The SDN Column

Election laws have undergone frequent changes since the United States become a nation and undoubtedly there will be more in the future.

Elections in the early life of this mnation were far different from those of today. There was no popular vote for high offices. In fact, states did not elect their U. S. Senators by popular vote prior to 1917. And it was a couple of years later before women were allowed to vote.

Subsequent changes have extended the popular vote to all elective offices, except for President and Vice President of the United States. There is a popular vote involved in the selection of these two officials, of course, but it still is possible for a candidate to get a majroity of the popular vote and lose the race. The electoral votes are all important, and it is this factor which offers a third party a good chance to wield some influence in the selection of the chief executive of the government. If a candidate for president fails to get support of a mjaority of the electoral votes, the House of Representatives must decide the winner of the election.

★ ★ ★

There is another matter involving elections which may be headed for some changes. That is the gap between the date of elections and the date when newly - elected officers take over thir duties. Historically, office holders who have been defeated, or have not sought reelection, are called "lame ducks" during that period between the election of their successors and the date the new officials take office.

Of course the Constitution makes no provision for an office to cease to function during this "lame duck" period. The government, at all levels, must perform its tasks continually, but invariable there is a protest whenever a "lame duck" official has the occasion or seizes the opportunity to make some significant decision before his duly-elected successor is sworn in. The time may be at hand when elections will be held closer to the date that terms of office actually began. There was a big gap between election and the inauguration of a president until about a quarter century ago. The election was held on the first Tuesday after the first Monday in November, as it is now, but the inauguration did not occur until the following March. Now, the inauguration occurs in January, but there's still some 2½ months between the two dates.

—WACIL McNAIR.

Today In History

Today is Wednesday, Sept. 25, the 268th day of 1968. There are 97 days left in the year.

Today's highlight in history:

On this date in 1962, nine Negro children, under guard of U. S. Army troops, were escorted into Central High school in Little Rock, Ark.

On this date:

In 1513, Balboa discovered the Pacific Ocean.

In 1775, Ethan Allen was captured in an attack on Montreal.

In 1789, the first Congress of the United States, meeting in New York, adopted 12 amendments to the Constitution. Ten of these amendments became the Bill of Rights.

In 1890, Congress established Yosemite National Park in California.

In 1941, the Duke and Duchess of Windsor were welcomed at the White House.

In 1942, nationwide gasoline rationing was ordered in World War II.

Ten years ago: A federal grand jury indicted Richard Mack, former member of the Federal Communications Commission, and Thurman Whiteside, a Miami lawyer, on charges of conspiracy to defraud the United States.

Five years ago: Military leaders of the Dominican Republic overthrow the government of President Juan Besch on grounds that it was "corrupt and pro - Communist."

One year ago: Ten children died and 65 were hospitalized in Tijuana, Mexico, in a mysterious outbreak of poisoning.

THE WEATHER

SNYDER TEMPERATURES: High reading Monday 81 degrees; low 49 degrees; reading at 7 a.m. today 49 degrees.

Northwest Texas: Fair tonight and Thursday. A little warmer in the afternoons. Low tonight 46 to 58. High Thursday 78 to 86.

Northeast Texas: Fair and cooler tonight. Fair and mild Thursday. Low tonight 56 to 61. High Thursday 80 to 86.

North Central Texas: Fair tonight and Thursday. Cooler south tonight. A little warmer Thursday. Low tonight 55 to 60. High Thursday 80 to 86.

South Central Texas: Considerable cloudiness with occasional rain along the coast otherwise fair interior over the area tonight and Thursday. Cooler south portion and along the coast. Low tonight 58 to 68. High Thursday 80 to 90.

Southeast Texas: Fair tonight and Thursday. Cooler tonight with low 62 to 72. High Thursday 80 to 86.

Southwest Texas west of the Pecos: Fair tonight and Thursday. Mild afternoons and cool again tonight with low 48 to 60. High Thursday 78 to 90.

Port O'Connor to Port Arthur: Northerly winds 5 to 15 knots tonight becoming northeasterly Thursday. Occasional rain.

AGRICULTURIST — Ted J. Davis, above, new assistant secretary of agriculture, is Washington office. Davis, an Oklahoma City lawyer, will oversee the department's marketing and consumer services. (AP Wirephoto)

CRACK ENEMY BATALLION

Red Assault Force Beaten

By GEORGE MCARTHUR
Associated Press Writer

SAIGON (AP) — A crack enemy battalion of about 300 men armed with flamethrowers, rocket launchers and assault rifles was chopped in half early today trying to overrun a Special Forces camp close to the Cambodian border.

