THE JUNCTION EAGLE

Volume 45 — Junction, Kimble County, Texas, Thursday, May 31, 1928 — Number 7

STATE CAPITAL WILL BUILD THE RAIL ROAD

Directors of Gulf & West Texas Railroad will undertake to effect rail connection between San Antonio and San Angelo themselves, without waiting on the Frisco System to get interested enough in it to start action, it was announced after a directors' meeting Monday afternoon.

The first thing to be done, it was decided, will be to raise $1,440,000 participating preferred stock, allotted as follows: San Antonio, $600,000; San Angelo, $250,000; Corpus Christi, $150,000, and $400,000 to the territory between San Antonio and San Angelo on the northwest and Corpus Christi on the south.

Albert Steves, Sr., was appointed to be responsible for San Antonio's quota of the capital; Judge W. C. Banks, for San Angelo's quota, and Robert Driscoll, for Corpus Christi's.

Steves will call a meeting of shippers and receivers of freight and other business men for Thursday morning at 10 o'clock in the Chamber of Commerce assembly-room to get busy on the raising of San Antonio's quota.

All the quota chairmen are directors of the Gulf & West Texas, which was organized last August with $25,000 paid-in capital, of which only $621.83 has been spent, mostly in trying to get the Frisco interested in the project.

"The Frisco is still interested," said R. W. Morrison, president of the G. & W. T., "as it is understood the reports of Chief Engineer F. G. Jonah and Traffic Manager J. L. Oliver were favorable; but presumably considerations of policy keep it from acting at this time.

"After months of negotiation, directors have decided that if we are to have railroad facilities to San Angelo on the northwest, also serving the new ports of Corpus Christi, we will have to build them ourselves.'

Other directors are Robert Kleberg and W. W. Jones, Corpus Christi; R. A. Hall and J. Y. Rust, San Angelo, and J. M. Bennett, San Antonio. Rust, who is secretary, and Bennett were the only absentees from Monday's meeting. Banks is vice president and treasurer.

Banks will apply to the Interstate Commerce Commission immediately for permission to build a rail line from San Angelo to Kerrville, Morrison said.

Morrison submitted data from U. S. Pawkett, manager of the freight bureau in the Chamber of Commerce, to the effect that gross revenue from a line such as is proposed would be $2,925,200 annually, with $650,960 to $763,000 net. This would be a return of 4½% on $16,786,000.

Morrison said the directors chosen to look after the quotas in the three principal cities were enthusiastic over the new prospect, and predicted that several trunk line systems would be glad to buy the line after it is built, but that the owners would not want to sell. It will make connections with both the Santa Fe and the Orient at San Angelo.

The route suggested by Pawkett will serve even a greater need than if the Frisco should build from Kerrville through Menard to San Angelo. He suggests use of the roadbed and structures put in by the Orient from San Angelo to Sonora, when it planned a line to Del Rio.

Sonora is isolated from any rail line and is very anxious for a connection, and would probably raise a part of the $400,000 allotted to the territory. It is a considerable mohair and wool producing section of the Hill Country. Christoval and other points would be served between Sonora and San Angelo.

From Sonora the road would follow the Old Spanish Trail as closely as possible, serving Roosevelt on the north fork of the Llano River, Junction and thence to Kerrville, probably serving Mountain Home on a branch of the Guadalupe River.

"San Antonio got off very light in the quotas allotted," said Morrison. If we had as high per capita quota as San Angelo, our allotment would be about $2,500,000. I believe if this road had been in the past 15 years San Antonio would have 400,000 population today.

The project will likely be promoted considerably by the trade tour which San Antonio business men will make to San Angelo, June 28 and 29. It is planned. Howell Jones, manager, said Monday, so as to have considerable portions of the afternoon of the first day and the morning of the second as well as one night in San Angelo.

TEXAN THEATRE NOW SHOWING THE BEST

The Texan Theatre is now in full swing and showing the best bookings to be obtained, with an occasional stage feature for diversion.

Last week for Wednesday and Thursday, Mr. Lockley booked an extra attraction in the person of Mr. LeMont, the "Mystery Man," who succeeded in pulling some very clever slight-of-hand stunts and escaping from tightly tied ropes, etc., all of which was very entertaining to the majority of the audience.

The bill for the remainder of the week was exceptionally good.

Throught the efforts of the management, the Junction public witnessed one of the most magnificent motion pictures of all times in the presentation of "Ben Hur." The dramatization of the famous novel proved to be a stupendous and superb work of art. This giant production consumed three years in the making; its cost is estimated at $4,000,000 and the cast is composed of 150,000 persons. But the finished product well repays for all that went to produce it. It is a story of Roman supremacy and the subsequent oppression of the Jews during Christ's life on earth. The educational and spiritual value are evenly balanced with all the thrills of chariot races; marine battles between the majestic fleet of Rome and the wierd galleys of the pirates; and an idyllic love story. The keen spiritual note that was struck in the opening scenes with the birth of Christ is held throughout and ends with the story in the solemn impressive picture of the crosses on Calvary for a background.

The picture was well received by a large and appreciative audience both nights. The manner in which this picture was received is an expression from the public of its appreciation to the management for his efforts in bringing this class of high grade entertainment to our city.

BAPTIST NEWS

Sunday School meets at 10:00 a. m.

Preaching at 11:00 a. m. and 8:00 p. m.

B. Y. P. U. meets Sunday at 7:00 p. m.

W. M. U. will meet at the church Tuesday at 3:30 p. m.

Sunday is the regular business meeting of the church and all members are urged to be present to attend to matters of interest. Please be present because it is your business to attend to the business of your church.

Tuesday, June the 5th, a workers' conference of the Medina River Association will be held at Medina. We should have a large representation present.

Wednesday, at 8:00, prayer service will be held, as usual but those who love to sing are invited to meet at the same time and hold a choir rehearsal.

Pray for our meeting beginning June 17.

STREETS OF HOUSTON FLOW BEER AND WHISKEY

On Saturday night of last week the firemen of Houston were called to a burning building and found they were wading in beer and whiskey. It is a pity that this couldn't have happened during the Democratic Convention, as we are quite sure delegates would have appreciated a show of that kind.

The report of the affair reads as follows:

Literally wading through pools of beer and whiskey, Houston firemen early Sunday night, aided and abetted by a mysterious blaze, uncovered one of the city's biggest wholesale liquor supplies.

