WEST TEXAS RAMBLER

By MEL KING

While driving from Seattle to Tacoma yesterday morning, Mount Rainier loomed up before me in the early morning sun that shone in an almost cloudless sky.

Contemplating my move in early July to West Texas, my thoughts centered around the fact that this big white marvel of nature would soon be missing.

But then I thought of the pleasure that was mine in the early 1950's in coming to know some of the mountains of West Texas.

The Davis Mountains aren't snow-covered, but they are sharply carved by the elements and have a certain amount of vegetation that make them colorful in appearance.

The Chisos Mountains rise out of the desert of the Big Bend National Park with a full crown of greenery and animals that flourish in that altitude, though water is not exactly plentiful.

Then I smiled as I thought of the fun I have had during the past five years with Tom and Evie Rodrique concerning the hill of my chilhood -- Lone Wolf Mountain.

Neither Tom nor Evie have ever been to Texas, but they have a rock that came from its top, along with a framed article from an earlier edition of The Mitchell County News concerning the history of Mitchell Co.'s highest point.

Tom Rodrique meets people from Texas from time to time. He always asks them where they live in relationship to Lone Wolf Mountain. So far, his acquaintances have looked at him with blank stares. He's not certain whether this is due to their lack of knowledge or if it is impossible to see Lone Wolf Mountain from the highway.

Yes, Tom, there is a Lone Wolf Mountain and maybe some day you will get to see it for yourself.

Baptist Church Library . . .

"Silver Trumpet," by J. Wesley Ingles, a Green Fund Prize Story, is a fine book for the Junior or Young person.

When D. Randall MacRae pushed his way out of the jostling crowd to discover who in the great tent was playing the piano so that the living, lilting rhythm of it got into his blood, he entered upon a career which neither he nor any of his sophisticated friends would have believed possible for him. Fay Thurston, the girl at the piano, is a heroine in whom the charms of our capable, self-reliant modern young women are blended with endearing virtues and sweet graces of the highest type of womanhood through all ages. That Randall MacRae and Fay Thornton should love each other was inevitable.

Mr. Ingles has produced a fascinating college love story, modern and up-to-the minute in every detail, though it is absolutely different from the too well-known stories of flaming, purposeless college youth. Here young men and young women study and play intensely, yet with an abandoned gaiety all too little known by an age that is over-sold on sophistication. They pray before athletic contests, attend religious meetings as though they enjoyed them, and sing spiritually searching songs at their picnics and beach parties. It is a prize story that will be prized by all who read it, and will strengthen faith in our young people of today who, we believe, are as fine and noble as the young people of any age.

Make your air conditioning work better, cost less.
Here are six tips that will help you get the most comfort from your air conditioning at the lowest possible cost.
Set the thermostat properly:

Set the thermostat no lower than necessary for your personal comfort. Most air conditioning specialists recommend a thermostat setting of 76° to 78°. Remember, the lower the setting, the more electricity the unit uses.
Inspect filters often:

Clogged filters make the unit work harder and use more electricity. Replacement of disposable filters—or cleaning of permanent types—will help keep the system running more efficiently.
Have regular maintenance checks:
Have the unit checked at least once a year by a qualified air conditioning serviceman. Do this in the spring, prior to your need for cooling. It pays!
Trim shrubbery:
The outdoor unit needs free air circulation. Help it maintain full efficiency and keep operating costs down by trimming nearby shrubbery and by checking to make sure compressor coils are clean.

Keep sunlight out:
Direct sunlight increases the heat in your home.

Reduce the air conditioning unit's load by using awnings, blinds, shades or draw drapes.
Insulate:
Proper insulation keeps the hot air out, the cool air in. It reduces the cost of winter heating too. Ceiling insulation is particularly important.
