of oil, attracting wide notice. He was always on hand at all large stock sales anywhere in West Texas, furnishing complete coverage on happenings for not only his own paper but also to others.

Funeral Services Held for Infant

Funeral services were held this afternoon at the Ellis Funeral Home for Martin Lee Jones, infant son of Mr. and Mrs. Reese Jones, who died last night. The baby was born at 8:30 yesterday morning and lived slightly more than 12 hours, succumbing last night at 10:30.

Rev. Winston F. Borum was in charge of funeral services and interment services, held at Fairview cemetery.

The infant is survived by his mother and father and one small brother.

Duke of Windsor May Buy Va. Home

WARRENTON, Va. Aug. 19. (P)—An unconfirmed rumor that the Duke of Windsor might purchase the 1,200 acre North Wales club here for a home gained strength today upon a statement by club president Robert Winnill that "somebody has been nosing around lately with offers for the place."

County's First Bale Auctioned Off Today For 15-Cents Pound

Midland county's first bale of cotton was auctioned off this morning in front of the First National bank and brought the owners, T. E. Bizzell Jr. and Delma Ray Bizzell, young sons of T. E. Bizzell Sr., a price of 15 cents per pound.

The bale was purchased by T. E. Wilson, owner of Wilson Dry Goods Company, and Marion Flynt, head of the Flynt-Hubbard Motor Company. The price paid by the two for the bale was approximately double the price it would have received on open market. The best grade cotton was reported selling on the markets at 10 cents this morning; the first bale was extremely short staple. This was partially attributed to the fact that the bale was pulled, rather than picked.

Augmented by premiums contributed by local merchants, the first bale brought the two boys a total of approximately \$115. The bale, weighing 505 pounds, was worth \$75.75 to them, and the premiums amounted to almost \$60.

Judge Jas. H. Goodman served as auctioneer in selling the first bale and received a total of five bids before finally announcing it "sold." An initial bid of 12½ cents was made by Wilson, a 13-cent bid was made by Sam Preston, Wilson hiked the ante to 13½ cents; Tom Wingo raised the bidding to 14 cents; then Wilson and Flynt collaborated in making the 15-cent offer that was accepted.

The bale was grown by Bizzell and his sons on the Bizzell farm three miles south of town and was ginned last Saturday, eight days ahead of the first bale brought in last year.

A list of the contributors for the first bale follows:

Ever-Ready Auto Service, M. System Grocery, Flynt-Hubbard Motor Co., Glass and Myrick, Addison Wadley, T. R. Wilson, Perry Brothers, C. G. Morrison Co., City Drug Store, J. C. Smith Co., The Popular Store, Midland National Bank, Percy Bridgewater, First National Bank, Cash & Carry Grocery & Market, H. & H. Food Store, Red Acres Grocery, J. C. Penney Co., Midland Drug, Reporter-Telegram, Mackey Motor Co., J. N. Elder, W. N. Cole, Midland Hardware Co., Barrow Furniture Co., Wes-Tex Food Market, Post Office Cafe, Scharbauer Hotel Coffee Shop, Cactus Cafe, Wilcox Hardware Co., Ames Canteen, Midway Garage, Williams & Miller Gin, Midland Steam Laundry, Roy McKee.

Rotary Governor to Visit Club Here Next Thursday

Ed McLaughlin of Rails, Rotary district governor, will visit the local club next Thursday evening, with a ladies night banquet scheduled for 7:30 p. m. rather than the usual noon luncheon.

At 5 p. m., a meeting of the club's officers, directors and committee chairmen will be held at the commissioners court room at which time the governor will go into local Rotary problems. All members are invited.

Today's program was in charge of R. W. Hamilton. A scheduled address by Senator H. Winfield of Fort Stockton was not delivered due to an emergency trip he had to make to San Antonio. A classification talk, "Trials and Tribulations of the Newspaper Business," was made by T. Paul Barron.

Joe Pyron, former member of the club but now a resident of Odessa, was elected as an outpost member of the organization. Claude Crane was a guest of the Rev. Winston F. Borum.

Tax Avoidance Act Passed in Senate

WASHINGTON, Aug. 19. (P)—The senate passed today the administration's tax avoidance bill, designed to plug loopholes through which the government has lost about \$100,000,000 in revenue annually.

Bluejackets to the Rescue

With U. S. military authorities in the Far East bending every effort to protect American lives and remove nationals from the perils of the Shanghai war zone, scenes like this again were enacted. Bluejackets from the Asiatic fleet were being sent ashore to reinforce the company of marines on duty in the city.

Plans Completed For Water Show For Scouts Here

The committeemen in charge of the coming Water Carnival and Handicraft Show Aug. 24, met last night to further plans for the meet. Preparing for more than 325 scouts, they made the necessary orders of bread, meat, and other things for the barbecue. This barbecue is a regular feature of the meet.

Arrangements for judges, starters, and referees were also made. Harold Kendrick is in charge of diving, while Alvon Patterson was chosen as referee of the water polo games. Wallace Wimberly and Vann Mitchell will keep tabulation on the winners. Darold Wilson will start the races. Scouts from all over the Council will judge the strokes, forms, and other things which will determine eliminations in races.

The handicraft division will probably be judged during the swimming, in order that the meet can go off as smoothly as possible. The flying models will be judged (according to time) after dinner so that the contestants may rest after the meal. The annual picture show has been eliminated, being replaced by the handicraft division.

The meet this year promises to be a good one, ranking with the previous meets favorably. Of course, after the meet is over one can determine just how successful it was. It remains to be seen just how well the handicraft show will go with the water meet.

Expectations are high that the contest and awards will be over by four or five o'clock, thus establishing a record on efficiency. Mr. Kendrick announced that he had 105 medals for the places to be won in the meet. These will probably be given to the boys on the grandstand after the contest. The names of the winners will probably be sent to most of the newspapers in this council.

RETURN TO SHREVEPORT.

Dr. A. V. Young and family, who have been visiting Jay H. Floyd for a few days, returned this morning to their home in Shreveport. Dr. Young is a member of a polo team there, carrying a two goal handicap.

Governor Orders Men To Dallas To "Halt Violence"

AUSTIN, Aug. 19. (P)—Governor Allred today ordered the public safety department to send 25 men to Dallas to "put a stop to beating of persons and other violence there." The governor acted after reading of a reported threat against George Baer, official of the United Hatters and Milliners union, recently abducted and flogged by a group of men.

In Dallas, Baer's wife reported to police a man telephoned her early today and told her to keep Baer "away from the boys in the picket line."

Millinery workers have been on a strike for several days in Dallas.

Taxation Chief Subject for the Special Session

AUSTIN, Aug. 19. (P)—Taxation and utility regulation stood out today as the chief subjects for the special session of the legislature expected to be called in September. Governor Allred said he thought the legislature could deal with those matters in one 30-day session but whether it would or not was something else again.

Big Spring Scene Of Big Reunion

The third annual Franklin county reunion will be held in Big Spring at the City Park, Sunday, Sept. 5. A cordial invitation was extended to people who either live now or have lived in Franklin county or any one else wishing to attend. All or requested to bring a basket lunch and spend a delightful day with old and new acquaintances.

Daniel Boone Span Opened

WELDON SPRINGS, Mo. (U.P)—The Daniel Boone bridge, most expensive bridge constructed by the Missouri state highway department, was opened here this month across the Missouri river on U. S. highway 40.

Enemy Lines At Shanghai In Retreat

American Mission Smashed by Bombs Of Japanese Planes

SHANGHAI, Aug. 19. (P)—Chinese infantry struck at the heart of Japanese shore positions in Eastern Shanghai today and forced the enemy lines back almost to the Whangpoo river.

The drive came just as vanguards of the Japanese army from the home land reached the war zone. The retreat threatened to disorganize Japanese plans for victory on a greatly extended front.

The Chinese are apparently trying to isolate several thousand Japanese marines holding the Hongkew sector. Chinese braved a savage bombardment from the air, warships and land batteries.

