Young Becomes Partner In Ins. Firm

RICHARD P. YOUNG

ROBERT W. YOUNG

A third generation has entered the patrnership of a 53-year old West Texas insurance business, which was founded with the beginning of Rotan.

Richard P. Young of Rotan and Robert W. Young of Abilene, grandsons of the founder, are becoming partners in the firm of R. L. Young Insurance.

Other partners, all living in Abilene, are Mrs. R. L. Young Sr., widow of the founder, and her sons, R. L. Young Jr., and O. Henry Young.

Richard P. Young and Robert W. Young are sons of R. L. Jr.. R. L. Young Sr. had opened an insurance business in Hico in 1905. In January 1907, he came to Rotan on the first train to run from Waco to Rotan, and moved to the new town to operate his business. He lived here until 1920 and was very active in civic affairs of the town.

In 1920 the family moved to Abilene to enter their sons in school, retaining his insurance business in Rotan and opening another in Abilene.

The boys worked in the business from 1920 to 1029 and Jan. 1, 1929 R. L. Jr. became actively associated with his father in the firm. He became a partner in 1932.

The firm expanded again in 1933 with purchase of an insurance agency belonging to H. S. Bridges in Rotan. It continued its expansion from 1933 to 1949 and at one time had offices at Roby, Stamford and Anson in addition to Rotan and Abilene.

O. Henry Young joined the firm in 1938 and became the third partner in 1941. The elder Young moved to Anson in 1937 to manage that office and O. Henry Young moved to Roby to manage the Rotan and Roby offices. R. L. Jr. directed the Abilene office.

R. L. Young Sr. died in January, 1949. The widow and sons carried on the business. O. Henry Young returned to Abilene in 1955 to become active in the Abilene office. With this move came addition to new departments, life insurance and real estate.

Both new partners have already had several years in the business.

Richard P. Young now manages the Rotan office. He graduated from Donna High School in 1948, and attended McMurry College. He married the former Ava Gene Irvin of Abilene. They have three children, Ricky, 6; Nancy, 4; and Lynn, 3. He is active in the Rotan Lions Club and Young Democrats, and a member of the Methodist Church.

Robert W. Young graduated from Abilene High School in 1946 and Texas A&M in 1951. He also attended McMurry College. He and his wife, the former Martha Whitehurst of Groesbeck, have two sons Bill, 4; and Christopher, 2. They belong to the Heavenly Rest Episcopal Church.

Holidays Are Voted

In recent survey by Chamber of Commerce, majority of businesses voted to remain open on Labor Day.

Complete results of other holiday observances will be carried next week.

Good Rains Cover Part of Area Thursday

Spotted rainfall covered a strip west of Rotan, around to the north last Thursday and gauged 1.13 in Rotan. The clouds swung to the east but went out of the territory in that direction.

The section west gauged from 3-4 to 2 inches with some spots northwest of town getting 2 1-2 inches. This is helping crops in the area covered, but with hot, windy weather prevailing, will not last long. The entire area and most of the state needs a general rain.

Many crops are suffering now, and the yield is evidently cut far short of early expectations. Maize harvest in beginning, but is expectde to be very light.

Visitors Appreciate LL Tourney Here

Dumas, Texas, July 30, 1958.
Mayor of Rotan, Texas,
Dear Sir:

May we take this means of trying to express my appreciation for the manner you and your little town showed your kindness and hspitality to the Dumas Little League baseball team and its followers. For many of them, maybe each of them, it was an entirely new experience and were perhaps a little frightened, but, if so, it was soon forgotten in the good time they had. It was a thrill to them to play in such a nice park, and was a pleasure for us to sit in.

May we say a big Texas, 'Thank You' to each person connected with the tournament. I'm sorry the names did not stay with us as the memory of your graciousness and all of your courtesies. We no longer wonder "why a tournament at Rotan' since being there. You made it such a pleasure.

The City of Dumas turned out for a welcome home party at 2:30 p. m. yesterday. They were tired, a litte unhappy at losing, but tried to be good sports, blaming themselves instead of Abilene. They were quick to admit Abilene had them outclassed and out played.

May you have the most prosperity in the future.

Sincerely,
Mr. and Mrs. J. D. Holtzclaw,
Hartley, Rt., Dumas, Texas.

NEWS from your

*** County Agricultural Agent ***

Texas A. & M. College Extension Service

Those of you that haven't filed for your 3c per gallon Federal Tax Refund on gasoline used on the farm, are reminded that you have until the 30th of September to file this claim. The claim may be filed only by the owner, tenant or operator of a farm. This includes gasoline purchased before July 1, 1958 which you used on the farm after June 30, 1957, and before July 1, 1958 for farming purposes. The claim should be filed with your U. S. District Director of Internal Revenue, Dallas, Texas. If you do not have the proper form for filing this claim, you may obtain one from the County Agent's Office.

A few empty feed sacks mounted on a frame over water troughs in pastures affords dairy cows the ample supply of fresh, cool, clear and palatable water they need for maximum milk production. At the Station near Tyler where dairy cattle research is being conducted, Shannon Carpenter, the station's iary husbadman, has found that by making use of the sacks for shade the water is about 20 degree cooler ad is free of the scum or moss which often grows in tanks exposed to the sun.

