Powers' Lawyer Hopes For Lenient Sentence

By STANLEY JOHNSON

MOSCOW (AP)—Francis Gary Powers' Russian defense attorney expressed hope today the Soviet military court trying the American U2 pilot will be lenient with him.

The attorney, Mikhail I. Griniov, made the comment as the trial ended its second day with testimony of Soviet experts who attacked Powers' contention that he was only a pilot acting under orders and not a true spy.

Griniov told Powers' family he based his hope for leniency on the pilot's behavior during his trial, together with his expressed regret and repentance over the May 1 flight that landed him in Russian hands, 1,200 miles inside the Soviet Union.

Griniov is a court-appointed attorney, and the informal view he expressed could reflect official Soviet thinking.

The Moscow radio was telling its listeners today that Powers shows signs of true repentance, and "this makes a clear distinction between him and those who sent him."

The U2 pilot completed his own testimony in 30 minutes on the stand today. He reiterated that he was sorry he made the May Day U2 flight. He told his Soviet judges he did not think at the time that the flight might torpedo the Paris summit conference or provoke a military conflict.

It is the Soviet view that the Powers flight torpedoed the summit, while the United States contends that Premier Nikita S. Khrushchev's reaction to the flight, including insistence that President Eisenhower apologize, was responsible for breaking up the May 16 meeting in Paris.

The second day's session ended at 5:40 p.m.

The trial resumes Friday with prospects that it will be completed before nightfall.

In questioning today Lt. Gen. Victor Borisoglebsky, chairman of the three-judge military court, brought from Powers the comment that he thought he had done the United States a disservice by the U2 flight.

Powers listened, largely with his arms folded and little change of expression, to testimony of Soviet investigators on technical as-

pects of his plane's equipment and purpose. They charged the flight was planned, premeditated and aggressive.

The flier challenged two of the experts.

He disputed the testimony of Lt. Col. Yuri Tyutlin, that he flew a plane without American national identification marks.

Powers insisted it was quite possible his plane once had markings and that they might have been covered over by paint.

"I always saw it with identification marks," he said.

The Russian expert was obliged to agree that marks might have been painted out, but stood on the findings of the investigators that the U2 never had carried national identification numbers.

This was intended to shake Powers' claim that the plane he flew might have had markings which he took off in Pakistan for a high-altitude dash across the Soviet Union.

Konstantin Voroshilov, a gun expert, showed the court an incendiary device and Powers interrupted again.

"I don't have a question, but I would like to make a statement," he said.

He showed from the directions on the box that the incendiary device was intended simply to light a campfire if he was forced down in the wilderness.

PILOT'S FAMILY AT TRIAL—The parents of American U2 pilot Francis Gary Powers listen to proceedings from their box in Moscow's Hall of Columns at the opening session of the flier's espionage trial. Flanking the pilot's father, Oliver Powers of Pound, Va., are the flier's mother, left, and wife, Barbara, both of whom use earphones to follow the testimony. At left, next to the elder Mrs. Powers, is her personal physician, Dr. Lewis Ingram, who made the trip with her because of a heart condition from which she suffers. Men in front are unidentified. Congolese Soldiers Attack Canadian Unit

By LYNN HEINZELING

LEOPOLDVILLE, the Congo (AP)—Congolese soldiers attacked members of a Canadian United Nations detachment at Leopoldville airport today, apparently mistaking them for Belgians. The captain commanding the Canadian detachment was knocked unconscious.

At about the same time, the United States ambassador was being blocked off by an armed Congolese soldier from keeping an appointment with Premier Patrice Lumumba. The Premier reinforced the snub later by ignoring the ambassador at an outdoor ceremony.

A Congolese delegation, meanwhile, headed for New York to present the Congo's case to the United Nations Security Council. It included one known pro-Westerner.

The Canadians attacked at the airport were part of a signal detachment about to take off from Luluabourg in a United Nations plane.

Earlier, Lumumba renewed his threat to invade Katanga province if the United Nations fails to bring that secessionist regime under control of his central government.

Lumumba voiced his threat at a news conference Wednesday as U.N. Secretary General Dag Hammarskjöld was back at U.N. headquarters in New York seeking support in the Security Council for his hands-off policy toward the new African republic's internal disputes.

Lumumba said his army could enter Katanga alone and "finish the problem in a week." But he threatened to seek help from a "country disposed to help us." Possibly he meant Ghana, or even the Soviet Union, from which Lumumba has threatened to seek military help before.

Lumumba also demanded that Hammarskjöld, if he returns to the Congo, bring with him the 14 nation team of Asian-African observers that the Premier previously demanded to supplement the secretary general in control of the U.N. operation in the Congo.

The Congolese Premier last threatened an invasion of Katanga

on Aug. 9, when he was also pressing for action from the United Nations.

His aim then was to hasten the departure of Belgian troops from Katanga in hopes that provincial Premier Moise Tshombe's secession-minded regime would collapse and Lumumba's government could take control of the province's rich copper, cobalt and agricultural resources.

Few took Lumumba's earlier military threat seriously, and it seemed equally unlikely he could organize a successful expedition to Katanga now. There are only a few roads from Leopoldville into the provincial capital of Elisabethville 350 miles away, and Lumumba's 25,000-man army, commanded by a former sergeant, hardly has the training or discipline for such an extended campaign.

Fund Distribution Probe Considered

By THE ASSOCIATED PRESS

Sen. J. William Fulbright (D-Ark.) said today he is considering an investigation into possible influence by a Republican campaign aide "in the distribution of State Department funds."

Fulbright, chairman of the Senate Foreign Relations Committee, said he will talk with associates about the department's role in the controversy over a project to bring 250 African students to study in U. S. colleges.

Sen. Hugh Scott of Pennsylvania, a former GOP national chairman, touched off the row in a Senate speech in which he said the family of Sen. John F. Kennedy, Democratic presidential nominee, apparently offered \$100,000 to finance the project after the State Department agreed to sponsor it.

Kennedy said it was the other way around.

"If the facts are like they appear to be," Fulbright told a reporter, "I think it is an outrageous distortion of the facts on the part of Sen. Scott."

It is true that the State Department was pressured into allocating funds, it was an unacceptable interference with the orderly conduct of our foreign policy by the State Department for partisan political purposes," he said.

The Republican campaign aide referred to by Fulbright is James Shepley of the staff of Vice President Richard M. Nixon, the Republican nominee.

Scott told the Senate Wednesday night that he was concerned "at the apparent misuse of taxpayer foundation money for blatant political purposes."

