Middle-income tax relief gets consideration

WASHINGTON (AP) — The chairman of the Republican-controlled Senate Finance Committee is ready to talk compromise with House Democrats on extra tax relief for low- and middle-income Americans, saying that "would not do violence" to President Reagan's tax plan.

"Between now and next week I hope to have some dialogue with the House Ways and Means Committee," Sen. Bob Dole, R-Kan., said Wednesday. The House panel was resuming work today on its own version of the tax cut.

Dole's committee already has approved a tax-cut plan mirroring Reagan's recommendation for an across-the-board 25 percent cut in personal tax rates over 33 months starting Oct. 1.

Democrats, saying a three-year tax cut would worsen inflation, are pressing a two-year plan with more relief for people making less than \$50,000 a year. In addition, their proposal for reducing business taxes is considerably different from the one advanced by Dole's committee.

"We could sit down and work out our differences on the business tax cuts in two hours," Dole said in an interview on CBS Radio. On individual tax reductions, he said, "I think they (Democrats) could give up the third year; we could give up the skewing."

House Speaker Thomas P. O'Neill made clear once again Wednesday that the "skewing" issue — targeting more relief to those with incomes under \$50,000 a year — is the major question.

"The whole issue is the \$50,000 question," O'Neill told reporters. "If you earn less than \$50,000, you benefit by the Democratic bill. If you earn more than \$50,000, you would want Reagan's bill."

The Reagan administration has opposed tilting a tax cut to low- and middle-income Americans, contending that wealthier people are more likely to invest the savings in ways that would benefit the economy. Bu Dole said the Democratic plan "would not do violence to the tax bill."

The congressional Joint Committee on Taxation estimates that 34.7 percent of the individual tax cuts in Reagan's bill would go to those with incomes above \$50,000 a year, compared with 20.6 percent in the Democratic proposal.

Democrats say those with incomes under \$50,000 must be given a larger share than Reagan recommends because they are hit hardest by inflation and rising Social Security taxes.

O'Neill repeated his promise that the House will complete action on the tax bill by Aug. 1. He said Rep. Dan Rostenkowski, D-Ill., the Ways and Means chairman, described as "complete hogwash" Reagan's claim that there can be no tax cut at all this year unless both the House and the Senate pass a compromise version before their August vacation.

The Internal Revenue Service says it needs six weeks after a tax bill is passed to prepare and distribute new tax-withholding tables. If the tax cuts go into effect Oct. 1, that presumably would mean the IRS would have to have the final bill in hand by mid-August.

Senate Democratic leader Robert C. Byrd said it would be very difficult — although possible — for Congress to enact the bill before starting its month-long summer recess Aug. 7. But he added he sees no need to rush just to meet such a timetable.

Some Reagan advisers have accused Democrats of deliberately stalling action on the tax bill. O'Neill denied it. "This is the hugest tax bill in the history of the world and you just can't get things done overnight," he said.

The Ways and Means Committee traditionally approves a tax bill before it is considered by the Senate, but because there is so much Democratic opposition to Reagan's bill, the measure is making its way very slowly through the committee. As a result, the Finance Committee has approved its bill and leaders hope to pass it through the Senate late next week.

Keeping cool in Chicago

Neighborhood youths find fun and relief from the summer heat from an open fire hydrant on Chicago's near north side Wednesday, as temperatures climbed into the 90s. Two youngsters found the water so inviting (foreground) they decided to try swimming in the street, where the hydrant began to form a pool.

Street violence continues in Britain

MANCHESTER, England (AP) — A thousand youths besieged a Manchester police station, screaming "Kill! Kill! Kill!" as Britain had its sixth straight night of street violence despite an appeal for calm from Prime Minister Margaret Thatcher.

The mob smashed windows and set fire to police vehicles and private cars in the station yard until truncheon-wielding bobbies, protected by plastic riot shields and reinforced safety helmets, drove the youths off, a police spokesman said.

Elsewhere in this northern industrial city on the hot and humid night, shops were set afire, broken into and looted in a repetition of the violence in London and Liverpool on the previous nights.

The police said "simultaneous and apparently well-coordinated attacks" were made on shops, pubs, garages and other buildings.

A police spokesman said 17 people were arrested, and three police officers were injured, including one hit in the arm by a crossbow bolt. The spokesman said the streets were quiet by 3:30 a.m.

More than 700 officers were deployed to quell the rioting.

Minor disturbances were reported in the week's other two trouble centers. Liverpool police reported two of their cars attacked, shop windows broken by a crowd of youths, and police stoned while clearing a rubble barricade. In London's East End youths stoned a police car. Two people were arrested in Liverpool and five in London.

The violence that began last Friday night in London's Southall district spread to Manchester's Moss Side district Tuesday night. It was renewed Wednesday night within two hours of Mrs. Thatcher's warning, in

a nationwide broadcast, that "violence will destroy everything we value."

"A free society will only survive if we, its citizens, obey the law and teach our children to do so," she said. "That is why the violence must be stopped. The law must be upheld, people must be protected."

Like the mobs in London and Liverpool, the youths in Manchester appeared to be motivated by hatred of the police and authority, venting burning resentment because of joblessness and lack of opportunity, or just out for excitement.

Young whites as well as blacks accused the police of harassing the blacks habitually.

"It's the police," said Ralph Lawrence, a 23-year-old jobless mechanic from Jamaica. "I really hate the bloody police. There's nothing racist about this. I hate them because

they harass us. I think this will go on a long while."

David Davison, 28, a white butcher's assistant in one crowd shouting abuse at the police, said trouble broke out after a policeman clubbed a black youth twice on the head "when he wasn't doing anything."

"I saw you do this," Davison shouted. "It's typical of the way you bastards treat the blacks."

Another black youth who refused to give his name said, "I think it's just boredom mainly. You get what you can."

Fire and burglar alarms rang for half a mile along Princess Road, the main shopping street in Moss Side, just before midnight. Dickson's hardware store had just been gasoline-bombed and the fire brigade was nowhere in sight.

Permian Airways out, but Sun Air may be in

AUSTIN — While one commuter line was officially canceled, another received an interim approval Wednesday by the Texas Aeronautics Commission to provide service to Midland Regional Airport.

Permian Airways, based in Midland, had been warned in June by the TAC it would lose its operating permit if no objections had been filed by Monday.

"No objections were received as of 5 p.m. Monday, the deadline for filing objections," said Tom Butler, hearing examiner for the TAC. "The airline's certificate has been canceled."

Meanwhile, Sun Air has the go-ahead to provide commuter service to 17 cities, including Midland. Initial service will begin Sept. 1 and will be between Amarillo, Midland-Odessa, San Antonio, Houston and Dallas-Fort Worth. Future service will include Abilene, Austin, Beaumont, Brownsville, Lubbock, El Paso, Harlingen, Laredo, Corpus Christi, McAllen, San Angelo and Wichita Falls.

Butler recommended the application be approved, and the interim certificate became effective today. At the TAC's next regular meeting in October, the commission may affirm, amend or revoke the interim order.

Sun-Air is leasing or renting five DC9-15F aircraft from Air Florida and a sixth aircraft from Municipal Leasing Corp. at a cost of \$3.3 million each, according to the commission's reports.

The airline shows assets totaling \$625,000 with \$275,000 more expected from investors and \$12 million to come from sale of stock, according to Butler.

Permian Airways hasn't been in service since September 1980 when it suspended all flights pending what officials called a temporary reorganization of the company's financial structure. The airline never took off again, even though Permian filed Dec. 4 to the TAC for a six-month extension of its operating certificate, saying it hoped to resume service.

Even though the aircraft have been sold, a spokesman for Permian said the airline would remain "a viable Texas corporation."

'Letters' begin on Thursdays

One of The Reporter-Telegram's most popular features, "Letters to the Editor," which traditionally has been published on the Opinion Page on Sunday, is being expanded to include Thursdays.

Today, letters appear on the Editorial Page, 4A, and will be published on that page each Thursday as long as warranted by number of letters received. "Letters" will continue to be published as a regular Sunday feature.

Letters are welcome on any subject but the right is reserved to edit for length and libelous material. All must be signed, with address and phone number included for verification purposes, and names will be published. In only rare cases are names of writers withheld and then only if the reason is felt justifiable by the editors.

Workers carrying out Polish warning strikes

Warning strike in Poland

Longshoremen gather at the docks in Gdynia, Poland, Wednesday during a one-hour warning strike called at five major Baltic Coast ports to press demands for improved living and working conditions. Spokesmen for the independent union Solidarity said the protest was carried out without incidents.

AP Laserphoto

WARSAW, Poland (AP) — Workers disrupted the flights of Poland's national airline and halted public transport in the northwestern city of Bydgoszcz in separate warning strikes today.

A four-hour warning strike by employees of the airline LOT demanding the right to pick their own boss left about 150 passengers stranded at Warsaw's Okecie International Airport, a union spokesman said.

Bus and streetcar drivers in Bydgoszcz, a city of 280,000 returned to their depots at 10 a.m. for a two-hour work stoppage pushing for the ouster of the director of the city transport system. The local union chapter charges that he abused his power, lived beyond his means and used public electricians to do private work.

The job actions were the second and third warning strikes this week in a new wave of labor unrest in Poland following a four-month lull. Dockworkers shut down all of Poland's Baltic Sea ports for one hour, Wednesday to press demands for improved working conditions.

The flareup of labor troubles drew quick criticism today from Poland's Communist allies. Czechoslovakia's Communist Party newspaper Rude Pravo said the airline strike was "another irresponsible action provoked by Solidarity." Hungary's party newspaper Nepszabadsag charged that the dockworkers' action was "totally unrealistic."

