PERSHING HAS CONFERENCE TO BEGIN ECONOMY

Calls High Officers of Army Into Consultation to Discuss Lessons Learned in War.

Urges Every Possible Move to Reduce Expense of Maintaining United States Peace Armed Forces.

By Associated Press.

WASHINGTON, July 2.—General Pershing called high officers of the army into conference today to urge every possible economy in administration of their departments. They also were informed of General Pershing's plans to co-ordinate army activities in the light of lessons learned during the war and to hold conferences with department heads at frequent intervals.

General Pershing said that inquiries had been received from more than 40,000 persons relative to admission to the citizens' training camps this summer.

Attention of the conference was called to the order permitting enlisted men to be discharged during July upon application of their corps area or divisional commanders, without affecting their right to travel pay allowances, for the purpose of reducing the enlisted strength to the 150,000 mark fixed by congress. Major General Harbord, General Pershing's assistant chief of staff, said members of congress had stated that more than 75,000 men would resign under this order, but added it was believed not more than 20,000 would apply.

ORDER RETURN OF PROPERTY TO MRS. BERNSTORFF

By Associated Press.

WASHINGTON, July 2.—Alien Property Custodian Miller was ordered today by Justice Hits of the District of Columbia supreme court to return to Countess von Bernstoff, wife of the former German ambassador to the United States, stocks, bonds and cash amounting to one million dollars which was seized under the trading with the enemy act.

The countess showed that the money and securities came to her as the heir of her father, Edward Luckemeyer, a New York silk merchant, and contended that it was not subject to seizure. She was married to Count Bernstorff in Germany in 1887. The property was in the custody of the Bankers' Trust company when seized.

WANDERER TO HANG JULY 29

By Associated Press.

CHICAGO, July 2.—Carl Wanderer, convicted slayer of his wife, his unborn child and a "ragged stranger," is sane; a jury in Judge David's court decided here today. Attorneys for the state contend that this verdict exhausts Wanderer's resources to escape hanging. It is within the power of the judge to order Wanderer executed within 48 hours.

Judge David sentenced Wanderer to be executed on July 29.

MANY BELIEVED DEAD IN AMBUSH

By Associated Press.

DUBLIN, July 2.—Many men are believed to have been killed in fighting following the ambush of a police patrol by civilians on the Ballina-Sligo highway near Dromere yesterday. Seven constables were ambushed twice in quick succession by civilian parties operating close together. One of the constables was wounded and two captured.

An official report on the affray alleges that the civilians murdered the two prisoners. The military forces encircled miles of the country and fought the ambushers, a number of whom were seen to fall in the bog.

EXPLOSION KILLS FOUR

By Associated Press.

HARRISBURG, Pa., July 2—Four men were killed and three seriously injured today when a gasoline car on the Pennsylvania railroad collided headon in a fog with a freight train at Milner.

The Weather

Oklahoma: Sunday fair; Monday increasing cloudiness.

East and West Texas: Sunday and Monday generally fair.

Carpentier's Chin Stopped Too Many Dempsey Fists

By DAMON RUNYAN
Universal Service Sporting Editor.
WRITTEN EXPRESSLY FOR THE RECORD NEWS.

RINGSIDE, JERSEY CITY, July 2.—Our Mary had a delicate little French doll, all lacy and frilly and very pretty to look at.

One day the bull terrier pup got hold of the doll.

The sight of that little French doll after the terrier got through with it kept recurring to mind this afternoon as Georges Carpentier of France lay on the canvass floor in the fourth round mauled by iron Mike, the right hand of Jack Dempsey.

Carpentier was a limp and momentarily lifeless fellow as Harry Ertle, the referee, swung his arm mechanically up and down to finally move it around to indicate the end of the fight.

One minute and sixteen seconds of the fourth had gone by with Carpentier staggering backward before the steady march of the American heavyweight champion.

Dempsey, dark and scowling, shot out his left hand. Up went Carpentier's delicately carved featured chin sharply outlined in the afternoon light.

Over went Dempsey's right hand with a vicious chopping motion.

Carpentier Crumples.

Carpentier's legs crumpled under him as suddenly as if some one had taken a hammer and struck against a thin marble shaft.

He fell on the floor in a white heap, the tri-color of France about his middle standing out like a blotch.

Ertle, white clad, agile leaped over the fallen boy and began counting, one, two, three, four, five, six. Dempsey still scowling turned his back upon the limp figure and walked away toward his own corner, seven, said Ertle, his voice sounding above the babel of 90,000 voices, and to the amazement of every one Carpentier staggered to his feet.

A murmur of admiration swept the great throng.

Dempsey turning again walked toward Carpentier, his left hand extended half crooked, his right iron Mike pulled back, Carpentier's delicate Parisian face contrasting strangely to the dark features of the champion, was streaked with blood.

Dempsey's blows earlier in the fight had done this.

Frog's Chin Stops Fist.

Again Dempsey's left shot out.

Once more Carpentier raised his chin and the right came down with vicious force.

Carpentier fell almost in the dead center of the eighteen-foot ring, his body curved as gracefully as if he had posed, his eyes half closed.

This time he did not get up again until Ertle had completed the count of ten, but when he was lifted to his feet by his seconds and carried to his corner he soon found his footing.

He came out to shake hands with Dempsey and the two stood together for a full minute talking, Dempsey smiling for the first time during the fight and into the eyes of the beaten boy.

What they said is not correctly reported, save that Dempsey told Carpentier this truth, Carpentier is a great little fighter. Carpentier smiled back at Dempsey with the same disarming smile that he wore from start to finish, even when he was staggering to certain defeat and said that Dempsey, too, is a great fighter.

John L. Sullivan would have whipped him in short order said Arthur Brisbane, the noted editor sitting at the ringside reporting his first fight in years.

Admire Game Cock.

Meantime the crowd swirled about the ring, planted there in the center of acre after acre of pine and dabbled in admiration of the little French game cock who had gone four rounds with the champion.

Once in the second round Carpentier sent his famed right hand swishing against Dempsey's jaw and every man at the ringside who thought Dempsey would win and who had wagered money that way, paled and felt a sighing of the diaphram.

This blow, which is the same blow that felled the sturdy Joe Beckett in England, must have dizzled Dempsey for an instant.

Dempsey shook his head in a puzzled fashion, and closed in chopping, at Carpentier's body with short blows, while those who believed that Carpentier would win went into a delirium of enthusiasm.

It was a good sock as the profession calls a blow, delivered with Carpentier's body behind it.

For an instant it looked as if the most forlorn hope that ever crawled through the ring ropes might carry through.

The champion quickly shook off the effect of the smash but from that time on he quite obviously had considerable respect for Carpentier's right. It was the punch he had been advised to avoid and it is all that has ever been said of it.

He Was Outweighed.

From the opening round it was hard to see how Carpentier, barring the landing of such a punch, could win.

He was outweighed. He was meeting a more rugged and much stronger man. In the clinches Dempsey would gather up the finely constructed white body of the Frenchman and fling it around as he pleased. Carpentier is a good little man. He has the spirit of a giant, the spirit that made him a flier for France.

Writers Fooled.

Writers are confounded. Many writers, including this one, did not think he would go over one round. They are badly mistaken and freely admitted the mistake afterwards.

In the second round, sport prophesy hung in the balance after the second it was but a question of time when it would be fulfilled.

Dempsey, chopping away at Carpentier's body inside and cracking the top of that fine jaw with long range blows, was wearing him down.

Carpentier came out of his corner at the clang of the bell, which started the fight like a little game cock, shooting his right at the brown body of the champion the instant he got in range.

He fell as gamely, he fell like a soldier of France—brave to the end. Over in his corner, his manager, Descamps, who found him a stable boy and fathered and mothered him into a prominent place in fistic history and in the hearts of his countrymen, watched the finish of the lad he loves, with a strange expression on his face.

INDICT SINSIBAUGH ON TWO CHARGES

Special to The Record News.

DALLAS, July 2.—J. O. Sinsibaugh, carpenter, was indicted on two counts by the grand jury here today in connection with an alleged operation, said to have been performed on Adolphus Lang at the Sinsibaugh home several weeks ago.

Sinsibaugh claims that he returned to his home unexpectedly and found Lang there. It is alleged that he tied him to a bed post and performed the operation with a razor.

Later Sinsibaugh filed suit for divorce from his wife.

One count of the indictment returned today charged maiming, the other disfiguring.

TWO KILLED IN NEW AMBUSH BY IRISH

By Associated Press.

DUBLIN, July 2.—An official message states that a sergeant and a constable were killed and four constables wounded, two of them seriously, when they were ambushed at Oola, county Limerick today.

DES MOINES ITALIAN AMBASSADOR TO BRAZIL

By Associated Press.

ROME, July 2.—Signor Mericatelli, governor of Tripoli, has been designated Italian ambassador to Brazil to replace Count Di Bosdari who has been appointed governor of Rhodes.

ARCHER WELL FLOW BOOSTED TO 700 BARRELS

Well No. 4 of Texhoma Co. Which Came in Thursday Shows Larger Production Without Further Drilling.

Griswold Company's No. 1, Henderson, Being Cleaned Out After Making 100 Barrels on Pump.

Increasing it's flow naturally, without being drilled deeper, and with the swab run only intermittently, the Texhoma Oil and Refining company No. 4 Gose was reported Saturday evening as flowing at the rate of 700 barrels daily.

When drilled in Thursday the well started off with a flow rated as good for 400 to 500 barrels.

The new well offsets the Staley No. 1 Coffman, which had the biggest initial flow of any well in the pool, previous to this completion.

The Griswold Oil company's No. 1 N. Henderson is reported pulling rods to clean out, after several days on the pump. It is hoped to complete the production by this procedure. The well was showing up for around 100 barrels on the pump.

GAS SAND REPORTED FROM MONTANA TEST

A gas sand has been encountered in the test of the Montana Oil and Gas Company, drilling on the J. D. Avis ranch, several miles southeast of the city, at a depth slightly below 1,700 feet, according to report from the president, W. A. Patterson. The gas showing was encountered after several days drilling in cap rock, and those interested regard this circumstance as highly favorable. Drilling is continuing, though it is reported the sand showed sufficiently good to insure a fair gasser.

FIRST PREMIUM CONTRACT SINCE CUT REPORTED

A premium clause for 17 1-2 cents a barrel is reported to be included in a contract made last week between a Wichita county refinery and an independent pipeline company, for around 100,000 barrels of oil.

This is the first report of a premium being contracted for since the last cut in price.

The oil is to be delivered at the rate of 1,000 barrels daily, according to reports.

The company making the sale has several hundred thousand barrels of oil in storage in the northwest field, it is reported, much of it high priced oil.

CURSING STREET CAR CONDUCTOR COSTLY TO NEGRO

Special to The Record News.

DALLAS, July 2.—Cursing a street car conductor because he would not walk to a seat occupied by a negress and hand her a transfer, cost Julius Demar, negro, a $200 fine in police court here this morning.

Demar was tried for using abusive language and for disturbing the peace. His attorneys gave notice of appeal.

SHOOTS AT BURGLAR AND KILLS HIS WIFE

By Associated Press.

STREATOR, Ill., July 2.—Firing point blank at some one he thought to be a burglar, Daniel Kennedy of Wenona, a village near here, turned on the light early this morning and found he had shot and fatally wounded his 16 year old bride of seven months.

CITIES MAY ENTER LITIGATION OVER GAS SITUATION

Special to The Record News.

DALLAS, June 2.—A committee of six representatives from North Texas towns effected by the recent suit between the North Texas Gas company and the Lone Star Gas company, were appointed today at the mayor's conference, to investigate the proceedings and decide on the possibility of the effected cities entering into the litigation.

E. M. Mann, city attorney of Wichita Falls, was selected on the committee, which expects to go into session immediately.

Following the meeting it was announced that Governor Neff will be asked to submit a bill to the Texas legislature giving the state control of all interurban utilities.

SHIPMENTS OF GRAIN SET HIGH RECORD

Movement of Cars From This Section Heaviest in History of Wheat Crop in North Texas.

Increased Flow of Money Brought by Payments for Consignment Will Aid Credit Liquidation.

Movement of grain, for this time one of the heaviest in the history of the section, and a short-crop report on cotton, which bids fair to make this a property of greater value than at first anticipated, is expected by local business leaders to soon put Wichita Falls and the surrounding territory and the Southwest generally in fully liquidated and greatly easier financial conditions, it was indicated by expressions Saturday.

The movement and marketing of the grain crop, with the large amount of new money which it will bring in and the large amount of heretofore frozen credits it will allow to be liquidated, is the big immediate factor in the situation.

This situation applies not only to the banks in the purely agricultural communities, but to those in Wichita Falls and the other larger places as well, it is pointed out, for the larger banks have of course been called on for accommodations which the wheat money will allow to be returned, materially easing things all round.

Grower Not Holding Crop.

The rush with which the great movement has started proves that the wheat grower is not developing any disposition to hold his crop, being convinced, possibly from former experience, that it will be better to get his crop into the market before the edge is taken off the demand.

The whole Panhandle is beginning to figure in the harvesting, according to reports here, and two weeks more of dry hot weather is expected to see the entire crop on the way to the market. The wheat this year is pronounced a very high average milling quality.

Not the least factor in the situation has been the absorption of a considerable amount of the unemployed labor in the harvesting work, local business men point out. And the demand for the labor is reported very sharp in the sections undergoing the harvest, reports from points along railroads leading from Wichita Falls telling of farmers meeting the trains and going from one end to another in the search of hands for the harvest.

BAYLOR COUNTY THRESHERS WORKING AT FULL TIME.

Special to The Record News.

SEYMOUR, Texas, July 2.—With 51 threshers operating in Baylor county, grain continues to come in even more rapidly than last week. Elevators were forced to close down last night on account of lack of grain cars. Elevators are all filled to capacity and grain has been sacked and placed temporarily into all warehouse space available.

It is thought that cars will be obtained some time today.

FORT WORTH MAN DIES WHILE FLAMES DESTROY HIS HOME

By Associated Press.

FORT WORTH, July 2.—E. N. Anderson, 60, died today while attempting to save his home from a fire which practically destroyed the business section of Riverside, near here, at a loss of approximately $20,000.

DALLAS GRAND JURY REFUSES TO INDICT MEMBERS OF K. K. K.

Special to The Record News.

DALLAS, July 2.—The Dallas county grand jury, which was given a special charge several days ago to probe the Ku Klux Klan in Dallas adjourned today after reporting no evidence had been found against any members of the local clan.

No indictments were returned in connection with the investigation.

POLES RATIFY TREATY

By Associated Press.

WARSAW, July 2.—The military convention between Poland and Rumania was ratified by the Polish diet yesterday.

SNOW INCH DEEP FALLS IN CITIES OF NORTH IDAHO

By Associated Press.

IDAHO FALLS, Idaho, July 2.—A drop from 92 degrees two days ago to a snowstorm today was reported from Helz and Mason, two towns near here. An inch of snow fell at Helz.

PRESIDENT SIGNS RESOLUTION ENDING WAR WITH GERMANY

RARITAN, N. J. July 2.—The resolution of Congress declaring war with Germany and Austria-Hungary at an end was signed here late today by President Harding.

The president affixed his signature to the measure at 3:10 p. m., eastern standard time, at the home of Senator Joseph S. Frelinghuysen, where he is spending the week.

So that there might be no unnecessary delay in consumating the long deferred state of peace, the resolution was brought here by special messenger from Washington, where it had been given final congressional approval yesterday. The messenger left for the capitol again tonight to complete the formalities of the declaration of depositing the document in the archives of the state department.

There was little of the dramatic in the actual ceremony of giving prseidential approval to the measure. Returning here from a luncheon and golf game at the Somerville Hill Country Club, the president found the white house messenger, E. W. Smithers, waiting for him on the veranda of the Frelinghuysen house.

Mr. Harding immediately put on his nose glasses and sitting in a porch swing, examined the official copy of the resolution minutely. The signing took place at a small mahogany table in the adjacent living room in the center of a distinguished group, which included the president, host and hostess, speaker Gillett of the house of representatives, Senator Hale, and other members of the week-end party.

As the president's pen scratched out the final letters of his name, one of the group remarked;

"Well, that's that, Mr. President."

"Yes, that's it," replied Mr. Harding with a broad smile, and the others responded with a quick burst of handclapping, as if the historic significance of the occasion had been born in upon them.

No formal statement was made by the president in connection with the affixing of his signature and the consumation of the first formal step in the announced peace program of the administration. With other papers of a routine character brought here for his attention, the president returned the peace resolution as soon as it had been signed and then prepared to resume his interrupted holiday by getting back into golf clothes for another workout on the links.

In signing the resolution, the president used a pen sent him for the purpose by Representative Porter of Pennsylvania, chairman of the house foreign affairs committee, and joint author of the measure. The pen will be returned to Mr. Porter as a souvenir.

RESOLUTION ENDS STATE OF WAR

WASHINGTON, July 2.—Signing of the resolution declaring a state of peace with Germany and Austria, it was held here, ended today the technical state of war with those powers. There was some difference of opinion among some lawyers of the administration and diplomats as to whether affixing of the president's signature ended the state of war at the exact moment of signing, or whether the resolution would be held to be in force all of today in view that such acts might not require take that the state of war was ended today.

The view also was expressed by one or two that the state of peace legally would not be considered in effect until the resolution had been deposited in the state department, but almost generally the opinion was held thta the state of war was ended today.

The next step, it was pointed out would be the issuing of a formal peace proclamation, which could be expected within a few days. This, it was added, would be a mere formality and in its effect would date from today. The proclamation, it was explained would be by President Harding and signed also by Secretary Hughes.

treaty of peace then will be negotiated, it was said, but the administration is understood not to have developed the steps by which it will undertake such negotiations. The signing of the resolution, it was added, opens the way for resumption of diplomatic relations between the United States and the former enemy powers, although it has been indicated that the manner in which this will be approached has not been determined.

The issuing of the peace proclamation as of today, it was pointed out, would operate to terminate war time laws which have not previously been repealed by congressional action. Among the more important are the trading with the enemy act and the Liberty bond act.

FOREIGN MINISTERS CONFER

By Associated Press.

RIGA, July 2.—The Esthonian and Letvian foreign ministers are conferring at Wark, Esthonia, over the preliminary arrangements for a meeting, which it is expected will lead to the formation of a Baltic triple union. Lithuania would be the third party to the union.

HAMON OIL ESTATE IN TEXAS SOLD

Oklahoma Operator Acquires Holdings of Late Committeeman.

By Associated Press

OKLAHOMA CITY, July 2.—Purchase of the entire estate in Texas of the late Jake L. Hamon, comprising approximately 600 acres of oil and other lands in Comanche, Stevens and Eastland counties, was announced here today by J. B. French, a local oil man, for a sum he estimated at $300,000. Mr. French announced his purchase after completion of the sale from Frank L. Ketch, administrator for the estate of Hamon.

The property includes the towns of Jake Hamon, Ed Hobby and Beck Walker, as well as the railway built by Jake Hamon when he started developments in Texas, according to French. Population of the three towns, connected by 108 miles of railway is approximately 3000, with a total of about 4400 lots, Mr. French stated.

GRANT NEW TRIAL TO WEALTHY MAN ON THEFT CHARGE

By Associated Press.

MICHIGAN CITY, Ind., July 2.—Charles Bedford, son of a prominent Brooklyn family, who was sentenced to the penitentiary following his plea of guilty to the charge of stealing an automobile, today was granted a new trial and held to the October grand jury.

Young Bedford's father is the son of Edward T. Bedford, Brooklyn capitalist and club man and a cousin of A. C. Bedford, chairman of the board of directors of the Standard Oil company of New Jersey.

Attorneys representing Bedford appeared before Judge Crumpacker today and filed an affidavit setting forth that Bedford is not mentally competent to enter a plea of guilt or otherwise and the court then granted a new trial.

WEBB WILL WORK FOR ENFORCEMENT MEASURE

By Associated Press.

AUSTIN, Texas, July 2.—Atticus Webb of Dallas, superintendent of the anti-saloon league of Texas, while in Austin today said that he expects to be here during the coming special session of the legislature to lobby for Governor Neff's law enforcement bill, the bill that proposes to give the governor more power in removing officers in Texas.

SIBERIANS APPEAL FOR AID AGAINST JAPANESE

By Associated Press.

RIGA, July 2.—The government of the Far Eastern Republic of Siberia says a Moscow dispatch today has appealed to the Russian soviet government for aid against the Japanese and the counter revolutionary forces. Several armored trains and other war materials will be sent to the far eastern republic, the dispatch adds.

A Moscow official radio dispatch today appeals to all communists to aid in the struggle against the "Japanese internationalists."

LINES DRAWN IN FIGHT FOR OIL SCHEDULE

Proponents of Petroleum Tariff Prepare for Finish Fight With Strong Opposition.

Led by Mid-Continent Association, Independent Interests Hopeful of Passage of Providing Import Tax.

By B. N. TIMMONS,
Record News Staff Correspondent.

WASHINGTON, July 2.—Proponents and opponents of the tariff on Mexican crude and fuel oil refused to take a day off today and lines were being laid for a battle royal to keep the petroleum schedule in the administrations tariff bill.

The six outstanding developments of the day were, first, oil tariff advocates are still far short of enough votes on the republican side to put the schedule through on the floor of the house. Democrats are being urged to support the schedule on the ground that they can consistently do so, inasmuch as it is not high enough to be protective, and is really a tariff for revenue schedule.

House Republican Predicts Defeat.

Second, Congressman Ira C. Copley, republican of Illinois, a member of the ways and means committee, said that the oil schedule would be knocked out on the floor of the house by an overwhelming majority.

Third, American steamship owners association announced that they would have a strong committee here to argue against the petroleum tariff on the ground that it will put an additional burden on the American merchant marine by raising the cost of bunkers approximately $1.75 a ton. Most of the fuel used to bunker American ships has been imported from the oil fields of Mexico, although a considerable quantity of fuel oil comes from Oklahoma and Texas.

Fourth, Omer K. Benedict, of Tulsa, representative of the Mid-Continent Oil and Gas association, announced that it is hoped before the bill is finally passed to raise the import duty of 35 cents a barrel on crude and 25 cents on fuel. Benedict said the import tax placed on petroleum by the ways and means committee is inadequate, but a step in the right direction.

Artificial Gas Rates Will Raise.

Fifth, officials of the American Gas association started telegrams to members of congress from cities telling them that the price of artificial gas to the consumer should be raised if the tariff goes through. The gas industry consumes annually about 24,000,000 barrels of gas oil.

Sixth, Standard Oil Company of New Jersey, which has a contract to supply the United States shipping board with 17,825,000 barrels of fuel oil, has notified the board that it will not longer include Mexican crude oil in its shipments to the board, but will hereafter substitute American produced oil.

Not to Try for Higher Rates.

Oil tariff proponents today had about concluded to leave well enough alone in the house and not try to raise the schedule there. It will be their strategy to try to get enough democratic votes to offset the anti-petroleum tariff republicans led by Longworth, Racharach, and Copley. If they can finally muster ehe votes to win the house the independents will try to get the levy raised in the senate.

There is no doubt that the Mid-Continent Oil and Gas association will fight the matter through until the last. Although the outlook for an oil tariff when the bill becomes a law still is dark, it was much more gloomy before representatives of the association in an eleventh hour drive succeeded in having it put in the bill. So that it might be given a tryout on the floor. Much credit for this result is due to Omer K. Benedict, the association's representative.

Powerful republican newspaper opposition to the oil tariff began to manifest itself today. The New York Herald, owned by Frank A. Munsey, said:

"Insofar as it threatens to draw in this country dry of its already rapidly disappearing oil supply with a dam against the inward flow of foreign oils when oil has become as cardinal a necessity to our national power as coal or steel, the Fordney tariff bill is rank stupidity."

NEFF GOES TO COAST TO BEGIN SPEECHMAKING

By Associated Press.

AUSTIN, Texas, July 2.—Governor Neff left tonight for the coastal regions preparatory to going to Palacios to open his speaking campaign of next week in behalf of his program to be presented to the special legislative session. He speaks at Palacios at 11 a. m. Monday and at Wharton at 3 p. m. He will make five other speeches during the week. He will visit friends on the coast before going to Palacios.

HUN FREIGHTER PUTS IN AT RUSSIAN PORT

By Associated Press.

RIGA, July 2.—Moscow reports that the first German commercial vessel to arrive at Petrograd since the war has reached there with ninety tons of agricultural machinery.

URGES EARLY CORRECTION OF DEFECTS

MILWAUKEE, July 2.—The need of early correction of defects as shown by the somewhat astounding results of the draft examinations and the nation wide interest in child health aroused by the Children's Year program, are the outstanding causes for the growing interest in child health, Dr. Ada E. Schweitzer, of Indianapolis, told the National Conference of Social Work here today.

Dr. Schweitzer is director of the division of Infant and Child Hygiene of the Indiana State Board of Health.

"The number of states having divisions of Child Hygiene in 1918 was eight," Dr. Schweitzer said. "By 1921 the number had increased to thirty-eight. Legislative authority for the establishment of Child Hygiene division has been supported by appropriation in all except two or three cases. In general, appropriations for this work vary from $500 to $125,000.

"A general purpose and plan of work is common to all states. Each seems to have adopted certain minimum standards of care for mothers and children and each is trying to educate the general public and to secure the establishment of its standards in all the communities under its jurisdiction. The working plan of the older divisions, especially that of New York state is the basis of that of many other states.

"In several states, the law forbids persons affected with communicable or hereditary disease to marry. Provision for the enforcement of such laws is for the most part inadequate. The protection of society generally against the parent-hood of the unfit needs to be given serious and intelligent consideration. A predominate degenerate and feeble minded persons in any community is by no means desirable, yet unless stringent measures are undertaken, will in some places be inevitable. Connecticut, Colorado, New York and Indiana are working along these lines.

"Funds for research on Child Health problems to be undertaken by state universities are being provided. Incidentally the better education of farmers is having a reactionary influence in rural districts.

"Scientific farmers are demanding scientific knowledge of child bearing and rearing.

"The outgrowth of this movement is the establishment of general clinics, eye clinics, vision conservation classes, dental clinics, tonsil and adenoid clinics, physical education and orthopedic clinics, open air classes, nutrition clinics, hot noon lunch, milk lunches, classes for retarded children and now on the rate of intelligence tests. New York and New Jersey have undertaken practically all this work. Illinois is specializing in orthopedic clinics for crippled children, but include many other of these institutions in the larger places. California and Ohio have done much. In Indiana, the work is not uniformly distributed.

"In all the school work, full time nurses and physicians are needed, but much is being done in many progressive communities without such service because of the difficulty of procuring trained workers. South Carolina and Mississippi are sending nurses to be trained in public health schools. The practice of holding model health conferences is yielding most satisfactory results, in New York, Massachusetts, Kentucky, North Carolina, South Carolina, California, Texas and Indiana.

"Colorado through its health centers is caring also through the community group for delinquency, truancy, recreation and other things affecting the health of children. The state has learned the secret of turning over to special organizations the work belonging to each organization.

"In Louisiana, a medical lecturer works jointly with the Bureau of Child Health and the Bureau of Venereal Diseases. Texas is divided into five districts with an advisory nurse in each district.

Provisions for pure milk supply are made in Rhode Island, New York and other states.

The chief need is better organized child hygiene divisions in state health departments, having county or district units. To these departments all questions relating to child health should be referred.

Uniform standards of growth and nutrition should be adopted.

FRENCH THINK PEACE MENACED BY CAPITALISTS

PARIS, July 2.—The alliance of great powers that wrested victory from Germany is going to pieces through perfectly natural causes, and despite all the efforts of statesmen to keep it together.

This is the opinion of Paul Louis, former chief editorial writer of the Matin and one of France's most brilliant publicists. He sees no hope for an end of the European chaos until the new process of transition is over.

"The idea that governments are in love with each other is one of the pleasantries of the day," writes Louis. "Alliances are formed with definite business objects, and when these objects are achieved the alliances end.

"The business of the alliance of 1914-17 was to defeat the Central Powers, and it did it. But now this capitalistic alliance is divided, as we see each day. England and Italy, that is, their governments, think differently than France on the question of the Ruhr and Upper Silesia; England and the United States dispute about oil.

"In 1914 the mine owners, the steel interests and the shipping interests of England feared German competition, and that is why they lent their aid to France. The government of Italy, in 1915, and the government of Rumania, in 1916, wished to profit by the circumstances to take cities from Austria and Hungary. But today Italy needs no more Austrian territory, and England thinks it is time to renew commercial affairs with Germany. That explains why England and Italy do not see the same way as France in affairs touching the Central Powers.

"It is the competition of the antagonistic interests of capitalists which is causing this evolution in the affairs of Europe. The present system causes only insecurity and instability, for nothing stable for the peace of the world can be founded on the interests of one class."

Scout Courier

BY THE RANGER SCOUT

EDITORIALLY SPEAKING.

The practice of using the scout uniform as a method to obtain a lift when on a hike should receive the condemnation of every boy scout. Numerous complaints are being made all over the country of scouts asking for a ride while hiking on the strength of their uniform. That is not hiking, and any scout so debasing his uniform should have it removed from him and dismissed from scouting.

The scout who practices such is not better than the hobo who steals his ride on autos and trains. Such a practice is nothing less than hobo hiking. No good scout in Wichita Falls would ever allow another fellow to get away with that sort of a thing.

Let's put a stop to hobo hiking around Wichita Falls. No fellow would do that thing even if he wanted to ride, if the scouts would condemn hobo hiking. Watcha say, fellers?

"SIX" HAS BIG TIME.

Troop Six put the "ong" in song and the "ep" in pep at their meeting last week, at which time the mothers served the scouts great big dishes of ice cream and cake. Troop Committeeman Fred Goss was there with a very instructive talk on the eyes.

He told the scouts of many ways to remove articles from the eyes. To put it right, we will say, he gave something to think about and spoke straight from the shoulder. Mr. Goss promised another talk on the eyes at which time he will tell us how to remedy many of the defects of the eye, and other interesting things.

Pep just seemed to ooze out of us, we sang some new scout songs, and yelled so loud that the neighbors came to see what was the trouble. A few more lessons in the melodious art and we will lay claim to being the singing troop in Wichita Falls.

Moving pictures enacted by the scout furnished the big fun on the program. Most of the scouts were a bit backward at trying out their dramatic qualities, but later on when the stage fright is removed, real talent will burst forth among the scouts of troop.

At a late hour the mothers present furnished us with heaping dishes of ice cream and cake. Of course, we enjoyed that part of the program best of all.

CLAUDE HARRIS, Reporter.

HAVE YOU FORGOTTEN?

Say fellers! Have you forgotten the efficiency contest? Well, sir, according to the scout executive, the efficiency contest is still running, sometimes. Of course, you have been busy with the summer camp, etc., but now that all those things are over let's get back to the efficiency contest and make things hum.

At the present reading, troop six is leading by a small majority. You may not know just where you stand in the contest, neither do we; but next week's Courier will carry the standing of the troops.

The present contest ends July 1 and a new one begins then. Come on! Get busy, and be primed for a good start in the next race.

The winner of each contest will receive a pennant to be held in trust until some other troop takes it away from them. Any troop winning the flag three times in succession can keep the old rag. If your troop has not a fine flag, here's your chance to win one. Toot! Toot! Full speed ahead.

SUGGESTED PROGRAMS

Scoutmasters have many things to rack their brains for a program for the weekly meeting. Realizing that fact, we will offer each week some suggestions to put on your programs.

One big thing to remember is to give the scouts variety. It is a psychological fact that it is near to impossible to hold the attention of normal boy of twelve or thirteen years for more than twenty minutes on one subject. Whatever you are doing, do it in that amount of time, and then change to something else. Every scout likes a surprise, so it wouldn't hurt to have a surprise up your sleeve each meeting.

Here's our first offering—7:30 p. m.—Fall in and five minutes of setting up exercises; 7:45, roll call, pledge to the flag and collection of dues; 8 to 8:30, Games, one of these games should pertain to some phase of scouting; 8:30 to 8:50, Business session; 8:50 to 9:10, Talk on some 9:30, Closing exercises.

He came back and we piled in evphase of scout oath and law; 9:15 to

Some scoutmasters have put over many interesting meetings, others have not. You who have night, tell those who haven't. Nuf Sed! Any suggestions kindly received.

HOW! HOW!

Promiscuous in its use among scouts is the greeting sign of the Indian, How! How! In fact, this greeting sign is now used by scouts all over the world. It is supposed that Ernest Thompson Seton, former chief scout of America started and fostered the use of this word as a greeting sign among boy scouts. Whether or not that is so, we cannot say. Seton is possibly the greatest American student of Indian life. He has spent many years among them and we know he wants to give to the scouts many of the good characteristics of the Indian.

"How! How!" was the message of good cheer the Indians gave Roger Williams when he settled in Rhode Island. It is a message of peace, a message each scout should convey to his brother scout, and I heartily recommend that each troop in Wichita Falls adopt this as the greeting sign of scout to scout.

THE SUMMER CAMP.

Beginning with this issue of the Scout Courier, we will print a short story of the annual boy scout camp in the Wichita mountains written by Scout George Bolin of Troop One.

George was there with the advance guard and stayed until the last note was sounded. George's story is good. I won't tell you about it, so go ahead and read it for yourself. Here goes:

"Early on the morning of May 13, 1921, a group of khaki clad boys collected on the vacant lot next to the Wichita theater. The sun had just awakened to light the world with its radiant rays. As the sun climbs higher, the group gradually dissolves into eighteen boys, each dressed in neat fitting uniforms, on their backs are strapped well filled knapsacks, over their shoulders are rolls of blankets, and at their side is the trusty scout axe, the canteen and the mess kits.

"Yoh guessed it right, Boy Scout! They are the advance guard of the boy scouts of Wichita Falls all set for their two weeks outing in the Wichita mountains of Oklahoma. After waiting patiently for two hours, we were rewarded by the arrival of Mr. Taylor, the scout executive, with the scout truck. He told us to wait a few minutes while he went to get a truck load of "eats." This time our wait was only one hour.

for some room, and getting none. We bid farewell to the city that faith built," and without mishap man-

He came back and we piled in everybody crowding the other fellow aged to reach Burkburnett safely. At Burkburnett four of the scouts changed cars to a Ford and ambled along ahead to show us the way.

The trip to Crateville park was safely negotiated, arriving there about 3 p. m. Everybody unloaded quickly, glad of the chance to stretch our cramped limbs. A camping site selected soon gave signs of activity and a tent was erected.

After taking stock of our commissary, the absence of bread was noticed. There was no bread nearer than Lawton, sixteen miles away, and a boy scout camp without bread is like a fish without water. They're just gotta have it! Mr. Taylor, Mr. Clark and myself were the ones selected to make the trip to Lawton.

Arriving at Lawton, we purchased a supply of the "essence of life," eat our supper and left for Medicine Park, where some equipment was stored from last year's camp, about sun down. It was dark when we were loaded and ready to make the trip back to camp. We were going along at a pretty good clip when all at once, Mr. Taylor threw on the brakes and stopped the car with a jerk.

We got out to investigate, there not ten feet in front of us was a sheer drop of twenty feet, a bluff where there should have been a bridge. It seems that the old Medicine creek had once gotten on a rampage and washed away the bridge, and it had never been replaced. Not a sign of a barrier or red lantern was there to warn the travelers. It was a narrow escape.

The truck had to be backed for a quarter of a mile to the main road as there wasn't room for us to turn around. Mr. Clark laid some planks across the road to warn anyone coming that way. The darkness of an Oklahoma night closed in around us, as if to block our progress. By the light of the truck we forded Medicine creek, and picked our way along the roughest of rough roads imaginable. For five miles we bumped along until at last we reached the Mace road which happened to be a good one. We sailed into camp in great style, all safe and sound.

After a consultation, we agreed to lay claim to being the first to travel from Medicine Park through the mountains to Crateville. So far as I know, our claim is valid.

Soon after reaching camp we were all slumbering on our cots. The soft patter of rain drops upon our faces caused a grand rush for the lone tent. The tent and truck was very crowded but in some manner we managed to hold the fort until morning. The rain ceased in time for us to prepare breakfast. To smell the aroma of frying bacon and breathe the pure mountain air convinced us all that there was no place like God's great out-of-doors.

A day full of hard work preparing the camp for the main body of scouts held no fear in our young hearts. We tackled the jobs with jest. The camp was prepared, and late that afternoon Mr. Taylor left for Wichita Falls after giving us specific instructions as to what Mr. Frank Rush, the warden of the Wichita forest reserve, expected the scouts to do. We were all to be special rangers. We were to report anyone seen with firearms in the park and never under any circumstances to cut down green timber.

With those instructions, Mr. Taylor was gone. We were left to amuse ourselves until the main body of scouts arrived in camp.

(To be continued.)

ENGLAND TESTS HELICOPTER PLANE AMID SECRETNESS

LONDON, July 2.—Extraordinary are the precautions being taken by the authorities to keep the secret of the new "helicopter"—the "hush-hush" aircraft designed by Mr. Louis Brennan, the monorail inventor.

The machine is now undergoing tests at Farnborough Airdrome. This remarkable invention, which has long been visualized but never previously achieved by aero engineers, possesses two great advantages over the ordinary airplane. It has a direct lift and can soar straight up from any confined space. It can hover motionless in the air like a hawk.

An important problem in course of solution is to prevent the machine from falling into a stone if the engine stops. Principles of gyroscopic control are being applied to solve difficulties of stability while the machine is in actual motion.

Intense military interest is being taken in the experiments. It is believed that a successful helicopter, hovering, if necessary, for hours above any given territory, immensely high in the air and almost invisible, would be a magnificent platform for detailed reconnaissance, while with a very large helicopter, powerfully engined and capable of lifting great weights, it would be possible to send up and maintain in the air at any required height "aerial forts" which might be used with demoralising effect against an enemy.

The success of the new invention is said to be assured and experimental flights are to take place shortly.

Strange Death Solved.

