Fall Fashions Feature Fine Furs And Fabrics With Elaborate And Complimentary Autumn Suits And Wraps

Richer fabrics and more complicated treatment of fall coats shown at recent fashion shows in Chicago and New York emphasize the dawn of a season of more elaborate dressing for women. These are six typical models:

ONE—The importance of tweed in fall sports wear is justified by this important green and gray plaid top coat. Tricky revers, strapped cuffs, high waist line belt and ruffled sleeves give it distinction. It is double breasted for warmth and its patch pockets are built for room as well as appearance.

TWO—Luxuriously soft is this brown Alexa coat with its rich Kolligley trimmings. Its shawl collar has an entirely new way of rimping down to form graceful jabots reaching to the waist line. Deep fur cuffs shape to the elbows. Only a rich hat such as the gold and brocaded one shown, could fitly top such a luxurious coat.

THREE—Fall introduces long coats for suits. Here is a long coated ensemble fashioned from brown tweed flecked with russet lights and enriched by a seal collar. Tan and jersey forms the blouse. Novelty gloves in fancy spotted pig skin add an unusual touch.

FOUR—Five home buttons accentuate the diagonal closing of this smart kitten's ear suit coat. A handsome fur lends a pelt for the collar. The skirt features side-pleatings and a yoke with home buttons fastening it on the side. Curious little geometric pieces of black and blue velvet work out a charming patch work hat which has only a black banding to relieve it.

FIVE—The epitome of formal elegance is reached when white ermine joins forces with rich sable to fashion an opera wrap. Its shawl collar stands from the neck in a dignified manner while a deep-hued ermine adds a wondrous note to the mode that is ever complimentary to women. It is lined with brocaded white, with a touch of gold in its weave to give it a soft gleam.

SIX—Velvet, unadorned, is a favorite for autumn wear. But when royal blue velvet fashions a graceful evening coat such as this, the Elizabethan collar and Chinaman's cuffs of white fox give it irresistible charm. Its sleeve fullness, the up-in-the-front curve of the hemline and the luscious pink velvet lining are noticeably new features.

Residences Are Fast Filling Up Realty Man Says

With the approach of the school season, Lubbock residence vacancies are decreasing daily, according to local real estate men. The opening of the fall session will leave a residence vacancy of scarcely 3 percent, while the average vacancy for American cities is from 5 to 10 percent.

At present 5 percent of the residences in Lubbock are vacant, real estate men believe, a vacancy which accommodates the shifting population of a college town.

Rooming houses and apartment structures are being filled with students and families who are arriving early for the school opening.

In consideration of the quality of constructions now vacant in the city, building and loan associations and real estate heads are urging a fine type of material for the future residences, which will be built to house a growing population.

Kiwanians Hear Detailed Plans For Aeronautics

Explaining in detail the plan for the study of aeronautics at Texas Tech, Dr. Paul W. Horn, president of the institution, was the principal speaker today at noon when members of the Lubbock Kiwanis club gathered for their regular weekly luncheon meeting at Hotel Lubbock.

Tom Garrard, attorney, was chairman of the day and Emil Klett, also a Lubbock lawyer, presided.

Doctor Horn told of his recent visit to Kelly field, San Antonio, the army flying field, and of the investigation he made leading up to the decision to add the subject of aeronautics to the Tech's curriculum.

Prof. Cecil Horne, also of the Tech, spoke on the employment needs of Tech students for the coming year and urged business men who wish to hire students to do it through the employment agency of the school, over which he presides.

Already, Mr. Horne said, he has received 500 applications for jobs, many of them coming from students who will be unable to enroll unless work is provided.

Puts An End To Bunion Pains

NO NEED TO SUFFER ANOTHER DAY

There is one simple yet inexpensive way to reduce inflammation of swollen toe joints and help get them down to normal and that is to apply Moore's Emerald Oil night and morning.

Ask Lubbock Drug Co., or any first class druggist for an original two ounce bottle of Moore's Emerald Oil (full strength) and refuse to accept anything in its place. It is such a highly concentrated preparation that two ounces lasts a long time and furthermore if one bottle Emerald Oil does not give you complete satisfaction you can have your money refunded.

