Former Lamesan Victim Car Accident

Travis Vinzant Is Victim Of Head-on Collision Monday

Driver Of Other Car Was Instantly Killed

Travis Vinzant, about 23, and former resident of Dawson county, was hurt in an automobile accident Monday afternoon near Sweetwater, about 4:30, suffering injuries from which he died that night about 7:30.

Mr. Vinzant, his wife and sister were returning to their home in Fort Worth following a visit with his parents, Mr. and Mrs. R. A. Vinzant and her parents, Mr. and Mrs. T. J. Stanley.

They were traveling east and meeting a car, when it is reported that a car driven by a Midland man coming west attempted to pass the car they were meeting, and though Mr. Vinzant is said to have pulled as far to the right as possible, evidently the other driver became excited and the result was a head-on collision. The driver of the other car was instantly killed.

Mr. Vinzant, and the two ladies were rushed to a Sweetwater hospital, where despite every medical aid he succumbed about three hours later.

He was practically reared in Dawson county, having moved into the Woody community with his parents in 1924. He was married to Miss Arlene Stanley about three years ago. Shortly after their marriage, he accepted a position with Swift and Company of Fort Worth, and they moved to that city. Mrs. Vinzant, suffering mostly from shock and bruises is improving nicely Thursday as this is written. Miss Vinzant suffered minor lacerations and bruises.

Funeral services were held for Mr. Vinzant from the First Methodist church in Lamesa Wednesday morning at 11 a. m. with Rev. T. C. Willett, assisted by Rev. J. A. Wheeler, conducting the services. Interment was made in the Lamesa cemetery.

The host of friends of these people will join the Courier in extending sympathy in this sad hour.

E. R. YATES
Mr. Yates was born in Dallas county, living there with his parents until he was three years old, at which time his father died and he moved with his mother to Kaufman county, where he attended school until his mother moved to Borden county in 1890. He finished his schooling there.

He first came to Dawson county in 1893 and accepted a position with the Slaughter Ranch for a short time and left the county. He returned in 1900 to make his permanent home here. He worked again for the Slaughter Ranch for 12 years. He then purchased and operated his own ranch on the Dawson-Martin county line until 1922.

In that year he purchased the hardware and implement business of W. S. Moore and has operated it since that date.

When he purchased the business it was located on the west side of the square. In 1925 Mr. Yates purchased the lots and built the building he now occupies. The store occupies a fifty foot frontage on North First Street and only last year he built another building just west of his store, which is occupied by the Goodyear Tire Store.

Besides owning and operating the E. R. Yates Hardware Company, Mr. Yates is president of the First National Bank of Lamesa which post he has held for more than a dozen years. He is vice-president of the Panhandle Hardware and Implement Association, and is well and favorably known in both financial as well as hardware circles over most of Texas.

He has taken a most active part in religious and civic development of Lamesa and Dawson county, and has seen it grow from an unorganized county to take its place among the best counties of West Texas.

He has invested his earnings back into Lamesa and Dawson county property, and is a firm believer in its future growth and development.

He and Mrs. Yates occupy their lovely two story brick home on South Bryan Street in Lamesa.

Repair Shop Moves To Larger Building

Announcement is made this week that Gresham Repair Shop has moved from the building they formerly occupied at the rear of Lamesa Tire and Battery Store to the building formerly occupied by Lamesa Machine Shop.

Marvin and Red Gresham, owners and operators, have been in the automobile business in Lamesa for a number of years and need no introduction. They occupied their former location for about two and one-half years, prior to which they worked in various repair shops in the city.

In the new place they are better prepared to take care of their growing business. See their ad in this issue of the Courier.

Mrs. W. G. McKee and Miss Jean McKee of Pittsburg, Penn. are visiting in the home of Mrs. Katherine Weaver Ross this week.

"That Is The Murderer" Says Clerk Who Witnessed Robbery And Slaying In Lamesa Haberdashery Last Winter

Courier To Issue One Day Early Next Week

Due to the fact that next Friday is Armistice Day and that all Rural Mail Carriers, as well as local carriers and postal clerks will observe the day as a holiday, the Courier will be published one day earlier than usual. This is being done so that the paper may reach the readers before Saturday.

The management is asking the cooperation of all advertisers and contributors of news in pushing the schedule ahead one day.

To all rural correspondents, especially it is pointed out that you news must be sent in one full day earlier than you have been mailing it.

Remember, everybody, the paper will be published on Wednesday instead of Thursday, so please keep this in mind.

Among The Younger Set

PHOTOS BY ROGERS STUDIO

This is Public Citizen Number One among the Younger Set of Dawson County this week. He is Carrol Fletcher Hurst, son of Mr. and Mrs. J. F. Hurst, of the Sparenberg community. He was born, March 22, 1935, making him just past three years of age. He has blue eyes, and blonde hair. His hobby is fixing things.

Red Cross First Aid School To Be Started On Monday

Grammar School Will Be Scene Of Classes

Announcement is made this week by James W. Sumpter, chairman of the Dawson County Red Cross First Aid Division, that classes in First Aid will be started Monday night, November 7.

These classes are open to the public and will be held in the grammar school in Lamesa.