Japanese air bombs missed their mark and smashed the American Southern Baptist mission chapel quarter and the American mission hospital at Nantungchow. The fate of 20 Americans in the mission was unknown.

Dr. Stocking Will Write Articles for Health Board Here

Dr. Helen Smith-Stocking, wife of Hobart E. Stocking, geologist of the Shell Petroleum Corporation here, will write articles for the Midland County Public Health Board during the season opening next month, it was announced today by Mrs. W. H. Sloan, official of the board.

Mrs. Stocking is highly educated in public health and genetics and has done extensive research work in its various branches. Local health board members expressed great satisfaction at having her work with the organization, interpreting the goals and achievements through newspaper articles and other publicity.

A graduate of Penn College, a Quaker school of Iowa, where she received a B. S. degree, Mrs. Stocking was awarded a scholarship and took graduate work in biology at Brenau, going then to Johns-Hopkins university where she received her Ph.D. degree in zoology. She then did research work at Johns-Hopkins and in the Carnegie Institute at Washington, her major work being in genetics.

She wrote technical articles which were published in several scientific publications.

Mrs. Stocking said she looked forward to further constructive work by the board, declaring that in a growing city much opportunity for public welfare is afforded.

Housing Bill Is Pushed Through House by 274-86

WASHINGTON, Aug. 19. (P)—The house shoved the low-cost housing bill through passage last night with a 274 to 86 roll call vote. Approval of the measure set up a \$526,000,000 program of federal aid to state and municipal low-cost housing projects cleared away a major barrier to adjournment of congress by Saturday.

The senate, however, must approve house amendments before the legislation goes to the White House. Critics shot one amendment after another at the legislation. Almost without exception the house refused by lopsided votes to accept them.

But because house provisions departed drastically from those that won senate approval, a fortnight ago, a further struggle lies ahead in a conference in which senators and representatives will attempt to reach a compromise.

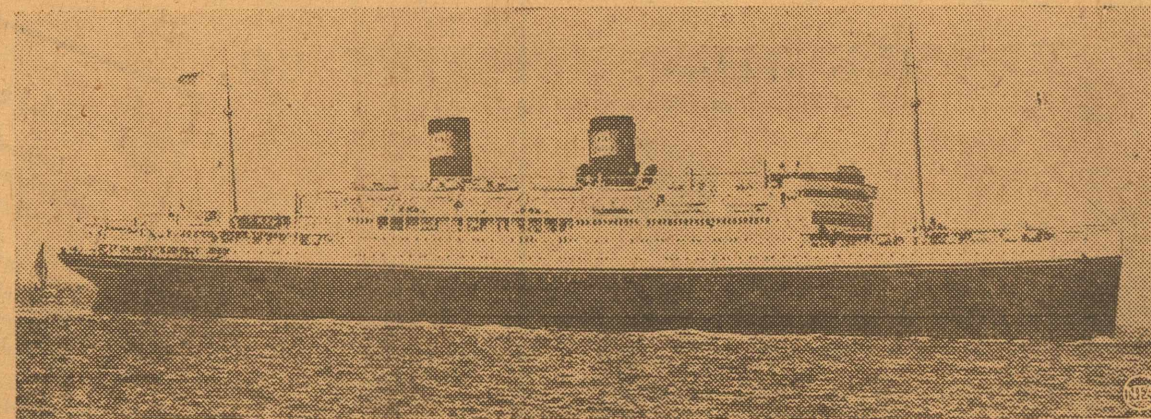

The house action left it up to the senate to wipe clean the session's legislative slate by passing a final appropriation bill and legislation to close tax law loopholes.

For more than nine tumultuous hours house members battled over the housing measure.

In the midst of the give and take wrangling, a 97 to 59 standing vote killed a proposal by Representative Hancock (D-NC) to impose a limit of \$4,000 per dwelling unit or \$1,000 per room on all housing projects.

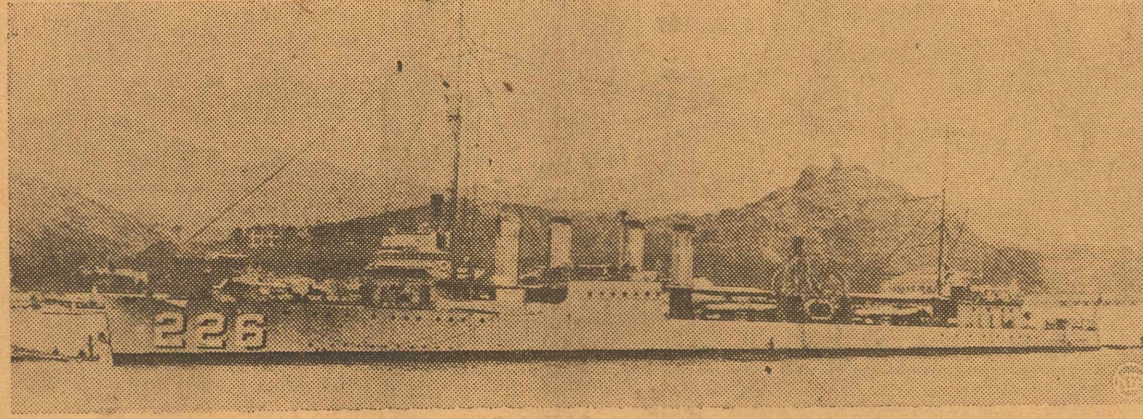

Similar restrictions were incorporated by the senate. The house, however, accepted the decision of its banking committee that cost should be held down to the average for similar private construction and in no event exceed \$5,000 per unit. Still resisting any major effort to change the legislation, the house junked an amendment by Representative Fish (R-NY) that would have lifted from 10 to 15 per cent the amount of federal funds that might be turned over to any one state.

Liner Rushes Re-enforcements to U. S. Marines

The huge liner President Hoover, above, of the Dollar Line, was enroute from Manila to Shanghai under forced draft to aid in the removal of American nationals from the shell menaced city. A company of marines was aboard to augment the U. S. forces in Shanghai. Accommodations for more than 1000 refugees will be available aboard the ship.

Destroyer Joins Naval Guard as Japanese Shell City

Reinforcement for the American fleet at Shanghai, the U. S. S. Peary, above, reached the Wangpoo River in time to help convey the first refugees to the President Taft while Japanese artillery and warships rained shells on the helpless city. Seventeen American naval vessels are reported to be in Asiatic waters within a few hours' sail from Shanghai.

JOB FIGHT IN REVERSE

Fighting groups of men. Swinging fists. Swollen jaws and black eyes. And charging police. Sounds like another scramble on a strikers' picket line, doesn't it? But it isn't. It's just 600 men trying to get 300 jobs in a Hollywood film factory where a pirate picture is in the making.

Now many localities in the nation haven't enough jobs to go around. Others, it seems, have too many jobs. Adjustment of such situations is the task of social scientists, engineers and economists. Furthermore, it may be only another phase of "going Hollywood" when 600 men risk broken bones and scuffed shins to get in to a single picture.

But whatever the social, industrial or economic significance of the incident, it is at least a refreshing change when workers fight to see who goes to work rather than to see who does not go to work.

Behind the Scenes in Washington

By RODNEY DUTCHER

Reporter-Telegram Correspondent.
WASHINGTON, Aug. 19.—The trouble in Congress, according to one member, is that a bloc of blocs is blocking each other.

Certainly a half dozen and more blocs have taken definite form in the last few weeks and it is necessary to have some knowledge of what they are and what they mean in order to understand even partially Capitol Hill at this season.

Here are some of the blocs as they are regarded in Congress with special reference to the House, but applying in general to the Senate:

1. The southern bloc. As far as the administration is concerned, this one is a fly in nearly every New Deal ointment. The group met recently as a "Common Bloc" and several members argued that there must be no wage and hour law unless the government first provided cotton loans. Congressman Wright Patman of Texas arose to ask whether the group would accept the wage-hour bill even if it did get cotton loans, and the consensus was that it wouldn't.
2. The wage-hour bloc, led by Congressman Arthur D. Healy of Massachusetts and including about a dozen determined congressmen as well as others from the urban north and northwest.
3. The "reactionary bloc." This includes both Republicans and Democrats who don't want anything of any sort passed. The group includes men such as Cox of Georgia, Hoffman of Michigan, Pettengill of Indiana, Taber of New York, and perhaps a score more.
4. The new "prairie states" bloc.