Nixon returned from his first campaign trip to the South today to face a Democratic storm of anger over the attack on Kennedy.

Laos Neutral Takes Over

VIENTIANE, Laos (AP)—Capt. Kong Le, leader of the military coup that seized power in Laos last week, announced Wednesday night he is turning power over to the country's new neutralist premier, Prince Souvanna Phouma.

The young paratroop captain made his announcement following unanimous ratification of the prince's government by the National Assembly.

But Kong Le plans to set up an office at the Festival Hall, near the government headquarters. From there he and his military associates can keep an eye on the new government to ensure that their demands for domestic reforms and strict neutrality between the Western and Communist blocs are carried out. Kong's group also has charged Souvanna Phouma to make peace with the pro-Communist Pathet Lao guerrillas.

Panhandle Area Lashed By Storms

By THE ASSOCIATED PRESS

A band of thunderstorms extended across North Central Texas Thursday. Severe thunderstorms hit parts of the Panhandle during the night.

The thunderstorms, occurring during a severe weather alert, poured 3.5 inches of rain on Skellytown, 3 inches on Pampa and 2.54 inches on Perryton.

Behind the thunderstorm line temperatures made residents think of the trust of football and the nip of fall in the air. Ahead of the front, Texans suffered under hot, muggy air.

Temperatures at Dalhart dropped to 52 degrees. Amarillo dropped to 62.

A heavy rain struck Dallas during the morning traffic rush period.

Lightning struck and did minor damage to a trailer and warehouse Wednesday night at Perryton.

Other rainfall totals included Amarillo 3.5 inch, Houston .38, Wichita Falls 1.6, Newport 2.0 and Arthur City 2.1.

Most of the Panhandle was under a severe weather alert late Wednesday as the front, which brought the first snow of the season to Colorado, edged into Texas.

Early Thursday a thunderstorm brought rain to Amarillo while at Wichita Falls a light rain was falling. Cloudy weather prevailed over the Northwest, Central and East Texas while far West Texas and the coastal regions were clear.

The front shortly after daylight lay on a line running from Farwell on the western edge of the Panhandle to Childress and into Oklahoma. Pre-dawn readings ranged from 47 degrees at Dalhart to 81 at Galveston, Palacios and Corpus Christi.

Temperatures Wednesday afternoon were mostly in the high 80s and low 90s.

Crash In Southern Morocco Kills 20

CASABLANCA, Morocco (AP)—A four-engine military transport plane exploded and crashed in southern Morocco Wednesday night, killing all 20 persons aboard.

The passengers were French sailors and their families bound for a base near Agadir.

AT OAS MEETING—U. S. Secretary of State Christian Herter, center, leaves a meeting of the Organization of American States in San Jose, Costa Rica with U. S. Ambassador Whiting Willauer, right. In uniform at left is Vencio Fernandez, acting as Costa Rican aide to Herter during the meeting. Herter said the foreign minister "will strive to work hard to preserve the principles of democracy in the western hemisphere and to intensify the bonds that unite American nations." (AP Wirephoto)

Herter May Back Venezuelan Move

By STANFORD BRADSHAW

SAN JOSE, Costa Rica (AP)—Secretary of State Christian A. Herter was expected to throw the weight of the United States today behind a Venezuelan move to condemn the Dominican Republic for aggression.

But Herter may caution the other foreign ministers of the Organization of American States against the total quarantine of the Dominican dictatorship asked by Venezuela.

With a private meeting scheduled this morning, Herter was to be the first speaker of the afternoon. The foreign ministers were embarked on a crucial phase of their two-day-old meeting, judging Venezuela's charge that Dominican officials connived in the attempt to assassinate Venezuelan President Romulo Betancourt.

Venezuelan Foreign Minister Ignacio Luis Araya called Wednesday for a virtual quarantine of the Dominican Republic after noting that the special OAS investigating committee had accused Dominican officials of backing the abortive June 24 plot against Betancourt.

Araya asked for a breakdown in diplomatic relations and communications with the Dominican Republic as well as economic sanctions. But he also appeared to leave the door open for lesser measures, saying the administrators had come to San Jose for charges against them.

Dominican Foreign Minister Parfiro Herrera Baez in a three-hour reply challenged the legality of the OAS committee's report. He declared there was no proof to support Venezuela's charge. Testimony, he said, came from prisoners now held in Venezuela and their statements would not be admissible in many courts.

He also hinted the prisoners had been brainwashed by Venezuelan police and likened the case to that of U2 pilot Francis Gary Powers, now on trial in Moscow.

Herrera Baez suggested an exploratory mission be set up to try to restore broken relations between the Dominican Republic and seven other American nations at odds with her.

proof to support Venezuela's charge. Testimony, he said, came from prisoners now held in Venezuela and their statements would not be admissible in many courts.

Herrera Baez suggested an exploratory mission be set up to try to restore broken relations between the Dominican Republic and seven other American nations at odds with her.

8-Day Crude Pattern Set For State

AUSTIN (AP)—The Railroad Commission ordered today continuation of the 8-day oil production pattern for September, fixing the statewide allowable at 1,545,396 barrels daily.

The order results in an increase in the daily allowable of 47,152 barrels because of the calendar day difference between August and September. Wells will be closed only 22 days in September compared to 23 days in August.

The production pattern represented the consensus of recommendations by the major oil companies and the independent oil producers who testified at today's statewide production hearings.

Humble and Standard of Texas urged a 10-day pattern because their stakes are exceedingly low.

"We have been compelled to turn down numerous opportunities to sell Texas crude in August. Some of that demand will be supplied with crude from other states," said Charles Keeble of Houston for Humble.

"If current conditions continue to prevail, we believe Texas will experience a further permanent loss of markets for its crude oil."

Standard of Texas described its stocks as "dangerously low."

Mobil, Sun, and Tuxaco asked for nine days. Eight other companies recommended eight days.

Jake Hamon of Dallas, representing a group of independent producers from that city, and George Anderson of Wichita Falls, head of the North Texas Gas and Oil Assn., reminded the commission that crude products remain in excess and suggested that the permissive flow be held to eight days.

Castro Due To Shake Up Cuban Navy

HAVANA (AP)—A sweeping reorganization of the Cuban navy appeared certain today in the wake of reports that the Castro brothers had smashed a naval plot against their regime.

Government silence prevented official confirmation of persistent reports that Castro agents had infiltrated a group of dissident naval officers at the Caba Blanca base across the way from Havana and uncovered a plot to revolt or defect with two of Cuba's three most efficient frigates.