SYRACUSE, N. Y., July 1.—The strange case of the death of Margaret Marie More, twelve, on the day which she, three days previously, had predicted, has become known. Stricken with a severe heart attack while watching a baseball game the girl became delirious, during which state she repeatedly named the day on which she would die. It was Wednesday, and on that day Margaret breathed her last. In her mutterings during her delirium the girl said: "Grandpa is calling me." Her grandfather died three years ago.

PANIC CREATED AS "DEAD" MAN LEAPS OUT OF COFFIN

WARSAW, July 2.—Grand Guignol plays are outdone by a drama enacted at Vilna a few days ago.

An inmate of a local asylum died, and the coffined body was taken in the chapel. Another lunatic who had seen the body of his comrade carried away, stole into the chapel, took the body from the coffin and put it in the cupboard used to keep the church furniture. This done he lay down in the coffin, covered himself with a shroud and fell asleep.

A few hours later a priest arrived and conducted a requiem service. When it was finished, bearers lifted the coffin to take it away for the burial. The motion woke the madman, who jumped out, struck one of the bearers a blow on the head and ran away. The bearer collapsed and died from fright, while the priest and the others fled panic-stricken.

Their cries brought a crowd to the chapel entrance. Eventually some of the bravest ventured inside to ascertain what had happened. They found an empty coffin and a dead man on the floor and naturally put the corpse into the coffin. They then began to search for the shroud which the madman had taken away with him. One of the searchers opened the cupboard in the hope of finding something fit to cover the body. Directly he did so the hidden dead man fell on him head first and knocked him down.

The live man fainted from fright and panic again filled the chapel, the crowd rushing out and scattering through the city. It was only after several hours' work by the police that the matter was cleared up and popular excitement subsided.

County Officers and Rangers Report Oil Fields Peaceful

"Everything quiet."

Such is the usual reply of county and range officers to queries as they return from their daily inspections of the oil fields of this county and those immediately adjoining.

Apparently the days of killings, wide open gambling, shooting affairs and other hazardous forms of industry and amusement in the oil fields are over, according to Sheriff Smith and J. W. McCormick, ranger sergeant in charge of this district.

Six months, a year, or two years ago it was a dull week in which there was at least not one serious crime committed in or near the oil towns within a short distance of this city. The usual Sunday shooting or cutting scrapes to which local hospitals looked forward to and regularly prepared are also no more.

Seven months ago when Sheriff Smith went into office he started out with a force of eight and nine deputies and the lawless element of the county, mainly confined to the oil fields, kept them busy night and day. The force has been reduced to four deputies and Sheriff Smith announced that no appointment would be made to replace the deputy who resigned last week.

"We find little but small gambling games and here and there the evidence of a still in operation," says Sheriff Smith regarding the trips of his department to the oil field.

"The oil fields of this section are on their good behavior," also declares Sergeant McCormick of the rangers, and then adds, "at present."

BRITISH MINISTER ANNOUNCES RAISE IN MARRIAGE FEE

LONDON, July 2.—That age-old suspicion that the most of the dope of Beatrice Fairfax and other "advisers to the lovelorn" is really shoved into print by various mere men, in overgrown beards and shirt sleeves, tongue in one cheek, gets a jolt.

Maybe it's the ministers.

A minister of the gospel, to the village of Foxley, pens an announcement which brands him an adept. If he hasn't been conducting an advice-to-lovers column, Northcliffe, the British super-publisher, should send one of his bright young men immediately to sign a contract.

The high cost of being married has been increased by an addition to the cost of getting married.

The Rev. H. L. Warneford makes the announcement as follows:

"The Ecclesiastical Commissioners have raised the fees for marriages. The clergyman's minimum, which used to be $1.60 (to translate), or thereabouts, is now $3.38.

"Let us hope this raising of the fee will not make the swains in our parishes more shy, more hesitating, more cool and calculating.

"If it does, then the village maidens must rise to the occasion and see to their charms and show the stern and faltering by extra arts and blandishments, by an offensive more bewitching and coy, that they are well worth the extra $1.78, and a good deal more into the bargain."

It is not recorded whether the emigration of the village swains has started.

CAT CAME BACK IN FREIGHT CAR

SAN FRANCISCO, July 2.—The cat came back.

And be it said Thomas came back in style.

He was only an alley cat a few months ago. Now he's famous. He's in the movies and his name has taken up good space on the cables. This is how it all came about:

Pickings were lean in Detroit early in January and Thomas—who was nameless then—climbed into a big crate on a foraging expedition. Just then there was a loud bang. Prepared for any emergency he crept deeper into his hiding place.

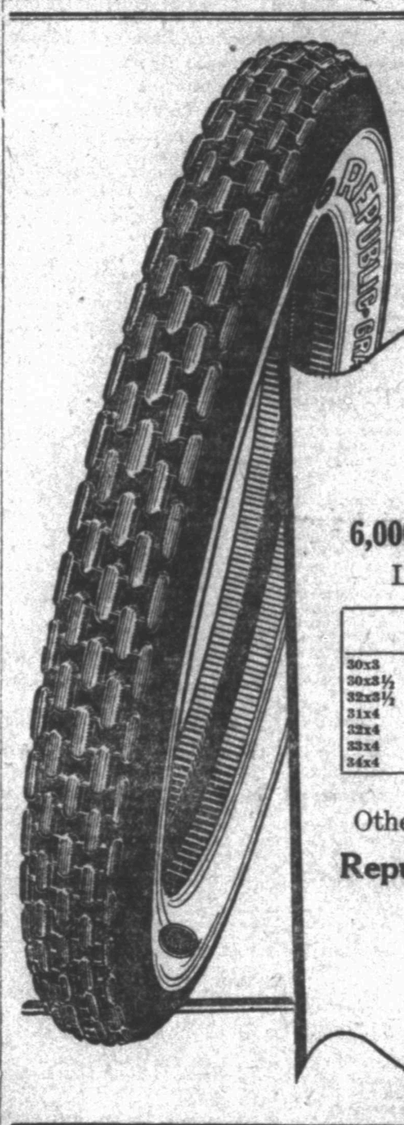

All was darkness and there was much commotion, but Thomas was too afraid to move. After an indeterminable time all was still. Thomas looked around and found that he had been securely nailed in with an instruction book on how to manage an automobile. He was jailed in a crate protecting an automobile.

The weary weeks passed. He licked the grease around the edges of the crate. He ate the instruction book and some of the trimmings.

There was only a quiver of life when the big crate was opened in Sydney, Australia, and the automobile taken out. Curled up and almost lifeless, eyes glazed and coat rough and unkempt, the cat was found.

Only careful nursing restored Thomas. He was named in honor of the machine in which he had taken his mealless voyage of seven weeks, half across the world and over two oceans.

Thomas had become valuable. He became the pet and pride of the automobile company after whom he is named. He has been filmed and photographer, dined and feted. Insurance of $5,000 was taken out and a passport secured for his return trip to America.

EVERYTHING SET FOR SHRINE PICNIC AND COUNTRY FAIR AT CALL FIELD INDEPENDENCE DAY

After weeks of preparation and earnest search in all parts of the country for new and original features, the commitee on arrangements for the big Shrine basket picnic, country fair and all day celebration at Call Field, July 4, announces that everything is "jake" for a general good time. Julian Montgomery, chairman of the committee and his co-workers are said to have a number of suprises to pull on this occasion.

The celebration will start with a concert by the 50 piece Shrine band at 9:30 a. m.

This is the organization, reputed to be one of the best in the state. The last rehearsal for the concert will be held this afternoon at the Masonic temple.

Luther Hoffman will make the address of the day following the welcome by Potentate W. D. Cline, at 10:00 a. m. This talk, so it is said, will take up 20 minutes time and will be along patriotic lines.

"Battle Royal" and Race

At 10:45 a. m., a "battle royal" will be staged instead of the polo game as previously announced. All of the contestants in this number will be members of the Maskat Temple Divan, and can be identified by their names being printed in large letters on their backs. The referees for the "battle royal" will be, according to the announcement, E. M. Mann, George Keith and C. C. Randle.

Following the "battle royal," a five minute Ford race will be given at the polo grounds. There will be no limit to the entrants in this race, the announcement states, and everyone is requested to bring their Ford even if they wear it as a watch charm. The referee for the race will be a prominent snake charmer of the temple.

At 12 o'clock noon the basket picnic will be held in Hanger No. 8.

The second band concert will be given at 1:30 p. m., and at 2:00 p. m., the races and athletic contests will start.

Program for Races

The following program has been arranged for the races, under the direction of Sid A. Gaines, said to be by far the "smallest man in Wichita County."

The first race will be the Potentate and Divan race of 100 yards. The prize for this race will be a full keg of 20 penny nails, to be donated by the "Bogus" Hardware Company.

The next race will be the "Fat Man's" race. The entries for this race must weight over 200 pounds, and the race will be 100 yards. A case of Budweiser, donated by the Peoples Ice Co., will be the prize for this contest.

The third will be a potato race, for ladies only; 25 yards. The first prize will be a white Maskat Fez, donated by Maskat Temple, and the second prize will be a package of groceries donated by Griggs grocery company.

The next contest will be a Tug of War, between married and single men. The prize will be a box of cigars, donated by the Wolfson Cigar company.

Fifth, will be a sack race for boys under 16; 25 yards, and the prize will be a flash light donated by F. A. Hardy & Co.

Sixth, there will be a free for all 220 yard race; first two in each heat for finals, and the prize for this event will be a shirt donated by W. B. McClurkan & Co.

The seventh will be a shoe race for boys under 16; 50 yards. The prize will be a knife by the Art Jewelry Company.

The eighth will be a 100 yard race for girls under 18. First prize will be a bathing cap, donated by Winston Drug Co., and the second will be a bottle of toilet water donated by Sansbury Drug Co.

The ninth will be a 100 yard race, free for all. First two in each heat for finals, and the prize will be a straw hat given by Anderson's.

Tenth, there will be a 400 yard relay; boys over eighteen, single men and married men. The prize will be a case of red soda water donated by the Coco Cola Co.

The starters for the races will be Tom Wynn, with Moon and Husky for clerks of course.

The judges for the races will be N. O. Monroe, Guy Rogers and Martin Rowe.

Ball Game

After the races, at 4:30 p. m., a ball game will be played between the Scottish Rite Masons and Knights Templar under the direction of Frank Collier. The manager of the Scottish Rite team is J. A. Gardner, and for the Knights Templar team, Uriel H. Griggs. There are about 30 good ball players in these two organizations, and it is very evident that a good game will be played.

Dr. N. F. Grafton, both a Scottish Rite and Knight of Templar, of the First Presbyterian Church, will umpire the game, in neutral fashion, it is said.

After supper at 6:00 p. m. promptly at 8:00 p. m., dancing in the Shrine auditorium will begin. The music for the dance will be furnished by Joe Ward's 50 piece Shrine band.

In addition to the regular program there will be horseshoe throwing, providing amusement for the older Masons, and pony riding and other entertainment for the kiddies. There will be doll racks, cane racks and lots of other things for the amusement of those who care to spend their time in that way. The new Maskat Shrine Kewpie doll will take the eye of the children and can be obtained at one of the patrol booths. The new Shrine paper hat, which can also be obtained at one of the patrol booths, will be very much in evidence.

will not be a dull moment from the opening to the close of the event.

The decorating committee began functioning this morning. Show windows are being trimmed expressing the sentiments of the day, and awnings and streets are being bedecked with flags and bunting.

Unusual interest is being taken in the parade which will open the celebration at 10 o'clock on the morning of the Fourth. Decorated floats and automobiles representing the different business enterprises of Baylor county will help to make it one of the most elaborate ever staged here.

Another Problem Still Unsolved.

It begins to look as if that oil in Holland isn't going to supply the answer to what to do with discarded American barrels.

CONVIVIAL LIFE VOGUE IN BERLIN

BERLIN, July 2.—Sunday performances of "Paradise Lost" are being staged by the Berlin police, who are making mammoth raids on Tegel forest, Berlin's Garden of Eden, where amateur Adams and Eves disrobe and loll around on Sunday afternoons in regulation pre-apple Eden costume.

Berlin police surrounded the woods and carefully combed through it, rounding up dozens of followers of the Paradise sect who had removed their annoying clothing because of the heat. Summary orders were given to dress and collection of primitive humanity assembled where a police inspector arrested the worse cases and freed the others.

Amateur Eves cannot be disturbed, however, as soon as they can secure an engagement in a "Beauty Ballet," which is the main attraction of the majority of Berlin's night-life cabarets and cafes. Since the revolution censorship has been abolished and the police can interfere to stop nude dancing only when a civilian has complained that the naked dancing has offended his sensibilities.

Season Scenery

The Berliner Tageblatt in an editorial attacking the "Nude Dancers" says: "In our favor it must be said that the best patrons of the natural ballets are foreigners, especially the French officers taking a lively interest in the beauty ballets. But it it disgraceful that twelve to fourteen-year-old boys and girls are permitted to see these performances. The parents of children should at least refrain from taking them with them."

The most pretentious of the Eve dances is the Natural Ballet in Berlin's largest vaudeville theatre, the Apollo, where twenty-six charming maidens wriggle aesthetically to music intended to represent the four seasons. The scenery changes for each season, but summer or winter the chorus is protected only by flowers painted on the body at appropriate places with grease paint. This is shown between acrobatic and magician acts at Berlin's "Family Theatre."

SEYMOUR READY FOR JULY 4TH

Special to The Record News.

SEYMOUR, Texas, July 2.—Final details for the big two-day celebration here July 4 and 5 are being completed. Another 100 foot wing of bleachers have been erected at the rodeo grounds making a total seating capacity of 3500 and high diving platforms have been built at the swimming pool. Wild horses and steers have been secured for the riding contests and goats and calves for the roping. Beeves are on hand for the big barbecue on the last day.

Entries are already being received by the rodeo committee and some of the best talent in the state will be in attendance. Substantial premiums are being offered in all contests and the fair association promises there

TOWN TOPICS

Miss Maxine Ritchie left Thursday night for her home at Houston after spending several months the guest of her sister, Mrs. B. A. Riddles, at 1212 Kemp boulevard.

Mrs. J. J. Perkins, accompanied by her small daughter and Misses Rachael Timberlake and Thelma Wulfjen, will leave Sunday evening for Colorado Springs, where they will spend the remainder of the summer.

Lloyd Weaver left Saturday evening for Fort Worth to spend the week end and attend the Spudder-Panther series, beginning Sunday.

Arthur Fontaine left for South Bend Friday. He will be connected with the Wichita Southern railway there.

Kenneth Knickerbocker returned home Friday from the Oklahoma harvest fields.

Clifford Sommers returned home Friday from the Oklahoma harvest fields.

Mr. and Mrs. P. S. Richardson left for Fort Worth Saturday evening to attend the Spudder-Panther game.

Mr. and Mrs. Henry Welsh will attend the Wichita-Fort Worth baseball game at Fort Worth Sunday.

Mr. and Mrs. O. B. Monross, 1308 Tenth street left for Fort Worth Saturday evening to attend the Spudder-Panther baseball game.

R. J. Marin, who is connected with the men's clothing department of Baum and Gardner, left Saturday morning for Detroit, where he will spend a two months' vacation with friends.

Mrs. Howard T. Leich arrived Saturday morning to be the guest of Mr. and Mrs. Dick Wheeler until her home is finished. Mr. Leich is connected with the Wheeler Produce company.

Dave Kamen of Electra arrived Saturday evening to be the guest of friends in the city over Monday.

W. C. Hilburn, who is in charge of the watchmakers' department at Dave Paul's jewelry store, left Saturday evening for Dallas, where he will spend Sunday and the fourth with friends.

Dave Paul left Saturday evening for Oklahoma City to be the guest of friends on the Fourth. He will celebrate his birthday and the Fourth at the same time. His age hasn't been divulged.

Mike Kamen left Saturday evening for Dallas on a week's business trip.

W. H. Street left for Dallas Friday night to spend the week end with friends there. He will be in Fort Worth Sunday to root for the Spudders when they play the Panthers.

Maron Smith of Dallas is a business visitor here over Sunday.

Verna Leggitt, who is connected with the Wichita State bank, left Friday for Arkansas on his vacation.

Seton Barnes, who has been visiting in the city with friends, will leave Sunday for his home in Dallas.

Word was received Friday that H. H. Bray and family are now at Canyon City awaiting a change in the condition of the roads, which were reported to be impassable. Mr. Bray and family left here Monday for California to make the trip by automobile.

George Herron, who is connected with Baum and Gardner, will leave Sunday for Colorado, where he will spend his vacation. Mr. Herron is traveling by automobile in company with a number of Wichita Falls business men.

Sidney Vaughn was a business visitor to Vernon Saturday.

Mr. and Mrs. Rene Allred, accompanied by Mrs. Allred's two sisters, left Saturday for Bowie to spend the week end with relatives.

Mrs. S. J. Potts, 1300 Polk street, left Saturday for Austin, where she will be with her husband, who is now doing graduate work at the University of Texas. Mr. Potts is a former teacher in the local high school.

Mrs. Charles Preston, 807 Austin street, underwent an operation at the Wichita General hospital Saturday afternoon. She is reported to be resting very nicely.

Miss Elsie Cohen and Miss Lily Finburg left for Fort Worth Sunday to attend the Panther-Spudder ball game.

Harry Ulchun and Joe Max will leave Sunday morning for Fort Worth to attend the ball game.

The local office for the Rock Island lines has been moved from the Morgan building to room 204, American National Bank building. Leland D. Trice, traveling freight and pasenger agent, is in charge of the local offices. This office serves the pepole of the city in furnishing tickets and routings for those desiring transportation over the Rock Island lines.

Miss Anna Goldfarb of Fort Worth returned to her home Saturday after a two week's visit with Miss Eva Blank.

Ward Paylor, who is connected with the Wichita State bank, left Saturday for Fort Worth.

Miss Alice Schleymeyer left for Fort Worth Saturday to visit with her mother.

Miss Alberta Sonn of Mangum, Okla., stopped off in the city with friends Saturday en route to Fort Worth to be the guest of friends.

Mrs. V. N. Armstrong left Saturday for a trip to her home at Bedford, Ind.

Harry White went to Fort Worth Saturday to attend the Sunday baseball game there.

Mr. and Mrs. P. G. Putty went to Fort Worth Saturday to attend the Panther-Spudder series.

C. A. Kleinman left for St. Louis Saturday afternoon on a business trip.

D. D. McIver was a business visitor in Electra Saturday.

Miss Goldie Moore of this city returned Saturday from a visit to Fort Worth and Mineral Wells with friends.

Miss Jewell Graham of Temple, Oklahoma, returned Saturday after visiting with her brother, Brownlee Graham.

Mr. and Mrs. C. E. Miller will leave for Colorado Sunday to spend the summer.

Miss May Frensley left Saturday for Fort Worth to be the guest of her uncle and family for the week end.

Jack Breelin left for Fort Worth Saturday evening to attend the tennis tournament to be held at Fort Worth this week.

Roy Graves left Saturday night for Fort Worth to attend the Panther-Spudder series.

Dempsey Knocks Out Carpentier in Fourth

CRUSHING RIGHT SWING SHATTERS ASPIRATION OF POILU IN FOURTH

By Associated Press.

RINGSIDE, Jersey City, July 2.—Jack Dempsey is still heavy weight champion pugilist of the world. A crushing right swing from the fist of the American fighter shattered the titular aspirations of Georges Carpentier in the fourth round of the so-called "battle of the century," here this afternoon. The pile-driving blow landed flush upon the jaw of the Frenchman, flooring him for the second time in a trifle more than a minute of fighting in the final and decisive round.

Although he had staggered to his feet after the initial knockdown he was unable to survive the second knockdown and was motionless when Referee Harry Ertle tolled off the fatal 10 counts.

Each Blow Counts

Although the knockout punch was driven to Carpentier's jaw the way to Dempsey's victory had been paved by a continual bombardment of blows which landed on every section of the Frenchman's body. Each swing, jab and uppercut, scored to the stomach, ribs and sides, contributed to the slowing up process of the speedy Carpentier.

In addition, a clubbing right which landed flush on the back of Georges' neck in the third round, played an important part in his defeat. The Frenchman folded over in an attempt to protect his body, left the back of his neck exposed and Dempsey with the fair target in front of him, drove down a terrific slam to Carpentier's vertebrae.

After the knockout the Frenchman stated in his dressing room that this punch was the cause of his pugilistic downfall. He said that the punch stung his entire physical and mental makeup, and he was thereafter unable to carry on any effective attack.

"It developed after Carpentier had returned to his training camp at Manhasset, New York, that during his aggressive and effective attack in the second round, the Frenchman had broken his right thumb and sprained his wrist. Carpentier was unable to explain how the injury occurred, but it is thought that it came as result of a hard swing which landed bighon Dempsey's head.

"What effect, if any, this injury to the European challenger's most effective fighting fist had on the ultimate outcome of the battle it is impossible to state. Carpentier was almost entirely on the defensive in the third and fourth rounds, although he did not noticeably avoid using his right hand or arm in blocking or striking out when the opportunity arose.

Carpentier Skillful

Regardless of just which blow caused the vanquishing of Carpentier the Frenchman gave a remarkable exhibition of pugilistic skill and gameness against a heavier and more punishing opponent. The favorite when he entered the ring, judging from the amount of cheering cries, he left the arena with even a greater amount of applause ringing in his ears. A tribute to an exhibition was in every way verified and upheld a record which had preceded him regarding his boxing ability and danger defying work during the world war.

Dempsey as the winner ran true to his fighting form.

Although Carpentier struck the first blow of the encounter, a flying right to the face, Dempsey never at any time backed up or showed a disinclination to avoid trading blows with his opponent. While the champion bored in at every opportunity, he devoted as much of his attention as was possible to close infighting. Rights and lefts were steadily driven home to Carpentier's body, alternated at times by drives, jabs, hooks and cuffs to the Frenchman's face, jaw and head.

Challenger Fights In and Out

For the first round Carpentier did not appear to feel the effects of this punishment. He fought in and out at close quarters, using chiefly a right swing or drive to Dempsey's face and jaw with an occasional shift of the left to the body.

Most of the body blows Dempsey blocked or partly checked with elbows and forearms, but he was not able to protect his face as well.

Time and again Georges shot over his right to Dempsey's face and in the second round when he turned loose the heaviest batteries of his blows it appeared as though the champion might be forced to assume a defensive attitude. The pause in Dempsey's attack however, was due more to surprise and fluster at the savageness of his opponents rally.

Second Carpentier's

After a few seconds of indecision he gathered himself together again and although the round was undoubtedly Carpentier's on aggressiveness and clean blows landed there was not the slightest evidence that Dempsey had been hurt by Carpentier's punches.

He shot out of his corner at the bell for the third round with every evidence of an intention to finish the battle. With a menacing scowl on his dark features, he followed Carpentier about the ring as the latter sidestepped and ducked the lunge and in an endeavor to corner the challenger. Crouching low with body and fists swinging from side to side he crept after Carpentier until he caught him on the ropes near a neutral corner and began the battering which presaged the end.

There was little question in the minds of the more expert among the spectators as to the ultimate outcome.

Carpentier with his speed of foot gone, confidence shattered, blood running from his nose and mouth and a gash over his cheek bone looked like a hunted animal.

Dempsey Without Mercy

Dempsey without mercy and like an avenging nemesis was punishing Carpentier without mercy. The bell at the end of the third round found Carpentier in a semi-helpless condition on the ropes and the gong saved him from a knockout at that point.

The fourth and final round was soon completed and the picture presented by Carpentier on the floor and his stunned handlers in his corner, was in contrast to the supreme air of confidence with which the Frenchman entered the ring.

Carpentier was first to enter the eighteen foot pugilistic amphitheatre at 2:07 p. m. He wore a gray silk bath robe over his white silk trunks and smiled and watched an airplane flying overhead with the utmost unconcern. At 2 p. m. sharp, the champion followed, wearing a dark maroon coat sweater and white trunks Manager Descamps was fussy about the bandaging on Dempsey's hands which was twice as heavy as that which Carpentier himself wound about his own fists. There was little delay in the usual preliminaries to a championship contest and at 3:18 the gong called the men to the center of the ring for the championship battle. Thirteen minutes later the great international match, heralded throughout the world was over, and Carpentier was being half carried, and half dragged to his corner by the police and his seconds. Helpless and groggy and with a blood-smeared face he did not resemble in the slightest particular the super-confident challenger of a few minutes before.

Descamps Sobs

Across the ring, Jack Dempsey sat in his corner with not a mark on face or body. Francois Descamps was ministering to his crushed idol as he sobbed and chattered in French. When finally Carpentier did arise he staggered toward the center of the ring and the police and ring officials seeing his condition supported him while Dempsey sprang from his stool and running to meet his defeated opponent, grasped his hand and congratulated him on his gameness and boxing ability.

A moment later the principals had left the ring and the "fight of the century" had become ring history. In the short period of the contest it was shown conclusively that Carpentier in no way compared to Dempsey as a fighting machine.

Courageous, speedy of foot and with a lightkning-like rapier blow he proved to be a clever boxer with a moderate punch. Against the man killing smashes of Dempsey, all his skill and speed faded away like fog before the sun. It was but another futility of cleverness when opposed to actual fighting. Summed in a few words Carpentier was outclassed when Dempsey persisted in fighting inside the Frenchman's flying arms. Had he elected to try and box with Carpentier the end might have been different. But Dempsey is a fighter and fought the only way he knows how. Against that attack Carpentier, game and skillful as he undoubtedly is, was a beaten man from the start. After the main bout was over the heavyweights, Billy Miske and Jack Renault entertained the remaining spectators with an eight-round contest in which the honors were even.

Round One

Carpentier walked into Dempsey and landed the first blow, a light left to the head. They fell into a clinch and Dempsey battered the Frenchman in the body with short rights and lefts. Dempsey was short with a left to the head, but repeated with a left that staggered Carpentier and made him miss with a right swing. Dempsey landed a left that skimmed Carpentier's nose and drew blood. The Frenchman backed away and missed with a right. Dempsey countered with a left that made Carpentier's knees sag. There was a furious exchange at close quarters and it ended with Carpentier falling through the ropes. Carpentier crawled back, gamely flew at Dempsey and they exchanged body punches in a clinch. Just before the bell Carpentier nailed Dempsey with a left and punished him in the body as the bell rang.

Dempsey's round.

Round Two

Carpentier missed with a left and then landed a hard right to the chin that sent Dempsey reeling to the ropes. The blow apparently disconcerted the champion and sent him back on his heels, but he came back with a terrific right to the jaw that caused a look of worry from the Frenchman's handlers. They went into a clinch and when they were separated Carpentier missed a left to the chin. Carpentier landed a half dozen rights and lefts to the champion's head. Dempsey hooked a right to Carpentier's cheek and split the flesh under the right eye. Blood began to trickle from the gash. Carpentier missed a right swing and Dempsey's right also was short. They were locked in a clinch exchanging punches to the body as the bell rang.

Carpentier's round.

Round Three

Dempsey began crowding Carpentier and the Frenchman backed away. Carpentier ducked a left hook and Dempsey backed him into the ropes, shaking him with a solid right to the chin. Carpentier landed two right uppercuts to the body and the chin. The Frenchman missed a right swing and nearly fell down. Then he reached Dempsey with a long right to the jaw and as he came into a clinch Dempsey clubbed him on the neck with the "rabbit punch." Carpentier led with a left and then clinched. Dempsey was outroughing his frailer foe in the clinches. Carpentier circled around, waiting for a chance to whip over a right, but Dempsey's body punches had weakened him. The champion drove Georges into a corner, hooking him with rights and lefts to the head as the bell rang. The bell saved Carpentier.

Dempsey's round.

Round Four

Dempsey rushed Carpentier to the ropes and a left to the body made him wince.

The continual bombardment of heavy body blows from Dempsey's fists was rapidly weakening Carpentier. The Frenchman began to sag noticeably at the knees and after about fifty five seconds of punishment, crumpled up on the floor from the vicious right to the body and left to the chin. Carpentier was not unconscious but in sore distress as he lay curled up on his side. Referee Ertle began the count as he stood alongside the prostrate Frenchman while Dempsey, leaning against the ropes, watching the rise and fall of the referee's hand. At the count of nine Georges rose to his knees and arose in a game but weakened fashion. The champion was upon him again in a flash and another crushing left to the mid-section followed by a flashing right to the chin with all of Dempsey's weight behind it hurled Carpentier to the floor again with a thud that could be heard many feet from the ring.

Again Carpentier lay on his side while the count went on and at the sound of eight he made a desperate attempt to regain his feet. He raised his body part way from the floor with his right hand, but the effort was futile, and two seconds later the European champion was counted out on his back. The time of the final round was one minute and 16 seconds.

NINETY THOUSAND PASS THROUGH GATES

RINGSIDE, JERSEY CITY, N. J., July 2.—More than ninety thousand men and women today saw Jack Dempsey of the New World knock out Georges Carpentier of the Old World in the fourth round of their championship bout.

The American won the fight, but it seemed from the ringside that the conquered Frenchman received, from start to knock out, at least his full share of the plaudits.

The main bout had been advanced ahead of the sixth preliminary, so that it might go on on scheduled time.

The crowd was unprepared. Suddenly there was heard overhead the roar of motors and around circled a couple of airplanes. Many of the spectators were casting an eye aloft, when unheralded Carpentier appeared the first to enter the ring.

In his gray silk bath robe he seemed as carefree as if he was just stepping from his tub.

His famous smile—the Carpentier fighting smile—curled his lips as he climbed into the canvas covered square on which he later was to meet defeat. He turned to the crowd, clasped his hands and shook them as an appreciation of applause.

Then as unconcerned as a school boy by a spinning top, he took his chair, bandaging his hands and now and then watching maneuvers of the airplanes—machines such as he had flown over the battlefields in France.

Then came Dempsey, preceded into the ring by a floral horseshoe sent him by his admirers. He received rousing applause. Never was there greater contrast between two fighters—the blonde, clean shaven Frenchman in his silk bathrobe, and towering over him—the giant, dark browed, bearded Dempsey, looking even bigger with a red sweater over his trunks of white.

Crowd Orderly.

Today's crowd was surprisingly orderly. It was like an ordinary theatre audience until the main bout started. Now and then a brief fuss broke out over seats, but it soon was still.

During the championship bout, however, there was a constant roar from all parts of the giant saucer. Women yelled with the men, but now and then there was a panic stricken shriek as a blow drew blood.

Cheer followed cheer—for Dempsey in the first round when he sent Carpentier to the ropes and for Carpentier in the second when he outboxed the champion, for both in the third as Dempsey plugged away for victory and the Frenchman fought a brave but losing fight.

Then the knock-out. There were wild cheers for the champion, but around Carpentier's corners clustered supporters, loyal to the last. As the European idol staggered down the steps after shaking hands with his conqueror, there was waiting him a crowd who patted him on the shoulder as he moved into his dressing room.

Dempsey, too, had his loyal allies and they accorded to him the homage due a conqueror.

Never did so many women attend a bout. Game, they were scoffing for the most part at threatening skies and bearing up cheerfully when the sun came out and the heat became oppressive.

They afforded another of the day's contrasts. With men in shirt sleeves all around them, they sat trim and neat in their sport clothes and tailored suits.

It was after the fight that they really suffered. Holding of the postponed preliminary as a program closer, prevented the greatest potential rush to the gate, but even though the crowd edged out bit by bit, the crush was terrific.

It was then, as they stood in line with other over-heated humans, that the women were heard to repent having come to the world's greatest fight in the world's greatest arena.

PICK UP AVAILABLE DAY 66..

ENGLISH DISAPPOINTED OVER DEMPSEY VICTORY.

By Associated Press.

LONDON, July 2.—The victory of Jack Dempsey over Georges Carpentier caused keen disappointment here, for Carpentier had been a popular favorite with the English.

Among the followers of pugilism, however, who ruled by judgment rather than by sentiment, Dempsey had by long odds the strongest backing. Both Joe Beckett and Bombardier Wells, the English heavyweights, who went down to defeat before the French idol, before the fight gave it as their opinion that Dempsey would win. Wells' additional remark, however, "but all my heart is with Carpentier," typified the feeling of the general public.

PARISIANS SHOCKED OVER FIGHT RESULT.

By Associated Press.

PARIS, July 2.—Consternation fell upon Paris tonight when the defeat of Georges Carpentier at the hands of Jack Dempsey in their bout for the world's championship in Jersey City today was signalled with white lights by aeroplanes, on newspaper screens and by theater announcements.

Crowds, absolutely dumbfounded, refused to believe the first bulletin telling of Carpentier being knocked out. The Associated Press flash was the first to reach Paris. It was received at 8:32 o'clock this evening.

WILLARD WILLING TO MEET CHAMP

By Associated Press.

LAWRENCE, Kansas, July 2.—Jess Willard, former world's heavyweight champion, to whose crown Jack Dempsey succeeded at Toledo, July 4, 1919, will box Dempsey on Labor Day if arrangements for such a bout are made, Willard said tonight.

"I have heard nothing of such a bout since last spring," the former champion said, when a plan was under way for me to box Dempsey, March 17. The completion of plans for the Dempsey-Carpentier bout ended that project and I was promised a bout on Labor Day.

"I'll make no further move until I hear from Tex Rickard, but I'll box Dempsey if the bout is revived."

Willard spent the day on his ranch near here directing 50 men in the harvesting of the Willard potato crop.

The Jersey City fight went about as he had expected it would, he said.

BEARS MAKE HOMERS WIN OVER GASSERS

By Associated Press.

SAN ANTONIO, Texas, July 2.—San Antonio made it two out of three from the Gassers when the Bears won from Shreveport 8 to 1. Billy Smith, manager of the Shreveport Oilers, was ejected from the park before the game had gotten good under way for threatening the umpire. Home runs by Bill Fincher and Frank Fuller were the high spots of the game. Score:

SPUDDERS UNABLE TO SOLVE BARFOOT'S CURVES, AND DROP FINAL GAME TO HOUSTON, 6-

By C. F. CARTER.

Wild heaves, collisions, ground errors, dropped balls and a weak attack put the skids under the Spudders in the final game of the Houston series yesterday, and enabled the Buffs to walk away with the one-sided contest, 6 to 0. Barfoot held the Salmites to four lonely hits, while brilliant fielding behind him kept the Spudders away from the plate.

With the exception of the third and seventh frames, Rube Marshall hurled a good enough brand of ball to win, granted that his team-mates had possessed the usual Spudder attack. But it was an off day with the willow for the Spuds, and the twirling of Barfoot would have been sufficient to win for the Buffs even if our own group of pastimers had played errorless ball behind the Reuben. Three times Barfoot turned the Spudders back when a score seemed certain; when the Spuds had a man on third base and never more than one out—while in other innings it was mostly a monotonous process of "three up and three down" for Wichita Falls.

In the opening inning, after Bescher had grounded out to Blades, Danny Gross poked a long triple into right center—but McElwee died on a short fly to left, and Clark made the third out with a fly to Charlie Miller in right.

Again in the fifth the Spudders looked good for at least one run, but the old punch was missing. Tex McDonald was thrown out by Barfoot and Jake Miller beat out an infield hit to short. Caddy Works singled to left, and Jake reached third safely. Miller, however, was held on the bag when Kitchens sent a short fly out to Johnny Baggan in left—and Marshall forced Works at second for the third death.

Punch Is Missing.

In the final round, the Spudders even got a man to third base with none out, but were unable to dent the rubber with a tally. Bescher reached first when Blades' throw pulled Bottomley off the bag, and went to third when Danny Gross singled inside of the third base line. Barfoot simply shoveled in some more coal, got up a good head of steam—fanned both McElwee and Clark and compelled McDonald to force Gross at second.

The Buffs earned their first run in the third canto on hard hitting. Baggan opened with a triple to right center. Darringer flied to McElwee, Baggan being held at third. Bailey fouled out to Kitchens—and then Charlie Miller hit a lusty two-bagger to right, Baggan walking home leisurely. Marshall struck out Bottomley.

The Spudders played burlesque baseball in the fifth, and presented Houston with three more markers. Darringer was thrown out by McDonald. Bailey also hit to Tex, who threw wild to first, Bailey reaching second. Miller singled to left, fast fielding by McElwee holding Bailey at third. Bottomley dropped another single in the same spot, scoring Bailey and sending Miller to second. Doyle lined to Danny Gross, who dropped the ball but recovered it in time to force Bottomley at second, Miller going to third on the play. On an attempted double steal Kitchens pegged the ball into center field, Miller scoring and Doyle racing to third. Jake Miller's return throw got away from Rube Marshall, and Doyle also dented the plate with his spikes. Blades hit one to short left center and Gross and Miller collided. Gross dropped the ball, but succeeded in grabbing it again in time to run Blades down between first and second, for the third out.

In the seventh Marshall weakened, and three clean singles accounted for two more Houston runs.

It was a loose, ragged game, and we can all be grateful the Spudders got it out of their systems before trekking to Fort Worth.

Froggy Rothfuss, sent home by Salm to rest up, was in Wichita Falls yesterday and watched the progress of the game from the Airdome. He stated he is "feeling fine," that no ill effects have followed his recent "beaning" and that he expects to join the Spudders today in Fort Worth.

Today's game will be shown at the Airdome at 3:00 o'clock. It is probable that Holly will burl the opener against the Panthers, and more than likely he will be sent back at 'em again after a two days' rest. That dope may be wrong, fans; it's just our own guess.

The score:

OLD BENNY LEONARD GETS RHEUMATISM AND CANNOT FIGHT

BENTON HARBOR, Mich., July 2.—The Benny Leonard-Sailor Freidman fight for the lightweight championship was postponed today when rheumatism attacking the champion grew so painful that the Michigan boxing commission refused to permit the fight to be staged.

The pain centered in the champion's neck. The fight will be probably held July 16.

Jimmy Kelly of Chicago and Frankie Mason of Fort Wayne, Ind., will fight for the flyweight championship on July 4.

Attempts are being made to have Johnny Dundee of New York, fight Freidman and a program of other bouts is being arranged at reduced rates.