The enemy left 135 dead on the battlefield along with 1,000 small blocks of plastic explosive probably intended to blow up the camp at Katum. Allied troops sweeping the battlefield also found 1,000 unused rocket grenades, an indication that the attack force was supported by a strong local force of porters and arms carriers.

Under a furious barrage of 300 mortar and rocket rounds, the attackers rushed the barbed wire around the Katum camp a few hours before dawn.

Wave after wave hurled at the camp before what was left of the battered battalion pulled back in midmorning, some six hours after the first assault.

Normally the camp at Katum is the base for six companies of South Vietnamese irregulars. It was believed about 400 South Vietnamese plus 10 to 12 American Green Beret advisers were in the camp when the assault came.

U.S. Headquarters said 11 South Vietnamese were killed, 10 were wounded and one was missing.

No American Special Forces advisers were hit during the battle.

Often hit, the camp at Katum is only three miles from Cambodia, and 70 miles northwest of Saigon. It guards a heavily jungled border area which is a principle infiltration route toward the provincial capital, Tay Ninh, and toward Saigon.

Since Monday night, U.S. bombers have dropped some 1,750 tons of bombs on infiltration routes in northern Tay Ninh Province, usually a sign that allied intelligence has detected enemy movement in the area.

Far to the north in coastal Quang Ngai Province, a sweep by the U.S. Americal Division hit a strong North Vietnamese force today in the same spot where 92 of the enemy were slain Tuesday. Helicopter gunships and tactical jet strikes were called in, and 77 more of the enemy were killed, headquarters said, with no American losses.

Along the demilitarized zone, American Marines uncovered two mass graves containing 48 North Vietnamese bodies. Earlier this week the Marines had found similar graves containing about 170 dead North Vietnamese, most of them casualties of artillery and air strikes.

The camp is a watch post along heavily jungled border area through which enemy troops infiltrate toward the provincial capital of Tay Ninh, 15 miles to the south, and toward Saigon.

Since Monday night, U.S. B52 bombers have dropped some 1,750 tons of bombs on infiltration routes in northern Tay Ninh Province, usually a sign that allied intelligence has detected enemy movement in the area.

Across the country, in the northern coastal lowlands four miles south of Tam Ky, troops of the U.S. Americal Division reported 92 enemy soldiers kiled in a five-hour battle. One American was killed and 33 wounded.

U.S. headquarters also reported lesser actions on the northern frontier, were the U.S. Marines continued to probe the south central sector of the demilitarized zone and adjacent territory to the south.

In the last three weeks and mostly in the last few days, the Marines have captured a million rounds of small arms ammunition, 20,000 mortar shells, 7,000 grenades, nearly 4,000 rockets and rocket grenades and six tons of explosives along the DMZ Marine headquarters said.

Most of this was found near the allies' Rockpile outpost just below the central portion of the DMZ. In skirmishes around the Rockpile Tuesday, seven North Vietnamese and three Americans were killed.

The three-wek toll for the Leatherneck operations is 490 enemy troops and 60 U.S. Marines killed, Marine headquarters said.

IN PARIS

Headon Clash By Delegates

PARIS (AP) — The United States and North Vietnam clashed headon today over blame for the Vietnam war, each vowing it will never bow to peace demands of the other.

"The United States never will be able to prevent its defeat—military as well as political—in South Vietnam," Ambassador Xuan Thuy of North Vietnam declared at the 23rd session of the peace talks.

"Peace will be impossible," countered U.S. Ambassador W. Averell Harriman, chief U.S. delegate, "so long as you refuse to join us in this effort (for a political settlement)."

The three-hour meeting ended with an arrangement for another exchange next week, but with complete deadlock over ways of phasing out the fighting.

In sharp terms the U.S. chief delegate at the Paris peace talks accused the Communist side of attacking South Vietnam "in open defiance of international law and of the charter of the United Nations."

Harriman's declaration at the 23rd session of the conference was made in the presence not only of Ambassador Xuan Thuy, who is North Vietnam's envoy, but also of Politburo member Le Duc Tho and Col. Ha Van Lau.