Armed forces headquarters denied any was amiss, but informants insisted about 300 men had been arrested on charges of plotting.

Reports that Navy chief Juan Castanera was under arrest were denied officially, but his whereabouts was a mystery.

Havana radio stations said early today that Prime Minister Fidel Castro was visiting army bases in Las Villas Province, in central Cuba. The prime minister went to Cienfuegos Monday night, by the duty officer at the naval base there. Sources there had been any trouble.

Denied in Havana said Castro and his brother, Raul, minister of armed forces, had personally led a roundup of anti-government forces in the navy.

Mitchell Says Most Workers Back Nixon

WASHINGTON (AP)—Secretary of Labor James P. Mitchell said today a majority of rank and file union members will be for the Republican ticket in 1960, as he said it was in 1956.

The secretary made the forecast to newsmen after a White House call. He said the purpose of his visit with President Eisenhower was to discuss routine business.

Slayer's Fate Up To Pardons Board

A CON-AP—The State Pardons Board today is pondering whether convicted sex-slaver Eusebio Regalado Martinez, who was paroled Wednesday as a grown man with a child's mind, should be spared from his scheduled execution Aug. 27.

The executive director of the Texas Assn. of Retarded Children posed the problem of the condemned man's mental competence at a clemency hearing before the board.

"The 27-year-old Latin-American is scheduled to die Aug. 27 for the 1952 murder of a 14-year-old girl," said the board.

Chairman A. C. Turner said the three-man board will probably reach its decision between Aug. 20 and Aug. 25.

"In this day and age, when social consciousness is awakened as to the need for protection of the weak and unfortunate, an enlightened society must reexamine its legislation and legal processes with regard to the mentally retarded," Meisner said in a prepared statement.

He outlined Martinez's history as a patient for nine years in the state's mental institutions, and observed him as a physically mature man but with a mind of an eight or ten-year-old child. At the age of 20, Martinez had an IQ of between 60 and 75, Meisner said.

"What headway would be made at this time and what benefit would accrue to society by going ahead with this execution, an execution that would not even be understood by the concept of death here is clouded by defect?" he asked.

Meisner noted that a person is considered legally sane as long as he can distinguish right from wrong. Psychiatrists' reports on Martinez indicate he can barely tell the difference, Turner said.

After 142nd District Court Judge Perry D. Pickett sentenced Martinez to death April 26, the convicted murderer smilingly told a reporter he had no particular feeling—neither fear nor courage—about his impending execution.

Martinez was twice convicted of the slaying. The first conviction was thrown out by State Court of Criminal Appeals because his attorney was found to be ineligible to practice law in this state because his state bar dues were not paid.

Martinez, in a statement introduced at the trial, said he attacked the little girl to satisfy a sexual urge, but came over him after he drank whisky, beer and wine with other Latin-Americans.

He was convicted of seizing the baby from the car where her parents had left it unattended while they went to a dance at a Midland night club and beating her to death.

Gov. Price Daniel granted him the customary 30-day reprieve, moving the execution date to Aug. 27.

POWERS'

Continued From Page 1

he was carrying when captured. Powers said.

The pistol was given to me by the man who was with me at the time of the slaying. I don't know who he is, but I know that he is a person who is a danger to society.

Col. Nikolai Douv went into great detail describing the pistol, which Powers strapped to his side beneath his flying suit.

The presiding judge remarked that it would be difficult to do any kind of distinguishing right from wrong at the 60,000-foot altitude at which Powers was flying, and the pilot agreed that this was so. It is a usual thing for American pilots on flights which might come down in uninhabited territory to carry pistols for killing game, as part of their survival equipment.

After this exchange the prosecution of expert witnesses continued to drone along.

Dr. Victor Ilich Prazdovski, a medical expert, testified the poison needed carried by Powers killed a dog in three minutes and a mouse in 20 seconds.

"The poison, he said, was one of the curare group such as South American Indians use on blowgun darts.

"It is one of the most potent and quick-acting poisons," he said. "Our commission concluded that if a human being were injected with this needle death would set in as swiftly as with dynamite."

Powers had testified that the needle was given him in Pakistan and it was up to him whether he should use it. He said it was intended for use on a man who was a danger to society and the torture became unbearable.

The expert witnesses testified their research which seemed to be exhaustive.

The poison, for instance, had been tried out on rabbits, dogs, mice and perhaps other animals, and it was found that one gram would kill an animal. A gram, the doctor explained, was 1/1000th of a gram and a gram is about the size of a small berry.

The final witness of the day was Col. Ivan Zhanov, reporter for a communist newspaper. He said their examination of the materials convinced them the U2 flight was premeditated and carried out with intelligence aims.

Mrs. Oliver W. Powers, ailing member of the pilot came to this afternoon's hearing in the hall of columns with other members of the family. She had stayed away from the morning, saying she felt her presence might disturb her son.

The presiding judge opened the second day of the hearing by asking Powers:

"Did it not occur to you that by violating the Soviet frontiers you might torpedo the summit conference?"

CRMWD Revenues Top Million Mark

Revenues of the Colorado River Municipal Water District crossed the million dollar mark in July.

The monthly revenue statement of the district shows water sale revenues of \$176,900.30 and recreational revenues of \$5,500.49, a total of \$182,400.79 for July. This boosted the year's gross receipts to \$1,129,057.17.

Of this total, \$1,078,128.92 is from water sales, including \$86,506.24 to the member cities of Odessa (\$335,960.98), Big Spring (\$257,282.00), and Snyder (\$63,543.73). Rural users have accounted for \$10,141.05 in water revenues. The remaining \$210,382.10 has come from sale of surplus water to SACRO, Sharon Ridge, Lion Oil Company and Texas Gulf Company representing units.

Recreational revenues have aggregated \$50,282.25, of which \$22,510.10 has come from lease rentals, \$22,726.67 from permits and \$5,045.48 from concessionaires.

Total expenditures for the month stood at \$70,648.85, leaving a total of \$111,751.96 for transfer to the net fund.

Youth Group Plans Petition

A youth organization formed this week to oppose legalized sale of alcoholic beverages has announced that it will circulate petitions among young people ages 13 to 20.

The petitions, which call for adult opposition to a proposal to legalize liquor sale, will be published, officers of the organization said.

At the same time, plans were made for a youth parade to be staged at 10 a.m. Aug. 27 and another meeting of the group was set for 3 p.m. next Monday at the First Methodist Church.