HOT MATCHES ARE CARDED FOR FOURTH IN TENNIS TOURNEY

Three tennis matches which will have a decided bearing on the tennis tournament now raging here will be played Monday, July 4. The matches in question are Henry Akin and Bill Powers; Maxwell and Cook, and Lewis and Burnap.

The semi-finals will be played Tuesday and the finals will come off and the final winners announced on Wednesday.

Some excellent exhibitions of the popular pastime have been seen in the recent matches and while no great upsetting of the dope has been reported a few surprises have been sprung.

Those in the running at the present time are believed to be very nearly evenly matched and some hard games are expected.

'BABE MAKES IT 30

NEW YORK, July 2.—Babe Ruth cracked out two homers today bringing his total up to 30 for the season. The first was clouted in the seventh inning of the first game with Boston, the other was made in the first inning of the second game.

TEXANS WIN FOR U. S. IN TENNIS MATCHES WITH OXFORD STARS

PHILADELPHIA, July 2.—A combined American college tennis team clinched the meeting with the combined Oxford-Cambridge team of England here today, by winning the first of three double matches. This made the United States sure of five of possible nine matches as the Americans had won four of the singles combinations.

McNeil Drumright and C. E. Granger of the University of Texas defeated Clark Hopkins and R. R. P. Barbour of Oxford 6-4, 6-1.

CALIFORNIAN WINS NET TITLE OF COLLEGE WORLD

PHILADELPHIA, July 2.—Philip Neer, of Stanford University, won the intercollegiate lawn tennis championship today by defeating J. B. Fenno, Jr., of Harvard, in a five set match. Score 3-6, 6-1, 6-4, 1-6, 6-1.

BLACK SPUDDERS SHOW NEW LINE-UP WITH DALLAS TODAY

Strengthened by two new pitchers and a catcher the Black Spudders will face the Dallas Black Marines this afternoon at Athletic Park with a line up which it is expected will reverse the hoodo that has followed the local blacks so far this season.

Manager Blanton announced Saturday that he had secured the services of Pitchers Miller and Lewis from Houston and it is probable that one of them will be used in today's game. A catcher formerly with San Antonio will don the mask for the local team.

As an added attraction arrangements have been made to announce the Spudder game at Fort Worth by innings. The game will be called promptly at 3:30 this afternoon.

STIFF PITCHING SETS HORNSBY BACK DOZEN POINTS AS BATTING RACE TIGHTENS IN NATIONAL LEAGUE

CHICAGO, July 2.—Rogers Hornsby, the St. Louis star slugger, who is topping the batters of the National League, went up against some stiff pitching the past week when the Cardinals battled with eastern invaders, and dropped 12 points off his batting average, according to figures published today which include games of last Wednesday. He was then hitting .407.

Hornsby has passed the century mark for hits, the first member of the Heydler circuit to do this so far this season. He has cracked out 105 for a total of 162 bases, which puts him far in front of his rivals. His hits include 16 doubles, 10 triples and 7 homers.

Pep Young of New York, who was in sixth position among the batters who have participated in 40 or more games, has advanced to second place with an average of .367, while McHenry, the Cardinal outfielder, though dropping 21 points, remains third with .361.

When George Kelly of New York banged out a homer during the week he raised his total to ten, just one behind Meusel of Philadelphia, who failed to add to his string of eleven.

Max Carey, the fleet footed Pittsburgh outfielder, and Frank Frisch of New York are having a neck and neck race for stolen base honors. Each added four to his string and again they are tied with 17 each.

Other leading batters: Roush, Cincinnati, .359; Meusel, Philadelphia, .354; Grimes, Chicago, .354; Mann, St. Louis, .354; Fournier, St. Louis, .353; Maranville, Pittsburgh, .351; Cutshaw, Pittsburgh, .347.

Babe Ruth, the home run king, has recovered from his set-back of last week at the hands of Dick Kerr of the White Sox. He drove out four circuit hits the past week and brought his total up to 28, including games of last Wednesday. However, Ruth did not fare so well as regards averages, his batting figures showing a drop of 6 points to .365.

Ruth has made 89 hits for a total of 207 bases and also leads in runs scored, having registered 73 times for the New York club. He has cracked out twenty doubles and seven triples.

Harry Heilman, the Detroit slugger, who is leading the men who have played in 40 or more games, got back into his stride and has been hitting the ball with some regularity. Heilman has boosted his average to .418; Tris Speaker, pilot of the Cleveland world's champions, also made up some of the ground he lost a couple of weeks ago and is the runner-up to Heilman with an average of .408. Ty Cobb, the Detroit leader, suffered a loss of eight points during the past week, but continued in third place with .388. George Sisler, the St. Louis star, stuck to fourth place despite a drop of 12 points. He is hitting .365.

Sisler pilfered another base during the week and continues to set the pace in the American League with 15 thefts, with Joe Judge and S. Harris of Washington tied for second place with 13 each.

Other leading batters are Veach, Detroit, .363; Severeid, St. Louis, .358; Williams, St. Louis, .355; E. Collins, Chicago, .353; Tobin, St. Louis, .350; R. Jones, Detroit, .348; Gharrity, Washington, .346.

Butler Leads in A. A.

Reb Russel, the former White Sox pitcher who is working in the outfield for Minneapolis in the American Association, is making a strong bid for batting honors in President Hickey's circuit with an average of .379. Russell has moved into a tie with Kirke of Louisville for second place among players who have participated in 40 or more games. Butler of Kansas City continues at the head of the regulars with an average of .401, while Gainer who was the runner-up a week ago now stands five points behind Russell and Kirke with .374.

Russell also continues to run a neck and neck race with Bunny Brief of Kansas City for home run honors. Each cracked out his thirteenth homer the past week. Baird of Indianapolis annexed four stolen bases to his string and is showing the way to the base stealers with 29 thefts.

Other leading batters are Brief, Kansas City, .365; Baird, Indianapolis, .360; Duncan, St. Paul, .357; Gearin, Milwaukee, .350; Good, Kansas City, .355; Thorpe, Toledo, .354; Haas, St. Paul, .352; Ellis, Louisville, .350.

Harper King in Western

Beck of Wichita made three home runs in the Western League the past week and broke the tie he shared a week ago with Blakesly, a teammate, who failed to keep up the pace. Beck's total circuit drives stand at 15.

Harper of Oklahoma City strengthened his hold on first place honors among the batters by adding 12 points to his average. He is hitting .424, according to the figures released today which include games of last Tuesday. These averages are for players who have participated in 40 or more games. Jack Lelivelt of Omaha also got back into his stride again, boosting his mark to .409 for runner-up honors with East of Wichita third with .387.

Haney of Omaha stole one base and now has a total of 19 thefts.

Other leading batters are Metz, Sioux City, .379; Beck, Wichita, .366; Massey, Omaha, .359; Todt, Tulsa, .357; Paddock, Sioux City, .353; O'Connor, Des Moines, .352; Fisher, St. Joseph, .350; Gislason, Omaha, .344.

Boone Hitting .378

McMillan of Memphis went on a batting rampage in the Southern Association during the past week and moved up among the leaders in President Martin's circuit. I. M. Boone of New Orleans continues to top the batters who have participated in 40 or more games, according to the averages released today which include last Tuesday's games. The New Orleans slugger is hitting .378, with Traynor of Birmingham the runner-up with .364 and Don Brown of Little Rock one point behind with .363.

Traynor added another stolen base to his record and is setting the pace with 31 thefts. Bernsen of Birmingha mand Tutweiler of Mobile failed to stretch out their home run totals and remain tied with nine each.

Other leading batters are McLarry, Memphis, .356; Harper, Little Rock, .354; Stellbauer, Nashville, .349; McMillan, Memphis, .344; Griffith, New Orleans, .340; Burke, Nashville, .338; Hungling, Memphis, .337; Gilbert, New Orleans, .335; Bernsen, Birmingham, .333.

SPUDS GAINING IN ALL PHASES, FIGURES SHOW

By WILLIAM B. RUGGLES.
League Statistician.

"Big Boy" Clarence Kraft, boss home run hitter of the Texas circuit, compiler of most runs, the most hits, and leading pile driver of scores, is now the undisputed leader of the Texas batters, as even Pitcher Bill Bolden has finally dropped the titular lead he has held so long. Kraft's mark of .389 is now the whole thing. Hack Eibel is still within reach of the Panther slugger at .382. Bill Bolden, Bob Beecher and Pat Fisherity, who have been in comparatively few games, come next, while at .346 is heard the hoofbeat of Danny Clark batting upward. Only twenty-four Texas leaguers are still clouting in the .300 class.

Johns' Lead Threatened.

Although outranked in the matter of games won on percentage by both Lefty Johns and Bugs Pate of Fort Worth, the lead is threatened by Hollingsworth, a Spudder rookie, who has won his ninth consecutive game and is still going strong. Johns is the only Texas Leaguer with thirteen wins to his credit. Pate has chalked up nine while Hollingsworth, Wachtel and Knight boast eleven each. Hollingsworth has run his strikeout record up to 111. Clyde Barfoot's record of not being knocked off the rubber this season was smashed last week. Snipe Conley still leads in control and Wachtel in innings worked. Bill Gleason set a season record by working twenty-seven consecutive innings without allowing a score. All figures are through Wednesday's games:

Player-Club	G	IP	W	L	Pct	BB	SO

Panthers Lead in Slugging Games.

Oddly enough, the record for the most hits in a nine-inning game was made on the opening day of the present season, when Dallas and Wichita Falls, between them, compiled 31. Twice this season Texas League teams have made 21 hits in nine innings. Shreveport did it on May 16 against Galveston, getting 7 off Lee, 13 off Couchman and 1 off McGrew. On May 20 Wichita Falls played San Antonio, getting 4 hits off Fincher, 5 off Voight, 3 off Corcoran and 9 off Jordan.

SUNDAY HOUSEHOLD HINTS

Fort Worth leads in nine-inning games in which 12 or more hits have been made, as this table shows, figures at the top of each column indicating number of hits per game:

	12	13	14	15	16	17	18	19	20	21	
Ft. W.	8	5	2	4	1	0	1	0	1	0	—22

Galv'n	4	3	0	0	0	2	1	0	1	0	—11

HUNS NOT SINCERE IS HARDEN'S CLAIM

PARIS, July 2.—Interviewed by a correspondent of Excelsion on economic and political relations between France and Germany, Maximilian Harden, editor of Zukunft, took yet another opportunity offered him to bitterly attack autocratic Germany and to justify France's claims for reparations.

"France asks for but part of what we made her lose," were Harden's first words.

He then stated that Germany still believes that she was not the author of the war, that she was never beaten and that terrible conditions have been imposed upon her, although she faithfully believed in former President Wilson's "Fourtgen Points."

"That which past German Governments have lacked," continued Harden, "is frankness. If today Germany shows willingness to repair, it is simply on account of France's threats and strength. No government heretofore has shown any sincerity in its attempts to repair. Germany signed the treaty of Versailles, and she must make good her signature. Our people think that France is in the throes of militarism, but I am surprised to see how distant from militarism France really is. As the result of your victory we expected to see the appearance of a new Caesar. Instead of that I notice that you make less show of your victorious generals than we do as of our beaten military leaders."

Harden believes Chancellor Wirth is sincere and suggests that much more may be had from him if only the Allies, and particularly France, were to encourage him a little more.

"Don't continually threaten him or bully him," is his advice. "When he has fulfilled certain of his engagements pat him on the back and tell him, 'well done! We are satisfied.'"

Referring to economic relations might very well succeed. "In my opinion," remarks Harden, "economic relations alone can prevent any new conflagration. Let us bind up our economic interests. France and Germany cannot go on for ever stabbing each other in the back."

Asked what Germany would have done had she won the war, Harden replied:

"She would not have done anything very fine, but that sort of thing must cease. We must become men of the future and not remain copies of the past."

The island of Yap, which recently achieved prominence, has two harbors, one named Ruil and the other Tomil, where most of the business to or from the island is handled.

TILDEN RETAINS RACQUET TITLE

By Associated Press.

WIMBLEDON, July 2.—William T. Tilden, of Philadelphia, world's lawn tennis champion, successfully defended his title in the challenge rounds of the British turf court championship here, defeating B. I. C. Norton, the South African star, in a five set match.

The score: 4-6, 2-6, 6-1, 6-0, 7-5.

LYCETT AND RYAN WIN MIXED DOUBLES

By Associated Press.

WIMBLEDON, July 2.—Randolph Lycett of England and Miss Elizabeth Ryan of California defeated Max Woosnam and Miss F. W. Howkins of England in the final of the mixed doubles in the British turf court tennis championship here today, 6-2, 6-1.

MLLE. LENGLEN AND MISS RYAN, WOMEN CHAMPIONS.

By Associated Press.

LONDON, July 2.—The final match of the women's doubles in the British turf court tennis championship tournament was won here today by Mlle. Suzanne Lenglen, the star, and Miss Elizabeth Ryan of California. They defeated Mrs. Beamish and Mrs. Peacock, of England 6-1.

PROMINENT FARMER OF SEYMOUR DIES

Special to The Record News.

SEYMOUR, July 2.—L. A. Durham, 60, prominent farmer and early settler of this county, died here yesterday afternoon following an illness of several months duration. Mr. Durham came to this section with his parents from Missouri in 1875 and had a wide acquaintence among the early settlers of West Texas. He is survived by his aged mother and two brothers, A. F. Durham, of this city, and Louis Durham, of Bisbee, Ariz. Funeral services will take place this morning at 11 o'clock conducted by the Masonic order of which he was member.

R. E. BASKIN, Cor.

The Romans are credited with introducing cabbage into England, and the soldiers of Cromwell carried it to Scotland and made it popular there, as they did also in Ireland, according to tradition.

Men's banking requirements differ with the men. Each has his own peculiar problems requiring personal and individual attention. The City National Bank of Commerce has developed its organization to meet this condition. It furnishes specialized service.—Adv.

WISDOM AND WORSE

BY C. F. C.

The big fight is history now, and the ringside story tells how the best fighter won and the most popular fighter lost.

"There were cheers when the American champion was introduced," the operator in far-away Jersey City wired, "but the crowd, the arena around, cheered itself hoarse as Carpentier was hailed as champion of the old world, idol of his country and a soldier of France."

There is something that stirs the blood in that expression, "a soldier of France." Caged in an 18-foot ring, Carpentier was knocked senseless by the powerful Dempsey. But the world will never forget that Georges Carpentier was "a soldier of France;" that his country decorated him for bravery in the cruelest war of all history. His character is clean, and his courage is still unquestioned.

Jack Dempsey today is still heavyweight champion of the world—but somehow we believe we'd rather be Georges Carpentier than Jack. And the pity of it is that Jack Dempsey, had he listened to his country's cry for men, might now be the idol of a nation; a champion in prowess and popularity greater than any the world has ever known. He might fittingly have worn the crown that once rested on the head of the Old Master, John L. Sullivan——IF, IF, IF!

Considerable space in this column today is going to be occupied by J. H. S." We don't know who J. H. S. is, except that he's sure enough a real Spudder fan. He has burst forth in a rhythmical frenzy, and has accompanied it with the following brief note:

"Dear C. F. C.:

"Enclosed find spasm which may fit in 'Wisdom and Worse.' The poem isn't so good, but the moral is correct, eh?"

So here she goes, gang. Are you all ready with your ukuleles? Good! Sound your A-flat, and let's all join in the chorus:

ODE TO JAKEY ATZ.

"We are tired of your boasts, Jakey Atz,
Of your terrible, fence-bustin' Cats;
Of what they have done to this club and that,
To hear you guys tell it, you've knocked 'em all flat.

"But Jakey, old boy, the season's just started,
And before very long from first place you'll be parted,
For the Spudders are coming, lickety splitten
And they'll tame that wild Cat to a harmless kitten.

"Old Bobby Bescher will lead the attack,
And you'll find it wise to move outfielders back;
He hits 'em hard in any direction,
for him that is no task,
And Possum Moore need not be sore if Bobby steals his mask.

"And young Danny Gross he follows Bob,
Is no longer a rookie—has a regular job;
He's been the find of the Texas league season,
And to find a better shortstop is far beyond reason.

"And little Froggy Rothfuss is next on the list;
Ship ahoy, Jake, old boy, there's few third strikes he's missed.
To worry the pitcher is his delight,
And he's hard to catch whenever he's right.

"And then comes Clark, who holds down second;
He may give you some trouble you're not expectin'
And he's liable to get your pitchers' nanny;
Take our tip, Jakey Atz, and watch two-bagger Danny.

"And old Tex McDonald, you've met him before;
They tell me, Jake, at your pitchers he's sore;
And if that is true, and it surely must be,
It would pay you to walk him, take it from me.

And yes, Jakey Miller is the same one of old,
Hits 'em a mile and runs bases bold;
Will rob you of drives that look like sure hits,
And will cause those Cats to have 700 fits.

"And then Caddy Works, just out of school,
Though he is young he is nobody's fool;
He scoops 'em out of the dirt and spears 'em in the air,
And from the ground he covers you'll think he's everywhere.

"And then comes old Kitchens, gay, feeble and thin,
But there's many a good tune left in the old violin,
With three men on the bases, and the score a tie,
And Kitch at bat, Jake old hat, kiss the ball good-by.

"And with Holly right, and Jake, he's never wrong,
We think those Panther sluggers won't be at bat very long;
'Twill be no use for Panther fans for Sears and Kraft to shout,
For howinell can they connect, if Holly strikes 'em out?

"And old Reuben Marshall, he's full of comedy stuff,
But don't you fool yourself, Jake, at times that boy is rough.
And little Rabbit Darrough, doesn't look a bit over ten,
But Jake he held you hitless once, he may do it again.

"And there is Abie Bowman, he may do the trick,
And keep awake, old Uncle Jake, he shakes a wicked stick.
And Walter, the boss, in St. Louis, making a trade we think—
This medicine's hard to take, old man Jake, but the Spudders will put you on the blink!"

Hooray! Hooray! Three cheers for J. H. S.! The poet laureate of Wichita Falls turned in this noble burst after the St. Louis deal had fallen through, but in every other respect he appears to have "poured it on" Jakey Atz with considerable enthusiasm, eh wot?

Parker house rolls 15c a dozen. Peoples Bakery, 618 Ohio.—Adv.

CARDS TRIM CUBS AFTER HOMER IS HIT

CHICAGO, July 2.—A home run by Clemons in the seventh inning with Lavan on second, won for St. Louis against Chicago today 3 to 2. Score:

RECEIVER'S NOTICE

WICHITA FALLS, TEXAS,
JUNE 14, 1921.

TO ALL PERSONS INTERESTED IN THE RED RIVER RECEIVERSHIP: GREETING:

WHEREAS, by order duly entered in the above entitled cause on the first day of June, 1921, it was provided:

"(1) That until further order all development work by the Receiver (except as prescribed in certain other orders made this day) shall be confined to the completion of the wells in the river-bed area, about twelve in number, work upon which already has been begun.

"(2) That the Receiver be and he is hereby authorized and directed to collect, withhold, and impound three-sixteenths of the gross proceeds of gas produced by wells within the receivership area from and after June 1, 1921.

"(3) That the Receiver be and he is hereby authorized to publish a notice in four daily newspapers, two circulating in Texas and two circulating in Oklahoma, to be selected by him, requesting all persons having claims against the Receiver or against the property or funds in his custody to present the same to the Receiver within 60 days from the date of publication of such notice, accompanying their statements of claim with supporting affidavits and certified or sworn copies of any documentary evidence upon which they may rely; and the Receiver is directed to examine and investigate said claims and supporting evidence, and he is hereby authorized to settle and discharge the same if he can do so upon a fair and equitable basis; and as to any not so adjusted and settled he shall make a full report to this court at its next term for such further action as the court may deem proper."

NOW, THEREFORE, ALL CLAIMANTS, OPERATORS, REFINERS, PIPE LINE OPERATORS, DRILLERS, MECHANICS, LABORERS, MATERIAL MEN, THEIR TRUSTEES, RECEIVERS, LEGAL REPRESENTATIVES, SUCCESSORS OR ASSIGNS, AND ALL OTHER PERSONS INTERESTED, having claims, demands or causes of action of any kind whatsoever against the undersigned as RECEIVER in the above entitled cause or against any property or funds in his custody, possession or subject to his control, are hereby requested to present the same to the undersigned, as such Receiver, at his office, Room 407, City National Bank Building, Wichita Falls, Texas, within SIXTY (60) days from the date hereof (being the day of the first publication of this notice), and to accompany their statements of claim with supporting affidavits and certified or sworn copies of any documentary evidence upon which they may rely, for examination, investigation, adjustment or report to the Supreme Court of the United States at its next session, in accordance with the requirements of the order above recited.

All statements of claim and accompanying affidavits, documentary evidence and other papers, must be in typewriting, in triplicate, and should set forth clearly and concisely the nature of the claim, demand or cause of action; the names and addresses of all persons, partnerships or corporations having any interest therein, and the extent and nature of such interest; the exact amount claimed; the names and addresses of all witnesses who may be able to substantiate the claim in whole or in part, and any and all other facts or circumstances upon which the claimant relies.

Upon receipt of the papers, the undersigned will make a careful examination and investigation of the matter, and wherever there appears to be any foundation in fact or in law for the claim, will endeavor to settle and discharge the same upon a fair and equitable basis.

(Signed) FREDERIC A. DELANO,
Receiver.

SHERIFF'S SALE.
THE STATE OF TEXAS, COUNTY OF WICHITA:

By virtue of a certain order of sale issued out of the Honorable District Court of Wichita County, on the 6th day of May, 1921, by A. P. Kerr, District Clerk, against Isaac Ruby and Max Ruby for the sum of $1312.16 and costs of suit in cause No. 9280-C in said court, styled Charles F. Noble Oil and Gas Co. vs. Isaac Ruby and Max Ruby and placed in my hands for service, I, Fred E. Smith, as Sheriff of Wichita County, Texas, did on the 6th day of May, 1921, levy on certain personal property situated in Wichita County, described as follows, to-wit:

One Fairbanks Morse 25 HP Engine, style 138474; one 12x90 feet belt; 1500 feet tubing and levied upon as the property of said Isaac Ruby and Max Ruby. And on Wednesday, the 13th day of July, 1921, at the court house door of Wichita County, in the City of Wichita Falls, Texas, between the hours of 10 a. m. and 4 p. m. I will sell said personal property at public vendue for cash to the highest bidder as the property of said Isaac Ruby and Max Ruby by virtue of said levy and said order of sale.

And in compliance with law I give this notice by publication in the English language, once a week for two consecutive weeks immediately preceding said day of sale in the Record News, a newspaper published in Wichita County.

Witness my hand this the 2nd day of July, 1921.

FRED E. SMITH,
Sheriff Wichita County, Texas.
H. C. DAKAN, Deputy.

NOTICE OF PROBATE.
THE STATE OF TEXAS
TO THE SHERIFF OR ANY CONSTABLE OF WICHITA COUNTY, GREETING:

You are hereby commanded to cause to be published once each week for a period of ten days before the return day hereof, in a newspaper of general circulation, which has been continuously and regularly published for a period of not less than one year in said Wichita County, a copy of the following notice:

THE STATE OF TEXAS:
To All Persons Interested in the Estate of J. W. Kennedy:

Know ye that Mrs. Mary Kennedy, has filed in the County Court of Wichita County, an application for the probate of the late will and testament of said J. W. Kennedy, deceased, filed with said application, and for letters testamentary which will be heard at the next term of said court, commencing on the first Monday in August A. D., 1921, the same being the first day of August A. D., 1921, at the court house thereof, in Wichita Falls, Texas, at which time all persons interested in said estate may appear and contest said application, should they desire to do so.

Herein fail not, but have you before said court on the said first day of the next term thereof this writ, with your return thereon, showing how you have executed the same.

Given under my hand and the seal of said court, at office in Wichita Falls, Texas, the 2nd day of July, 1921.

W. T. HARRIS, Clerk,
County Court Wichita County, Texas.
By M. F. YEAGER, Deputy.

NOTICE OF ADMINISTRATION.
THE STATE OF TEXAS
TO THE SHERIFF OR ANY CONSTABLE OF WICHITA COUNTY, GREETING:

You are hereby commanded to cause to be published once each week for a period of ten days before the return day hereof, in a newspaper of general circulation, which has been continuously and regularly published for a period of not less than one year in said Wichita County, a copy of the following notice:

THE STATE OF TEXAS:
To All Persons Interested in the Welfare of the Estate of Thomas J. Mitchell, deceased:

Know ye, that Sue Mitchell was by the County Court of Wichita County, Texas, on the 22nd day of June A. D., 1921, duly appointed temporary administrator of the said estate, which appointment shall become permanent unless the same shall be successfully contested at the next term of said court, commencing on the first Monday in August A. D., 1921, the same being the first day of August A. D., 1921, at the court house thereof, in Wichita Falls, Texas, at which time all persons interested in the welfare of said estate may appear and contest such appointment if they so desire.

Herein fail not, but have you before said court, on the said first day of the next term thereof, this writ with your return thereon, showing how you have executed the same.

Given under my hand and seal of said court, at office in Wichita Falls, Texas, this the 2nd day of July A. D., 1921.

W. T. HARRIS, Clerk County Court of Wichita County, Texas.

RENTS CAUSE HIGH CHARGES DOCTORS SAY

Unsatisfactory collections and high rents were the two principal reasons advanced by representatives of the local medical association meeting with Chamber of Commerce directors Saturday, as reasons preventing a reduction of medical charges in Wichita Falls. "If responsible business men would underwrite our collections, we could then reduce our charges to $2 per visit," declared one of the physicians, Dr. L. Mackerckney, at the conclusion of the meeting.

Efforts to secure a reduction of rents both in the business and in the residence districts should be the first step taken by the Chamber of Commerce another of the committee, Dr. Joe E. Daniel, declared in discussing the situation. Dr. M. M. Walker was another of the committee present who took part in the discussion.

On the matter of nurses charges, the physicians said that they had nothing to do, although declaring the belief that $10 per day was not unreasonable, taking into consideration the risks of the profession and the knowledge necessary for it.

The pay of the nurses contrasted with that of the carpenters by one of the directors of the association, who also pointed out that the carpenter usually had a family to support, and expressed the belief that the rate of pay was too high for a single woman to command.

APOPLEXY FATAL TO ARMSTRONG

Stricken with appoplexy while in his room talking with friends, Saturday afternoon at 1 o'clock, R. S. Armstrong, 48 years of age, proprietor of the Falls Hotel, died an hour later at the Wichita General Hospital, where he had been rushed in a Hines Undertaking company ambulance.

Mr. Armstrong was apparently in the best of health and spirits, according to friends, while talking with them until he suddenly began to complain of a headache. He then walked into his room across the hall from where they were sitting and lay down across his bed asking that a physician be called.

Two sons of Mr. Armstrong, Irving at Whitesboro, where the deceased made his home until three months ago, are expected to arrive in Wichita Falls to accompany the body the former to the home for interment.

In addition to the Falls hotel, where he made his home, Mr. Armstrong also operated the Wichita rooming house. He came to Wichita Falls about 3 months ago.

A celebrated scientist declares that women are less sensitive to pain than men and actually feel less of it in a given operation.

A Funny Thing

—It would be if every time one wanted to deposit in a national bank that they would have an officer of the bank explain the entire banking and currency system to them before they walked back to the tellers window and deposited their $4.85, BUT this is exactly what we want depositors in this building and loan association to do. We want them to KNOW, that their APPRECIATION may be full. More than SIX MILLION Americans DO know what their building and loan associations are doing for them. We want to fully explain to you the details of the building and loan system and how we earn 10 per cent interest for you. Come to see us today or mail the coupon below.

Wichita Falls Grain.

Prices paid by local elevators to growers:

Cash wheat, No. 1, $1.00; No. 2, 97c; No. 3 94c.
Oats 30c a bushel.

YOUR EYES

The Record News presents to its readers herewith the first of a series of six articles on "Your Eyes."

These articles are written by a competent eyesight authority and in them the author has attempted to present scientific facts in an easily read and easily understood manner.

The vision of our people merits all the care that we can bestow upon it and we believe that a careful reading of all of these articles will be of great benefit. That the importance of this subject is being recognized is shown by the fact that some of the leading medical, optometric and engineering authorities of the nation have organized the Eyesight Conservation Council, Inc., of America, which has for its sole purpose the protecting and saving of eyesight.

ARTICLE 3.

ASTIGMATISM sounds like an awfully hard word but it really means "without a point." Translated into everyday language when we say that a person has astigmatism we mean that his eyes are so shaped that the rays of light do not come to a point hence his vision is disturbed, and his eyes often strained.

In no other defect is such infinite care on the part of the Optometrist required as in the correction of Astigmatism. After finding out the kind of lens that is needed he sees that it is so supplied and Oh! how carefully he does measure the finished glasses. A little twist or a wee turn and his careful work in fitting the eyes is for naught.

The trained Optometrist finds that the great majority of those who seek his services have astigmatism. It may be of one variety or another and may be combined with near-sightedness or far sightedness or may occur alone as simple Astigmatism. In any event the most painstaking care is required to insure comfortable vision and satisfactory glasses.

No Optometrist today who is worthy of his profession but has been trained in the correction of this defect. One instrument is used exclusively for this work and many others are employed in the determining this and other ocular conditions with which the Optometrist meets.

It is no wonder then that leading Universities like Columbia and Ohio State, together with many others, devote from two to four years to the teaching of men and women to practice the work of eye measuring-Optometry.

That anyone should attempt to engage in this work without proper training seems unbelievable, but it is nevertheless true. In 47 states all who wish to examine the eyes and fit glasses must stand a rigid examination by a state board, but in this one state, no regulation exists and for that reason many incompetents prey upon the public. It is to be hoped that the next legislature will see fit to remedy this deplorable condition and rid this state of optical quacks.

REASON FOR NEW TRIALS EXPLAINED

Criticism directed against local courts for the granting of a new trial to Adolph Michna and "Red" McDonald, charged with complicity in the theft of a large amount of oil from the storage tank of the Empire company, which resulted in the obtaining of suspended sentences for them, is due to misunderstanding of the law, according to a local attorney who figured in the case, but was not present when the new trial was asked for.

"Under the law, the district judge had no other course than to grant the motion for the new trial," the attorney said. "To have failed to do so would have simply resulted in his being reversed by the higher court.

"They were entitled to a new trial by reason of the fact that they entered their pleas later in the case, and no testimony tending to incriminate them was introduced after their pleas were entered, as is plainly required by law.

"On the new trial, we of course asked for a suspended sentence, and it was granted by the jury on account of circumstances which lead to its being acquiesced in by representatives of the state, including the special prosecutor in the case."

IRRIGATION PROJECT ONE STEP NEARER

Agreement and approval has been reached and registered on all the engineering details connected with the Big Wichita irrigation project, following the recent visit here of A. E. Margan, famous engineer representing the bond interests, and the time for the actual beginning of the work is another step nearer, it was learned Saturday.

The next step will be completion of negotiations for the sale of the bonds, of which the engineering inspection was one of the preliminaries.

BOARD ACCEPTS SECOND FLOOR TO SCHOOL BUILDING

Following an official inspection by the building committee the second story addition built to the San Jacinto school building last winter, was accepted for the school board Saturday afternoon, according to the announcement of W. W. Brown, business manager.

The committee also visited the Barwise and Washington school buildings, which are now in course of construction.

A committee from the school board probably will leave late next week to visit buildings at Fort Worth and Dallas with a view of applying modern improvements to the new buildings here.

WICHITA HAS GAS SUPPLIES IN BURK FIELD

Whatever the outcome of the natural gas quarrel between the Lone Star and North Texas gas companies, Wichita Falls will have an ace in the hole in the shape of the production of the Texhoma gas field in the South Burkburnett district, which is producing gas at a normal rate of about 16,000,000 feet per day, T. B. Noble, president of the Chamber of Commerce, points out in connection with a discussion of the gas situation.

Although the capacity of the field is capable of being developed and maintained with a settled production of many times this amount, it is the intention of the companies controlling the field to drill only sufficient wells to keep the production at about that figure, which is figured more than ample for the needs of Wichita Falls.

Water trouble encountered in one end of the field, which would have required considerable work to correct, coupled with lack of immediate demand for a large supply of gas, caused the deepening of a number of gassers in that section in order to make oil producers of them, bringing the once very high flush production down to a usable quantity.

Court Notes

FOURTH TO BE OBSERVED BY COURTS AND OFFICIALS.

The Fourth of July Monday will be observed at the court house.

All district and county courts will be closed for the day with practically all offices also to observe the holiday with closed doors.

A large number of officials and employes at the court house left Saturday noon for out of town celebration of the two-day holidays.

County Court at Law.

William Baldredfe vs. Iona Woodward, appeal from justice court.

Martin Jones and O. S. Jones vs. Fort Worth and Denver City railroad, appeal from justice court.

Carroll, Brough, Robinson and Gates vs. H. Barrows, debt.

Marriage Licenses.

J. D. Parham and Gertrude Adams, city.

L. W. Nichols and Daisy Creamer, Iowa Park.

Real Estate Transfers.

E. M. Evans to E. L. Evans, 100 acres out of John Thomas survey; interest in 263 acres out of N. Dembrisker survey, $2000.

Joe R. Henson et al to H. S. Gray, lot 8 in block 13 of the Southland addition, $11,000.

H. O. Salley to Henson, Collier et al, lot 8 in block 15 of the Southland addition, $3000.

Leases and Assignments.

Louise Numan to Texas company, block 213 of the Waggoner colony lands. Consists of 160 acres.

R. S. Nixon et al to Apple and Brandebury, 60x136-foot tract out of lot 8 and part of block 7 of block 96 of the Red river valley lands. $10 and other considerations.

James K. Kepley to D. E. Rhodes, west half of block 8 of the Cowherd subdivision of the Palo Pinto school lands. $1.00 and other considerations.

Obituary

James Leroy Fields.

James Leroy Fields, six-months-old son of Mr. and Mrs. J. J. Fields, died Friday morning at 9 o'clock at the residence, 305 Wichita street. Burial was Friday afternoon at 3 o'clock at the Thornbury cemetery.

Mrs. Alice P. Crawford.

The body of Mrs. Alice P. Crawford, 61, who died Wednesday at her home, three miles southeast of the city, following a stroke of paralysis, was shipped Thursday night at 8 o'clock to Decatur by the Merkle-Lunn Undertaking company.

Lots in Rosemont are below normal value at present. Space with perpetual care is available at less cost than is often the case in properties without such advantages.—Adv.

UNIVERSITY CLUB THANKED FOR AID GIVEN TO STUDENTS

Voicing appreciation for the assistance of the University Club in coming to the aid of High School athletics an official letter of thanks from the School board was made public Saturday by club members.

The communication declared that the students were enabled to do team work which would have otherwise been impossible and that the teams also were very materially assisted out of financial straits.

In commenting on the communication, one of the members declared that aiding individuals of the city and self development are two of the chief purposes of the club.

WARD ENTERS LOCAL INSURANCE COMANY

H. D. Ward, formerly vice-president of the Southern Surety Company, has purchased the interest of J. W. Ferguson in the Crane, Morse and Ferguson company, insurance agents. Mr. Ferguson is retiring from the firm to enter another business.

The firm has been re-organized under the name of Crane, Ward and Morse, insurance and real estate agents, with offices in the Bob Waggoner building. Mr. Crane announced Saturday that the company would hold unusual powers of attorney for executing fidelity and surety bonds, would be in a position to write any form of insurance.

This agency has been in business in Wichita Falls for the past three years, having made a remarkable growth during that time. They will be the general agents for the Fidelity and Deposit company of Baltimore, Maryland, one of the oldest of bonding companies in America.

In Egypt less than 2 per cent. of the women can read and write.

CITY PLANS NEW PAVED ROUTE INTO BUSINESS SECTION FROM SEYMOUR ROAD ON FIFTEENTH

Tentative plans to open a new paved route into the business district over Fifteenth street from the juncture of the Seymour road and Avenue F were announced Saturday by Street Commissioner W. S. Curlee.

The proposed route, according to Mr. Curlee, would provide a new opening into the business district for the residents of Floral Heights and other residential sections and could be provided with the building of only about twelve blocks of pavement.

The course of the proposed route, as announced, have only three sharp jags and would provide relief from traffic on congested streets, he said.

From Lamar street the route, according to Mr. Curlee, would lead down Fifteenth to Elizabeth, down Elizabeth, now under contract for paving, to Brook, south on Brook to Pearl, west on Pearl to Harrison from where the opening of a new street connecting across via Avenue F to the Seymour road.

In addition to offering a new and practically direct course for a large volume of travel, it was pointed out that this route would pass within a block of the proposed new high school building.

After completing present contracts, Mr. Curlee announced that discussion of paving the north ends of Indiana and Scott streets will be taken up.

In this connetion Mr. Curlee asserted that the city would still have sufficient funds, after paying off present contracts, to finance a half million dollar paving program and that it was planned to close the year's paving program in accordance with their present line of work, by paving those streets, which seem the most important.

After paying present contracts, the city will have in the paving fund, $130,000, which, under the plan by which the city pay 25 per cent of paving costs, would provide for a total expenditure of $520,000.

RAIL WORKERS STILL DEBATE CUT IN WAGES

By Associated Press.

CHICAGO, July 2.—Leaders of the six organizations of railway employes who are in conference here to decide on a plan of action on the wage cut which became effective yesterday on all roads did not reach definite conclusions today in the matter. The trend, however, appeared to be strongly toward mediation and less toward talk of a strike.

Union executives admitted that they were confronted with a problem and that a solution might be a slow process, but said they say no reason to worry about the outcome. A suggestion as to the method that the unions might follow in dealing with the roads is expected to be offered soon by the committe of five executives who were appointed yesterday to handle the matter.

This committee will attempt to provide what appears to its members to be the most feasible plan and yet consolidate in its recommendations the outstanding suggestions that are submitted to the committee by representatives of each of the organizations meeting here. These later see the big four brotherhoods, the shop crafts, clerks, telegraphers, maintenance of way men and switchmen.