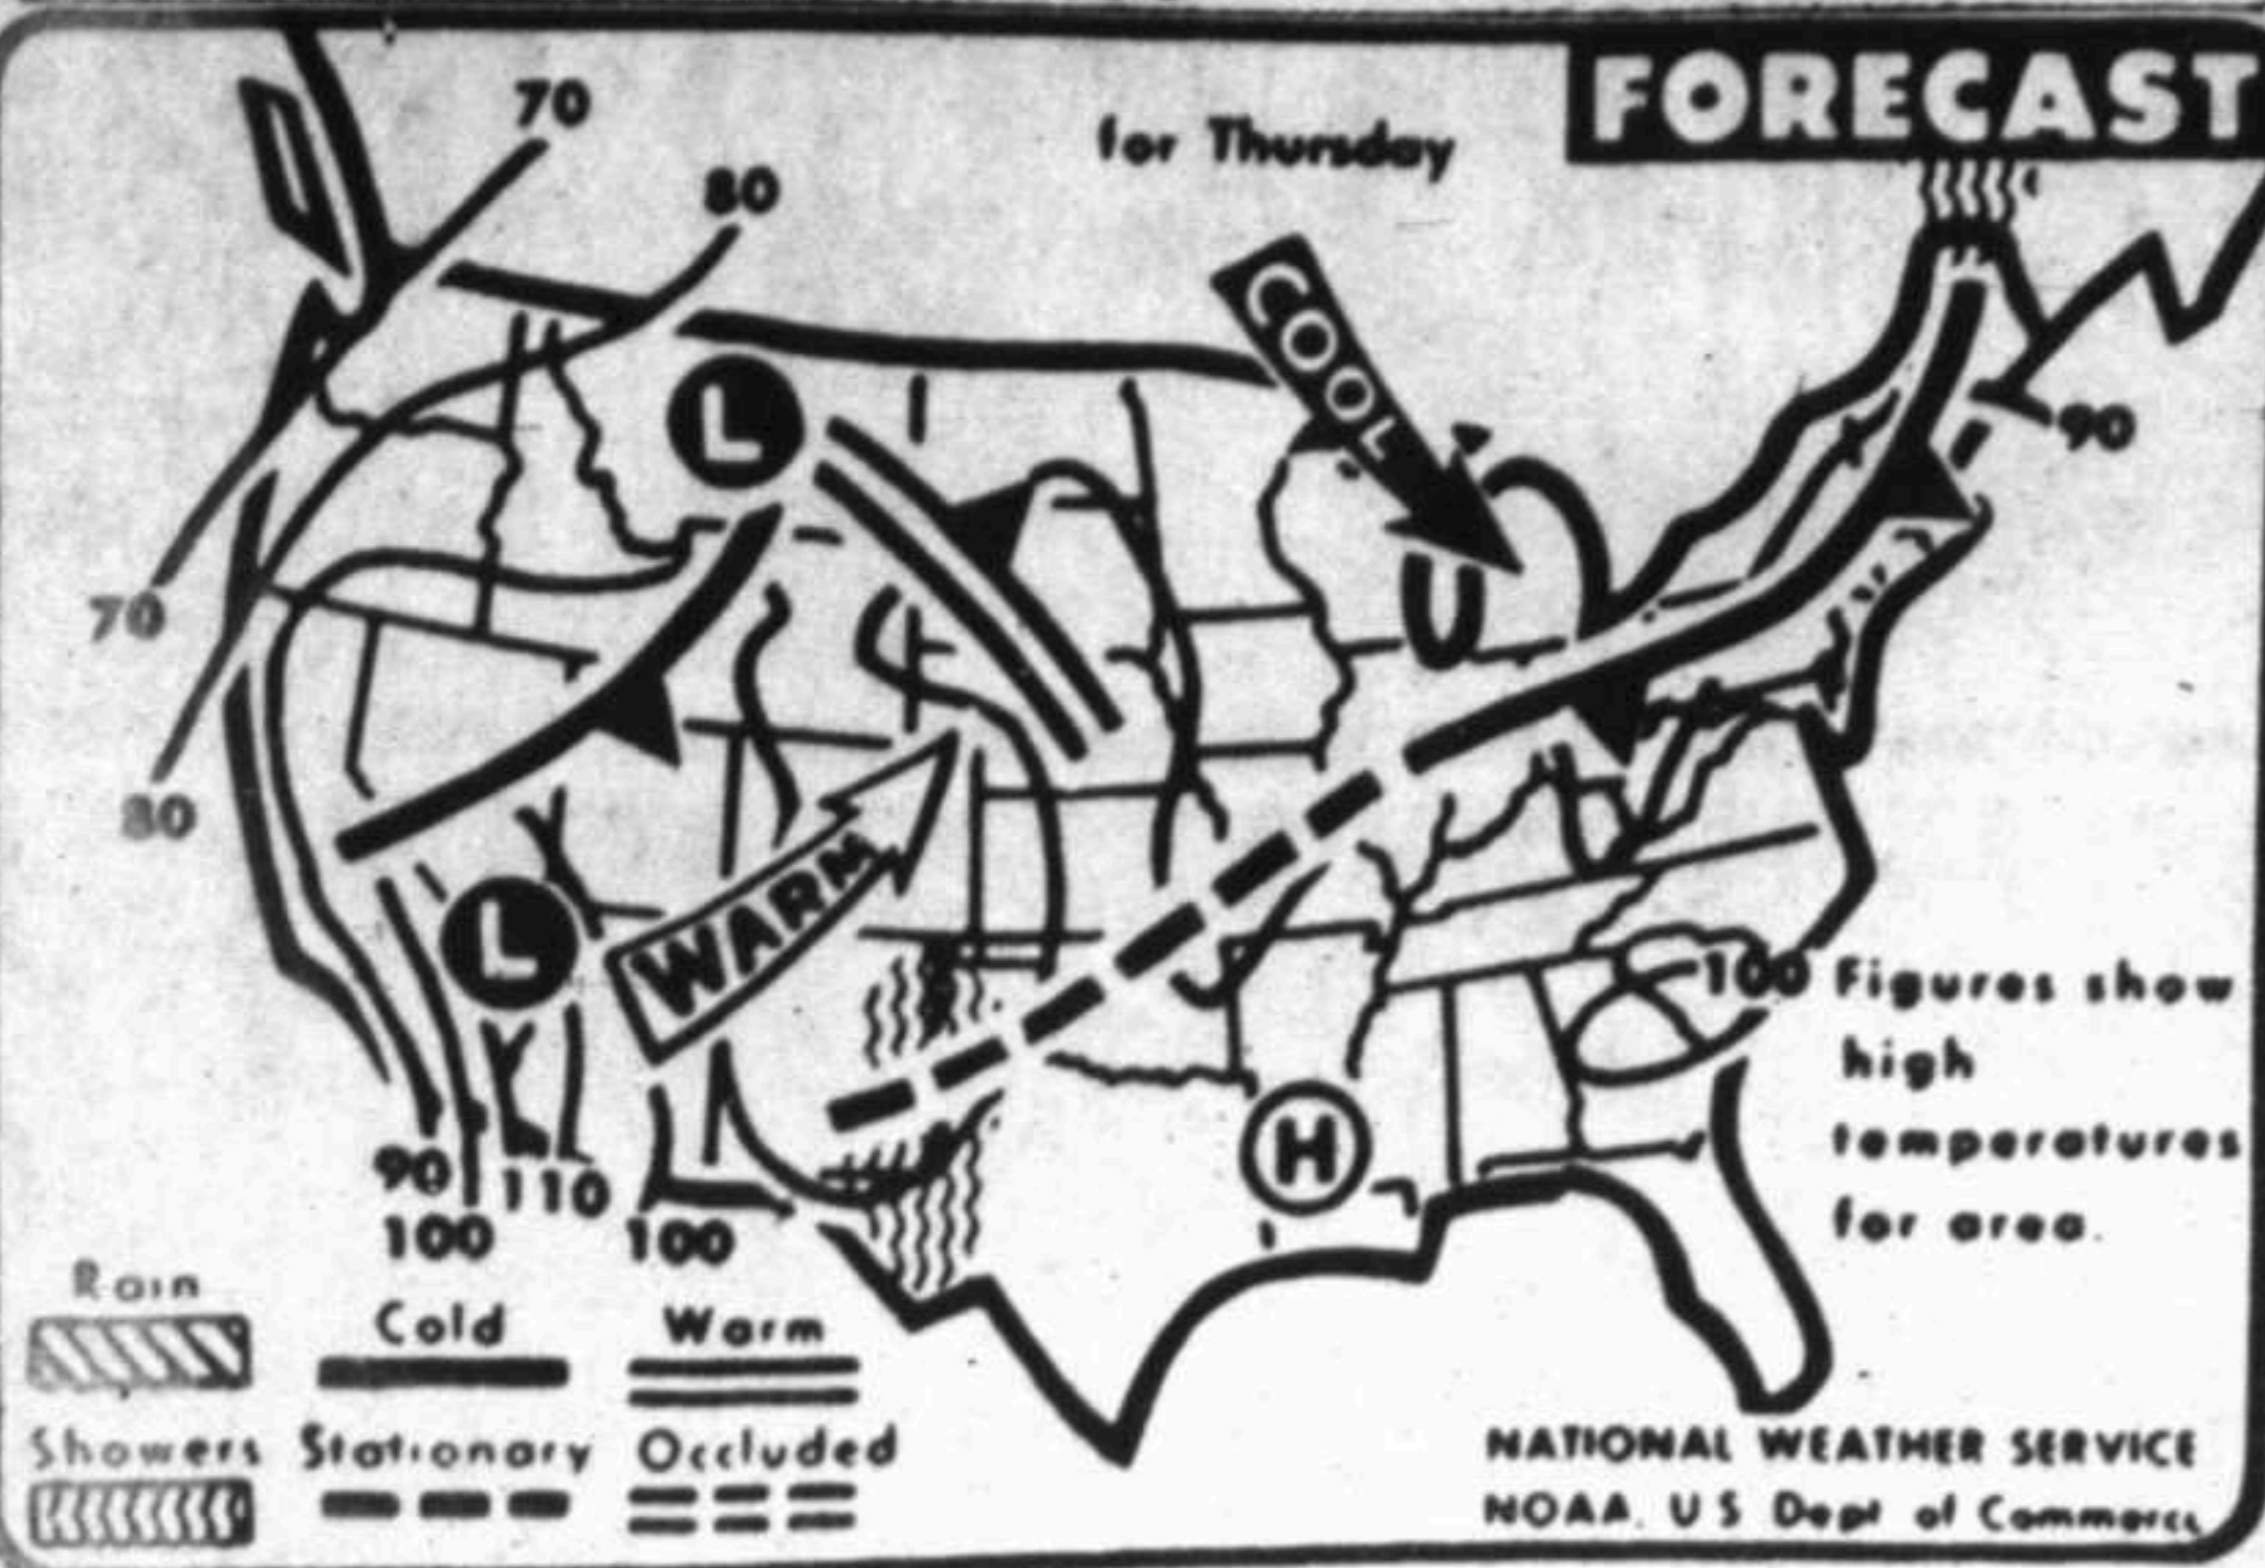

A spokesman for the independent Solidarity union said all domestic flights were grounded, and international schedules were delayed by the airline strike.