Special note: People who want to reduce swollen or varicose veins should get bottle of Moore's Emerald Oil at once. Applied night and morning as directed they will quickly notice an improvement which will continue until the veins and lumps are reduced to normal.

 The Ruth-Gehrig home run controversy in all square once more. The Ruth elector the eleventh for his 25th homer yesterday the hit, besides being his team's, won another ball game from Chicago White Sox 3 to 2. Sergeant George Connally, Sox pitcher, hit the Yankees to five hits in the 11 innings. Chicago collected only six off the combined arms of Phipps and Moore. Home runs played deciding roles half of yesterday's games in the loss. Tris Speaker's four bagger the way in Washington's fourth inning attack that gave the team to 1 win over the St. Louis Browns in the first game of a double header. The Browns took the lead with a ninth inning rally, 3 to 2.

Home run by Babe Herman, today substitute, put the skids under the Chicago Cubs, National League leaders. The Cubs took the lead in the last half of the eighth, 4 to 1 lead. Herlihan hit Carlson's twisters out of the sixth with two runners on base. Bob Barrett's single in the ninth, two more after the Cubs forced into the lead with a run and a hit. The 6 to 5 beating of the Cubs' winning streak of 11 games. Higgs Stephenson dashed a home run off Dazzy Vance in the first inning with one runner on base.

Harley Dressen's home run in eighth broke a 1 to 1 tie and won Cincinnati a victory over the Philadelphia Nationals. Luque let Phillips down with four hits. Dressen's home run was the game of the Giants-Pirates but his error yesterday paved the way for Pittsburgh's 4 to 1 win to even the count. The New York captain missed easy runner with a double play in the 11th. Three runs followed on the 12th in the ninth. Carmen Hill, the bespectacled pinch-hitter of the Pirate staff, registered fifth victory over the Giants yesterday. The Warner brothers accounted for three of the Pirate tallies.

St. Louis Cardinals were late in starting against the Boston Braves but they won 7 to 2, world champions put across runs in the seventh. Jess Little limited the Braves to six hits. Detroit started a recruit pitcher against the Boston Red Sox. Billings' Brown understrapped product. Only finished the game hit by the Bostonians to four hits, first winning 6 to 2. The collection was scored on only in the 11th inning.

The Philadelphia Athletics made three in a row from Cleveland, beating Huddell and Brown for a 1 to 1 decision. Lefty Grove held Indians in hand throughout and not scored on until the eighth.

Billy Evans Says:

Nick Would Be Umpire
 Modern baseball fans know Nick Alcock only as a clown, yet he was one of the greatest southpaws the game has ever produced. The Herb Alcock of today is the Nick Alcock of 25 years ago.

Recently while sitting in the room of my hotel at Washington, with my proposed high in the air, recovering from a knee injury, Alcock dropped in to see me. "Just learned you might never be able to umpire again," said Nick, as he poked his head through the pined door, "and I wanted to ask you to say a good word for me to resident Johnson."

"I am about ready to retire as such, even though I'm just past 50, but I've decided when your eyes are no longer good enough for the duties of coach you immediately become eligible for the umpiring job."

I assured him that I thought he was entirely too young to start umpiring, but I would be glad to give him the requested boost when he made up his mind that he was ready to take up umpiring. Nick never took life or baseball too seriously; perhaps that is why he has gotten so much out of it and has always been hale and hearty.

Yanks Too Powerful
 Nick having had his little joke, we discussed the four tributes the people of Washington had paid to Walter Johnson, which naturally caused us to talk past and present conditions in baseball.

Atlanta Proudly Boasts That It's City Of Champions

GRANT JAM

BY NEA Service

ATLANTA, Ga., Aug. 18.—Three championships won within a week recently by its golf and tennis players furnish fresh evidence that Atlanta is the city of champions.

It is the home of the British open golf champion, of the state and the intercollegiate golf champion, of the southern tennis champion, of the woman trap-shooting champion of North America, and of athletes who have set track and swimming records.

