Louisiana WPA "Routine Checkup" Ordered by Ickes

WASHINGTON, June 27. (AP) — The Public Works Administration ordered a "routine checkup" today to determine whether funds in local construction accounts for PWA projects in Louisiana were "intact."

Administrator Ickes said the division of investigation would make the investigation. He declined to connect the order with current political upheavals in Louisiana. He declared the action was not an "investigation."

Two Midland Men Are Designated Members Of WTCC Committee

Two men from Midland have been appointed on West Texas Chamber of Commerce committees for 1939-40. M. C. Ulmer is a member of the Traffic and Industrial Committee and W. W. Lackey is a member of the Redistricting and Apportionment committee. Announcement of the committee appointments was made recently by President E. K. Fawcett of Del Rio.

Each committee has the duty of carrying out specific plans in this year's program adopted at the recent WTCC convention.

A few of the major planks in the program include continuation of the regional organization's work for freight rate equality, cotton rehabilitation, reduction of government costs, protection and promotion of West Texas industries and natural resources, equitable crop allotments and cooperation in soil and water conservation work.

Committee assignments announced to date are:

Agricultural and Conservation: Clifford B. Jones, Lubbock, Chairman; Winfield Holbrook, Plainview, Vice Chairman; R. E. Dickson, Sr. Spur; J. J. Steele, Anson; R. E. Patterson, Lockney; Omar Burleson, Anson; P. B. Ralls, Ralls; Ray P. Smith, Abilene.

Cotton Rehabilitation: C. M. Francis, Stamford; Dr. M. E. Heard, Texas Tech, Lubbock, Vice Chairman; R. C. Ropping, Lubbock; W. J. Ely, Snyder; J. Walter Hammond, Tye; Judge Walter Pope, Abilene; S. T. Harrison, Memphis; Hugo Haterius, Leuders; Vester Smith, McLean.

Public Expenditure and Taxation: Judge James D. Hamlin, Farwell; Chairman; Kindel Paulk, Wichita Falls; H. C. Custard, Cleburne; P. B. Bludworth, Brownwood; H. W. Allen, Amarillo; Bob Moore, Vernon; Dudley Yard, Pecos; J. R. Colard, Spearman; Wm. L. Pier, Fort Worth.

Traffic and Industrial: B. Reagan, Big Spring, Chairman; G. H. McKinney, Fort Worth; Jess L. Showers, Vernon; M. C. Ulmer, Midland; Joe Kerr, Sanderson; J. M. Willson, Floydada; T. A. Singer, Dimmitt; C. L. Green, Winters; Henry Teubel, Tulsa.

Natural Resources: W. B. Hamilton, Wichita Falls, Chairman; Geo. W. Elliott, Odessa; H. A. Goodson, San Angelo; Jake Sandefer, Breckenridge; A. C. Elliott, Ozona; Clayton Heare, Shamrock; W. A. Montgomery, Iraan.

Editorial: H. S. Hilburn, Plainview, Chairman; Chas. A. Guy, Lubbock; J. S. Smyth, Snyder; John McCarty, Amarillo; Dean Chenoweth, San Angelo; Douglas Meador, Matador; Jas. C. White Brownwood; Vestel Lott, Pecos; Albert Law, Dalhart; Albert Cooper, Shamrock; Jas. R. Record, Fort Worth.

Redistricting and Apportionment: Senator Geo. Moffett, Chillicothe, Chairman; Rep. Bryan Bradbury, Abilene; Lawrence Hagy, Amarillo; N. S. Holland, Breckenridge; L. A. McDonald, Denton; W. W. Lackey, Midland; Tom Garrard, Tahoka; C. E. Casebier, Fort Stockton; Courtney Hunt, Haskell.

Museum: J. Thomas Davis, Stephenville, Chairman; Rev. W. P. Gehart, Abilene; Dr. Cyrus N. Ray, Abilene; Walter H. Adams, Abilene; O. P. Thraner, Abilene; W. J. Layland, Cleburne; Mrs. W. W. Carson, San Angelo; R. C. Crane, Sweetwater; R. N. Richardson, Abilene; J. A. Hill, Canyon; W. J. McConnell, Denton; D. M. Wiggins, El Paso; H. W. Morelock, Alpine; Joe Whaley, Menard.

The Budget and Finance and the Resource Exhibit committees are yet to be appointed.

Governor Long Moves to Save Party Machine

Federal Officials
Taking Interest in
New State Scandal

BATON ROUGE, June 27. (AP) — Governor Earl Long moved today to rehabilitate and save the old Huey Long political machine, badly shaken by "financial irregularity" charges claiming the attention of federal authorities.

Long took the oath of office last night following the resignation of Governor Richard Leche, under whom Long served as lieutenant governor.

In his first formal statement, Long said:

"I have assumed the governorship under hectic times. Inasmuch as this university scandal has broken, but I pledge myself that, even though I hope to succeed myself, I will not debase institutions of this state to make myself governor."

He assured the people of Louisiana "I shall see that a thorough reckoning is made for Louisiana State University."

Meanwhile, Sheriff Newman de Bretteville, East Baton Rouge parish, offered a personal reward of \$250 for information leading to the arrest of Dr. James Monroe Smith, missing university president, wanted on embezzlement charges. The sheriff said the reward would not be paid to peace officers.

State officials announced Smith was passing through St. Francisville, 35 miles northwest of here, Sunday night following his flight from the university campus.

Long's first conference today was with E. S. Richardson, who yesterday accepted the post of acting president of the university, but who today was reported loath to take the post on a temporary basis.

BATON ROUGE, La., June 27. (AP) — A dramatic upheaval in Louisiana politics last night made Earl Kemp Long, 43, brother of the late Huey P. Long, state governor, as his predecessor stepped down in an atmosphere shaken by a major state political mystery and scandal.

After a day of uncertainty and conflicting statements the retiring governor Richard W. Leche, suddenly left office at 11 p. m., nearly eleven months of his term unexpired, thrust the executive duties into the hands of his lieutenant-governor, and rushed out of the state capital for his country home "to rest."

Action came shortly after charges of embezzling \$100,000 of state university funds had been filed against his missing president, Dr. James Monroe Smith, whose precipitate resignation and flight Sunday night postponed Leche's announced intention to quit throughout yesterday as anxious politicians gathered to bolster the shaken state political machine.

State police continued to comb the state for Smith who vanished in the midst of climatic developments that for a time threatened to prevent Long's ascendancy until union affairs were thoroughly probed.

Leche, momentarily overcome as he finally realized his decade-long struggle to reach the top in state politics, accepted his new post with cryptic reference to a Biblical quotation, stating:

"Better a little with righteousness than great revenues without right."

The citation was from Proverbs 16-8.

Long announced no immediate plans beyond cooperation in clearing up the alleged "financial irregularities" in the affairs of the state university, which his brother fathered and developed into a great state institution through bizarre publicity methods.

Dr. Smith, put in by Huey Long, ruled university affairs through its great expansion period, during which more than \$13,500,000 was spent in Long's effort to make it the greatest and best known university in the South.

Smith's fall from grace was accompanied by disclosure in New Orleans that the genial educator had been a market plunger during the last two and a half years with reported heavy losses, particularly in a recent drop in wheat in which he had large holdings.

The disclosure was made by Charles E. Fenner, senior partner of Fenner and Beane, brokers, with whom Smith had opened operations in 1936 under the code name of J. Monroe.

Fenner said the account was closed out ten days ago, fully paid by two checks for \$100,000 each after the brokers had refused to accept state university bonds preferred through an intermediary, as collateral on account, to cover losses in wheat.

Frank S. Shattuck, state supervisor of public funds, sped to New Orleans with a court order for the company's books covering Smith's transactions, which Fenner said were conducted entirely through an intermediary, James M. Brown, another broker.

Fenner revealed that the intermediary at one time offered L.S.U. bonds of a face value of \$375,000 as a deposit on future accounts.

An unsatisfactory effort followed to obtain a legal opinion, Fenner said, and added "without a legal (See GOV. LONG, page 6)

Paris Bound

Very much a young lady now and very much a world traveler, Anne Bullitt, daughter of U. S. Ambassador to France, William C. Bullitt, again turns eyes to Paris as she sails aboard Queen Mary following American visit.

Mystery Slaying of Promoter Solved by Arrest of Ex-Convict

LANSING, Mich., June 27. (AP) — Investigators of the mysterious hitch-hiker's killing of George G. Hall, Detroit oil promoter slain by a gun shot in his automobile last Thursday, announced last night a 32-year-old paroled convict had confessed the crime.

State Police Captain Ira A. Maron, co-director of the inquiry, said Daniel M. Kent, scarfed former Michigan state prison inmate, admitted shooting the 50-year-old business man.

Officers seized Kent in Grand Rapids, Mich., and the confession, Captain Marmon said, followed a few hours after Hall's companion on his fatal ride, blonde Ruby Doty, 32, had sobbed out her tale of the killing at a coroner's inquest.

Chief of Detectives Albert Schieren of Grand Rapids said Kent asserted "I killed him to get his money."