A three-room frame house in the 900 block on Hutchins Street burst into flames about 9 o'clock and neighbors turned in the alarm. Apparently the place was vacant or the occupants had fled.

Firemen worked vigorously for a few minutes to put out the fire but soon discovered that they were wading through pools of beer, whiskey and alcohol.

As the smoke cleared away, the firemen found a 50 gallon barrel of whiskey, 500 bottles of beer, 70 cases empty beer bottles, one five gallon jug whiskey, 12 ten-gallon crocks of beer mash. 12 cans of beer malt, one gallon of whiskey coloring.

In addition there were cappers and a variety of other paraphernalia which J. J. Kuykendall and his police vice squad were breaking up shortly before midnight.

The whole neighborhood in the vicinity of the fire savored of intoxicating liquor. Firemen said they found 15 bottles of purported "J u a r e z-American whiskey," and some alcohol before the police arrived on the scene.

Golf Course In Prospect

Considerable talk has been had relative to a golf course for Junction, and talk is about all that it has amounted to for some time.

However, at this time the prospects are better than has ever been heretofore, as Mr. J. R. O'Bryan of Houston is again here looking into the matter of a nine-hole course.

Mr. O'Bryan stated to the Eagle man Wednesday that just at this time he had nothing to divulge, but would probably have something definite to give to the public within the next ten days or such matter.

It is hoped that the next issue of the Eagle will be in position to give to the public some definite plans of action of Mr. O'Bryan.

This is Mr. O'Bryan's third trip for the purpose of establishing a golf course here, and he states that his efforts are about to be rewarded.

SENIOR B. Y. P. U.

Baptist Church, June 3
7 p. m. precisely

Topic, "Problems of Daily Work.

Introduction — Ramsey Randolph.

The world began with work—Mrs. Frank Wilson.

Jesus and the carpenter's trade—Luther McDonald.

Why so many years in school?—Flossie Boone.

Why strikes and bread line?—Frank Cofield.

Problems solved in the right way—Melba Johnson.

Young People's Problems—Bennett Kindrick.

Special song—Vernell Tinsley.

Bible Quiz—Bennett Kindrick.

Miss Pearl Smith of Eldorado, District Secretary of the Woman's Work in the San Angelo District, was here Tuesday and met with the ladies of the Missionary Society of the Methodist Church, and gave them a very interesting talk.

C. OF C. BANQUET SATURDAY NIGHT BIG SUCCESS

The regular monthly meeting of the Kimble County Chamber of Commerce was held at the court house in Junction, and was well attended by the Chamber of Commerce members and boosters. Music was furnished by the Chamber of Commerce band, and a most delicious supper was served by Mrs. R. J. Motley. Eeveryone spent a profitable and enjoyable evening.

The principal topics of discussion during the evening were the building of an electric railway through Junction, and getting our roads and streets tarviated in order that we may have better tourist trade than we now have.

Mr. Douglas Motley, secretary of the Chamber of Commerce of Ballinger, Texas, also one of the managers of the best West Texas Chamber of Commerce, was present and made an able address in regard to the improvement of our natural resources and advertise them for the purpose of attracting the thousands of tourists who have not heard of our wonderful country.

Those present were: F. J. Weldon, Rev. G. W. Crabb, A. G. Farmer, C. R. Stevenson, H. B. Cowles, Sanford Roe, Joe Bissett, Oscar Weldon, T. A. Brooks, S. A. Griffith, J. B. Randolph, W. C. Winzel, H. W. Bierschwale, M. Awbrey, Elg'n Dechert, A. L. Mudge, Walter Loeffler, Walter Blackmon, Roy Blackburn, Loss Davis, W. P. Riley, J. A. Heyman, P. Joseph, Mr. Rieck, C. T. Holekamp, E. R. Borden, Hoy Smith, Carl Glossbrenner, I. W. Myers, Guy Wynne, W. H. Baker, Bennett Kindrick, Walter Tinsley, Kitrell Durst.

The regular monthly meeting of the Chamber of Commerce has been changed from the third Saturday night to the third Tuesday of each month. This will be much less work for the band boys, as Tuesday night is one of their regular practicing night.

If you are not a member of the Chamber of Commerce, join now; you need the Chamber of Commerce; the Chamber of Commerce needs you.

MERCURY SOARED HIGH SUNDAY AND MONDAY

The people of the Hill Country were complaining Sunday and Monday of the "extreme heat" when as a matter of fact it was quite pleasant compared with some other places. The thermometer here registered around 90 and 92, while at San Antonio we get the following report:

The mercury soared to a new high peak for the year at 5 o'clock Sunday afternoon when the city sweltered under a 97 degree temperature. The previous high mark was 93, which was set Friday and Saturday.

Temperatures for Sunday were 64 degrees at 6 a. m., 94 at noon and 97 at 5 o'clock. The mean average temperatures for the month are 19 degrees below normal, while for the year the mark stands 14 degrees below normal.

While reports from Fort Worth shows a temperature of 103 degrees, for Sunday afternoon, setting a new high record for that date and place.

CLEAN-UP PROCLAMATION

Take notice that June 5, 6, 7 and 8 is the date for Clean-Up of your premises.

Place your trash cans on the outside on June 8 or 9 where it will be taken by trucks and hauled off.

THIS MEANS YOU!

Rewards will be given by several business houses for best kept yards.

E. Holekamp,
Mayor.

GROBE SCHOOL COMMUNITY PICNIC BIG SUCCESS

One of the outstanding barbecues and picnics of the season was given by the people of the Grobe school district, Friday, May 25th. The dinner was served wihtin the confines of a cool and shady forest of ancient pecan trees in the Sam McCaleb pasture. The night before was spent by some of the men of the community barbecuing delicious chevon and mutton that was served.

During the day various games were indulged in by both old and young, and at 12:00 o'clock, sharp, the dinner gong sounded and everyone came forward and enjoyed a feed that could scarcely be equaled, and could never be excelled, consisting of barbecus, bread, pickles, coffee, iced tea, etc.

In the afternoon speeches were delivered by Judge J. B. Randolph and Judge Weaver H. Baker, which were enjoyed by everyone. One could readily tell that the July Primaries are to be held sometime in the near future, by the presence of a number of candidates, all of whom acted in such a manner as to lead the voters to believe that they would gladly accept their support.