This includes relatively radical western progressives and the group seeks controlled production, fixed farm prices, or an ever-normal granary scheme with plenty of crop loan money. This bloc is willing to blackmail or play with any other group which wants something, including the liberal bloc or wage-hour bloc. (Certain of these blocs overlap each other.)

5. The liberal bloc, led by Maury Maverick of Texas. It represents actually about 35 members who will stand solidly together plus about 30 more who sometimes show up at meetings. Its chief aim is to get other blocs together as far as possible and pass everything on the administration program.

6. The big city bloc, which suddenly has begun to take form among congressmen from New York, Chicago, and other large cities. It swears allegiance on the southern bloc because the latter group made such a mess of the housing bill. Some members are for the wage-hour bill and some not, but most of them stand together for relief appropriations and pro-labor measures.

The other blocs, such as the lobby-controlled "sugar bloc" and the large group of western farm congressmen who don't want crop control legislation because of an anticipated bumper American crop in the face of world scarcity.

South Western Rule.

The southern bloc is the most powerful, partly because it dominates most of the Senate and House committees. It demands cotton loans, but doesn't want crop control which Roosevelt demands

as collateral. Demands run all the way from 10 to 15 cents a pound. Some southern members represent mills or speculators.

The southern bloc, which has been successful in killing or mutilating most proposed legislation, wants to control the government and ward off any federal legislation which might interfere with the south's economic system. Its power is enhanced by support of conservative Republicans.

The liberal bloc has been discouraged by Roosevelt's loss of the court fight and other defeats, but pleased with Senator Black's appointment to the Supreme Court. It hasn't worked effectively, being vastly outnumbered.

"Here the King Kneel."

LONDON (U.P.)—The part of the carpet in the Sanctuary at Westminster Abbey where the throne stood and King George knelt at the Coronation ceremony has been bought for Winchester Cathedral Sanctuary.

'We Are Gentle men Of Japan'

money and worrying little about either.

From my limited experience and from what I've heard there are two ways to ride a bronco, one to grip the saddle tight and the other to ride loose, or what might be called high, wide and handsome.

Some people think rodeo horses are trained to buck, but they are not. They are outlaws and don't have any reason in their make-up. When a rider gets on them their instinct is to get rid of him. They are usually in-bred or ill-bred steeds which are good for nothing but to pitch. They are saddled, held tightly in a rodeo chute, mounted by the rider and, when the gate swings back they come out squealing, pitching, weaving and fighting. Sometimes they stumble or just roll over. These kind are dangerous. A high pitching horse is much safer for the rider than one which tries to stay too close to the ground, watching for a chance to grind the rider into the dust.

Think you will enter the bronco riding? The dates are September 4, 5 and 6, and the purses will total \$400 for bronco riding.

Child marriages are frequent in Persia.

From the standpoint of punishment, an authority says that ten seconds on the back of a bucking bronco is equal to ten rounds in a prize fight ring. Yet, bronco riders go from season to season, taking their injuries along with their prize

CCC Employees Get Leaves for School

FORT SAM HOUSTON, Texas. — In order that Civilian Conservation Corps enrollees may complete high school or college courses to fit themselves for civilian employment when tours of service in the CCC have been concluded the Emergency Conservation Work officials in Washington have authorized leaves of absence to be granted enrollees who show certificates from educational institutions as evidence of enrollment in schools.

Leaves of absence will be without pay. The arrangement only provides that enrollees who go on leave for the purpose of attending schools will not have the time spent in securing an education counted against the maximum of two years' service in the CCC. Under new regulations for the operation of the CCC set up by the Congress at the current session service is limited to two years and age limits fixed at 17 and 23 years.

Enrollees who wish to complete courses of instruction not offered under the educational program of the CCC will be permitted either nine or twelve month's leave.

Wife Weary of Moving

SAN JOSE, Calif. (U.P.)—Moving was just too much for Mrs. Lessie E. Wright. In fact, after moving 37 times in eleven years of married life, she has asked for a divorce. The moving, she charged, was due to her husband's inability to hold a job.

Use of the plural "we" in reference to themselves by kings is a survival from the Roman Empire, where there were two emperors ruling and passing joint decrees.

Early Fed Cattle Find Strong Market

COLLEGE STATION—Texas feeders have prospects of an exceptional market for such heaves as they can finish out by the end of the year and the first two months of 1938, according to G. W. Barnes, animal husbandman of the Texas A. and M. Extension Service.

Barnes, who has recently completed a tour of the major grain and livestock areas of the state, reports that the grain crop is good over a major portion of Texas.

"The good grain crop over a large part of the state, in combination with the shortage of grain for early feeding in the corn belt, makes this an ideal year for Texas feeders," Barnes said. He warned, however, that feeders should start their operations at once in order to get their animals well finished and on the market before corn belt heaves begin to move.

The excellent grain prospects in the corn belt have strengthened the demand for feeder and stocker animals, Barnes pointed out. Texas normally sells about two million feeders and stockers each year, he said and feeds out around 150,000 heaves.

If heaves are placed on feed as soon as the grain supply warrants, so that the animals can be marketed before early April of 1938, Barnes believes that Texas feeders could profitably finish out from 300,000 to 500,000 animals.

Interstate Compact Idea Is Favored

WASHINGTON.—Approval by Congress of the Interstate Oil Compact is regarded by the chamber of commerce of the United States as a distinct recognition of advantages of the compact idea for conserving natural resources.

After several years discussion as to the practicability of employing the compact method provided in the Constitution, whereby several states may enter into agreements to meet joint problems, important oil-producing states finally entered into a compact covering production of crude petroleum. Under this arrangement the states agree to use their best efforts to enact statutes to conserve oil and gas, embracing such methods as unit development of fields and pro rata production of wells. Experience proved so satisfactory the states renewed the compact which has just received Congressional approval.