Bobby Jones began Atlanta's week of championships by winning the British open golf tournament at the historic St. Andrews course in Scotland with a score of 235 strokes for the 72 holes of medal play, a record never before equaled in the British open or the American open.

In the same week Wats Gunn won the state golf title at Savannah, shortly after overwhelming Roland Mackenzie in the intercollegiate golf tournament at Garden City, L. I. In the 36 hole finals for the intercollegiate championship, Gunn defeated Mackenzie 10 up and 9 to go.

In the morning round of 18 holes Gunn shot a 69, the course record, and had Mackenzie 10 down.

Atlanta championship week was next marked by the victory of 17-year-old Bryan Grant, Jr., in the southern tennis tournament, played at Memphis. Grant, though still a schoolboy, fought his way to the finals, where he defeated Jack Mooney by tennis of such quality that critics predict he will some day be national champion. Grant is the youngest champion in the history of southern tennis.

Mrs. J. C. Wright last year performed the remarkable feat of winning all three major championships for women in trap-shooting at the national tournament held in Vidalia, Ga. At the end of the tournament she was crowned woman's champion for North America in singles, doubles and handicap. Mrs. Wright began shooting only about five years ago, and next to marksmanship her chief hobby is fine needle work.

Dave Young won the title this year of "open" swimming team. He was the only representative sent by Georgia Tech to the intercollegiate swimming meet in Iowa City, but alone he beat several of the big eastern teams, and won fourth place for his college. In the finals of the 150-yard backstroke he clipped 1.10 seconds from the record, and already he held the southern record for this and for the 100 and the 200-yard swim, free style.

Ed Hamm, also of Georgia Tech, won the broad jump at the national intercollegiate track meet in Chicago, and before that in the southern meet he had set a record of 24 feet 11 3/4 inches. Only four men in the history of the world have jumped further than that—Pat O'Connor, E. O. Gourlin, R. L. LeGendre and De Hart Hubbard.

In addition to its present championships Atlanta was the home of Alexa Stirling, now Mrs. Wilbur C. Fraser, during the five years she held the national woman's golf championship.

Something in the air of the southern city breeds champions, and they're still after championships. Atlantans hope to pull Georgia Tech over to a grid championship this fall.

These four teams plan to form a league. With talk of Oklahoma City and New Orleans also having rights, there is a probability that this league will assume rather large proportions.

The Texans are all for this sport, new to them, and they're "Bleed 'em!" They're planning to send the champions of the league to be on a tour of the north next fall.

Stamp collecting is the hobby of several royalties, including the King of England, the Prince of Wales, King Alfonso of Spain, the Queen of Italy, and the crown princess of Italy and Sweden.

TERRYMEN ARE TO MEET WITH RIXMEN TODAY

FINAL GAME ON YEAR'S SCHEDULE OF GREAT IMPORTANCE

The Wholesalers, winners of the first half of the City League season, face their big event at Tech park this afternoon when they clash with the Rix furniture jugglers in the last regularly scheduled game. Separated from the Wholesalers by a scant half game margin, hung up yesterday afternoon when the Laundrymen forfeited by a score of 9 to 0, are the Bankers, who were pushed at least temporarily out of the running Tuesday afternoon by a 7-1 loss to the Terrymen. Should the Rixmen defeat the Wholesalers today the race will again be a tie and will call for the playing of a deciding game between Terry and Raley crews for the supremacy of the second season.

If the Wholesalers lose today and then lose to the Bankers, in the one game tie-breaker then a play-off series between the Wholesalers as winners of the first half, and the Bankers as winners of the second, would result. But if the Wholesalers win today, or lose today and then defeat the Bankers again, there will be no play-off.

The Bankers and the Launderers were to have met yesterday afternoon at Tech park but Manager Lefty Smith of the Washers, announced that his team had broken up and did not appear on the field for combat. According to rules the game was awarded to the Shylockers by the 9-0 score.

Big Celebration Marks Levelland Courthouse Work

(Special To The Journal)

LEVELLAND, Aug. 18.—An all day celebration marking successful culmination of efforts of the citizenship of Hockley county for erection of a permanent fireproof court house is to be held here Saturday when dirt will be officially broken for construction of the beautiful building that will cost approximately \$150,000.