While the faculty and Parent-Teachers Association are cooperating in the classes, they are open to any one who desires to enroll. The only cost attached to the course is the purchase of a text book, which costs 60c. Leslie C. Pratt will be the instructor, and those who desire are urged to enroll either with him or James Sumpter or G. M. Roberts, principal of the Lamesa grammar school.

There has already been several who have signified their intention of taking the course, but there is still room for six or eight more, according to Sumpter.

Those who complete the course and stand the examination, will be awarded life saving cards, which are recognized by the American Red Cross.

OLDSMOBILES FOR '39 RECEIVED BY THORNTON'S

Thornton Motor Company of Lamesa announce the arrival of the new Oldsmobile for 1939. It is a much more elaborate car than the 1938 model, with new lines and many new mechanical improvements.

A popular feature is the new gear shift which is mounted on the steering post, easily available to the driver without the necessity of taking the hand too far from the wheel.

The Olds for this year comes in three styles and sizes. The sixty and seventy are powered by a six cylinder motor, while the eighty is an eight. Visit their show rooms on North Austin and see these new models.

Suspect Is Held In A Lubbock Jail To Await Grand Jury

Red Sutton Arrested In South Texas

Red Sutton, a former resident of Lamesa, is held in jail at Lubbock as a suspect in the hi-jacking of Hurt's Haberdashery here last December 11th, at which time Maxie Woodroof was killed.

Carlton Tune, of Lamesa, and an employee of the Hurt establishment at that time, and witness to the hold-up states that he is sure that Sutton is the man who held up the store.

"There is no question in my mind but that he is the man," Tune stated today. "Although positive identification is sometimes hard, I was requested shortly after the robbery by officers to impress my memory with the face of the man who did this deed, and as a result I recalled his face many times during the past eleven months, and I have thought all along that if I ever saw the man again I would know him. There is no question in my mind but that the man in jail at Lubbock is the man."

It will be recalled that a man entered the haberdashery shortly after dark on Saturday night, December 11, of last year, after purchasing a necktie, he demanded the money. After securing the money he dashed for the door and young Mr. Woodroof ran after him, chasing him about a half block, catching up with him, in the ensuing scuffle, the robber fired, the bullet wounding Woodroof to the extent that he died a few hours later in a Lamesa hospital.

According to reports Sutton admitted. (Continued on Back Page)

E. R. YATES WILL CONTINUE WITH HARDWARE CO.

Announcement of the sale of the International Harvester Line to Earnest and Nix was made this week by E. R. Yates Hardware.

Mr. Yates, owner of this popular firm, stated that the sale affected only the tractor and implement line, and that he would continue to operate the hardware store as in the past.

The entire building, which has formerly housed both branches of the business, will now be devoted entirely to hardware and kindred lines, he stated.

See their large ad in this issue of the Courier, wherein they are offering some special prices.

NEW DODGE LINE DISPLAYED BY ARNETT MOTOR

The new Dodges for 1939 have been received by Arnett Motor Company of this city and are on display in their showrooms.

These new Dodges are among the most beautiful of all the new models which are greeting the motoring public at this time.

New lines add much to their smart appearance and many new and worthwhile mechanical improvements make them among the year's most outstanding motor cars.

Visitors Show Much Strength In Prior Championship Tilts

First Afternoon Game Of Year To Be Friday

The last home conference game for the Lamesa High School Golden Tornadoes will be played here next Friday afternoon at 2:30 p. m. with the Lubbock High School Westerners. The Lubbock team stands tied with Amarillo for top rank in District One, Conference A. Lamesa is listed at the bottom, tied with Borger. Lubbock has won over Borger and Plainview and by their achievements, are being rated to win the district championship and go "far" in the State championship finals.

Lamesa's only hopes to get out of the "cellar" in conference rating is to plaster a defeat on Lubbock and Borger and the next two games tell the tale.

Lamesa lost to Plainview, tied Pampa and played Amarillo to the limit by leading up to the closing minutes of the game. The record is excellent considering experience in the conference.

Lubbock seems to recognize the ability of the Golden Tornadoes. Lubbock high school authorities requested 500 pupil tickets and 500 adult tickets for this game for advance sales. It is announced that Lubbock high school will dismiss classes at noon Friday so that pupils may attend the game. Seven buses have been chartered to bring band, physical education classes, faculty members and other pupils. It is estimated that 300 to 500 private cars will bring fans from Lubbock to the Lamesa game. Unless there are unforeseen weather conditions, Lubbock will bring the largest visiting delegation ever to visit Lamesa for an inter-school contest.

The Western half of the bleachers on the north side of the football field is reserved for Lubbock people as a courtesy to the visitors.

Lamesa and Dawson county football followers are urged to obtain tickets as early as possible to avoid delay at the gates.

The football players of the Lamesa team played no game last week, but took a rest to get ready for Lubbock injuries and bruises received in earlier games and scrimmages seem to be healed. A long practice was the order of business on Monday and Tuesday and will be for the remainder of the week to Thursday practicing offense and defense tactics. Barring injuries in practice, the team will be in the best condition since the opening game with Big Spring, and in addition the team members have experienced gained from the hard games with Plainview, Bowie High, Big Spring and Amarillo. The game will begin at 2:30 p. m. and is expected to last about two hours.