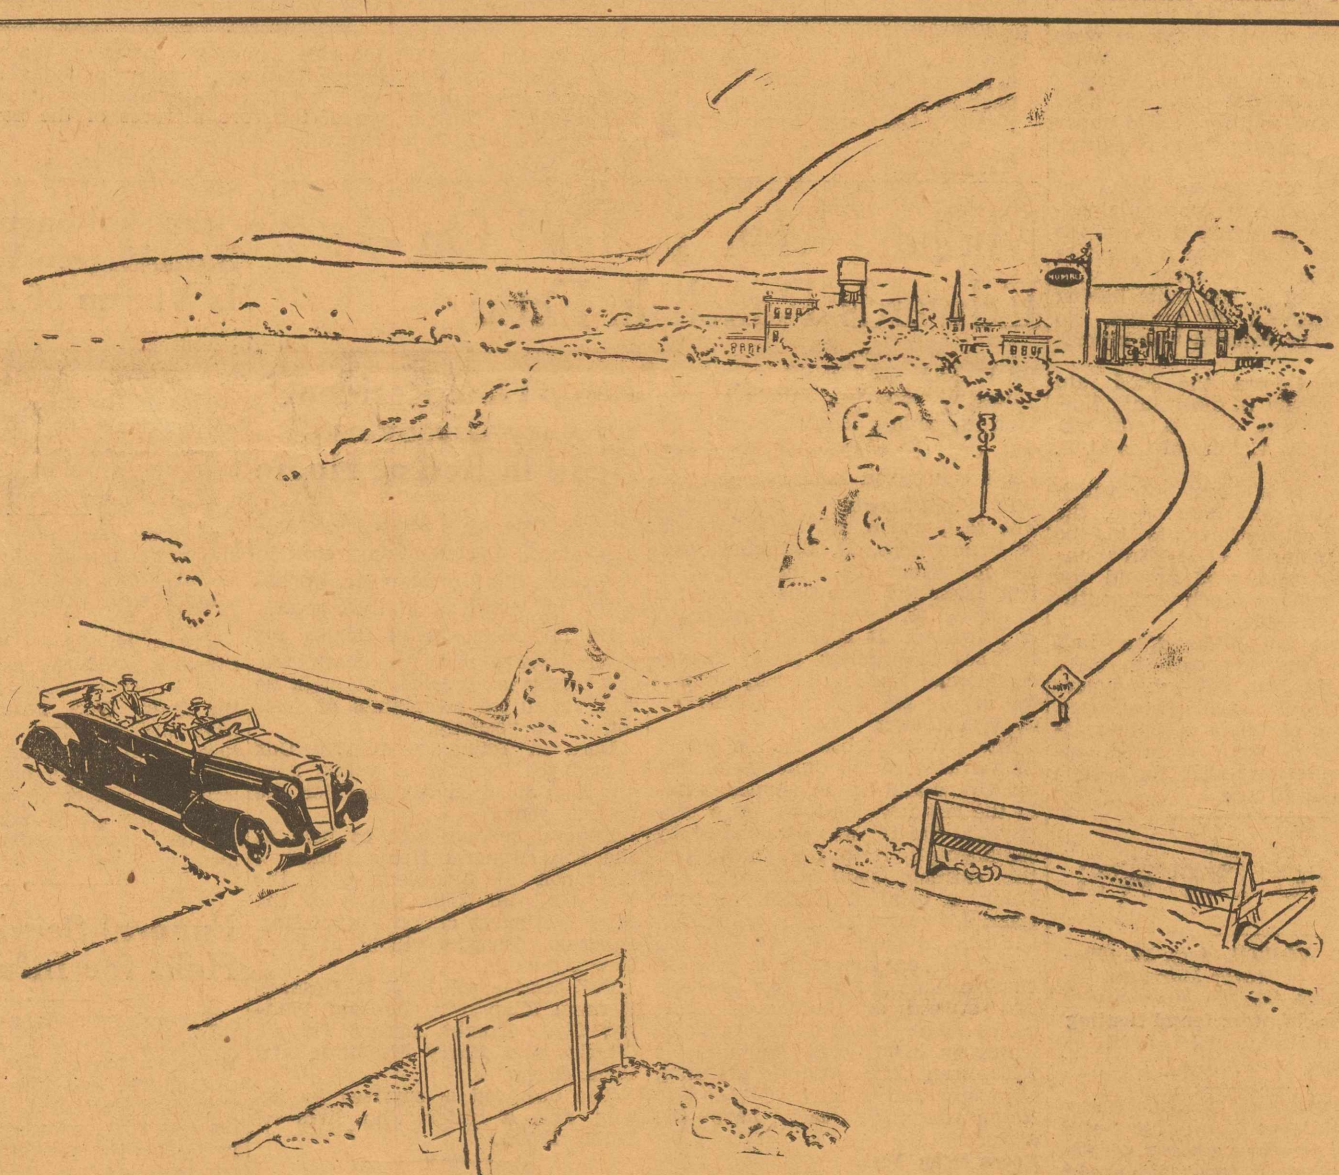

The extent to which state compacts could be used in different fields of state relationship has been indicated by the chamber of commerce of the United States. There has long been general acceptance of the idea that compacts were particularly applicable to such matters as state boundaries, water disputes and subjects of that nature. Recent uses of the compact idea in such fields as conservation of natural resources, control of floods and stream pollution, are evidences, the chamber points out, of the wide opportunity for solving interstate problems without the intervention of federal authority.

Trains to Have Radio.

BUENOS AIRES (U.P.)—All trains of the State Railways in the far south, running between Patagonia and Nahuel Huapi Lake, will be equipped with wireless receivers, which will allow the trains to be in constant communication with the rail head.

Farmers Stage Sit-Down

PIERCE CITY, Mo. (U.P.)—Farmers near here staged a three-hour sit-down strike when they learned the threshermen they had employed intended to charge them higher prices than they had bargained for.

"We'd better stop and ask the Humble man if the new road's open"

Texas motorists have learned that they can rely on the friendly helpfulness of Humble station men—not only for accurate, up-to-the-minute highway information but for all the services a motorist needs. Humble station men are carefully trained in the care of your car; they are provided with complete equipment for its service; and they carry a full line of motor fuels, motor oils, lubricants and special

products—a product, indeed, for every car, a price for every purse.

Stop—today—for service where you see the Humble sign. A friendly, Texas welcome awaits you, a sincere effort to be helpful. Get acquainted with the Humble station men in your neighborhood and on the highways you travel. Follow the lead of thousands of fellow Texans — get the Humble habit!

HUMBLE OIL & REFINING CO.

A Texas institution manned by Texans

Complete service for you and your car: Spotless restrooms — Ice water — free air and water — trained, helpful salesmen — highway information — complete lubrication service — first aid kits — motor fuels and motor oils for every car — accessories.

Humble Dealers are located at convenient points throughout Texas. They are carefully selected men, chosen for their ability as retail merchants of petroleum products. They are courteous, helpful, and the Humble Company offers them every encouragement in the rendering of a complete service to motorists... Stop for service where you see the Humble sign.

Choose the Goodyear that fits your purse and ride first-class on the world's most popular tire!

THE CHEAPEST THING ON YOUR CAR IS THE BEST TIRES YOU CAN BUY!

The average maintenance costs obtained from the records of fleet owners operating hundreds of cars on Goodyear tires show that a full set of Goodyears costs only one-fifth as much per mile as gasoline—one-fourth as much as insurance, licenses and depreciation—one-third as much as garage and repairs—one-half as much as lubrication, washing and miscellaneous. Nation-wide records prove Goodyears cost least under any conditions.

Course Tricky For Amateurs Title Tourney

PORTLAND, Ore. Aug. 19. (U.P.) — Aspirants to the national amateur golf championship Aug. 23-28 over the trick Alderwood course will face an almost fiendish array of hazards. Few of the trouble-spots, however, are man-made. Most of them are natural—rolling terrain, trees and water.

Alderwood is a scenic layout, with the Columbia river coursing along one side, looked down upon by Mt. Hood and Mt. Adams, but several holes are guaranteed by experts to divert the golfer from any feeling of aesthetic exultance. Notably difficult are Nos. 2, 3, 9, 11, 12 and 16.

The following is a hole-by-hole description of the course:

No. 1—501 yards, par 5. It has a slight dog-leg to the right and can be reached with two straight shots. Drive to the center. The second shot is played for the green, which is closely guarded by a trap on each side.

No. 2—449 yards, par 4. Rated one of the outstanding holes in the country, and one which will probably give contestants the most trouble. It has a dog-leg to the left. The drive must be placed perfectly, favoring the high side. Too far to the right, the ball will

go out of bounds; too far to the left, it will roll down a steep bank into the rough or water. The second shot calls for a No. 2 or No. 3 iron.

Short No. 3 Tricky.

No. 3—125 yards, par 3. It calls for a drive and a pitch. Out-of-bounds is to the right, guarded on the right by traps and on the left by a steep embankment.

No. 4—510 yards, par 5. It can be reached with two perfect shots. Out-of-bounds runs from the tee to the green on the right, and there is a series of traps on the left. The green is guarded by traps on both the right and the left.

No. 5—387 yards, par 4. It calls for a drive and a pitch. Out-of-bounds is to the right. The drive should be slightly to the right to get the best approach. There are traps to the right and left.

No. 6—550 yards, par 5. It is a right-angled dog-leg, with out-of-bounds to the right the full length of the hole and tall grass along the boundary. A player may attempt with a long drive to carry the trees on the first shot in order to get home in two.

No. 7—351 yards, par 4. This is a drive-and-pitch hole, with out-of-bounds to the right. The drive should be played slightly to the right to get the best shot at the green. There is a trap to the left of the green.

No. 8 Is Easiest.

No. 8—312 yards, par 4. The easiest hole on the course. It was compared by Horton Smith to No. 7 on the Augusta national course. There is a trap to the left, and the green slopes away from the front.