PROVIDE NEW SUN SHADE FOR KIDS AT BEACH

A guarantee against sun burned shoulder blades in the form of a large tent and a newly constructed bathing beach for the kiddies is the newest innovation for the Lake Wichita bathing pool to be announced by Sam Beatty in connection with the Fourth of July celebrations which begin Monday.

Scientific holds andb reaks for use in rescuing drowning persons, spectacular diving stunts and fancy swimming stunts by well known champions are among the many features announced for exhibition during the two day celebration. With the team from Dallas, Miss Marian Harper, said to be the best lady swimmer in the south is scheduled to give several exhibitions of the American crawl stroke.

Free fire works displays will be given each night at the amusement park beginning at 9:15 o'clock.

The performances are scheduled to begin at 2:30 o'clock in the afternoon and at 8 o'clock at night.

The sunshade above the pool and kiddies bathing beach are annouced as permanent additions to the pool. Two car loads of clean sand were used in building the beach.

FIRE DAMAGES CONFECTIONARY STORE ON OHIO

Fire of unknown origin broke out shortly after midnight in a store room in the Lone Star Confectionery and candy kitchen, 610 Ohio avenue.

Considerable damage to the stock and fixtures were reported to have been sustained from smoke and water. Fire men were unable to give the extent of the damage, but asserted that the blaze was controlled before it gained any headway.

The furnishings of the Westbrook hotel, located immediately above the confectionery, were reported to have been slightly damaged by dense volumes of smoke, which spread throughout the building.

The popularity of June as a month for marriage is inherited from the ancient Greeks and Romans. The goddess Juno, to whom the month was dedicated, was the patroness of marriage.

OUL'PEPPER THANKS RECORD NEWS FOR SERVICE EXTENDED

Wichita Falls Record News,
Wichita Falls, Texas.

Gentlemen: Words are too lame to express my appreciation of your liberality of space accorded the revival that it has been my pleasure to conduct under the auspices of the First Methodist Church South. I have never been treated fairer and squarer anywhere.

I find your paper abreast of the times and equal to any as a news gatherer. Its make-up is attractive; its editorial page strong. You merit the liberal patronage you are receiving from the merchants and a large circulation.

With the hope that Dame Fortune may ever knock at your door and her daughter, Miss Fortune may never pay you a visit,
I am, cordially and sincerely,
BURKE CULPEPPER.

VARSITY RACE TIGHTENS NEAR ELECTION DAY

With both the "Lily White" and the "Doc Strong" factions of the University club predicting a landslide respective tickets and warning statements from both sildes for the voters to beware of "eleventh hour" accusations the political pot seems to be about reaching the point where the lid will blow off before the election next Tuesday noon.

For the office of president, the one who will wield the croquet mallet on the Kemp's solidly built luncheon table for the coming term the voters have two strong men to pick from. One is G. W. Reid, active vice-president of the City National Bank of Commerce, on the "Lily Whites", and Richard Bailey, attorney, on Doc Strong's ticket.

The ticket of the "Lily White" faction follows: C. W. Reid, president; E. M. Mann, first vice-president; Herbert Voelcker, second vice-president; J. T. Harrell, treasurer, and John P. Marrs, secretary.

Th ticket to oppose the "Lily Whites" is: Richard Bailey, president; Norris Ewing, first vice-president; W. S. Curlee, second vice-president; E. P. Haney, secretary, and L. R. Buchanan, treasurer.

JURY PRAYS FOR VERDICT IN DALLAS

By Associated Press.

DALLAS, July 2.—After praying virtually all night for divine guidance in arriving at a verdict in the case against Charles E. Gaines, alias George Wheeler a jury in criminal district court early today condemned Gaines to the gallows. He was tried for murder in connection with the death of G. W. Street, register clerk, in a postoffice robbery here last January.

The story of the jury's deliberations came to light today after the verdict had been ready. Several of the jurors offered prayers for the salvation of the doomed man's soul it was said.

Gaines heard the verdict without visible emotion, later remarking sardonically:

"Well, I suppose we must all die sometime."

ISLANDERS STILL LIVE IN STONE AGE

LONDON, July 2.—Living in the same manner as the men of the Stone Age, a tribe exists on a little island in the South Pacific.

Such is the story told by Dr. Northcote Deck, a missionary, who lives at Aola and who has visited the island where these prehistoric people have their being.

"There are only about five hundred inhabitants on the island," said Dr. Deck, in a recent communication to the Royal Geographical Society, and because of their virtual isolation and through lack of anchorage for a ship, even their dialect has never been studied.

"They are almost cut off from the outside world by walls of coral limestone, and I found them to be still living in what might rightly be described as a manner of before the Stone Age.

"Iron is the thing they most covet, and for it they will exchange every available object. The caves of the island are swarming with flying foxes, whose teeth seem to form the only currency on the island.

"The islanders are great fighters and wrestlers. They use thrusting spears of hard black wood, twelve feet long and fully six pounds in weight, with fifteen to twenty barbs on each side. The making of these spears seems to be a lost art.

"Throwing spears are also used, with points made of human leg and arm bones. Some of them are tipped with a bone splinter, which is designed to break off in a wound and infect it.

"Although most friendly, these people are great thieves. They murdered three native teachers I left with them apparently for the sake of the few goods they had.

"They seem to feel keenly the monotony of their isolation and showed a settled melancholy both in their faces and in the cadence of their voices. Their only sort of music, to which they dance, consists in the tuneless of beating of a log."

Dr. Beck has presented to the British Museum a stone mace used by these people. It is symetrically ground, with eight knobs bound to the handle with sennit, and is seemingly for ceremonial use.

The wife of the lord mayor of London may appoint maids of honor and a trainbearer and she has her own private carriage.

SAFE AND SANE OBSERVANCE TO MARK 4TH HERE

Observance of the Fourth of July in Wichita Falls this year is not expected to take on the roaring, boisterous, loud celebration of the "funny section," but more a day devoted to less strenuous activities as a sunrise breakfast in the morning at the lake, big all day Shrine picnic and celebration at Call field, with swimming contests and water carnival, private picnics, and fire works display to offer a full day at the lake.

Patriotic talks by local ministers will be featured in many of the churches Sunday drawing the attention of the people to the significance of the day as the anniversary of the day when the shackles of tyranny were cast aside.

At the Shrine celebration at Call Field, Luther Hoffman, local attorney will make a short patriotic address.

As usual this year the parents of the younger children will advise in favor of a "safe and sane" Fourth of July and as usual it is expected that a few fingers will be burned and the canine population will be persecuted by the customary firecracker additions to their caudal appendages.

More than ever before, perhaps, Wichita Falls will have on its patriotic dress for the occasion, with flags flying in all of the city parks and from many poles on business houses.

TRAVELS TO CALIFORNIA IN BUNGALOW

TULSA, Okla., July 2.—A trip to California is being made from this city in one of the most unique "vacation boats" imaginable. This gasoline bungalow" is mounted on a two-and-one-half-ton truck chassis equipped with a motor from a five-ton truck.

The "voyagers," who are now en route to California in their "pullman" home, are Mr. and Mrs. Walter K. Campbell, their daughter, Dorothy, fourteen, and their son, James, sixteen. This family plans to spend two or three months "vacationing" all of which virtually will be spent on the road.

The plan of building a "house on wheels" in which to spend his vacation was conceived by Mr. Campbell, who is a prominent oil operator of Tulsa. Mr. Campbell considers that the vacation for himself and family will be a very economical one. There will be no railroad fares and no "profiteering" prices for meals, accompanied by liberal tips to waiters.

"While the first cost is a considerable item, the trip itself should be made at a fraction of the expense of the same trip by railroad," Mr. Campbell stated. "But we intend to use this car from year to year, for it is built for service as well as for looks. There may be a few repairs from time to time, but even they will cost less than railroad travel and its accompanying expenses.

Motor Bungalow Compact.

Campbell's "highway bungalow" is sixteen feet long and six feet four inches high. There are quite a few windows, which extend entirely around the car, causing it to resemble a street car.

Campbell's "car" is very compact. In addition to the driver's seat, there is another seat directly behind the driver's seat, on which the occupants may ride when they wish to view the scenery in front. Behind this seat is a commodious full size berth, with a six-inch mattress that folds into a long, comfortable seat when not used for sleeping purposes. Above this berth is an upper berth, which fastens to the ceiling when not in use. A third bed is provided by fastening a specially-built set of springs to the opposite side of the interior.

Across from the lower berth is a table that swings downward and rests against the right wall, but which when raised provides a large dining table. The lower berth is used for seats at this table.

Underneath the lower berth are a dozen drawers that extend entirely to the wall. These resemble a filing cabinet. Behind the berths is a large clothes closet of sufficient size to hold the ordinary clothing of four persons. Adjoining this clothes closet is the washroom.

EXPECT BIG CROWD TODAY AT RALLY OF CHRISTIAN CHURCH

A record breaking crowd is expected at the First Christian church Sunday morning at 9:30 o'clock for their patriotic rally which it is announced will be opened by the firing of the biggest firecracker that can be found in Wichita Falls.

Special music by the Sunday school orchestra will be featured throughout the program.

Following the patriotic rally and bible school exercises the morning worship and sermon will be held beginning at 10:30. Special solos, duos and music also have been arranged for this service.

OKLAHOMA INSTITUTES GREYHOUND RACING

TULSA, Okla., July 2.—The sporting blood of Oklahoma oil men has quickened with a new thrill.

It's greyhound racing—the coursing of the long-legged, deep-chested dogs around a race track. The races are held at night on a track brilliantly illuminated by electric lights.

The revival of this ancient sport, which for centuries has held such a grip on the English sporting public, was begun June 1, and in Tulsa one hears the greyhound races discussed wherever the sports gather.

Some famous pedigreed racers are entered in the races, and the dogs are given all the attention and care of famous race horses of the running tracks. Big purses are put up for the prizes, but that is not the only incentive which makes the races exciting. The oil men go the limit when it comes to betting, and some of the wagers laid on the speeding dogs which tear around the track like shadows at nearly a mile-a-minute clip would stagger an Eastern bettor who thinks he is a "plunger."

Greyhound racing promises to be the king of sports in this section this summer.

Pay Up! Keep Your Credit Good!

Responsibility Can Not Be Shifted

Whether You Are Employer or Employe, the Success of Your Business or the Holding of Your Job Depends Upon the Financial Condition of Those With Whom You Do Business

The Closely Woven Fabric of Our Commercial Life Makes Each of Us Dependent Upon the Other—Failures Hurt Every One of Us

What Are You Going to Do About It?

—300 Members of Retail Merchants' Association Ask You to Get Right—

Pay All Monthly Accounts Promptly

—Credit is a much abused element in business. The majority use it conscientiously as a convenience, while others use it to obtain merchandise or service as a pretext to delay payment over a long period of time.

Permit Us to Extend Our Thanks to Mr. Prompt Pay. Without Him Many Firms in Wichita Falls Could Not Continue Business.

This advertisement is not directed to those who understandingly and intelligently use their credit, but rather to those who have habitually and flagrantly abused it.

—Present business conditions have forced upon us the necessity of demanding prompt payment of ALL MONTHLY ACCOUNTS, due on the first and payable not later than the tenth of the month. This is vitally important. Keep the faith and maintain the confidence the Retail Merchants' Association of Wichita Falls has in you and your ability to pay. If it becomes necessary for you to violate the terms upon which credit was granted to you, by delaying payment beyond your ability to pay, it should be taken up with the member of this association to whom you owe money, so that he can make his arrangements accordingly.

DON'T FORCE YOUR MERCHANTS TO OPERATE ON A CASH BASIS.

—Pay up. Keep your credit good. It will help make better business for the grocer, butcher, doctor, dry goods merchant, druggist, shoe merchant, clothier—in fact, all businesses and professions. A good-paying clientele makes for lower prices, because it enables the merchant to buy on better terms and lowers the cost of doing business.

If You Work for Pay You Are a Merchant

—And You Must Be Paid to Continue Giving Service

—If you work for pay you are "in business for yourself." Your stock in trade is "Service." This you sell to your employer. As long as he continues to pay you on a certain date his CREDIT with you is good. But, should he FAIL TO PAY, you would be justified in severing relations with him at once.

—The merchant to whom you owe last month's bill is your employe. If you have thoughtlessly neglected his PAY DAY, isn't he justified in declining to deliver to your home more merchandise?

—How is the merchant to continue to give YOU service or merchandise if he hasn't the money to KEEP UP? You couldn't continue to give service to your employer if he neglected YOUR PAY DAY, could you?

—And then there is another very important point you must REMEMBER. If the entire community is prosperous, there are more jobs, more places for you to sell your services. In times of stress EVERY BUSINESS MAN is affected by POOR BUSINESS. Think it over—there is considerable food for thought—and this is the time for SERIOUS THINKING.

Charge Accounts Are Due the First—Payable in Full Before the Tenth

—Pay up if you want to keep your credit good.—

Important

Charge Accounts are due on the First and Payable IN FULL before the 10th

—This is not a new rule, merely the enforcement of the understanding the merchant had with you when your account was opened.

—This, of course, does not apply to written contracts, installment accounts or any accounts for which special arrangements are made at the time of purchase, except in the event that they should become delinquent.

—Your July First Bills!—

—Purchases made during June are due July first and payable in full by the tenth. Bills owing for purchases made prior to June first are now delinquent.

—If the total amount is more than you are able to pay at one time, you should see your creditor and make arrangements for settlement.

—The credit man will meet you more than half way.

Are You Abusing the Courtesy of a Charge Account?

Pay Up! Keep Your Credit Good and Be Assured of a Charge Account

—Unfortunately there are many folks who have a wrong idea about a "Charge Account." Some seem to think it a SPECIAL DISPENSATION to PAY WHEN THEY PLEASE. More often people allow the first and tenth of the month to pass by thoughtlessly, forgetting their responsibilities to those merchants who have been waiting for PAY DAY.

—Credit means confidence. It is the basis for the bulk of the world's business. But for you to think lightly of the confidence YOUR MERCHANT places in YOU is a breach of FAITH. If it were not for a fairly large percentage of buyers who PAY THEIR BILLS PROMPTLY on the first or not later than the tenth of the month selling costs would be higher, consequently increased retail prices.

—When a merchant extends to you the courtesy of a charge account, it is understood that all bills are due and payable between the first and tenth of the month following. Not partly paid, but PAID IN FULL. FORM THE HABIT OF PAYING YOUR BILLS PROMPTLY. You owe it to yourself and to the merchant who has "trusted" you with his merchandise. Demonstrate to the merchant that you have THE RIGHT to a charge account.

Terms of Charge Accounts Will Be Strictly Enforced in the Future

Pay all monthly bills in full before the 10th of month.

—Credit Rating Book Goes to Press July 15th—

Mr. and Mrs. J. O. Ammann, whose wedding Tuesday evening at the First Christian church was a pretty event of the week. Mrs. Ammann was formerly Miss Anna Dell Bradshaw, daughter of Mr. and Mrs. J. C. Bradshaw.

Mrs. E. W. Rutledge was matron of honor and Misses Emma McInnis, Estelle Keevil, Alice Downing and Eldora Bunnenburg bridesmaids. Master J. C. Bradshaw Jr., brother of the bride, was ringbearer and little Reba Joe Curd, daughter of Mr. and Mrs. P. B. Curd, and Dorothy Clark, daughter of Mr. and Mrs. Lee Clark, were flower girls.

FORMER WICHITA FALLS GIRL WEDS AT ABILENE

Miss Frances Urban, formerly of this city and well known by members of the younger social set and in church circles, was married at Abilene last week to A. W. Brethan, the wedding taking place at the home of the bride's parents, Mr. and Mrs. Andrew Urban. Miss Pauline Richolt of this city was maid of honor and was Miss Urban's guest for a week or ten days prior to the wedding. A description of the wedding from the Abilene Reporter will be of interest to the many friends of Miss Urban here, which follows:

"One of the most prominent June weddings to interest the social world here and decidedly one of the loveliest home weddings ever seen in Abilene was celebrated Wednesday evening when Miss Frances Urban became the bride of A. W. Brethan at the home of the bride's parents, Mr. and Mrs. Andrew Urban in Alta Vista. Although only the relatives and a few intimate friends were present, society was keenly interested and a large number of prominent visitors were here especially for the event.

The beauty of the handsome residence was enhanced by the artistic arrangement of ferns and shasta daisies which were used throughout the reception suite, the ceremony was read by the Rev. T. S. Knox, pastor of the Presbyterian church, in the living room before an improvised altar, whose background was almost covered with the flowers and lighted with many candles.

"Preceding the ceremony Mrs. S. M. Alexander sang Cadman's 'At Dawning' followed by 'Ruth' with Miss Lucille Auten playing the accompaniments and afterwards the wedding march from Lohengrin.

"Members of Miss Urban's Sunday school class, including Misses Adell Lock, Sara Sayles, Anphia and Alma Kall, Juanita Myers, Marguerite Barrow, Carolyn Hahafey and a little friend, Empress Young, daintily gowned in white and yellow with wreaths of daisies on their heads, carried chains of daisies and formed aisles through which the bridal party passed.

"Miss Pauline Richolt of Wichita Falls, the maid of honor, wore pale gold organdy touched with rose and draped with chantilly lace. Miss Laura Breihan, sister of the groom, wore pastel green organdy with trimmings of lace; Miss Sue Moore, cousin of the bride, was daintily gowned in lavender organdy and lace with hand-made flowers. Mrs. Grant Fitzell of Denver, Colo., matron of honor, wore her wedding gown, an attractive creation of white georgette, with ruffles of flowered taffeta.

"The groom had for his groomsmen Andrew Urban Jr. and Earl Hoppe.

"The bride entered on the arm of her father and was joined by the groom with his best man, Dr. E. D. Breihan of Denton, and other members of the bridal party. Master Billy Fulwiller acted as ringbearer, carrying the ring in a daisy, and little Miss Meta Young airily attired in pink tulle, scattered daisy petals in the bridal path. The bride was beautiful in a gown of Duchess satin with court train of Brussels lace. Her tulle veil was caught with a wreath of orange blossoms and she carried a shower bouquet.

"An elaborate recention followed the ceremony at which about 200 guests were present.

"Mr. and Mrs. Breihan left Wednesday night for a wedding trip through Colorado, Utah and California after which they will be at home in Abilene."

BETSY ROSS WILL BE SHOWN WEDNESDAY

Betsy Ross will be shown at the kidd'es' matinee Wednesday morning at the Strand featuring Alice Brady in the leading role. The picture will be a reproduction of the patriotic story of Revolutionary days and the making of the American flag.

The older children will be especially pleased with it and a splendid comedy entitled "Sinbad the Sailor" will be enjoyed by the younger ones.

MISS GRACE YATES BECOMES BRIDE OF BUREN DAY

On Wednesday at the family residence, 1806 Filmore, Miss Grace Yates, only daughter of Mr. and Mrs. M. T. Yates, was married to Buren Day of Oklahoma City, the ceremony being performed by Dr. H. D. Knickerbocker. In keeping with the quiet nature of the wedding the arrangements were simple but highly attractive, and the bride was lovely in her white satin robe, of a mode very becoming to her girlish type, and trimmed with hand-made flowers of self material. Her bouquet was the traditional brides roses and valley lilies in shower effect.

Her only attendant was Miss Nell Bryan of Oklahoma City, who wore a frock of white organdy and lace over pink satin. Miss Bryan's flowers were pink Killarneys in arm sheaf effect. The groom was attended by Nelson Brown of Oklahoma City.

The wedding was attended by about a score of friends, some of them from out of the city. An informal reception was held following the ceremony, when the bride's cake was cut and a light refreshment course served.

The bride's family are former residents of Colorado Springs, Mr. Yates having been operating in the Wichita Falls oil district for the past two years. The bride and her mother were in Berkeley, Cal., until the close of the school year this spring, the bride having been a student in the University of California, following her graduation from the Colorado Springs high school.

The groom is associated with his father in the realty business in Oklahoma City where he and his bride will make their home.

MRS. TAYLOR ENTERTAINS FOR HOUSE GUEST

Honoring Mrs. Russell Goodwin of Abilene, who will be remembered here as Miss Mary Paree, Mrs. Lowen Taylor gave a delightful party at her home on Kemp Boulevard Wednesday evening. The reception suite was beautiful with decorations of shasta daisies and greenery, and games and dancing furnished diversion until a late hour. Sandwiches and punch was served to the honoree and Misses Marguerite and Louise Fisher, Louise Jenkins, Dora Gunnit of Fort Worth, and Messrs. and Mesdames Max Murphy, Lasco Wheeler, Will Fisher, Owen Taylor, Harry Jenkins and Messrs. Milburn Nutt, Paul Erwin, W. G. Williams, Paul Swain, S. C. Moore of Fort Worth and J. L. Eileis.

HOSTESSES ANNOUNCED FOR LADIES' DAY

Mesdames T. W. Roberts, C. E. Rodgers, I. H. Roberts, Horace Robbins, Walter L. Robbins, J. A. Richolt and P. S. Richardson will be hostesses at the Golf and Country Club ladies' day which will be Tuesday morning. The games will begin promptly at 9:30 o'clock.

MRS. BURNSIDE GIVES DELIGHTFUL BRIDGE PARTY

Complimenting Miss Kathleen Lynch, Mrs. S. H. Burnside entertained at bridge Friday morning at her home. The reception suite where the tables were, arranged, was pretty with decorations of shasta daisies and other summer flowers and the high score favor was won by Miss Mary Naff. Miss Dell Marcus was presented the cut prize, and the hostess presented the honor guest a dainty pair of lingerie ribbon pins.

Following the games, a dainty salad plate was served to the honoree and Misses Adele Marcus, Inez Adrian, Mattie Lee Straus, Hallie Adams, Mary Jane Harlan, Mary Naff, Madeline Thomas, Ethel Moran, Lolu Woods, Madeline Mackechney, Ruth Nolan, Sibyl Kell, Crystelle Waggoner, Katherine and Lois Moore, Ruby and Gretchen Avis, Sadie and Cecelia Adickes, Eleanor Allen, Annie Lea, Rhoda Willis, Margaret Walker, Harris, Mildred Martin, Katherine Noble of California, Hope Hendrix of Austin, Bernice Towle of Harrisburg, Ill., Marguerite and Elizabeth Barnhart of Childress and Florine Ashcroft of Sulphur Springs.

STONE-ANDERSON WEDDING SOLEMNIZED

A pretty event of the week claiming great interest to a large circle of friends and coming as a distinct surprise to many was the wedding of Miss Helen Stone, only daughter of Mr. and Mrs. J. W. Stone, to Charles L. Anderson. The ceremony took place at 4:30 o'clock at the home of the bride's parents on Grant Street with the Rev. N. F. Grafton, pastor of the First Presbyterian nected with the Gladiolus Drilling church, officiating. The decorations were particularly pretty, with palms ferns and baskets of shasta daisies used profusely in every nook and corner. Beautiful table center pieces were formed with baskets of marigolds tied with white tulle.

The wedding, which was a quiet affair, only being witnessed by the immediate family and a few intimate friends, was the culmination of a romance which began while the groom was stationed at Call Field in the aviation service.

The bride wore an attractive midnight blue Beller model tailored gown with hat and accessories to harmonize and corsage bouquet of brides roses and maidenhair fern. Immediately following the ceremony the couple left for Chicago, New York City and points in Canada for a month's tour.

Miss Stone, who was born and reared in Wichita Falls, is a charming member of the younger set and both she and Mr. Anderson are well known socially and are great favorites. Mr. Anderson has only been a resident of the city a few years, coming here from Love Field at Dallas. Since the war he has been company, afterwards entering business for himself under the firm name of the Anderson Drilling Company. Mr. and Mrs. Anderson will return here and go to California with the bride's parents for the remainder of the summer, returning the middle of September to make their home.

MRS. MAXSON HOSTESS AT PRETTY PARTY

Mrs. W. E. Maxson of 1514 Fillmore entertained at bridge Friday afternoon complimentary to Miss Mary Taylor of Tyler, house guest of Mrs. Richard Bailey, and Mrs. Walter L. Robbins, a recent bride. The house was attractive with decorations of shasta daisies and verbena, and the hours were pleasantly spent with the games, in which Mrs. J. L. Jackson won the high score favor and Mrs. Burton Stayton the low score. Mrs. Claire Gannon was presented the cut prize and guest favors were given the honorees. A delicious ice course was served to Miss Taylor and Mrs. Robbins and Mesdames Richard Bailey, J. L. Jackson Jr., Claire Gannon, Earl Harvey, Clarence Moore, Peery Hancock, Burton Stayton, Leslie Stringer, Landun H. Cullum, Luther Hoffman, Clint Murchison, Charles Bass and Carter McGregor.

* * *

WOMAN'S AUXILIARY GIVE BENEFIT.

Monday, July 11, the woman's auxiliary to the American Legion, Pat Carrigan Post, will have a benefit at the Olympic theater, the picture being a Paramount, "The Wild Goose." The auxiliary will sell tickets and will have half of the proceeds from all tickets sold by the women. The money will go into the treasury, which is badly in need of funds for the work with soldiers in the Texas hospitals.

MRS. ALLEN HOSTESS AT BRIDGE LUNCHEON

Mrs. H. A. Allen was hostess Saturday morning at a pretty bridge luncheon given in honor of her daughter, Miss Eleanor, who has recently returned from Southern University where she has been a student the past term. The house was beautiful with decorations of summer flowers carrying out the daisy colors of yellow and white.

Nine tables of players enjoyed the games in which Miss Sibyl Kell won the high score favor, a dainty flower basket filled with daisies tied with tulle. Miss Ruth Nolen made the low score and was consoled with a pretty favor. A delicious luncheon consisting of pineapple salad, olives, sandwiches, angel food cake and orange ice was served to the honoree, and Misses Sadie and Cecelia Adickes, Ethel Mae Martin, Sibyl Kell, Lulu Wood, Hallie Adams, Mattie Lee Straus, Marguerite Walker-Harris, Leona Maricle, Katherine Noble, Rhoda Willis, Gay Gwynn, Madeline Thomas, Florine Ashcroft, Ruth Barnard, Kathleen Lynch, Mattie Ruth Carlett, Anita Monroe, Louise Hamlin, Adele Marcus, Lester Davis, Elizabeth Smith, Ella Merle Mathis, Ruth Nolen, Ruth Crowell, Grace Shamburger, Guendoline Walters, Frances Gee, Ethel Owen, Madeline Mackechney, Crystelle Waggoner, Snda Willis, Ines Adrain and Mary Naff.

* * *

MISS KEEVIL TO LEAD ENDEAVOR.

Miss Anna Keevil will lead the Christian Endeavor program at the Christian church this evening which will be opened with a song service. C. R. Noles will lead in prayer followed by the reading of the scripture lesson by the leader. Paul Conner will render a violin solo and Paul Rutledge will discuss the lesson. Mr. and Mrs. R. E. Shepherd will give a vocal duet and the Rev. J. Lem Keevil will talk on "Thy Will Be Done With My Strength." Questions will be asked and answered by the members which will be followed by roll call answered with quotations from the scripture.

* * *

POPULAR HOUSE GUESTS GIVEN MATINEE PARTY.

Mesdames J. J. Perkins and Frank Timberlake entertained a group of girls with a delightful matinee party at the Olympic Monday afternoon honoring their house guests, Misses Rachael Timberlake of Jacksboro and Thelma Wulfjen of Mineral Wells.

Following the show, an ice course was served at Pells.

Those present included the honorees and Misses Lulu Wood, Crystelle Waggoner, Ruth Barnard, Mattie Lee Straus, Flora Fisher, Edna Kay, Madeline Thomas, Hallie Adams, Mildred Martin, Rhode Willis and Katherine Jones of Memphis.

SOCIETY

T. E. L. CLASS ENTERTAINS WITH ICE CREAM SUPPER.

With the husbands as honor guests, members of the T. E. L. class of the First Baptist church entertained Thursday evening at the church parlors with a delightful old fashioned ice cream supper.

A short program was given during the evening in which Miss Louise Scott gave an interesting reading, followed by a solo by Mrs. Fred Barron.

A game which furnished an unusual amount of entertainment and amusement was the initiation of a number into the honorable order of "Boots Without Shoes." After the game, little Miss Lena Maud Gholson gave two readings which were followed by a violin solo by Miss Daisy Wharton who has returned from several months study in New York city.

Partners for supper were chosen by matching advertisements and paid for by the men according to the waist measure of his partner which was taken by Mrs. O. L. Powers who charged a penny an inch. Ice cream and cake was served.

* * *

MISS WHALEY HOSTESS AT PRETTY PARTY

Miss Corine Whaley, a popular member of the younger set, entertained a number of her friends with an informal dance Thursday evening given at her home, 1204 Taylor Street. About twenty couples enjoyed the dancing. Punch and nabiscoes were served those present throughout the evening.

* * *

SCOUT MOTHERS CLUB ORGANIZED FRIDAY

Preliminary organization for the troop six boy scouts mothers' club was completed Friday afternoon at a meeting of the scout mothers at the First Presbyterian church. Mr. J. A. Harris was elected president of the club. Other officers of the club will be elected at a meeting of the mothers in connection with the troop meeting Friday evening, July 15.

Following the meeting the mothers, scouts and young lady friends of the scouts were given a matinee party at the Olympic theater by the scoutmaster.

To get the mothers more interested in scouting, and to get them to assist the scoutmaster in his work with the boys will be the aim of the club, it was stated.

* * *

MISS MAYFIELD TO ENTERTAIN HOUSE PARTY

Several delightful affairs have been planned by Miss Josephine Mayfield of 1200 Filmore for the coming week when she will have Misses Elizabeth Garner of Nashville, Tenn.; Dorothy Hicks of Vernon and Frances Harris of Snider, Texas, for house guests. The girls are friends of Miss Mayfield acquired while at Ward-Belmont where the quartet have been closely associated for the past three years.

* * *

BULLOCK-WARD WEDDING SOLEMNIZED

Miss Bonnie Bullock of Bentonville, Ark., and William Byron Ward of this city, son of Mr. and Mrs. J. C. Ward, were married Wednesday afternoon at 1 o'clock at the home of the bride's brother, W. J. Bullock, at Bentonville, by the Rev. G. Lyle Smith.

The house was beautifully decorated with ferns and flowers of the Ozark.

Miss Teresa Yates sang the prenuptial solo, "At Dawning." Preceding the entrance of the bridal party Mrs. Charles McGill sang "I Love Thee." Miss Josephine Bullock, a niece of the bride, played the Lohengrin wedding march. The ceremony was read at a gate made of hollyhocks of various colors.

Miss Bullock had for her maid of honor Miss Teresa Yates of Wichita Falls and the groom was attended by Mr. Earl of Bentonville. Master Billie Bullock Jr. was ringbearer.

The bride was attractively gowned in a Beller model tailored suit with accessories to harmonize. She carried a shower bouquet of brides roses and lilies of the valey.

Miss Yates wore a gown of nasturtium lace with trimmings of gold ribbon and French flowers. She carried a shower bouquet of Killarney roses and wore a picture hat in pastel shades.

Miss Josephine Bullock, who was bridesmaid, wore a lovely gown of turquoise lace with silver trimmings and picture hat to harmonize, with a cersage of roses and sweet peas.

The groom is well known here, being the son of one of the oldest and most prominent families in the city.

The bride is the daughter of the late Judge A. H. Bullock of Johnson [illegible], and is well known here where sch was a frequent visitor at the home of her brother, W. J. Bullock and family, former Wichita Falls residents.

Following the ceremony a reception was held which was attended by more than 100 guests.

Mrs. Bullock was assisted in receiving by Mesdames M. A. Bundy, H. L. Baker, Claud, Strode, Elmer Knott and Chastine.

Misses Johnnie Mae Hill of Chickasha, Okla., and Frances Bullock presided at the bride's book.

The bride's table was beautiful with fillet lace cover and wedding cake, on which stood a miniature bride and groom forming the center surrounded with ferns and flowers.

Mesdames Jack Leukens and Wm. Jones presided at the cake cutting and Misses Elbertine Broome and Helen King presided at the punch bowl.

Following the reception, Mr. and Mrs. Ward left for Los Angeles, Cal., where the ywill make their home.

* * *

MISS MILLER GIVES MATINEE PARTY

Miss Joe Betsy Miller entertained the T. B. C. club with a delightful matinee party at the Olympic, theater Tuesday afternoon which was followed by an ice course served at the Olympia.

The affair was given complimentary to Miss Thelma Harrison of Dallas. Other guests included Misses Lucille Wiley, Lucile Benson, Ena Everton, Oneita Deems, eZna and Louise Poole, Georgia B. Leath, Ines Basham, Edna Kay, Icy V. Larkum and Gertrude Hines.

* * *

Election of officers will be a feature of the program.

* * *

PAUL PEARSON TO WED IN KANSAS

Paul Pearson of this city and Miss Beulah Smith of Galena, Kansas, will be married at the home of the bride Monday, according to an announcement received Saturday.

Mr. Pearson is well known here, being connected with the City National Bank of Commerce, and is also popular in social and church circles.

Miss Smith is a well known girl of Galena and numerous affairs have been given in her honor previous to the wedding.

Plans have been made by the Esculator class of the First Methodist Church South, of which Mr. Pearson was president, the past year, for a shower and other affairs to be given upon their return here.

Immediately following the ceremony, Mr. and Mrs. Pearson, will leave for a short wedding tour in the Ozarks and will be at home at 1013 Tenth street about July 10.

BULLOCK-WARD WEDDING SOLEMNIZED

Miss Bonnie Bullock of Bentonville, Ark., and William Byron Ward of this city, son of Mr. and Mrs. J. C. Ward, were married Wednesday afternoon at 1 o'clock at the home of the bride's brother, W. J. Bullock at Bentonville by the Rev. G. Lyle Smith.

The house was beautifully decorated with ferns and flowers of the Ozarks.

Miss Teresa Yates sang the prenuptial solo, "At Dawning."

Preceding the entrance of the bridal party, Mrs. Charles McGill sang "I Love Thee." Miss Josephine Bullock, a niece of the bride, played the Lohengrin wedding march. The ceremony was read at a gate made of hollyhocks of various colors.

Miss Bullock had for her maid of honor, Miss Teresa Yates of Wichita Falls and the groom was attended by Mr. Earle of Bentonville. Master Willie Bullock, Jr., was ring bearer.

The bride was attractively gowned in a Beller model tailored suit with accessories to harmonize. She carried a shower bouquet of brides roses and Lillies of the Valley.

Miss Yates wore a gown of nasturtium lace with trimmings of gold ribbon and French flowers. She carried a shower bouquet of Killarney roses and wore a picture hat in pastel shades.

Miss Josephine Bullock, who was bridesmaid, wore a lovely gown of turquoise lace with silver trimmings and picture hat to harmonize with cersage of roses and sweet peas.

The groom is well known here, being the son of one of the oldest and most prominent families in the city.

The bride is the daughter of the late Judge A. N. Bullock of Johnson City, Tenn., and is well known here where she was a frequent visitor at the home of her brother, W. J. Bullock and family, former Wichita Falls residents.

Following the ceremony a reception was held which was attended by more than 100 guests.

Mrs. Bullock was assisted in receiving by Mesdames M. A. Bundy, H. L. Baker, Claud, Strode, Elmer Knott and Chastine.

Misses Johnnie Mae Hill of Chickasha, Okla., and Frances Bullock presided at the bride's book.

The bride's table was beautiful with fillet lace cover and wedding cake on which stood a miniature bride and groom forming the center surrounded with ferns and flowers.

Mesdames Jack Leukens and William Jones presided at the cake cutting, and Misses Elbertine Broome and Helen King presided at the punch bowl.

Mr. and Mrs. Ward left following the reception for Los Angeles, Cal., where they will make their home.

BURKBURNETT.

On Sunday afternoon, June 26th, at the Baptist parsonage, Rev. T. J. Furniss united in marriage, Floyd B. Neas of Shreveport, La., and Miss Lucy Weaver of Devol, Okla.

William Harding and Miss Edna Brown were united in marriage Monday evening, June 27th, at the Baptist pastorage, Rev. T. J. Furniss officiating. Mr. and Mrs. Harding will make their home in Dewey, Okla.

The announcement of the marriage of Miss Vergie Stephenson to E. A. Goss in Ranger, Texas, recently came as a pleasant surprise to her large circle of friends in this city. Mrs. Goss was one of Burkburnett's most popular and efficient teachers last year and will be greatly missed by her former pupils and associates. Congratulations and good wishes are extended by her local friends.

Miss Emily Wilson has returned home from a visit with her brother in Dallas.

The marriage of Miss Francis Urban to A. W. Breinhan in Aberline last Wednesday evening was an event of much interest to many of our Burkburnett citizens.

The bride is the only daughter of Mr. and Mrs. Andrew Urban formerly of Wichita Falls, and the niece of Mr. and Mrs. M. L. Urban of this city. She was personally connected with the social life of Burkburnett, in that she served as one of the most successful teachers of music to a large class of pupils, visiting the city several times a week for a number of years. Space will not permit a full description of the wedding which took place in the home of the parents and is reported to have been one of the most beautiful ever witnessed in the city of Aberline. The young couple are making an extensive honeymoon tour through the West, including visits to California ad intervening points. The good wishes of the many local friends are extended on this happy occasion.

The friends of Mr. and Mrs. J. V. Perdue sympathize with them in the loss of their little son, Stanley, age five years, Friday p. m. Death followed a brief illness of twenty-four hours. Interment at Clara cemetery Sunday afternoon.

Nearly twice as many girls as boys were graduated from the high schools in Louisiana this year.

SHORT SKIRTS TAKING TOLL OF MEN'S EYESIGHT

SAN FRANCISCO, July 2.—Short skirts and silk clad ankles of women have distorted men's eyesight until now 90 per cent of the male population is afflicted with the strangest of new optical diseases, which science has designated, for purpose of identification, as "ocularis delectare." Furthermore, short skirts are said to be the cause of many traffic accidents which occur today.

At least that is the information from Dr. R. C. Augustine, president of the American Optometric Association, who has discovered the new afflictions.