Xuan Thuy had opened the proceedings with a long statement of his own which was not made immediately available to newsmen.

Injury From Fall Fatal To Snyder Man

Milford C. Gardner, 64, who lived at 2612 Twenty - third Street, was fatally injured in a fall early today about six miles south of Gail. Mr. Gardner, an employe of Dave Harlin and Sons Drilling Co., reportedly fell some 60 feet from a derrick platform. The rig is drilling a salt water well for American Magnesium Co.

Justice of the Peace Roy Haynes of Gail was called to the scene and returned a coroner's verdict of death due to injjuries from a falf.

The fall occurred at about 3:25 a.m.

The body was brought to Bell-Seale Funeral Home in Snyder by Snyder Ambulance Service.

A native of Clarksville, Mr. Gardner had lived here since 1953.

Funeral arrangements were to be made at Bell-Seale Funeral Home here.

Surviving are the wife, Mrs. Ola Mae Gardner; a son, Johnny Dale Gardner, serving in the U. S. Navy at Jacksonville, Fla.; three sisters, Mrs. Eddie Chapman of Del eon, Mrs. J. D. Mulkey of Springtown and Mrs. Toshie Fox of Chico, Calif.; four brothers, Ira Gardner of DeKalb, Leroy Allred of Paris, Merril Allred of Spingtown and Jim Allred, of Fort Worth; and one grandchild.

UF Drive Progresses

The advance gifts division of the United Fund Campaign continued its work today as preparations were underway for other phases of the drive to begin.

A "business-edu tion" breakfast has been set for 7 a.m. Thursday at the First Baptist Church. There will be no solicitation at this session. Campaign officials will present pertinent information about the campaign and about the paricipating agencies.

The advance gifts division was the first to kickoff in the campaign. The general campaign is scheduled to begin next Monday, Sept. 30.

VISIT PLANT SITE — Jim French, foreman in charge of water wells at Gail for American Magnesium Company (left) conducts Ichiro Honjo (center) and Uno Shozo on a tour of the AM plant site west of town. The Japanese are making a "whirlwind" tour of this country and were interested in magnesium plant construction work.

New Signs For US 84

New highway signs will be erected on U. S. 84 in the Snyder area, under a contract expected to be awarded by the State Highway Department.

The department has announced that Aztec Manufacturing Co. of Fort Worth is the low bidder on the project, with a proposal of $28,969.

Homer Ray, resident engineer here for the Texas Highway Department, said the plans call for replacing many of the highway signs on U. S. 84 from a point near the Ezell - Key Grain Co. southeast of town, to the vicinity of the Basin Wax Products Co. plant northwest of town, a total distance of slighly ove 12 miles. The signs will be similar to some of the signs used on Interstate highways, although US 84 is not in the Interstate system.

Japanese Visitors In Quick AM Tour

Two distinguished foreigners were visitors in Snyder yesterday afternoon.

Actually, the main reason that Shozo Uno and Ichiro Honjo came to Scurry County was to look at the progress of work at the site of American Magnesium Company west of town where a large new plant is under construction.

Honjo is president of a zinc company in Osaka, Japan, and also is connected with Pacific Magnesium Company. He is a former director of the Furukawa Magnesium Co. Uno is general manager of the planning department and a director of Mitsubishi Chemical Industries.

"We're here for a look-see," smiled Uno when asked if his company was considering constructing a magnesium plant. Mitsubishi is one of the largest Japanese firms with interests in steel, construction and mining. Main offices are located near Tokyo on the largest island, Honshu. The firm built bombers during World War II. Levelled by bombing raids during the war, the company had to rebuild from the ground up.

Honjo said he is a friend of Roger Wheeler, the president of American Magnesium Company. He and Uno were taken on a tour of the AM plant site here by Jim French, who is in charge of construction of water wells in Gail for American Magnesium. The group toured the wells at Gail prior to the visit to the plant.

Arrangements for dinner and bookings for a flight to Houston were made by Mrs. Joe Pitts whose husband is executive vice president of American Magnesium. The Japanese visitors departed for Lubbock airport about four hours after they arrived here yesterday afternoon.

Air Force Grounds F111A Swingwings

WASHINGTON (AP) — The Air Force has grounded all its F111A swingwing fighter-bombers—some 90 planes—while investigators probe the cause of the ninth crash in less than two years.