No. 9—159 yards, par 3. It calls for a No. 5 iron shot through trees to a closely guarded small green.

No. 10—380 yards, par 4. It is another drive-and-pitch hole. The drive should be placed slightly to the right to get the best shot at the green.

No. 11—182 yards, par 3. A difficult hole, calling for a No. 3 iron shot to a small elevated green.

No. 12—449 yards, par 4. Considered the second most outstanding hole on the course. It calls for a drive and a No. 2 iron shot, played from an uphill lie. There are trees and traps to the left on the drive and there is a parallel water hazard on the right.

Traps and Trees.

No. 13—389 yards, par 4. There are traps and trees to the right.

The drive should be placed slightly to the left for best results. The second shot calls for a No. 5 or No. 6 iron. The green slopes toward a sand trap on the left.

No. 14—510 yards, par 5. There is a parallel water hazard on the left all the way, and there are trees and traps on the right. It can be reached with two perfect shots.

No. 16—207 yards, par 3. Considered one of the most outstanding 3-par holes in the country. It calls for a No. 1 iron or spoon shot diagonally across a water hazard. To the left is out of bounds. The green is elevated.

No. 17—401 yards, par 4. The drive should be placed slightly to the left for the best shot at the green. It calls for a No. 4 iron shot to the green.

No. 18—561 yards, par 5. A good finishing hole, with a double row of fruit trees along the entire right side of the fairway and a clump of cottonwood trees on the left, 225 yards from the tee. There is a trap to the left of the green.

Oil Field Safety Systems Outstanding

DALLAS, Texas. — The oil industry, once termed the most hazardous industry in the country, has had such success with safety programs that off-duty accidents take a greater toll of workers' lives than mishaps on the jobs, according to H. N. Blakeslee, director of the department of safety of the American Petroleum Institute.

Blakeslee, speaking here at a meeting of petroleum safety engineers, said:

"The oil companies reporting their industrial accident experience for 1936 to the A. P. I. were asked to check the number of employees who had lost their lives during off-duty hours in 1936. Responses received from 71 companies showed that they had lost 75 men during the year on the job, but off-duty fatalities accounted for a loss of 98 lives.

"Motor vehicles were involved in 60 of the off-duty fatalities," Blakeslee said. "Ten were from drowning, six from airplanes, four from asphyxiation, four from gunshot wounds, two were pedestrians struck by trains, two were from explosions in homes and nine were classed as miscellaneous."

Vienna Reduces Suicides

VIENNA. (U.P.) — This city's anti-suicide bureau announces it has saved on an average of five persons a week and has succeeded in transforming them into normal persons.

Law Restricts Auto Horns

PHILADELPHIA. (U.P.) — Research workers have discovered a 1905 Philadelphia ordinance limiting automobile horns to one note. Despite the large number of French horns in the city the law still is on the statute books.

Dog Breeder Honored

HONOLULU. (U.P.) — Arthur Zane, dog breeder has been selected as judge of German shepherd dogs at the Greenwell, Conn., annual show. He will travel more than 5,000 miles to perform his week's duties.

Utah Peaches Cut Heavily

SALT LAKE CITY. (U.P.) — An almost total failure of peaches in Utah is forecast by Frank Andrews, Federal statistician. The freezing of trees and dormant buds last winter is blamed for cutting the peach crop 544,000 bushels to an estimated harvest of 60,000 bushels for the summer.

1,600 CCC Enrollees Discharged in Month

PORT SAM HOUSTON, Texas. — Approximately 1,600 Civilian Conservation Corps enrollees of the Eighth Corps Area, serving on work projects in the states of Oklahoma, Texas, Colorado, New Mexico, Arizona and Wyoming, were discharged during the month of July 1937 to accept private employment, Colonel William F. Jones, CCC officer for the corps area announced today.

Of the 1,600 who were offered outside employment 1,546 were junior enrollees and 54 were World War Veteran enrollees.

The figure of 1,600 represents an increase of 180 enrollees over the number discharged to accept employment during the month of June, 1937.

1937.

Mr. Robert Fechner, director of Emergency Conservation Work under which the CCC operates reported that employment opportunities for men in the CCC were better during the month of June, 1937 than in any previous month since the corps was started in 1933.

A total of 13,379 enrollees were discharged from camps all over the U. S. during June to accept jobs. This represents an increase of 6,600 over the 6,770 discharged during January, 1937 to take work outside the corps. Only 11,182 were given employment discharges during the month of May, 1937.

The equatorial areas of the earth spin along at a much faster rate than other earth surfaces, and, thus, centrifugal force assists water in its course toward the equator.

No Gigolos in Salt Lake City

SALT LAKE CITY. (U.P.) — Gigolos are a curiosity in this city. A young woman from another state stepped to the desk of a hotel, said she desired to dine and dance, and applied for a personable male escort. The hotel management was unable to find a man who would classify himself as a gigolo.

"Conscience Debt" Paid Late

FREMONT, O. (U.P.) — Howard Faber lost a pocketbook containing \$30 10 years ago. It was found by a Zanesville man who recently paid back the "conscience debt" through the mayor of nearby Tiffin. The money was given to Faber's father. Faber having died since the loss.

LOADING RUBBER ON SMALL BOATS IN LIBERIA FOR TRANSPORTATION TO OCEAN FREIGHTERS

From the Firestone plantations in Liberia comes an ever-increasing supply of the world's finest rubber. Money saved here and in manufacturing and distribution enable Firestone to sell a safer, first-quality tire at lower prices.

Why FIRESTONE MAKES A SAFER TIRE AT A LOWER PRICE

IN THE Firestone Standard Tire, you get extra value in the form of extra safety. It costs more money to build a safer tire. But Firestone can build a first-quality tire made of top grade materials and sell it for less money, because Firestone controls rubber and cotton supplies at their sources, manufactures with greater efficiency and distributes at lower cost.

YOU GET EXTRA PROTECTION AGAINST BLOWOUTS — eight extra pounds of rubber are added to every 100 pounds of cord by the Firestone patented Gum-Dipping process. By this process every fiber of every cord in every ply is saturated with liquid rubber. This counteracts dangerous internal friction and heat that ordinarily cause blowouts.

YOU GET EXTRA PROTECTION AGAINST PUNCTURES — because under the tread are two extra layers of Gum-Dipped cords.

YOU GET EXTRA PROTECTION AGAINST SKIDDING — because the tread is scientifically designed.

YOU GET LONGER NON-SKID MILEAGE because of the extra tough, long-wearing tread.

You need all of these features to make your car tire safe on your week-end or vacation trip. Firestone gives them to you at lower cost. Join the Firestone SAVE A LIFE Campaign today by equipping your car with a set of new Firestone Standard Tires — today's top tire value.

DON'T RISK YOUR LIFE ON SMOOTH WORN TIRES! DO YOU KNOW

THAT last year highway accidents cost the lives of more than 38,000 men, women and children?

That a million more were injured?

THAT more than 40,000 of these deaths and injuries were caused directly by punctures, blowouts and skidding due to smooth, worn, unsafe tires?

At right is section cut from a new Firestone tire. Note the thick, non-skid protection against skidding, blowouts and punctures. Come in and see a demonstration.

At left is a section cut from a smooth, worn tire, with non-skid protection worn off. Tires in this condition are liable to punctures, blowouts and skidding.

SOCIETY NEWS SECTION

Hefty Royal Bride Goes Streamlined; Once 160, Now 116

PARIS Aug. 19 (U.P.)—The three-month job of streamlining Holland's Crown Princess Juliana has been completed, her California, slimming mentor reported Wednesday and the Princess no longer is a fat girl, but a creature of dynamic beauty.

Where once she weighed 160 pounds, her avoirdupois now has been reduced to a neat 116½.

Gloria Bristol, who supervised the task of giving the Crown Princess body lines more appropriate to Hollywood than Holland, told of her method in the Paris weekly Marie Claire. The salary she received in a New York Fifth avenue shop was tripled while she was with Juliana.