Clark M. Mulligan, judge of the 99th district court, former judge of the 72nd district of which Hockley county is a part; Homer L. Pharr, judge of the 72nd district, and Durwood H. Bradley, district attorney, all of Lubbock, will speak at the ceremony along with other prominent citizens of this part of the state. The dirt breaking ceremony will begin at 3 o'clock in the afternoon.

The building is to be erected by the Clinkner Construction company of Hutchinson, Kansas, general contractors, and when completed, will be one of the prettiest and most commodious structures of the kind in West Texas. The general public is invited to attend the ceremony Saturday.

Town Marshal Shot By Oil Field Worker

MONROE, La., Aug. 18 (AP)—J. D. Bradford, 59, town marshal at Tulloss, was shot and killed at that town at 1 o'clock this morning by George Feazel, 35, oil field worker. The slayer was arrested.

Bradford, who runs a rooming house, was in the room occupied by Feazel and the latter's wife, when a dispute arose, the exact cause of which is not disclosed.

The coroner's jury returned a verdict that Bradford's death was due to a bullet wound fired by George Feazel.

Bradford was a native of Catahoula and leaves a widow and five children.

Little is known of Feazel who arrived three weeks ago at Tulloss with his wife from the oil fields of Texas.

Triple Slaying At Austin To Go Down Unsolved

(By Associated Press) AUSTIN, Aug. 18.—The Engler murder mystery bids fair to go down in Texas criminal annals as an unsolved enigma of brutality. Three years ago this month, Mrs. Engler, Moore's crossing near here, his wife and adopted daughter, 25, were slain at their home. The slayer or slayers never have been apprehended, officers are without tangible clues, despite investigation by grand juries, numerous offers of rewards offered by the county, questioning of a dozen persons, and administration of "serum" to one in jail.

Mrs. Engler was shot in his and bore a wound through the temple. Powder burns indicate she was shot at close range. Engler was shot in the head, heard the first shot, after which the assassin evidently turned on her. The first shot went through the back of her head. The bullet entered her mouth.

Mrs. Engler, an adopted daughter, apparently met her death only a severe struggle. "Hay" in her hair indicated that she hid in barn after the first disturbance and was murdered after the slayer sought her out and dragged her back into the house as she hid him off. She was killed a lone shot at close range. A plausible motive for the crime has not been established.

The life of the usual bandit, a short stretch from the parole.

Semi Monthly Pay Day Law In State Rapped By Davis

(By Associated Press) AUSTIN, Aug. 18.—The "semi monthly pay day" law, providing punishment for employers failing to pay off their workmen at regular intervals, is inadequate because it renders only an indirect service for the wage claimant. Charles McKemy, state labor commissioner, charges. "This law does not directly authorize the labor department to act in behalf of the claimant but imposes a penalty on the defendant, thus making it possible to punish the violator and only indirectly serves the claimant. It supplies a need but is not broad enough to protect all wage earners. "The number of cases in which wage earners are not paid is surprisingly large and is growing from year to year."

Only one complaint charging violation of the semi monthly law has been filed by the present labor department. It involves around \$20,000 and now is awaiting trial.

Thought For Today
Ye cannot serve God and Mam-
mon.—Matthew vi:24.

A house divided against itself
cannot stand.—Mark iii:24.

Vegetables
Just at a time when it was
believed that the greatest problems
of food relief in the Mississippi
valley had been solved so effectively
comes the discouraging news
that the more unfortunate of the
valley people are in grave danger
of an epidemic of pellagra—a ter-
rible disease.

Major disasters in the history of
mankind often have been more aw-
ful in their after effects than in
their immediate inflictions. Large
as life has been fatal from earth-
quakes and floods, the greatest loss
of life has always been caused by
epidemics which followed the cat-
astrophes. In war, too, up to the
world war, when medical science
invaded the battlefield, the loss of
life through epidemics raging
among troops has been greater than
the loss of life through shell fire.