Some critics, including Sen. John L. McClellan, D-Ark., say the crash Monday was only the most recent of a series of difficulties that cast doubt on the variable sweepwing's future.

Ties Take Heavy Toll In Contest

It wasn't the won and lost decisions so much as the ties that wrecked the averages in last week's Snyder Daily News Football Contest.

According to the contest rules, tie games are losses, unless a contestant predicts them to be ties. So, the three deadlocks involving Southwest Conference teams, Texas 20, Houston 20; Tech 10, Cincinnati 10; and Rice 35 Washington 35 took a heavy toll.

Consequently, entries with six misses qualified for the prize money, and three will share it for the past week's contest. They are Bill Hood Jr., Mrs. B. J. Harris, and Bob McKinney.

Another contest begins today. The list of games may be found in sponsors' advertisements on the football contest page of this issue of The Snyder Daily News.

US Ups Underground Tests

By ROBERT T. GRAY
Associated Press Writer

WASHINGTON (AP) — Sen. Henry M. Jackson says this country will spend a third more on underground nuclear testing —which he says includes vital tests for the SPARTAN missile's nuclear warhead—this fiscal year than last.

Jackson, chairman of the Senate subcommittee on nuclear safeguards, reported the increase to the Senate today in a prepared review of U.S. nuclear development progress within terms of the Limited Nuclear Test Ban Treaty of 1963.

He gave no figures on underground nuclear tests spending. A Pentagon source said the costs are classified.

The SPARTAN missile is to be used in the anti-ballistic-missile system (ABM) nearing the deployment stage.

Jackson said neither the nuclear nonproliferation treaty awaiting Senate action nor the prospect of U.S.-Soviet talks on limiting nuclear arms should deter current efforts to develop an improved nuclear capability.

He said the Senate had ratified the 1963 treaty, which bars nuclear tests in the atmosphere with the understanding this country would continue underground tests, maintain up-to-date development facilities, be ready to resume atmospheric testing if necessary and monitor for violations by other countries.

"In general, we are pleased with the way the administration has continued to support and implement its promise to the Senate to carry out the safeguards," he said.

Jackson said plans for higher expenditures this year on the underground tests "is certainly indicative of the increasing value, interest and importance in carrying out aggressively the mandate of the first Limited Nuclear Test Ban Treaty safeguards."

He noted that there was "some adverse reaction" from business interests in Las Vegas, Nevada, to a high-yield test conducted on Pahute Mesa in that state but added that public acceptance had been good on the whole.

"The tests are vital to the development of the SPARTAN ABM and the Atomic Energy Commission has planned an intensive public relations effort to insure public acceptance and understanding," Jackson said.

He reported there had been 157 underground tests by this country since the treaty was signed in 1963.

Heavy Rains Cool Mexico City Riots

MEXICO CITY (AP) — Heavy rain Tuesday night dispersed rioting students whose battling with the police kept parts of Mexico City in turmoil for more than 24 hours and left at least 15 persons dead.

Four other deaths were reported Tuesday night during hit-and-run clashes involving students, other dissidents, police and soldiers. But these deaths could not be confirmed.

The fighting Monday night reached a peak not seen in the Mexican capital since the revolutionary days of the 1920s. It slacked off Tuesday, and officials went ahead with preparations for the Olympic Games, scheduled to open in Mexico City on Oc. 12.

Throughout the day Tuesday sirens wailed and shots could be heard as police sought out snipers who, after a bloody night of fighting around vocational schools in the northwest part of the city, holed up in apartment houses in the area.

Firing increased shortly before night fell, and a magazine reporter on the scene said two students were killed at a vocational school in the downtown Ciudadela section.

At another vocational school in the Tlatelolco area, the scene of heavy fighting Saturday and Monday nights, three buses were burned and police in possession of the school drove back 2,500 students by firing into the air and shooting tear gas into the crowds.

There were also reports of isolated shooting incidents in other parts of the city.

The student unrest, which has plaqued Mexico's capital since July 26 and threatens to cut attendance at the Olympics, has been attributed to violation of the right of university autonomy, police brutality, hooliganism, Communist influences and determination to gain certain concessions from the government.

Chevrolet For '69 Offers Widest Choice Of Engines

The widest choice of engines and transmissions in automotive history head a parade of exclusive Chevrolet features for 1969, E. M. Estes, general manager, said.