Lamesa Stores Will Close For Grid Game

Practically every store in Lamesa has agreed to close up for the football game here Friday afternoon between the Lubbock Westerners and the Lamesa Golden Tornadoes. Closing time will be at 2 p. m. and they will remain closed until after the game, at which time they will reopen for the balance of the day.

Shoppers are asked to cooperate in this move and do your shopping either before the game or arrange to do it afterward.

This is the only way that business people and clerks may see this game, which is drawing more interest than any game yet played in Lamesa.

So you are urged by every store in the city to please arrange your affairs, so that this will not discomode you.

TORNADOES TO GO TO BORGER ARMISTICE DAY

Efforts are still being made to secure a special train from Lamesa to Borger for the Armistice Day game between these two clubs.

It is necessary that at least one hundred and fifty sign up, before a special may be guaranteed. The cost of the round-trip ticket will be \$5.00.

Many have already signified their intention of going and if you plan to ride this special, you are urged to sign up at any drug store in the city, or with school officials, or at the Santa Fe Depot.

NEW IMPLEMENT FIRM MOVES TO KEY BUILDING

Announcement is made this week that the new machinery firm of Earnest & Nix, have completed their move to the Mike Key Building, on highways Nine and Fifteen, one block east of northeast corner of square.

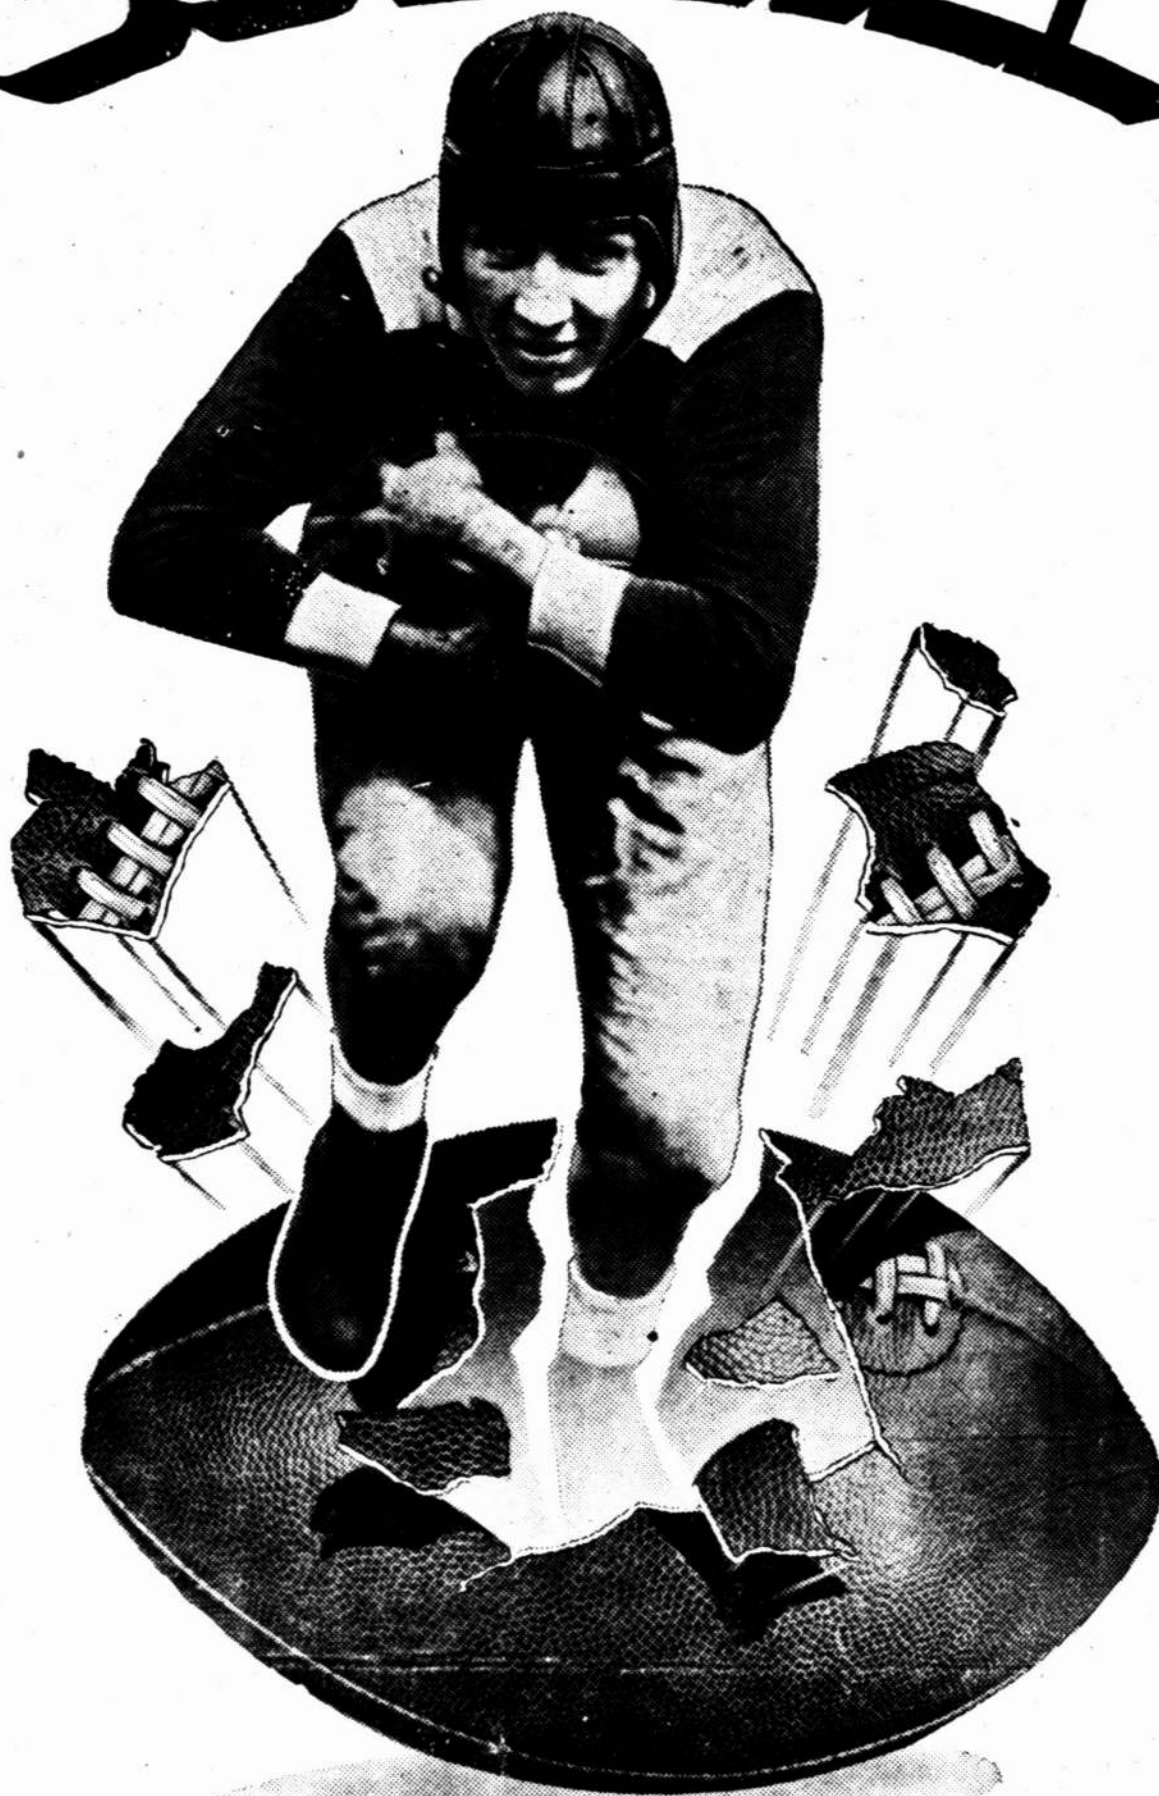

Messrs. Olin Earnest and Olin Nix, both prominent farmers of Dawson county only recently purchased the International Harvester line from E. R. Yates Hardware.

Mr. Yates will continue to operate the hardware store in the same location and will use the entire building for this purpose. Their store is located on North First Street, where they have a fifty foot frontage.

Messrs. Oran Speck, George McNew and L. P. (Buster) Davis, who have been with the Yates Company for a number of years in the implement and Tractor Department, will be with the new firm.