Age apparently has nothing to do with the disease, for both old and young will suddenly, like a bolt from a clear sky, be stricken. Dr. Augustine claims that many are stricken while crossing the street—both pedestrians and automobile drivers.

The following diagnosis by Dr. Augustine discloses the symptoms of the disease:

"The male of the species, thus affected suddenly loses all sense of time and place—home or otherwise. His vision, distorted, is entirely filled with silk clad ankles and he bumps into other pedestrians, or his car hits another machine, or his street car crashes into something or the other that it shouldn't.

"So far science has found no cure for this," says the specialist.

So common is the affliction that optometrists all over the country are discussing it at various state conventions.

"Ocularis delectare," translated into English means to "lure the eyes away," according to Dr. Augustine.

A WIFE IN THE MAKING

BY PHYLLIS PHILLIPS

CHERRY GETS A FOLLOWER

After her speech Cherry vouchsafed no further information concerning her plans to the guests gathered on the veranda, although she did manage to take the young enthusiast who had applauded her so vigorously to one side and tell her in a sketchy way just what she hoped to do.

Mrs. Wilders, a young woman of about twenty-three or thereabouts, who had been married some three years, was most eager to hear all that Cherry had to say on the subject of independence for wives.

"It's just wonderful to have someone like you walk in and wake us up, Mrs. Randall," she whispered. "You don't know how lonely and restless I've been here since I was married, and Horace never can understand me at all. Thinks I should be perfectly satisfied just to be his wife. And yet all day long I sit and wonder and wonder. My house is tiny and we have no children It's been dreadful at times!"

"Come right along then and be my assistant over at Hamlen's then, Mrs. Wilder, if that's how you feel about things. I can use you, I know. And I'll talk to your husband myself if you are afraid to," she finished.

"You angel," said Mrs. Wilder, admiringly. "I know he won't let me. But it will be worth while to hear what he has to say on the subject after all. He must let me, though," she went on, "for if he doesn't I declare I'll run away or do somehting else foolish. That's how I've felt for ever and ever so long." There was tragedy in every inflection of her voice as she spoke.

Cherry did her best to entertain the circle for the rest of the morning. She could feel the suppressed excitement that her announcement had caused in their peaceful midst and almost felt the desire on the woman's part to get away and discuss her and her revolutionary ideas among themselves.

"How they will tear me to pieces" she reflected as she caught a hostile glance from a member's eyes now and then.

After all these women were the comfortable people. Dully satisfied with their lots and resentful of any new ideas in their midst. Poor Mrs. Wilders, she must have suffered living in their midst for three years—and suppressed constantly.

Fortunately Mrs. Randall, Sr., had gone to town for the morning and Cherry was spared ahy meeting between her and the gossipy circle.

At about 11:30 she served some iced tea and sandwiches and then after very warm greetings and much advice about the writings and her criticism of "Main Street," the Ladies' Literary Circle departed, talking volubly all the way down to the garden gate.

Cherry, overcome by the morning's exertions, sank back happily into her chair and lost herself in day dreams until her husband's step on the gravel brought her back to a world of stern realities with a start.

"Well, lady-bird, dreaming about how to be a good little wife to you, Ned?" he questioned, laughingly, as he kissed her on the lips.

"Just about, and in my own little way," answered his wife enigmatically.

(To be continued)

PLAN HARDING CELEBRATION

PLYMOUTH, Mass., July 2.—A mammoth parade on August 1 in honor of President Harding is planned by residents of towns near here. The president is scheduled to visit Cape Cod on that date.

You can make your life in Wichita Falls worth more to you and to your city if you save with the City National Bank of Commerce, for your money not only earns 4% compound interest and safeguards your future—it also serves the businesses by which you and your city live.—Adv

Mutual Understanding

A POLECAT on a highway gets more attention than a violet on a money bank—but it's not the kind of attention that inspires the desire to know that party better.

The cause of most trouble in this world is lack of mutual understanding and helpfulness.

The greatest asset a Company can possess is the confidence and good will of the public.

The Wichita Falls Electric Company wants to give you good service—and better service. To this end it seeks the co-operation of every broad minded citizen.

After all, Mr. Citizen, it is your problem as well as ours. You are the fellow who uses the "juice." You have your money invested in property here. Your business depends on the growth of this community. You are interested in ALL PROBLEMS that concern the progress of your city as a modern community.

YOU ARE ALSO A STOCKHOLDER IN THIS COMPANY. Your mayor and other city officials have the right to supervise and direct all expenditures and all improvements made by the company. They are responsible to you, as stockholders of this company, for the proper operation of your power and light facilities. Your interests are fully protected.

Electricity is making living brighter, better, cleaner and more convenient for all of us. It is one of the greatest boons to civilization. It is capable of even greater and more splendid development. It needs only greater vision on the part of all of us, greater mutual understanding and helpfulness. Don't shirk YOUR responsibility. Help us GROW, and we are bound to help you.

YOUR ELECTRIC SERVANT

Wichita Falls Electric Co.

Sunday school every Sunday at 10 o'clock at each church.

PROTRACTED MEETING AT METHODIST MISSION

Revival services will be conducted at the Factory church July 3 to 16, inclusive, according to the announcement of Rev. W. A. Betts, pastor of the Wichita Mission, Methodist Episcopal, South.

The services will be in charge of Rev. H. C. Hands, well known evangelist.

It also was announced that Rev. H. D. Pinkston will preach at the North Side Methodist church at 11 o'clock Sunday morning.

NOTICE!

—On account of taking Post-Graduate work with McCormick Medical College, Mr Edwin O. May, will have charge of my office during my absence.

—Mr. May comes highly recommended as an Optometrist, and will maintain the same high standard of service as heretofore set by us.

—I heartily commend him to the confidence of the public and profession.

Household Hints

MENU HINT
Breakfast.
Strawberries
Barley with Cream
Whole Wheat Toast
Cocoa
Luncheon
Buttered Beets
Raisin and Green Pepper Salad
Cocoanut Junket Milk
Dinner.
Casserole of Calves' Liver
New Creamed Potatoes
String Beans Apple Salad
Strawberry Ice Coffee

RECIPES FOR A DAY

Apple Salad—Scoop out center of red apples and bake until tender but not broken. Set on ice and when ready to serve fill centers with cottage cheese, place on lettuce and top with mayonnaise.

Raisins and Green Pepper Salad—Mix washed raisins with a sliced green pepper and carrot. Chill and serve with salad dressing on shredded lettuce.

Casserole of Calves Liver—Place in a shallow buttered baking dish, three thin slices of calves' liver, a strip of bacon on top of each slice and thin rings of lemon on that. Cover all with a beaten egg and crumbs and bake half hour, turning once.

TESTED RECIPES

Cream Soup—Press a cooked vegetable through sieve, add to one tablespoon pulp and one-half cup of liquid in which the vegetable was cooked, one-half cup milk and a few grains of salt. Thicken with one-half teaspoon flour mixed with a little butter. Cook, stirring constantly, until flour is well done.

Minced Mutton with Tomaton—Mix three cups chopped mutton, three table spoons flour, one-half teaspoon sugar and salt and pepper to taste. Add two cups canned or cooked tomatoes and one cup stock or water and bring to boiling point. Pour into a buttered baking dish and cover with buttered crumbs. Bake about one-half hour in a moderate oven.

Boiled Mutton—Put a leg or shoulder of mutton into a vessel of boiling water and let boil about ten minutes. Cook gently until tender. When half done add salt and a small onion, one carrot, one turnip and a stalk of celery. Remove the mutton from the broth, spread with butter sauce and sprinkle with finely chopped parsley. Serve with drawn-butter sauce seasoned winth chopped pickles.

KEROSENE USES

Windows will take on a wonderful gloss if you put a goodly amount of kerosene in the water they are washed with.

When Washing Oilcloth or linoleum put a cup of kerosene into a pail of warm water.

If Your Sewing Machine runs stiffly saturate the parts with kerosene and leave it on over night. In the morning wipe dry, then oil with a high-grade machine oil, and the machine will run like a breese.

To Clean Graniteware of smoke and discolorations, wet an old cloth with kerosene and wipe the smoke away.

HINTS

To Keep Dust From Flying under the door into the adjoining room, lay a dampened newspaper just inside the door.

Newspapers Instead of a Damp Cloth are excellent for pressing clothes.

Particles of Dirt in Bottles that it is impossible to reach, may easily be removed with a little warm water and soda. Shake the bottle well and then rinse.

A DAY'S RECIPES

Strawberry Rolls—Sift into bowl two scant cupfulls of flour and add one teaspoon of sugar, three-quarters teaspoon salt and four teaspoons baking powder. Rub in with the finger tips three tablespoons shortening, and when the mixture resembles cornmeal wet to a soft dough with about three-quarters cup of cold milk. Roll out lightly into a thin oblong sheet and cover with hulled strawberries. Sprinkle with sugar, add a bit of grated nutmeg and dot with bits of sugar. Roll up like a jelly roll, lay in a greased pan, and after brushing over with milk, bake in a very hot oven. Serve with a hard sauce to which has been added a few spoons of mashed strawberries.

Lemon Kiss—Melt four tablespoons of chicken fat and in it cook three tablespoons of minced green pepper until soft; then stir in three tablespoons of flour, one tablespoon of minced canned pimento, three-quarters teaspoon of salt and add very gradually two cups of thin cream or top of the milk. Stir constantly until the sauce thickens and boils and add two and one-half cups chicken (diced) and a quarter of a pound of sauted mushrooms. Stand over hot water until the chicken and mushrooms are heated through.

HOUSECLEANING TRICKS.

Soap, naptha preferred—For coarse boards, heavy kettles.

White laundry soap—For high-grade woodwork, glasses and china.

Scouring compound—For porcelain and windows.

Steel wool—For removing wax from floor before applying new covering for painted or varnished surface.

Floor wax—For floors and furniture.

Kerosene—Outdoors disinfectant, pouring down drains, clearing enamel sinks, tubs, etc.

Ammonia—For washing windows and linoleum.

Borax—For softening water and washing glassware.

SUGGESTIONS.

To Clean White Kid Gloves—Place them upon the hands, have ready two vessels partly filled with gasoline, one for first cleansing, the other for rinsing. Proceed as if washing the hands, using a small hand brush and ivory soap. When quite clean wipe with a clean towel, while still on the hands. Remove and hang in the sun and air. The gloves when dry will be beautifully soft and white.

Daintily Embroidered Bibs For a baby may be slipped over half of an ordinary dress shield. This, of course, is imervious, so that the child's neck and dress ae never dampened nor soiled, and the thin covers as much more easily laundered than thick, quilted bibs. The half shield is exactly the right size and shape, is merely to be bound where cut and may be washed.

SHRINE BAND WILL PLAY IN PARK TONIGHT

What is hoped will be a regular Sunday evening feature, will be the band concert by the Shrine 50-piece band at Bellevue Park this evening at 6:30 o'clock.

This band, which is said to be one of the best in the state has been rehearsing regularly and is said to have a wide variety of offerings. Joe Ward is conductor and L. V. Lawler, leader, of this organization.

The program to be given this evening follows:

March—Gloryland—O'Connor.
Overture — Templeweihe — Keler-Bela.
Selection—The Golden Girl—Howard.
Vocal Solo—A Son of the Desert Am I—Phillips. Mr. R. E. Shepherd.
Sextet from Lucia—Donizetta.
Whistling Caprice—The Little Toy Soldier—Recker.
Intermission
Sacred Fantasia—Providence—Tobani.
Trombone Characteristic — Lassus Trombone—Filmore.
Vocal Solo—Selected—F. Vaughn Ray.
Descriptive—A Trip to the Farm—Huff. (Synopsis, Bugle call and march to the depot. All aboard the train. All off for Rubeville. Band takes wagon to the farm. Greeting the home folks. Dinner call. Those unable to get to the first table play a waltz while the rest eat. They then visit the barnyard. Farewells. Then back in the wagon to the depot. All aboard. Arrival at the city. Marching back to the quarters. Finale.
Grand Selection—Superba—Dalbey.
Star Spangled Banner.

Movieland

Alice Calhoun.

"Main Street" ideas are taking everywhere, modern magazine stories, plays and now pictures are cleverly adapting the Main theme. The newest picture to follow the idea, or rather to use, the idea of Main Street is "Peggy Puts It Over," a Vitagraph productoin.

Alice Calhoun plays the lead in this story of small town life and a very pleasing heroine she is, too. She plays the part of Peggy, a young girl who strives to put life into the sleepy town of her birth, where the townspeople were still driving oxen teams and talking the proverbial b'gosh lingo.

It was a hard uphill task, but "Peggy puts it over," even against the wishes of the man she loves, who would have the old town remain old-fashioned and not be modernized. The story is a splendid one for Miss Calhoun, whose beauty and sense of comedy find good outlet in the part of Peggy. Miss Calhoun's next picture will be "The Matrimonial Web."

GLADYS BROCKWELL.

Gladys Brockwell, having left Fox some time ago, has been signed by the Novo syndicate, a new producing company backed by St. Louis capital, and is to be featured in six features, a series of society dramas all of which will be based upon original stories.

She is to work in the Louis Mayer studios in Los Angeles. The first feature is from a story written by Adele Buffington, a St. Louis girl, and Fycliffe A. Hill, president of the Photo Playwrights league, has written the second. The league is trying to win producers away from the idea of producing novel and works of famous authors only.

Warner Baxter, Ethel Clayton's leading man, says the first time he went on the stage he was so excited he lined his eyes with red grease paint instead of black.

GOSSIPY BITS.

A summer course at a Los Angeles university will claim Bessie Love's attention this year. She has enrolled and will study drama, English literature and psychology. A couple of years ago she distinguished herself by returning to high school to be graduated.

Both Louise Lovely and Roy Stuart are filming a series of Canadian northwest mounted police stories in San Francisco.

Johnny Hines, famed for the "Torchy" comedies, is to make three feature-length photo plays this year. His first one is already completed. It is made from the "Burn 'Em Up Barnes" stories.

GERMANY BACK TO NORMALCY IN "OBESITY"

BERLIN, July 2.—The corset-string barometer shows Germany fat and warmer. Banting became a lost art during the war and especially in the lean days of the revolution. Brunhilda, the Teutonic amazon of pre-war days, whether the buxom maid who cleaned your shoes or your equally buxom hostess, acquired the graceful lines of a nymph during the war—by dieting. Turnip soup, turnip bread, turnips and turnip pudding drove the reduco pill companies to the wall.

Germany's medium stouts and stouts have shown an amazing comeback. A glance around the average theater tends to make one forget that women and children are still actually suffering from malnutrition in any part of Germany. The type of heavyweight beauty for which Germany was famed before the war has again come into her own.

"How to Get Thin" advertisements stare at you from the magazine pages; the cure houses for the reduction of weight, which were hospitals during the war and closed during the revolution, are again crowded with patients eager to pay fancy prices for a diet which will take off flesh. Have they forgotten the effective turnips?

Each morning a panting parade of reducers marches up and down at Carlsbad, each parader carrying a glass of spring water in his, her or its right hand. Personal reconstruction to pre-war weight is rapidly being completed. Ladies' tailors, corsetieres and cure houses are rejoicing over an excellent season.

The first woman in America to make architecture a profession was Miss Margaret Hicks, who began practice after her graduation from Cornell, in 1880.

RECEIVE BIDS FOR ROAD WORK

Bids were being received Saturday at the office of Potts and Prentice, county road contractors, on sub-contracts to be let for the construction of concrete road in and near Iowa Park and Electra. If satisfactory bids are received for the work it is expected that work will start on the roads at once.

The receiving of bids on the work follows the action of the county commissioner's court in deciding to let the sub-contracts in order that the completion of the county road through to the Wilbarger county line can be completed as soon as possible. By sub-letting short strips at Iowa Park and Electra it will only be necessary to move the central mixing plant once.

Several bids on the work, which will total approximately six miles, were received Saturday. Action on the bids will probably not be taken by the commissioner's court until next week as no meeting of the court is scheduled for this week.

FORESTRY CONGRESS TO CONVENE IN JULY

ATLANTA, Ga., July 2.—Forestry as a public necessity will be discussed by leading lumbermen of the southern forestry congress, which meets in Atlanta July 20-22. In spite of the generally admitted need for state legislation to protect the forests, proposed laws recently have been defeated in Mississippi, Texas and Florida, and it is the purpose of the congress, it is said, to point out the great loss sure to result from lack of co-operation by the legislatures.

The congress will invite expressions of opinion from men and women who look at forestry from various points of view to find a common ground for lumber saving labor. Colonel W. B. Greely, chief United States forester, and Henry C. Wallace, a department head in the United States service, are expected to attend the conference. Gifford Pinchot, forest commissioner of Pennsylvania and a former United States forester, also is expected.

THREE REAL ESTATE DEALS IN CLARENDON

CLARENDON, Texas, July 2.—Three real estate deals of good size were made here the past week. The first was the sale of his home by E. W. Grogan when that passed to the hands of Mark Kelly. The consideration was $13,750. The second deal was between Joe Williams and E. W. Grogan; this was the sale of a section of land. The consideration was almost $22,000. The third deal between J. W. McQueen and Mrs. D. L. McClelland was an exchange of homes, the value exchanged being $4500.

CALOMEL DYING FAST IN SOUTH

"Dodson's Liver Tone" Is Taking Place of Dangerous, Sickening Drug.

You're bilious, sluggish, constipated and believe you need vile, dangerous calomel to start your liver and clean your bowels.

Here's Dodson's guarantee: Ask your druggist for a bottle of Dodson's Liver Tone and take a spoonful tonight. If it doesn't start your liver and straighten you right up better than calomel and without griping or making you sick, I want you to go back to the store and get your money.

Take calomel today and tomorrow you will feel weak and sick and nauseated. Don't lose a day's work. Take a spoonful of harmless, vegetable Dodson's Liver Tone tonight and wake up feeling great. It's perfectly harmless, so give it to your children any time. It can't salivate, so let them eat anything afterwards.—Adv.

We Take No Chances

Though we have every reason to believe that the milk from our cows is as sanitary as can be procured—we take no chances—therefore

Pasteurized Milk

is the only kind of sweet milk distribute dby us. It absolutely insures you against contagious germs so often carried by ordinary milk. It's the time of year now when special precaution is necessary — therefore, demand that your milk be pasteurized.

IF YOU ARE SICK

PROFIT BY THE EXPERIENCE OF OTHERS

Consult

Dr. Schultz

THE RELIABLE SPECIALIST

For scientific treatment of chronic, nervous and special diseases of both sexes, catarrh of all mucous membrane, stomach, liver, kidney complaints, blood and skin diseases. Hemorrhoids and prostatis complications treated without the knife, by a safe and humane system of scientific treatment.

If you are sick of experimenting, sick of failures, sick of being sick, come to me. I invite sick people who contemplate taking treatment to come. Special attention given in the combination of curative powers, modern electricity, vibrations, etc., with the scientific administration of selected Specific Medicines. I endeavor to do everything to promote the welfare of my patients.

IF YOU NEED A SPECIALIST WHY NOT THE BEST?

Are you a nervous wreck? Are you worn out and broken down. Are you suffering from vicious Blood and Skin Diseases, that destroy bone tissue, and disfigure for life? Backaches and kidneys give you all-gone feeling? Whether these conditions were caused by early excesses, or contracted by inoculation, it does not matter, for they will all respond to my treatment. Consult Dr. Schultz, the Reliable Specialist, who is well equipped by long experience that enables him to offer his service on a basis that no other can; his charges are lower for cures than the average physician generally charges for failure.

Those who have wasted time and money, and failed to get rid of their ailments, are especially invited to consult FREE. I am giving the benefit of over 30 years' honorable experience; some of my cures are truly wonderful, yet I do not work magic; I do not make the old younger, nor the blind see; I simply apply the knowledge my years of honorable experience have given me, and I do this honestly and intelligently.

HAWAII AIMS TO DOMINATE THE PACIFIC

HONOLULU, Hawaii, July 2.—Invitations have been issued to publishers, editors and newspaper men from all parts of the world to attend the first Pan-Pacific press conference, which is to be a part of the press congress of the world, to meet here in October. The outstanding purpose of the conference is to accomplish the permanent organization of newspaper men scattered throughout the lands bordering on the Pacific ocean.

"Is it not possible," the invitation inquires, "that we here at the crossroads of the Pacific may be of service as a drop-off station and distributing center of news information? There has been much discussion on the subject, and it might well be taken up at the press conference.

Dr. Walter Williams, president of the press congress of the world, has set aside a Pan-Pacific day at the congress, and Hon. Charles J. McCarthy, governor of Hawaii and president of the Pan-Pacific Union, joins in this invitation."

The invitation is issued by the Pan-Pacific Union, with headquarters at Honolulu. Alexander Hume Ford, secretary director of the union, is now on the mainland and will confer with Dr. Williams and other officers of the congress with regard to plans for Pan-Pacific day.

Because of the many races which dwell in the islands, newspapers and magazines are published here in English, Hawaiian, Portuguese, Japanese, Chinese, Korean and Filipino, and the editors of these publications are taking an active interest in the plans for the conference and look forward to a large gathering of newspaper men, not only from Pacific lands but from other countries of the world.

To Discuss Pacific Issues

Following the close of the congress next October Hawaii will loom up as the logical center for the discussion of all questions and problems arising in the Pacific, in the opinion of those who are in charge of the congress arrangements here.

Leading men of the Oriental races in the Hawaiian Islands are looking forward to the congress as a vehicle for the furtherance of a complete understanding on problems and questions that have long been perplexing, and which at times have been gravely misrepresented in other countries.

It is probable that some of these questions, with which the world is familiar, will be gone into on the day which will be set aside for the holding of a Pan-Pacific peace conference as a part of the general congress sessions. While this conference will be taken part in largely by editors, publishers and newspapermen from Pacific lands, it will be open to all congress delegates and members, whose opinions will be invited.

In Hawaii the problem of the meeting of the East and West has been solved very successfully, and more than a score of races and mixtures of races dwell contentedly together without racial friction. The people of the Oriental and other races are taking a keen interest in the forthcoming congress and are doing their share in the perfecting of the arrangements.

The ancient Hawaiian sport of surf riding, both with native surf boats and outrigger canoes, is to be a feature of the program of entertainment that is being arranged here for the press congress.

A ride for a distance of a mile or more, at express train speed, on the crest of a great comber off Waikiki beach, either in an outrigger canoe or on a board, is an experience that will be offered delegates. Duke P. Kahanamoku, world champion short distance swimmer, and other well known Hawaiian aquatic stars, will assist in the entertainment of the delegates to the press congress, and, under present plans, a swimming meet will be arranged at which the island champions, both men and women, will demonstrate their prowess.

DIDN'T KNOW HOW TO TURN FIRE ALARM IN

The unsuccessful efforts of a street car conductor to "pull" a fire alarm box Saturday at noon were cited by Assistant Fire Chief Smith as an example of the importance citizens should be certain they know how to turn in a fire alarm.

In this case, according to Smith, the conductor broke the glass and pressed down on the handle to the box door.

To turn in the fire Smith said, he should have "broken the glass, opened the door by pulling outward on the handle and then have pressed downward one time on the white lever inside the door."

The fire which was at an empty house on an alley at 2004 Kemp boulevard was reported by telephone and extinguished without a loss being sustained. The owner of the house could not be learned according to firemen.

FLAG POLES WILL WEAR "OLD GLORY"

Fears of some of the patriotic citizens of Wichita Falls that the flag poles in the city parks would be bare on the great occasion celebrating the Declaration of Independence appear to be groundless following the statement Saturday of one of the officials of the Chamber of Commerce that the park board would have a "Star Spangled Banner" waving in every one of the parks Monday.

The flag in Bellevue park was donated by the local Rotary club and the ones in Reed Plaza, Floral Heights park, and the others in the local system, were bought by the park board.

When the decision to erect flag poles in each of the local parks was made by the board, an opportunity to donate flags was given local citizens. The only response so far reported was the Rotary club.

Mexican Orchestra Said by Caruso to Be World's Finest Will Play in City Tuesday

"Mexico's government presidential orchestra is the greatest in the world."

Thus Enrico Caruso, world famed tenor, placed his stamp of approval upon the musical organization after hearing it play in Mexico City. The musicians played a special concert for Caruso and his party.

The orchestra, supplemented by Mexican operatic singers and classic dancers, is scheduled to give afternoon and night performances in Wichita Falls at the Wichita theater Tuesday.

Through a special arrangement with the Mexican government Col. John S. Berger will make it possible for the residents of this city and other cities throughout the United States to hear this wonderful orchestra, which is composed of 45 musicians, each excelling in the use of his particular musical instrument. The entertainers who will appear with the orchestra as added attractions have never before appeared in America. Their singing and dancing is typically Spanish and is calculated to transport the thoughts of any audience to the heart of sunny Mexico, Col. Berger states.

"This is a wonderful organization," Col. Berger said. "At a cost of over $200,000 this orchestra has been formed and placed in a position where its members can bring to the citizens of the United States melodies that heretofore have been heard only in that republic south of the famous Rio Grande. Everyone who has heard of music has heard of the presidential orchestra, which music critics concede is composed of the stellar musicians of Mexico. Caruso, the world famed tenor, heard the musicians while in Mexico. Hardly had the thunderous applause that followed the close of the music ceased than Caruso made his way to the plaza, embraced the orchestra director, Professor Torreblanco, and, in seven words, gladdened the hearts of the musicians.

"The most wonderful orchestra in the world," he said. Coming from Caruso that sentence was worth more than volumes from the music loving public.

The presidential orchestra is traveling through the nation in its special train and will parade through this city preceding the afternoon concert.

MAKE PLANS TO ORGANIZE ARTILLERY

Organization plans for the field artillery battery of the Texas National Guard to be organized here with Dr. J. E. Fletcher as captain are rapidly being completed and enlistments will be taken within a few weeks.

Dr. Fletcher announced Saturday that he was very anxious to get in touch with all ex-service field artillerymen, cavalrymen and infantrymen whether or not it is their intention to enlist in the National guard outfit here. His office is on the second floor of the Bob Waggoner building.

According to information received the battery will have an enlisted personnel of at least sixty-five men, five of which will be on active duty at the battery quarters caring for the horses and equipment. Thirty-two horses and two caisons will be included in the equipment of the battery.

Provisions will probably be made to quarter the battery at Call Field. The course of instruction for National guard outfits include, horsemanship, gun pointing and the technique of modern warfare. In addition to the course of instruction, trick riding, polo playing and social events will also be enjoyed by the personnel of the battery. The municipal golf links at Call Field will be open to enlisted men of the unit.

Under the new army re-organization plans the government is endeavoring to promote interest in the guard realizing that the guard offers a strong second line of defense. The government is spending much money to re-organize the National guard. The new rate of pay for army men also provides pro-rata pay for guardsmen whenever weekly drills are held.

Dr. Fletcher stated that drills would be held on Sunday afternoon, each drill being one hour and a half in duration. The doctor is anxious to interest young men and especially young married men who are permanently located in Wichita Falls into the organization.

The officers for the outfit will all be ex-service men of high moral character, men who have previously shown their ability in military affairs. He stated that the Lieutenants had not yet been selected.

The doctor was optomistic in his plans for the battery, giving his reasons for not having pushed the organization of the unit before, until now he believes the time ripe for the organization of the outfit. Federal recognition for the unit can be secured when an enlisted personnel of fifty-six men has been recruited. Whenever that is accomplished, it is only a matter of time until the outfit is provided with horses and equipment.

He stated that the organization would bring $25,000 annually to Wichita Falls. In purchasing supplies for the horses and men preference will be given to the local markets.

The organization of this unit is only part of the re-organization of the Thirty-sixth Division of Texas National Guard. Major-General John Hulen of Houston, commands the division.

MORNING BLAZE CAUSES LOSS OF $2,500 TO RESIDENCE

Causing a loss, estimated by firemen to be approximately $2500, fire destroyed an unoccupied house in the 300 block on Bluff street early Saturday morning.

According to neighboring residents the house was last occupied by Sidney Clark, who, at the time of the fire, had been absent from the city for several days.

The origin of the fire was unknown.

EPWORTH LEAGUE TO MEET TONIGHT

The Epworth League of the M. E. Church South will meet a the church Sunday evening at 6:30 o'clock. The subject this week will be "Thy Will Be Done With Our Strength," led by R. W. H. McCullough.

Song service will be led by J. W. Akin, Jr., who will also give a vocal solo. Miss Elizabeth Peyton will give a piano selection.

Talks will be given by the following: "What Is Our Strength?" R. W. H. McCullough. "How Shall We Gain Our Strength?" Mrs. A. L. Wilson.

ASK RELEASE OF CONVICT FOR TWO GOOD REASONS

LITTLE ROCK, Ark., July 2.—There are two very good reasons why George Alberty, serving a term for "moonshining," should be pardoned from the Arkansas state prison, according to a letter from Mrs. Alberty to Governor McRae. The two reasons were pinned to the letter in the form of photographs. They are twins, born since their father went to prison.

George Alberty, twenty-six, a farmer, yielded to temptation when he instituted the brewing of "white mule" in the hills near Fayetteville, according to the pretty Mrs. Alberty, who declared in her letter to the governor that college students, "who are supposed to be educated," caused her husband to go wrong. He won't make any more booze if the governor will be kind and let him come home to the newly-borns.

NEW WORLDS FOR OLD.

In their efforts to put into the curriculum something vital, educational authorities are turning more and more to the subject of geography. Not merely in the grammar grades do we find it now receiving more attention than it used to get; but even in the high schools and colleges it is being made an attractive feature of the course of study.

But the material which is now being offered in the geography is not the uninteresting body of facts it was in the days when the chief object of the teacher seemed to be to have her pupils know the length of all the rivers in the world, and the altitude of all the mountain peaks. It is small wonder that the children often wearied of this sort of educational setting-up exercise. Why bother at the age of twelve with "bounding" Utah, and make the cornering of this fact a momentous educational process in the life of the child? Utah will always stay where it is now, and if for any conceivable reason we must know what state is at the east of it, that information is to be had at any time for the mere tuning of a few pages.

The geography of today is a more humanized study than was its predecessor. We are coming to see that foreign countries in addition to harboring mountains and rivers and lakes, are filled also with people. These people are busy making things and they want some things that other peoples make. These people who live in other countries believe things which in some cases are different from the things which we believe. They follow customs which seem to us very strange at times. Some of them speak a language which is not like the one we speak.

More and more it is to be this material which is to be used in the study of geography, if some educators who have looked into this question are to have their way. It will bring about, they say, a better understanding among nations; it will make for sympathy and a liberal outlook on the part of the student. The emphasis is to be put more on the people and their ways of living and thinking, than on their physical environment, which was once about all there was to the study of geography.

And so it will come about in the end that instead of finishing his course in geography in the seventh or eighth grade, the students will continue it through the high school and even in college. For when it is looked at in this light, there is no end to the educational material offered by the study of geography.—Detroit News (Ind.)

Merely to keep their trigger fingers in good working order, the Navy fliers have been holding a bombing practice off Cape Charles. The former German submarine U-117 was sunk in sixteen minutes. The fliers scored one direct hit out of each twelve bombs dropped from an altitude of 1200 feet. This practice adds some belief to the theory that an adequate, properly trained and equipped flying force could make a most effective first line of defense. Certainly the development of the art of air attack with the increasing effectiveness of accurately dropping bombs would indicate that no foreign fleet could long withstand its deadly work. Incidentally airships are considerably cheaper than first line battleships.

Speaking of slow progress toward industrial normalcy, only one swallow seems to be engaged in the manufacture of summer.—Anaconda Standard.

Mrs. Stillman has become very sick over the revelations in the case—thus making it practically unanimous.—Cleveland Plain Dealer.

THE PEACE RESOLUTION.

The house of representatives was little impressed by the argument that the passage of the Porter resolution—or the Knox resolution, which is the senate's alternative—will prejudice American interests, so far as the conclusion of a peace treaty with Germany is concerned.

What is the advantage of a technical state of war for treaty purposes over a status which will result from the adoption of either the Knox or the Porter resolution? We have now a state of war in theory and a state of no war in reality. Hostilities are suspended by the armistice. Trade has been resumed. American merchant vessels enter and leave German ports. Our state department exchanges correspondence directly with the German ministry of foreign affairs. Goods "made in Germany" are freely imported and sold here. Our motion picture theaters are exhibiting films produced in German studios. What is the difference to the naked eye between the peace condition which exists today and the one which will exist after congress formally abandons the fiction that we are at war with Germany?

War can exist without a declaration. Peace can return without a declaration. It is the fact which counts, and the fact is that we have already ceased to be at war with Germany. The two resolutions reserve all our rights under the armistice and under the Treaty of Versailles, which Germany has signed. If we are unable to make a separate peace settlement (and there is no obstacle in sight to making it) we can fall back on the Versailles compact, which would become effective whenever we chose to ratify it, with reservations which would not have to be submitted to Germany.

The only practical effect of either the Porter or the Knox resolution would be to repeal the domestic legislation which remains, terminable by its own language on the expiration of the war emergency. The negotiation of a separate treaty or the re-submisson of a revised Versailles treaty would be left, as it must be, in the hands of the president.—New York Tribune (Rep.)

SHAKESPEARE AND THE MOVIES.

The decision of the governors of the Shakespeare Memorial theater at Stratford-on-Avon to allow the production of films in a building so hallowed throughout the world has shocked conservative England and stirred to the depths artistic and literary circles everywhere. One of the offending directors, when brought to book for his action, added insult to injury by stating that in many cases the moving pictures are better than Shakespeare. He averred that he had seen performances of certain Shakespearian plays "that would make a Charlie Chaplin film seem innocent and beautiful—which it is." Pinned down to the issue as to whether Shakespeare is 'vulgar," his reply was, "I must only say 'Read Shakespeare'." To which one of the British newspapers gave the retort courteous—"One hopes the advice will be followed—he bears reading." An editor on this side of the Atlantic is not so merciful. He suggests that the unfortunate director is of disordered mind and that on the first symptoms of his malady he should have been bound and gagged and deported to the Island of Yap.

The whole controversy proves not that Skakespeare has had his day—heaven forfend!—but that the moving picture has succeeding in establishing a hold on the affections of millions of theatergoers and a claim on their attention which will not be gainsaid. As far as vulgarity is concerned, that is, as Prof. Einstein might put it, a question of relativity. The standards of the Elizabethan and Jacobean period are not the standards of the present age, and there is no doubt that both editors of Shakespeare for schools and producers of his plays on the stage have exercised a wise discretion in silently omitting certain passages which might jar on modern sensiblities.

On the other hand, the screen picture can be "vulgar" also. In time past there were numerous instances. But it can also be clean and wholesome as well as interesting, and the magnates of the movie world will gratify public taste and consult their own best interests if they constantly aim to have their productions free from reproach on that score.—Washington Post (Ind.)

Without casting reflections, with no intention whatever to make accusations, but purely in a spirit of passing on information the news is here set forth that for the second quarter of the year which will end on June 30th, the Standard Oil group of companies will make dividend payments of approximately $29,331,727, the largest of any similar quarter in the history of the group with the exception of 1916. When you get the oil fever buy some Standard Oil stocks.

While they are coining all those silver dollars in Washington they might slip a few into general circulation so the country will know what they really look like.—Detroit Free Press.

Perspiring reporters would take it as a favor if some of our civic organizations would adopt a resolution putting an end to crime during the summer months.—Memphis News Scimitar.

Editorial Digest

PIRATES, BLACK OR RED?

Ships that vanish and leave no trace; some beached with all sails set, with everything about them in perfect order, but with "neither man nor ghost aboard;" unsigned notes washed ashore in the classic bottle; theories of pirates solemnly put forth by the 'government of a mighty nation" in explanation of this new "mystery of the sea"—such things do not often fall to the lot of editors to interpret. But when in the course of a day's work "the thrill that comes but once in a lifetime" thrusts itself into editorial retreats, it meets a response there which shows at least that appreciation of the possibilities in piratical adventure is not confined to romanticists.

Realizing that there are more things in heaven and earth than can be explained from the standpoint of twentieth century practicality, most editorial writers incline to the theory that a revival and improved piracy is, after all, probably the cause of the mysterious disappearance of ships whose fate has become the subject of governmental inquiry. With crime of every conceivable kind flourishing on land, they argue, why not crime and brigandage on the seas?

The piracy theory, the New York Times holds, cannot be dismissed "as an audacious invention." When law is flouted and violence rampant, why, it asks, should we not expect "a flaring up of piracy" since "after all great wars there has been a recrudescence of it." The Philadelphia Record points out that many things we thought impossible have happened, and pirates "are not necessarily confined to 'Treasure Island'." At any rate the Philadelphia Public Ledger tells us that "two great departments of a mighty nation's government let it be known that they believe with a serious belief that piracy is again upon the high seas."

Practical reasons like storms and "ship mortality statistics" do not meet the case in hand, most writers contend. While the Cleveland Plain Dealer would like to "cherish hope that malignant nature rather than malignant man has the answer to the riddle," nevertheless "nature seldom piles up such mountains of coincidences." It is the number of mysterious cases "within such a short space of time, and in a certain part of the ocean" which to the Adrian (Mich.) Telegram "seems to call for some new explanation," and since the Ithaca Journal News finds it "scarcely possible that a series of marine disasters could have overtaken so many vessels," and leave no wreckage, it draws the conclusion that "some human hand must have played a part."

If we discard "the theory of storm or sabotage" as "too prosaic," the New York World finds that of "submarine piracy" still available, and as "almost anything is possible to the submarine in war," it is conceivable to the World that a submersible privateer" could operate in unguarded waters. The Indianapolis Star also suggests the possibility that the submarine has "opened up a new chapter in piracy, just as the automobile has been making history in highwaymanship, bootlegging and various other departments of crime," and the Worcester Telegram quotes "the gentleman for whom the Deering was named" as expressing the belief that pirates could successfully carry on depredations for some time "by reason of the very fact that practical piracy would not be considered possible."