"When I saw her," Miss Bristol reported, "I decided she would have to be reformed along official Hollywood lines—by building up her shoulders, thinning down her waist and reducing her legs to show the long muscles."

A Model of Perseverance.

"For three months Juliana was an excellent, determined pupil, and today she is a living model of what perseverance can do. She can be taken as an object lesson by all girls of reasonable poundage."

Miss Bristol reported Juliana was accustomed to eat startlingly enormous meals and so for five days she put her on a liquid diet, followed by vegetarian meals. For a month her only treatment was vigorous massage.

"Like all Dutch girls," the beauty specialist said, "she was a vigorous athlete and played daily at violent exercises—skating, tennis, skating and cycling—so we had to convince her that rough sports could develop only her general build."

Water, Fruit Juice and Broth.

With the second month Juliana was permitted to eat such meats as grilled chops. Her hair was dressed to give the impression of added height.

"By the third month," Miss Bristol concluded, "she had lost forty-five pounds and she now enjoys that physical equilibrium and beauty which makes all women lovely. Her delight is exceeded only by that of Prince Bernhard (her bridegroom) who by constant attention made our task easier."

A typical day's menu during the cure: At waking, a large glass of hot water; thirty minutes later, a cup of black, sugarless coffee; 10 a. m., cup of orange juice; 11 a. m., cup of vegetable broth; 1 p. m., big glass of tomato juice; 2 p. m., more fruit juice; at dinner, glass of

By PAUL HARRISON
NEA Service Staff Correspondent

HOLLYWOOD, Aug. 18.—On location with Marco Polo: Hundreds of Chinese, real ones, mostly, sitting in every available bit of shade on the hot outdoor set. People in every imaginable type of ancient Oriental dress, from loin cloths to suits of chain mail and wearing varicolored lampshade hats.

The real Chinese pay almost no attention at all to Director Archie Mayo's amplified orders, and they respond only slightly more to the shout of Tom Gubbins, white czar of California's Chinese actors, who translates Mayo's commands into Cantonese.

Four elephants standing at troughs and showering themselves with water. A herd of vicious, redolent old camels. A press agent pointing out ducks to newspapermen and calling them geese. An animal handler having trouble milking a burro. Other attendants cooling dogs with buckets of water. Assistant directors sweating, swearing, arguing.

Sport Sox Visible.

WHEN the confusion is at its height and the disregard for orders seems complete, one of Mayo's leather-lungs yells, "Action—start the parade!" A siren screams and cameras turn. Assistants being herding Chinese and animals into a procession heading toward the gate of Pekin.

Burrows, camels, elephants, horses, laden with bales of goods. Coolies carrying bales of gold and silver swung on poles between them. A great, obese mandarin straddles a horse and a servant trots beside him carrying a sunshade. Donkeys strain at heavy carts piled with bundles.

All these are guarded by mounted men, men in armor and carrying swords and axes. Thus the procession—his people bearing tribute to Kublai Khan, greatest of all emperors of the Far East.

Marco Polo and his servant, Binguccio (Gary Cooper and Ernest Truex), stagger through the city gate and Binguccio falls in the road, his ag-bound feet refusing to carry him farther. "Out!" booms an order through the loud-speakers.

"Back in your places, everybody; we gotta do it again."

The trouble was that a couple of 13th-century Chinese had walked before the camera with the cuffs of American trousers visible beneath their robes, and below these, brightly colored sports socks.

Combining His Whiskers.

TIME out for lunch, and a rush of 500 people for the mess tents... Gary Cooper, finishing an afternoon cigar, conscientiously disregards a still cameraman who's shooting pictures of him. Then Cooper and his stand-in wander out. They're later discovered out in the hills, the stand-in hurling clay pigeons and Cooper popping them down with a shotgun.

Back in Pekin, a big, ugly Monopol does a little truckin', and extras applaud. A pretty make-up girl combs the wispy whiskers of an oily old mandarin. A Chinese boy and girl play rummy with a script clerk. The boy has his head-shaved, which means that he'll get two weeks' pay for the two days of location work. Head-shaving carries a two week's guarantee for extras and a month for character and feature players.

Director Mayo wisecracks with the visitors and explains how he lost 60 pounds. His newly streamlined torso is shirtless, and he inhales deeply whenever photographers point their cameras in his direction.

A 1937 sprinkling truck moves over the streets of ancient Pekin, and everything is ready for another

parade. Tom Gubbins howls some gibberish and the mob and the animals move out into the sun.

Women Just as Vain 1200 Years Ago

SAUVILLE, France (U.P.)—Vanity cases and eyebrow pluckers were used by Merovingian women of 700 A. D. M. L. Vilminot, school teacher of Sauvville in the Vosges region, has discovered through excavation.

Vilminot practices archeology as a hobby and has found so many things of real significance in digging up the ruins of the Frankish town buried in the fields near Sauvville that he has gathered them into a Merovingian museum which attracts visitors from far and near.

Dating from 500 to 700 A. D., the excavated town shows no signs of having been Christianized. Many pagan relics have been found and coins bear the image of Theodorice, King of the Ostrogoths.

Tired, Aching, Swollen Feet

This wonderful preparation now known all over America as Moore's Emerald Oil is so efficient in the treatment of common everyday foot troubles that the unbearable soreness and pain often stops with one application.

Moore's Emerald Oil is safe and pleasant to use; it doesn't stain or leave a greasy residue. It is so powerfully deodorant that all unpleasant odors resulting from excessive foot perspiration are instantly killed. One bottle we know will show you beyond all question that you have at last discovered the way to solid foot comfort.

Ask your druggist for an original bottle of Moore's Emerald Oil. Any druggist in the country will be glad to supply you.

Midland Teacher to Receive Degree at CIA This Week-End

DENTON, Aug. 19.—Iris Neill Bounds of Midland, a senior at the North Texas State Teachers College here, has made application to receive the bachelor of science degree at the College's forty-eighth annual summer commencement on the evening of August 20, according to word received from the office of the dean. If the weather permits, the record graduating class of approximately 500, including 42 candidates for the master's degree, will receive their diplomas out of doors in the College's athletic stadium.

Former Senator Robert H. Stuart of Fort Worth, president of the Board of Regents of the Texas State Teachers Colleges, will deliver the commencement address. The College Orchestra will furnish special music, and the degrees will be conferred by Dr. William Joseph McConnell, president of the college.

Thirteen of the graduates are candidates for the master of arts degree. Twenty-nine seek the master of science title, while fifty-one are bachelor of arts candidates and approximately 400 have applied for the bachelor of science degree. The exact total of candidates for each degree is not yet known, as applications are being approved this week.

There are more than 30,000 lakes in Florida.

Students Receive Medals for Work In Music

Ann Ulmer, Miss Clea Dee Tate, and Shirley Ruth Jolly were presented, this morning, medals, given them by Miss Lydie Watson. These medals were awards for playing in the National Piano Tournament. The girls all received Excellent rating in the National Honor Roll. The people in charge of the tournament announced several months ago that the medals would be allowed those who placed on District, State, or National Honor Rolls, but that a nominal fee must be charged due to the large number of students who got on the Honor Rolls. Miss Watson was the only teacher to present her students with these medals.

Bride and Groom Announce Recent Marriage Here

Mr. W. B. Riffie, today, announced his marriage, August 11, to Mrs. Allen Henslee. They were married in the home of Rev. Winston F. Botum, who performed the ceremony. Jack T. Riffie, brother of the bride-groom and visiting from Topeka, Kansas, and Miss Prudy Woodward were the witnesses.

Mrs. Riffie was formerly of Pyote, Texas, while Mr. Riffie came to Midland from Dallas. They plan to make their home here. Both are employed in local businesses.

Turkey Gobbler Found With Mother Complex

WEST CHESTER, Pa. (U.P.)—A turkey gobbler with a "mother complex" has been discovered on a farm near here.

The gobbler has been conducting a "sit-down" on a nest of

goose eggs, and it forcibly resisted all efforts to move him.