Announcement was also made by Mr. (Continued on Back Page)

THE COMPLETE SYSTEM OF CAR HEATING

New "Sleeping Sickness" Vaccine Is 100 Effective

After receiving numerous requests for a reliable report upon the effectiveness of the new vaccine for sleeping sickness of horses (Equine Encephalomyelitis), Dr. Hodges, the local veterinarian presents this letter as proof of the results obtained from its use. This vaccine was used by him this year and only by him, in vaccinating horses in this and adjoining counties. The following is an exact duplication of the letter received by Dr. Hodges from the Lederle Laboratories, New York City:

October 18th, 1938

Dr. L. B. Hodges,
Lamesa, Texas.
Dear Doctor Hodges:

We are pleased indeed to give you a brief resume of the results following the use of our new equine encephalomyelitis vaccine (chick).

Our first chick vaccine was distributed in May, 1938, and to date, we have sent out somewhat over 1,500,000 doses. This vaccine was used in every state in the United States, where the disease has been found, as well as extensively in Canada and South American countries. We have not received a single report of failure of protection where the treatment has been completed as recommended.

To be sure, the vaccine was used during the epizootic and a few losses have been recorded following the first dose, up to the 7th day. However, these were to be anticipated inasmuch as it indicates pre-infection or exposure prior to vaccination. No losses whatever occurred after the 7th day, following the initial dose.

We have just completed experiments at the Laboratories wherein horses exposed to intracerebral injection of virus 7 days following a single dose, were completely protected against intracerebral exposure to virus which was fatal to all unvaccinated animals. However, this does not mean that we are recommending a single dose treatment. We have data which indicates that the immunity from a single dose is only relative and as soon as the infective dose is increased, animals vaccinated with one injection succumb, whereas those receiving two doses are unaffected.