More games and boat-riding brought a perfect day to a close, and everybody went home happy and with a feeling of good will in his heart for the people of that community.

2 Cars Collide Baby Injured

A near serious accident occurred last Thursday evening just before sundown on College Street, when Will Foley, driving a delivery car, and Inez Ragland driving a Ford touring car, came together at one of the intersections on College Street. Foley was facing the sun, going west, and was unable to see any great distance ahead.

In the car with Inez Ragland was the little girl of Hays Davis, and the three-year-old son of Mr. and Mrs. Maddox, and another little girl. The occupants of both cars were thrown out and the Maddox baby was the most seriously injured, and was rushed to the Standifer Hospital, and Dr. Standifer found the injuries of such nature that he at once left with the child for San Antonio, where at last report, it was doing nicely. Those in the car with the baby were more or less scratched and bruised, Inez suffering the greatest injuries. Will Foley was bruised and the skin torn off in some places.

Both cars were considerably damaged.

GRADUATION EXERCISES

Following is the program of the graduation exercises of the High School and Seventh grade, Friday evening, June 1, at 8:30.

Song, by Seventh grade.

Presentation of certificates of promotion to Seventh grade.

Salutation—Flossie Boone.

Class History—Walter Schrier.

Class prophecy—Albert Becker.

Presentation of gifts—Willie Baker.

Valedictory—Melba Burt.

Class song.

Presentation of diplomas by Mr. Riley.

Address—Dr. J. H. Musselman of The Texas School of Journalism.

Mrs. Maggie Jobes spent last week in Brownwood attending the commencement exercises at Howard-Payue College. Her son, Shelby Jobes, has been a student of that college for the past two or three years and graduated this year. He was called to Coleman last Friday for a try-out with the West Texas League.

FIRE DESTROYS HOME OF MRS. R. WAITS

Wednesday morning about ten o'clock, while Mrs. Waits was at the home of a neighbor, and looking toward her home, discovered that it was ablaze. She had left a sulphur candle burning in one of the rooms to fumigate, and in some manner the candle had become upset and came in contact with some inflamable material near where it had rested on a table.

Mrs. Waits ran to the room to recover some of the contents and was burned about the face and head, though not seriously.

The alarm was sounded and the fire engine responded, but was too late to do any good and the house burned to the ground. It is understood that Mrs. Waits carried insurance sufficient to partially cover the loss.

COMPLIMENTING MRS. H. G .HUBERT

Mrs. Harry G. Hubert, who expects to leave Austin June 1st to make her home in Junction, Texas, was honor guest at a luncheon given last Friday by Mrs. W. A. Keeling at her home, 3012 Wheeler St.

A springtime theme was developed in the table decorations with pink roses adorning the centerpiece. The salad and ice courses were served in the form of the chosen flower. Pink rose place cards marked the places for the hostess and Mrs. H. G. Hubert, Mrs. S. J. Thomas, Mrs. J. R. Reed, Mrs. Dan Moody, Mrs. J. W. Goodwin, Mrs. Body Wells, Mrs. A. B. Hartin, Mrs. W. N. Hawkins and Mrs. Hargrove of Bonham.

Austin American, May 26.

Last Saturday evening about sundown, as Game Warden Durst was coming in on the London road, at the curve near the Reese place, the sun was shining directly in his face, and Jess Kothmann, going in the opposite direction, and with the trees and undergrowth in the corner of the fence, causing each driver to fail to see the other until the collision came. A full head-on was had which threw Durst against the steering wheel, breaking one or two ribs and otherwise cutting and bruising him to the extent he was taken to the Standifer Hospital for repairs. Kothmann was not injured to any extent, but both cars were badly damaged. Sod is out and attending to his duties as usual.

G. R. Elliot, district representative for the Chevrolet Motor Co., and K. K. Kepler, Parts and Service representative for the same company, and both gentlemen with headquarters at Houston, were in Junction Wednesday in conference with the McDonald Chevrolet Motor Co. Mr. Kepler was here to install a model shop set-up, special equipment, same type as used in the Chevrolet factory. McDonald Chevrolet Company is now prepared to service your Chevrolet cars in the least possible time at the least possible cost to you.

Mr. Raymond Hubert and wife, Mr. Ben Taylor, Mr. and Mrs. Ireland Hubert, all of Coleman, Texas, were in Junction Sunday, the guests of Mr. H. G. Hubert, of the Gann Grocery Co. This was the party's first visit to this scenic spot of Texas, and they expressed themselves as very favorably impressed and will likely make Junction many visits in the future.

Rev. L. R. Doak and little daughter came in Monday to spend a week on the Llanos, and are located at Price's Camp. Rev. Doak is minister for the Christion Church and will deliver two sermons Sunday, June 3rd; morning at 11, and evening at 8:15 o'clock. Everyone is cordially invited to attend these services.

WOOL SUMMARY

Better Demand

There has been a distinct improvement in the demand for wool in the eastern seaboard markets in the last two weeks. With the placing of large contracts for fine tops, referred to in our last issue, there has followed further large business not only in tops but also in wool for the bigger mills which comb their own wool. The price of this advanced slightly on the heavier buying and now is back on the level which prevailed six weeks or so ago. Sales of nearly all grades of domestic wool have been made forward and in sizeable lines, indicating that the mills have confidence in the future of the market. There is no doubt that business in the good markets has shown considerable improvement in the last two or three weeks. Altogether, there is a distinctly better feeling in the market.

Foreign Sales

Whatever vistage of doubt remained up to a week ago as to the world-wide strength of wool was removed with the opening of the London Colonial wool auctions and the Brisbane, Australia, sales this past week. Prices at the opening of these sales were slightly under the level of the closing rates of the preceding series in each case, reflecting the lull in business which had occurred in the interim in the manufacturing end of the business. There was general competition, however, indicating that European and Asiatic markets still are in need of wool and prices after the opening showed a hardening tendency, especially in London, as the selection improved, so that it is confidently expected that the market will regain at least all its loss, as compared with the previous series' closing rates.