Once before it hatched out a brood of duck eggs, but he made no efforts at further mothering once they were hatched.

Philharmonic orchestras get their names from the Greek, which means "loving harmony."

Talent of Ritz Film

The tribulations of an unusual profession form the basis of "Talent Scout," a First National comedy which opens today at the Ritz Theatre.

Donald Woods plays the title role. His job is to dig up talent for the movies, wherever he can find it. He finds a marvelous singer in the person of Jeanne Madden—whom he discovers in a small town theatre amateur night.

He takes her to Hollywood, by trickery brings her to the attention of the film magnates, and launches her upon a successful and lucrative career.

Miss Madden is the girl who played opposite Dick Powell in the very successful "Stage Struck" film of a few months ago. She has a remarkable voice, and is being considered by the Metropolitan Opera Company of New York. "Talent Scout" is her second movie.

She sings several songs in this picture, which were written for her

by M. K. Jerome and Jack Scholl. Featured with Woods and Miss Madden are Fred Lawrence, formerly a famous radio singer, and Rosalind Marquis, who's also a "top-notch crooner, and had one of the leading roles in "Gold Diggers of 1937." Lawrence, Miss Madden and Miss Marquis were featured members of the "Gold Diggers" air tour which made a cross country flight last year.

William Clemens directed "Talent Scout" from a screen play by George Blison and William Jacobs. Among others in the cast are Teddy Hart, Joseph Crehan, David Carlyle and Mary Treen.

Driver in Freak Mishap.

BRATTLEBORO, Vt. (U.P.)—Roland Merritt's automobile knocked him down though it wasn't moving. Merritt removed his car radiator cap when steam escaped from it. A blast of steam struck him in the face, causing him to jump back just as a truck passed. He suffered severe bruises when the truck hit him.

OF LOCAL INTEREST

Mr. and Mrs. Percy Mims and children, James and Margaret left recently for the Cowboy camp in the Davis Mountains to be gone for a few days. Mr. Ned Watson and Mr. Thomas Inman also went to the camp to assist with the music.

Miss Martha Jane Snyder, her sister, Gusta, and Miss Buckley were visitors in Midland yesterday. They were enroute to Carlsbad Caverns.

Ray Goldsberry of Strawn, Texas, is the guest of George Watson in the home of his parents, Mr. and Mrs. I. R. Watson.

Mr. R. B. Cowden left by plane for San Francisco yesterday on business. From reports received this morning, he had arrived there at about 3:00 a. m.

Mr. and Mrs. W. R. Bowden returned recently from a vacation trip to various points in New Mexico.

Mr. K. L. Sappington is out of

revolver, fired three shots at Edgar D. Riden, who came to the sheriff's rescue, and escaped.

Robbed Indiana Bank.
Members of the gang have been identified in periodic bank robberies and holdups in the state since that time. Last May 25, three men held up the Goodland, Ind., state bank and escaped with \$2,500. Then the hunt for the Brady gang was renewed.

Paul V. Mimmman, 33, Indiana state policeman, and Elmer Craig, 45, deputy sheriff of Monticello, Ind., were cruising within the blockade established after the robbery when they recognized the bandit car. They gave chase and were suddenly turned upon by the men. Mimmman was wounded mortally and Craig received critical wounds.

G-Men Stalk Trio In Second Dillinger Gang

WASHINGTON, Aug. 19. (U.P.)—Depredations of a marauding three-man gang, which boasted that it would "put Dillinger in the shade," have sent a squad of federal agents into the Middle West to search for the gangland haunts which once harbored the Hoosier desperado.

Dillinger, the gang's chosen counterpart, fell before the guns of federal agents, July 22, 1934, in an alley beside the Biograph theatre in Chicago—the end of a long trail of criminal exploits in the Middle West.

Federal agents do not seek the gangsters—Alfred Brady, 26, alleged leader of the "second Dillinger gang," James Dalhove, 30; and Clarence Lee Shaffer, Jr., 20—for the three murders which police allege they committed to escape apprehension.

Cummings Offers Reward.
Instead, the fugitives face a federal charge of transporting the \$35,000 loot of a jewelry store robbery at Lima, O., March 19, 1936, into Indiana. Attorney General Homer S.

Cummings has offered a \$500 reward for information leading to the apprehension of each of the men.

Likewise, Dillinger was not hunted by federal agents for any of the murders of which he was accused. G-men took to his trail only after he had stolen the automobile of Sheriff Lillian Holley in his escape from the Crown Point, Ind., jail March 3, 1934, and had driven it to Peotone, Ill.—violation of the national motor vehicle theft act.

After a series of robberies in Indiana and Ohio in which police estimate the gang obtained approximately \$150,000 in loot, authorities said Brady and his men attempted to rob a grocery at Piqua, O., April 21, 1936. Edward Lindsey, a clerk, resisted, and he was slain.

Police Sergeant Killed.
Police traced the gang to Indianapolis, Ind., where it was learned they had called upon a physician to treat one of their members who was wounded in a brush with Ohio police. In an attempt to trap the men, Sergt. Richard Rivers of the Indianapolis police was wounded fatally April 27, 1936.

Brady and Dalhove were apprehended within a short time at Chi-

Autos Rise in South Africa.
CAPE TOWN (U.P.)—More people own cars in South Africa than pay income tax—five times as many. The Union office of census and statistics publishes a report showing that while only 48,081 South Africans paid income tax last year, there were 311,488 motor vehicles in the country, of which 246,724 were cars.

Wyoming Thins Coyotes.
RAWLINS, Wyo. (U.P.)—Carbon county ranchers have killed approximately 500 coyotes within the last few months. In one case a litter of 11 pups was killed with the mother coyote when the adult was tracked to its lair. The state pays a bounty of \$3.00 a head for coyotes.

Civic Pride Bruised Slightly.
HARRISBURG, Pa. (U.P.)—It took the chamber of commerce here 36 hours to check up on the number of bridges in this 11-square-mile city to answer a citizen's question. The chamber reported Harrisburg's 86,000 population walks or rides over 37 bridges or viaducts.

Daylight Tests Made.
LONDON (U.P.)—Four girl clerks in the National Physical Laboratory worked for weeks not knowing that they were being used in a test to find the amount of daylight they needed. None of them knew that each time she turned on her desk lamp, the current automatically worked a cinematograph camera which took photos of the scale on a micro-ammeter.

Macaws, when mortally wounded, frequently hook their beaks over a limb and remain hanging in mid-air after death.

"PERK UP" WITH
PURSANG
and forget that dull,
"half sick" feeling!

How do you feel these days? Are you
blue, discouraged and "run down"?
That dragged-out feeling may be due
to a deficiency of iron in your blood.
Indoor living, worry and overwork often
conspire to bring on this condition. And
lack of iron in the blood can make a
man or woman imagine almost every-
thing is wrong, when really the trouble
can be quickly remedied.

If you are "below par" try McKes-
son's Pursang. It contains organic iron
and copper compounds which increase
hemoglobin—the substance that makes
red blood red. Pursang helps to restore
the balance between white and red cor-
puscles. And at the same time it aids
appetite and improves digestion.

See how much better you feel after
taking the first bottle of Pursang. Wait
a week or more and you will hardly be-
lieve you're the same person—you'll
feel so fit and well!

French Fear Runaway Of High Prices
As Soaring Living Costs Hit Nation

PARIS, Aug. 19, (U.P.) — Foreign
countries have become aware of
France's financial plight through
the two sharp falls of the franc on
the international market in the
last month and a half, but the
average Frenchman is much more
aware of it through the sudden
rise in the cost of living.

According to statistics compiled
after one year of Blum's Popular
Front government, the majority of
French workers who benefited
from wage rises and shortening of
working hours of the late summer
of 1936, now face a decrease in
real wages. The cost of living has
mounted so sharply in recent
months that the gains registered a
year ago have been more than
wiped out.

A glance at several essential prod-
ucts which figure on every French-
man's living budget recall that
foodstuffs have risen on an average
of 25 per cent while wage increases
average only 21 per cent. And the
average Frenchman feels a natural
fear that the cost of living hasn't
stopped mounting.