Officers of the youth organization include Ray Lashaway, president; Buddy Patterson, vice president; and Mary Bowlin, secretary.

Each application for relicense will be considered on its individual merit, Chief Treadaway said. The local Navy recruiting station invites personnel discharge for these reasons to submit application for relicense.

The recruiting office in Snyder is located at 612 East Highway.

Boycott Set In Oklahoma

OKLAHOMA CITY (AP)—It's almost automatic that a boycott will be called. I will so recommend Friday night.

So said E. C. Moon Jr., head of the local chapter of the National Association for Advancement of Colored People, after an executive meeting Wednesday of Gov. Howard Edmondson's Committee on Human Relations.

He said a mass meeting Friday night will determine whether Negroes will put their lives in jeopardy by boycotting downtown businesses in effect. It is supposed to enforce their demands for integrated restaurants.

The restaurant people are still recalcitrant and stubborn in their reactionary point of view," Moon said. "They leave us no choice except to carry out the boycott."

Sons Of Hermann Set Membership Drive

Fritz Schlo, grand president of the Sons of Hermann in Texas, has announced the launching of a three-month membership campaign for the statewide fraternal order. Hermann Sons currently number 32,000.

The drive, to continue through October, will be known as the Big D Pre-Convention Membership Campaign, since it will be the order's last campaign prior to the triennial Grand Lodge Convention scheduled in Dallas for May, 1961.

The Sons of Hermann Lodge in Hermleigh is Roland Lodge No. 256. Joe F. Koss, Route 2, Hermleigh, is the local lodge secretary.

Suspect In Slaying Guarded As Angry Crowd Assembles

BOONVILLE, Ind. (AP)—A convicted rapist accused of killing 11-year-old April Honey Terry was held under close guard today after an angry crowd of townspeople gathered outside the jail.

Emmett O. Hashfield, 33-year-old truck maker, was ordered held without bail Wednesday on a preliminary charge of first-degree murder after the little girl's dismembered body was found.

Sheriff Robert E. Shelton and State Police Sgt. Wendell Opel said Hashfield orally admitted dumping April's dismembered body on the Ohio River bank and in the river, 25 miles southeast of Boonville.

The little girl disappeared Tuesday on a trip downtown to buy candles for a birthday cake for her 8-year-old sister, Candace. Hashfield was arrested Tuesday night and at first denied any knowledge of the case.

His statement and discovery of the body came Wednesday.

Sheriff Shelton said a crowd of about 200 persons gathered outside the Warrick County Jail Wednesday night.

They want a quick trial, and they had a tree picked out across the street they wanted to use, Shelton said. He said that he saw no ropes, but that several tons of ropes were thrown at his deputies, two of them scoring hits.

Shelton said Hashfield paced his cell nervously but said nothing.

"We had a worse case when we had a race riot here a couple of years ago," the sheriff said. "If it gets too hot they'll have two locked iron doors to come through. Just let them try to get in."

The crowd dispersed before midnight.

Arraigned before Justice of the Peace Howard Bradley, Hashfield refused to talk.

"I ain't making any statements till I get me a lawyer," he blurted.

Hashfield wore overalls, pants and a blue shirt in his court appearance. He had a black eye, and police said it was the result of a blow from April's father, Dr. Robert H. Terry, who had been allowed to question the man.

The Snyder (Texas) Daily News, Thurs., Aug. 18, 1960 5

Between You And Me

By Jerry Jackson

It was both a pleasant and informative experience recently re-viewing the acquaintance of Jimmy Gafford, the "new blood" who has arrived to take the "B" team coaching reins from V. V. Sheaffer, the present varsity line mentor.

Many moons have come and gone, and several cubic feet of water have passed under the proverbial bridge since I saw him last—somewhere in the vicinity of nine years ago when we were both students at Lubbock High. At that time only one high school served the city, as Monterrey had yet to come off the drawing board much less the launching pad.

During his tenure with the football teams of 1951-52 the school enjoyed its most illustrious and golden era. Under the astute guidance of Coach Pat Pattison the Westerners pounded their way to state championships in both of those years, slipping by Baytown in the championship final, two years running by scores of 14-12 and 12-7. A great deal of credit for their success can be attributed to Gafford's efforts, as he was a starting tackle during those times and an all-state selection.

Serving with him on those powerhouse eleven were several others who went on to play a lot of top college football. Some include quarterback Charlie Brewer, center Johnny Tatum, halfback Bob Sexton, fullback Jimmy Welch,

and guard Dickie Lowery. All of them look a liking to the orange and white of Texas University, with Tatum proving himself to be one of the finest centers ever produced by the conference.

JIMMY GAFFORD
New Reins In Hand

Fullback James Sides was still another product of that era. The big guy chose Texas Tech and distinguished himself by playing four full years of varsity, hall, being named to the all-Border Conference team each and every one of those years.

Here Today, Gone Tomorrow

GAFFORD turned out to be a flea-on-a-hot-griddle as far as college football was concerned due to the existing circumstances. On graduating from high school in the spring of 1953 he signed a letter of intent with the University of Texas, but Cupid stepped in to tear up the contract.

"I decided to get married," he commented, "as I thought that I'd better pick a school, a little closer to home." And that he did, with San Angelo College receiving the benefit of his services for the next two years.

A wise choice, too. I might add, as he chose for his wife a cute, short, blonde bundle of vivaciousness by the name of Sylvia Roy. They now have a young seven-year-old line-man who goes by the name of Tim and a six weeks young child, Donna Gail.

During his college playing days Gafford performed as a guard rather than a tackle, in that he was built along sports car lines and found that position more suited to his size. After leaving SAC he took a fling at Oklahoma University, going there during the fall semester of 1955. He failed to cut the gridiron mustard there, however, ("those guys were too far ahead of me") and heeded a summons as issued by his old

high school coach, Pattison, to give Midwestern University (Wichita Falls) a try.

By the time he got there, though, Pattison who had been head coach at the institution, was gone. Gafford went on to attend the school there for one year, though, under another coach, at which time Midwestern football was abandoned.

So from there he packed his duds and headed for Commerce and the grand finale of his collegiate football career at East Texas State. It was from that school that he received both his Bachelor and Masters degrees in physical education in 1959.

His coaching experience since then has been confined to Port Neches and Groves, a consolidated system deep in the you-all stretches of Texas. He was head junior high coach in Groves, although much larger than Port Neches has no high school.

A favorable golf breeze has wafted him to Snyder, where his duties have already begun as assistant to "B" team mentor Dutch Stanley. He has "set up house-keeping" with his family at 2305 41st Street and will teach both driver education and civics in addition to his coaching duties.