It is in fighting these epidemics
which come in the wake of every
major catastrophe that the Red
Cross, the army medical corps and
the United States health service
have done their largest services to
mankind. That these organizations
call upon the present emergency
agency in the flood areas seems
fairly well assured, for the nature
of pellagra is known and its pre-
vention and cure have been proven.

Pellagra, in its final analysis, re-
solves itself into a matter of prop-
er feeding. Too many of the flood
victims have returned to their bar-
ren lands, starved by poverty, and
have attempted to maintain life on
such slender diet as corn bread,
milk and soy-bell. With their
gardens all gone, no fresh
fruits and vegetables have been ob-
tainable, and for lack of these vit-
amin containing foods, the flood vic-
tims face the danger of pellagra.

The great majority of the law-
yers of the nation realize that a
reorganization of form and statu-
tes must be had if the law is to
fill its niche as was originally in-
tended. A great majority of the
practicing attorneys favor the re-
organization—favor the planing of
the judicial system upon an effi-
cient plan for the realization of
which will not only better the ca-
lendar of the man in the street but
will also better their own business.

In the legal profession, as in every
other field of endeavor, there are
a few more unscrupulous men and
that few are benefited by condi-
tions as they are today. By fig-
uring, shifting and throwing
every obstacle possible in the way of
the courts this small percentage of
lawyers are able to hinder honest
men and keep dishonest ones
from their just deserts for a time,
at least, if not permanently. Such
a condition, of course is lamentable
and something must be done about
it sooner or later.

Hot Dogs And Art
Designers of filling stations have
rivaled the architectural glory of
ancients in some of their creations,
and by calling in the landscape gar-
deners for help they have done in
spots a fair job of making gas
pumps and their environs things of
beauty as well as joys forever.

The concomitant hot dog foundry,
however, has failed to show much
interest in art, and the odd and aw-
ful assortment of ramshackle shab-
dies which line the highway and
dispute winners present probably
the worst blenches in the American
landscape today. Rumor therefore,
that Mrs. John D. Rockefeller's
donation of \$7,000, topped by the
boltona manufacturing Gold-
company's \$10,000, will all go to
better money for hot dog stand
designing, context is to be certained.

No greater civic beautification
cause could be sponsored, and
that the prize money comes from
Coal Oil Johnny's folk and the
warst makers themselves is most
appropriate. It serves as admission
by the gas station people and the
boltona barons that their associ-
ates who do the sausage retailing
are a bit run down at the elbow
and caves and should perk up.

Granted that the contest is put
over and some good designs are
produced, the trouble may come in
convincing the winner vendors that
they should become more classic in
their housing. Also, at the very
start, it should be realized that the
hot dog is a somewhat stubbornly
shapable thing itself, and future
buyers of roadside food need not
expect to drive into a gothic or
mission hot dog stand and find
there only gothic or mission hot
dogs.

THE PLAINSMAN

Says:
In a great Eastern-city recently
was called a meeting of the public
library commission. The session
was announced for 8 p. m. and
the commission as composed of
twelve internationally known cap-
tains of industry and finance—men
who are busy with big affairs—
men whose names are to conjure
with. Exactly at 8:59 p. m. those
twelve commissioners, taking their
time from their own businesses, to
serve this people, trooped into the
commission room. Exactly at four
o'clock with every commissioner
present, the doors to the room were
slung shut and the transmitting of
business was begun. PUNCTUAL-
ITY is a word of success. Its ad-
herents are men who GET there in
both senses of the word.

One person with a vivid im-
agination and the desire to
gossip can do more damage in
less time than a company of

TAVING OF OIL FIELD IS

reads a headline in an Amarillo
paper. Unless the writer was
referring to highways it sure will
make it "hard" on the drillers.

A newspaper headline announce-
"Fall Into Police Net Over Week-
end." The trouble with our judicial
system seems to be letting law vi-
olators down easy.

A theological student who
had prize ring aspirations and
was undecided as to whether
to enter the arena of the pul-
pit has chosen the latter voca-
tion after having been knock-
ed out in his first fight. The
Plainsman can't help but re-
flect if the decision came as the
result of his opponent knock-
ing the devil out of him.