We are not in a position, as yet, to state the full duration of protection inasmuch as sufficient time has not elapsed since these experiments were set up to determine the full period of immunity. We do know, however, that horses were completely protected against intracerebral virus exposure four months following the two dose treatment. This experiment is to be continued, and in due time we will know the full duration of protection. We have every reason to believe that animals given two doses of the vaccine will be protected for at least a period of one year.

We trust that this information will

Dorothy Burleson Patricia Meech Entertained Monday

Miss Dorothy Nell Burleson and Miss Patricia Meech, were hostesses Monday evening to a group of their friends at the home of Mr. and Mrs. Elzie Burleson on North First Street.

Various games and contests were played throughout the evening. At the conclusion of the games a delicious dinner was served to the guests. The table which was centered with a bowl of glazed apples on sticks were very attractive. Baskets filled with candy which carried out the Halloween motif were the favors.

The guest list included Misses Ann McGuire, Carolyn Baldwin, Janette Rogers, Willie Jean Henry and the hostesses Misses Dorothy Nell Burleson and Miss Patricia Meech.

Raymond Bryson Hatch Honored with Halloween Party

Mrs. Raymond Hatch complimented her son, Raymond Bryson, Monday evening with a Halloween party at their home on South Bryan Street.

The entertaining rooms were very attractively decorated with the Halloween motif being carried out.

Guaranteed Vulcanizing

Every job of vulcanizing we turn out is absolutely guaranteed to give you the very best service.

With our modern methods and equipment, it is a far step from the old style of vulcanizing. With this new method, it is impossible to overcook your tire or to overheat. This was largely the reason why the old style vulcanizing was not entirely satisfactory. Our equipment is automatic and assures you the exact heat for the specified time.

We have been able to save motorists of this territory thousands of dollars by vulcanizing tires which they thought were beyond repair. Before you throw away any tire, we urge you to see us first. It is very likely that we can repair it so that it will serve for many more miles.

Before you buy used tires, see our huge stock. We have every size and at almost every price. See us first and save!

NEW FIRM--

(Continued From Front Page)
 Earnest that he had sold an interest in the Earnest Motor Parts to Mr. Nix, and that they would both be interested in that firm as well as the new implement house. Mr. L. R. Tidwell will continue managing the Earnest Motor Parts, assisted by A. J. McDaniel and Dalton Myers.
 Miss Willie Belle Cleveland, who is well known in Dawson county, having served a number of years as County Assessor Collector, will have charge of the book-keeping department of the new implement firm.
 The interior of the Key building is being completely remodeled to fit the particular needs of the new firm.
 Your attention is called to their ad on this issue of the Courier.

new models have hydraulic brakes. An entirely new car is announced by Ford for 1939, in the Mercury V-8. It is a much larger car than the Ford powered by a 95 horsepower motor. The general lines are similar to the Ford lines.

NEXT TUESDAY IS ELECTION DAY

Next Tuesday, November 8th is General Election Day. Although there is little interest in this area in the election, nevertheless, it is the only election held this year. But in Texas the Primary election results is the same thing as an election, and most voters have come to disregard the general election.

It is estimated that less than five hundred votes will be cast in Dawson county, which polled more than thirty-six hundred in the July primaries. One amendment to the constitution will be voted on. It being to determine whether the clause in the officers oath where he has never engaged in a dual with deadly weapons shall be omitted or remain in.

Abilene Man Dies Suddenly At Hotel

Ben G. Hollyfield, 48, salesman for a hardware concern out of Waco, died suddenly at the Plaza hotel in this city, Thursday morning. Although he had been in poor health for some time, his death was a distinct shock to his friends in the hotel, as well as his family who live in Abilene. Mr. Hollyfield played dominoes and bridge with other guests of the hotel until a late hour last night, complaining only of feeling tired.

He was discovered in his room about 10 a. m., partially dressed, laying across the bed.

The body will be taken to Abilene this afternoon. Funeral services had not been completed at time of going to press.

He is survived by his wife, a son and daughter.

of years. He was president of the Citizens National Bank of that city and was widely known in medical and financial circles.

Besides his widow and son here, he is survived by the following children: Mrs. R. B. Welch, Thomas Jr., and Helen Holton of Grosebeck, and Mrs. Charlie Collins of Waco, and Mrs. Herbert Wolf of Hico.

Funeral services were held in Grosebeck Wednesday.

REMODELING OF SHERROD BLDG. IS COMPLETED

The remodeling of the Adams Building on North First Street, occupied by Sherrod Bros. Hardware, has about been completed.

The entire interior of the building has been completely done over. Walls and ceiling has been repainted. A new front of modern design has been completed. Show windows have been added and underneath, a cream tile, trimmed in black has been added. The awning has been completely worked over. Display windows are being constructed on the inside.

AN ESTIMATED 65 PER CENT OF COTTON GINNED

The government report on cotton ginned in Dawson county off the 1938

crop prior to October place the gin- nings at 17,920 bales, as compared with 20,850 bales on the same date last year.

Experienced cotton men in the county estimate that there has been about six to seven thousand bales ginned since that date, which would give the

county a total of something near 25,000 bales for the 1938 crop to date.

It is estimated by several ginners that approximately sixty-five percent of the crop has been gathered up to time of going to press.