"This unparalleled opportunity for the 1969 buyer to custom tailor his car's performance and economy typifies the variety and value with which Chevrolet expects to increase its industry leadership," Estes said.

"Other exclusive Chevrolet features are computer-selected springs for improved ride, jet stream headlight washers for better illumination in bad weather, wider wheels to improve vehicle handling and a 'liquid tire chain' system to increase rear tire traction on icy streets."

Estes said 35 new Chevrolet models in seven distinctive car lines for 1969 go on sale Thursdat at Les Francis Chevrolet in Snyder.

"The industry's top seller — the big Chevrolet — is all new in 1969 and has the largest base V-8 engine in its class," Estes said. "It is a 327 cubic inch V-8, increased from a base 307 engine in 1968."

"Two new 350 cubic inch V-8's are also introduced, one using regular fuel as does the base V-8. The big Chevrolet also offers a high torque, regular fuel 396 cubic inch engine, largest regular fuel engine in its field."

Other exclusive features Estes listed for the new big Chvrolt are full door glass styling with improved Astro Ventilation on all models, variable-ratio power steering for more responsive maneuverability, an electrically - heated rear window defroster and a one-of-a kind roofline for the Caprice Coupe and Impala Custom Coupe.

Chevrolet introduces in 1969 a new Turbo Hydra-Matic three-speed automatic transmission specially designed for six cylinder engines and V-8 engines up through 350 cubic inches. Teamed with the regular Turbo Hydra-Matic offered on larger displacement V-8's, this gives virtual across-the-board availability of this highly advanced transmission, Estes said.

Chevrolet also introduces a new heavy duty, three - speed fully synchronized manual transmission. Others in the wide transmission selection are the standard three - speed, optional four - speed, Powerglide two-speed automatic and Chevrolet's pace setting Torque-Drive "clutchless" transmission for four and six cylinder equipped Chevy Novas and the six cylinder Camaro.

Safety and secuirty advances on the 1969 Chevrolets range from an improved energy-absorbing steering column, contoured windshield headers and front seat head restraints to an anit-theft ignition, steering and transmission lock mouned on the steering column. (See full list.)

Estes said there is also an all-new outside and inside look for Chevrolet's sporty Camaro in 1969, plus exterior and interior styling improvements in Chevelle, Nova and Corvette and continued Corvair individuality.

Use of computer selection to get the best spring combination for each individual car increases Chevrolet vehicle quality in 1969. Each customer order is analyzed with high speed data processing equipment to determine the front and rear weight of all equipment and the proper springs to carry it. The result is carefully tailored, more consistent trim heights which insure a good ride as well as correct appearance.

Other quality improvements include stronger V-8 engine construction for greater durability, smoother, quieter engine drivelines to help reduce noise and vibration, a new air cleaner snorkel design that makes six cylinder engines quieter and new accessory drive systems of V-8 engines which give improved durability and quieter operation. Frame and sound isolation improvements give better ride.

Advanced, power - assisted front wheel disc brakes are available for any Chevrolet, Chevelle, Nova or Camaro and are standard on SS-equipped models. Finned front wheel brakes and heavier duty linings at all four wheels are standard on all regular models in Chevelle, Nova and Camaro lines.

Chevrolet station wagons in 1969 are regrouped into a single line on two wheel-bases for easier customer choice. A new rear design makes them "walk-in wagons." Using Chevrolet's new dual - action tailgate with step built out the bumper, a passenger can step easily in an upright position into the passenger compartment, turn and sit in Chevrolet's rear-facing third seat. The dual-action gate is offered on all wagons.

There is sporty SS equipment for every coupe and convertible model of the big Chevrolet, Chevelle, Nova and Camaro. Besides a big V-8 engine and power disc brakes, special identification and suspension are included.

SS cars in Chevelle, Nova and Camaro lines also have a special hood and wide oval tires on seven-inch wide wheels — one inch wider than in 1968. White lettered tires are included on Chevelle and Camaro SS cars.

An exclusive headlight washing system is among the newest of Chevrolet's more than 400 options and accessories for 1969. It is standard on Corvettes, included on Caprice and Camaro models with concealed headlights, and optional on nearly all other models.

When the wiper - washer control is held depressed by the driver, the headlights (outer lights only on four headlight systems) are washed by jets of windshield washer fluid. This removes accumulations of road dirt, giving improved illumination.