Price of Silver Is Slashed by Treasury

WASHINGTON, June 27. (AP) — The treasury slashed its price for foreign silver today from 43 to 40 cents an ounce.

The action was taken less than 24 hours after the senate voted to discontinue purchase of foreign silver after July 1.

Fear of Another European Crisis This Fall Growing

By the Associated Press.

Fears of another European crisis late this summer or in the fall arose yesterday while in Asia there was a sudden rush of rumors that the current crisis there might soon be settled.

Impetus to European apprehension was given by a British Admiralty order which would maintain the British fleet at its maximum manpower through the month of August.

The period of naval leaves was advanced to July, which would permit the fleet to remain in readiness to move with a full complement a month before the German harvest releases the Nazis' full manpower for other duties—a fact regarded as significant.

Official German quarters said that if a new crisis comes in August "the encirclers will create it, not Germany," but some Germans interpreted recent speeches by propaganda Minister Goebbels as an effort to prepare the public for a new period of acute tension.

A possible light in the dark clouds of the Far East appeared, however, both in London and in Tientsin. Prime Minister Chamberlain told the house of commons he had "some reason to hope" for a peaceful settlement of the Tientsin issue as the Japanese blockade of the British and French concessions entered its 14th day. There were reports, which the foreign office would neither confirm nor deny, that Japan already had agreed to

90 Red Ships Are Downed in Border Fights

Mongolian Air Base
Raided Today After
Fighting Continues

TOKYO, June 27. (AP) — Japanese warplanes were reported officially today to have crossed into Soviet Russian dominated outer Mongolia and raided an air base in continuation of heavy border fighting.

It was the first instance in which Japanese have been known to cross the boundary, invading either Mongol or Siberian territory.

A Japanese communique said 98 Mongol planes had been destroyed in a Japanese raid on Tamask. The communique said 30 Mongol planes were destroyed on the ground before the main force, approximately 200 planes, rose to battle.

TOKYO, June 27. (AP) — Preliminary talks are under way for a settlement of the 14-day British-Japanese deadlock at Tientsin, it was said authoritatively today, with actual negotiations expected to develop speedily with agreement upon a "few remaining points."

The British ambassador, Sir Robert Leslie Craigie, conferred half an hour yesterday with Foreign Minister Hachiro Arita, on a basis for a settlement.

It was understood one of the points to be ironed out before actual negotiations start centers around the place of the conferences. Japan was understood to be desirous of holding the conferences in Tientsin where she presumably would be represented by her consul general, Shigenori Tashiro, and a high ranking Japanese diplomat sent to assist him.

Britain preferred holding the conversations directly with the foreign office in Tokyo.

District Lumbermen Will Hold Meeting At Cloverdale Today

With an anticipated attendance of more than 125 persons, a district meeting of the Lumbermen's Association of Texas will be held at Cloverdale Park at 6:30 o'clock this afternoon, lumber dealers and their guests from some thirteen West Texas counties having signified their intentions of attending the meeting here.

Principal speaker at this evening's gathering will be Max Critchfield, representative of the National Retail Lumber Association. Addressed by F. W. Sternberg, of Austin, president of the Lumbermen's Association of Texas, and S. L. Forrest of Lamesa, past president of the organization, will be other features of the session.

Following the business meeting, a picnic-supper will be given by the Southwestern Portland Cement Company of El Paso, through their district representative, Thad Steele of Midland. Midland lumber dealers will serve as a welcoming committee at this evening's gathering.

R. V. Lawrence, manager of the Rockwell Bros. Lumber Company here, has served as general chairman in charge of arrangements.

Delegates from Martin, Ector, Andrews, Upton, Ward, Winkler, Loving, Crane, Reeves, El Paso, Tom Green and Lubbock counties will attend the session, according to those in charge.

Paper Reports Duke Of Windsor to Make His Home in Britain

LONDON, June 27. (AP) — Lord Beaverbrook's Evening Standard, usually well informed about the Duke of Windsor's plans, said today the Duke and Duchess had decided to return to England next October to take up a residence here.

The story said also it was possible the former king and his American-born wife would visit the United States next year.

Citizens Asked to
Aid Nursery Drive

"Please mail your check for the day nursery and girls' recreation day project at once" is the plea of sponsors conducting the drive for funds for establishment of the two Response to letters mailed to individuals has been slow so far and interested citizens are asked to do their bit as soon as possible.

Plans provide for the building of the day nursery on South Main street to care for small children whose parents have to leave them alone during the working day and for the building of a girls' recreational hall on W. Missouri street.

ONE-INCH RAIN BREAKS DROUGHT

Mississippi "Gold Coast" Gets Ax

There was the sound of axes by dusk instead of the accustomed revelry as Mississippi national guardsmen descended on the "Gold Coast," at Jackson, smashed night club interiors, arrested three-score persons in "crack down" on illegal liquor sales. Picture shows ax-wielding in night club.

Declare Reduced Freight Rates to Ruin Companies

AUSTIN, June 27. (AP) — Motor carrier operators told the State Railroad Commission Monday they could not sustain a reduction of freight rates in Texas.

The carrier representatives took the stand at the beginning of the second week of a hearing on the reasonableness of differential, class and commodity rates. Examiners estimated the hearing would continue through Saturday. Railroad spokesmen will begin testimony Wednesday.

W. W. Callan, president of the Central Freight Lines, testified a proposed readjustment of class and commodity rates to the level of those of the official or eastern territory would put the lines out of business.

The opinion was resounded by R. E. Sanford of the Red Arrow Freight Lines, Inc.

One of the conditions contributing to high operating costs, Sanford said, was the comparatively long distance between stations in Texas, coupled with the 7,000-pound load limit which he said "froze" revenue at a minimum. He added the increased cost of tires, trucks and those shipping numerous safety requirements would not justify lower rates.

Answering a question on cross examination, Sanford said he did not believe common carriers would be given much of the business now handled by private motor carriers if rates were cut. Private carriers are those shipping their own goods in their own trucks.

Callan testified that Texas rates on many articles were so low that his company did not actively solicit shipment of them.

Page after page of technical testimony has entered the record daily since the hearing began last week. Examiners expressed an opinion the carriers protesting proposed rate reductions would ask the commission for further hearings if reductions were ordered and the matter might not be finally determined until late this year.

Exhume Boy's Body As Step-Father Is Charged With Murder

LUFKIN, June 27. (AP) — Sheriff H. C. Billingsley hurried to state chemists today the exhumed body of two-year-old William Laverne Linderman, a younger brother of seven-year-old Phillip, whose drowning in a spring led to murder charges against their step-father, W. Hayden Perkins, poultry farmer.

Perkins, who married the boys' mothers after a matrimonial agency correspondence, was accused by the state of drowning Phillips for \$840 insurance money.

William died after suffering a malady a physician never positively identified.

Three landings were reported by airport officials in a cheap early this afternoon. Flying a C-38, Pilot McCauley came from Tucson, Ariz., and went to Oklahoma City. A C-33, flown by Pilot Rafferty, came from Oklahoma City and went to Tucson, Ariz. Col. Pursley arrived from Hensley Field, Dallas. He was flying an O-38.

Sloan & Zook and Ferndale Ector Strike Heads Oil Twice Yesterday

BY FRANK GARDNER.

Heading twice late yesterday, Sloan & Zook Company and Ferndale Drilling Company No. 1 J. L. Johnson, new Ector strike indicating possible linking of the North Cowden pool and the Johnson area, appeared assured of sizable production.

This morning, it was swabbing to clean out basic sediment andavings. Total depth is 4,174 feet, and the well had 2,900 feet of oil in the hole when swabbing was started. No. 1 Johnson, which had encountered good showing of gas from 4,015-20, ran into first oil at 4,087-96, where it made two barrels per hour. Increase in pay came in from 4,115-25, where oil rose 2,500 feet in 24 hours. Another probable pay gain was logged from 4,137-52. Yesterday afternoon at three o'clock, when depth of 4,155 had been reached, the well headed six barrels of oil. An hour and a half later, it headed 15 barrels. Last night at 8:30, the well had approximately 1,700 feet of oil in the hole, which had risen to 2,900 feet early today.

The producer is located in section 34, block 43, township 1 south, T. & P. survey, three miles south of the North Cowden pool, a mile and a half northwest of the Johnson area, and three miles northwest of the Foster pool.

To Core Again.

In southern Andrews, Richmond Drilling Company and William P. Hanagan No. 1 University this morning was preparing to take another core at 4,650 feet. Core from 4,580-98, of which 16 feet were recovered, had borne sulphurous odor, but observers doubted if it was from sulphur water.

Singular-Prairie Oil Company No. 6 Mrs. Emma Cowden, two-location southeast extender of the Emma pool in southern Andrews, is preparing to acidize, bottomed at 4,250 feet in line. Last increase in oil was logged from 4,232-40. After swabbing three times, the well flowed 200 barrels in five hours to indicate near-record natural yield for the pool.

Anderson-Prichard Oil Company No. 6 W. F. Cowden heirs, in the same pool, is drilling below 2,520 in salt and anhydrite. Driller called top of anhydrite at 1,530 feet.