It's good to have you aboard, Jim.

COLTS, COWBOYS VIE FRIDAY

Cotton Bowl Will Host 21 Contests

Dallas — A 21-game college and professional football schedule will be played in the Cotton Bowl here this season.

The schedule includes all Southern Methodist University home games, the traditional Texas-Oklahoma clash on the opening day of the 1960 State Fair of Texas and the Cotton Bowl New Year's Classic. A number of exhibition and league games by the two new Dallas professional teams — the Cowboys of the National Football League and the Texans of the American Football League — are also scheduled.

The complete Cotton Bowl schedule for the year is as follows:

August 19, Dallas Cowboys vs. Baltimore Colts; September 2, Dallas Texans vs. Houston Oilers; September 24, Cowboys vs. Pittsburgh Steelers; September 25, Texans vs. Los Angeles Chargers; September 30, Cowboys vs. Philadelphia Eagles; October 2, Texans vs. New York Titans.

October 8, Texas vs. Oklahoma; October 9, Texans vs. Oakland Raiders; October 15, SMU vs. Rice; October 16, Cowboys vs. Cleveland Browns; October 30, Cowboys vs. Baltimore Colts; November 5, SMU vs. Texas A&M; November 6, Cowboys vs. Los Angeles Rams; November 13, Texans vs. Denver Broncos.

November 19, SMU vs. Baylor; November 20, Cowboys vs. San Francisco 49ers; November 26, SMU vs. TCU; December 4, Texans vs. Houston Oilers; December 11, Texans vs. Boston Patriots; December 18, Texans vs. Buffalo Bills; and January 2, 1961, the annual Cotton Bowl Classic.

Towle Swimming Pool Remaining Open Daily

Some confusion has been echoed following the re-scheduling of opening hours at the Winston Park swimming pool, which is at present operating on an abbreviated schedule.

The new hours do not pertain to the Towle Park pool which is a separate pool director Rod Fulcher. The Towle pool remains open daily and during the same hours as it has been throughout the summer.

James Barnes, the Stillwater giant, paced Oklahoma with 33 points and 14 rebounds. Texas led 40-33 at the half but Oklahoma pulled ahead early in the third period. However, Bob McKinley of Boston and Dick McNeill of Dunsmuir hit back-to-back field goals to give Texas a 2-point edge which was closely watched by the other 112,000.

HAWK SCRIMMAGE IN FIRE

Fleet Backfield Is Bright Spot

Snyder's Tiger scrummed through a more spirited workout session here yesterday, with the emphasis being on play run-throughs and offensive and defensive lineups.

Coach John Conley was pessimistically optimistic last night following the workouts—encouraged in some areas of team development and dubious on other points. He stated that "Offensively, we're as far ahead as we've ever been at this stage. It looks like our best bet will be to run outside, a lot, but the strength and depth in those areas remains questionable."

"We've got a fast backfield, awfully fast," he continued. "No weight back there, though, and that will hurt us."

On the subject of defense, he offered: "We haven't worked much on defense as yet. However, I thought it looked good considering the amount of time we've been able to spend on it."

A casualty who will be sidelined temporarily is top tackle William Robinson, who is out with a bruised and wrenched shoulder. The arm is in a sling at present, but the injury is thought to be comparatively minor. Robinson doesn't vary too much from the "B" team in an attempt to bolster the lean-in-numbers squad.

The Tigers will lock horns with Phillips in a game scrimmage once again this weekend in Floydada in a "repeat performance" of last year in which they met on that same neutral field.

Conley has not as yet received confirmation as to which night it will take place, however, and is at present awaiting word from Blackhawk coach Joe Means on

the subject. It will be either tomorrow or Saturday night, though, with the official word concerning it expected sometime today.

Prior to this evening's workout the day will be reserved for picture taking, both yearbook and news shots.

Students Are Offered Cut Rate Prices

ABILENE—A special student price of \$1.00 has recently been established for the West Texas Shrine Bowl professional football game to be played here Saturday night in Public Schools Stadium. The section designated as E1 (E-One) and located on the south end of the east stands, will be set aside for students of high school age and under and the non-reserved seats will be sold at the gate for \$1.00 each.

The 1,247-seat section was established upon the recommendations of the sponsoring Abilene Shrine Club and Lamar Hunt, owner of the Dallas Texans. The Texans will meet the New York Titans in the game to be played Saturday beginning at 8 p.m.

"We feel that there are many high school students, especially football players, who deserve to see the game and are unable to attend otherwise," stated E. L. Turner, president of the Shrine Club.

The game is the first professional football contest ever to be held in Abilene. All other seats in the 15,042-capacity stadium are reserved and tickets are \$5.00 each.

The stadium box office will open Saturday at 6 p.m. with the reserved and student tickets to go on sale at that time. Reserved seats are to be sold in 31 area cities through Friday noon.

January And Maxwell Get Nod In PGA

LUBBOCK, Tex. (AP)—A field of 96 moved out today in the opening round of the Texas PGA Golf Tournament with stars of the tour favored for the top money.

Billy Maxwell and Don January, a couple of Texans who win plenty of money along the PGA tour, were given co-favorite positions although Earl Stewart of Dallas, a former tour star who was champion here three years ago, has been taking the 6,902-yard Hillcrest Country Club course apart.

Stewart, Gafford, Ernie Vossler and Dick Metz, the world's senior champion from San Antonio, had 65 in the final practice rounds Wednesday.

Maxwell has had three sub-par rounds, one a 65. Metz did a 66. The field here is the largest in the 46 years of the Texas PGA. The previous high was 92.

The purse for the 72-hole tournament is better than \$5,000.

Evans Aiming For SWC Job

DALLAS (AP)—Wilbur Evans, who has been a college sports publicity director for a dozen years, will become public relations director of the Southwest Conference and Cotton Bowl in December.

The full-time position was created by the conference and the Cotton Bowl Athletic Association. Evans, now sports publicity director and assistant athletic director of the University of Texas, will assume his duties when the college football season is over. He will office at the Southwest Conference.

Evans has been a sports writer for 27 years, serving the Austin American for a dozen years and the Dallas News one year. He is past president of the National Sports Information Directors Association.

Dame Fortune Allows Rangers To Advance

LUBBOCK, Tex. (AP)—The Lubbock Rangers will go to Wichita, Kans., next week to play in the National Semi-pro Baseball Tournament. They're doing it without a playoff.