Estimates by cotton men place the yield at 40,000.

 being in Lamesa on the night in question, but emphatically denies any connection with the murder and robbery.
 He was arrested in South Texas and returned to Lubbock on a charge of cold checking later being questioned about the Lamesa affair.

As to how well Tume's identification measures up to the man charged the following is given. The first is Tume's statement and the following is the description: About 6-1. Six feet. Weight about 185. weighs 175. Dark hair light complexion, same. Dark beard, same. Green eyes, same. About 35 years old.

He had a crooked nose, which was very broad at the bridge, and those green eyes were such that I shall never forget them," Tume said. "He had a patch on his head, and there was a small scar there now."

Tritt Smith, district attorney, the Dawson County Sheriff's department and Texas Ranger Frank Mills are working on the case.

It is understood that he will be held over to await the action of the Dawson County Grand Jury, which is scheduled to meet this month.

 The Ford V-8 although restyled follows more or less the same lines as the popular predecessor in 1938. All

Volume 8

Lamesa, Dawson County, Texas, Thursday November 3, 1938

Number 42

Football Stadium Among P.W.A Projects Started

George M. Bull, P.W.A. Regional Director, today reported to Administrator Harold L. Ickes that more than a fourth of all projects which have received allotments in the Fifth Region under the new 1938 P.W.A. program are under actual construction.

Bull said that the 228 new projects now building have a total estimated cost of \$23,321,273. The states in the fifth region and the number of new projects which are under construction in each of them is as follows: Arkansas 12; Colorado 23; Kansas 52; Louisiana 47; New Mexico 8; Oklahoma 7; Texas 79.

The report listed 77 projects which have been added to the list of those under construction during the last three weeks. Largest projects on the list is at Booneville, Arkansas, where improvements to cost \$2,106,824 are being made at the State Tuberculosis Sanatorium.

Other large projects which have reached the construction stage include: school additions at Loveland, Colorado, \$300,000; two Kansas City, Kansas school projects, one for \$225,000 and the other for \$500,000; college buildings at Sulphur, Louisiana, \$899,835; a school at Ruston, Louisiana, \$445,454; Carlsbad, New Mexico, sewers, \$300,000; and a highway bridge at Angleton, Texas, \$227,040.

The speed with which these projects have gotten underway has been the result of close cooperation between local

officials, their architects, engineers, and contractors, and the Public Works Administration," the regional director said.

"By January 1 between 800 and 900 of these 1938 projects will be building in the seven states of the region and this amount of construction naturally will have its effects on employment figures not only in the building trades but in the supply industries."

A list of the Texas projects, the start of construction on which is announced today, follows:

Haskell Hospital, \$100,000; Rankin waterworks, \$40,000; Fredricksburg court-house, \$145,000; La Grange gymnasium auditorium, \$30,000; Angleton highway bridge, \$227,272; Melvin school gym athletic field, \$16,000; El Paso courthouse alt. and jail, \$52,000; El Paso county flood control, \$49,000; Lamesa gymnasium and bleachers, \$148,000; El Paso courthouse additions, \$35,000; Star county courthouse-jail repairs, \$116,363; Greenville Municipal building, \$177,777; Austin dormitory, \$103,636.

Improvement In Dairy Herds Aids South Plains Territory

During the past two years membership in dairy herd improvement associations in the United States has increased by more than 3,000 and more than 150,000 additional cows have been placed on test. At present, around 360,000 cows are being tested through the associations.

In 1935 there were only two such associations in Texas with 50 herds and 905 cows on test. Today there are twelve associations and 146 herds and 4,966 cows on test, according to G. G. Gibson, assistant dairyman of the Texas A. and M. College Extension Service.

Dairy herd improvement associations are organized for the purpose of getting production and cost records on individual cows as the basis for culling and breeding operations. Through the organization dairymen cooperatively employ men who are responsible for the testing and record keeping.

"Accurate records of feed costs and milk and butterfat production are the only satisfactory way the dairymen can pick his profitable cows, cull out his boarders and improve his herd," the dairymen said.

Gibson pointed out that the average butterfat production of the 905 cows on test in Texas in 1935 was 219 pounds while the 1937 average of 3,459 cows in the nine associations then operating was 267 pounds.

Both students are arts and sciences freshmen and live in Lamesa.

Members dedicate a play, "Vengeance in Leka," to new members at the first meeting.

S.C.S. Notes

Two years ago a 480-acre field, 10 miles northeast of Channing, stood as a menace to other farms in the surrounding area. Glistening white sand dunes, reaching a height of five feet

dotted the field with small drifts or hummocks over the entire farm. With each strong wind, the loose sand was sent swirling over the countryside with the threat of serious damage to other fields.
 This fall, the large dunes have almost vanished and the second crop is being harvested from this field since it became severely eroded. This recovery has been brought about through the use of soil and moisture conservation practices in cooperation with the Soil Conservation Service erosion control project at Channing.
 This field was put into cultivation in 1923, and was cropped principally to corn and some grain sorghums. Good crops were produced until the period of severe drought started in 1931. Only a small crop was harvested in 1932, and the stubble was grazed during the winter. With the crop residue removed by grazing, and the surface pulverized by the trampling of live stock, the field started blowing and was abandoned in 1933.
 When this farm was taken over by the Federal Land Bank in 1935, the large sand dunes had formed and the hazard to the community was increasing. In January 1937, technicians of the Soil Conservation Service at Channing were called upon to aid in checking the erosion hazard.
 Examination revealed that the fine sandy soil and the undulating surface made terracing and contour tillage impractical. The hummocks were leveled and the tops of the dunes were loosened so the sand could be spread over the field by the force of the wind. Grain sorghums then were planted solid over the field except on the dunes.
 The stubble of the 1937 crop was left on the field and protected from grazing. Blowing was checked during the period of high winds last winter. The same procedure was followed this year and a good crop of sorghums has been produced. Meanwhile, the sand dunes have been leveled to such an extent that they can be planted to sorghums next year.
 Under the Soil Conservation program being carried out on this field, grain sorghums will be planted solid for five years, and the stubble will be protected from grazing.