The protest began quietly at 8 a.m. — 2 a.m. EDT — after an all night vigil by Solidarity members awaiting a government reply to their demands. Solidarity represents 4,500 of the LOT's 6,000 employees.

Texas area forecasts

West Texas: Partly cloudy with scattered afternoon and nighttime thunderstorms through Friday. Highs 80s north to 90s south except near 100. Big Bend. Lows 60s north and mountains to 70s extreme south. Highs Friday 90s except near 100 Big Bend.

North Texas: Partly cloudy and warm through Friday with isolated thunderstorms mainly west. Highs 90s. Lows 70s.

20 percent chance for thunderstorms

Partly cloudy skies in the Permian Basin may bring some raindrops, but no important temperature changes through Friday, according to the National Weather Service at Midland Regional Airport.

There is a 20 percent chance of thunderstorms this evening with possibly a few severe storms. Winds will be light at 5-10 mph tonight, coming from the southeast. The low temperature will be in the upper 60s.

This morning's low was 70 degrees. The record low temperature for July 9 was recorded in 1979 at 56 degrees.

Wednesday's rainfall only amounted to .17 of an inch as recorded at the airport. The month-to-date total rose to .28 of an inch and the year-to-date total rose to 6.89 inches.

The possibility of rain will subside on Friday as temperatures will be in the low 90s. Winds on Friday will be 10-15 mph from the southeast.

Wednesday's high temperature was recorded at 91 degrees. The all-time high for the date is 103 degrees in 1964.

Lozano case scheduled for trial in federal court

By ED TODD Staff Writer

The federal civil rights suit which pits the sons of the late Larry Ortega Lozano against Ector County sheriff's deputies and county officials and possibly against former U.S. Justice Department officials is set for jury trial Aug. 17 in federal court in Midland.

The action seeks to redress alleged violations of the civil rights of Lozano, who, the plaintiff-sons claim, was "inflicted" with "cruel and unusual punishment" and was "deprived of life without due process."

Lozano, 27, died Jan. 22, 1978, just outside his padded isolation Ector County Jail cell after he allegedly went berserk and punishingly rammed himself into the cell's door and porthole window while several lawmen, including deputies and jailers, tried to subdue, control and calm him.

His death was ruled accidental by an Ector County inquest jury, which also held that reasonable force was used to subdue Lozano.

The original petition names 30 to 40 defendants, but several have been cut loose from the case by federal

Judge Lucius D. Bunton.

Among those severed from the case are former U.S. Attorney General Benjamin Civiletti and former Deputy Attorney General Drew S. Days III. However, attorneys for the sons, Randy Rene Lozano and Lawrence Derek Lozano, are appealing to the U.S. Fifth Circuit Court of Appeal in New Orleans, La., to get the two reinstated in the case.

The sons are claiming that the former Justice Department officials were remiss in their duty by dismissing a federal grand jury investigating alleged violation of Lozano's civil rights and in not pursuing the Lozano issue. The grand jury, meeting in Midland in July 1978, interviewed scores of witnesses and took no action.

Lozano was arrested by deputies in Odessa on Jan. 10, 1978, after he had an accident in his pickup truck, was arrested after allegedly fighting with the lawmen and died almost two weeks later.

Elton Fought, then the Ector County sheriff, initially maintained that Lozano, whom he later admitted needed treatment psychiatric treatment rather than jailhouse confinement, had committed suicide.

In addition to Fought, the Ector County commissioners and County Judge Gary Watkins and the lawmen and jailers are named as defendants in the suit.

The Lozano case has been kept before the court in part by the prodding of Mexican-American forces, including the League of United Latin American Citizens.

Among those severed from the case were officials of the Texas Attorney General's Office; Ector County Commissioners Willie Hammond and Bill Hicks, who were not commissioners until almost a year after Lozano's death; and John Penner, director of the Permian Basin Community Center for Mental Health-Mental Retardation.

Antiques taken

In light criminal activity during the past 24 hours, Wayne Dille of Orchard, Texas, reported the theft of property worth \$9,100 from the Fairmont Apartments.

An antique Chinese vase valued at \$3,444 was reported stolen from Jack O. McCall's residence at 3201 Racquet Club Dr.

Burglars gained entrance through a window to the home of F.B. McPherson of 3113 W. Golf Course Road. Reported missing were jewelry and silver, the value of which was unknown.

The 34-foot two masted schooner Vernon Langille, strikes the Carlton Bridge which spans the Kennebec River near Bath, Maine, with her masts and begins to capsiz Wednesday. The sailboat was attempting to pass under the open portion of the bridge and became caught in the wind or current and was unable to make the opening. The crew of eight was rescued by Coast guard vessels.

Schooner hits bridge; Men rescued

BATH, Maine (AP) — The Coast Guard is investigating an accident that occurred when the masts of a 36-foot schooner crewed mainly by sailing students struck a highway bridge over the Kennebec River and capsized.

The skipper and seven teen-age crew members were quickly rescued Wednesday morning by small boats, and none was injured.

The swamped schooner, the Vernon Langille, was towed first to the Bath Iron Works shipyard and then back to the Maine Maritime Museum's apprentice shop, where it was built three years ago.

Museum official Steven P. McAllister identified the skipper as Frank Simon,

37, and said the crew members, all between 16 and 18 years old, were sailing and boatbuilding students at the museum.

The Coast Guard's Marine SAFETY Office in Portland is investigating the accident, but officials would not speculate on the cause of the accident at the Carlton Bridge, which carries U.S. Route 1 traffic across the river.

McAllister said the vessel went off course when the wind suddenly died, and the schooner was then pushed by the powerful, tidal current toward the bridge. Its masts hit the bridge about 50 yards from the opening.

The hull of the boat was not damaged, but its masts need repair work, he said.

McAllister said the vessel went off course when the wind suddenly died, and the schooner was then pushed by the powerful, tidal current toward the bridge. Its masts hit the bridge about 50 yards from the opening.

The hull of the boat was not damaged, but its masts need repair work, he said.

New drug prevents herpes infections

BOSTON (AP) — A new drug given its first human test may be effective against a variety of illnesses caused by the herpes viruses, including genital herpes, cold sores, chicken pox, shingles and mononucleosis, its manufacturer says.

them by their mothers during birth.

The national Centers for Disease Control in Atlanta estimates that genital herpes afflicts between 5 million and 20 million Americans and that between 200,000 and 500,000 people catch it each year.

The Johns Hopkins study, directed by Dr. Rein Saral, was published in today's issue of the New England Journal of Medicine.

happens 5 percent from the herpes simplex infection," Saral said in an interview. "We felt that it was clearly a major cause of discomfort, and in some patients, it was a potentially life-threatening disease."

After the operations, none of those who took acyclovir developed sores. Meanwhile, seven people in the placebo group got herpes infections.

In the genital herpes tests, she said, "so far the results have looked fairly promising, but it's too soon to tell."

She said the company hopes to win approval from the Food and Drug Administration to market the drug late this year for people who face severe complications from herpes viruses, but more general use may not be possible for two or three more years.

Before the drug could be taken by pregnant women, studies would have to be conducted to make sure the medicine does not harm the fetus.

Results so far show that besides the herpes simplex virus, acyclovir appears to be useful against herpes zoster, which causes shingles and chicken pox, and Epstein-Barr virus, which causes infectious mononucleosis.

The drug does not cure these diseases; it prevents or stops outbreaks. The virus remains dormant within the body despite the medicine.

In the initial experiment with the medicine, called acyclovir, doctors at Johns Hopkins Medical School completely eliminated cold sores and genital herpes infections in bone marrow transplant patients. Because their natural immunity has been suppressed, these people are often plagued by troublesome, sometimes fatal herpes infections.

The drug's manufacturer, Burroughs Wellcome Co., is testing the drug for use by otherwise healthy people suffering from hard-to-treat diseases caused by three separate herpes viruses. Among these is genital herpes, a venereal disease that is fatal to newborn babies if passed on to

In the study, doctors gave the drug intravenously to 10 people who were about to undergo bone marrow transplants, while 10 others received inactive substitutes called placebos.

Blood tests showed that all 20 faced a high risk of developing infections caused by the herpes simplex virus. Ordinarily, more than 70 percent of these transplant patients break out with the disease.

"Historically, the people who got it either had severe lesions in the oral or genital area, with a mortality of per-

It appears to be extremely effective in preventing the growth of herpes virus in this patient population," Saral said.

One form of the herpes simplex virus causes cold sores, while a second results in genital sores. Both may remain dormant for long periods, only to flare up without warning.

At Burroughs Wellcome, spokeswoman Jan Tanner said more studies are under way to test the drug's value against genital herpes, cold sores, chicken pox and shingles. Studies will begin soon on mononucleosis.

Crane's romance not budding as fast as hoped

WASHINGTON (AP) — Federal wildlife officials are hoping their matchmaking efforts with a pair of whooping cranes will result in a visit from the stork.

But the romance at the Grays Lake federal wildlife refuge in Idaho is not blossoming as fast as scientists had hoped.

In a status report on its attempt to build a new flock of the endangered birds, the U.S. Fish and Wildlife Service said Wednesday that the transplanted female must have a mate for the Gray Lakes flock's annual migration to New Mexico if she is to survive in the wild.

The female, raised at the Patuxent Wildlife Research Center near Washington, was taken to Grays Lake by

commercial airliner April 25 because there were thought to be no females near breeding age there.

But, as Scott Derrickson of Patuxent explained, being the only available girl in town is no guarantee of finding a mate.

"Whooping cranes mate for life, and they're very selective," he said. "The disappearance during the last migration of two lone males and the failure of another to stake out a breeding territory left just one possible mate for the female."

So far the female and male have begun to do the swirling dance characteristic of their species. But scientists still are waiting to hear the female mating duet that gives the cranes their name.

The duet — one note sounded by the

male, followed by two staccato notes by the female — would signal that the birds had decided to share a lifetime nest.

Then the male would be available to guide the female to the flock's wintering grounds at the Bosque del Apache wildlife refuge in New Mexico, 870 miles away. Without such guidance, the female would have to be returned to Patuxent to survive, Derrickson said.

"We might have heard their 'unison call' by now if the male hadn't gotten sidetracked from the courtship," Derrickson explained. "Suddenly, for an unaccountable reason, he began to try to expand his territory in two directions at once."

Derrickson added, however, that

the male keeps returning to the female's roost and the scientists are still hoping the pair will mate.