No More Nickel Bread.

Comparing prices between June,
1936, and June, 1937, gives a better
idea of what this means to the
average housewife when she goes
to market. Bread has risen from
1.60 francs to 2.35; milk per liter
from 1.20 to 1.60; eggs per dozen
from 6.80 to 8.55; sugar per kilo
from 3.25 to 4.45; butter per kilo
from 16.40 to 20.40; beefsteak per
kilo from 23.30 to 31.10; pork per
kilo from 16.35 to 17.45; coal per
50 kilos from 17.23 to 23.35; gas per
cubic meter from .95 to 1.20; and
electricity per kilowatt from 1.55
to 1.65. (The franc at current ex-
change rates is 3.75 cents.)

Many other items which touch
every Frenchman's pocket — book
also have gone up an average of
25 per cent. When the financial
crisis which brought Blum to re-
sign posed the question of filling
a depleted treasury before Camille
Chautemps, his successor, the first
step that the new government took
was to pass slashing decrees for all
items which the state controls for
internal taxation. Railway, bus,
metro and transport fares in gen-
eral rose on an average of 30 per
cent; cigarettes, stamps, telephone
and telegraph rates 25 per cent;
while rentals were permitted to rise
in equal proportion.

Indirect Taxation Used.

Up to now the new Popular Front
government under the direction of
Radicals has resorted exclusively
to indirect taxation in its attempt
to fill the coffers of the treasury.
Indications that this will not be
sufficient to fill the void, created
in large part by a mass exodus of
capital to foreign countries, came in
the middle of July when the franc
took a further fall of 5 per cent on
the international exchange market.

Other disquieting signs have come
with a slackening of the public

Czechs Break Off
Relations With
The Portuguese

LISBON, Aug. 19, (A.P.) — An official
of the Portuguese government
announced today that the govern-
ment had severed diplomatic rela-
tions with Czechoslovakia over an
unfilled order for machine guns.

The newspaper Diario de Noticias
promptly declared, in an interpre-
tation move, that Czechoslovakia
had received "instructions from an
eastern power not to supply arms to
a country which was a sure guar-
antee against a Communist Iberian
peninsula."

The Czechoslovakia government
from Praha voiced astonishment
over the Portuguese action.

LONDON, Aug. 19, (A.P.) — The Por-
tuguese government said a dispatch
from Lisbon yesterday has severed
diplomatic relations with Czechoslovakia.

The dispatch did not mention
cause or details of the reasons for
severance.

The cable from the Associated
Press correspondent in Lisbon said
only "Portuguese government severed
diplomatic relations Czechoslovakia," and it had been delayed some
hours by the Portuguese censor.

Further details were not at once
available because of censorship.

The action came as a complete
surprise. There has been no hint
or dispute between the two coun-
tries so far as is known here.

Pending receipt of more definite
news from Lisbon, foreign observers
speculated whether the rupture
might have been the outcome
of two recent events — a series of
bomb explosions in Lisbon last Jan-
uary and the recent attempt on
Premier Oliveira Salazar's life —
since the government claimed for-
eigners were implicated in both
events.

The Portuguese government is
modelled after the Italian fascist
plan of a corporate state, headed by
Premier Antonio de Oliveira Salazar.
The president is General Antonio
Oscar de Fragoso Carmona.

Fresh Blast at
Foes Made by FR
In Dare Speech

MANTEO, ROANOKE ISLAND,
N. C., Aug. 19, (A.P.) — President
Roosevelt accused his foes Wednes-
day of "mouthing" praise of the con-
stitution while secretly disturbing
democracy.

The president's denunciation of
what he called the "Tory" opposi-
tion was his first since the United
States buried the proposal to
reorganize the supreme court.

It was delivered before a crowd
of several thousand at ceremonies
celebrating the 350th anniversary
of the birth of Virginia Dare, first
child of English parents born on this
continent.

MANY NEVER
SUSPECT CAUSE
OF BACKACHES

This Old Treatment Often
Brings Happy Relief

Many sufferers relieve nagging backache
quickly, once they discover that the real cause
of their trouble may be tired kidneys.

The kidneys are Nature's chief way of taking
the excess acids and waste out of the blood.
Most people pass about 3 pints a day or about
pounds of waste.

Frequent or scanty passages with smarting
and burning shows there may be something
wrong with your kidneys or bladder.

An excess of acids or poisons in your blood,
when due to functional kidney disorders, may
be the cause of nagging backache, rheumatic
pains, lumbago, leg pains, loss of pep and en-
ergy, getting up nights, swelling, puffiness
under the eyes, headaches and dizziness.

Don't wait! Ask your druggist for Deane's
Pills, used successfully by millions for over 40
years. They give happy relief and will help the
35 million of kidney troubles flush out poisonous
waste from your blood. Get Deane's Pills.

Oil News--

CONTINUED FROM PAGE ONE

802, with saturated pay section from
5,832 to 5,891, the total depth. Loca-
tion is 330 feet from the north
and west lines of section 9, block
B-27.

Bohago Bails Oil.

Bohago and Bond No. 1 West,
Yoakum wildcat eight miles west
of the Bennett pool, is shut down
for orders today, bottomed at 5-
255 feet in lime. When bailed dry,
the well was allowed to stand for
two hours, then bailed five bailers
of oil. It will probably be acidized
tonight with 2,000 gallons. Cores
from 5,183 to total depth are re-
ported to have shown saturation.

The well is 1,980 feet from the north
and west lines of section 606, block
D, Gibson survey.

Preparations are being made to
swab Denver No. 1 Whittenburg
through 2½-inch tubing set at 4-
979 feet. Total depth is 5,015 feet
in lime, with zones showing porosity
and saturation encountered in the
last 200 feet of hole. Location is
660 feet from the north and west
of section 831, block D.

Moore Brothers No. 1 Cleveland
is drilling lime at 5,055 feet, while
Texas No. 1 Walker is drilling at
4,870.

Gulf Stakes Andrews Test.

Gulf Oil Corporation has staked
location for a wildcat in the Shil-
ler Lake area of Andrews county,
about two miles northeast of the
Deerpock pool. It is the No. 1-G
University, 440 feet from the north
and east lines of the northwest
quarter of section 8, block 14, Uni-
versity survey. Phillips, Sinclair-
Prairie, Texas and Humble are mak-
ing dry-hole contributions.

In Gaines, Phillips and I. T. I. O.
No. 1 Brand, when opened up after
being shut in overnight, showed a
puff of gas carrying a spray of
oil, which soon exhausted. It will be
deepened from 4,927, where it was
acidized with a total of 5,000 gal-
lons. The well is a mile and a half
northwest of the Wasson discov-
ery.

Amerada No. 1 Armstrong, after
logging a show of oil from 5,026-32,
was given a three-hour bailing test,
and bailed three-quarters of a bail-
er of fluid per hour, one-third oil
and the rest drilling water. It is
drilling ahead.

Amerada No. 1 Matthews, bot-
tomed at 5,018, was treated with
5,000 gallons, and, after recovering
oil load, is swabbing 20 to 25 bar-
rels of fluid per hour, 45 per cent
oil, 50 per cent water and five per
cent basic sediment. Two and one-
half inch tubing is set, at 4,989,
with no packer.

Argo No. 1 Jones is drilling at
5,125 feet in lime. Reports of wa-
ter could not be confirmed.

works program inaugurated by
Blum to reduce unemployment. One
of the biggest items in this pro-
gram was the building of the Inter-
national Exposition at Paris, which
absorbed about 25,000 direct workers
and provided work for hundreds of
thousands who supplied materials
to them for the building of its
pavilions.

AMERICAN LORD MASALAULY'S

Roosevelt turned to Lord Mac-
aulay, and English historian who
today, the president declared, dis-
trust majority rules because "an
enlightened majority will not tol-
erate the abuses which a privileged
minority would seek to foist upon
the people as a whole."

The coyote actually increased its
range after the invasion of the
white man.