Magnolia Petroleum Company No. 1 Letta Jones, a half-mile west of the Fuhrman pool of Andrews, is drilling at 4,300 feet in line. Seven-inch casing was cemented at 4,294 feet with 225 sacks.

Duggan Oil Seen.

Devonian Oil Company et al No. 4-A-9 Duggan, in the Duggan pool of southeastern Cochran, is drilling at 5,015 feet in line with 1,500 feet of oil in the hole, having encountered increase in pay from 5,010-15. Well bottomed at 4,990, it had 250 feet of oil in the hole and was acidized with 1,000 gallons through casing in an effort to increase gas. However, no gain in gas or oil at that depth was noted after acidizing.

In the Slaughter pool, southwest-Henry Hockley, The Texas Company No. 6 Bob Slaughter block rated daily production of 1,202 barrels, with gas-oil ratio of 685-1, after acidizing with 2,000 and 5,000 gallons at 4,980 feet. Texaco No. 1-D Mallett Land & Cattle Company is standing, bottomed at 4,812 feet in line, after cementing 7-inch casing at 4,770 with 175 sacks.

Honolulu Oil Corporation No. 1-10 Mallett is still driving lead wool to shut off water. It will be plugged back to 5,016 feet. Honolulu No. 3-77 Alex A. Slaughter estate was acidized with 1,000 gallons and is

Showers Fall Over All of The County

Ranches and Farms
Are Benefited by
Precipitation

Midland's extended drought was broken Monday night when rainfall ranging from light showers to an inch and a half fell over the farm and ranch territory within a radius of at least thirty miles, some extending as far as eighty miles north. The precipitation came up at about 9 o'clock from the west, after winds had changed from the south-east.

Precipitation in the down town section, although not gauged accurately due to failure of the government yet to appoint a weather

Mayor M. C. Ulmer announced today rain gauges would be installed within the near future at some undesignated spot in the city limits and at Cloverdale Park. Accurate records on year-round weather reports will then be available at all times.

observer, was measured roughly at 13 inches. The army airways station at Sloan Field, seven miles west, recorded 67 of an inch.

To the north, on part of the Comanch, the Tom Nantz and Pres Bird ranches, Scharbauer Cattle Company's "Five-Well" and the "North Curtis place" pastures, rain was heavier, a second downpour occurring shortly after daybreak this morning.

To the south, the D. L. Huti and Sam Preston ranches received from a half inch to an inch, the moisture extending all the way to town. On the Bleiker place, an inch and a quarter was estimated, with the moisture meeting in the sandier areas.

The rain extended as far west as Pecos, it was reported. Earlier showers were said to have visited Davis Mountain sections.

Small growing crops of cotton and feed, in the few sections near Midland where planting had been possible, were expected to take on quick growth, other farms believed ready for planting of late feed crops.

Associated Press reports indicated a cloudburst at O'Donnell Monday afternoon flooded the business district of the Lynn county town, as general rains were reported in several south plains counties.

The O'Donnell press said the railroad tracks were washed out by the town by the fall that measured from 10 to 12 inches. Tornado winds unroofed buildings and hail caused some damage.

A "good rain" was reported in both Abilene and Big Spring. Persons arriving here last night from Big Spring reported rain fell nearly all the way. Baseball games scheduled last night at Lamesa and Amarillo were rained out.

Business Women Hear Mrs. Lancaster Talk on Trip

Mrs. Naomi Lancaster spoke on her trip to Europe as the chief entertainment feature of the last regular dinner meeting of the Business and Professional Women's club in the private dining room of Hotel Scharbauer, Monday evening.

Mrs. Lancaster, who was introduced by Miss Fannie Bess Taylor, recounted humorously her experiences at sailing time when her passport did not arrive until the moment before departure. Events on shipboard, including her meeting with other travelers from Texas, description of an old castle, of the dress of the people, even of the night life in the cities were given by the speaker in her recital of high points of interest on her trip.

Miss Maria Spencer, retiring president, presented the gavel of office to Miss Betty Wilson, club president for the coming year.

Three visitors were present, Mrs. Lancaster, Mrs. E. M. Sontelieu, and Mrs. Ruth Gist Palmer.

Eight club members attended.

Jones Nomination Approved in Senate

WASHINGTON, June 27. (AP) — The senate banking committee approved today President Roosevelt's nomination of Jesse Jones, Texas, as administrator of the new federal loan agency.

THREE LANDINGS

Three landings were reported by airport officials in a cheap early this afternoon. Flying a C-38, Pilot McCauley came from Tucson, Ariz., and went to Oklahoma City. A C-33, flown by Pilot Rafferty, came from Oklahoma City and went to Tucson, Ariz. Col. Pursley arrived from Hensley Field, Dallas. He was flying an O-38.

One Reason Why Recovery Lags

The world can never attain prosperity as long as it is kept dangling in a state of suspense, staggering from crisis to crisis like a drunken idiot.

Here is a little story that may show to Americans, who, after all, feel somewhat remote from Europe's troubles, just what this state of suspense means, in concrete terms. An Englishman was telling the story, an intelligent and well-informed Englishman who was quite calm about it all, and related it without a sign of panic.

He and his wife had been thinking of installing a new hot water heater in their little cottage on the outskirts of London, he said. The amount involved was about \$25, but that was an important item in the family budget. The new heater was not absolutely necessary, but an improvement they both wanted very much to install.

They considered the situation. "What," they quite calmly considered, "if the bombers come over some night? We are warned. We save our lives by the dugout. But our little house is blown to smithereens, or burned. This might very possibly happen any night, practically without warning. Then with our house goes our new heater and our \$25."

"Would it not perhaps be better to lay by the \$25. If we were thus deprived of our home and became just two more of a wild mob of desperate refugees trekking wearily toward the country districts and comparative safety, wouldn't the \$25 be doing us more good if we had it in our pockets and might buy with it some desperately-needed food or clothing?"

They decided on putting by the \$25. Quite soberly they weighed the chances, quite soberly they decided that their \$25 was worth more to them as a defense against such a desperate emergency than it was in the form of a comfort which needed some assurance of permanence to be realized.

Does it sound fantastic? Not at all. This was the deliberate decision of two excellent, intelligent, sensible, unpanicky people of London.

Multiply their decision by similar decisions of millions of families throughout Europe, and no doubt of some even in the United States. Watch the ripples of these decisions enveloping the entire economic world.

Now imagine what it would mean to world trade if all these millions of little decisions were made the other way—if these people, feeling secure and safe, would decide normally, and buy what they need and want. And then you get some idea of what the militarists and glory-hunters are doing to the world.

No Joking

Not even the smart-aleck intellectuals are as ready as they used to be to make jokes about Rotary and other service clubs.

The reasons are two: first, such clubs have attained a maturity and dignity which perhaps some of them lacked in their early days. And second, the ideal of goodwill and simple friendship among men is more precious than it used to be, because there is so little of it.

The recent convention of Rotary International at Cleveland was marked by a dignity and sincerity that impressed all who were in touch with it.

And the ideal that personal friendships and contacts between men of many lands may help lead the world back to peace is something to which men turn with a desperate eagerness in these days.

Sidewalk Farmers

Many things are happening to the farm and the farmer in these days of change.

But one thing that is happening has drawn little attention. The increasing number of tenants, the share-cropper problem, are all grave enough symptoms, and have had their share of discussion. But little has been said of the "sidewalk farmer."

That means the full-time farmers who live in villages, getting all the advantages of village life while yet devoting all their time to running the farms which lie outside the town.

The Agriculture Department reports that more people have adopted this way of life in 1938 than ever before.

Here as in so many other fields, a new manner of living seems to be developing.

• BRUCE CATTON IN WASHINGTON

WASHINGTON, June 27. — Maybe they're wrong, but a number of congressmen are predicting that the fight over the Bloom-Pittman neutrality law revisions is likely to outdo even the court-packing and reorganization bill scraps for bitterness and general all-round excitement.

Originally, it was expected that the administration program would go through the House without too much trouble, and that it would fall in the Senate only if its opponents—the Nye-Clark-Borah group—managed to talk it to death with a filibuster.

Now the isolationist senators are suggesting that a filibuster may not be necessary. They are beginning to believe that maybe they can actually muster enough votes to beat the measure on a roll-call—something that hadn't originally been counted on at all.

In addition, there is developing considerable doubt about what the House may do. A hot fight there is certain. And, while administration forces are still confident that the House vote will be favorable, some of the isolationists are predicting that the bill may be voted down.

A lot of mail is coming in from the voters on the neutrality law, especially from middlewestern states. Admittedly, much of it is due to the activity of various pressure groups; but there is enough of it to cause the solons to pause and reflect. Incidentally, southern voters are beginning to write in, demanding that the neutrality law remain as is. Heretofore, most of the isolationist feeling seemed to be confined to the midwest.

WPA WORRIES ABOUT EXPENSE ACCOUNT.

WPA officials here are frankly worried about what they're going to do if the relief bill is approved by the Senate in the form that it passed the House. The chief thing that worries them is the provision limiting administrative expense to \$45,000,000.