Seguin won the South Texas championship and was to have met Lubbock for a spot in the national tournament. But Seguin said it would not be able to play due to the absence of some of its best players.

He'll have to wait until he's old enough to write before he'll be able to sign a professional contract, however. Mike's the son of Coach and Mrs. Bob O'Day of 406 31st Street (Photo by Jackson)

Travis Ninth Graders To Report Saturday

Saturday morning at 9 o'clock is the time which has been set aside for the issuance of equipment to the Travis Junior High ninth grade graders.

Coach Bill Hartsfield asks that all boys in that category desiring to play football report to the Travis fieldhouse at that time.

This will be strictly for the drawing of equipment, as the first workouts of the season are slated for a later date.

Dogfight In Sight As SWC Gridiron Wars Take Shape

By Harold V. Radford

Associated Press Sports Writer

The Southwest Conference won't have as much experience as it did last year and won't be expected to fare better in intercollegiate football. But if ever a close race was indicated this is it.

The schools come closer to equal veteran strength. The smallest number of lettermen is at Arkansas—16. The largest is at Texas Tech—21.

There was a wide difference in some of the teams in 1959. Texas Christian for instance had 29 lettermen, Southern Methodist 23, Texas 22 and Texas A&M 21. The others were 16 or less.

Texas Tech, despite its margin in veterans, is being picked to finish last—it's the Red Raiders' first time in championship play and history shows a team seldom does well in its initial try.

Texas gets the nod as favorite because it seems to have better quality although fewer lettermen.

But Texas Christian looks about the same. Although it didn't come in the championship race, it had an intercollegiate record of 15-10-1. The conference had 157 lettermen. This year it has 150. The intercollegiate schedule is tougher, if that's possible.

Most prominent teams to be met are Southern California, Georgia Tech, Pitt., Mississippi, Oklahoma and Ohio State. It's going to be difficult to do better than break even against that array.

But the race at home should be one long remembered. The fans must, think so, too, since each conference member appears to be up-in-advance-ticket sales.

The colleges are in a different position—they have their ready-made fans. The alumni are going to see his favorite team play regardless of how great the prospect turn out to be. And the professionals have no alumni—not even the kind that criticize and seeks to fire the coach.

Southern Methodist was the choice last season and the Mustangs almost fell flat on their faces. Here's how they look this season:

1. Texas Christian
2. Texas
3. Baylor
4. Arkansas
5. Southern Methodist
6. Rice
7. Texas A&M
8. Texas Tech

The colleges are in a different position—they have their ready-made fans. The alumni are going to see his favorite team play regardless of how great the prospect turn out to be. And the professionals have no alumni—not even the kind that criticize and seeks to fire the coach.

Twelve years is the age limit which has been decided upon, with youngsters over that age ineligible to take part. Also, age brackets will be utilized so as to allow contestants to compete against children of their own age. Included in these brackets are: up to 6 years; 7-8, 9-10, and 11-12.

The rodeo will begin Saturday morning at 8 o'clock at the Towle Park lake and last until that evening at 5, with a variety of prizes being offered in all divisions of competition, including items of fishing equipment and regalia, and are donated by a number of Snyder businesses.

Merchants included on the list of those donating are Canyon Drive-in Theater, Denson Golf Service and Sporting Goods, Canyon Reef Sporting Goods, Fish and Newton Hardware and Sporting Goods, Lake Thomas Marine Supply, Snyder Athletic Supply, Sportsman's Headquarters—Western Auto White's Auto, Goodyear Service Store, and Phil's Auto.

Over 200 youngsters took part in the rodeo last year.

LOUD FOUL BALL?

Powers Trial Sets Stage For Propaganda Landslide

BY INEZ ROBB

In what follows, it is highly probable that I am cooking up not only a storm but the biggest dish of crow that will ever be set before me. Maybe my indignation at the phony trial in Moscow has unhinged my judgment.

But from the brilliant theatrics with which N. Khrushchev and his master propagandists have set the stage, I am convinced that Francis G. Powers is going to be freed. Oh, the court may find him guilty and impose sentence. Then, when the last tear has been wrung from the sad, young wife and Powers' parents have been brought to their knees in an ultimate plea for mercy, Khrushchev, the Communist Lochinvar, will ride out of the East, pardon the defendant and score still another propaganda victory.

The script for this trial and its "happy" conclusion were written weeks ago with a masterly cynicism that produced, for their inspired propaganda effect, visas for Powers' wife, his parents and a bevy of doctors, advisers and lawyers accompanying them.

It is inconceivable at least to me that visas would have been granted to the defendant's wife and parents if the great reunion scene, the dramatic climax when husband and son is again restored to the arms of his family through the generosity of Khrushchev had not been carefully plotted long ago.

The scenario will show Khrushchev pardoning Powers as a poor boy lead astray by the glittering wages offered him by the ruthless capitalist-monopolists of the United States. The world is going to be offered a stunning denunciation of capitalist villainy and remuneration of punishment for Powers' scene by Khrushchev

calculated to curl the hair.

For his own purposes, Khrushchev is using Powers' wife and his parents, Mr. and Mrs. Oliver W. Powers, with ruthless cunning. It is useless to write that he is using them with "shameless" cunning, for Khrushchev has no shame.

And it is too much to expect that an Administration that fumbled the U-2 matter from the beginning would have the wit or the will to prevent the use of Powers' wife and parents as gambits in the Russian propaganda barrage. There is only pity in my heart for them, for they are unwitting pawns in this brutal game. But the State Department, which still controls American passports, was not without its own weapon if it had the gumption or even foresight to use it.

Public relations experts among my acquaintance are appalled at the skill with which the Kremlin experts have exploited Powers' family. The Russian P.R.O.s have milked that facet of the trial to a farthing. First, they readily got a front-page story by granting visas to Mr. and Mrs. Oliver Powers and their party. And another front-page story, speculative, on why no visa was forthcoming for Mrs. Francis G. Powers.

Then, when the visa came through for the wife, there was another front-page kill. Next, the cable to Powers' parents in London ruled the situation for another front-page. The Moscow arrival of the first tearful parents, and then the distraught wife furnished further page-one material.

The Soviet propagandists have had a good day with this pitiful trio, building a melodrama as crude and corny and far more cruel than "Bertha, the Beautiful Sewing Machine Girl" or "Way Down East."