American buyers have not shown very marked interest in the sales either in London or in Brisbane, partly because of the unattractive selection and partly because of the prices. With the manufacturers here making their blends to a very marked extent from domestic wools, it is naturally to be expected that the demands for domestic wools must be relatively very heavy during the current heavyweight season. Moreover fine wools offer an especially attractive purchase to the handler of wool at the moment. Domestic medium wools, on the basis of current London quotations, are substantially on a parity with crossbreds, from an important point of view but fine wools are still below the parity of foreign wools. Thus while New Zealand 56s (three-eighths) are costing out of London the equivalent clean, with transportation and duty added, about $1.15 a $1.18, domestic wools of the same grade are selling at about $1.10, without allowing for a skirting differential of 6 to 8 cents. In like manner, New Zealand 50s (high quarters) are costing about $1.05, clean basis, out of London and domestic wools are quotable here at close to $1.00 for similar wools.

Boston Values

Fine wools, on the other hand, on the basis of $1.35 a $1.45 clean, landed, duty paid for Australian wools corresponding to our best fine French combing wools to choice fine staple, are clearly ten cents a clean pound above the prices which lately have been accepted for similar domestic wools at $1.10 a $1.20, clean basis, even after adding a skirting differential to the domestic wools of 10 to 15 cents a pound.

The sudden increase in the purchase of fine wools, therefore, in the Northwest and Southwest, in the last week or so, has not been ill considered; indeed, there was very good reason for this buying. With the promise that prices abroad will be sustained at least on current levels, there is reason to expect a clean basis of $1.25 and possibly $1.30 for good to choice fine domestic graded staple wools in the eastern seaboard markets this coming summer, assuming a decently good demand for goods, and contractors are unquestionably figuring on this basis in their current purchases.

Wool Stocks

Stocks of foreign wool in bond in the last month have shown some increase, as was to be expected with the heavy arrivals and with the mills using such a heavy proportion of domestic wools. For the first quarter of this year, according to the latest government report on wool consumption, while total consumption, exclusive of carpet wools, in condition reported, fell off from 92 to 86 million pounds as compared with a year ago, the quantity of domestic wool increased from 60 to 70 million pounds and the quantity of foreign wool fell off from 32 to 16 million pounds. Stocks of wool, exclusive of carpet wool, in bond, at Boston, at the first of May, amounted to 33 million pounds, compared with 26 millions at the first if April and about 9 millions (adjusted figures) at the first of January.

Fundamentally, the position of the market has not altered much in the last month but the general attitude towards the future is unquestionably more optimistic.

FOR SALE OR TRADE—Some good second-hand ice boxes and refrigerators. 6tfc W. E. Cloud.

RESOLUTIONS OF RESPECT

To the Worthy Matron, officers and members of Junction Chapter No. 497:

We, your committee appointed to draft resolutions of respect on the death of our beloved brother, H. Olney Patterson, respectfully submit the following:

Whereas, it has pleased our Heavenly Father, in the exercise of His divine will, to call from among us Brother Herman Olney Patterson, one of our most esteemed and respected members and a Past Worthy Patron of this Chapter; and

Whereas, Brother Patterson had been a resident of our town and community from his infancy until he had reached the prime of manhood's estate and during all of this period had so conducted himself as to win and merit the esteem, respect, friendship and confidence of the entire community in which he dwelled; and

Whereas, his good and wholesome habits and studious application to industry, honesty and uprightness of character had caused him to be generally regarded as one of the successful young men of our community; holding positions of trust and responsibility which he filled with ability and loyalty; elected to stations of honor by his associates in business and fraternal circles, and in all walks of life discharged the duties devolving upon him with a loftiness of purpose and sincerity which endeared him to his family, his friends, his associates and the public; and

Whereas, it is mete and proper that this Chapter express its tribute of love and respect to the memory of our departed member and former official.

Therefore, be it resolved by Junction Chapter No. 497, in regular meeting assembled, that while we bow with submission to the Will of an all-wise Providence, we deeply deplore our untimely loss of a good and faithful member, a cherished Past Patron, a highly honored and useful citizen of our community and one who reflected honor upon our Chapter by his membership and faithful service among us. His loss is not his family's alone but is one which is mourned by an entire citizenship.

Be it further resolved that we express our deepest sympathy to his sorrowing wife and family; that a copy of these resolutions be spread upon our minutes as a token of our love and affection, and that a copy be furnished to the local newspaper and a copy be sent to the family of our departed brother.

During the warm months especial care must be taken to keep milk clean and cold. When the milk is delivered in bottles, keep it in them until used, always being careful to keep covers on tightly. Wash off the top of the bottle before pouring out milk. Every rise in the temperature of the milk due to its standing about in a warm room aids in the development of the bacteria that cause souring.

SHOULD OSTRACIZE RECKLESS DRIVERS

An authority on traffic problems says:

"Every traffic accident is a symptom of something wrong. Something wrong with the driver, the pedestrian, the street or highway, the control system, the vehicle, the ordinance, the police department, or the community. In cities, two-thirds of the victims of fatal motor accidents are pedestrians. Our greatest problem is to define clearly the proper use of streets by vehicles and by pedestrians and the obligations of each to the other."

He urges "an organized campaign of ostracism of the motorist who endangers self and every one through nonobservance of traffic signals, boulevard stop signs and the like, and who is generally the same fellow that pulls across the crosswalk, makes elderly people jump out of his way, splashes mud on pedestrians and generally behaves himself like a hog."

He says public officials promote violation of traffic signals "at places where they are not needed, run them at times when they are not needed or run them on too long a cycle."

SWEET CREAM BUTTER

Do you know that a great deal of the butter nowadays is made of sweet cream instead of soured, or ripened, cream? The custom of letting cream sour before making butter from it developed centuries ago, probably as a matter of necessity rather than of choice, and the use of a starter in developing bacteria, in order that the butter might acquire the desired flavor, became a general practice. About forty years ago the State experiment stations began making sweet cream butter from raw cream and found that it was of good quality and flavor. In 1905 the Department of Agriculture carried on work to determine the keeping qualities of sweet-cream butter, and found that if made from unripened, pasteurized sweet cream it would keep at least eight months in storage at 0 degrees F. As a result of this work the Navy Department adopted the practice of buying large quantities of sweet-cream butter and placing it in storage. At the present time a number of creameries in what has always been considered sour-cream territory are grading cream and making some sweet-cream butter. In New York City most of the butter dealers now handle some sweet-cream butter and during the cold-storage season particularly, buyers are eager to obtain butter of this kind. An association of creameries reports that in 1926 it sold over 50,000,000 pounds of sweet-cream butter in various cities of the United States. In the beginning, butter manufacturers criticised this kind of butter because it lacked thhe high flavor and aroma of the ripened cream butter, but now an increasing number of butter dealers each year are handling it and it is rapidl gaining in popularity.