But pirates, to carry on a profitable business, must have some means of disposing of their loot. Here enters the theory of Russian connivance advanced by one government official. While to the Syracuse Herald it seems "much more likely that some crew has mutinied and taken up piracy than that the Bolsheviki are operating along our coast," the Portland (Me.) Herald feels that "the Red theory is really more plausible than that of old-fashioned pirates of the Captain Kidd type" and is, the Toledo Blade thinks, "the only notion put forward which possesses plausibility." The Buffalo Express supports this theory thus:

"The change in world conditions which has made the reappearance of piracy possible is the taking of Russia out of the list of civilized and responsible nations. Today any band of criminals who could seize a ship on the high seas and take it into a Russian port could dispose of its cargo with great profit."

The Boston Transcript inclines to the same interpretation, adding that "it is possible also that such gangs may have acted under the orders of the Soviet government itself, and have constituted a part of its forces," and the Syracuse Post Standard finds it "not impossible that the old black flag of piracy has been replaced by the red."

While this is "delightfully dramatic," the Brooklyn Eagle is however inclined to scout the idea of Russia acquiring a merchant marine by that process, because "what Russia could do with a merchant marine if one were presented to her gratis it would take a Philadelphia lawyer to find out." The Rochester Democrat and Chronicle also feels that Soviet Russia would have little to gain in such "an aimless, brainless enterprise," and since the evidence in support of that theory is "clumsy" the Baltimore News wonders if "the Bolshevist bogey which haunted the department of justice has been expelled thence only to take refuge in the department of state."

Listing possible explanations of the mystery, the Chicago Post gives the "humdrum theory that the sunken boats are all shipping board craft that just up and fell apart like the one-hoss shay," which the Springfield Republican advances more seriously. It must be borne in mind, the Republican says, "that seldom have so many dubiously seaworthy vessels been afloat in recent years," therefore, "that the number of mysterious disappearances should increase is not very surprising." And quoting cold figures of ship mortality the Wall Street Journal assures us that there is nothing sufficiently unusual in the present record "for a warm weather attack of nerves." Giving the whole riddle up, the Buffalo News contents itself with the poet's explanation that the ships "fell through a crack in the floor of the sea."

Clyde Shipyards Slow Up.

LONDON, July 2.—Shipbuilding in Great Britain during the month of May suffered a decline.

As an example the Clyde shipbuilding yards, which during May of last year launched 61,501 tons, this year only launched eleven vessels, with an aggregate of 22,625 tons.

The decline in trade and the consequent putting of the workers on short time is given as the main reason for the slump.

ON THE SPUR OF THE MOMENT

THE ANGEL OF PATIENCE.

To weary hearts, to mourning homes,
God's meekest angel gently comes;
No power has he to banish pain,
Or give us back our lost again;
And yet in tenderest love our dear
And Heavenly Father sends him here.

There's quiet in that angel's glance,
There's rest in his still countenance!
He mocks no grief with idle cheer,
Nor wounds with words the mourner's ear;
But lifts and woes he may not cure
He kindly trains us to endure.

Angel of Providence! sent to calm
Our feverish brows with cooling palm;
To lay the storms of hope and fear,
And reconcile life's smile and tear;
The throbs of wounded pride to still,
And make our own our Father's will.

O thou mournest on thy way,
With longing for the close of day;
He walks with thee, that Angel kind,
And gently whispers, "Be resigned;
Bear up, bear on, the end shall tell
The dear Lord ordereth all things well!"

"I spilled the beans," said Sims recently in Washington. At last he has made one speech with which everybody will agree.

A GOOD THING TO KNOW.

Now that it is hot
There is one thing
You should remember and
Allow it to be firmly impressed
Upon your mind and it is something
That everybody will tell you.
The great secret is that
It is the humidity and not the heat
That makes you suffer,
Having firmly established that
In your old brain pan,
You have solved the problem
And you will be nice and
Comfortable and cool.

EXTREME.

Her dress aroused his levity,
He almost had a fit.
Why so, you ask? Well, brevity
You know's the soul of wit.

Breakfast Stories

The recent spell of wet weather reminds one of the story of a minister who prayed with a full heart in similar circumstances.

"Now, Lard," he begun, "ye'll nae send us a roarin', tearin' wind, an' ——"

Here came a terrible gust, which brought the slates off the roof. The mininster paused and looked upward with dismay, bewilderment and dismay.

"Oh, Lard!" he gasped, "this is paifectly rideeculous."

The teacher had spent twenty minutes impressing on her pupils the correct pronunciation of the word "vase." The following morning she wanted to find out if the children remembered, so she turned to one little boy suddenly and demanded:

"What do you see on the mantelpiece at home, Jackie?"

"Father's feet, miss," came the prompt reply.

A teacher was reading to her class, when she came across the word "unaware." She asked if any one knew the meaning.

One little girl timidly raised her hand and gave the following definition:

"Unaware is what you put on first and take off last."

The wife of the profiteer was having great difficulty over the furnishing of the large house. She did not know the names of ordinary articles of furniture, and the more ornamental things completely puzzled her.

One day a woman said to her: "Have you read 'Lamb's Tales'?"

She thought for a while and then answered, nervously, "No, but I've got a gray sheepskin rug."

U. S. CITIZENS MAY BE GERMAN CONSULS

BERLIN, July 2.—American citizens will be invited to accept appointments as honorary consuls in the smaller American cities if the big industrial interests don't sabotage this new offspring of the governmental thrift movement. Word has gone out from the Wirth-Erzberger government that governmental expenses must be cut to the barest minimum. Instead of satisfying the flock of office-seekers who were washed in on the Erzberger wave, Wilhelmstrasse plans to put the political guillotine to work lopping off useless heads.

New York and Chicago will in any case have regular consuls when the peace details are concluded. But, with the low value of the mark, Germany will not be able to maintain the consulates in the smaller interior cities to the extent that consular service was deevloped before the war.

The group which proposes the honorary consular posts believes that a number of reliable Americans of German race may be found who will accept the posts as a matter of prestige. The consular corps—which for months has been busy making up unofficial slates as to who will get the choice American posts, which are now much sought after—will fight any movement which will cut down the number of appointments.

The big industrials are exerting pressure to send business men to America instead of professional diplomats and consular officers. Herr Hugo Stinnes has been working behind the scenes to send Geheimrat August Wiedenfeld, an authority on coal, finance and national economy to Washington. The industrials explain that, with the whole world fighting against German commerce, it is more than ever necessary to send their business brains, even if the industries themselves have to bear the expense.

Marriage Unpopular.

BOSTON, July 1.—Teaching and matrimony are no longer the alternatives of the college woman. This was demonstrated by the graduating class of 104 young women of Radcliffe College. Twenty-four occupations are shown in a census of occupations.

Thirty-one per cent of the class will teach; 9 per cent will remain at home; the same number will take up secretarial work; 7 per cent will continue study; 6 per cent will enter business fields; 5 per cent will take up art work, and others will follow medicine, music and social work. Four per cent have already taken up matrimony.

JUST A GENTLE REMINDER TO THE HELP THAT IT'S NO TIME TO PLAY WHILE THE CORN NEEDS HOEING

British Columbia, Oasis of West, Is Shrine of Thirsty Thousands from United States

VANCOUVER, B. C., July 2.—This city stands today as a community afraid of a peril whose magnitude it cannot comprehend.

In accordance with popular vote, the province of British Columbia is being placed on the wet list as one of the two provinces in Canada where liquor may be sold legally for beverage purposes.

Vancouver, directly across the line from Seattle, Wash., and, with its more than 200,000 people, the largest city in the province, is on the brink of something that causes forebodings in home, business establishment and club. Will the wet regime make for the incoming of a horde of undesirables from the United States and the middle western Canadian provinces? Or, on the other hand, will the gouty rich flock here in such droves that business will be given a stimulus it has never known before? These are the questions Vancouver is asking.

Even under prohibition the sale of full strength beer which was permitted here attracted large crowds of people from south of the boundary. On one Sunday this spring, when the sale of hard stuff was still in the future, more than 2,000 tourist automobiles, filled with visitors, cleared across the line from Washington State.

In addition a heavy traffic was reported on the owl trains and night boats from Seattle. It was one of the Sundays when more than the usual crowd came to taste of the pleasures of British Columbia scenery and beer.

But hooch, real hooch, what will that do to Vancouver?

This city has a four-million-dollar hotel, the Hotel Vancouver, which is pervaded by a London-Hong Kong-Paris-Naples and New York atmosphere. Big game hunters from the Congo rub shoulders with gentlemen who have come from visits to De Valera, or American millionaires, to arrange for the shipment of supplies to the Sinn Fein forces in Ireland.

You can meet United States Senators from the southern states and communists from the shores of England in Vancouver.

The fact that Vancouver is the jumping-off place for the Orient brings a constant galaxy of wealth and fashion to this city.

Purchasing Permits are Cheap

Vancouver's peril or fortune, whichever it may be, provides the principal subject of conversation as the government liquor control board proceeds with the opening of its growing chain of liquor shops.

To buy liquor you must have a permit or license. A resident can buy a permit good for one year for $5. A non-resident can buy a permit for the same sum, but it is only good for two weeks. A man who wants a bottle badly, but who is without the necessary $5 for a permit, may buy an individual permit good for only one purchase by paying fifty cents.

Those who abhor liquor but appreciate the merits of stout, ale and beer, can buy a special malt permit for $2 which entitles them to purchase these goods for one year.

The government is filling its shelves as rapidly as possible. Buyers have been sent to scour the markets of Europe, and new brands and vintages are daily making their appearance. A good quality of Scotch whisker sells for $4 to $4.50, with other goods sold at a proportionate rate.

When the complete stocks are on hand there will be vermouth, rare wines from select vineyards in France and Spain, liqueurs such as epicures love, brandies that have not seen the light of day for fifty years and the myriad of drinks that a good host can concoct from such material.

But British Columbia citizens are not altogether satisfied with the prices. Four dollars and fifty cents is too much to charge for good Scotch, they claim, and as a result the private liquor importing houses are doing a good trade by cutting the government prices slightly.

Paradise of Freedom

British Columbia's desirability to those who hold that access to liquor and liberty go hand in hand is strengthened as the result of the recent action of the prairie provinces and Ontario in striking out by referendum the right to import liquors.

Canada finds that Americans generally believe that all Canada is wet. This is not a fact. Canada is dry, with the exception of Quebec on the eastern coast and British Columbia on the western coast.

Until recently the other provinces allowed its citizens to import liquor as long as the actual transaction took place without their boundaries. But now there is a big arid waste between the east and the west.

How did British Columbia go wet?

It went wet to the tune of "Britons Never Shall Be Slaves!" sung lustily at mass meetings by enthusiastic anti-drys.

For some unknown reason the middle provinces, which are supposed to be just as British as British Columbia, failed to see things that way, and when they took their recent vote they even prohibited the importation of intoxicants and went bone dry.

Oasis of the West

The wets in British Columbia did not ask for a wet region. Instead, they conducted their campaign under the heading of "Moderation."

While the foes of prohibition were singing their songs about Briton and slavery, the drys were conducting an enthusiastic a campaign on the other. Staid educationalists and physicians took the platform and solemnly announced that liquor was bad for the lining of the stomach. It was also bad for the kidneys, they argued, and if a man took his pay envelope Saturday night and bought booze he was a foe to society as well as his family.

"Britons Never Shall Be Slaves!" was the refrain and retort that echoed from the opposing camp, while the drys argued about alcohol and the intestines.

The wets or moderationists, won. They won by an overwhelming vote, and British Columbia is wet. Anybody can buy booze if he has a license.

Will it "make" British Columbia or does it spell debauchery and ruin to this oasis on the shores of the Pacific?

GILA ROUTE SOON TO BE BEST TO PHOENIX

PHOENIX, Ariz., June 30.—There is belief locally that the time is approaching when it will be practicable to pursue the Gila route from Phoenix through Yuma to California. Interest has been stimulated by a California appropriation of $350,000 for construction of a highway from El Centro to Yuma.

On this end, concrete paving has been completed to Cashion, fourteen miles, and will be continued beyond Buckeye, about thirty-five miles. It is proposed, at least as a temporary measure, to cross Gila river on the apron of the Gillespie dam, fifty-six miles southwest of Phoenix, thence continuing westward by way of Gila Bend and Sentinel to connection with a road now being built eastward from Yuma to the Yuma county line.

SHIP BEER TO HAVANA

BOSTON, July 2.—Cuba may be the wettest country in the world, but native Cubans still like American-made beer, as evidenced by the fact that fifteen hundred large packages of malts were placed aboard the U. S. Fruit steamer San Pablo, which sailed for Havana recently. The cargo is the property of American brewing houses and will be changed into a little stronger than one-half of one per cent beverage by the addition of water and a few other ingredients.

WHITE MOUNTS OF AUSTRIAN ROYALTY ARE NOW USELES

VIENNA, Austria, July 2.—Some enterprising Austrians have started a great row here by suggesting that it is high time that the famous sixteen white horses of the Spanish Riding School should get out and earn their salt.

A movement has been started to have the horses tour the world giving performances in every city for the benefit of Austria. But these horses, the last of the Austrian aristocrats to be supported out of public funds, have many partisans who feel that the proposal is nothing short of treasonable, so it looks as though the famous performers would continue to lead an elegant though learn existence in the Hofburg palace stables for some time longer.

The Spanish Riding School was a feature of the old Austro-Hungarian court, which started way back in the time when the Hapsburgs were rulers of Spain. Centuries ago the forrunners of the present unfortunate tribe were imported from Spain, and thereafter the Spanish Riding School horses were bred in Lipizza, on the Slavonian border, near Trieste. Each year sixteen pairs of milk-white steeds were selected for the court. These were trained in the Spanish Riding School adjoining the royal palace. Along a narrow flagged pavement, between rows of closely set pillars topped with arches, these beautiful beasts were taught to waltz on their hind legs. They could not fall, because the pillars prevented them.

The riders were all famous aristocrats and all officers—the handsomest men and the best riders that the Austrian aristocracy could produce. They lived and dressed according to the most meticulous etiquette. On some occasionas they wore pale, fawn-coolred frock coats, with trousers of deerskin, high brown boots a yellow tricorne hat. On other occasions they were gorgeously arrayed in coats of scarlet, with gold and black decorations, white breeches, shiny black topboots and a black tricorne hat, with a gold and black cockade.

The appearance of the horses and riders of the Spanish School indicated the most extraordinary occasions, such as the visit of a foreign king or prince. The last time when they publicly appeared was on the occasion of the visit of Kaiser Wilhelm to old Francis Joseph, the Austrian Emperor, in 1915.

When Austria was divided up a great question arose as to what was to be done with the milk-white steeds in the breeding grounds at Linjeza. Lipivza itself went to the Italians, and finally the horses were divided between the two countries.

But the sixteen chalk walking beauties are still in Austria. It is to be feared that they get less pickings in the Hofburg palace, and their gallant riders find some comfort now in gay frock coats laid away in camphor. Sic transit gloria mundi!

BARONESS WORKS IN CALIFORNIA HOTEL

LOS ANGELES, July 1.—Baroness Ottily de Ropp, Russian noblewoman whose fortune was swept away by the war and who is now working as a needlewoman in a fashionable local hotel, is battling life with a smile.

The baronness, who formerly had servants to do her every bidding, has hopes of soon advancing from her present position to much better circumstances.

"It is a little hard to take up this work," she said. "However, I am devoting myself to it and hope to learn."

The baroness is the wife of the Baron William de Ropp, who was an intimate of many of the illustrious men of the imperial Russian regime and who is said to have owned a 10,000 acre estate in Lithuania. The couple came to America in 1915. The estate was devasted during the war and finally seized.

Lady Byng, wife of the new governor-general of Canada, is a talented writer and has published several books.

Making Prosperity Permanent

By ROGER W. BABSON

(Copyright, 1921, Fleming H. Revell Company. First published in this newspaper by arrangement with Associated Editors, Chicago.)

Fundamentally this country is sound. Temporarily, its business is ill.

It is a good thing when we are sick to become well again, but it is a better thing to seek a way to stamp out our malady for all time to come.

There was a time when men and women looked upon smallpox as a scourge from God, terrible but unavoidable. This was before we learned how to combat it. Today smallpox is no longer a plague.

There was a time when whole communities were shattered, and—in an economic sense—were all but annihilated by terrible crop failures. The farmers still have their troubles. Crop failures are still reported. But a modern crop failure is mild indeed compared with the devastating ruin that befell farmers in previous decades. Crop failures are no longer a plague.

Business, I believe, is ill with a preventable malady. Business depressions are a plague that could be stamped out if we but knew what to do.

Can we eliminate this disastrous succession of reckless ups and sickening downs? I believe so.

Can we make prosperity permanent? I believe so.

In fact, I know that this present period of depression is less serious than it would have been had we not done certain definite things to forestall the trouble. We have made a small start. The big question is how to finish the job.

Balance Sheet of Business Conditions

Before we try to work out a solution, I would like to make a few important entries on the balance sheet of business conditions, showing how, year after year, with scarcely a single set-back, we have grown stronger and richer and fundamentally more prosperous; and then contrast with this steady upward climb the uneven path we have actually traveled—the rushings violently upward, the staggerings far, too far, downward.

Only once during the past seventeen years has the fundamental growth of the United States been even temporarily retarded. Steadily, year after year, our nation has increased in population, wealth and business activity, excepting only during the one year following the serious panic of 1907.

In spite of temporary ups and downs, we may expect that the fundamental strength of the United States will keep on increasing regularly. There are numerous reasons to support this belief.

Better Banking System

For the first time in the history of the United States we have a flexible banking system properly functioning in a period of depression. Everyone knows that our old National Bank act was a product of the Civil War. It was passed wholly as a war measure back in 1864-65. It failed to accomplish many of the things anticipated of it. However, it did give use a basis for banking for half a century. Defects of the National Bank act were pointed out repeatedly. The chief defect of the act was the rigidity of the currency. When money was needed it was scarce and when there was no demand for money it was abundant.

It was pointed out repeatedly that the defects in the bank act would eventually lead us into a financial panic. These defects were the topics taught in our economic and financial text books. It was not until the panic of 1907, however, that anything of a conservative nature was done.

Shortly after the panic of 1907, a monetary commission was appointed, which made an exhaustive study of the financial conditions, not only of the United States, but of the leading European countries. The result of this investigation led, after a series of changes, to the Federal Reserve act, giving us the Federal Reserve Banks. While these Federal Reserve Banks with the Federal Reserve Board have been functioning only a few years, they have been of distinct service. They have given us a flexible currency and have appreciably minimized the evil effects of abnormal periods. Had it not been for the operation of the Federal Reserve Banks, we should have experienced before this a more drastic panic than has yet occurred. The banking situation in the United States long since has passed the crisis period and now is fundamentally sound.

Standardization

The war taught some very valuable lessons. Among these are standardization and the elimination of seasonal fluctuations in business. Standardization increased greatly during the war. The number of designs were decreased and the product increased. Standardization is the limiting of the field of activity not only of enterprise, but also of men. It is the confining of human activity to a specialized field. Its underlying principle is the division of labor. By standardization is meant the reduction of any one line to fixed types and sizes. A standard is simply a carefully thought-out method of performing a function. The standard method of doing anything is simply the best method that can be devised at the time the standard is drawn. The object of standardization is to get one way of making the product. By standardization during the war, plants were able to effect economy in patterns, to shorten the time of production, minimize preliminary work and decrease the cost of production.

Along with this increase in standardization has come the elimination of many seasonal business fluctuations. The ice man has gone into the coal business and the coal man has gone into the ice business. New England manufacturers who formerly sent out their salesmen only twice a year are now sending them out quarterly. Those who sent them out quarterly are now sending them out monthly. They are also sending their men into the district where the demand exists rather than where the parlor car routes run and the best hotels operate. Standardization and elimination of seasonal fluctuations have done much to decrease the costs of production and to stabilize business.

National Advertising

In the past few years a new profession has come into existence. This profession is national advertising. The advertising man who fully appreciates his position realizes that he is a professional man just the same as the doctor or the lawyer. Those advertising men who instruct their clients in proper advertising, rather than take instructions from their clients, can exert and are exerting a great influence on the proper production and distribution of goods.

It was only ten or fifteen years ago that men advertised when they had money, not when they needed business. Today advertising is being used to create demand when demand is needed. When used in this fashion, national advertising has great possibilities in the steadying of business conditions and in the elimination of these dangerous rises and falls of business activity that are now so evident.

Reserve Buying Power

Not long ago an investigation was made which indicated that of the Liberty Bond issues approximately 80 per cent purchased by the middle class is still in their hands. Large corporations have in many instances been forced to sell their Liberty Bonds, but the great mass of people still have the greater portion of their original purchases. So long as this continues the middle class people will possess a great reserve buying power. Sooner or later, as demands press themselves, this buying power will exert itself. Savings are also very evident in other channels. A period of depression cannot last long, when there is a large latent buying power.

Crops

As we have already seen, crop failures are becoming a thing of the past. A few years ago, when the Washington crop reports were released, the telephone and telegraph wires in our Wellesley Hills office were kept busy by those seeking the first word on the crop outlook. Now no one seems to give the crops any particular concern. We have had our concepts of value and business conditions so distorted in the last few years of abnormality that we are losing sight of a great many of our fundamental barometers. We are producing more than ever before and this is greatly to the nation's benefit. Excepting for the fraction of our crop which is exported, it makes little difference to the country as to the price of wheat—whether it is one dollar per bushel or three dollars per bushel. The number of bushels is the important thing. As the bushels increase the nation's wealth increases, and, therefore, we get stronger fundamentally.

Prohibition

Another optimistic factor in our present business situation is national prohibition. Before the prohibition act was passed $3,000,000,000 were spent annually for drink. Now this $3,000,000,000 that was formerly spent for drink, goes to the buying of merchandise, the building of homes, the furnishing of homes, and the starting of savings accounts. No matter what interpretation may be put on the law or what new legislation may be enacted, of this we are quite certain—the same $3,000,000,000 which formerly went to drink will hereafter be used for stimulating the regular channels of business. It will be used to buy merchandise, start savings accounts and do those things which tend to make people happy and prosperous.

Merchant Marine

Not only have we great factory capacity and great farm production, but we have the greatest merchant marine in our history. Where before the war we were hauling only 7 per cent of our foreign trade in American bottoms, we now, with double the foreign trade, are carrying about 50 per cent in ships bearing the Stars and Stripes. As a successful merchant needs delivery wagons, so a successful nation needs a good merchant marine. Thanks to the war, the United States has such today.

A Creditor Nation

Finally, we are today citizens of the richest country in the world. Where formerly we were a country owing the other nations of the world, we are today a creditor country, with the rest of the world owing us. For this and other reasons, this country, fundamentally, is all right. Even at the present time fundamental conditions are slowly but constantly getting better.

Temporary Conditions

And yet, what about temporary conditions? While the country has been continually growing richer, we have been having these ups and downs in business: The depression in 1903 and 1904; the panic of 1907; the prosperity of 1910-12; the depression following in 1913-16; the better times in 1917-20, reaching a zenith early in 1920, when business was at the highest point, considering all sections and all lines.

Now catch the point that I am trying to make, namely, fundamentally, conditions are absolutely sound, and yet even over any long period of years, we have first a period of prosperity, then depression, then prosperity, then depression, and so on. Stock prices, commodity prices, wages, and everything, go up and down. Within a few years cotton ranged in price from forty-three cents to ten cents a pound; wool, the average grades, ranged from $1 per pound to thirty cents per pound; silk from $16 per pound to $6 per pound; copper from forty cents to twelve cents; wheat from $3 per bushel to $1; while corn within a few months fell from $2 to sixty cents.

Recently I went to Gloucester to visit my father. When I left there, my father drove me to the railroad station. As we passed a certain little store, he mentioned the fact that there used to be a sign on this store saying: "One pound of pork and a quart of beans—10c." I said: "Let's see what we can buy that for now." So we stopped the nag and went in. The proprietor said: "Well, the price of that pound of pork and that quart of beans slowly went up during the past twenty years from 10 cents to 55 cents, reaching the highest point in the spring of 1920. Since then there has been a steady decline and the price is now back to about 30 cents."

If prosperity is to be made permanent, the extreme fluctuations above and below the line of normal growth must be eliminated. In succeeding articles we will consider how this is to be accomplished.

* * *

(Next week's article is even more encouraging. Mr. Babson will relate the unusual story of an investigation of the seventy leading business men of America, which he made personally. The way these men have "made" prosperity is one of the most important lessons ever written.)

Unfair Economic Situation of Farmer Blamed by Organizations For Current Financial Depression

By Associated Press.

WASHINGTON, July 2.—Admitting that the business depression is due largely to the fact that farmers quit buying, but declaring action necessary and justified, representatives of agricultural organizations today issued a statement on the general economic situation. A vigorous defense of the man on the farm is made and it is pointed out how he can be enabled to resume his buying stride. The National Grange, the American Farm Bureau Federation and the International Farm Congress joined in the statement, which follows:

In the hope that through proper understanding and action the severity of the present period of business depression may be lessened and its duration shortened, and in justice to the farmers of the United States, we, the undersigned representatives of agricultural organizations, respectfully submit the following for the consideration of all who are engaged in other industries and vocations:

Those who are presumably best qualified to render an opinion assert that the withdrawal of farmers generally from the purchasing markets is the chief cause of the present industrial and commercial stagnation, but we contend that it is unjust to charge farmers with carrying on an unwarranted buyers' strike. Impairment of their purchasing power, resulting from an unfair economic situation, caused their action.

Economic Balance Disturbed.

In peace times, certain standards of values were gradually evolved. While these standards were not uniform, nor were they always satisfactory, they did in a general way constitute bases of comparative prices upon which the various industries and occupations could function, and, on the average prosper. The relationship of these bases of values has been violently disturbed, chiefly as a result of the world war.

Bases of values control economic balance. When the prices of the products of a basic industry fall seriously below the general average of all prices, the entire industrial structure is affected. When it happens that almost half of the total population is either engaged in that industry or is directly dependent upon it for a livelihood, the result is indeed grave, since the buying capacity of the nation is proportionately affected. That is the situation in the United States now. Highly as we value foreign trade, the volume of domestic commerce is so much greater than when so large a portion of it is eliminated, the effect is worse than any conceivable loss in the foreign field.

It is evident that the withdrawal of farmers generally from the purchasing markets are caused chiefly by the fall in value of their products, measured by comparison with the valuation placed upon the things they ordinarily buy and not so much by the lowere prices of their products on the markets. The price of a bushel of wheat, for illustration, is not so essential as is its value, measured in terms of what it will buy.

It is clear that before farmers will be able and willing to resume buying on a normal scale, one of two things must happen: There must be an increase in the price levels of farm products sufficient to restore their proper and fair relationship to the other bases of value, or the prive levels of what the farmers buy must come to the plane of the values of farm products.

It is contended that there is slight hope of prices of farm products greatly enhancing in the near future. If this is true, the only way to bring about the return of normal business activity will be to lower other prices sufficiently to restore parity. It is needless to say that this will eventually result. The inexorable operation of natural economic laws will compel it. But that course will entail a long period of stagnation, which the right kind of action at this time, based on that understanding of economic causes and effects now so generally shared, might avoid.

Readjustment is Inevitable

It is asserted by the representatives of some branches of industry that the prices of their products cannot return to pre-war levels, because the costs of production have so greatly increased. The answer is that such prices must come down, if the products in question are to again find a market in the agricultural field. If the costs are excessive, they may be reduced.

Those who are expected to buy an article of commerce are fairly entitled to inquire into the costs of manufacture or preparation that constitute the basis for the price they are asked to pay for it. If unnecessary or unreasonable cost items are disclosed, refusal to purchase is justified.

It is admittedly true that the costs of manufacturing, distributing and merchandising have increased greatly, but we believe most of these increases can now be eliminated. It is evident that the production costs and prices of such things as are still too high could be reduced in the following ways:

First.—All unnecessary overhead expenses should be eliminated.

Second.—Restriction of output, except in case of actual overproduction, should be unheard of. Resort to this practice for the purpose of maintaining prices at an unfair level is most reprehensible, and will react disastrously.

Third.—Attempts to maintain wages at or near the inflated war-basis should be discontinued. Restrictions upon individual efficiency and production should not be longer imposed or tolerated. Willingness to work a reasonable number of hours should supplant attempts to enforce a shorted day.

Fourth.—Retailers should promptly readjust their prices so as to correctly reflect reductions by manufacturers and wholesalers.

Fifth.—Rents and interest charges should be substantially reduced.

Until these things are done, or price-equality otherwise restored, what reason is there to expect farmers to resume buying on a normal scale? It will be a grevious mistake to assume that they can or will do so.

Some Reductions Recognized

The fact that substantial reductions have been made in some lines is recognized. It is safe to say that credit for these is freely and generally accorded. It is not the purpose here to name those who have made reductions, or those who should. The public, including farmers, has a very clear general understanding of these facts, and will not err in placing the responsibility for a prolongation of existing conditions.

If the summer and fall months are allowed to pass without a genuine effort toward readjustment on the part of those who are obligated in all fairness to do so, a winter of suffering is sure to follow. Unrest will multiply. Savings will be exhausted Credit will be out of the question for those who are earning nothing. We will then face a situation not creditable to a people of our enlightenment, since it might have been avoided.

In conclusion, we declare that the farmers are justified in calling upon up production and avoiding waste. World-competition must be met. An inefficient nation is soon as hopelessly distanced as an inefficient individual.

Try This in Your Neighborhood

MARTINS FERRY, O., July 2.—Here is a new idea for hot weather. Roy Zimmerman invented the scheme. It works well, he says. He has no electric fan, but he has a substitute that is just as good. He disconnects the dust bag from his wife's vacuum cleaner, and placing the machine in the window turns on the current and a stream of cool air pours into the room. There is just one disagreeable feature. When the dirt digester is used it makes more noise than the fans, waking the neighbors when used late at night.

Centennial Celebration Planned For Dallas State Fair Program

DALLAS, Tex., July 2.—Commemorating the hundredth anniversary of that year when the tide of Anglo-Saxon civilization began trickling into Texas territory, the State Fair of Texas and Internationay Exposition will this year stage a Centennial Celebration of such proportions as will be fully worthy of the Great State it represents. The event will come during the State Fair season, October 8 to 23.

It was in the year 1821 that Stephen F. Austin and his band of a hundred or so families left the territory which is now Northern Louisiana and Eastern Arkansas, and made way to Texas. It was during the fall of that year that the intrepid leader of that little band obtained the consent of the Revolutionary Mexican government to found the colony of North Americans that afterward became the Republic of Texas.

The adventuring spirit of this seedling republic led to the founding of a great state, the largest in the United States, and now one of the richest agricultural areas in the world.

This stirring achievement of a single century is to be fittingly celebrated at the 1921 State Fair of Texas. The matter has been under careful consideration by the management for several weeks, and though the undertaking is one of unusual proportions, and calls for extraordinary activity in many fields, it was determined that the State Fair organization was best fitted to carry out in a way that would impress all the world with the fact that Texans of this day recall and revere the greatness of their fathers.

At the present time there is but a general outline of the Contennial Celebration completed, but a realistic portrayal of the hundred year progress of Texas will be sought. The whole program of the Contennial will hinge on two main factors, the stalwart spirit of those great pioneers who followed Stephen F. Austin into a trackless wild, and the great commonwealth that has reared itself upon that solid foundation.

"The State Fair of Texas and International Exposition wishes to assure its millions of friends in Texas that it approaches this glorious task with the proper spirit of humility," says President E. J. Kiest. "It is doubtless one of the biggest undertakings of our whole career, and we determined to take the work in charge because it seemed fitting to us that a great institution like the Stae Fair of Texas, devoted as it is solely to the development of the state should place its machinery at work in this splendid service. It is an enterprise so great, and comes on such a scope, that every organization which can properly enter into its spirit can be of assistance to us. We sincerely desire the support of all our friends and subsequent announcements will reveal just how they may join in the most sacred and the most pleasant duty Texas has ever had the opportunity to perform."

OFFICERS POUR "HOME BREW" INTO GUTTER ON INDIANA

Nine gallons of home brew were turned into the gutter in front of a residence at 1208 Indiana street Saturday afternon by Ranger Gunzaullus and Deputy Sheriffs Tarver and Sansbury.

According to officers, the brew was found in the house. Several complaints had been made at the sheriff's office regarding disorders in the house before the raid was made. No arrests were made.

Dr. Helen A. Pepoon, dean of women at Whitman College, recently retired after nearly thirty year sof service as a member of the college faculty.

COUNTY TAX BOARD CONCLUDES FINAL HEARING TO JULY 13

With their work completed until the public hearing, the county board of equalization adjourned Saturday until July 13. On that date a hearing will be held at which final protests on renditions for taxes for the current year must be made.

The office of Tax Assessor Deaton Saturday sent out the remainder of notices to taxpayers whose renditions were raised by the board of equalization.

It is expected that a large number of these property owners will protest their increases at the hearing on July 13.

Before the meeting of the board on that date the tax assessor's office will have completed the unrendered rolls with definite announcement to be made at that time as to the total taxable property in the county.

MURDERER RELEASED KEEPS HIS PROMISE

LITTLE ROCK, Ark., July 2.—Conscience has driven Sam Payne, former city marshal at Walnut Ridge, back to his cell in the Arkansas State prison, where he will spend the rest of his life, unless granted gubernatorial reprieve. Payne escaped from the state prison farm eighteen months ago, after being sentenced to life imprisonment for murder.

Weary of the life of a fugitive, the mountaineer convict walked into Governor McRae's office, introduced himself and told the chief executive that he was ready to go back behind the bars. In surrendering he was keeping a promise to officers at Walnut Ridge, who "pinched" him when he came down out of the mountains to visit his wife, who was critically ill. He would go to the state prison and give himself up, he said, if permitted to stay a few days unmolested with his wife.

The Human Nature of It.

The flivver has never won a collision with a locomotive yet, but probably thinks it could do a better job of licking icebergs than the big ships do.

SHERIFF RAIDS GAMBLING GAMES

The raiding of gambling games by the sheriff's department continued Friday morning. Two poker games, one in a building near the union station, and another in the uptown district on Ninth street, were raided.

Nine men were arrested in connection with the two raids, all paying fines for gambling. The sheriff's department has made several arrests during the week for gambling.

STRONG SUMMER COLOR

LONDON, July 2.—"The 'Summer' color," says Dame Fashion, "will be a soft shade of yellow, not unlike apricot, but more correctly described as Spanish onion peel color."

DEL MONTE FIG PRESERVES

—In Del Monte you obtain the perfect—that aristocrat of fruits.

—Only full ripe, selected fruit is used in preparing "Del Monte Fig Preserves." The slightly higher cost of Del Monte Fig Preserves is more than balanced by its supreme quality and flavor.

—Specify Del Monte Preserves when ordering.

OLYMPIC TO MATINEE AT 12:01 MONDAY

The Olympic theater will present its first midnight matinee of this season tonight, the performance starting promptly at 12.01 a. m.

This unusual performance will open the Olympic's first anniversary week. Wallace Reid with a cast of players including Theodore Roberts and Agnes Ayers in one of Byron Morgan's automobile comedies, "Too Much Speed" will be the feature picture for the midnight matinee and Monday, Tuesday and Wednesday's showing. Along with this, Manager Robert Sparks will present a novelty which should score a decided hit with Olympic patrons, an old time movie show. One of Mary Pickford's earliest two-reel pictures, "Mr. Burglar, M.D." has been secured and will be presented exactly as it was shown at the opening of H. S. Ford's first Olympic theater at Plainview, Texas several years ago. The only difference, Manager Sparks states, will be in the theatres and the change in copy on a few of the highly colored slides, which was made for comedy purposes. Music (?) and projection of the picture will be of the same type as of old. Following the old time movie show, the audience will be greeted with the present-day presentation. At the midnight matinee and evening shows, a prelude to the picture will be presented. The raising of the screen will reveal a beautiful outdoor scene with the sun rising from behind a hill. Virginia Hotchkiss will enter singing one of Charles Wakefield Cadman's most beloved compositions, "At Dawning." The showing of the big new Paramount picture will follow, accompanied by a musical program on the mighty voiced Hope-Jones organ.

The last half of the week, the Olympic offers the second of its Associated Producers productions, "The Ten Dollar Raise." "Mother O' Mine," was the first of these new pictures and scored a tremendous triumph when shown here recently. The management declares "The Ten Dollar Raise" to be its equal in every sense. It is from a story by Peter B. Kyne.

MADONNAS AND MEN COMES TO EMPRESS MONDAY AND TUESDAY

"Madonnas and Men" an unusually massive and elaborate motion picture production that caused enthusiastic comment from press and public at its premier presentation recently in New York, has been specially booked for the Empress theater and is to be shown beginning Monday for three days.

"Madonnas and Men" was directed by B. A. Rolfe from an original story detailing the madness of pleasure seeking ancient Rome and modern New York. The lust for pleasure is shown in all its startling realism and the surprising scenes in this great picture have never before been equaled. One sees the Roman Coliseum, the Roman amphitheatre, and the sacrificing of the Christian Martyrs. Then, in the main and modern part of the story, the prominent part of the story, the roof gardens and the dressing rooms of the midnight show favorites as well as the homes of the millionaires are all brought before the beholder's eyes in a bewildering spectacle never to be forgotten.

Elaborate and massive in the extreme "Madonnas and Men" comes to the Empress theater as the crowning achievement of the silent drama. That it will be accorded the same enthusiastic reception that has come to it in other cities seems a foregone conclusion for nothing like it for sheer dramatic interest and unusual presentation has ever been thrown upon the screen of any motion picture theater.

APEX OF LITERARY ART REACHED BY "HEART OF A CHILD"

Frank Danby, author of "The Heart of a Child," from which the master photoplay in which Nazimova appears Tuesday at the Gem theater was adapted, had a literary career started in the middle. The eminent English novelist, listed among the most successful fiction writers of the past quarter-century, interrupted her creative work to write several books on engraving, an art in which the author was immensely interested. Following the publication of these, she—for Frank Danby's real name was Mrs. Julia Frankau—returned to writing novels, with even greater success than before.