While the Average Citizen does
not seem to realize the fact—of
at least his father—thus far to
make his ideas known on the sub-
ject—the entire legal and judicial
system of our country is sadly in
need of complete reorganization.
The Plainsman is not a lawyer,
never has been a lawyer and prob-
ably never will be a lawyer. He
only knows one thing about law:
it is today, and that one thing is
that the law is woefully inef-
ficient. If you've ever had a case
in any court in the land, the
advice you are given had it forcibly
brought home that were every-day
business carried on in the same
manner the country would be par-
alyzed and the greatest economic
panic in the world would result.

The wheels of justice grind ex-
ceedingly SLOWLY than they
should and there is a serious ques-
tion of how FINE they grind in
this day and time.

The great majority of the law-
yers of the nation realize that a
reorganization of form and statu-
tes must be had if the law is to
fill its niche as was originally in-
tended. A great majority of the

FLY PRESENTS NEW MENACE IN CITRUS FRUITS

GROWERS ARE WARNED TO MARSHALL FORCES AGAINST PEST

(By Associated Press)
HOUSTON, Aug. 18.—Texas citrus growers must prepare to marshal their protective force against a new enemy in the ranks of citrus pests in this country, according to George W. Allen, former secretary of the Mexican Gulf Coast Citrus Fruit association, an organization of fruit growers in Mexico.

The Trypeta Ludens, or Mexican orange fly, Mr. Allen says in the Southern Pacific Farm News, issued here, is the pest referred to and is considered the most destructive of any affecting the citrus fruit industry. He advocates immediate and thorough eradication methods. Meanwhile the government has placed an embargo against all Mexican citrus fruits, except the lime, which the fly does not bother.

Cold Weather Fatal

Mr. Allen adds, however, that experiments connected with methods of controlling the pest in Mexico have demonstrated that it cannot live in low temperatures hence it is natural to assume, he recites, that there need be no danger of the fly getting further north than its present existence along the Rio Grande.

It has been found, Mr. Allen recites in recounting discoveries relating to the growth of the fly and its methods of control, that the insect has four cycles with each transitory period covering from a week to four weeks. "In other words," he says, "the female fly deposits her eggs by stinging partially or wholly ripened fruit through the skin, the eggs being deposited in the pulp cells. After one week the eggs hatch into small maggots which then gradually eat toward the center of the fruit. There they remain eating gluttonously for two or three weeks and then start to move through the outside of the fruit, finally eating through the skin and dropping to the ground where they bury themselves in the soil one-half to three-fourths inches deep. They remain there in the pupa stage, for three or four weeks when through evolution, the pupa becomes a fly."

Coming down to methods of control, Mr. Allen gives results of experiments which he says has reduced losses as high as 25 per cent to negligible infection. It was brought about, he asserts, by rigid orchard inspection, cleaning, spraying and other methods.

Keep Orchards Clean

He insists that all orchards should be kept clean, of all dropped or rotten fruit. "Pick up daily," he advocated, "and bury deep with a sprinkling of quick lime. Under no circumstances allow fruit to lay on the ground over 24 hours period. Spray trees thoroughly with a mixture of water, sugar and lead arsenic. Spraying should be done in the heart of the day and after every rain. Cut down all fruiting cactus within 100 feet of an orchard, and all guava plants as well as papayas, both of which harbor the fly. Keep orchards clean of cover crops. After August 1 and until fruit is harvested, keep plenty of chickens at least 100 to every 10 acres—they will pay for themselves as well as eat the orange fly. Pick all fruit as soon as ripened. This is very important. All fruits should be off the trees

HEALTH NURSE SERVICE GAINS

SERVICE IS OFFERED TO ALL COUNTIES CO-OPERATING

(By Associated Press)
AUSTIN, Aug. 18.—County health nursing service are showing remarkable advancement in community health and the service will be extended to any county desiring co-operation from the state, Dr. J. C. Anderson, state health officer, announces here.

Organizations interested in child welfare are asked to write to the department for information as to how they can secure a public health nurse for the county.