ENCOURAGING CRIME BY PSYCHOPATHIC ROUTE

An ardent advocate of crime suppression, said that after listening to a distinguished man speak on the subject of psychopathy for an hour, he came to the conclusion that what the learned gentleman was really trying to tell his audience was that a psychopath is a man who kills you and after he has done it says he could not help it, and then proves it by an expert. This incident probably explains to a large extent why crime is so prevalent in America. Criminals are given every possible loophole to evade the consequences of their acts.

First, a large percentage of them are never captured. Second, when captured they are never convicted. Third, when convicted even for the most serious crimes, they are too often pardoned or given light sentences.

Too much of our legislation is of a restrictive character aimed at law-abiding citizens, on the theory that this will reform the crooks or cause them to obey the laws. This is childish reasoning. Crime today in the cities is an organized business.

The more complicated laws we get, the easier they are to evade and the less the individual citizen feels he can cope with the situation. Delays become vexatious and ultimate conviction almost impossible, due to forgetfulness and the tendency to overlook the facts connecting the crime with the ultimate trial.

What the country needs is more enforcement of fundamental laws, more certain and more speedy punishment, and more assurance that convictions will be secured and sentences served when a lawbreaker is proved guilty.

We need fewer psychopathic arguments and more actual punishment.

TRIBUTE TO THE COUNTRY PRESS

"The smaller newspapers of the country are the most important newspapers, and incidentally, in proportion to their circulation, their advertising results are the biggest, and their advertising rates are the smallest in the country. They are read through from end to end. Every copy of circulation means an entire family, not a family that lives in one room with a can opener, but a family that owns its own house, and land around it, at least ninety times out of a hundred; a family that buys everything, from the roof on the house, to the cement on the cellar floor; from the hat on mother's head to the shoes on the boys' feet. The service that their publishers render to the public is, in my opinion, the most important service rendered by any class of citizens in the United States. The country editors are distributors of information; they reach the minds of the boys that leave the farms, and they are the nation's mental police force," says Arthur Brisbane.

After half a century in the publication of newspapers, daily and weekly, the writer can indorse the opinion of Arthur Brisbane that the country paper is read from end to end, and the advertisements are of special interest. Where a hundred read all that is in the home weekly, only one in that hundred peruses all that is in the big city daily paper that come to them. Large foreign advertisers are also becoming cognizant of the fact that space in country weekly and smaller daily papers is of real value to them; that they can gain more at less cost, at the same time securing as much combined circulation with a certainty that their advertisements will be read by all.—Wodbourn, Ore., Weekly Independent.

KERRVILLE BUS COMPANY APPEALS TO PEOPLE

When the Peterson Brothers decided to add to their other activities the carrying of passengers between Junction and San Antonio, the point that caused them the most worry and concern was how to do this with the least possible inconvenience to the people living at either end of the line. If the problem under consideration had affected only the people of Kerrville and vicinity it would have been easily solved, but when those living nearly sixty miles further from the base had to be given equal consideration, the solution became at once more intricate. Time tables by the score were made and destroyed before the one decided upon as the fairest to everybody, the least inconvenient to those living farthest from the base and the most convenient for those at the base.

In order to make the journey as easy and as little tiring as possible, a fleet of busses were purchased. These busses were installed not for cheapness of operation, ability to carry great loads, nor for any other economic reason principally, but because of the ease and comfort in which passengers could be transported great distances.

A close examination of the schedule reveals these facts:

1. On the morning run Junction to San Antonio, the trip is made in four hours and thirty-five minutes. The afternoon run takes only thirty minutes longer.

2. If only a short stay in San Antonoi were necessary, the round trip could be made in one day and still allow the passenger four hours and fifty-five minutes in San Antonio and a safe arrival home at the end of a perfect day, 9:05 p. m.

3. The afternoon bus leaving Junction at 2:00 p. m. reaches San Antonio at 7:05, in ample time for any show, concert or theatrical performance and the north bound morning bus gets you home in time for lunch.

4. The expense is slight compared with that incurred in the operation of a privately owned car and lastly, you are insured against accident and without any additional cost.

We know that we give you good service and naturally the more liberal your patronage is the greater will be our ability to improve and perfect an already A-1 service. We ask you to try us, find out by personal experience the comfort with what ease and precision they convey you to your destination carefully, speedily, hasily, comfortably and on time.

Yours very truly,
Kerrville Bus Company,
Hal Peterson, Mgr.

ANNOUNCEMENT

Used car buyers are more or less skeptical. The McDonald Chevrolet Co. is establishing the STANDARD CHEVROLET POLICY, to insure the buyer of a used car that he will get his money's worth by giving a

THREE DAY GUARANTEE

and if at the expiration of the three days the buyer of a used car is not satisfied with his purchase, he may return the car and exchange it for any other, old or new, car in the house, receiving credit for the price paid.

This method is simply a guarantee of good faith, and our confidence in our reconditioned cars.

We have the following used cars in the house, with prices opposite:

1 Chevrolet Coupe..... $335
1 Ford Roadster..... $200
1 Ford Touring..... $100
1 Ford Touring..... $50

McDonald Chevrolet Co.

Everybody will be at the Big Barbecue at Cedar Hill on June 13th and 14th. They will all have a good time. 6-3c

ICE
Refrigeration
Used in Twelve Million Homes

MORE than 95 per cent of all home refrigeration in this country is done with ice. Twelve million families use ice.

Ice is cheap, quickly available in any amount desired, and involves no investment in apparatus except a good refrigerator. There is little or no upkeep and your ice supply is abundant and certain.

Be sure you have a *good* refrigerator—not necessarily an expensive one—but rightly designed, *well insulated*, sturdily built.

This Week

By Arthur Brisbane

Unpleasant warning, but necessary.

The Federal Government sees danger of another outbreak of infantile paralysis this Summer. Dr. Harris, New York's Health officer, warns against danger of spinal meningitis.

These diseases, puzzling to science, are as mysterious as were yellow fever and malaria before men discovered that mosquitoes, and nothing else spread both.