The nation's whooping crane population has grown from about 15 in 1941 to around 100. All of them are in the Grays Lake flock, at Patuxent or are part of a wild flock that migrates annually between Wood Buffalo Park in Canada and Matagorda, Texas.

The wildlife service's report was released as the Defenders of Wildlife accused Interior Secretary James Watt of planning to turn the federal reserve at Matagorda over to Texas.

Interior Department spokesman Doug Baldwin said the wildlife group misunderstood Watt, as a kind of bureaucratic courtesy, "had merely told Texas Gov. Bill Clements he would consider Texas' request to take over Matagorda, Baldwin said."

AFT organizing nurses, professors

DENVER (AP) — College professors and nurses are becoming increasingly active in organized labor and are discarding the philosophy that unions are "beneath them," the president of the American Federation of Teachers says.

With 880,000 members, the AFT is the nation's second-largest teachers union, but it is increasing its strength by including more college professors and nurses than any other labor union, AFT President Albert Shanker said Wednesday at the union's 65th annual convention.

The nurses' division of the AFT, the Federation of Nurses and Health Professionals, has 30,000 members. The Communication Workers of America, the United Auto Workers and the United Steelworkers, among others, also are making efforts to organize health-care workers.

An estimated 80,000 college and university professors belong to the AFT,

compared with the 55,000-member American Association of University Professors, the second-largest professors' labor organization.

"Professors' parents are people who worked all their lives in a sweatshop to send their children to college," said Shanker. "Joining a union indicated to them that they had not climbed out of the middle class."

Unlike its rival 1.7-million-member National Education Association, the AFT calls itself a union and is affiliated with the AFL-CIO. That national affiliation has attracted nurses and professors, Shanker said.

One of the AFT's strongest education affiliates is the United Professors of California, which is working to win designation as the official bargaining representative for some 20,000 professors.

United Professors President Stewart Long said professors are the last group of workers in the state to demand collective bargaining. Meanwhile, cuts in state funds for colleges and two fiscally conservative governors have cost professors raises for

two years, he said.

"There is an inherent individualism and elitism among people who get their Ph.D., but all that is changing now," said Long.

Claire Dernbach, Denver president of the Nurses Federation and a member of the group's national steering committee, said health care workers are the largest group of unorganized workers in the nation, partly because of the same sense of "professionalism" that professors have.

"Nurses have long felt that unions had no place in hospitals, but they're changing their minds now," said Ms. Dernbach. "Because of the long hours, patient load, low salaries and poor benefits, nurses are asking for contracts that will protect them."

Big Spring woman dies in car mishap

BIG SPRING — Ethel Case, 37, of Big Spring was killed in a one-vehicle rollover here at 6:22 p.m. Wednesday.

Ms. Case was the sole occupant of a vehicle eastbound on State Highway 176 which struck the median and went out of control before overturning, police officials said.

The accident occurred 200 yards north of the intersection of State 176 and Interstate 20, according to Big Spring Police Department, which investigated the accident.

Correction

The Reporter-Telegram Wednesday mistakenly reported that 21-year-old Kathy Havner of Odessa had been arrested over the weekend in El Paso on bail bond violations. Instead of Ms. Havner, Mildred Sue Pittenger, 25, of Odessa, was arrested.

Ms. Pittenger and another Odessa woman were arrested on misdemeanor drug charges after border officials said marijuana was found in the purse of one of the women as they attempted to re-enter the country from Juarez Sunday.

They had been released on bond in Midland last week on charges they aided in last month's jailbreak by four federal prisoners from the city lockup.

Columnist wrote about the other Washington

WASHINGTON (AP) — Bill Gold had a secret. It was published in the Washington Post every day for 34 years, but it remained a secret to the rest of the country.

What Gold knew so well is that Washington is not just a capital city where presidents legislate, diplomats maneuver, courts rule and regulators regulate.

Washington is also a place where people wonder why the L-4 bus isn't air conditioned and who to call to get a dead tree removed. Where people care more about the price war between Giant and Safeway than the war between Iran and Iraq. Where David Hartman is better known than David Stockman.

In Washington, some people picket to keep the Yankees out of El Salva-

dor and some picket to keep an Exxon station out of their neighborhood. That's the Washington Gold wrote about every day since Jan. 13, 1947, in a column in a corner of the comic pages.

His column was called "The District Line" — Washingtonians' term for the border between the District of Columbia and the Maryland suburbs.

At the end of June, Gold and the column retired.

To say so long, 950 District Liners (what he always called his readers) stopped by the Post lobby to sign a scroll.

In a farewell editorial, the Post said Gold helped thousands to become "naturalized, permanent residents of this community."

Post publisher Donald Graham

says, "There's a certain connection that a very few journalists can make with a big community of readers and long ago, somewhere back in those 34 years, those readers came to believe that Bill was shooting straight with them."

The column has been replaced by "Bob Levey's Washington." Levey's first effort saluted Gold's 34 years.

Gold's first column carried a plea for a new stadium and a report about a motorman on a crowded Washington streetcar who called out: "Come on, folks. Move to the rear. Take the back seats, just like you do in church."

In a newspaper that helped bring down a president, whose editorials are studied in Saudi Arabia, there isn't much room for local chit-chat.

Gold wrote it, though: 19.7 column inches of chit-chat a day.

In "The District Line" there was room to wonder why dogs always like to look out the windows of moving cars, to crusade for camp safety and against panhandlers and the use of "hopefully" at the beginning of sentences.

Indeed, he made room for endless crusades. He wanted to bring back the Senators baseball team. He scolded radio stations for disclosing the location of radar speed traps. He wanted cafeterias to quit displaying the desserts first, before the patron had decided upon his main course. He wanted signs erected at new building sites so passers-by could know what was going on.

Gold ran a "give-aways" section. Readers offering to give away an old piano or "darling, playful puppies" were expected to send along a dollar to benefit Children's Hospital.

Gold persuaded thousands to quit sending Christmas cards to co-work-

ers and to send the savings to Children's. Al Lawson, a hospital official, says "The District Line" raised between \$1.6 million and \$1.7 million.

Gold lobbied to get small news in the newspaper, too. This was a typical exchange between columnist and editor, as related by Gold in an interview:

"Al, there was a bad tie-up on the Beltway this afternoon; 10,000 people were late for supper. They'll want to know what happened."

"Gee, Bill, we've got an awful tight paper tonight."

"OK, Al. I'll call the Evening Star. Maybe they'll be interested."

And the next morning's Post would find room for a story explaining the delay on I-495.

Gold, a night person, awoke and ate breakfast with wife Bernice. (In column, always, "the married woman I live with.")

At 6 p.m., he went to the office to return phone calls, read the mail and find out what would be in the next day's paper.

Between 9 and 10, he wrote the column. Then he rewrote it and tinkered and tightened and polished. And showed the piece to colleagues and to ask them to take a whack at it.

"The best of us write some pretty crude things once in a while," he says. "This column was all the Post asked me to do. The least I could do is write it in fairly good English."

He often left as the dayside people were arriving, to go home, eat the day's other meal and go to bed when Washingtonians were sending their kids to school and reading "The District Line" at their breakfast table.

The married woman he lived with didn't let him read the column at the table. He'd get too excited if he didn't like it.

Violent crimes up 60 percent

KANSAS CITY, Mo. (AP) — Crime is such a "growing fear across America" that parents are giving their children "mugger money" and older people are afraid to visit city parks, says FBI Director William Webster.

Violent crimes are up 60 percent in the last decade — 13 percent last year alone — and a majority of Americans now have guns in their homes although many don't know how to use them properly, Webster told the Eighth Circuit Judicial Conference Wednesday.

"We hear of mothers giving their children 'mugger money' to carry with them and give to muggers so they will not be beaten up," he told judges and lawyers from seven Midwestern states. "Elderly people are staying home. They're afraid to go to parks or walk the streets."

The Reagan administration is dedicated to reversing the growing trend of violent crimes, he said, adding that another target is white collar crime.

which accounts for 15 percent of the cost of consumer goods.

Access to bank records could be a boon in the fight against white collar crime but legislation dictates that the FBI must have permission of the owner before looking at the records, he said.

"I hate to see us squeezed out of information we need to fight white collar crime," Webster said. Courts have ruled bank records are not protected by the Constitution, yet legislation dictates that "we must now ask the person we're wanting to investigate if we can see his bank records," he added.

The ongoing war against organized crime is making headway, Webster said, with 597 convictions in that area last year. The same year brought the conviction of major crime figures in Los Angeles, New York City, Kansas City, New Orleans, Detroit, Chicago and Miami.

The Newspaper BIBLE

HAVE YOU RECEIVED THE HOLY SPIRIT?

While Apollos was in Corinth, Paul traveled through Turkey and arrived in Ephesus, where he found several disciples.

"Did you receive the Holy Spirit when you believed?" he asked them. "No," they replied, "we don't know what you mean. What is the Holy Spirit?"

"Then what beliefs did you acknowledge at your baptism?" he asked. And they replied, "What John the Baptist taught."

Then Paul pointed out to them that John's baptism was to demonstrate a desire to turn from sin to God and that those receiving his baptism must then go on to believe in Jesus, the one John said would come later.

As soon as they heard this, they were baptized in the name of the Lord Jesus. Then, when Paul laid his hands upon their heads, the Holy Spirit came on them, and they spoke in other languages and prophesied. The men involved were about 12 in number.

Then Paul went to the synagogue and preached boldly each Sabbath day for three months, telling what he believed and why, and persuading many to believe in Jesus. But some rejected his message and publicly spoke against Christ, so he left, refusing to preach to them again. Pulling out the believers, he began a separate meeting at the lecture hall of Tyrannus and preached there daily. This went on for the next two years, so that everyone in the Turkish province of Asia -- both Jews and Greeks heard the Lord's message.

DEATHS

David F. Hensley

David F. Hensley, 20, of 1218 S. Colorado St., died Tuesday in a Midland hospital from injuries suffered in an automobile accident June 28, 1981.

Services were to be at 3 p.m. today in the Newnie W. Ellis Funeral Home chapel with the Rev. David Baker of Hope Lutheran Church officiating. Graveside services will be held at 1:30 p.m. Friday at Fort Bliss Cemetery in El Paso. Local arrangements are under the direction of Ellis Funeral Home.

Hensley was born April 10, 1961, in Huntington, W. Va. He lived most of his life in El Paso, moving to Midland in 1977. He entered the Army in October 1977 and was discharged in November 1979. He was a member of Hope Lutheran Church.