Not only has the blow hazard to surrounding farms been eliminated, but the once-abandoned field now has been restored to profitable cultivation through the use of an erosion-resisting crop.

IF WE KNEW anything better we could do for the country than make good motor cars, we would do it.

By every one doing his best in the job he thinks most useful, this country is going to regain its momentum. We have tried to do our best in our job.

When business was suddenly halted in its recovery more than a year ago, we determined that we should keep going anyway, if not at full-volume motor car production, then at getting ready for greater motor car values that would help future production.

EXPANDING FOR THE FUTURE

We began to build 34 million dollars' worth of new plants and equipment. We felt that if we could not employ all our men building motor cars, we would employ as many as we could building better production facilities.

We were told, of course, that this was no time for expansion, that a wiser business policy would be to "hold everything"—which means, stop everything. But no one ever got anywhere standing still.

Besides, we are not defeatists. We do not believe this country has seen its best days. We believe this country is yet in the infancy of its growth. We believe that every atom of faith invested in our Country and our People will be amply justified by the future. We believe America is just beginning. Never yet have our People seen real Prosperity. Never yet have we seen adequate Production. But we shall see it! That is the assurance in which we have built.

Business is not just coming back. It will have to be brought back. That is now becoming well understood in this country; for that reason 1939 will be a co-operative year. Manufacturers, sellers and buyers will co-operate to bring back the business that is waiting to be brought back.

This construction program is almost completed. It has increased activity and payrolls in a number of related industries. It has given us better facilities for building better cars and trucks, and eventually our new tractor which is being perfected.

THIS MEANS MORE VALUE

The current program has provided a new tire plant, which will turn out a part of our tire requirements... a new tool and die plant that will help us cut the cost of dies... and a steel-press plant that will enable us to make more of our own automobile bodies. These are in addition to the plants we already had for producing glass, iron, steel, plastics, and many other things.

We don't supply all our own needs, of course, and never expect to. The Ford engine is one thing

that no one's hand touches but ours. Of nearly everything else we use we build some quantity ourselves, to find, if possible, better and more economical ways of doing it. The experience and knowledge we gain are freely shared with our suppliers, and with other industries.

We take no profit on anything we make for ourselves and sell to ourselves. Every operation, from the Ford ships which first bring iron ore to the Rouge, is figured at accurate cost. The only profit is on the finished result—the car or truck as it comes off the line. Some years, there is no profit for us. But we see to it that our customers always profit. A basic article of our business creed is that no sale is economically constructive unless it profits the buyer as much as or more than the seller.

Our new plants have helped us build more value into all our cars for 1939. That means more profit on the purchase to the purchaser. We have not cut quality to reduce costs. We simply will not build anything inferior.

NEW TESTING EQUIPMENT

While we were putting up new plants to produce cars, we constructed new equipment to test them. The first weather tunnel of its kind ever built for automobile research went into operation at our laboratories this year.

It makes any kind of weather to order. The weather it delivers every day would take months to find in Nature. Our cars are weather-tested to give you good service in any climate anywhere.

In other tests, every part of the car is punished unmercifully. Then our engineers tear it down to see if they can find abnormal wear or any sign of weakness.

The money we spend on tests saves you money on repairs. And your family car is safer and more dependable when we put it in your hands.

THE NEW CARS

We have two new Ford cars for 1939—better cars and better looking—but we also have an entirely new car.

It's called the Mercury 8. It fits into our line between the De Luxe Ford and the Lincoln-Zephyr. It is larger than the Ford, with 116-inch wheelbase, hydraulic brakes, and a new 95-horsepower V-type 8-cylinder engine.

We know that our 1939 cars are cars of good quality. We think they're fine values in their price classes.

With new cars, new plants, new equipment, the whole Ford organization is geared to go forward.

Conserved Water Aids Grass

Contour furrows and ridges catch and hold water where it falls so it can soak into the soil to become available for grass growth. In the upper picture a cross-section of a furrowed area is shown. The outlined dark area at the top shows the depth of moisture penetration. Observe that moisture has penetrated much deeper near the furrows. Bottom picture shows increased grass growth resulting from furrows in a Soil Conservation Service demonstration area.

KLONDIKE

Louise Foster

The fifth Sunday singing met with the Klondike class Sunday afternoon. We had visitors from several communities with us to help sing.

Mrs. Moss of Oklahoma is here visiting in the home of her son, E. Moss and family.

Lottie Self, who is attending school at Tech, visited her parents, John N. Self and family over the weekend.