"The public health nurse," Dr. Anderson said, "through individual contact, conferences and health classes, is educating mothers in the intelligent care of babies, home hygiene and care of the sick. The more intelligent care given the child, the better opportunity it has for life. This is conclusively proved by statistics as in Texas last year, one out of every 19 white babies died before reaching the age of one year, while one out of every 11 negroes and one out of every five Mexicans dies under the age of one year."

Visits Schools

"In addition to infancy and maternity welfare work, it is part of the county nurse's program to visit the schools, and with the assistance of a physician, inspect the children for defects, and follow up work in the homes to get these defects corrected."

"Some 800 junior health clubs with an enrollment of more than 8,000 school children were conducted last year by the county public health nurses. Home nursing classes were organized in high schools, a half unit credit allowed pupils taking this course."

When Alfred McGee, a wealthy farmer near Glenville, Ala., died he requested that his grave be near the road and that farmers hauling their cotton crop to market should call out in a loud voice the price of cotton for that day. This has been done for 45 years.

The hottest town in the world is Azizia, Tripoli, where in 1924 the thermometer registered 136.4 degrees. The highest record in this country was in Death Valley, Cal., in 1913, when the mercury touched 134.7 degrees.

There are several countries in which a census never has been taken. They are Persia, Afghanistan, the Indo-Chinese peninsula, half of Africa, parts of South America and most of China.

Tea passes through the London market every week at the rate of \$6,000 chests. These are worth about \$2,450,000.

The president of Czechoslovakia has the longest term of office of any national president. He is elected for life.

By January 15, of course late Valencia's would not ripen until March or April, but keep orchards well picked over.

"By a close observation of the above rules, you can stamp out the orange fly, but it cannot be done by slack methods. Eternal vigilance is the price of safety—hence all growers must work together in a co-operative way if the valley is to be expunged of the menace."

Lioness In Zoo With Baby Cubs Dislikes Keeper

(By Associated Press)

HOUSTON, Aug. 18.—Lizsie Lion at the Hermann Park Zoo here is not on speaking terms with Hans Nagel, zoo keeper. Lizsie has three cubs which she prizes. The cubs are gentle and Nagel, who also is a lion trainer, already has begun the rudiments of their education. Usually Nagel has only to shout to his mother to "get up there" and she "gets" into a nest box to which the door is shut. Nagel then has only to go in where the baby cubs are.

Lizsie however, has rebelled. She growled when Nagel gave the command and Cawson, the little lion's daddy in the adjoining cage added his roars to the tin. Lizsie refused to "get up there." Nagel prodded her with an iron hook and the growl swelled to a roar with the huge lioness backed into a corner. But it seemed, that, Nagel knew his lions. The swing of water through a hose moved Lizsie to back into the next box but she refused to go far enough to shut the door. Another stream was thrown on Lizsie and, snorting between roars, she backed until the door came shut.

"It is easy when you know how," Nagel said and picked up the three cubs and strode for the open. "Cats are afraid of water," he commented. "They hate to get their faces wet, through the hose scares them, too. The sound of water escaping in a plain garden hose is often a better defense than a gun—especially with cats."

"That's the real reason why Lizsie and Nagel have ceased to be close friends."

In this day of labor saving devices, why doesn't someone invent a note that will renew itself?

Drink Water If Back or Kidneys Hurt

Begin Taking Salts if You Feel Backache or Have Bladder Weakness

Too much rich food forms acids which excite and overwork the kidneys in their efforts to filter it from the system. Flush the kidneys occasionally to relieve them like you relieve the bowels, removing acids, waste and poison, else you may feel a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, the stomach sour, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, the channels often get irritated, obliging one to get up two or three times during the night.

To help neutralize these irritating acids and flush off the body's urinous waste, begin drinking water. Also get about four ounces of Jad Salts from any pharmacy, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine and bladder disorders disappear.

This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help clean and stimulate sluggish kidneys and stop bladder irritation. Jad Salts is inexpensive and makes a delightful effervescent lithia-water drink which millions of men and women take now and then to help prevent serious kidney and bladder disorders.

By all means, drink lots of good water every day.