Chevrolet's exclusive "liquid tire chain" dispensing system gives increased rear traction on ice - surfaced roads. Activatad by a button on the instrument panel, dispensers mounted at the top of rear wheel housings spray the chemical against tires. The four - ounce dispenser cans are replaced when empty through the trunk compartment.

Chevrolet air conditioning is improved for 1969 with greater air-flow through larger ducts and added passenger compartment outlets. An improved AM-FM stereo radio combination has all controls mounted on the radio.

Power door locking is offered in 1969 on Chevelle models as well as on the big Chevrolet. Chevrolet's exclusive light monitoring system that tells when front and rear lights and signals are operating is again offered on Chevrolet, Chevelle and Camaro and is standard on Corvette.

Chevrolet offers 15 exterior colors for 1969, nearly all new. There are up to six two-tone combinations, five vinyl top colors and three convertible top colors.

SPARKLING WITH NEW STYLING refinements are the 1969 Chevrolets. New grille design, new placement of front lights and rectangular rear taillights are a few of the many changes to be found in the Impala Custom Coupe shown here.

Zsa Zsa Doesn't Show

CHICAGO (AP) — Actress Zsa Zsa Gabor failed to make a court appearance Tuesday. Davi. Bradshaw, lawyer representing Leo Durocher, said he will ask for a show-cause order Thursday from Judge Hubert L. Will of U.S. District Court, who threatened to have Miss Gabor jailed if she did not respond to a subpoena.

Durocher, manager of the Chicago Cubs baseball team, sued for $1 million from Miss Gabor, an automobile transmission company and five others for allegedly violating a contract Durocher had to advertise the company's products.

A subpoena served on the actress Friday directed her to appear Tuesday for a deposition in the office of Bradshaw. She did not show.

Eidinoff Hearing Continues

RUSK, Tex. (AP) — Testimony continues today in a sanity hearing for Dr. Harold Eidinoff, an El Paso physician seeking release from the Rusk State Hospital.

Eidinoff was confined to the state mental hospital in 1959 when a Lubbock jury acquitted him by reason of insantiy in the shooting death of El Paso lawyer Ted Andress.

Eidinoff maintains he is sane now and is seeking release from the institution. If he is released, he cannot be retried.

Witnsses at the hearing Tuesday included Mrs. Irene Starkey, a medical librarian at Rusk, El Paso Dist. Atty. Barton Bolin and Dr. Julian Kennedy, a consultant psychiatrist at Rusk.

Kennedy testified before a jury of four men and two women that he did not think Eidinoff was mentally ill at the present time.

A sanity hearing for the El Paso doctor last July ended in a mistrial.

A Lubbock jury ruled Eidinoff was insane at the time he gunned down Andress in 1958 and at the time of his trial.

Andress was shot down as he and his wife walked throught the El Paso airport.

The trial brought out testimony that Eidinoff and Andress had been feuding for five years.

Andress, who was president School Boards, had represented a group of attorneys who sued Eidinoff for legal fees after a divorce suit. He also won an $80,000 libel judgment against the physician.

Eidinoff at the time of the shooting was dressed in a bullet-proof vest, cowboy boots and rough clothing.

Infiltrators Killed

SEOUL (AP) -- South Korean troops trapped seven North Korean infiltrators or the western front just bel - the demilitarized zone and killed them all in a fierce one-hour battle Tuesday, the government said today.

Ex-Lawman Free On Bond

FLORENCE, Ariz. (AP) — A former Arizona law enforcement official is free on bond following his arrest in connection with the Sept. 20 robbery of the State National Bank of Corsicana, Tex.

James Virgil Eaves, 44, surrendered to Pinal County deputies Monda; after learning e was sought for the Texas robbery in which $5,855 was taken.

He was released on $1,000 bond.

Eaves reportedly had been living in Sulphur Springs, Tex.

He was a Pinal County criminal investigator for eight years and a former police chief of Eloy, Ariz.

In 1961 Eaves was accused in Port Arthur, Tex., of the murder of golf pro Homer Widner. He testified at a trial that he shot Widner in self defense.

The Corsicana bank robbery was committed by a man described as about 5-foot-7 with iron-gray hair.

Rites Set Thursday For Sanchez Infant

Funeral service for Grace Sanchez, infant daughter of Mr. and Mrs. Joe Sanchez of 609 Thirtieth Street, are set for 10 a.m. Thursday at Our Lady of Guadalupe Church. She was born August 22, 1968, in Dimmitt and died at 7:30 this morning.