Farmers in this community are almost done gathering their crops. We've had an ideal fall for harvesting crops.

Marie Duff attended the football game at Seminole Friday afternoon. The game was between Klondike and Seminole.

Emma Joe Godson was honored on her eighth birthday with a dinner on Sunday. Several of her friends enjoyed the dinner.

FAIRVIEW

Georgia Mae Gibson, corres.

Sunday school and singing wasn't so well attended either Sunday morning or Sunday evening.

Several from this community attended the funeral of Mrs. Haynes at Pride Sunday. This community joins in to extend their greatest sympathy to the bereaved ones.

Mr. and Mrs. Connie O'Brien and Miss Merel Sanders spent Sunday with Mr. and Mrs. Milton Gibson.

Mr. and Mrs. O. L. Harp and Mary Barron spent the weekend in Post.

Mr. and Mrs. A. M. Sanders and family spent Sunday with Mr. and Mrs. Steve Whisnott.

Charlene Atterberry spent the weekend with Syble Lois Buchanan of Mt. Olive.

Tommie Gibson spent Sunday with Billie McIver.

Grandma Stovall and daughter of Lamesa spent Sunday afternoon with Louis Atterberry.

A worker's conference will be held at the Fairview church house November 17.

The school will begin again Monday after being turned out three weeks for work.

Farm Notes

JOE C. WILLIAMS
County Agent

Protect The Quail Crop
Several farmers of the county have inquired about how they can protect the quail that have been raised near the farmstead.
According to the game warden, T. A. Harris, any and all hunters must have permission of the land owners or the tenant on whose farm the quail are located. To fail to get permission to hunt on the land or farm is trespassing. Any trespasser may be reported to the proper authorities and prosecuted.

Demonstration Game Preserves
There have been numerous questions on establishing game refuges and game preserve demonstrations in the county. Blanks for membership in such an organization may be had at the county agent's office for the asking. There is a very successful organization now in operation in Borden and Gaines counties. Under the game preserve

and state certified cotton seed to three 4-H club boys selected to carry crop demonstrations in cotton quality improvement. It is significant that one of these 4-H club boys, Joe Landrum, of the Fluvanna community has already harvested five bales of lint cotton from a 7 acre tract under this type of project in Borden county.
Nolan von Roeder has made an outstanding record in the production of fruit on his small commercial orchard. It is a rare occasion when Nolan fails to make from \$500.00 to \$1000.00 per year from his peaches. Poultry likewise contributes to the balanced program on this farm, and Nolan von Roeder keeps an accurate set of records on his white leghorns in order to know what his hens are doing toward earning their part of the farm income.

As further evidence of their desire to maintain and improve their farming operations both of these farmers called for assistance of the county agent this year, and terraced their farms with county road machinery.

The von Roeder Seed Farms are always open for inspection by visitors, and many persons attend the annual Field Day sponsored by these farmers who usually have more "free watermelons" than anyone in West Texas.

demonstrations and the organizations the members may regulate the hunting of quail and other game according to the rules and regulations as the members see fit to prescribe. One farmer reports that his quails were shot in his chicken house and in the yard while the family was away from home. There has been numerous reports that the quail were killed off of feed stacks and in the lots of farmers while they were away from home.

If you would like to go into such an organization the blanks may be had from the agent's office and when we get sufficient number of farmers and ranchers who are interested in protecting the game birds in the county, we can go into an organization similar to the one in Borden county. There have been some twenty-five prosecutions for violations of the regulations as are set out in the regulations that the association in Borden county has been operating. The whole plan is one of protection of the limited number of quail and other game birds found in the county. As stated above any farmer who wants to protect the game birds or animals that may be found in Dawson county can by joining the organization can have such protection as the membership may desire to invoke on the public in general, who hunt any and every ones farms without any discriminations to the number of birds killed or damage that may be done either intentionally or unintentionally.

County Fair
From the attendance and the number of livestock as well as community exhibits the past Fair just closed will reflect and does reflect the attitude of the public in general. Visitors from Lubbock and Big Spring gave very

favorable comment as to the quality and numbers of livestock on exhibition at our Fair.

Mr. J. Sam Lewis, agricultural editor of the Lubbock Avalanche stated that the livestock here in our fair would have been a credit to Lubbock or any other fair. Some of those parties who had horses, mules and other livestock in the show stated that if the dates

of the fair here were moved up a week or so before the Lubbock Fair that they would show their stock at both places during the coming years. That is something to think about in planning future fairs for Dawson county. Some of the directors are in favor of such a move on the part of the directors for the organization.

HANCOCK

Mary Bob Harrell

One of the chief attractions of the Hancock carnival Friday night was the baby show. Four babies, wearing fancy dresses and caps trimmed in ribbon were in the show. The babies were Oscar, McLendon, Ben Dopson, Webb Weaver and W. F. Lisenbee. These men contributed much to the success of the occasion, and created no little excitement.

A kitchen orchestra, composed of the primary pupils, placed first on the amateur program. "Mephisto, an educated horse" won second place. Gene McLendon and Archie McCurry operated in the horse costume and brought the house down with laughter. Mrs. Ben Dopson contrasting the old fashioned and the modern grandmother was awarded third place.