Last year it ran to \$72,000,000, and while there will only be about 2,000,000 on WPA rolls this year, compared with 3,000,000 during the past year, WPA expects administrative expenses to go up rather than down.

One reason is that the bill orders a review of the individual need of each person on WPA every six

The Haunted House

months. This is a costly process; such a survey was made last March, at a cost of around \$6,000,000.

In addition, the job-allocation formula will require WPA to make detailed periodic checks on unemployment in the different regions, which will mean added expense.

If the bill goes through as is, there'll be something like an earthquake in the WPA staff. . . which, perhaps, is exactly what the House had in mind.

USHA SAYS DOWN COSTS.

THE U. S. Housing Administration has developed some smart corner-cutting devices to build dwellings cheaply.

It reduces exterior wall space and cuts down on outside steps and railings by keeping the first floor close to the ground, reduces the amount of basement space, puts in as few radiators as interior walls will save piping, puts in fewer electrical outlets, and cuts down on fancy trim and gew-gaws wherever possible.

All of which keeps costs down, and offers a handy set of tips to the private builder.

But what the private builder can't do is get tax-exemption and 60-year low-interest loan for his building. . . which are the chief items in the USHA low-cost building program.

Anglers are reminded that it is now illegal to fish from bridges on roads in Texas maintained by the State Highway Department. The bill providing this was passed recently by the state legislature as a safety measure when it was pointed out that several hundred persons were killed or injured last year while fishing off bridges. It is also illegal to leave fish on bridges.

It has been estimated that since 1925, the operating cost of a popular priced car has decreased about 40 per cent.

SIDE GLANCES

by Galbraith

"—and tell your old man he can find me in Singapore after the fifteenth if he's still looking for trouble."

Texas Today

"The Texas and Southwestern"—those words put fear in the heart of any cattle rustler in the southwestern states and parts of Old Mexico.

The Texas and Southwestern Cattle Raisers' Association, Inc. the world's only corporation that devotes most of its time and effort to tracking down livestock thieves, is older than any other cattlemen's organization, and is one of the most powerful agricultural organizations in the nation. In addition to fighting rustlers, it has backed the government, the railroads and played a big part in international affairs.

It was organized in 1877. Squatting on bootlegs in the shade of a giant oak which still stands at Graham, several cattlemen discussed possible procedure in doing something about the rustlers. They decided to form an organization designed to combat cattle thieves. To regular round-ups and to "handle" the situation in the Indian Territory (Oklahoma), where drivers were having considerable trouble with Indians, outlaws and racketeering toll collectors.

The association was born when a lasso and a strong limb were the only essentials to the last rites for a cow thief. Since that day it has seen the puffing iron horse cross the prairies and start grass growing again on the old cow trails. It has seen barbed wire stretched to singe tightness across the open range. It has seen the lanky longhorn toss his head in retreat as the beefy white-faced producer of steaks and chops took the range.

The association was an old organization when young Henry Ford fashioned his first gas wagon. It has seen trucks rumble in endless procession to present new problems and streamline the ancient business of cattle rustling.

The Texas and Southwestern has locked horns with the government, the railway and its biggest customers—the packers—and won. It showed unusual strength for an agricultural organization in 1925 when it paved the way to the first government regulation of a public utility—the Interstate Commerce Commission's authority to fix rail rates.

After losing rate fights in the Supreme Court of the United States in the late 'nineties, the association took the stand the ICC should have power to fix rates. The issue was made a plank in the democratic party platform in 1904. Theodore Roosevelt adopted the plank, pushed the measure, which was written mainly by the association's attorney, to passage. The law was contested, but when it reached the circuit courts the U. S. attorney general asked the association's attorney to handle the government's case. The Supreme Court upheld the law. Here started the government's regulation of public utilities.

The association, which is just a bunch of about 3,000 working cowmen running more than a million cattle, has won in bitter fights with packers. It backed the tick eradication move which started after a quarantined Texas trail cattle in 1885 and is coming to a successful end with only a few Texas counties under quarantine.

As a matter of fact, one of the biggest members of the association, the King Ranch in South Texas, discovered that ticks caused "as fever." Then the ranch developed the dipping system of eradicating ticks. The million-acre ranch has led in other enterprises. It constructed the first trench silo in the nation and developed the only breed of cattle ever conceived in this hemisphere—the Santa Gertrudis.

In 1934, when the cow country was plagued with drought from Canada to Mexico and the range was littered with dead and dying cattle, the association led in the fight for the government's emergency buying program.

The association, with the help of other cattlemen's organizations, has led a successful fight against ratification of the Argentine sanitary pact, a part of President Roosevelt's "good neighbor policy" which would allow importation of cattle from Argentina. The association has fought ratification of the pact on the grounds that importation of Argentine cattle would bring a hoof and mouth disease threat to this country. And, of course, the Texas cattlemen don't welcome competition.

The association's big fight has been against cattle rustlers. It maintains inspectors at major markets and shipping points in Texas and in Denver, Kansas City, the National Stock Yards in Illinois, Pawhuska, Okla.; St. Joseph, Mo.; and Wichita, Kan.

If cattle bearing a member's brand show up under shipment by a person other than the member, the inspectors check up. If positive identification cannot be established by the shipper, the cattle are held up until the situation is cleared, which in many cases means someone is charged with cattle theft.

The association also retains an attorney to help the state prosecute accused cattle rustlers.

A majority of leading cattlemen of the Southwest and Americans in Old Mexico are members. Practically all famous names in the Southwest's cow country—Bleeker, Pryor, West, King and Kenedy, Mackenzie, Slaughter, Masterson, Bivins, Waggoner—have been on the association's roster.

Headquarters are in Fort Worth. Henry Bell is secretary, Joe Sned of Amarillo is president, and Jay Taylor of Amarillo and Richard King of the King Ranch Kings are vice-presidents.

Of the group of cowmen who met in Graham in 1877 to do something about the rustlers, only one man is alive. He is Luther Clark of Quanah, Texas. He is still an active member.

George Ruppert Lauds Workers Past 40 Years

NEW YORK (UP)—A business in which the majority of workmen is past 40 and in which an 82-year-old man still holds his job was revealed by a survey of working personnel in the Jacob Ruppert brewery.

The survey disclosed that of the 1,313 men employees, 746, or 56.8 per cent were past 40. About 29 per cent of the total number are past 50; 112 employees have passed their 60th birthdays, and 21 have exceeded the traditional three score and 10.

The reasons for the seeming reversal of modern business personnel trends is explained by George E. Ruppert, president, in the word, "experience."

"We have found that whereas the young man may have plenty of strength, vigor and enthusiasm, nothing can replace the experience and the sound judgment of the older man who has learned his job thoroughly and views it from the calm perspective of hard earned wisdom," Ruppert said.

With so many employees of advanced age, the Ruppert personnel turnover is small. At the brewery, 160 employees have been with the

company more than 20 years. "The mature man is the economic and social backbone of the country and of the nation's business," Ruppert commented.

Closing Phase Of Radio City Building Begun

NEW YORK (UP)—The construction work for Radio City has entered its final chapter with the tearing down of the eight tenement houses which will be replaced with the fourteenth and final building of the project.

The new building will be 20 stories high and is scheduled to be finished by March, 1940.

When construction on Radio City—or Rockefeller Center—began eight years ago, the site from 48th to 51st Street between Fifth and Sixth Avenues was covered by approximately 240 old buildings housing about 4,000 persons. Today more than 25,000 persons work daily in the 12 completed buildings of the project. Completion of the 13th building will add another 5,000 to the number. Plans have not been completed for the number of persons to occupy the last building.

Couple at Home Here Following Wedding June 18

Dr. and Mrs. J. O. Shannon are at home here, following their marriage in Fort Worth, June 18. The ceremony was read in the Christian parsonage in that city with the Rev. Anderson officiating.

Mrs. Shannon is the former Miss Eva Conly of Aspermont, Texas.

Dr. Shannon, veterinarian and city sanitary inspector, plans to open his place of business on Texas street here soon.

Mrs. Chapman Leads Study of Methodist Group Monday

Mrs. W. E. Chapman was in charge of the study of "The Radiant Heart" at the study session of the Methodist missionary society Monday afternoon at the church. She was assisted by Mrs. C. P. Wilson.

Mrs. J. M. Prothro offered the opening prayer. The dismissal prayer was offered by Mrs. Chapman. Twenty-one women were present.

What is reported to be an aid for safe flying is the "receding" wing tip. The extra section of wing extends outward from the tip of the wing and is said to eliminate lateral sway at low landing speeds.

Isn't This Why You Are Constipated?

What do you eat for breakfast? Coffee, toast, maybe some eggs? What do you eat for lunch and dinner? Bread, meat, potatoes? No wonder you're constipated; you probably don't eat enough "bulk." And "bulk" doesn't mean the amount you eat. It means the kind of food that forms a soft "bulky" mass in the intestines. It's this mass that helps a bowel movement.