Khrushchev et al have plotted the trial and used the wife and parents with diabolic contempt. When the Russian leader has used all ingredients to whipaw the United States, as he raved with at the Paris summit, watch for the so-called "happy ending" as his ultimate propaganda landslide. (Copyright, 1960, by United Feature Syndicate, Inc.)

all along—a very minor figure in the over-all power struggle between the United States and Russia.

The real aim of the Russians in bringing him to trial at all was to try not him but his government. The questions asked him Wednesday, and the answers he gave, made this plain enough.

The Russians so maneuvered the questioning that he appeared not as some sinister figure peering down on Russia from 60,000 feet up but a kind of mechanical man who was simply carrying out orders when he crossed the Soviet frontier.

Eisenhower at his news conference Wednesday indignantly rejected the idea that the American government is on trial in Moscow. But such a rejection has nothing to do with the reality of the situation.

Powers himself, under Russian questioning, represented himself as a young man who had no choice but to do what he was told, although he said he had no stomach for spying at all.

Powers Trial Is Mere Anticlimax

By JAMES MARLOW

Associated Press News Analyst

WASHINGTON (AP)—The trouble with the spy trial of U.S. pilot Francis Gary Powers in Moscow is that it is an anticlimax. No, even though it's getting world attention, the edge is off.

The climax came in a few wild and woolly days last May when Premier Nikita Khrushchev trapped the State Department into denying and then admitting Powers was on a spy flight, then proceeded to wreck the summit conference and insult President Eisenhower.

By then the major facts of the case were known. Powers himself apparently had told the Russians all about his mission, and the State Department confirmed it. There was little left for him then but to plead guilty.

Thus long before Powers' trial began Wednesday there was no surprise left except one—what kind of sentence the Russians will hand him.

By the time the trial started, Powers had become—as he was

Mysterious Maladies Hit Business

By HAL BOYLE

NEW YORK (AP)—There are at least 300 recognized medical ailments, one for each day of the year.

But in the modern U.S. business world there are a number of other diseases science has never named. They probably cause more lost time and wasted motions—and perhaps more ulcers—than all the illnesses mentioned in a medical dictionary.

Here are a few of these mysterious maladies you can probably find in your own office:

"One-day pneumonia"—Familiar to every personnel director as a synonym for a hangover. Usually strikes on Monday. Victim makes miraculous recovery during day and shows up Tuesday morning chirping like a bluebird.

"Afternoon sickness"—Patient has three martinis and a parfait for lunch. Snores at desk until quitting time.

"Petty cash aphasia"—The new office boy suddenly trembles and becomes speechless when questioned about \$3.55 shortage in the stamp drawer.

"Daily doubtitis"—A gnawing compulsion by employee to go to nearest pay phone to call-bukey each afternoon shortly before start of first race at nearest horse track.

"Foot-in-mouth disease"—The junior executive who compliments the boss on his 44th birthday by saying, "Just one more to go, eh chief?"

"Sinecure syndrome"—The state of utter panic experienced by the office staff until they get to 10 a.m. coffee break.

"The 5:15 p.m. myopia"—This malady makes it impossible for the stenographer to discover any misspelled words in any letter she finishes just before quitting time.

"Post-vacation trauma"—Characterized by a vacant look and an inability to settle down into the old rut. Usually disappears after a week or two. If it doesn't, the employee disappears.

New Agency To Prepare Master Plan

By C. VATES MCDANIEL
WASHINGTON (AP)—A new central agency will draw up a strategic war master plan stating which U.S. weapons will be used to hit specific targets behind the iron curtain if nuclear war should come.

Secretary of Defense Thomas S. Gates Jr. Wednesday named Gen. Thomas S. Power director of the planning agency to be located at Omaha in conjunction with the Strategic Air Command headquarters. Power will continue to serve as SAC commander and will have an admiral as a deputy for the new agency.

A staff of about 40 top specialists will develop a long-range target program that will be under constant review. The plan is expected to be ready by December for approval of the Joint Chiefs of Staff.

In announcing the new agency, Gates emphasized that the current strategic target plan is a good one. But he noted it is based largely on SAC's manned bomber force capabilities.

Formation of the new agency is expected to quell a long-smoldering argument between the Air Force and the Navy. Some Air Force quarters have been advocating a separate and over-all strategic command to control long-range weapons of all the services. The Navy opposed this concept.

Gates said the new setup rejected such a concept. He said his decision would centralize planning but would decentralize the actual execution of the plans by the various senior commanders.

The new plan does not represent any change in established national military policy or in relations with U.S. allies, Gates said. He added that when the new plan is worked out any part of it affecting allied preparations will be fully explained.

Gates said it had taken him and Gen. Nathan F. Twining, chairman of the joint chiefs, exactly one year to reach the strategic target decision.

The secretary announced his decision Wednesday to the service chiefs and to senior military commanders summoned from their headquarters at home and overseas.

There was little argument within the military services about who would hit what with what as long as SAC possessed a near monopoly on big bombers and big nuclear bombs.

The disagreement blossomed when the Navy came up with its atomic powered submarines, each carrying 16 nuclear tipped polaris ballistic missiles.

As soon as the Polaris missile fired from a submarine began to look like it would succeed, the Air Force began advocating an over-all strategic command under Air Force bombers, and the intercontinental missiles then nearing operational readiness but also the Navy's missile launching submarines. The Navy objected strenuously and the problem was dropped at Gates' doorstep.

Under the new plan, the Navy will have several means of making its voice heard in the targeting operation. It also will retain control of its Polaris submarines, as well as the aircraft carriers from which some strategic bombing missions would originate.

Other Air Force commanders, in addition to SAC, will be part of the plan.

Payment For Drilling Made In Golf Balls

OKLAHOMA CITY (AP)—Times are tough in the oil drilling business. That's why E. L. Oliver, Oklahoma City driller, took 120,000 golf balls to drill two wells for Powell Briscoe, Inc.

Oliver, his warehouse now full of golf balls, said today "It was as good a deal as I could get the way things are in the oil business."

Powell Briscoe Jr., an independent oilman here, said he was satisfied with the deal, although so far there's no oil.

Oliver said one test is about completed and looks promising. The other hasn't been started.

"These are Japanese golf balls, made by a firm which several years ago sold quite a lot of them along the West Coast," Briscoe said. "I got into a deal with them recently and it didn't turn out so good and I wound up with 10,000 dozen golf balls."

"I don't know for sure what I'll do with 'em," Oliver said. "I guess I'll trade 'em to someone. I've already got a deal cooking for 5,000 dozen."

New Automobile Is Launched By Error

NORTH ADAMS, Mass. (AP)—Mrs. Donald Goodrow of Cheshire unintentionally launched her new 1960 automobile in Hoosac Lake Wednesday.