Survivors include his parents, Mr. and Mrs. Franklin L. Hensley of Midland; four sisters, Sonia Banks of Key West, Fla., Roberta Negrete of Panama City, Panama, and Sandra Hensley and Betty Hensley, both of Midland; and several aunts and uncles.

Doug G. Baxter

Doug G. Baxter, 59, of 3203 Sage Street, died Tuesday in a Midland hospital following a lengthy illness.

Services were held Wednesday in Newnie W. Ellis Funeral Home chapel with the Rev. Jerry Berry of Kevliev Heights Baptist Church officiating. Burial was to be in Resthaven Memorial Park under the direction of Ellis Funeral Home.

Baxter was born Jan. 29, 1922, in Ardmore, Okla. He grew up in several towns throughout Texas. He worked in the oil industry and lived in Arizona for 12 years before moving to Midland in 1969. He had been in poor health for

several years. He was a member of the Baptist Church.

Survivors include his wife, Verna Baxter of Terrell; a daughter, Doris Ann Baxter of Mineola; four sisters, Lavania Williams and Dee Schultz, both of Midland, Nancy Ogles of Los Angeles, Calif., and Marie Waters of Levelland; six brothers, Overt Baxter of San Bernadino, Calif., Olander Baxter of Midland, Oscar Baxter and Charles M. Baxter, both of Los Angeles, Calif., Delmer Baxter of San Paula, Calif., and Robert Baxter of Kilgore; an aunt, three grandchildren and several nieces and nephews.

Pallbearers were to be Gary Baxter, Roy Williams, Bruce Derasus and David Derasus, all of Midland, Rusty Baxter of Hobbs, N.M., and Richard Williams of Carlsbad, N.M.

Joe H. Holland

STANTON — Joe H. Holland, 57, of Odessa and formerly of Stanton, died Tuesday in a Dallas hospital after a lengthy illness.

Graveside services were to be at 11 a.m. today at Evergreen Cemetery with Deral McWhorter, minister of the Church of Christ in Stanton, officiating. Services will be under the direction of Gilbreath Funeral Home.

He was born Nov. 12, 1923, at Mitchell County, Texas. He had been a resident of Odessa eight years and was a former resident of Stanton. He was a veteran of World War II. He was a truck driver.

Survivors include a son, Bobby Holland of Stanton; a daughter, Brenda Hughes of Abilene; a sister, Mrs. Clea Echols of Gorman; a brother, Wayne Holland of DeLeon; and four grandchildren.

Mrs. W.W. Nelson

LUBBOCK — Mrs. W.W. Nelson, 86, of Midland and formerly of Lubbock, died Saturday in a Midland nursing home after an illness.

Graveside services were Monday at the City of Lubbock Cemetery with the Rev. Sam Nader, pastor of First United Methodist Church of Lubbock, officiating. Sanders Funeral Home of Lubbock was in charge of arrangements.

Mrs. Nelson had lived in Midland for three months. She had been a resident of Lubbock for 56 years.

Survivors include a brother, Homer Snider of Liberty; two daughters, Willena Dupree of Amarillo and Margaret McEvers of Bismarck, N.D.; two sons, Joe A. Nelson of Midland and H. Alan Nelson of Tulsa, Okla.; 14 grandchildren and five great-grandchildren.

Hanging from a line in a London store recently are the latest in souvenir specialties: royal coat hangers, bearing the images of Prince Charles and Lady Diana Spencer, which sell for about \$8.

Administration tells Europe that it must accept missile deployment

WASHINGTON (AP) — The Reagan administration says Western Europe must accept the decision to deploy U.S. medium-range nuclear missiles on its soil or undermine the credibility of the NATO alliance.

Any reversal of a decision already made unilaterally by NATO members would give the Soviet Union what amounts to veto power over the alliance's decision-making process, according to a senior State Department official.

SUCH A STEP also would undermine the U.S. bargaining position in forthcoming negotiations with the Soviets on reducing the numbers of nuclear missiles aimed at West European countries, said the official, who spoke with reporters under ground rules stipulating that he not be identified.

The official acknowledged that pressure is increasing on European leaders from "a vociferous minority" favoring

pacifism and neutralism to abandon the two-track alliance approach of deploying the U.S. missiles while negotiating with the Soviets for mutual missile reductions.

THE APPROACH was spelled out in an unanimous decision in December 1979 and reaffirmed this May as a NATO response to the Soviet missile deployment.

"If the alliance now cannot proceed with that decision we will have told the Soviet Union that they have a veto over our decisions," the official said.

"And most important of all we will have shown each other that when it comes to really tough decisions, we can't make them," he said.

"AND THEREFORE

my answer is that for good or evil, willy nilly, we are in a situation where that deployment and those negotiations — two tracks — simply must proceed. And all of us have got to stand up on a tiptop political issue and proceed with it," the official said.

"If it should fail — and I do not by the way happen to think its going to — we would all have to go back and take a very hard look at what that means," he said.

Any bending to political pressures in Europe by beginning to consider alternatives to the deployment "would simply be telling those who would prefer not to proceed that in fact if they fought hard enough we won't proceed," he said.

A sea-based alterna-

tive missile system simply cannot serve as an effective alternative bargaining chip against the Soviet missiles, the official insisted.

Power restored at hospital

PORT WORTH, Texas (AP) — John Peter Smith Hospital officials say that normal operations are not expected to resume at the hospital until next Monday at the earliest.

Officials said Wednesday that power was restored to most of the hospital, but the air conditioning was still out.

Electricity was functioning in all but a few areas of the hospital, but "more than 100 air conditioning components had to be sent to Dallas to be repaired," said spokeswoman Sally Blaydes.

Houston skunk rabid

HOUSTON (AP) — Harris County health officials say a skunk that scaled a six-foot wood fence and attacked two large dogs before it was shot had rabies.

Spokesman Teddi Pamphillis said the skunk — the fourth discovered this year to have contracted the dreaded disease — was killed July 3 at a southwest Houston home after it attacked the two pets.

One of the dogs was vaccinated and will quarantined at least two weeks, Ms. Pamphillis said. But the other dog, only four months old, was not vaccinated and may have to be destroyed, she said.

16 Permian Basin wildcats scheduled

Sixteen wildcats have been scheduled in the Permian Basin counties of West Texas and eastern New Mexico.

MARTIN COUNTY
MGF Corp. of Midland has scheduled a 11,200-foot wildcat in Martin County, 15 miles northeast of Stanton.

Designated the No. 1 Grantham, the location is 1,880 feet from the north and 1,980 feet from the west lines of section 14, block 35, township 2 north of the T&P survey.

The site is 7,000 feet northwest of the 10,190-foot Baxter, abandoned July 9, 1965.

WARD COUNTY
S&W Enterprises of Wink will re-enter the No. 1-D S&W Barbara A in the Delstrat (Brushy Canyon) field of Ward County.

The location is 1,320 feet from the north and east lines of section 88, block F of the G&MMB&A survey and is eight miles south of Wink. Contract depth is 3,850 feet.

The location is two miles southwest of the 3,600-foot production.

ANDREWS COUNTY
MSW Drilling of Hobbs has scheduled a 5,500-foot field test in the Emma (Glorietta) field of Andrews County.

The No. 5 Emma Cowden (Glorietta) is located 1,320 feet from the north and 1,740 feet from the west lines of section 1, block 44, township 2 north of the T&P survey and is 15 miles southwest of Andrews.

The site is 1 mile southeast of the 5,205-foot Plymouth University abandoned April 10, 1944.

TOM GREEN COUNTY
J.A. March of Dallas will drill the No. 2 Clifton Simcik, a 6,000-foot wildcat and as a location west offset to the Cisco oil opener, in Tom Green County, five miles southwest of Wall.

Location is 7,333 feet from the north and 1,667 feet from the east lines of the J.S. Grant No. 6 abstract 5536 survey. Ground elevation is 1,922.2 feet.

REAGAN COUNTY
Carlton Drilling Co. of Austin will drill the No. 1 Krueger Unit, a 5,000-foot Ellenburger wildcat in Tom Green County, 7/8 mile south of a scheduled wildcat, and eight miles southeast of Miles.

Location is 467 feet from the third most easterly south line and 2,750 feet from the most easterly west line of section 1 of the E.J. Vaughn survey.

SUTTON COUNTY
Florida Exploration Co. of Midland will drill the No. 1 Tompson, a 3,100-foot wildcat in Sutton County, 15 miles northeast of Sonora.

Location is 1,980 feet from the north and 600 feet from the east lines of section 35, block 9 of the TW&NG survey. Ground elevation is 2,378.6 feet.

EDDY COUNTY
Wayne Moore of Midland will drill the No. 1 Amoco Federal, an 8,500-foot wildcat, 3 5/8 miles north of the opener and lone producer of the Hay Hollow (Strawn gas) field in Eddy County, 10 miles southwest of Malaga.

Location is 660 feet from the north line and 990 feet from the east lines of section 26, township 25 south, range 27 east.

PERRY COUNTY
Perry R. Bass of Midland has announced completion of the No. 49 Poker Lake Unit, as a Morrow gas discovery in Eddy County, 10 miles east of Malaga.

Potential for a calculated absolute open flow of 1,671,000 cubic feet of gas per day, production was through perforations at 14,307 to 14,349 feet.

gas per day, production was through perforations at 14,307 to 14,349 feet.

Drilled to 14,470 feet, 5 inch liner was run to that depth.

Location is 1,980 feet from the north and 990 feet from the west lines of section 17, township 24 south, range 30 east.

DINERO OPERATING CO. of Midland will drill the No. 1 McNutt, an 8,000-foot wildcat in Eddy County, one mile northeast of Malaga.

Location is 1,980 feet from the south and 630 feet from the west lines of section 12, township 24 south, range 28 east.

The site is 7/8 mile northwest of Delaware oil production and one mile east of dual Atoka and Morrow gas production in the Malaga field.

ORLA PETCO INC. of Midland will drill the No. 1 Perkins, a 4,500-foot wildcat 3 3/8 miles northwest of the one well Pecos (Delaware oil) field and 15 miles south of Malaga.

Location is 1,980 feet from the north and east lines of section 30, township 26 south, range 29 east.

ANDERSON PETROLEUM INC. of Midland will drill the No. 1-43 Hugh T. Andrews, an 8,000-foot wildcat in Crockett County, 3/8 mile west and slightly north of a 7,750-foot failure and 13 miles northwest of Ozona.

Location is 2,400 feet from the south and 2,500 feet from the west lines of section 43, block UV of the GC&SF survey. Ground elevation is 2,590 feet.