The common sense thing to do is to eat a natural laxative food. Kellogg's All-Bran for breakfast may give you just the "bulk" you need. And it gives you, in addition, Nature's great intestinal tonic, vitamin B. All-Bran is not a drug, not a medicine. Eat it every day, drink plenty of water, and life will be brighter for you! All-Bran is made by Kellogg's in Battle Creek. Sold by every grocer.

Business, Program Occupies Auxiliary Group in Meeting

Preceded by a meeting of the executive board during which the resignation of Mrs. C. K. LaGue as secretary was accepted, the Presbyterian auxiliary held a combined inspirational and business meeting at the church Monday afternoon.

During the business session, presided over by Mrs. Butler Hurley, the auxiliary approved the appointment by the president of Mrs. A. P. Shirey to fill the place made vacant by the resignation of Mrs. LaGue and the appointment of Mrs. J. B. Richards as pastor's aid to take the place of Mrs. D. G. Stoekey who has moved away from Midland.

The auxiliary voted to make a donation of \$25 to the day nursery and girls' recreational hall project, after plans had been presented by Mrs. Shirey.

The organization is also to present a cash donation to the Presbyterian church building fund at College Station.

Various reports were presented. Mrs. John Perkins was leader for the afternoon's inspirational program on home missions. She was assisted by Mmes. Richards, O. L. Wood, W. J. Coleman, Shirey, J. L. Greene, Ernest Sidwell, Bill Collins. Mrs. John Drummond brought the devotional and prayer while the closing prayer was offered by Mrs. Greene.

Mmes. Shirey and Drummond were hostesses for the social hour following the meeting. Sixteen women were present.

Announcements

WEDNESDAY

Junior Shakespeare club will meet at the home of Mrs. Bernard K. Buffington, 514 Holmesley, Wednesday morning at 9 o'clock. Club officers will be elected at that time.

THURSDAY

Mmes. M. H. Crawford, J. A. McClurg, and L. F. Joplin will entertain members of the Lucky Thirteen club and their husbands with a picnic at Cloverdale Thursday evening at 7:30 o'clock.

Midland county museum in the courthouse will be open Thursday afternoon from 2:30 until 5 o'clock. The public is invited.

FRIDAY

Belmont Bible class will meet with Mrs. H. D. Bruce, the Baptist pastor's home, Friday afternoon at 4 o'clock. Memory verse will be 1 Peter 2:21.

SATURDAY

Story Hour will be held in the children's library at the courthouse Saturday morning at 10 o'clock.

Striking for Summer

White chenille dots on fine black veiling is a novel and attractive idea for a summer evening dinner gown. The almost tailored treatment of this Piguet model is something new, too, with the clinging slip of black satin a shade narrower than the top. The draped sash of turquoise satin and the chunky necklace flower-pot felt hat with its scarf of veiling contribute exotic touches which suggest the acme of coolness— invaluable for midsummer evening dinners in town or semi-formal affairs.

afternoon from 2:30 o'clock until 5 o'clock. The public is invited.

Build Summer Charm on These Hints as Base

By ALICIA HART NEA Service Staff Writer

It's a good idea to—

Carry a few little curlers and a colorful fishnet scarf to the beach. After a swim, wind the damp, wispy ends of hair around the curlers, bind the scarf attractively around your head until hair is dry.

Wear fresh flowers in your evening coiffure. Take along on vacation a preparation to take the sting out of sunburn as well as a sunburn preventive. Even the most cautious vacationist is likely to over-estimate the amount of hot sunshine he can take at one sitting.

Keep a tiny compact of cleansing pads and an even smaller compact of deodorant powder in your purse during summer months. It's a mistake ever to put fresh makeup on over stale. And regular use of a deodorant powder, in addition to weekly applications of an anti-perspirant, will insure complete daintiness every hour of the day.

Have a bottle of scented nail polish which matches exactly the red patent leather and red straw hat you are wearing with white or black dresses this season.

FALL WAISTLINE IS QUITE SMALL

Do, regularly, a few special exercises to keep your waistline as slender as a reed. Fashion forecasts indicate that fall clothes will emphasize the waistline.

Have or give yourself a weekly pedicure, whether you are a beach addict or not. Beautiful, perfectly fared— for feet usually are comfortable feet. Include in your summer wardrobe as many washable frocks as possible. A freshly laundered dress makes for a cool, crisp, neat appearance on the hottest days. Besides, washables ultra chic this season.

Special prices on RUGS and LINENS: 9x12 \$25.00, \$32.50, \$42.50, 5x8 \$12.50. Linen baby dresses 45¢ & 95¢. Also bridge sets, table cloths and handkerchiefs, all sizes. SHAWNEE ORIENTAL SHOP Next Door to Yucca

Baptist Circles Meet in Homes of Members for Study

Circles of the Baptist missionary union held study programs Monday afternoon in the homes of members.

Lockett Circle

Members of the Lockett circle, meeting at the home of Mrs. Ray Blackburn, 1502 S. Loraine, studied chapters four and five of "What Baptists Believe."

Mrs. J. M. White presented the devotional for the day. Opening prayer was offered by Mrs. E. F. Conner and closing prayer by Mrs. Chas. West.

Refreshments were served to Mmes. West, Conner, Harvey Kiser, White, B. F. Black, and the hostesses.

Combine Meeting

Glenn Walker and Annie Barron circles combined their meetings in a gathering at the home of Mrs. Bob Preston, 709 N. Marlenfeld.

Study was on the text, "Keys of the Kingdom." The program opened with a song and prayer.

Punch was served, after the lesson, to Mmes. Geo. Grant, W. L. Fickett, E. Chansier of the Glenn Walker circle; Mmes. J. H. Barron, R. V. Lawrence, A. W. Wyatt, H. D. Bruce, J. Boyd East, T. Paul Barron, R. O. Collins, and the hostesses, of the Annie Barron circle.

Kara Scarborough Circle

Mrs. S. L. Alexander taught the lesson on "What Baptists Believe" for the Kara Scarborough circle meeting with Mrs. A. T. Donnelly, 809 W. Michigan. She also offered prayer.

Mrs. Eula Mahoney brought the devotional on "Patience," reading

from the Psalms.

Opening prayer was offered by Mrs. D. W. Brunson. Refreshments were served after the study.

Present were: Mmes. S. T. Cole, W. W. Wimberly, Brunson, Alexander, O. G. Murray, Mahoney, and the hostesses.

Martha Holloway Circle

Mrs. H. R. Brazeale, who was hostess to Martha Holloway circle at her home on W. Florida, offered the opening prayer and taught the lesson for the group. Subject of study was "Following in His Train." Assisting Mrs. Brazeale with the lesson was Mrs. B. C. Girdley. Closing prayer was brought by Mrs. H. S. Collings.

Following the study, refreshments were served. Present were: Mmes. C. A. Travelstead, Girdley, Collings, J. C. Hudson, A. C. Francis and the hostesses.

FEMININE FANCIES

By Kathleen Eiland

Clothes closets, especially those that are crowded, seem to us to be a particular chore to keep neat and dainty. Apparently others have thought so, too, for some clever manufacturer has decided to defeat that musty smell which even the best housekeepers sometimes find creeping in on hot summer days.

We therefore have presented for the housekeepers' use a perfumed enamel. This new product will not show on the wood, advertisers say, and its fragrance will last for six months. It can be used for the interior of closets, dresser drawers,

and similar receptacles for clothes.

Rather expensive, according to our budget, but for those who can afford \$5 for treating the closets in the house, we'd say this legitimately goes on the "must" list.

Most appealing novelty in the way of fern holders that we've seen recently is "the old oaken bucket" translated into pottery and hung in pairs, one on either end of a heavy twine cord which runs through a pulley. These are for ivy and the buckets are really attractive. One goes up as the other goes down, just as the old-fashioned well buckets used to do, and their position may be regulated to please the fancy of the arranger.

The metal bracket which is fastened to the wall to support the pulley looks for all the world like one of those miscellaneous pieces of harness or machinery metal which may be picked up around any corral or horseshed.

We'd never thought of just that way of crusading against crime but the boys' ties which blazon forth "Gangbuster" "Crusade Against Crime" might really have some effect on the impressionable small fry. At least, they can't do any harm—and we're all for anything, no matter how small, that tends to put crime below the level of consideration of the growing boy—or girl.

Nature at School Doorstep

TOLEDO, O. (U.P.)—Nature study taught naturally is the example Stevens School is setting. The school has a pond in the rear of the building for pupils to observe simple marine life in its natural habitat. The pond has many box turtles and wild ducks.

Most birds of prey have wings with slotted tips, which enable them to gain altitude faster.

Children Kill Gophers

YUMA, Ariz. (U.P.)—Yuma county school children today were one step higher in the estimation of farmers in the area. Farm statisticians said the school children were responsible for the killing of 34,858 of the 50,000 gophers exterminated in the county during the winter and spring.

Three-Fourths Full Is Enough

When making steamed puddings, fill the mold only about three-fourths full. More will surely rise during cooking and flow over the top.

READ THE CLASSIFIEDS.