Water forms about 87% of the milk a cow produces and it takes from 100 pounds or 12.5 gallons to 120 pounds of water per head per day for dairy cattle. A plentiful supply of cool, palatable water is vital for highest milk production.

Cows will consume water even if it is hot and unpalatable, but not in the quantities they need. In hot weather such as occurs during Texas summers, cows may drink as much as 80% more water than cows in milder climates.

A cow which produces 100 pounds of milk per day will drink up to 300 pounds or 37.5 gallons of watter a day. Shade for the water trough will go a long way toward putting more water into the cow and more milk into the backet.

First installment of $5,488,245 of federal funds for Texas schools in the national school lunch program will be released by the food distribution division, Agricultural Marketing Serivce, Dallas, around September 1, reports John J. Slaughtre, chief of the Dallas AMS office.

Texas public schools will get $5,166,017, an increase of $661, 449 over last year and private schools will bet $322,228, an increase of $72,570, accoding to Slaughter.

Funds appropriated by Congress for the program are released to the states according to the number of children between 5 and 17 years of age, inclusive, and the relation of the per capita income in the U. S. to theh per capita income in the states.

The public school allement for Texas will be used by the Texas Education Agency to reimburse schools in part for the food bought frm lcal merchants. Texas private schools secure their allotments directly from Slaughter's office. Last year about 3,000 public and 131 private schools operating under the school lunch program spent about $20,780,935 with local merchants for food, Slaughter said. They served 90,860,139 meals, nearly all with a half pint of milk and the average cost was about 25.4 cents during November, the peak month of participation last year.

"With thet use of USDA funds and foods, schools can keep the cost of lunches at the lowest possible level," Slaughter said, emphasizing that each school determines the cost of its lunches on a non-profit basis.

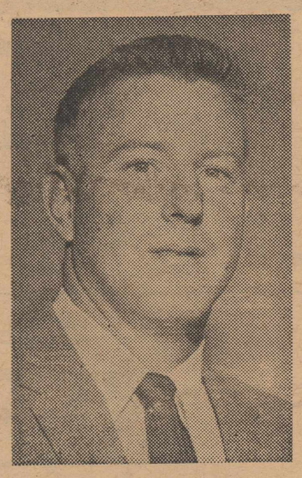

The program is designed to improve the diets of school children and t enlarge the market of farmers. At the same time, it creates local business and jobs.

Texas public schools which have not been in the program but wish to participate this next school year should contact Charles M. Hicks, Texas Education Agency, Capitol Station, Austin. Private schools should contact the Food Distribution Divisin, AMS, USDA, 500 S. Ervay St., Dallas 1, Texas.

THANKS

I am deeply indebted to the people of Fisher County for the support heretofore given me, and I shall be very grateful for the continuation of that cooperation.

What sort of world for them?

With mingled pride and wonder you watch them—absorbed in their play. How sure the young builder's touch... how graceful the deft girl-gestures! You treasure each promise for the future that shows in their choice of toys and activities.

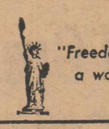

And always in your heart is the prayer that they will grow up to a world as happy as the one you've made for them. A world full of opportunity, where each may choose the life work most satisfying and fulfilling.

There's one way to help make your dreams for them come true! Be on the watch for ideas that could deprive them of their right to free and independent action.

The idea, for instance, that "government should run such and such—a business, an institution, a service." Yet experience has shown that the more things government controls, the less freedom there is for the individual.

Use your "woman-power" to refute this idea that "government should run things." Remind those who are for such a theory that the loss of anybody's independence is a threat to everybody's freedom.

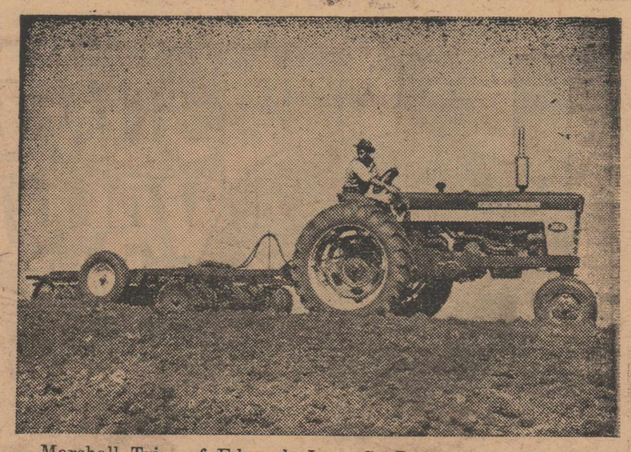

Very much aware of this danger are the independent electric light and power companies, because government already runs part of the electric business. And powerful people are pressing to take over more.

Marshall Trim of Edwards Imp. Co. Rotan recently joined approximately 8,500 dealers and company sales personnel from every part of the United States and Canada for the introductory showing of Harvester's new line of farm and commercial wheel tractors. Changes in styling and design of the new tractors is indicated by this five-plow, six-cylinder Farmall 560, largest in the line.