While waiting for definite information, do these things:

Screen doors and windows, using copper screen, that it may last.

Keep flies away from babies and young children, and away from their food.

Pasteurize or boil children's milk. Give foods rich in vitamin contents.

Teach children not to put fingers in their mouths or nose—wash their hands well before meals. Teach children that kissing is dangerous, especially on the lips.

And let adults know that their kissing should be limited to their own children. Every adult mouth and throat carry disease germs, latent, that might work havoc in a young child with undeveloped leucocytes protection.

Dorothy Dix, wise young woman, first cousin to Hypatia and Portia, says, "Consistency is the sure sign of old age. I pray my opinions may always be flexible.

Accused of being inconsistent, Dorothy Dix says, "I hope to goodness I am. I should hate like poison to be consistent.

Many mistake for consistency what is really old age dullness.

When Harvey announced his discovery of the blood's circulation, giving proof that a child might have understood, his proofs were rejected by every doctor of reputation past forty years of age.

Even Napoleon, old physically but not in years, did not use the improved rifle that a German had invented. And he had no time "to give more than a minute to that American." The American was Fulton, trying to show Napoleon how steamboats would take him across the English Channel.

Interesting to chicken men. Pennsylvania has three electric hatcheries, holding 47,000 eggs each. The eggs, put in trays at the top of a refrigerator-like arrangement, gradually sink down, as days pass, until they reach the bottom, and the chicks walk out on the twenty-first day.

Empty racks rise to the top for more eggs, and a constant stream of chicks pour from an incubator that never stops, eggs being replenished twice a week.

Cockerels are eaten. Pullets stimulated by high feeding lay early, and electric lights burning in their coops keep them eating after dark and increase egg output.

When the hens, weary, slow down, they become chicken stew, and pullets replace them. A hard life, but not so different from ours. Nature gets rid of us, also, when our usefulness ends.

When the energetic British say they mean to increase their foreign markets, they mean it. They have built boats small enough to go through the Welland Canal, and will send low phosphorous pig iron to Chicago, Milwaukee and other American markets, at $26 a ton delivered, duty paid.

You may say that our steel men should be able to compete with foreign prices. Possibly. But in any case our Government should see to it that American workers AND business men are protected from foreign competition.

Florida is Democratic, very, and Democrats usually oppose high tariffs. But all depends.

Florida's Winter vegetable crop is menaced by Mexican competition, growers are facing ruin.

So Florida, wisely, pledges her candidates for Congress to a tariff "that will protect American labor against destructive foreign competition."

SURFACING OF JUNCTION ROAD IS UNDER WAY

Actual work on the paving of the Old Spanish Trail from Mountain Home to Junction was scheduled to start this week. Road crews and equipment of the Kelly Construction Company, successful bidders for the contract, passed through Kerrville Saturday en route to the scene of operations.

The Kimble County section of the highway will be surfaced first, all of the property owners in that county having deeded over the additional 20 feet of right-of-way required by the State Highway Commission.

As soon as the 80-foot right-of way is secured, work will start in Kerr County, according to Judge Lee Wallace. The majority of property owners have signed up. The road, designated as State Highway No. 27, is now 60 feet wide. It has been inspected by State engineers and the base found in splendid condition for asphalt topping.

The stretch from Junction to Mountain Home is 34 miles, and the surfacing contract let by the State Highway Commission calls for the expenditure of $62,500.

The gap from Mountain Home to Kerrville is expected to be included in a later appropriation by the Highway Commission.—Kerrville Mountain Sun.

—o—

YOUR FLOWER GARDEN

(by Romaine B. Ware)

Keep a Garden Note Book

By all means have a garden note book to keep a record of all the things you want to remember in connection with your garden. You may think at first thought that you don't need it, but you will refer to it many, many times as the seasons roll by. You will find a book about seven and one-half by nine and one-half inches with stiff covers the most practical.

In this book make note of the things you want to do in your garden, the plants you want to add here and there. When you visit a friend's garden or nursery, take it along with you and jot down the things that interest you. There is always some new plant being brought to your attention, and if you don't mark it down you will not remember it, and then when you wish to order it for your garden you cannot do it.

In your garden note book make note of the pleasing color combination you see in the gardens of others. Good combinations of plant material are always worth study, and it is by study that you will improve your garden. When you visit the flower shows take your note book with you and note the new things you see and wish to add to your planting. If you wish to keep your garden up to date, you must be on the lookout for the newest things. The space and time we have to devote to our gardens is limited with the most of us, and only the better things are worthy of a place in our gardens. Your garden should be a selection of the most desirable things you can grow, not a collection of any and everything.

In your note book you should keep such things as recipes for spray solutions, notes upon liquid manures and similar things. You will find that you will refer to them many times. A garden note book becomes a regular mine of information, and you will not realize its value till you have one. My own note book has grown until today it has almost become a scrap book; in fact, in addition to my note book, I keep a very large scrap book of garden material, and am always adding to it. One never learns too much about gardens, and you must always be on the lookout for gardening information. Jot it down and you will have it when you want it.

—o—

SERVING HEAT USERS

Artificial heat, one of the chief necessities of life outside the tropics, is the latest commodity to engage the attention of the great public service companies. The National Electric Light Association, whose members manufacture and sell most of the electricity used for light and power in about 17,000,000 American homes, is investing the capabilities of automatic heat machines burning fuel oil. While the motor that operates the oil burner uses very little electric power, the immense field open to electrically controlled heating apparatus and the rapid increase in the use of fuel oil has suggested an important new market for the sale of electric power.

In this respect the automatic oil heater is now in a position similar to that once occupied by the iceless refrigerator. The central station companies became actively interested in mechanical refrigeration only about three years ago. Since that time no less than three quarters of a million refrigerators operated by electric power have been put on the lines of the electric service companies. The companies made exhaustive tests which resuletd in the central stations' getting behind electric refrigeration and promoting the sale of the new household appliance. The development of the electric refrigerator from the standpoint of the producers of electric power followed the course of the vacuum cleaner, the electric flatiron, the electric toaster and curling iron and other labor saving devices which are now standardizcd equipment of the efficient housekeeping plant. The automatic oil heater apparently is going through the same process.

The development of automatic oil heating vitally interests the central station companies because they are constantly seeking to distribute their "load," or flow of power from the generating plant, on a more equalized basis. At present their maximum demand is for lighting and comes at night. The electrically controlled oil burner operates throughout the twenty-four hours and does most of its work during the daylight hours when there is comparatively little demand for light.