HOT WEATHER BILIOUSNESS

Have you noticed that in hot weather your digestion and elimination seem to become torpid or lazy? Your food sours, forms gas, causes belching, heartburn, and a feeling of restlessness and irritability. Your tongue may be coated, your complexion bilious, and your bowel action sluggish or insufficient.

These are some of the symptoms of biliousness or so-called "Torpid Liver," so prevalent in hot climates. They call for calomel, or better still, Calotabs, the nausealess calomel compound tablets that make calomel-taking a pleasure.

Calotabs give you the effects of calomel and salts combined, helping Nature to expel the sour, stagnant bile and washing it out of the system. One or two Calotabs at bedtime with a glass of water—that's all. Next morning your system feels clean and refreshed, your head is clear, your spirit bright, and you are feeling fine with a hearty appetite for breakfast. Eat what you wish and go about your work or pleasure.

Genuine Calotabs are sold only in checker-board (black and white) packages bearing the trade mark "Calotabs." Refuse imitations. Trial package only ten cents; family package twenty-five cents, at your dealer's (Adv.)

I Doubled the Comfort Value of My Home With a COOLING SYSTEM!

You, too, can Make Your Home Livable in Hot Summer Weather

"It was just a simple matter of arithmetic. I had a nice home, but during five months of the year, hot weather made it uncomfortable. Yet for a small investment, I installed a cooling system and now enjoy cool comfort indoors, even on the hottest days and nights. The comfort value of my home has been doubled."

Why not plan now to double the comfort value of your home? If you are planning on building a new home, or just want to be more comfortable in your present home, let a local dealer who sells cooling systems tell you more of how you can enjoy summer comfort. We'll be glad to furnish you the names of local dealers.

• See Your Local Dealer •

TEXAS ELECTRIC SERVICE COMPANY

R. L. MILLER, Manager

KEEPING COOL COMES CHEAPER

You'll be agreeably surprised how little it costs to keep cool this summer. I'll operate a cooling system for less than two pennies an hour.

HOW EVAPORATIVE COOLING WORKS

This cut-away illustration shows how an Evaporating Cooling System is installed in a window. Hot, outside air is drawn through a box that contains damp material, such as excelsior. Evaporation of the moisture in the material takes heat out of the air and adds a small amount of moisture to provide comforting coolness in the room.

RAIN COSTS COWBOYS A WIN: MEET HUBBERS TODAY, TONIGHT

Early Six-Run Lead Wiped Out By the Elements

It took Jupiter Pluvius, a sand storm and falling lights last night to keep the Midland Cowboys from marking up their first win of the season over the Lubbock Hubbers.

The Cowboys, defeated by the Hubbers in seven games played this year, had a 7-1 run lead with none out in the third when the umpires ordered play halted. After waiting for 30 minutes, umpire Fritz called it "no game" and thereby ruined Midland chances of a win.

As a result the two teams will meet in two games today. The first game was booked to start at four o'clock this afternoon, the second game will get underway at 8:30 to night.

Lubbock's pitcher Lee Harris, who is leading the league with seven wins and no losses, was just another thrower last night as far as the Cowboys were concerned. They drove him from the mound with a six-run barrage in the third but never got to hit at Rolf, his successor.

As a result of the game being called off, Midland hitters lose credit for seven safe bingles, including one double, one triple and one homer.

Lubbock started the game off last night like their eighth straight over the locals would be a matter of form. Zorko started it all when he singled over second base. Saporito then muffed Carr's grounder and two were on base. Johnny Taylor sacrificed them up a base each and Zorko scored on a fly to right field by Million.

Manager Hale got a single for the Cowboys after two had been retired but died on first when Stevens pulled Kerr's hard hit smash down against the right field wall. Only a stiff wind kept the ball in the park.

With a drizzling rain gradually becoming heavier, Brown retired the visitors in order in the second. In the home half of the frame, Lynn Everson got a single, stole second and came home when Stevens misjudged Wooten's liner and it went for a triple.

With one away, Brown walked Zorko in the third but made Carr and Taylor sky out to retire the side.

The Cowboys dug in when their half of the frame came around and hit everything Harris threw up to the plate. Pettold started it off with a single and wound up on third a moment later when Taylor made a bad throw. Saporito's bunt to first base. Both runners scored when Hale got a long single to center. Hale came home then when Kerr got a double against the wall in left center. Hazel was hit in the back by a wild heave from Harris and both he and Kerr moved up a notch when Harris unhooked another wild one that got away from Miller back of the plate. Lynn Everson then stepped up to the plate, picked out a throw he liked and blasted it out of the lot for a homer, scoring behind Kerr and Hazel.

Rolf took over for the Hubbers and took his warm-up throws but the umpires decided to delay the game for awhile before he could pitch to Volk, the next hitter. After waiting a half-hour and failing to see any signs in a let-up of the rain, Fritz announced the game off.

The PAYOFF

Although the rain last night apparently knocked the Cowboys out of their first win of the season over the Lubbock Hubbers, it prevented the box office from taking a beating.

Only 168 customers had paid their way into the park when the game was called off. And that, at 40 cents a throw, would give the Lubbock club its \$50 and very little left over. It was surprising to see as many as 168 at the game, considering the weather from seven o'clock on. Remember, the rain tickets are good for today's game only, not tonight's.

Some of the Midland fans who had been staying away from the games recently because the team was losing too consistently to suit

MIDGET-MIDGET RACING FOR KIDS CALLED AS SAFE AS BEING ON MERRY-GO-ROUND

BY CHARLES GENUIT, NEA Service Special Correspondent.

LOS ANGELES. — Automobile racing exchanged long pants for short ones when it gave way to the midget phase of the game, and now it is set to wrap up some diapers with a spanking new branch of the sport called midget-midget.

Incredulous as it seems, the midget-midgets are for youngsters between the ages of 7 and 14.

On the surface it appears that the new sport is virtually robbing the cradle for the development of future racing talents, but just the opposite is the case.

The new pastime was designed to keep kids with homemade, gasoline-driven contraptions off the streets of San Marino, Calif. It worked so successfully that Los Angeles adopted it. Children here now participate every Sunday on a tenth of a mile, dirt-banked track.

KIDS HAVE VET TO BE INJURED IN 250 RACES.

ALTHOUGH parents are inclined to look upon the idea in an unfavorable light, considering the danger of big cars and midget racing, it has proved to be as safe as riding a merry-go-round.

The boast of the Junior Midgets of America—that's the moniker they have tacked on their organization—is that in 350 races they have yet to use even a piece of adhesive tape or a drop of iodine.

Safety in racing lies in the limitation of motor displacement and banning of speeding up devices. The rules of the midget-midgets are very stringent and tend to keep the speed down to a maximum of approximately 20 miles per hour.

Of course, there is a commercial angle to the thing.

It is the manufacture of engines, complete racers, and parts.

They are gradually being won back. The four wins in a row make it plain indeed that the Cowboys are an improved lot and if they ever show ability to consistently play 500 ball or better there is no reason why the crowds should not appreciably grow in size.

There is no doubt about improvement of the club. Just how much improved remains to be seen, but improvement there is. Conley Cox is here and ready to take over the shortstop position but it is doubtful if Hale will break up a combination that has won the last four games. However, Cox is too good a man to wear out the bench and he will be in the game before long.

Officials of the club have lived up to their promise to string a wire fence around the park to prevent so many persons from watching the games from the outside. Property to be fenced in belongs to the club and persons getting inside the wire will be hauled into JP court for trespassing.

This is a rather drastic move on the part of the club officials but one that was deemed absolutely necessary. It has been no uncommon sight to count practically as many persons watching the games from the outside as from the inside. Many of those who stayed outside were more able to pay for tickets than some on the inside. The fence is solely a weapon of defense. Any person without the necessary 40 cents who feels that he simply must see a game can usually find a soft-hearted gatekeeper that will let him in. That failing, anyone will be admitted who returns a foul ball that goes over the fence.

It is a lot more honorable to come in that way than to park on the outside and view the game without any trouble whatsoever.

If officials were taking in as much money as some of the other clubs in the league, such a move probably would not be made. As it now stands, the club must get all money possible in order to meet expenses.

An official report from League President Milton Price shows Midland next to the bottom in attendance. The average for Midland was placed at 315 but since those figures were released the attendance has fallen off considerably here. Lubbock has averaged 772 paid customers per game to lead the league. Attendance of other clubs is as follows: Lamesa 675, Pampa 605, Big

Junior Goes to Town Awhoopin'

Paul Hart, the 11-year-old Wilbur Shaw of the midget-midgets, broadsides out of a turn ahead of 7-year-old Ray Pageol.

Cars range in price from \$135 to \$250.

The little jobs are patterned after the mighty midgets, which have replaced big cars as a professional sport, venture in California and much of the United States, with the one notable exception of Indianapolis.

EVEN LITTLE GIRLS GET BEHIND STEERING WHEEL.

LOU PAGEOL, prominent owner of racing cars and well-known speedboat pilot, is the adult in

charge of the little daredevils and their tiny mounts. His son, Raymond, a daring little chauffeur who has yet to see eight candles on his birthday cake, is one of the top ranking drivers.