Local Dealer Attends Chicago Showing

Marshall Trim, representing Edwards Implement Co., International Harvester dealer in Rotan was in Chicago several days last week attending an introductory showing of the new line of International Harvester tractors just off the production line.

In addition to six basic power sizes and many different models of Farmall and International tractors, Trim says a number of new McCormick farm implements also introduced at the company showing, attended by most of the 8,500 Harvester dealers and sales personnel in the United States and Canada.

The new line of tractors is in keeping with the trend towards larger and more productive operations both on the farm and in industry. There are six-cylinder engines on the big tractors; advanced styling; increased power in most models; a host of new operating features; and wider selection of gasoline, LPG, distilate, or diesel engines, and new power steering on more models than ever before in the history of tractor manufacturing.

New tractors are being shipped to district IH sales offices and soon can be seen in dealer showrooms. In the meantime Trim announces that Edwards Implement Co., will join with other Harvester dealerships and the district sales office in presenting a big public IH Field Demonstration Day to show the new tractors and equipment at Snyder August 23.

Anyone desiring to attend the demonstrations can get complete information from Edwards Implement Co.

Did You Know?

The following information is released by the Fisher County Welfare Board.

A large part of the funds collected by the Fisher County Tuberculosis Association through the annual Christmas Seal Sale is spent in Fisher County for Fisher County citizens to help in the fight and control of tuberculosis. Some of the services supported by the sale of Xmas seals are: free-x-rays for persons suspected of having the disease, fumigation of diseased houses, furniture and clothing, and for the purchase of required articles for persons entering state hospital for treatment of tuberculosis. With other counties in West Texas, Fisher County ranks last in contributions to fight this dread disease. Actually, we contributed only half the amount of money as did neighboring counties with less population and fewer cases.

There are many reasons why tuberculosis has not been restrained; the disease is highly contagious, it is difficult to diagnose, and the general public is not aware of the severity of the disease, to name only a few. According to Dr. Howard E. Smith, Director, State Dept. of Health, Division of Tuberculosis and Chronic Diseases, "Fisher County's number of cases reported last year would suggest that there is a pretty good nest or reservoir of cases in the county, if diligent search were to be made for the unrecognized sources of infection." From available information, our greatest resorvoir of tubercular cases now rests among the old age group, principally those past fifty years of age. One of our greater sources of cases lies in the Spanish-speaking people. Both of these statements are supported by current morbidity and mortality statistics. With proper case-finding methods, strict quarrantine laws, and prompt treatment, tuberculosis can be compleely conrolled in our county.

One 73 year old male, a long-time resident of Fisher County, had apparent good health and was active until he suffered a severe hemorrhage and, although he was transferred immediately to a state tuberculosis hospital, the disease was so far advanced that he lived only a few week. It is impossible to know all the persons with whom he came in contact. On the other hand, persons, especially children, when diagnosed and treated at once, can be completely cured in a very short time.

SHOLD ONE PRAY FOR SALVATION?

One of the most deceptive doctrines taught today is that the alien sinner can be saved by praying to God. We are not saying that it is impossible for God to do it, for God cannot be limited in time or space. What we are saying is that He will not. We mean by "alien sinner" the soul who is not in the kingdom of God. When Jesus was risen from the dead he said to His apostles: "Go teach all nations." He did not command them to teach anyone to pray that he might be saved. He did not say, "Go preach the gospel to every creature. He that believeth and prayeth shall be saved." But he did say, "Go ye into all the world, and preach the gospel to every creature. He that believeth and is baptized shall be saved." (Mark 16:15, 16). Every creature capable of BELIEVING the gospel (1 Cor. 15:1-4) and being baptized is lost. Infants are not included in the above passage. They cannot believe the gospel nor can they be baptized for the remission of their sins (Acts 2:38), as they are without sin. Infants are not lost. They are safe. Jesus said: "Of such is the kingdom of God." (Mark 10:14). In all of the New Testament there is not one example of any infant being baptized. Baptism is for the lost. It makes no difference if some preacher, who has more zeal than knowledge, says and does otherwise—he must find the chapter and verse in the New Testament (which he cannot) or admit what EVERBODY KNOWS that zeal without knowledge is dangerous.

Examine the cases of conversion recorded in the New Testament and you will find that not one case can be found where an inspired teacher ever told a lost soul to pray for salvation.

The cases of conversion are recorded in the Book of Acts, they are:—

1. The Pentecostians. (Acts 2:1-47).
2. The Samaritans. (Acts 8:5-8, 12).
3. Simon the Sorceror. (Acts 8:18-24).
4. Conversion of the Eunuch. (Acts 8:26-39).
5. Saul of Tarsus. (Acts 9:1-20).
6. Cornelius. (Acts 10:34-38).
7. Lydia (Acts 16: 6-15).
8. Phillippian Jailor. (Acts 16: 16-34).
9. The Corinthians. (Acts 18:8).

All true conversions MUST be exactly like those mentioned above. Did you become a member of the church of which you are a member in the same manner as those mentioned? If you did not you are in disobedience and still in your sins.