SHADE TREES TO BE PLANTED AT HATCHERY

The already attractive grounds at Heart o' the Hills Fish Hatchery are to have an added touch of beauty by the planting of shade trees not native to the Hill Country, according to Supt. Mark Riley of the State plant.

The decision to plant shade trees was reached following a visit of a party of officials from the A. & M. College of Extension Service during the past week. In the party were A. D. Jackson, editor of Extension Service publications at A. & M.; A. K. Mackey, wool and mohair expert, and Dr. A. B. Connor, director of Experimental Stations in the State, with headquarters at Bryan. The visitors were all impressed with the beauty of the surrounding country and the care taken of the grounds and buildings, of which they made a thorough inspection.

Dr. Connor offered the suggestion and agreed to furnish shade trees for the hatchery grounds at the proper season for planting. He desires to experiment with the Chinese elm and the Arizona cypress, adding several other varieties later on.

Approval of the agreement was made by Chief Deputy Beal Jester of the Game, Fish and Oyster Commission, who made an inspection visit to the hatchery this week. Mr. Jester was greatly pleased with conditions at the hatchery and again gave assurance that the department is anxious to co-operate in any way that will add to its value as a factor in restoring streams of the Hill Country with an abundant stock of fish.—Kerrville Sun.

RAIN AND HAIL DO DAMAGE IN MENARD COUNTY

Menard County was visited Sunday night and Monday by both rain and hail. The precipitation varied over the county; but the greater portion of the county received from an inch to four and one-half inches of rain fall.

Early Sunday night a heavy cloud swept over the eastern part of the county. The Hext, Calf Creek and other communities in that part of the county received heavy damages from the hail that accompanied the rain. In all the Hext section received 4¼ inches of rainfall. The hail and wind did considerable damage to crops in that community. The hail began heavy enough to do crop damage at the J. E. Kinny farm and from there on east to near Mason more or less damage was done to the crops. It will be necessary to replant almost half the cotton acreage in the Hext and nearby communities.

Aside from the damages done, general rainfall over the county has put things in good condition.—Menard Messenger.

WHY IS A NEWSPAPER LIKE A WOMAN?

The Fort Mead Leader propounded the query, "Why is a newspaper like a woman?" and for the best answer offered a year's subscription. It brought forth these replies:

"Because you can believe everything they say; they are thinner now than they used to be, they have forms; they have bold-faced types; are easy to read; well worth looking over; back numbers are not much in demand; they are not afraid to speak their minds; they have a great deal of influence and if they know anything they usually tell it."

"Because they always have the last word and because they carry the news wherever they go."

The correct answer is: "Because every man should have one of his own and not run after his neighbor's'."—Ex.

Stains from fresh fruits or berries on white cottons and linens may often be removed if attended to promptly. Stretch the stained part over a large bowl, holding it in place with a string or an elastic band. Pour boiling water on the spot from a teakettle held 3 or 4 feet higher than the bowl, so that the water strikes the stain with some force. Sometimes it is necessary to alternate a little rubbing with the hot water treatment. Lemon juice and sunlight will usually remove the last traces of stain on these white materials.

MENARD COUNTY WOOL TOPS MARKET

It is gratifying to note that the Menard Commission houses have paid the top price for wool this season, with some clips selling for 44½.

Geo. Bradford, Max Russell, Dan Crowell and sons and perhaps others received 44½ for their clips, while Fred Speck, W. R. Tomlinson, W. W. Russell, T. P. Russell, Jacoby Bros., Miss Clara Wilhelm, Fritz Wilhelm and Frank Wilhelm have been reported among those who have sold for 44c. These clips, of course, are among the very best that are produced in this section and they always command a top price.

A few contracted their clips early in the season at as low as 40c, but most clips that were contracted at that price were small. The price has ranged from 40c to 44½c per pound.

The Menard Wool & Mohair Commission Company will handle approximately one and one-half million pounds of wool; The Junction Wool & Mohair Company approximately one million pounds and the Murchison Commission House more than a quarter million pounds. Each of these companies have paid top prices for wool and each has customers listed among the 44c class.—Menard Messenger.

GOOD GOVERNMENT UP TO PEOPLE

If popular government is effective, each stockholder in the public business must be intelligently informed. The details and ramifications of modern government are too varied to permit each citizen to know how each tax dollar is spent or to judge the effectiveness or ineffectiveness of the methods by which each public function is carried on, without the aid of some organized interpreting agency.

Public understanding and support of tax measures is necessary as a check on public affairs. Public administrators very often fail to ferret out and apply changes in procedure which would contribute to economy and efficiency. Changes in methods are usually impossible without organized activity and demand from citizens.

Personal interest in, and knowledge of tax problems, are sentries at the tax exit gate. It is the means by which the public is kept informed on the progress of public business. Individual interest in the problems of government and taxation will bear fruit a hundredfold in improved governmental services to the people.

Years of Service in Model T Fords

Expenditure of few dollars may enable you to get thousands of miles from your old car

THE Model T Ford is still a great car. It led the motor industry for twenty years and it is used today by more people than any other automobile. More than eight million Model T Fords are in active service in city, town and country, and many of them can be driven for two, three and five years and even longer at very small up-keep expense.

The cost of Model T parts and of necessary labor is unusually low because of established Ford policies.

New fenders, for instance, cost from $3.50 to $5 each, with a labor charge of $1 to $2.50. Tuning up the motor and replacing commutator case, brush and vibrator points costs only $1, with a small charge for material. Brake shoes can be installed and emergency brakes equalized for a labor charge of only $1.25. A labor charge of $4 to $5 will cover the overhauling of the front axle, rebushing springs and spring perches, and straightening, aligning and adjusting wheels.

The labor charge for overhauling the average rear axle runs from $5.75 to $7. Grinding valves and cleaning carbon can be done for $3 to $4.

A set of four new pistons costs only $7. For a labor charge of $20 to $25 you can have your motor and transmission completely overhauled. Parts are extra.

All of these prices are approximate, of course, because the cost of materials needed will depend on the condition of each car. They show, however, the low cost of putting the Model T Ford in shape for thousands of miles of additional service.