She backed the car to the water's edge to float a boat from a trailer attached to the car.

When she left the car to unhitch the trailer, the car backed into the water. It sank up to the roof.

A passing truck pulled it out. The car is now in drydock in a garage.

27 More Freed From Jail In South Africa

PRETORIA, South Africa (AP)—Twenty-seven more nonwhites who had been held under South Africa's emergency regulations were released from Pretoria Jail during the past week, authorities announced.

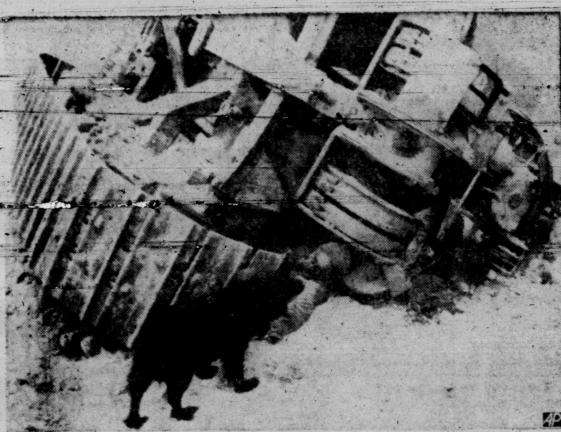

About 50 persons, including three whites, are still being held of the 1,800 arrested after the race riots last March.

Ex-Soldier Says He Was Due Pay

MILWAUKEE, Wis. (AP)—The U.S. attorney's office has been ordered to investigate the case of a former Army private who said he was sent to work in a Michigan copper mine without Army pay.

U.S. Dist. Judge Robert E. Tolan ordered the investigation Wednesday after a suit was brought by the Army in his court to recover \$5,253 in allotments and interest paid to the family of John J. De Francisco, 42, who now is a construction worker here.

Tolan directed the attorney's office to report to him by Sept. 12.

Judge Tolan, in continuing the case, said that he was aware that some nations sent men to work in the mines for no pay, but that he did not think the United States was one of them.

The Army claims in the suit that the money was erroneously paid De Francisco's wife while he worked in the mines from November, 1942, to June, 1945, and for three years after he was discharged.

Mrs. De Francisco was sent \$80 monthly allotment checks while her husband worked in the mine for \$4.40 a day but he received no Army pay.

De Francisco said he was drafted from Marquette, Mich., on Aug. 7, 1942, after three months basic training he was sent to Houghton, Mich., with orders to report to a copper mine. He was issued a card by the Army stating that he was "on furlough from the United States Army," and ordered to keep his uniforms in shape and be ready to report on 24 hours notice.

De Francisco said that after he was discharged from the Army he tried to get back pay from the Army but never got it. His wife continued to draw allotment

Trusty Has Busy Time

LEWISTON, Maine (AP)—Peter Neptune, 23, a trusty at the County Jail, had a busy 45 minutes of freedom Wednesday.

Police said:

1. He walked out of the jail.
2. Stole a car and drove to near by Auburn where he was involved in a collision.
3. Drove away from the accident scene and smashed into a warehouse.
4. Backed away from the warehouse—into a moving trailer truck.
5. Left the accident scene, abandoned the smashed car and stole another one.
6. With Auburn police in hot pursuit, drove about a mile before he lost control of the car which plunged into a rocky ditch.
7. Was arrested and returned to jail.

He is serving an 11-month sentence for drunken driving.

Favorite Of Tourists

FREJUS, France (AP)—The Malpaset Dam, whose break last year caused the death of 426 persons, is becoming a tourist favorite.

More than 50,000 people have visited the scene recently.

Showdown On Integration May Develop In Louisiana

NEW ORLEANS, La. (AP)—A new federal-state school integration showdown loomed here today in the wake of Gov. Jimmie H. Davis' take-over of New Orleans public schools.

Davis acted Wednesday to supersede the Orleans Parish (County) school board under a 1960 legislative law permitting him to take over schools to prevent racial integration.

U.S. Dist. Judge J. Skelly Wright has ordered the first grade of New Orleans public

schools integrated at the start of the fall term next month.

A three-judge federal court meets Aug. 26 to hear a suit by 31 white parents and the National Assn. for the Advancement of Colored People for an injunction to prevent Davis from interfering with integration.

Issuance of the injunction would strike at the constitutionality of the law under which Davis acted.

It would also cancel an earlier order by State Dist. Court Judge Oliver B. Carriere ordering the Orleans Parish school board not to comply with Judge Wright's desegregation order. Carriere thus upheld the validity of a state law giving the legislature sole power to reclassify schools as white or Negro.

Another new state law passed by the 1960 Legislature, permits the governor to close all state schools if any one is integrated.

Davis' action gives him control of the schools pending a meeting of the recently-organized four-man legislative committee to reclassify them.

A special legislative session to ratify classification may be necessary, unless the courts void the governor's action.

Davis designated James F. Redmond, Orleans Parish school superintendent, as his agent to run the schools.

He told Redmond to open the schools Sept. 7, the day before they had been scheduled to open.

Lloyd Ruttimer, Orleans Parish School Board president, said his personal opinion "was that Davis' attempt to keep schools open and segregated 'won't work'."

Temple Paper Backs Democratic Ticket

TEMPLE (AP)—The Temple Telegram urged voters today to elect the Kennedy-Johnson ticket in November.

The Telegram, which describes itself as an independent Democratic newspaper, had supported Sen. Lyndon Johnson for the Democrats' presidential nominee.

"The platform of both parties... are so similar that in effect they canceled out each other and are at least only political eyewash with most of their plans a long way from being enacted into law," the Telegram's editorial said.

"However, it is our firm belief that the farmer, the small business man and the rest of the people of this country as a whole have a better chance of survival under the Democratic banner."

Go now—pay later on the Santa Fe

Now enjoy all the fun and excitement of a Santa Fe trip and pay for it when you get back. Only 10% down. Spread the balance over 12, 18 or 24 months. (Minimum balance of \$60 required.) Good for all trips sold by the Santa Fe. Find out all the details of this convenient new way to travel.

Ask your local Santa Fe agent about the "Go now—pay later" plan

It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the world.

Gas is sold by far—by far—more than any other fuel in the world. It is the most abundant source of energy in the world. It is the most efficient source of energy in the world. It is the most economical source of energy in the world. It is the most reliable source of energy in the world. It is the most versatile source of energy in the