It is almost the unanimous opinion of literary critics that "The Heart of a Child" represents the apex of Mrs. Frankau's achievement. The story is one of optimism, yet unsparing in its realism. About the struggle of Sally Snape, the slum girl cast into the environment of cheap dance halls and later of the more fastidinating yet none the less dangerous surroundings of the stage, there is a humaneness that keeps the story from ever being overly fantastical.

"WHERE IS WESTMINISTER ABBEY?" ASKS MARY MILES MINTER OF LONDON PORTER

Mary Miles Minter (center) and her sister, Miss Margaret Shelby, being shown the sights of London

Another of our film princesses is taking Europe by storm. She is Mary Miles Minter. She recently arrived in London properly chaperoned by her mother, Mrs. Charlotte Shelby, and Sister Margaret.

AGUASCALIENTES, NOTED MEXICAN RESORT, VISITED

By W. HAMILTON WRIGHT
Record News Staff Correspondent

AGUASCALIENTES, Mex., July 2.—The Americans own a large smelting plant in this city, employing about seventy persons. Aguascalientes is also a railroad division point where a number of Americans are employed. The municipality owns its own band, which gave a concert on the plaza in the center of the city late this afternoon honoring the American trade trippers.

Aguascalientes has become quite famous over the republic as a watering place. There are several springs from which water running from 80 to 104 centrigrade furnish the municipal and public bath houses. The state has a number of these free to the lower classes, and some private houses have been opened in the last few years. However, as famous as the curative effects of the water may be, it will require the ingenuity of some Americans with capital to install a modern bathing system here. Americans are somewhat leary of patronizing bath pools where the diseased and cripples of the ciudad come without restrictions. In fact the Americans on this trip are somewhat vexed at the insanitary conditions which obtain in almost every town and hamlet they have visited on this trip. If the hawkers and candy sellers in their booths on the streets were known to be clean the trade trippers would unload much dinero for the dolces they sell.

Aguascalientes has a mediocre electric railway system running from the yellow-brick passenger and freight station to the business section and purlieus of the city. These cars carry the ubiquitous trailers marked "segunda clase," in which the most of the lower classes ride at considerably reduced prices. The electric lighting system is said to be very excellent. The town has fewer hills and mountains about it than any of the towns yet visited.

STORK OUTDISTANCES REAPER IN CLARENDON

Special to The Record News.

CLARENDON, July 2.—According to the reports filed with the county clerk to date there have been sixteen births and three deaths in Donley county during the month of June. Although this ratio is lower than it often times is in this county, yet this is considered very good.

Teuton General Is Stable Boy.

BERLIN, July 2.—A seventy-year-old German Major-General has been forced by poverty to become a horse groom in a Munich riding academy, testified members of a renters' meeting in Munich. The general paid half of his pension for the rent and heat and went to work in the stalls to prevent starvation.

BLACK GOWNS ARE LATEST FEMININE RAGE IN EUROPE

PARIS, July 2.—All feminine Europe is suddenly turning to black gowns and the woman who flaunts bright colors feels distinctly out of place.

The running of the Prix de Diane at the re-opening of the Chantilly race course was the most fashionable event of the summer on the continent. Promenading before the stands were thousands of the elite of Paris, London, New York and scores of other cities and fully 90 per cent of them were in black. The wave of sombreness has struck Berlin, Rome, Vienna and all other European capitals.

Edouard Ponti, noted French writer, thinks he knows the reason why.

"Fashionable dressmakers did not launch this mode deliberately, for it takes money out of their pockets," says Ponti. "A woman must have many gaily-colored dresses, because they are conspicuous and the same color cannot be worn every day whereas she may do very well with two or three gowns in black.

"It is not a measure of economy. Women are spending more money in Europe than at any time, excepting the period immediately following the conclusion of peace.

"It is simply the natural reaction against the wave of jazz-band gaiety that followed the armistice when everything was brightly colored. It is a historical fact that some mysterious link connects women's fashions with the prevailing attitude of the public mind. After the armistice noise, champagne, reds and yellows. Today sober second thought and realization that the world is still full of trouble, less noise and dancing, sombre gowns.

"If, in the near future, Europe becomes more stable and life everywhere returns to normal you will see lively colors reappear in the feminine toilette."

The cooks at Vassar College are men, the professors are women.

ASK ME

Blanche—Yes, George Loane Tucker died June 20th. He was very well known as a director and was the producer of "The Miracle Man" and "Ladies Must Live." May MacAvoy is to play the part of Lady Babble in "The Little Minister." Conrad Nagel and Lois Wilson have the leading roles in "The Lost Romance."

Arthur R.—Vera Gordon was the star of "The Greatest Love." Her next picture will be "The Provider," an adaptation of a Fannie Hurst story. Dorothy Phillips, James Kirkwood and Robert Cain took the parts of Victoria, David and Schuyler respectively in Allen Holubar's superproduction "Man-Woman Marriage."

Oliva — Thomas Meighan's first starring vehicle was "The Prince Chap." Lila Lee had the leading role. His second was "Civilian Clothes," from the big Broadway succes. The leading feminine role was taken by Martha Mansfield. Martha is at present playing opposite Eugene O'Brien in "The Last Door." In this picture she takes the part of Helen Rogers, while Eugene is both the Magnet and Somerset Carroll.

Pussywillow—What a pretty name! Elaine Hammerstein played in "The Daughter Pays," "Poor Dear Margaret Kirby" and "The Miracle of Manhattan." Her latest picture is "Remorseless Love." She is 24 years old. Anna Q. Nilsson is of Swedish birth, having been born in Ystad, Sweden. Eugene O'Brien is not married.

Lady Mary—So you don't approve of old pictures being given a revival? Yes, that was Eugene O'Brien who played the lead with Norma Talmadge in "Ghosts of Yesterday." Eugene played Howard Marston, while Norma had a dual role—that of Ruth and Jeanne La Fleur.

Ruth—Patty Arbuckle's leading lady in "The Traveling Salesman" was Betty Ross Clark. Wanda Hawley doesn't give her age. Yes, she's quite lovely. Her latest picture is "The House that Jazz Built."

Mlle. Foutette—Hullo, Frenchy, Parlez vous Francaise? Yes, the three Talmadge girls are now married. Norma is Mrs. Joseph Schenck, Constance, Mrs. John Pialoglou, and Natalie, Mrs. Buster Keaton. The latter was married May 31. Quite nice, isn't it? No, it's Dorothy that's married, not Lillian. Lillian is two years older than Dorothy. They are to play together in "The Two Orphans," to be directed by D. W. Griffith. Priscilla Dean's address is Universal studio, Universal City, Cal. I am sure if you write to her you will receive a reply.

Smiles—Pola Negri has not arrived in this country yet. "Passion" and "Gypsy Blood," are the only two pictures thus far in which she played that have been shown in the United States. Of course, the person you refer to didn't look like her. Pola didn't play in "Deception." The star in that picture was Henny Porten, another famous continental actress. I am ready to answer your questions any time you shoot them here. Just blaze away.

MINISTER RESORTS TO LIMERICKS TO DRIVE HIS SERMONS HOME

NEW YORK, July 2.—The laws of sanitation and the principles of modesty have been thrown to the proverbial four winds by modern woman in her pursuit of Lucifer, known to the Rev. John Roach Straton, of the Calvary Baptist Church of this city, as the demon, Style. In an excoriating sermon the Rev. Straton pronounced the knee length skirt out of harmony with God and detrimental to health. He called it everything but an eyesore. The present style of women's dress is "in crashing discard" with the "higher things of life" said the minister, waxing forensic, adding that: "The only thing that saves us from the full effect of the dangers of present styles is the humor of the situation." As an example of which he quoted:

"Mary had a little skirt,
The latest style, no doubt,
But every time she got inside
She was more'n half way out."

PRISCILLA DEAN WILL APPEAR IN "REPUTATION" AT EMPRESS THURSDAY

PRISCILLA DEAN — UNIVERSAL

JACKIE COOGAN AND IRV COBB VIE IN "PECK'S BAD BOY" TO BUST ONE'S VEST BUTTONS OFF

When Charlie Chaplin treated the world to his remarkable comedy, "The Kid," all thoughts and conjectures regarding the screen work of one Jackie Coogan, who played the title role in the picture, were set at ease with gentle, but firm reports.

In their reviews of the showing of "The Kid," the press reserved no space or words in the praise of young Mr. Coogan's portrayal. They referred to him as "the most wonderful child the screen has ever known" and as "the boy whose name will be on the lips of every movie fan in the world." Many other equally good comments were made and printed, giving paragraphs upon paragraphs of newspaper and magazine space in behalf of the newly "discovered" youngster.

And now Jackie Coogan comes forth with a subject that seals all thoughts of his screen possibilities being uncertain for future photo-production work. Jackie is bringing to the public of Wichita Falls a second picture. It is called "Peck's Bad Boy," a First National attraction, and will be shown at the Strand theater the last half of this week. In "Peck's Bad Boy" Jackie, of course, portrays the title role—that of the "bad boy." And those who have had the pleasure of seeing this second production—and Jackie's first starring one—claim him a true genius of the silent drama.

And while Jackie is the star and his work cannot be criticized, there are still other important and interesting matters pertaining to the Peck picture. First of all is the cast—an all-star cast. Heading the players, working opposite Jackie, are such personages as Doris May, Wheeler Oakman, James Corrigan, Raymond Hatton, Lillian Leighton, Gloria Wood, and others of equal note. Then comes the name of Irvin S. Cobb, America's famous author and humorist. Mr. Cobb has written all of the sub-titles for the picture and has added in this manner many laughs to those created by the action. Sam Wood directed "Peck's Bad Boy" and has made a thorough job of it. Mr. Wood is one of the best-known directors in filmland, having directed all of the new Wallace Reid and Gloria Swanson productions.

Enid Bennett in "Keeping Up With Lizzie" is the name of the attraction, the first half of the week at the Strand.

No matter where you may be, you will know that your valuables are safe if you keep them in a Safe Deposit Box in the wonderful valuts of the City National Bank of Commerce. The rental fees for these boxes and for storage of furs, silverware, etc., are very moderate.—Adv.

MOVIE CALENDAR

EMPRESS.
Monday, Tuesday and Wednesday—"Madonnas and Men" a superb production with all star cast.
Thursday, Friday and Saturday—Priscilla Dean in "Reputation."

Friday—Lillian Rich in "Half a Chance."
Saturday—All-Star feature program.

STRAND
Monday, Tuesday and Wednesday—Enid Bennett in "Keeping Up With Lizzie."
Extras: Pathe News and Topics of the Day.
Thursday, Friday and Saturday—Jackie Coogan in "Peck's Bay Boy."
Extra: Century comedy.

Cancer Not Contagious.
WORCESTER, Mass., July 1.—Cancer is neither hereditary, infectious, contagious nor communicable, according to Dr. Frederick Bryant of this city. He declared there is no need for isolation of cancer patients. He attributed the disease to some form of chronic stimulative irritation, which could be prevented.

The custom of tarring roads arose from observation of the fact that the tar from a barrel used in a bonfire celebration held the road surface together.

STEP ON YOUR GAS, ADVISES EXPERT, AND WATCH YOURSELF GO

COLUMBUS, O., July 2.—"With 110,000,000 self-starters in our nation, there is nothing to prevent the most wonderful prosperity in the history of the world, if they realize all that is necessary is to apply the self-starting principle to social and economic problems," declared Dr. Edward Amherst Ott, industrial expert, lecturing before a local audience.

"Think good times. Talk good times. Start buying. Give work to somebody, if it's only for a day.

"Come on, let's go!"

Here's a Minister's Word for It.
CAMBRIDGE, Mass., July 1.—"Everyone has the right to brew a little bit of beer in his own home. This is his personal freedom and nothing should take his right away from him," declared Rev. L. G. Landenberger, of St. Louis, speaking before the annual convention of the New Church members here.

Wichita Falls Record News

AUTO AND OIL SECTION

WICHITA FALLS, TEXAS, SUNDAY, JULY 3, 1921.

CHICAGOANS STAGE BUICK DRIVEWAY

That the automobile business is coming back rapidly was evidenced in one of the most impressive sales demonstrations in the history of the industry, when on Wednesday, June 15, Flint, Mich., the headquarters of the Buick factory, witnessed a driveway of 500 Buick cars by that number of Buick dealers from the Chicago territory.

A description of the driveway, several columns in length, was published in the Flint Daily Journal of that date, in which it was stated that the driveaway illustrated in its magnitude the position which auick holds in the automobile industry.

The driveaway was the convincing method used by the Chicago territorial dealers to show their faith and belief in the industry and also to demonstrate the popularity with the general public of the product which they are handling.

Line 26 Miles Long.

An appreciation of the size of the driveaway may be gained from the realization that when the last car was leaving Flint, the first car was nearing Duran, 26 miles away. Only the tremendous resources of a great organization made it possible to carry out the driveaway program.

Two special trains were required to bring the Buick representatives from Chicago. The speed with which the whole affair was organized own to the smooth handling of the last minute, detail is one of the most interesting phases. It was only decided to arrange for the driveaway a few days before it started and thus obtain cars in three or four days that it might take these particular dealers weeks to obtain by the regular method of distribution.

It was necessary for the Chicago sales branch to obtain the cash for the 500 cars and after taking up this task found it much easier than at first anticipated, for the various dealers were quick to grasp the opportunity of obtaining immediate delivery.

Wires were kept hot for three days until the last detail had been taken care of. Hotel accommodations for 500 persons were arranged for in the various cities along the route where necessary. It was one of the biggest tasks ever completed in so short a time by any sales force in the country. Right-of-way along the entire route was obtained through mayors, sheriffs and chiefs of police, and parking space was also provided where necessary.

Drive Remained Intact.

The drive remained intact until it reached South Bend, Ind., where the various dealers piloted their divisions to places of destination. Before departing from Chicago, all the drivers received copies of suggestions and instructions as to the way the entire trip would be carried out. Each copy told the men just what to do from the time they were handed them until they departed from South Bend to the various points of destination.

Each section of the driveaway left ten minutes apart. The cars were kept 200 feet apart in each section and did not drive more than 20 miles an hour between Flint and Lansing.

In the rear of the drive two special cars carried tools, equipment and mechanics, so that in case of accidents repairs could be made in the shortest possible space of time. There was a spare tire and inner tube on every tenth car in the driveway.

FRANKLIN SALES GAIN 100 PERCENT

SYRACUSE, N. Y., June 30.—According to officials of the Franklin Automobile company, sales for the first six days of June exceeded the corresponding period in May by 100 percent, this impetus in sales following the cut in price of the Franklin car, announced on June 1. This latest reduction, together with the previous cut in September last, means that the price of the Franklin has been lowered from $450 to $750, according to model.

Since February 10 the Franklin factory has been on a 100 percent normal basis and has been turning out cars at the rate of 40 a day. June production will total 960 cars. Indicative of the manner in which sales are crowding on the heels of production, it is interesting to note that on June 1 the Franklin company had on hand orders for June delivery amounting to 82 percent of the month's output.

BLOW-OUTS FROM AUTO ROW

BY FLAT TIRE

Al Booth, Frank Quiesser, Paul Von Allman, Carl Eckman, Herman Dodson and Lloyd Weaver participated in that Top Floors-Kiwanis Konkretes imbroglio Friday—and right here we wish to arise and remark that those boys have got to do one of two things: either quit playing baseball or start on a full tank of gas.

We didn't get much of a line on Paul Von Allman's abilities as an outfielder, as they ran him so ragged in one inning all we could see was Paul's tongue. And on the other side of the outer yards, Lloyd Weaver was steadily dropping flies that an old lady with a fly swatter would have "killed." Carl Eckman cheated by wearing glasses—sun reflected in the pitcher's eyes, and he had to give Eck bases on balls. Herman Dodson tried to hold the shoots of Homer Nanderford, and ran a trench back to the grandstand. Al Booth and Frank Quiesser—well if Al wasn't so young and Frank wasn't so fat, they'd both be stars. As it is they have a wonderful future in baseball behind them.

W. S. Langford of the Motor Supply company returned Friday from Mineral Wells and Dallas, where he spent the past week looking after business matters. Mr. Langford says that business conditions in that portion of the state are only fair and that Wichita Falls has nothing of which to complain.

G. J. Moulder of Wilhelm-Moulder Company reports the sale of two Chandler cars for the past week and says his firm finds no trouble in gathering in the shekels. Besides the sales, Moulder spent two days in Dallas this week which all goes to show "it can be done."

L. L. Dixon, Buick dealer, says that last week he placed the largest single order for Buicks that has been placed in Texas in the past two years by any single dealer to be delivered in thirty days. The order called for thirty machines and, as Dixon says, they must be sold. Chances are he will be out again about August 1.

Bill Lampe and Lloyd Weaver left Saturday to spend the week-end in Dallas and Fort Worth. We can't say much about this trip but they surely are a good pair to draw to.

E. V. Lesley of the Auto Tire Company is complaining these days about the long life of Federal tires. Lesley says they are making them too good for the customers can't wear 'em out, and also some of them can't pay for those that have already worn out.

The board of directors of the Wichita Falls Automotive Dealers Association had a special meeting the first of this last week and elected Walter Daugherty to represent the association in Dallas at a meeting of those mostly interested in the much discussed Truck or Senate Bill 101. Daugherty left immediately for Dallas where he will use the influence of the local organization against this measure.

W. A. Dunnahoo of the Buick Motor Company of Dallas spent a day in Wichita Falls last week with L. L. Dixon, local dealer. Mr. Dunnahoo covers the north part of Texas, and, according to him, Wichita Falls is getting its full share of automobile business. The outlook is wonderfully good, says Dunnahoo, and it should be only a matter of a short time before things will be normal once again.

Hugh Weaver of King & Weaver Company has added a paint and varnish room to their establishment, opening up last week. Hugh says they are in a position to give service on anything in the way of paint or varnish work, which should mean a great deal to this concern.

Karl Thompson of Williams-Thompson Company, local Packard dealers, stops at nothing when it comes to giving service. The past week there happened to be a Packard driver break an axle 156 up the Denver from Wichita Falls. He immediately phoned Thompson for a new part, stating he was in a bit of a hurry. So Karl got things together, went out to Call Field and started parts and mechanics on their way by airplane. This is the first instance of such service from Wichita Falls, but according to Thompson nothing will stop Packard service.

We notice an ad in today's paper from McFall Brothers that business is improving and from the list of names they have we think it has greatly improved, but according to J. M. this is nothing new business can't be anything else but good when you handle Dodge Brothers cars.

F. D. Keim reports the sale of a couple of Studebakers for this week and says that things are improving every day. Keim should be a good criterion for when he don't sell 'em they are not buying.

WORLD NOW ON WHEELS FOR KEEPS

DETROIT, Mich., June 30.—"Business in the automobile industry will be quite brisk this fall, reaching normal next spring." This is the opinion of Frank L. Klingensmith, president of the newly organized Gray Motor Car company and former vice-president of the Ford Motor Car company, summing up the motor situation following announcements of automobile price slashing throughout the country.

"Prices had to come down and they have done so," he said. "It was the one thing necessary to complete the readjustment period of the automobile industry and put it back on a solid basis.

"The results will be forthcoming in the fall when business will be moving at a rapid pace. Next spring, however, I believe, will find the automobile industry back to normal.

"The first price cutting had its effect this spring when business started on the upward climb. But prices were still too high and the people knew it. Accordingly, they held back on their buying. This in turn slowed up the automobile business. This second cut, however, has brought prices to the right level.

"The future of the automobile industry is very bright. The world is on wheels and is going to stay there."

SANTA FE TRAIL TO COLORADO POINTS NOW OPEN

Automobile tourists desiring to reach points in Colorado by way of the Santa Fe trail through Lamar, La Junta, Pueblo and Colorado Springs need have no fear of the flood that swept down the Arkansas valley in that state several weeks ago, according to word received from the Young Men's Business association of Lamar, which is located in the eastern end of the Arkansas valley in that state.

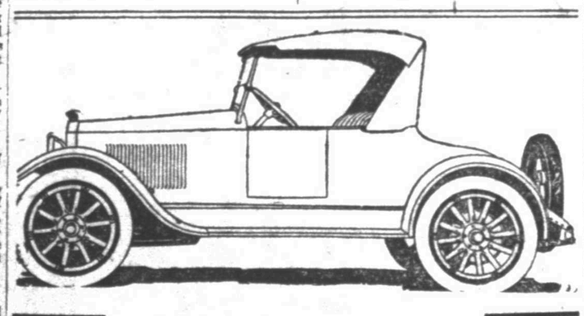

The roads through the valley have all been opened since the flood, the communication states, and are in good condition.

"Tourists coming into Lamar over the Santa Fe trail or the D-C-D highway will be detoured over a fine road south of the Arkansas river to La Junta, where they get back on the Santa Fe trail again. The trail is open and in good shape from La Junta to Pueblo, Colorado Springs and Denver."

The people of Lamar extend a cordial welcome to the automobile tourist and have excellent free camping accommodations for them.

STEAM AUTOMOBILE FINALLY COMPLETED

LANSING, Mich., June 30.—The new experimental steam automobile to be manufactured by the Kirchen Machine company, was completed this week. The car is backed by Lansing financial interests. It will be somewhat similar to the Stanley steam car and weigh less than 2,000 pounds. The cost of the machine has not yet been determined.

FREE OILING ESSENTIAL TO BEST OF CARS

It has been aptly said that the importance of lubrication to the proper operation and continued existence of the motor car can not be overemphasized. One who follows the developments in the automobile field might be tempted to think the present generation of car owners had been thoroughly educated in this, but then he finds one making some mistake in lubrication that snows that many car owners still do not know the real meaning of the subject.

For several years past no wise motorist has used grease as a lubricant for his transmission, yet many car owners who ought to know better still employ this heavier lubricant in this location. Grease can not flow to the bearing surfaces and in the transmission the gears cut a clean path through the grease when it is cold and run practically unlubricated thereafter. In addition grease has the unfortunate characteristic of carrying dirt and foreign matter that it may pick up. It has distinct drawbacks as a lubricant in any location, especially in cold weather, when it ought never to be used. In winter the grease is almost certain to become packed against the walls of any case in which it is used, while the gears operate entirely dry.

Grease Cups Are Problem.

When grease is used in cups it has the characteristic of getting hard so that the cup can not be turned down properly and very little lubrication gets to the bearing surface for which it is intended.

On practically all cars of any but the most recent vintage, grease cups are fitted at various locations. If the owner desires to substitute oil as a lubricant for the grease he has practically to replenish the cups every day. In many cases this would be worth the increased labor.

On the other hand, it may be possible to replace the grease cups with large oil cups having gradual feed. Some of the new car models have been designed with central lubricating points and with wick oiling devices, which require replenishing only once or twice a season. At any rate, the substitution of oil for grease for almost any lubrication service will be a benefit to the parts affected.

Naturally different parts of the mechanism require different lubricants; that is to say, different grades of oil. For the gears, the transmission, differential and rear axle a heavy oil will be the most satisfactory lubricant. Other parts will do better on a cylinder oil. For the average car two grades of oil will pretty well take care of all the lubrication needs.

Oil Fed by Wicks.

The last year or so has seen a number of extremely ingenious oil cups offered to the motoring public, some of them embodying a gradual feed, achieved by means of constricted passage that allow the oil to leak out only by degrees. Others employ what is known as the wick feed, in which the oil is carried up in a wick and fed gradually to the part needing lubrication. For such places as the shackle bolts of the springs, the cross shafts of the brakes, the universal points, in some types, this makes a very satisfactory arrangement.

It has always been the custom to lubricate universal joints by means of grease or graphite, because there is great difficulty in keeping oil in the joints. This part moves with great rapidity when the mechanism is in operation and needs the most effective lubrication. Recently it has been found possible to lubricate the universals by means of oil fed through wicks. In many cases this change would have to be the result of altered design, which the manufacturer is loath to do because of the cost.

Wick feed has the double advantage of being economical as well as efficient. In operation the oil travels up the wick by capillary attraction, just as it does up a lamp wick, and is discharged upon the surface requiring lubrication. The oil spreads itself over the whole surface, and really this method is the next best thing to having the parts run in oil. The wick oil cup does not require frequent filling and another advantage of the system is that dirt or foreign matter, even if it is present in the oil, can not make its way to he bearing surface.

Adequate Lubrication Essential

The question of obtaining adequate lubrication is one to which engineers have given and are giving constant thought. Some of them have even attempted the negative solution of the problem by employing bushings made of wood or of metal that do not require lubrication. In most of these latter there is a certain proportion of graphite which is intended to act as a lubricant, just as the soapstone griddles our grandmothers used to have would bake cakes without the application of outside grease. These lubricantless bearings serve very well for certain parts of the car's mechanism, but where there is intense movement they are scarcely up to the work. However, at that, they probably are better than grease cups, especially those that are never turned down by a careless owner.

Many engineers believe that eventupally we shall have a car that embodies a single lubrication system, feeding all parts of the mechanism. In that case all the owned would have to do would be to fill up a single central reservoir. In fact, a car approaching that ideal was exhibited at the shows a couple of years ago. In the meantime the owner who desires to treat his car with all possible tenderness and get out of it all the mileage and service that there is in it will substitute oil lubricants for grease, even at the expense of installing new cups of the gradual wick feed type. The change will eb worth while.

FRONT-DRIVE CAR NEXT ON MARKET

ST. LOUIS, June 30.—Maurice Bollstrom has been demonstrating his new front-drive automobile, the power being applied to the front rather than to the rear wheels. Built rather largely from standard units, the machine incorporates a number of new features, chief of which are the axles and the universal.

Among the advantages claimed for the inventions are readability, passenger comfort, lack of body sideway, rounding curves, maximum amount of pulling power, less skidding liability, absence of mechanicism back of the power plant, floor level with running board, any length of wheel base, lower slung body with same road clearance and effective brake control of the front wheels.

The test car resembles an ordinary automobile, except that the motor is somewhat higher atop the front axle and tonneau is slung lower and the rear wheels extend somewhat further back behind the body.

Questions and Answers

To the Automobile Editor:

Which type of insulation do you recommend for the core of a spark plug, mica or porcelain.—E. T. W.

Answer—Each type has its advantages. The mica type is apt to soak up oil, but the porcelain is more readily broken. Mica is preferable for an engine that does not throw oil, as it will stand the heat better and there is no danger of breakage while removing. But all engines throw oil after they become worn, in which case the porcelain should be used. This is more easily cleaned than the mica.

To the Automobile Editor:

The deather washer in the hand pump on the dash of my car has become dry and leaks badly.—S. D. A.

Answer—A little neatsfoot oil, obtainable at any drug store, is all that is required. Let it soak in over night. Castor oil may be used if handy. If the leather is worn thin, replace it with a thicker piece, using the old one as a guide in cutting.

To the Automobile Editor:

I have a four cylinder truck equipped with a —— magneto. The platinum points have to be changed every thirty days. Is there any way I can prevent them from wearing out so fast?—G. K. H.

Answer—In usual service the points should last a year or more. In replacing them you may not have set them exactly in line, but the most likely explanation is that the condenser in the armature has broken down. This will have to be repaired at a service station.

To the Automobile Editor:

When I laid up the car last fall I took the storage battery in the house and kept it in a warm place to prevent freezing. From time to time I added water, but now that I want to use it I find that the plates are completely covered with a whitish substance. Please tell me if this is harmful, and what can I do to get rid of it?—B. N. M.

Answer—This is lead sulphate and the battery may be ruined. It is sometimes possible to save such a battery by giving it a low charge for several days. Take it to a battery station, as it is not economical to charge a run-down battery on the car.

To the Automobile Editor:

My Ford engine misses explosions, and I find that the spark from one of the coils is weak. How can this be strengthened?—C. V. V.

Answer—If the vibratory points are clean and make good contact the coil will have to be replaced, as the trouble is either due to a leaky condenser or a punctured secondary winding. It would not pay to try to overhaul the coil and repair the trouble.

STUDEBAKER TELLS HOW TO CARE FOR CAR

With the summer motoring season here and the call of the open road at hand, the time of year when owners use their cars more than at any other season they are naturally more eager than usual to so operate their cars that they will get the maximum efficiency. As an aid in this direction, timely advice is given to owners by F. D. Keim, local distributor of Studebaker cars. In an interview on service, he says:

"In general, motor car owners should bear in mind that the heat of summer, combined with the harder and more consistent use to which they put their cars at this season of the year, causes more evaporation than at other times. This applies not only to water in the radiator but also to oil.

"During the hot weather months, attention should be frequently given to the radiator; the owner should see that it is kept filled, and at intervals it should be flushed out and filled with clean water. In connection with efficient operation of the cooling system, fan belt adjustment should be made, for the fan is needed in summer. The position of the spark lever should be watched to see that it is kept in an advanced position, thus assuring better cooling of the motor.

"Minor parts, such as spring shackles, wheel bearings, steering connections and universal joints require oiling more often in summer. It is well that the heavier grade of lubricating oil be used in the motor, than in colder weather, and oil should be drained from the motor at intervals not to exceed every 1,000 miles. Better performance will result when this is done.

"Careful attention should be directed to the brakes to see that they are kept in as nearly perfect condition as possible, for during the summer months they get greater usage, with more traffic to contend with and more cars on the road.

"Tire pressure should be watched more closely on tires that have been in use for a long period, because tires expand more in hot weather. The owner should have a tire gauge and use it in inflating. In taking long trips the owner should be provided with a good spare tire, and should go over all tires during the trip to see that they have no defects.

"Every owner wants to have his car in the best possible condition during the summer months, for it is then he uses his automobile most. To get this maximum efficiency, he must exercise greater care in going over the car."

WICHITANS GO BY AUTO TO SEE COAST

The following story from the Nashville Tennessean which was received by McFall Brothers, local Dodge Brothers dealers, will be of interest at this particular time as the touring season is now at hand and almost everyone is preparing for that summer trip via the automobile.

Messrs. Mason and Cully, two Nashville men, left Wichita Falls, Texas, March 12 for a trip up the Pacific coast. Various towns were visited on the trip which ended at Okanogan, Wash. After spending six weeks there they left for Nashville over the National Parks highway. A total mileage of 6,507 miles was made on the trip. Three hundred and fifty-five gallons of gasoline and 15 1-2 gallons of oil. The actual driving time was 94 days. Every character of road was traveled, good, bad and indifferent, including 100 miles of desert in southern California.

One broken spring with a broken battery terminal were all the repairs necessary for the trip. All the way the Dodge ran like a clock, according to its owners.

SCENIC BOULEVARD NEARING COMPLETION

FLAGSTAFF, Ariz., June 30.—There has been completion of seven miles of the boulevard that is to connect Flagstaff with the saddle of the San Francisco Peaks, near the summit. The road is to be about fourteen miles long. While it will have a rise of over 500 feet to the mile in places, the route is declared an entirely feasible one for automobiles. Toll is to be collected and the plans embrace the erection of a chalet hotel in the saddle near a great spring, a region of wonderful scenic beauty. It is believed that the snows will prevent use of the road not over five months of the year.

THE IDEAL SECTION.

The "ideal section" soon to be built on the Lincoln highway, is expected to become the most famous piece of highway in the world. The exact location has not yet been chosen, but it has been intimated that the section may be constructed in Indiana not far from Chicago.

"The funds for building the ideal section will be provided by the United States Rubber company," says L. L. Dixon of the Dixon Motor company, dealer in United States tires. "The company has always been interested in better roads, and has undertaken this work in order that the world may have a concrete illustration of the ideal type of road to build."

WHAT CALIFORNIA THINKS OF THE

Studebaker

"CHAMPION OF THE WEST"

—The achievements of the record-breaking Studebaker Light Six Mail Car are unique in the annals of motor car history.

—This individual car, a stock Studebaker Light Six, went out single-handed, or "on its own," as it is termed in aviation, and within 60 days captured the five most coveted records on the Pacific Coast.

—Never before has any individual car held at one time more than two of the five records that fell to this car.

FIVE BIG RECORDS HELD BY ONE CAR AT THE SAME TIME

Jan. 23rd—First into Yosemite.
Feb. 2nd—Broke Coast record San Francisco-Los Angeles.
Feb. 3rd—Established round trip record San Francisco-Los Angeles.
Feb. 23rd—Broke Valley record Los Angeles-San Francisco.
Mar. 23rd—Broke record from Los Angeles to Phoenix. (Since broken by the Lincoln.)

—Certainly no car has ever proven more convincingly its qualities of stamina and consistency. Speed did not make these records, for the Light Six is not an extremely fast car. Such records are possible because the Studebaker engineers have built into this light car endurance and performance of surprising quality.

Cord Tires are Standard Equipment on All Models

Excelsior Motor Company

F. D. KEIM

DEMAND FOR YANKEE CARS IS GROWING

DETROIT, Mich., June 30.—The automobile industry will have completed its readjustment by July 1. Price reductions, the past week, many of which were drastic, have resulted in substantial increases in orders. Several plants which were on the verge of closing down and others that were planning to reduce their working forces were forced to employ additional workers. Just how long the buying spurt on the part of the public will endure is problematical, but there is no disputing the fact that the general price reductions have had a wholesome effect on the industry in general.

Optimism Prevails.

A feeling of optimism prevails over the foreign trade situation. Encouragement of foreign loan issues and listing European securities on the New York Stock Exchange, with assurance that proceeds of the loan will be spent in the United States, leads to the belief that foreign demand will soon be able to absorb the surplus production.

The Ford Motor company has established its complete independence of outside factors and now belongs entirely to Henry Ford, his son Edsel, and employes of the company, according to announcement of E. G. Liebold, general secretary to Henry Ford.

All Taken Up.

The announcement follows a personal letter to all Ford officials by Henry Ford that the final payment of the $100,000,000 notes involved in the purchase of the stock held outside the Ford family, had been made recently before maturity. The Ford company belongs to its employees to the extent of several million dollars paid in for investment certificats, it was explained by Mr. Liebold. More than $7,000,000 has been invested by the employees under the investment plan by which interest averaging 14 per cent on the money paid in is returned.

Now the Ford company is able to proceed according to the ideals of Mr. Ford without outside interference, Mr. Liebold says. This means that the gigantic plans for making the Ford organization entirely independent of other manufacturers are to be carried out to the fullest extent possible.

Nothing To Do.

The letter to the officials of the company denied all published reports in circulation last spring that the Ford company was in financial difficulties.

"Mr. Ford did not deny these statements appearing in the press at the time because he wanted to find where and how the story started, and he did so," the letter reads.

More than $2,000,000 has been invested in the Ford company's investment certificates since January 1, it is announced. By this plan the employees are becoming virtually stockholders in the organization.

Sign Contracts.

Several contracts have been signed by distributors who will handle the output of the Durant Motor Corporation. The same agents in each city will handle all of the Durant lines, it is understood. At present it is expected there will be four grades of cars.

The new Durant car, expected to sell under $900, is said to be completed and up to the expectations of the engineers. The car is said to be a truly high-class machine with many refinements unusual in so low priced a car.

The next in class will be the Sheridan, manufactured in Muncie. Above that will be the Collins-Eight, to be made in the old Cadillac plant in Detroit. The fourth unit which, it is expected, will be manufactured in the new Flint plant is not yet announced.

Toledo may be the location of one of the Durant plants.

"While there is nothing definite on this as yet," said a Durant official, "we are working in that direction and if a plant is built in Toledo it will be something really worth while."

The automobile trade is making a big rebound to normal conditions because manufacturers have convinced the public that they have cut their prices to rock bottom. President John N. Willys of the Willys-Overland company said upon his arrival in Toledo, Wednesday.

Mr. Willys and Walter P. Chrysler, executive vice-president of the Willys interests went to Toledo for conferences and to attend a luncheon at the administration building yesterday in honor of Charles B. Wilson, vice-president of the Overland. This was arranged by the Chamber of Commerce of Pontiac, Mich., of which Wilson is a former member. About sixty business men of Pontiac came to the meeting. Mr. Wilson was president of the Wilson Foundry and Machine company at Pontiac before he went with the Overland.

The price cut on the Willys-Overland cars has flooded the Toledo office of the company with orders, there now being over 15,000 unfilled orders on the books, Mr. Willys declared. More men and the finest working force in Toledo, he says, will result.

"We are going to do a good business right along," Willys confidently asserted, "and we are increasing production every day. And as production increases we are going to put more men to work.

"Business is sliding out of second gear into high speed. In the auto trade there is a big rebound largely because many automobile manufacturers have convinced the public that prices have been cut right down to rock bottom. Toledo has gone through the period of depression with less discomfort than almost any city of her size in the country—now its just a matter of hustle and work—the folks who hustle and boost are the folks who will show a big profit in 1921," Willys said. "I suspect that Toledo is not so well aware as the rest of the country of the phenomenal strides being made by the Overland products," Mr. Willys continued. "The Overland model four we are producing now is beyond question the best ever made. It is true of autos as of everything else that perfection is reached through gradual evolution—and it is true with workmen that practice makes perfect. From the days that the price reductions were first hinted at, orders have been flooding into our sales department.

"Last week a train of sixty freight cars loaded with 250 Overland cars was sent of the Overland Harner company of Philadelphia. Indianapolis wants nearly 500 cars for July delivery. Huntington, W. Va., wants 400.

"These are samples of how business is going. From every section of the country orders for 100 cars to individual dealers or distributors, are coming in.

"This week's record is the best to date of the three previous weeks. We have on hand today 15,000 unfilled orders.

"We aren't asking how long this good business is going to continue—we asked that the first week—but we've grown tired of asking it now. We are going to do a good business right along. Yes, I'm still on the road selling as many cars as I can. The way to get going now is for every man to get in and dig for business. We are increasing production every day."

ILLUMINATION OF ROADS IS GIVEN THOUGHT

The problem of providing proper lighting for country roads is to receive careful consideration in the construction of the ideal section of the Lincoln highway.

The great increase in the volume of heavy freight trucking on main routes between large centers, where in many instances motor express lines operate on regular schedules and frequently at night, along roads already congested with a heavy passenger traffic, has brought the question of illuminating rural roads to the foreground.