The failure is Gulf Oil Corp. No. 1 Shannon, abandoned Aug. 14, 1950.

C.F. LAWRENCE & ASSOCIATED INC. of Midland will drill the No. 2A Shannon "C", a 2,700-foot wildcat in Crockett County, 12 miles east of Iran.

Location is 2,100 feet from the north and 5,615 feet from the west lines of James Wiley Heirs No. 2, Block GG survey.

BOB HIGDON OF HOUSTON will drill the No. 3 Booth, an 8,000-foot wildcat in Reagan County, 12 miles east of Big Lake.

Location is 1,400 feet from the north and west lines of section 237, block 1 of the T&P survey.

The site is three miles northeast of 9,008 foot Ellenburger oil production in the Barnhart multipay field.

MOLE OPERATING CO. INC. of Richardson will drill the No. 1 Hendry, a 6,200-foot wildcat in Coke County, 2.6 miles east of Blackwell.

Location is 800 feet from the north and 3,300 feet from the southeast lines of section 1, block A of the T&P survey. Ground elevation is 2,022 feet.

COKE OIL OF SAN ANGELO will drill the No. 2 C.N. Webb as a 4,550-foot wildcat in Coke County, 2 1/2 miles east of Bronte.

The location is 2,342 feet from the northeast and 450 feet from the north-west lines of J.Fannin No. 8 abstract 1030.

JERRY E. WYLIE OIL DRILLING CO. of Abilene will drill the No. 2A C. Grohman, a 4,700-foot wildcat in Runnels County, nine miles east of Winters.

Location is 2,100 feet from the north and 2,050 feet from the east lines of section 177 of the HT&B survey, abstract 269. Ground elevation is 1,931 feet.

ARKANSAS NUCLEAR ONE near Russellville is one of 14 older nuclear plants the NRC specifically is concerned about.

A spokesman for Arkansas Power & Light Co., which operates the nuclear plant, said studies requested by the NRC are part of a continuing inspection process.

"We are, along with the manufacturers of the reactor, doing some further analysis of the problem, reviewing figures and getting some new information," AP&L spokesman Charis Kelly said.

He said no problems were found while inspecting the reactor during a recent refueling.

"It is conceivable that this could develop into a problem that's going to have to be dealt with, but we don't anticipate any problems in the next few years and we're not sure that there ever would be one," he said.

Kelly said he understood the NRC's request for studies was based on unrealistic data from the nuclear plant at Three Mile Island in Pennsylvania.

A severe overcooling and repressurization accident involving a weak vessel in one of the pressurized-water reactors could cause the reactor ves-

American Stephen Ptacek, 28, pilot of the Solar Challenger (background) is welcomed by its designer Dr. Paul McCready (right) following the successful flight, Tuesday by the aircraft across the English Channel from Cormeilles in France to Manston Royal Air Force base 20 miles north of Dover. The Solar Challenger is powered by more than 16,000 solar cells on moveable panels on top of the plane's wings and was in the air for a total of five and a half hours.

Solar plane Channel crossing is success

MANSTON, England (AP) — American pilot Stephen Ptacek says his success in the first solar flight across the English Channel was "everything I expected and more."

Ptacek, 28, of Golden, Colo., made the 185-mile crossing Tuesday to England's southern coast from Cormeilles-en-Vexin, near Paris, in 5 1/2 hours at a speed of 37 mph.

His 217-pound "Solar Challenger," built by a team of aeronautical engineers from California led by scientist Paul McCready, was powered by 16,000 photoelectric cells spread on the craft's light plastic wings. It flew

at 11,000 feet in bright sunshine. Ptacek, climbing from the plastic cockpit after a smooth landing at Manston airport, said the craft handled perfectly.

"The only real problem was with chase planes — not our own, but some others, one of which was a helicopter," he said. "As we crossed the French coast it created a problem of weight turbulence."

McCready, who made aviation history by designing the Gossamer Albatross, the first human-powered craft to cross the channel, said Tuesday's flight proved sunshine is a seri-

ous energy alternative. "If solar cells can carry a man from France to England, it proves they have muscle and are useful for more than just wrist-watches," he said.

"Our thinking over the past 70 years has been conditioned by the ready availability of lots of cheap energy and relatively inexpensive materials. Times are changing and we are going to have to get by on

less." The Solar Challenger team waited a month on the European continent for the right conditions to cross. An attempt June 10 was scrubbed due to bad weather.

The solar cells, worth about \$114,000, were loaned by the National Aeronautics and Space Administration. The Du Pont chemical company sponsored the project.

No problems with reactor, AP&L says

RUSSELLVILLE, Ark. (AP) — The federal Nuclear Regulatory Commission has expressed concern about steel fuel containers at Arkansas' nuclear plant near Russellville and other power plants across the nation.

Federal officials are concerned that the steel fuel containers in some older nuclear reactors may be more vulnerable to cracks than anticipated. So 44 nuclear plant operators have been asked to test the toughness of their reactor vessels.

Arkansas Nuclear One near Russellville is one of 14 older nuclear plants the NRC specifically is concerned about.

A spokesman for Arkansas Power & Light Co., which operates the nuclear plant, said studies requested by the NRC are part of a continuing inspection process.

"We are, along with the manufacturers of the reactor, doing some further analysis of the problem, reviewing figures and getting some new information," AP&L spokesman Charis Kelly said.

He said no problems were found while inspecting the reactor during a recent refueling.

"It is conceivable that this could develop into a problem that's going to have to be dealt with, but we don't anticipate any problems in the next few years and we're not sure that there ever would be one," he said.

Kelly said he understood the NRC's request for studies was based on unrealistic data from the nuclear plant at Three Mile Island in Pennsylvania.

A severe overcooling and repressurization accident involving a weak vessel in one of the pressurized-water reactors could cause the reactor ves-

sel to crack like a hot glass jar thrust into cold water, NRC officials said in interviews this week.

The reactor vessel contains the radioactive fuel rods used to produce heat and electricity.

Operators of the pressurized-water reactors also were directed to review cooling control systems, said Thomas Murley, director of the NRC's safety division. NRC researchers in Oak Ridge, Tenn., and Washington were assigned to study the problem.

No immediate corrective measures were ordered, although Murley said some steps likely will be taken within a year. However, a dissenting NRC safety engineer has urged that some older plants be shut down pending the study.

Murley told the commissioners that no nuclear plants were ordered shut down because the staff does not believe any of them are in bad enough shape now that the vessel would crack.

The phenomenon that has caused concern is known as pressurized thermal shock. It has long been a concern of nuclear scientists.

If a crack breached the 8-inch-thick steel wall of the vessel, allowing the cooling water to escape, it could cause the fuel to overheat, Murley said fuel rods then might melt through the vessel into the plant's concrete containment building, very likely causing a release of radioactive material into the atmosphere.

The request was issued after NRC officials discussed overcooling accidents in California and Florida and the discovery that steel in the Maine Yankee reactor at Wiscasset was aging more rapidly than anticipated.

Brunson Ranch, Getty Oil Co. No. 1 M. W. Wilder, total depth 15,748 feet, fishing.
EDDY COUNTY Wayne Moore of Midland will drill the No. 1 Amoco Federal, an 8,500-foot wildcat, 3 5/8 miles north of the opener and lone producer of the Hay Hollow (Strawn gas) field in Eddy County, 10 miles southwest of Malaga.	UPTON COUNTY Gulf Oil Co. No. 1 Clara Neal et al, drilling 645 feet time, shale.	MARTIN COUNTY Bredow, E. Saxon Oil Co. No. 1 P. Guy Wade, flowed 24 hours on a 4 1/2" choke casing pressure 125 psi, 83 barrels load oil, 31 barrels load water. Bredow, E. S. S. S. Saxon Oil Co. No. 2 Steel, pumped 24 hours, 72 barrels load oil, 13 barrels water, (2-87 BBL).
REAGAN COUNTY Carlton Drilling Co. of Austin will drill the No. 1 Krueger Unit, a 5,000-foot Ellenburger wildcat in Tom Green County, 7/8 mile south of a scheduled wildcat, and eight miles southeast of Miles.	VAL VERDE COUNTY Cities Service Oil Co. No. 1 Other kamp A, rigging up rotary 20" casing at 40 feet.	PECOS COUNTY Hobo Caballero, S. (Devenian), Gulf Oil Co. No. 1 First National Bank of Midland, drilling 17,544 feet shale.
SUTTON COUNTY Florida Exploration Co. of Midland will drill the No. 1 Tompson, a 3,100-foot wildcat in Sutton County, 15 miles northeast of Sonora.	WARD COUNTY Cities Service Oil Co. No. 1 Univ 1217, drilling 270 feet shale, sand. Getty Oil Co. No. 1 University 43-20, drilling 14,941 feet. Gulf Oil Co. No. 1208 G. W. O'Brien, total depth 15,850 feet, plugged back 8,560 feet, flowed 235 barrels oil, 811 barrels water. Gulf Oil Corp. No. 1220-P. G. W. O'Brien, drilling 7,600 feet time.	REAGAN COUNTY Spraberry Trend Area, Saxon Oil Co. No. 1 Lena Lee "A", pumped 24 hours, 36 barrels load oil, 136 barrels load water (42 BBL) (2,800 BBL).
TOM GREEN COUNTY J.A. March of Dallas will drill the No. 2 Clifton Simcik, a 6,000-foot wildcat and as a location west offset to the Cisco oil opener, in Tom Green County, five miles southwest of Wall.	TERRY COUNTY Prestite 6700, Adobe Oil Co. No. 1, ran 6" casing 6,481 feet, pumped 100 barrels load water in 14 hours, shut down. Prestite 6700, total depth 6,770 feet line, waiting on completion unit.	

Workers strike Georgia's largest electric company

ATLANTA (AP) — Thousands of workers struck Georgia's largest electric utility today after rejecting the company's terms for a new contract.

The latest offer would have provided a two-year contract with salary and benefit increases amounting to 11.5 percent, the company said. That would have brought the wages of a journeyman lineman to more than \$11 an hour from \$10.07, the utility said.

The union last struck the company in 1931. Several attempts early today to reach union officials by telephone were unsuccessful.

Conner said earlier that the union hoped to get back to the bargaining table sometime next week; the company said it remained ready to bargain.

Conner said the workers rejected the contract because of its wage offer and their resentment of the company's strike preparations.

"At the very start of negotiations, before Georgia Power made any kind of offer, they started their training schools, spent large sums of money and provided uniforms for non-union people to train for our jobs," he said.