Asked if he would like to have his son grow up to be a race driver, Lou replies: "No! I've known too many drivers. This is the kind of thing which will take the desire to go fast out of a lad, yet teach him how to handle a car and a few things about mechanics."

The sport isn't limited to boys. Eight-year-old Jacqueline Lyons,

whose father, Frankie Lyons, was killed in a midget race car while making a moving picture, is quite an expert with the throttle and steering wheel and can show her rear tires to many of the lads.

Manufacturers of the small cars, which weigh around 135 pounds and carry a motor of three-quarters horsepower, plan to introduce the sport throughout the nation.

So, beware, mama and papa! Junior is likely to write Santa Claus for a racing car, instead of a bicycle or pony, come Christmas.

Resort Jargon May Surprise Park Tourists

YELLOWSTONE NATIONAL PARK, Wyo. (U.P.)—If you are a tourist planning to go to Yellowstone Park this summer, this, in resort jargon, probably is what will happen to you.

A gear-jammer will jockey you to your park destination; a savage will open the door; a pack-rat take care of your accommodations; a pillow-puncher prepare your room; a heaver will feed you—and behind your back they will call you a dude.

If you're single, you then might find a companion and do a little "rotten logging" after which you will see the sights and go home and tell your friends the trip was a success.

Translated from the original college slang—because these terms have been built up through the years by the hundreds of university students who have been employed at the park—your itinerary would be:

A bus driver (gear-jammer) would drive you to your destination; a college student (savage) would open the door and a porter (pack-rat) take your baggage. The maid (pillow puncher) would prepare your room and a waiter (heaver) feed you. "Dude" needs no translation.

The term "rotten logging" is Yellowstone for boy-meets-girl. The most convenient places for vacation trysts in the park are the old logs lying about the forest.

To Launder Small Rugs.

The same rules for washing small hooked or rag rugs that Grandmother went by apply today—except that the modern housewife purchases her soap instead of making it and she uses a washing machine where Grandmother used elbow grease. First, brush the rug to remove loose dirt and dust. Use a mild soap thoroughly dissolved in warm water (softened if necessary). Agitate in the washer for no more than five minutes. Rinse thoroughly and throw evenly over the line in the shade to dry. Turn once or twice while drying. The same method is used for washable chenille rugs. Fluff up the pile with a brush when dry. Don't crowd the washer. A second suds bath is helpful if the rug is extra-soiled.

Spring 458, Clovis 444, Amarillo 421, Abilene 265.

It takes an average attendance of 300 to meet expenses of a "set" club. Considering the amount of money Midland has paid for transportation expenses of players this year, it is easy to see that officials mean it when they say the club is losing money.

What Kind of Insurance?

Is often a puzzling question.

Come to us for advice on the merits of different forms of insurance as applicable to your case. We have had many years' experience in writing insurance and may be depended upon for an honest, unbiased opinion.

Field Operations in Soil Conservation To Cease by July 1

AMARILLO.—Actual field operations in all Soil Conservation Service erosion control demonstration projects in the Southern Great Plains region will cease by July 1, but this does not mean that these areas will be abandoned entirely. H. H. Fennell, regional director of the service, reported today.

"In fact," Fennell said, "sufficient technical men will remain on the projects to help farmers maintain work already started, but in these areas it will be up to the farmers themselves to put into effect any additional erosion control practices. "It is about five years now since the first erosion control demonstration areas were established in the Southern Great Plains," Fennell pointed out. "These projects are located at Dalhart, Stratford, Vega, Channing and Hereford in the Texas Panhandle; at Clayton and Clovis in eastern New Mexico; at Guyton in the Oklahoma Panhandle; at Colorado Springs, Cheyenne Wells and Springfield in eastern Colorado; and at Ottawa, Mankato, Iola and Liberal in Kansas.

"The purpose of these projects was to demonstrate to farmers the best methods of controlling erosion," the regional director said. "Of course, nobody expected to do a complete job of soil conservation in a few years, but erosion control practices were not tried at that time. A vast amount of information about soil erosion already had been gathered by experiment stations conducted by the department of agriculture and by state and federal agencies.

"Armed with these facts," Fennell recalled, "soil specialists undertook the job back in 1934 of carrying out effective methods of controlling erosion on the crop land, the pastures, the idle and gullied land and the woodlands.

"These demonstration projects, usually of about 25,000 acres, were set up in areas where erosion was severe and the service technicians worked with the farmers in demonstrating conservation practices. The idea was to operate these projects long enough to get results—long enough to put on a 'show window' that farmers in the surrounding country could see, and copy. Just as soon as this job was done, the service was to 'move out.' That's what the service is doing now," Fennell stated.

During the last five years, in addition to carrying on these demonstration projects, the service also has demonstrated erosion control practices in cooperation with CCC camps in Kansas, Texas and Colorado, and has worked in cooperation with various other federal and state agencies. Most of the projects were placed on a "maintenance basis," that is, actual field operations were ended, a year ago. The

Camera Squad to Hunt Tipsy Beggars

PHILADELPHIA (U.P.)—State liquor agents are using candid cameras to snap photographs of tipsy panhandlers who annoy Philadelphia pedestrians.

"We have learned that panhandlers have banded together and report in the morning to places where they get a drink on the house," a liquor board spokesman explained. "In speakeasies, a bowl of soup is thrown in.

"They go out into the street, each being assigned to certain districts. After they make their first 'touch' they go back to their benefactors and buy their first drinks. As this thing progresses during the day they get pretty drunk, and the person solicited is insulted if he refuses their pleas.

"We intend to photograph them in all the various phases of the day's work, and then we'll have an airtight case."

Last projects to cease operations will be the Cherry Creek project near Colorado Springs and the Clovis, N. M., project.

Soil conservation district laws now have been enacted in all states included in the Southern Great Plains region of the service. Fennell pointed out. Already the service is cooperating with four such districts in Colorado, one in Kansas, and three in New Mexico. Farmers of these self-governed districts now are taking advantage of the experience and findings of the Soil Conservation Service demonstration projects, the regional director said.

The Bob White Quail Club of San Antonio, reorganized recently.

Somewhere in Texas a small lizard may be alive today because Dr. A. J. Nicholson, game department manager of region 4, saw a big king snake swallow it near Bastrop recently and was interested from a scientific standpoint in ascertaining the nature of the reptile's food. Dr. Nicholson killed the snake and when he slit it, out scrambled the lizard and it raced for the woods.

A new light, located on the instrument panel and which will light up when any trouble whatsoever arises, is now being put into use.

Too Many Insurance Companies in State

AUSTIN—Too many life insurance companies are operating in Texas is the conclusion of Jesse Robert Manning of the Kingsville, who received his doctor of philosophy degree from The University of Texas this month.

Dr. Manning wrote his dissertation for the doctor's degree on the subject, "The Investment Experience of Certain Texas Life Insurance Companies during the Period

Swamps Invite Moonshiners

CHARLESTON, S. C. (U.P.)—Repeal didn't ruin the moonshine liquor industry in the swamps of Berkeley and surrounding counties, according to an officer of the alcohol tax unit and construction of the Santee-Cooper project, which will flood much of the marshland, won't either.

"Instead of wiping out the moonshiners," the officer said, "the Santee-Cooper project will be a boon to them."

The two lakes to be found by the project will create numerous islands, inlets and coves where liquor can be manufactured. They also will facilitate transportation of materials and products by water and will make water available over a greater area for operating stills.

Another effect of the project, the officer predicted, will be to flood many farms above the dam and send the farmers into other sections to seek means of livelihood.

"It will create new swamplands along the Santee below the big dam and in these new swamps new stills will be set up," he said. "Today the moonshiners are as busy as they were before repeal. Two hundred gallons are distilled every day at Cainhoy alone."

"A lot of this stuff comes to Charleston, but not all of it; not by a long shot. People in the country drink a whole lot of liquor, and the only kind they can get is moonshine. In the cities and larger towns, there are legal liquor stores. But there are none in the smaller towns and communities."

1927 to 1938," a study of ten companies which possess more than 92 per cent of the assets owned by legal reserve companies in Texas.

Dr. Manning concluded these ten companies could easily supply Texas insurance needs until industrial development of the state led to a greater demand for insurance companies.

Of more than ninety companies chartered in Texas during the period, he found that only eleven have filed reports to the Texas Insurance Commission each year. Forty-three Texas companies and ninety-three out-of-state ones filed statements at the end of 1937.

Stockholders have lost some money through the termination of insurance companies. Dr. Manning declared, although there has been very little loss to the policyholders.

Born in Yoakum, Dr. Manning holds a bachelor of business administration degree and a master of arts degree from the University. He has lived at Waco and has taught at Wichita Falls, Gainesville, and in the University School of Business Administration. He is now head of the department of business administration in the Texas College of Arts and Industries at Kingsville.

Health Festival to Be Held July 13-15 In Mineral Wells

MINERAL WELLS.—Screaming fiddles and plucking guitars intermingled with the thump, thump, thump of the musicians' feet will highlight the first evening of the Texas Health Festival, July 13, 14, 15, 16 in Mineral Wells.