A number of important main highways have been lighted for certain distances through the open country, but it is doubtful if a careful and detailed scientific study of the problems involved has as yet been made. The methods employed to light such highways as have been illuminated have varied with the ideas and finances of the many scattered counties and communities undertaking such lighting and the results have frequently been disapointing. In fact, many drivers have complained that some methods of lighting rural roads defeat their own purpose in making the road even more dangerous for night travel than if it were left totally dark and drivers left to depend upon their own headlights.

Proper System Desired.

Certainly the providing of a brilliant light at stated intervals, over crowded routes of travel does not answer the purpose. Such lights if placed at improper heights, shine in the driver's eyes, or on rainy nights are reflected from the pavement.

The purpose of lighting rural highways is solely to provide for the safety of night drivers. Accidents which occur after dark are generally the result of the injudicious use of glaring headlights. The lighting installation which would permit of all vehicles operating with their headlights dimmed, as in cities, would undoubtedly make for safer conditions.

The technical committee appointed by the Lincoln highway association to determine the specifications for the ideal section of the Lincoln highway, that standard of excellence for American road building which the Lincoln highway association will construct at some general point on the great transcontinental road, early agreed unanimously that the ideal section should be lighted. They did not attempt to say how. The problem was one for the best illumination experts and engineers obtainable. Now arrangements have been made by the Lincoln highway association with the General Electric company of Schnectady, N. Y., whereby the illuminating experts of that organization will develop an ideal lighting installation which will be put in along the ideal section.

W. D'Arcy Ryan, chief illuminating engineer of the General Electric company, the man who originated and developed the lighting arrangements for the Panama Pacific exposition, will with the assistance of his staff, develop in consultation with the association's consulting highway engineers, the best, safest, most economical and satisfactory lighting installation possible. Mr. Ryan and other officials of the General Electric company are greatly interested in the problems presented and mean to provide an installation along the ideal section which will serve as an example for the lighting of thousands of miles of American highways during the coming years.

As the details of the installation are developed, complete information will be provided to highway authorities in every section of the country by the Lincoln highway association, whose purpose in the development of the ideal section is solely educational.

Like the United States Rubber company, which because of the interest of its officials in the development of modern highways, contributed the fund for the construction of the ideal section, the General Electric company will contribute the service of its experts, the facilities of its laboratories and the fullest co-operation of its entire organization, in the development of the "ideal" fighting installation.

1922 BUICK TO BE GOOD CONSTRUCTION

The striking thing about the new Buick line for Nineteen Twenty-two is not the graceful design, the beautiful finish or the general improved appearance of the Buick. Rather it is the mechanical excellence of the car, according to L. L. Dixon, local Buick dealer.

Careful buyers—interested solely in motor car values—are selecting Buick not so much for its distinctive beauty as for its sound mechanical excellence, Dixon says. Of course, they want comfortable and pleasant transportation but, more especially, they want dependable transportation, the kind that only a well-engineered car can deliver.

Buick cars have always been known for their long and consistent performance. And the cars of the present season are reflecting the even greater achievement of Buick cars of unusual value—value that is brought home with ever-increasing emphasis the longer the cars are run.

Buick mechanical excellence has not just happened. It has taken twenty years to develop the Buick chassis to its present high state of efficiency through the proper design and co-ordination of the various mechanical units. Great emphasis has been laid on the design and manufacture of each design and manufacture of each part but always with the balance and proportion of the car as a whole in mind.

The smallest details of construction have received thorough attention, resulting in the thorough consistency of Buick.

And this result has been obtained through the correct relation between power and load, comfort and safety, performance and durability—considerations that establish the Buick as an efficient machine. Admired for its beauty, Buick carries with it that greater essential——mechanical excellence—by which it can be favorably judged in the most critical manner by the buyer.

The excellence of the Buick chassis is an accomplishment that has come from scientific study backed by broad experience of the most practical nature in manufacturing.

Each unit contributes t the durability, safety and economy of Buick performance. Construction such as this accounts for the mechanical excellence of the car—an excellence which the wise buyer knows goes so far toward the uninterrupted use of his transportation investment.

BUICK TO BRING OUT NEW FOUR-CYLINDER CAR

Unusual interest has been manifested in the new four-cylinder Buick, the appearance of which was predicted about two months ago, and for which it is no secret some dealers have accepting advance orders, "sight unseen."

This product, as previously rumored it is now understood is to sell for about $1,000 and those privileged to ride in it term it "a wonderful car." A few deliveries may be made next month, if all goes well, though formal announcement is not expected until August 1.—Automobile Topics.

The fez is no longer to be the national headdress of the Turk, according to a decision of the national assembly. The "kalpak" will be substituted. The "kalpak" is made of black cloth or felting, and is somewhat similar to the fez, only flater and broder.

EXPLAINS VALVE OPERATION IN MOTORS OF AUTOMOBILES

The valves are operated by the crank shaft through a train of mechanism as follows: The two-to-one gears, the cam shaft, the valve lifters and the valve springs. The first three serve to open the valves and the springs close them again.

The Two-to-One Gears—These drive the cam shaft and the name is due to the fact that the one on the cam shaft has twice as many teeth as the one of the crank shaft. The effect is to turn the cam shaft at one-half the speed of the crank shaft because the valves only open once in two revolutions of the latter or in four strokes of the piston. In the effort to silence the noise of these gears other material than steel has been used, such as bronze and even rawhide. The present practice is to cut the teeth spirally, so that one tooth takes hold before the other lets go. Further, quiet is obtained by encasing the gears in a cover and running them in oil or grease. These gears are also called "half-time" or "timing gears."

The Cam Shaft—This is a solid piece of steel which runs the entire length of the engine and opens all the valves in one revolution. A "T" head engine requires two cam shafts, one on each side, but the others only use one. Originally the cams were made separately and slipped over the shaft but these gave trouble by the breaking of the pins which held them in the place. The whole piece is now made from a solid bar and the cams never shift. In the early types the cams were made flat at the top with a quick opening and closing. This was found to be noisy at high speed as the valve opened too far and then fell back on the cam. They are now made pointed, giving a more gradual opening, but the spring made stronger and the action is now almost noiseless.

The Valve Lifters, also called push rods or tappets. These serve to operate the valves as it is no longer considered good practice to have the valve stems rest directly on the cams. They are made in two types; one is provided with a roller which rolls over the cam and reduces friction. It is oiled by the splash from the connecting rods. The other type is flat on the bottom but is made of hardened steel so that very little wear occurs. This type turns every time the cam strikes it, presenting a new surface and reducing the wear to a minimum.

The Valve Springs—These surround the valves and close them after the cam shaft has pushed them open. They are made very strong so that "hurdling" will not occur. This effect is due to their being pushed open very rapidly at high speed. On account of its inertia the valve tends to rise too far, leaving the push rod and then falling back with a click. The strong spring prevents this.

The above description applies to all valves except those set in the head of the cylinder. This type is operated by a rocker arm and a separate rod connects the push rod to the rocker arm. This arrangement requires oiling by hand but is found to be equally satisfactory in practice.

ITEMS OF INTEREST FOR THE OWNER-OPERATOR

Do not believe the mag who pretends that he can kick a tire and tell you when there is air enough. The only proper test is to use a pressure gauge. This costs but little and is worth its weight in gold in saving tires. The correct pressure is sometimes stamped on the tire, but the rule is easy to learn; Twenty pounds per inch of small diameter for the rear wheels, and eighteen pounds for the front. Thus a 34x4 tire would require eighty pounds for the rear and seventy-two pounds for the front wheels.

When struggling with a balky engine keep in mind the four conditions necessary for an engine to start; Carburetion, the correct mixture of gasoline and air to produce the explosion; ignition, a hot spark in each cylinder; at the proper time to produe the power stroke; compression, no leakage of the compressed gas from any part of the combustion space; lubrication, eevry part properly oiled and free to move. Bearing these four in mind and working to eliminate them one by one the trouble will finally be found and remedied.

If your engine is losing power, look out for crank-case condensation. The present low grade of gasoline is difficult to evaporate and some of it works its way down past the pistons into the crank case, where it thins the oil and damages its lubricating qualities. Draw off some on the hand and inspect it. If it is too thin, change it immediately and have the engine looked over at the service station.

To avoid breaking spark plugs while removing them, get a wrench made for the purpose. One which sets down around the plug and bears on all six sides like a socket wrench is the best. It will soon pay for itself in porcelains saved.

Gasoline should be strained while it is being poured into the tank, but a wire guaze should be used, and not a chamoise skin. The government has issued a bulletin against this practice as it is found that the friction of the gasoline against the chamois causes a spark which jumps from the funnel to the tank and so sets fire to the vapor. Many mysterious fires which ocurred while filling tanks have now been explained, and it is no longer considered safe to strain gasoline through a chamois skin.

New African Goldfield.

LONDON, July 2.—News has reached London of the finding of a large new gold field in northern Nigeria, and a great "trek" to the new field is taking place.

Fordson TRACTOR

$625 F. O. B. Detroit

"Yes I've more Time for Myself Since I Got a Fordson"

The Fordson Tractor is taking much of the drudgery out of farm life; it is solving the labor problem; it is reducing the cost of preparing land by almost one half of what it was with horses; and *it is saving one third to one half of the farmer's time;* and making farm life more attractive.

The Fordson will run your threshing machine—and at the most opportune time for you. It will operate the milking machines, saw your wood, fill your silo, pump the water, and take care of every kind of belt work—

And don't forget—it will plow six to eight acres in a ten hour day, handling two plows with ease.

Thus the Fordson is the ideal year-round tractor. It will pay for its fall and winter keep in many ways.

There's a big story to tell you about the Fordson—*and a true one*—come in and get the facts. Or, if you prefer, telephone or drop us a card and we will bring them to you.

FEW NEW OIL OPERATIONS DURING WEEK BEAR OUT PREDICTION OF LET-UP

Predictions of a general cessation in drilling operations in the Wichita Falls district are being fulfilled, the past week recording very few new operations started, with but few completions, in any of the pools.

This situation is due entirely to the oil markets, since in a number of the pools there have been recent new extensions, so insure unusually interesting drilling operations if conditions were normal.

Particularly is this true in the outlying territory to the Texhoma-South Burkburnett shallow pool, where the past month has brought three good strikes in widely separated outside territory. And the Fowlkes district, southeast of Electra, is another promising viciniaty, by reason of the new 1800-foot sand which the Gloria Oil company opened up a couple of weeks ago.

Texhoma Largest Completion.

The record completion of the week comes from the new Texhoma-Archer county pool, in the Texhoma Oil and Refining company's No. 4 Gose, offsetting the Staley well on the Coffman. The new Texhoma well is estimated good for between 400 and 500 barrels and was flowing Friday. The casing was cemented and allowed to stand for more than a week, and no water trouble from a bad seat, such as held up completion of other wells is expected to develop here.

Recent developments indicate that this new pool will probably be a "Texhoma" pool in reality, outside tests that have failed pointing to a limit to the producing area which is only a few hundred feet from the Texhoma leases on the Gose and W. H. Taylor. The greatest extension is indicated in the Harper and Jones No. 1 Taylor.

This well has made some oil, but the casing came unseated and has been pulled, to re-set. The Harper and Jones is about 1500 feet north of the discovery well on the pool, and is the northern offset to the No. 3 Taylor of the Texhoma, which is rigging up.

The Griswold Oil company's No. 1 Henderson, 400 feet west of the Lee Bass well is being put on the pump.

The No. 2 Henderson of Lee Bass is due to get the sand some time this week, according to reports and the Sun company's No. 1 Henderson is reported still working on a test of the second sand, drilled around 1630 feet.

New Texhoma Operations.

The Texhoma's No. 5 Gose, offsetting the Staley No. 2 Coffman, was due on the sand Saturday. The Staley No. 2 Coffman has been on the sand for the past week, held up with a fishing job.

The No. 2 Gose A of the Texhoma Oil and Refining company set casing Friday. The No. 2 Taylor of the Texhoma is due for completion early in the week. The Texas Illinois No. 1 Taylor, is reported testing out a sand below 1600 feet. The No. 1 Netherton, to the southwest of the producing area, is reported drilling below 1500 feet. The Canadian Petroleum company's No. 1 Gose, second hole, is reported drilling around 1250 feet. The Jay and Mahan No. 1 L. F. Wilson is reported drilling around 900 feet.

In Block 117 of the American Tribune, New Colony lands, some distance south of the new pool, the No. 1 Luke Wilson of J. E. Walsh et al is reported a new derrick.

The Gloria Oil company has completed its No. 1 Douglas, West Fowlkes, for a 50-barrel pumper in the new 1800-foot sand. No effort will be made at this time to drill deeper into the sand, officers of the company stated, and the well will be pumped from this depth until the crude situation improves sufficiently to justify further operations. The well is about four feet in the sand.

The No. 14 Burnett of the Barr Davis Oil company is another recent completion in the South Electra shallow field, making 45 barrels from the 970-foot sand.

South Burk Pool.

Drilling deeper into the 1370-foot oil sand from the gas sand, the Jones Light Oil and Gas company's No. 2 Rexford, has been completed, good for 125 barrels, according to field reports. This well is in the new north pool, opened up several weeks ago by the Texhoma and the Jones Light companies, drilling gas wells deeper.

The Texhoma Oil and Refining company has completed its No. 2 Beach, in the new southwest extension of the Old Texhoma pool, this new well making 75 barrels in the 1200 foot sand.

In the northward extension the Texhoma's No. 2 Rexford is reported drilling around 1250 feet and the Burk-Tex Oil and Refining company's No. 2 Rexford was reported setting casing Friday on the 1370-foot sand.

On the Burk-Rexford the No. 1 of the Burk-Tex Oil and Refining company is reported drilling around 500 feet.

The No. 1 Roller A of the Pioneer Producing and Refining company is reported drilling below 1200 feet.

The Pioneer Oil Corporation's No. 1 Murdock is reported rigging up.

The Sinclair Oil and Gas company No. 2 Cropper, is reported with casing set on the sand and the No. 1 is reported rigging up to pump.

The Pope Erwin test on the J. D. and Lee Cooper, four miles east of the Texhoma pool, is estimated at a 25-barrel producer, in the 1295-foot sand, according to latest reports. The well is now reported bailing and swabbing, and preparations are being made to drill a second well, to give a fair test to all the sand. Seventeen feet of sand was drilled, according to the driller on the test, and ten feet of this was cut off by the casing, when it was re-set.

Another Test to East.

Drilling started Thursday on the second test of the Reising Trustee company on the R. E. Moore, east of the Texhoma field. The first hole was lost on top of a good looking sand at 1900 feet. This test is between the Pope Erwin well and Burkburnett.

In the old Burkburnett field the Magnolia Petroleum company's No. 7 Holcomb A is reported underreaming around 2380 feet. The No. 69 Reilly is reported underreaming below 1200 feet, and the No. 70 Reilly is reported rigging up to drill. The No. 18 Viles, is reported drilling around 1900 feet, and the No. 7 Heiserman drilling around 950 feet. The No. 10 Owens is reported drilling around 720 feet.

Drilling in the Burkburnett northwest and extension is confined with only one or two exceptions to the re-

A. A. A. WILL "CARRY ON" ROAD WORK

WASHINGTON, June 30.—When A. G. Batchelder, executive chairman of the American Automobile Association, fell to his death in the tragic airplane accident off Indian Head, May 28, he left behind him, as his last work for better highways, a letter addressed to all motor club officials telling them that national highway legislation was in its final stage in Congress and asking them to give their support to the Townsend measure as the one containing all the principles so long fought for by the A. A. A.

Sent It Out.

"Batch," as he was popularly known, did not live to sign the letter, but when Acting President David Jameson read it, he promptly sent it forward to all clubs affiliated with the A. A. A., together with a brief postscript calling their attention to it as the last effort and request of the well-loved leader.

"No one man did as much for better highways in this country as 'Batch,'" said George C. Diehl, president of the A. A. A., on the eve of his departure for Europe recently, "and, of course, those of us who are left will carry on the work to the best of our ability.

"There is nothing we could do which would build a greater monument to Batch's memory than to urge the creation of a federal highway commission and concentration of federal funds first on primary interstate highways. As a matter of sound economics and as a safeguard for the transportation of the future, the nation needs such a highway policy as that which Senator Townsend has placed before congress. Organizations which have had experts studying this plan, such as the national Grande, the chamber of commerce of the United States, and many other large associations have given the principles written into the bill their unqualified approval and it is my own feeling that there is no one step congress could take at this session which would mean more to the country at large than the enactment into law of this measure."

Action Soon.

Both senate and house have now concluded their public hearings on highway legislation and as the present federal aid appropriations expire June 30, there is a general belief that action will be taken within the very near future. The senate committee has had the Townsend measure under consideration, while the Dowell bill has been before the house. The latter has not had the support of the A.A.A. because according to its leaders, the bill is incomplete in that it does not provide for a commission, which, highway experts say, is an essential phase to proper national highway administration.

WEEK'S BEST WELL IN SOUTH BEND FIELD IS NO. 2 KELLER SHOWING AROUND 300 BARRELS

The week's best well in the South Bend field is the Kent Oil company's No. 2 Keller, in the southeast part of the pool along the Clear Fork, with a production around 300 barrels daily from the 1920 foot sand. Another new well in the shallower sand is the Oklahoma Petroleum and Gasoline company's No. 6 M. K. Graham on the fest side of the river. This well in the sand at 1800 feet is reported a 50-barrel pumper.

Pipeline runs in the South Bend district now averages around 9,000 barrels daily, according to latest reports, and a still better production is expected to be shown in a short time when the Sinclair line is in operation, and the new unit of the Prairie pump station is ready for use. In a large part of the producing area the 2500-foot sand, which has been proven the most richly productive, has not yet been tested, wells stopping on the 1800, 1900 or 2100-foot sands, where good production has been gained. With the lowered price of oil, and the lack of ample pipeline facilities there has been small incentive to increase production in the pool, but there would seem to be ample assurance that development of the deeper sands under these shallower pdoducers would be successful.

Start Three New Tests.

The latest eastward extension of the 2100-foot sand, effected by the North American-Roxana No. 1 Ford a 700 barrel well, has resulted in three new test wells being started, though all three are inside locations. All of the surrounding acreage to this new well is held by the North American Oil and Refining company or the Panhandle, except across the river, and here the Colcords hold out.

Operations in the various outlying districts continue about as usual, with practically no change reported over last week's status. In the Munger district the Askew test of C. S. Thomas is reported still cleaning out to test the 1960-foot sand, and several other new tests are reported starting in the section.

In Graham-McCluskey Pool.

The Danciger Oil and Refining company's No. 3 Graham, which has been a gas producer in the 2100-foot sand for some time, is being drilled deeper to the 2500-foot sand, and is due for completion in the next few days, according to reports from the field.

The No. 1 and No. 2 location on this lease have just started drilling, the No. 1 drilling around 500 feet and the No. 2 around 350 feet.

On the Danciger Oil and Refining company, Shamrock Oil Corporation's joint McCluskey lease, the No. 2 is still held up in completing on the 2500-foot sand by a fishing job. The No. 3 on the east end of the lease, not far from the new North American-Roxana producer on the Ford, is reported preparing to drill.

Godley Drilling Two In.

The Godley Oil and Refining company has been held up by casing trouble in No. 6 and No. 7 Neville-Graham, but is reported drilling these two in this week end. Both are on the 2500-foot sand. Nos. 8 and 9, same lease, are due for completion, also in the deep sand within the next week or ten days.

The Panhandle Refining company's No. 9 McCluskey is reported due for completion in a short time, on the 2500-foot sand. The No. 8 is reported drilling around 1780 feet, the No. 11 drilling around 2350 feet and the No. 1 drilling around 620 feet.

The Seaboard Oil and Gas is reported drilling around 2350 feet in the No. 5 Graham, cleaning out at 2100 feet in No. 3 and drilling around 2450 feet in No. 6.

The Oklahoma Petroleum and Gasoline company is reported rigging up to drill the No. 3 McCluskey and has made a new location on the Keller, offsetting the Kent Oil company's new producer, in the 1800-foot sand. This new location is the No. 3 Keller. The Kent No. 8 is fishing around 750 feet.

The Mid-Tex Oil and Refining company's No. 3 M. K. Graham is reported still hung up with a fishing job at 2,000 feet, the No. 4 starting to drill, the No. 5 still a rig and the No. 6 still a location.

No. 1 Keller Drilling.

The Hemphill et al No. 1 M. V. Keller, eastern offset to the Kent Oil company's producers, is reported drilling around 700 feet.

In the river bed the No. 5 State Lands of Armstrong et al is reported cleaning out at 2200 feet, to drill down to 2500 feet, these same operators are reported drilling around 1500 feet in their No. 1 M. K. Graham.

The W. E. Conner No. 2 Graham is reported still fishing around 1220 feet, and the No. 4 McCluskey is reported drilling around 500 feet, the No. 5 drilling around 450 feet.

The Young County Oil and Gas company is reported still at work plugging back its No. 1 Graham to the 1900-foot sand, where it will attempt to make a pumper. This well is the extreme northwest of the McCluskey-Graham pool.

Various Other Tests.

Operations continue about at the usual pace in the entire South Bend area.

The Prairie test on the H. M. Donnell, to the extreme southwest of the Graham-McCluskey, between South Bend and Eliasville, is reported still at work to shut off the wat[illegible] in order to test the oil bearing grey lime, drilled at 3260 feet.

On the M. B. Dooley, between the Donnell test and the producing pool, the Texas National test is reported preparing to abandon, after several weeks trying to make a test of the deep sand which has been shot.

The Roxana Oil Corporation's No. 1 W. C. Burns is reported still shut down around 3860 feet.

The North American Oil and Refining Company's No. 1 A. B. F. Scott, is reported drilling around 400 feet.

The North American-Roxana No. 1 McCluskey is reported drilling around 3500 feet.

The Henry Hobbs No. 2 Hale is reported drilling around 2600 feet.

The J. S. Hoff No. 1 McBrayer is reported drilling around 500 feet.

The Dewes and Tuck No. 1 McCluskey is reported underreaming around 2250 feet.

FRENCH PRICES STILL REMAIN AT HIGH POINT

PARIS, July 2.—High cost of labor is one of the principal factors which is keeping the cost of living in France at almost the maximum point attained after the war, while other countries are reporting perceptible decreases.

In not a single important industry in France has there been any wage reduction since the war nor is these likely to be for at least another six months. On the contrary, salaries are still on the increase in some industries, with consequent increase in the cost of manufactured commodities.

Several attempts have been made by big manufacturers, notably in the automobile industry, to negotiate wage decreases with their employes on the lines of these recently agreed to in the United States and in Belgium. In each instance the labor leaders have refused to enter into any negotiations and have insisted on a revision of the wage scale upward, if any revision at all is made.

Labor holds the situation well in hand at present, because labor is in big demand, and labor leaders know it. While England is confronted with a grave problem of unemployment French workers have had no difficulty at all getting jobs since the war, and for that reason they are not at all disposed to accept any salary cuts, whatsoever the arguments advanced by the employer.

In Belgium a serious effort is being made to bring down wages as a first step in lower cost of living, and the government has achieved some results. Each month an "index" list, reporting variations in prices of the chief elements entering into the cost of living, is published, and manufacturers and workmen are invited to discuss wages on the basis of these lists. The laborers have consented to some reductions, though they have established as a principle that in no case shall their wages drop below those earned in 1914 and that in every case they must earn more in an eighthour day than they earned in a ten-hour day in 1914.

The high cost of labor in France has made its effect felt largely in the building industries. Many new manufacturing plants have been set up since the war, but the erection of dwellings and business houses has been carried out on a very limited scale.

PEANUT ASSUMES DIGNIFIED ROLE

ATLANTA, Ga., July 2.—Any feeling of content for the present that you may harbor, may just as well be laid aside right now, for the circus dainty is about to attain a dignity that will put it in the class with pecans, thin-shelled walnuts and other delicacies. The reason is the recent formation of peanut growers in Virginia and North Carolina into a peanut exchange that will control more than 50 per cent of the peanut production of the United States—figures which are respectable when you realize that most of the peanuts the elephants eat come from that section.

The marketing plan is based on the successful venture made by California fruit growers some time ago. The contract was drawn by Aaron Sapiro, attorney for a number of groups of fruit growers in California.

This exchange of the peanut growers will be the first organization perfected east of the Mississippi River on the California plan. The membership will include more than 5,000 growers, each of whom has subscribed $50 for one share of stock. Provision also is made for issuance of preferred stock not to exceed $350,000.

Nearly every fortune has been started originally with a bank account and the determination to keep adding to the account regularly. Open your account with the City National Bank of Commerce and lay the foundation for future wealth. 4% interest is paid on deposits of $1.00 and upwards.—Adv.

LOWER PRICES and RARE BEAUTY

Adds to the Great Value of the NASH SIX and FOUR

—Comparison from the standpoint of sheer good looks, to say nothing of its power, performance and endurance, brings immediately the acknowledgement that the NASH SIX and FOUR with their Perfected Valve-In-Head Motor are the leading car values on the market today.

—Our Service Department is complete in every respect, consisting of paint and varnish room, lathes, all the special tool equipment required to give NASH SERVICE and our parts department represents more than $10,000 which means SERVICE to every NASH owner.

—The NEW PRICES listed below makes the NASH car the LEADING VALUE IN ITS FIELD.

LET US SHOW YOU A NASH TODAY

FEDERAL
Double Cable Base Tires

A Square Deal

IT IS gratifying to note the ever-increasing number of motorists who make their choice of Federal tires a permanent one.

—And it is equally impressive that their final decision is made solely on the strength of unusual service rendered.

They follow the one sure rule that quality is always the surest economy.

It is our policy to encourage this feeling of favor for Federal tires by basing every transaction upon the greatest frankness and sincerity.

Our motto is a "square deal" and it wins confidence and retains friendship.

To make sure of ***extra*** mileage, use Federal tires.

South Bend Celebrates Coming of New Railroad

NEW CITY OF 2,500 FOLK BROUGHT NEARER TO WORLD MARKETS BY RAIL EXTENSION

South Bend today, a town of 2,500 inhabitants, which in the past year has struck a stride of progressiveness is celebrating the completion of the first railroad, and also celebrating the first anniversary of the opening up of the 2500-foot sand by the Panhandle Refining company on the McCluskey, the early part of July, 1920.

This Panhandle strike marked the real beginning of the developments leading to South Bend's establishment as one of the leading oil producing districts, and in the year operations have been such that there are now 75 producing wells within a radius of three miles, with five distinct oil sands already developed.

Five years ago the first operations began in Young county, with the advent of Charles F. Colcord, veteran oil operator, and the president of the North American Oil and Refining company, the real pioneer company of Young county.

Four years brought more disappointments than anything else, the first tests having more than the usual wildcatters hard luck. But the last year has been one of unusual success, for the pioneer company, as well as the later comers to the field, and just a few weeks ago the crowning success of the year was added by the completion of the No. 2 Ford, a 700 barrel well in the 2100-foot sand.

Starts Five Years Ago.

Five years ago Mr. Colcord bought his first Young county leases, as president of the North American Oil and Refining company. Four years ago the first well was spudded in, the famous Goode well, which gave Young county its first oil sensation.

In the intervening years producers of fair size were completed on different leases in the South Bend area, but the North American Oil and Refining company's first really big producer was completed only a few weeks ago, the No. 1 Ford, which extended the 2,100 foot sand to the east, and came in for a flush production of 800 to 1,000 barrels.

Mr. Colcord's story of how he became attracted in the South Bend district is of more than passing interest, and also serves to show how the judgment of the geologist, C. N. Gould, and Mr. Colcord, has panned out in the developments of the past year, particularly.

Formations Attract.

In the spring of 1916, Mr. Colcord and C. N. Gould, Oklahoma City geologist, were driving from Ranger, Texas, to Oklahoma City.

Driving towards the town of South Bend their attention was attracted to a peculiar appearing hill, with its slope to the southeast, instead of to the northwest, the prevailing direction of declivity in north central Texas. This hill formation was first noticed about five miles south of the town of South Bend. The trained eyes also noticed the hills were covered thickly with live oaks, instead of the scrubby oak or black hack common to this locality, the live oaks indicating lime formation under the soil.

Approaching the Clear Fork of the Brazos River at a point near South Bend they noticed other breaks in the prevailing surface formation.

Pronounced Geological Dome

A huge elevation? commanded a view of the entire countryside.

This, Gould declared in his opinion, to be a perfect geological dome, with favorable indications for oil and gas at various levels. This dome lay within a huge bend at the junction of the Clear Fork and the Salt Fork of the Brazos River, and from a central point, a few miles south of the town of South Bend, dropped away to thme river at the rate of 60 feet to the mile.

Eight thousand acres of land on this structure were leased by Mr. Colcord, following a thorough geological survey. This huge block of acreage was secured for the North American Refining Company, and for his individual development. Mr. Colcord leased an additional 1,000 acres. In making these lease trades Mr. Colcord had the assistance of W. M. Goode, Jr., who owned 450 acres of land near the peak of the dome. In return for Mr. Goode's assistance in the leasing Mr. Colcord promised to drill the first test on his farm, and in April, 1917, the No. 1 Goode was spudded in.

"Lindy Lou"

This well, the "Lindy Lou" as it was known locally was one of the most famous wells drilled in north Texas, and suffered all of the misfortunes coommon to wild cats during the first few months, so that several months were required to drill 2,600 feet of hole.

With the deep black lime at 3,600 feet as the objective no attention was paid to the shallower formations. Oil showings were encountered at 2,150 and 2,225 feet, in oil sands, but these occasioned but slight interest.

Up to this time the North American had purposed to do it's own developing, but realizing the enormous undertaking officials began negotiations with big companies to assist.

"Shell" Company Interested.

The Roxana Petroleum corporation, a subsidiary of the Royal Dutch Shell, operating in Texas and Oklahoma, became interested, and after several months of testing by a large staff of geologists they made a contract to carry out development for a half interest in 6000 of the 8000 acres of leases in the South Bend district. During the test, before the Roxana undertook the contract, twenty holes were drilled to the Jacksboro lime, found at 1050 to 1100 feet below the surface. The Roxana geologists confirmed the findings of Gould, and in March, 1918, the big company signed it's development contract, and recommenced work on the No. 1 Goode.

To give a thorough test this well was carried down below 4000 feet. Sands were found at 3125 and 3250 feet with showings of oil, and the gray and black lime formations, oil bearing showed up in the log almost continuously between 3300 and 4000 feet.

"Lindy Lou" Goes Over.

At 4020 feet the bit penetrated a gas sand, and oil shot over the derrick of the "Lindy Lou." There have been sensational wells completed in the South Bend district this past year, but none of them can dim the lustre of the sensation that first oil well shooting over the derricks gave to Young county.

But the well was destined to never become a real producer. One string of tools after another went into the hole, with a bailer and other articles to give up trouble, and for three years a crew was engaged in a fishing job on the "Lindy Lou." During that time the well was making gas sufficient to run a number of boilers of nearby tests, but it is now to be plugged.

Donnell Tract Drilled.

The Donnell tract was next drilled, and the No. 1 came in making 50 barrels in the 1,850 foot sand. Next the No. 1 Scott on the Ruidoso survey was drilled, this by the North American independently, and several months ago this well was completed in the 3,100 foot sand. The well was more than a year in drilling, due to various troubles encountered. The well was commenced in 1919.

In the meantime the Cosden company was drilling its No. 1 Mary Timmons north of the river. This test encountered the black lime at 3,500 feet and game promise of big production had it not been ruined. It was given one of the biggest shots of nitro on record for this district, 720 quarts. The hole was wrecked and the crew worked for a year trying to save the well without result.

Panhandle Begins Operations.

In the spring of 1920 the Panhandle Refining company of Wichita Falls began drilling on the E. N. McCluskey farm, in one of the sharpest of the series of small bends of the Clear Fork, about five miles west of the town of South Bend.

The No. 1 McCluskey missed the 1,850 and 2,100 foot sands. They then decided to deepen the well and in the early part of July, 1920, the well came in for 600 barrels at 2,540 feet.

The intensive operations that followed this well are too well known to need repetition at this time. The pool that has been opened up, by the early operations of the North American-Roxana interests is now producing better than 9,000 barrels daily, in the face of every possible difficulty and discouragement to new oil operations.

Results Gratify Pioneers

The results have been very gratifying both the pioneer citizens and the early oil operators. Today they are going to the pioneers of the district, feeling amply repaid for having stood by the job through the years of discouragements and failures, and all classes feel that the new era that is now being ushered in will see the full realization of the hopes and ambitions of all who have had a part in the development of South Bend the town, and South Bend, the oil field.

Charles F. Colcord, the "daddy" of the South Bend field as he is known locally, is a typical westerner, a real trail blazer. As a cowboy he rode the Texas palins forty years ago. That famous run into the territory of Oklahoma, made in 1889, found him in the rush. He was the first marshal of Oklahoma City, where he in after years opened several exclusive residence districts, and built the Colcord building, one of the finest office buildings of the southwest.

His connection with the oil industry of the southwest dates back to 1903, just after the first wells were drilled in Oklahoma. In 1904 he drilled the discovery well in the Red Fork pool and in 1905 he and Robert Gilbreath opened up the famous Glenn pool. Later he was numbered among the first operators in the Healdton, Duncan, Ranger and Eastland fields.

The North American company has now eleven producers in the South Bend district, with the Roxana interests, and in addition have three producers, owned individually, and 2 more individual wells are under way.

PARISAN WOMEN TAKE UP BUSINESS

PARIS, July 1.—The entrance of women into the field of directing French theatrical enterprises has taken on the aspect of real invasion.

Mme. Sarah Bernhardt and the late Mme. Rejane were the first French women to direct their own theatres. Today Mlle. Rolle directs the Dejazet Theatre. Mme. Cora Laparcerie, who formerly directed the Bouffes-Parisians, is now at the Renaissance. Mlle. Constance Maille directs the Marigy and Mme. Rasmi the Ba-Ta-Clan, besides supervising numerous revues. Jane Renouardt's new theatre is nearing completion and Maud Loti is about to assume the directorship of the Imperial.

To date most of the enterprises conducted by women have been quite successful.

An official report recently issued shows that 300 British women nurses died while serving in the world war.

JAP RELIGIOUS PARTY BRANDED AS PRETENDERS

By Associated Press.

TOKIO, July 2.—Revelations concerning the Omotokyo, or the "great fundamental religion," whose leaders have been put in jail after a raid on their headquarters, show that the directors of this cult were pretending to exercise some of the prerogatives of an imperial Japanese family. An account of this raid and some of the discoveries made by the Japanese police were carried by cable at that time.

It is charged that the adherents of this organization referred to their religion as "God Administration Era." This is regarded in Japan as an indignity against the throne, because the designation of names of eras is a right that belongs only to the emperor.

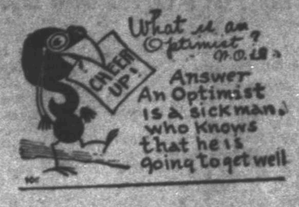

As a result of this and other discoveries lese majeste is one of the charges which have been preferred against Wanisaburo Deguchi, the leader of the movement, who with others were taken into custody by the authorities at Kyoto after the raid about May 10.

It is probable that exaggerated designs are being attributed to the religion, but the newspapers charge it with numerous crimes, including murder.

One of the discoveries made in the course of the raid was a secret apartment beneath the golden tower in the center of the headquarters of the sect. The authorities say that, judging from the papers confiscated, this secret cell was designed to confine a "certain person" when the Omotokyo leaders and followers launched operations they are said to have contemplated. It was so constructed as to be readily flooded with water from a pond in the garden of the headquarters so that the prisoner could be drowned.

Near this cell was found another secret underground room devoted ostensibly to special religious functions. The newspapers have charged that this cell was intended to contain women prisoners.

Omotokyo taught the reconstruction and re-organization of the Japanese state and purported to prepare the way for a social upheaval which, in its turn, was to give Japan dominion over all the earth. Part of its scriptures were contained in a book entitled "The Volume of Fire," the contents of which have not been made public.

—Many an optomistic sick man who knew he was on the way to health has begun his journey at the entrance to this pharmacy. Every man and woman in this community knows that the stock of goods we sell is thoroughly dependable. Our toilet requisites are quite worth your money.

TWO KINDS OF INDEPENDENCE

All Americans have the sort of independence that was gained in 1776, the declaration of which we celebrate now. Comparatively, few have the sort of independence that comes of knowledge that the future has been provided for by consistent saving.

Attention Oil Men—Increase Your Production
Ream the Oil Sand by Rotary-Centrifugal Process

HERE IS WHAT I ACCOMPLISHED WITH A RENTED TOOL ON THE LEASE OF THE BRINKLEY PRO. & REF. CO., BL. 74, F. C. VOGEL FARM, NORTHWEST POOL.

Reamed well No. 2 March 4th It was making about 30 bbls. Increased in 30 days to about 55 bbls. now making about 55 bbls.
Reamed well No. 3 May 20th. It was making 4 to 5 bbls. Increased in 30 days to about 35 bbls. now making about 35 bbls.
Reamed well No. 4 June 4th. It was making about 35 bbls. Increased to date to about 50 bbls. and increasing
Shot well No. 5. Dec. 5th. It was making about 25 bbls. Increased in 45 days to about 40 bbls. now making about 28 bbls.

Well No. 5 is going down, and will have to be REAMED. No. 2 is remaining stationery. Nos. 3 and 4 are increasing.

It required nearly six weeks to overcome floating sand troubles in No. 5 while wells Nos. 3 and 4 were shut down, cleaned out, reamed and loose sand removed and back pumping the evening of third day and no cup troubles followed. REAMING done by PATENTED tools which I have purchased. QUICKER and CHEAPER than shooting. NO RISK. NO FLOATING SAND. LARGER sand EXPOSURE for VACUUM to work on, and big STORAGE space in bottom of wells to accumulate oil while pulling rods and tubing and working on surface equipment.

TOOLS RENTED, SOLD OR REAMING CONTRACTED FOR CASH OR PRODUCTION, OR WILL WORK OVER AND OPERATE YOU R WELLS FOR A ROYALTY