"A lot of people were resentful of this and it had a big impact on the vote." As the strike deadline neared, Georgia Power claimed its plants and construction sites had been struck by an "outbreak of vandalism" and offered \$25,000 rewards for information leading to the conviction of anyone trying to damage company property.

offer, but it was turned down in a vote by mail. The old contract expired June 30, but the strike deadline was extended to allow time for the vote.

The latest offer would have provided a two-year contract with salary and benefit increases amounting to 11.5 percent, the company said. That would have brought the wages of a journeyman lineman to more than \$11 an hour from \$10.07, the utility said.

The union last struck the company in 1931. Several attempts early today to reach union officials by telephone were unsuccessful.

Conner said earlier that the union hoped to get back to the bargaining table sometime next week; the company said it remained ready to bargain.

Conner said the workers rejected the contract because of its wage offer and their resentment of the company's strike preparations.

As the strike deadline neared, Georgia Power claimed its plants and construction sites had been struck by an "outbreak of vandalism" and offered \$25,000 rewards for information leading to the conviction of anyone trying to damage company property.

Georgia Power spokesman Dave Altman said there "appeared to be widespread participation" in the walkout at midnight Wednesday, but the number of strikers was unavailable. The contract covers about 5,500 of the company's approximately 13,000 employees, he said.

"It's hard to say how long we can continue full service," Altman said. More than 3,100 employees were given emergency job assignments. The union rejected a company contract proposal in mid-June and leaders were voted strike authorization. Union negotiators approved the sec-

O'Neill says Reagan has 'heart of gold' for rich, but 'Scrooge' to poor

BOSTON (AP) — President Reagan has a "heart of gold" in dealing with the wealthy, but he's a "Scrooge" to the poor, working families and the middle class, says House Speaker Thomas P. O'Neill Jr.

The Massachusetts Democrat renewed his verbal crossfire with the Republican president Tuesday, blasting the administration's recommended cuts in student loans, food stamps and Social Security.

He also used his speech before a receptive audience of unionists to jab Reagan for favoring high-income wage earners in his tax-cut plan.

"The president may be hard as nails when it comes to programs that help poor people," O'Neill said. "He may be a real tightwad when it comes to programs that help working families. He may be a real Ebenezer Scrooge when it comes to programs like student loans that offer opportunity to the young middle class.

"But when it comes to giving tax breaks to the wealthy of this country, the president has a heart of gold," he said.

O'Neill said Reagan's solution to the country's economic problems was to "give money to the rich."

"That's a great philosophy — for the people living in Beverly Hills," O'Neill said. "But it's not the philosophy that built this country...and will rebuild America in the 1980s."

O'Neill also accused Reagan of sabotaging social programs, including some that date back to the New Deal.

"Wherever there is a program that offers opportunity to people, wherever there is a program that offers a little security to hard working families of this country... that's exactly where the president and his henchmen wield their knife," O'Neill said.

O'Neill addressed 2,800 delegates to the annual convention of the Communication Workers of America, which represents 625,000 workers.

DR. NEIL SOLOMON

Breast feeding not sure birth control

Dear Dr. Solomon: My mother is in her 60s and lives alone. She takes a number of different kinds of pills each day, including a diuretic and something else for high blood pressure. Although she appears to be functioning well, I'm afraid she may not be as reliable as a younger person would be in taking her medication in accordance with the schedule established by her doctor. Is this a factor to be considered, or am I worrying needlessly? — Cynthia

Dear Cynthia: I don't know enough about your mother to comment specifically, but most women in their 60s are alert, active people. I'm pretty sure you'll find as many on the tennis courts as in rocking chairs. You do your mother — and yourself — a disservice if you believe that the age of 60 signifies a decrease in an individual's faculties.

People in their 60s can be depended on to take medication to the same extent as younger persons. This intuitive feeling is reinforced by a study conducted by the Hypertension Detection and Follow-up Program, which showed that patients between 60 and 70 years of age were even more compliant in following antihypertensive regimes than were younger patients.

Unless there is some factor you haven't mentioned, I see no reason why your mother cannot be relied upon to follow her doctor's instructions.

Dear Dr. Solomon: I never liked the idea of taking drugs, but I was finally persuaded to do so about a year ago for treatment of high blood pressure. Now I learn that there's a product that can cause cancer. Isn't it ridiculous to risk cancer in order to cure high blood pressure? — Dave

Dear Dave: I can understand your concern, but I believe you are jumping to conclusions. Let's look at what the researchers have actually come up with.

Scientists from the National Cancer Institute (NCI) have found that the drug you refer to — reserpine — causes cancer in rats and mice. However, they say it is not possible to predict on the basis of the tests the frequency with which patients using the drug might develop cancer.

Why not discuss your concerns with your doctor? Both the NCI and the National Heart, Lung, and Blood Institute warn that patients should not discontinue the use of reserpine on their own. If a change in medication is advisable, your doctor has other antihypertensive drugs from which to choose. But don't stop your medication without medical supervision.

Dear Dr. Solomon: I am now pregnant and plan to breast-feed my baby. It is true that I cannot become pregnant again as long as I continue to breast-feed? — Mrs. A.S.

Dear Mrs. S.: Breast-feeding is not a sure-fire method of birth control. If you do not want to become pregnant, you can use any method of birth control you want except oral contraceptives. Women who are nursing their children should not be on the Pill.

(If you have a medical question, write to Neil Solomon, M.D., 1726 Reisterstown Road, Baltimore, Md. 21208. Dr. Solomon cannot give personal replies but will answer as many questions as possible in his column.)

Cooper votes for town's 51st resident

COOPER, Iowa (AP) — The turnout was high in Cooper as 45 of the 50 residents braved an aggressive press corps and sweltering heat to cast their vote for the town's 51st resident.

Would it be Johnny Carson? Or Princess Grace? Or Danny Thomas, maybe?

"It's all a bit silly," said Mrs. Dean Turner. Cooper's search for a 51st resident started as part of the town's centennial but gained national exposure when residents went on NBC's "Tonight Show" to promote the event.

The residents jammed the three-story, brick Cooper Elementary School on Tuesday night and streamed single-file into a classroom past a horde of reporters to cast their ballots.

As they filed out, reporters cornered them in a sort of modified exit poll. Most were silent, but a couple admitted to voting for Johnny Carson. Applications from all candidates were displayed, but the Princess' application was on display along with the overseas envelope in which it was mailed. That played big in Cooper.

"I couldn't believe we'd actually heard from her until I went down to the post office and saw the envelope," said Sharon Conant.

It appeared that the Princess' application — and envelope — was a strong selling point. The form letter from Mickey Mouse was viewed disdainfully by many, but the youngest voter — 2-year-old Kati Lawton — loyally wore her Mickey Mouse shirt and cast her vote that way.

Officials of Cooper, which is 50 miles northwest of Des Moines, immediately recessed to the top floor of the school to tabulate the ballots, behind closed doors guarded by two Iowa Highway Patrolmen. Results were placed in an 1886 fruit jar to be opened Saturday, and organizers vowed to keep the winner's identity secret.

Other applicants for the post included Iowa Gov. Robert Ray and entertainer Danny Thomas. About 50 celebrities answered questionnaires.

The applications included such questions as, "Do you chew tobacco and do you own a pair of bib overalls?"

Ray's application said "could get some," referring to bib overalls, and Princess Grace admitted to having chewed tobacco and milked a cow.

The crowd of reporters was a bit much for some. Mrs. Turner said, "It's all getting out of hand."

Promoters of the event opened the voting by playing a song written for the centennial by Bob Cook called "The Cooper Two Block Parade." He informed broadcast reporters he had a sound track available if they wanted to use it as background music.