For one evening this world famed health resort will be the scene of one of the largest old time square dances ever staged in Texas. John R. Winters, well known Texas square dancer, will conduct this state-wide contest in which will be participating the champion sets from every section of the state.

Square dance sets from El Paso, Houston, Fort Worth and many other sections of the state are practicing up their "ladies bow low and gents bow under" to the tune of Sally Goodin and Buffalo Gal to meet the competition afforded them at the Mineral Wells event. Dancers who participated in Fort Worth Fat Stock Show contest and those planning to take part in the forthcoming square dance at the Texas Cowboy Reunion in Stamford are among those who have indicated they would be on hand for this contest, July 13.

The old fashioned square dances are becoming popularized throughout the United States. The Texas Health Festival contest, which has been successfully conducted for several years, is going to be the biggest event of its kind this year. Square dance enthusiasts from all over the

Southwest are making reservations to enter this novel event.

The entire city of Mineral Wells is becoming square dance conscious as they make elaborate plans to entertain the participants in this contest. Visitors in the resort city were amused this week when a citizen swung out on "first one gal and then the rest—meet the one that you love best—and promenade," and an entire block joined him in executing the popular square dance figure "Sally Good'in."

Gov. Long—

Continued From Page One.

opinion we did not consider the bonds first class collateral and we therefore requested that they be withdrawn."

Smith disappeared immediately after turning in his resignation to Governor Leche, thus creating a new sensation in the swift-moving political drama here as Leche called off his announced resignation and said he would retain control pending investigation.

The university board of supervisors met with Leche to go over auditors' reports which informed persons said showed unauthorized issue of university bonds that might total up to \$750,000.

The mystery of Smith's disappearance, apparently with his wife and another couple, was heightened by the cryptic remark of one officer here that despite the asserted "irregularities" the university "might not lose a single cent."

Hay Fever Season Due Before Long

AUSTIN—"It will not be many weeks until a large number of Texans will be sneezing, wheezing and in other ways evidencing that they are victims of so-called hay fever. Many of these persons, either because of ignorance or carelessness, will endure their affliction, bolstered only by the distant hope of the 'fall frost' which will mark the end of their ordeal for this year. On the face of it, these allergies have a rather hard row to hoe. However, for many of them, this situation could be altered most favorably," prophesies the Texas state health department.

"Indeed, science has developed a successful method of combating many forms of this seasonal affliction. For persons who possess this unusual sensitiveness to the pollens of certain plants, weeds, grasses, and trees serums have been developed to counteract it.

"Before this type of treatment can be effective it is essential that the particular pollen causing the disturbance be discovered. Guesswork plays no part in this investigation. The physician will make simple and painless tests with extracts of pollens that are suspected of causing the trouble. By way of a needle prick a minute portion of each of the pollens under suspicion is placed under the skin. And that extract which generates a slight local reaction points to the offender. In occlusion of that type of serum then is administered.

The potency of this treatment depends upon its use prior to the pollen season. Immunity must be established early. Bodily reactions to this type of therapy are slow. In fact, several months, involving sev-

Fair Wader

TO SANTA FE, YELLOWSTONE

Mr. and Mrs. Frank Smith and family and Mr. and Mrs. Earl Ray will leave Wednesday on a vacation trip to the West. They will go first to Santa Fe, N. M., for a fishing trip and then on to Yellowstone National Park for sightseeing.

eral treatments at intervals, are required.

While this preventive is not effective in all cases, the percentage of successes has been sufficiently high for every hay fever sufferer to give it a fair chance. In some patients, the result while not totally satisfactory, has noticeably reduced the suffering.

Also recommended for diminution of sufferings is cutting of ragweeds from locales where hay-fever sufferers frequent. Vacant lots are a potent source of the ragweed and should be included in preventive measures against the disease.

The annual total cost of maintaining the road patrols is estimated to be well above \$24,000,000.

Wadley's

Photographic Mind Boasted of by Boy

HENDERSON, (P)—The wrong-way speller of East Texas, the Douglas Corrigan of the old blue back spelling book, is Everett Neel, a high school senior at Joquin, Shelby county.

When words are called he snaps the letters in reverse order faster than the ordinary person can spell forward. He has a photostatic mind. A psychiatrist who studied him sketched a number of pictures, which include a man, objects and geometrical figures. Neel studied them a moment, then answered more than 100 questions on minute details of the drawings.

He accounts for his rare gift in this way: When a word is called out or an object shown him, he has a picture of it in his mind. He simply reads what he sees backward or forward. When he was quizzed he quickly shot back the word "Nacogdoches" as "Schoedogcan."

Neel claims that last year he could identify the owner-ship of half of the 3,000 automobiles registered in Shelby county by license number. He was not at the head of

his graduating class this spring, but he has friends who are seeking a scholarship for him because of his unusual ability.

HERE FROM HOUSTON

C. E. Mueller, chief accountant of the Texas-Gulf area of Shell Oil Company, Inc., and H. W. Varner, representative of the company's law department, are here from Houston on business.

SON BORN TO SKINNERS.

Friends here have been informed of the birth of a son to Mr. and Mrs. Chas. Skinner in an Odessa hospital Monday night. The baby weighed 6 pounds 11 ounces. The couple formerly lived here.

The late Dr. Ernest Wilson, traveling in 1910, found the regally growing in the Hupeh section of western China. Bulbs of the plant were carried on men's backs to the river, where they were placed on boats and eventually were shipped to America.

MIDLAND STEAM LAUNDRY

Jays, Mishaps Provide Laughs in Screen Riot

Highlighted by the gay and amusing events in a home where everyone does as he pleases, Universal's comedy drama, "The Family Next Door," opens Wednesday at the Yucca Theatre.

Hugh Herbert is seen as the whimsical father who has reason to doubt whether he is really the "head of the house." Ruth Donnelly, popular comedienne, has the role of the mother who spends her time trying to marry off her pretty daughter, Joy Hodges. Eddie Quillan portrays the elder son who has a million ideas for getting rich, and Juanita Quigley appears as the small daughter, Benny Bartlett, last seen with Shirley Temple, in "Just Around the Corner," has the role of the kid brother.

Filmed from an original screenplay by Mortimer Offner, "The Family Next Door" shows what happens when an ambitious mother gambles the family bankroll in an attempt to impress her neighbors and attract a husband for her daughter.

Stressing the comic aspects of family life, the picture was directed by Joseph Stanley and produced by Max Golden, who originated the current trend for "family" dramas on the screen. Milton Krasner did the photography.

AT HICO.

Mr. and Mrs. Cecil Aycock are spending a vacation at the Sunshine Ranch at Hico, Texas.

Personals

Mr. and Mrs. Hugh Corrigan have as their guest her mother, Mrs. Mary March of Duncan, Okla. Mrs. Corrigan's brother, R. L. March of Duncan, his wife and two children, who came with Mrs. Mary March, left for home Monday after a few days' visit.

Mr. and Mrs. Hugh Corrigan and family plan to leave in the next two or three days for Colorado, where they will probably stay through the summer. The Corrigan family have a cabin at an altitude of 10,300 feet and are looking forward to a cool vacation. They will be accompanied by Mrs. Corrigan's mother, Mrs. Mary March of Duncan, Oklahoma.

Dr. and Mrs. Tom C. Bobo have returned from a week-end trip to Austin. Dr. Bobo attended a meeting of the state committee on maternal and child health care to which he was recently appointed.

New FCA Officials Named at Houston

Dwight P. Reordan, acting general agent of the Farm Credit Administration of Houston, announced today the appointment of Carl Runge as general counsel and Leon L. Mott as assistant general counsel of the Farm Credit Administration of Houston. The appointments were made by the Farm Credit board of

this district and are to be effective July 1. In these capacities, Runge and Mott will head the legal staff of the four units of the Farm Credit Administration of Houston, which include the Federal Land Bank of Houston, Federal Intermediate Credit Bank of Houston, Production Credit Corporation of Houston, and Houston Bank of Cooperatives.

Runge, who for the past two years has been general counsel of the Federal Land Bank of Houston, is a former resident of Mason county, where he practiced law for twenty years, was judge of the thirty-third judicial district of Texas, and also engaged in the hotel and ranching business. He is a graduate of the academic and law departments of the University of Texas.

Mott has been associated with the Farm Credit system since 1922, when he joined the legal staff of the Federal Land Bank. When the Federal Intermediate Credit Bank was organized in 1923, he was appointed its general counsel. In 1933 he became counsel of both the Federal Intermediate Credit Bank and Production Credit Corporation of Houston. Prior to his association with the Farm Credit system, Mott practiced law in East Texas and at one time was county judge of Walker county. He also represented Trinity and Walker counties in the Texas legislature.

VISITS SISTER

Miss Virginia Ruth Miller is visiting her sister, Mrs. A. D. Webb, in Big Spring for a week.

He was a dirty faced angel of vengeance, the king of the lawless West!

A MIGHTY TRIBUTE TO THE MEN WHO BUILT AMERICA!