See the nearest Ford dealer, therefore, and have him estimate on the cost of re-conditioning your Model T Ford. He will tell you, in advance, exactly how much the complete job will cost.

Junction Trade Notes

To date of May 30 the Junction wool warehouse had received more than one-fourth million pounds of wool, according to tabulations of Mgr. A. J. Hamer. The clips include 120,000 lbs. twelve months and 136,000 lbs. six months fleeces. Buyers who have visited the warehouse declare the quality of the wool to be A-1. Date of wool sale will be arranged for early in June. San Angelo held a wool sale on Wednesday of this week.

Red Top cane seed, June corn, Dorso. **Gann Grocery Company.**

The Commissioner's Court at its regular term June 11, will receive bids for tarviating Junction's main street, which is Holecamp Avenue, or the Old Spanish Trail.

Swift's Premium Hams, wholes or in halves. **Gann Grocery Company.**

Geo. G. Murray, vice president The Standard Trust Company of San Antonio, accompanied by Mrs. Murray and other members of the family, spent the week-end at the Fritz in Junction and took out several shining bass from the Llanos. Mr. Murray is booked for a longer vacation on the Llanos when real summer arrives.

Beans in cans should be popular with the busy housewife—requiring only warming in the can or seasoning to suit in the frying pan. A variety to select from—Brown Beauties, Red Kidneys, Heinz oven-baked, Gebhardt's Mexican style, and black-eye peas in cans, a real table delicacy. Select a dozen for your pantry; special price by dozen. **Gann Grocery Company.**

M. N. Harrison of Junction, who makes fine country butter at his farm dairy, is in possession of a penny coin of the U. S. Mint, that is more than 100 years old, bearing the stamp of 1827. Mr. Harrison found the coin around his feed lot. It is nearly as large as a half dollar, and may be worth more—on account of its early vintage.

R. L. Becker's choice Mason county honey, in cans and glass, in the comb and extracted. At **Gann Grocery Company.**

Tom Saunders, assistant cashier Coleman National Bank, accompanied by Mrs. Saunders, was a business visitor to Junction Monday. It was Mr. Saunders' first visit to Junction and he stated he was coming back for a summer vacation on the Llanos.

Rice Crispies and Rice Flakes, the new breakfast cerials. **Gann Grocery Company.**

W. P. Riley, president Junction State Bank, was in San Angelo Wednesday to attend the first sale of Texas fine wools, and to arrange date for the selling of Junction wools.

Fresh vegetables and fresh fruits arrive at our store on Tuesdays and Fridays each week, and we are receiving some home-grown vegetables, including beets, English peas and young onions. Use your telephone—59—free delivery. **Gann Grocery Company.**

Mrs. M. E. Rogers and children, of Austin, recently arrived Junction to spend the summer on the Llanos. They have a cottage with the Victor Hardemans. Dr. Rogers will have his vacation later in the season.

The print shop of Junction Eagle has on press two jobs of equal importance in the advancement of Junction and the community of the Llanos. The reporter for this column observes, too, that the Eagle print shop with recent equipment is more than abreast of the community and the character of its work the equal if not superior to some of the city shops.

If you have not found your favorite coffee, try John Bremonde in the Red Can.

Mrs. O. W. Cardwell and members of the family who have been attending Southwestern University at Georgetown, arrived Tuesday and are again at home on the Divide ranch.

Special price on gallon fruits for Saturday, June 2nd, a large variety to select from—peaches, apples, apricots, green guage plums, egg plums, grapes, pineapple, cherries.

LONDON LOCALS

Mr. and Mrs. A. C. Ivy of Johnson City were visiting their parents, G. R. Ivy and D. G. Adams, last week. Master Rollie Adams accompanied them home for an indefinite stay.

Some of our people attended the Ivy school picnic last Friday, others of us wished very much to go but could not. All who attended report a real good time. They say they got to see nearly all the candidates.

Mr. Fred Jackson, representing the Tyke Monument Co. of Llano, spent the night of the 24th in our town. While here he was the guest of Mr. C. R. Robinson.

Mr. and Mrs. Tom Amberson made a business trip to Mason last week.

There was an encouraging statement in the Eagle last week that several weddings were expected in Junction soon. That is another progressive move that London could keep step with if they would. We have the material, but it seems that those best fitted are so far apart in some respects they can't get together in others.

Fishermen are coming daily. Among others who recently arrived are Mr. and Mrs. C. H. Kuykendall of Waxahachie, Mr. John Chatman, Mr. Underwood and others from Gorman.

Mr. Allen Hull of Junction was delivering Fyre-Fyters in town Tuesday.

A rather dangerous collision occurred at the Reese and Herbst corner on the highway Saturday evening when Mr. S. O. Durst and Howard Kothmann ran together. Howard was not hurt much but Sod was pretty badly bumped. Be more careful, boys.

Martin Boze and family, Brit Stewart and son, B. J., are the guests of the G. T. May home this week.

Mr. W. V. DeSpain has returned from several weeks visit to his daughter, Mrs. O. W. Hamilton, of San Angelo.

Mrs. R. L. McKinney has returned from San Saba where she has been attending the bedside of her sister, Mrs. Ledbetter, who has been quite sick.

Mrs. Owen Amaon, Mrs. French Cummins, Miss Victoria and Gussie B. Brewer made a business trip to Junction Monday.

Mrs. G. T. May left Tuesday for Yoakum.

We are informed that three of our teachers for the coming term will attend the South Texas Normal Summer School for teachers at San Marcos. Those who will attend are Miss Victoria Brewer, principal, Miss Lola V. Cummins, intermediate, and Miss Goldie Brewer, primary. Miss Goldie has been at San Marcos for several months and will remain during the summer session. Mr. Ed Cummins will also attend the summer school.

With actual war between China and Japan in progress, and considering the Washington treaty concerning China, it behooves our Uncle Sam to be very careful lest he get his feet wet. It appears to be the method of Japan to carry, so to speak, a chip on her arm and continually inviting some other nation to thump it off. In candor we believe she should be told just where to park, and then see that she parks there.

See us for special prices on auto tires and tubes.

Powell Motor Co.

NOTICE

Notice is hereby given that the Commissioner's Court of Kimble County, Texas, at its regular term of court, June 11, 1928, will accept bids for the tarviation of the main street of the city of Junction. The Court expressly reserves the right to reject any and all bids.

Commissioner's Court of Kimble County.