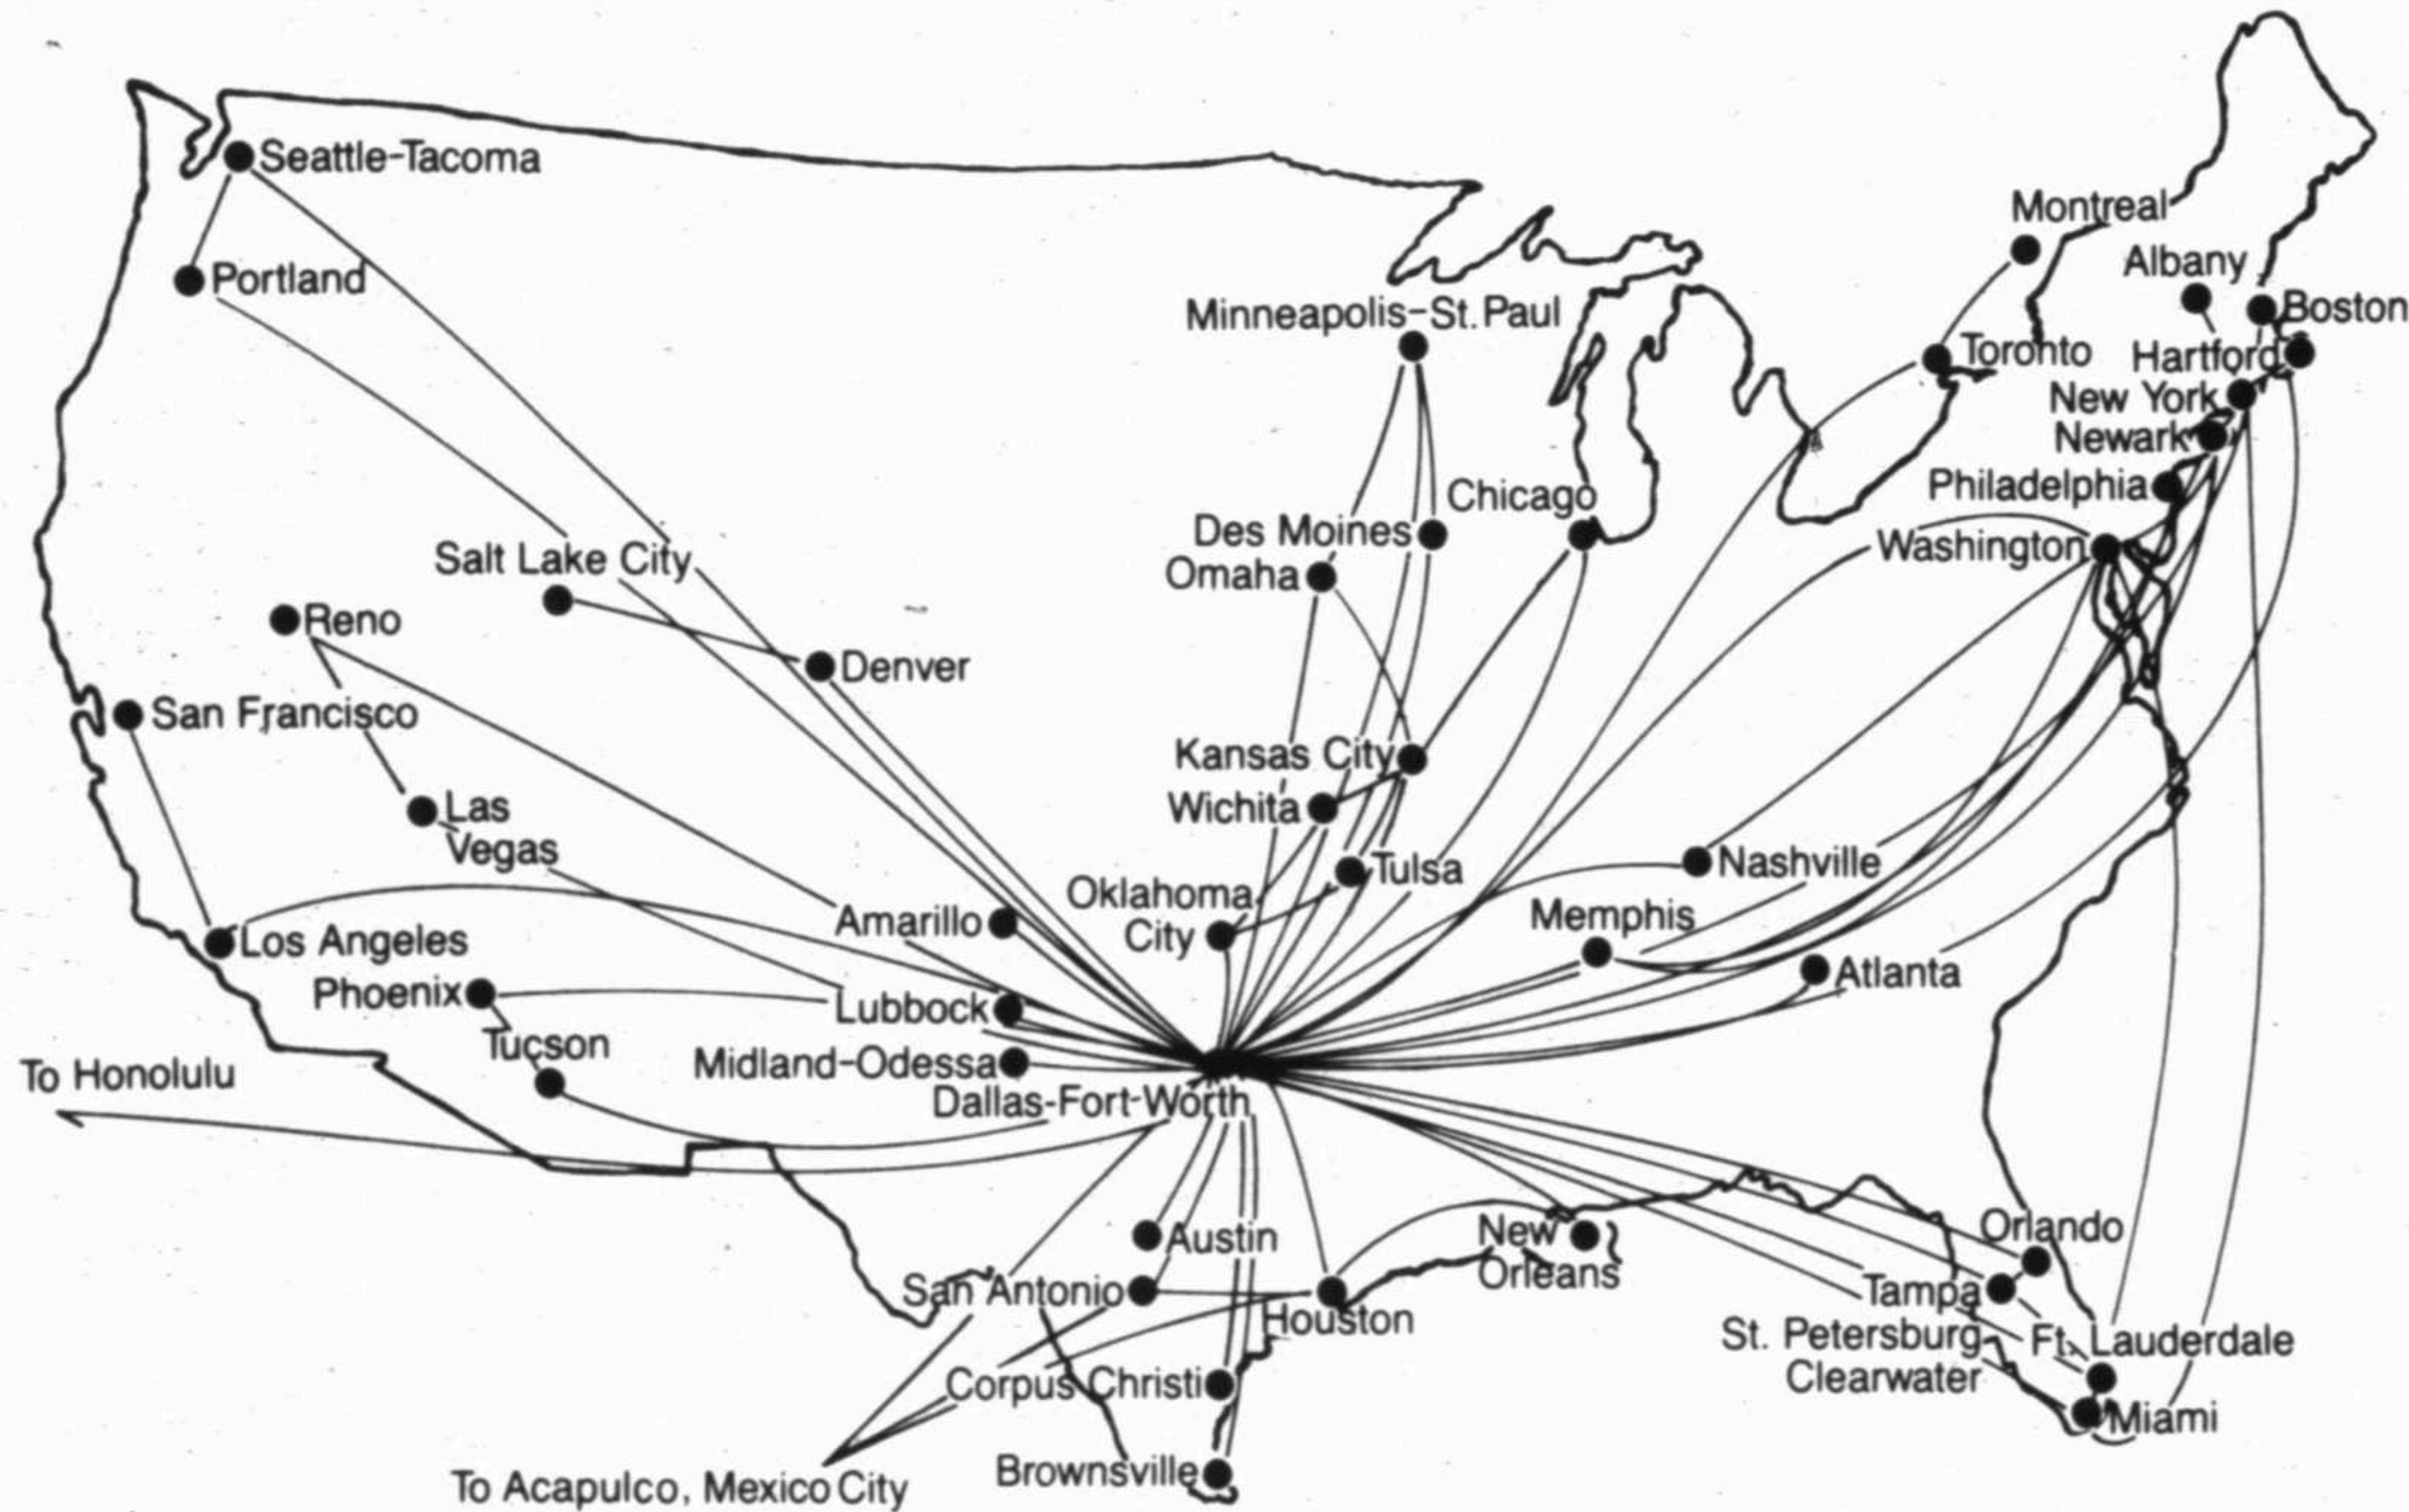

Roger Conant eyed the cluster of television photographers who cornered the 45 residents at every turn.

"All you have to do to get on television tonight is step out your front door," Conant said.

Asked what happened to the other five residents, Rich said, "I suppose they just didn't bother to come."

Note: Honolulu/London/Acapulco prize trips if taken in off-peak season; trips based on travel as if completed in August.

START WITH BRANIFF PRIZE CREDIT FOR JUNE TRAVEL ON AMERICAN.

What's more, we'll even convert your June mileage on American Airlines into Braniff Travel Bonus Bonanza points. Tally one Braniff Bonus point for every 250 miles flown on American up to 10,000 miles (40 points) as soon as you have earned an equivalent number of points flying Braniff.

EARN DOUBLE BONUS BONANZA POINTS DURING JULY AND AUGUST.

You'll earn Braniff Travel Bonus Bonanza points every time you fly Braniff to any of the cities on the map, between now and May 31, 1982.

And during July and August, you'll earn twice as many points as usual.

Use those points for free or discounted Braniff tickets, for First Class tickets at Coach prices or for

one-year memberships in the Braniff International Council Clubs.

HOW TO CONVERT POINTS INTO PRIZES.

When you've earned enough points for the prize you want, send us copies of your Braniff ticket receipts, your Braniff boarding passes, and a copy of your American mileage statement which shows your travel in June.

Tell us where and when you want to go. And tell us whether to put your prize ticket or discount authorization in your name or in another family member's name. We'll do the rest.

Next time you fly, get on the Braniff Bandwagon. And start earning your free trips. Fast.

For reservations or information, call your travel agent or Braniff in Midland or Odessa at 563-3885. All other Texas cities call toll-free (800) 492-4300. And for more details on the Braniff Travel Bonus Bonanza, send in the coupon below.