Survivors include the parents; 1 sister, Patricia, two brothers, Joe Jr. and Freddie, all of the home; maternal grandparents Mr. and Mrs. Lewis Carrisalse of Snyder and paternal grandparents Mr. and Mrs. Benito Sanchez, Loraine.

Fr. Cyril Lange will officiate at the services. Burial will be in Snyder Cemetery under direction of Bell - Seale Funeral Home.

Exhibition Burns

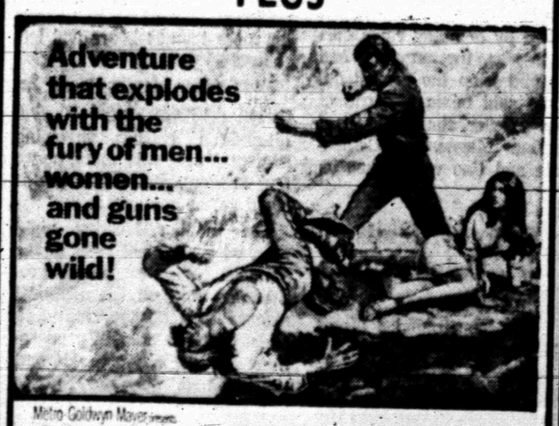

BUENOS AIRES (AP) — An explosion and fire destroyed a $1.5 million Israeli commercial exhibition in Buenos Aires early today. An Israeli Embassy spokesmar said the explosion was caused by a bomb, but police said they could not confirm this yet.

ATTEND CONVENTION — These members of Zeta Lambda Chapter of Delta Kappa Gamma attended the state convention. From left, are Maydelle Burns, June McGlaun, Evelyn Boone, Dorothy Miller and Virginia Grove. Miss Grove also attended the national convention in New York City in August.

Convention Reports Are Given At Meeting Of Sorority Here

Zeta Lambda Chapter of Delta Kappa Gamma held its first meeting of the fall season Monday at the home of Joyce Gorman.

Maydelle Burns, first vice president, presided in the absence of President Mary Devenport.

Dorothy Miller, Evelyn Boone, June McGlaun and Maydelle Burns gave the highlights of the Alpha State Convention, held in June in Dallas which they attended. Virginia Grove was awarded a State Achievement Award at this convention, one of six which was presented for the entire state.

Virginia Grove was the only member of Zeta Lambda Chapter to attend the national convention in New York City in August. Miss Grove pointed out that the national gain in membership was approximately 3,000 per year, and that nationally, 327 state and chapter scholarships had been awarded this past year, which were valued at one-half million dollars.

The Program topic was "the Educator's Choice of Values."

Ruby Anderson opened the program on moral values. She said that changing times and divergent interests always create something of a barrier between generations. The happenings that adults find so disturbing today are the concrete manifestations of an emerging character in American society most aptly called "hang-loose" ethics. It is cool and irreverent and reflects dissatisfaction toward many traditional roots. Teachers are regarded as hopelessly "square" and out of touch with the times.

Bobbye Combest followed with a discussion of the social values for educators. She said that American society was founded on values that will never give way to fads — that the same values that our ancestors held to are a part of their legacy to us; that regardless of how it is totaled God plus one is still a majority.

She declared, "For those of us who have chosen teaching, there can be no denial of our values. We ARE the values we teach — we must assert what we hold dear — compassion, hope and faith in the future — the kind of values system that puts people ahead of things."

Evelyn Boone closed the evening's program with a discussion of the economic value of education.

She said that the Bureau of Statistics of the Dept. of Labor shows the potential of an education with the following statistics:

A carpenter with a high school education, for example, will earn $31,000 more during his lifetime than a fellow worker who completed elementary school. If he had gone to college and perhaps become a civil engineer, the differenced would amount to $202,000, more than doubling the lifetime earnings of the elementary school graduate.

No longer can a boy or girl expect one occupation to cover a lifetime of work. A 20 year old man can expect to change jobs six or seven times during his lifetime. To be able to change from one job to another a person must have an educational background broad enough to enable him to absorb the training and retraining necessary to permit him to switch.

"Stay in School" is indeed the motto for the decade ahead, she declared.

She concluded by saying that the difference in lifetime earnings closely correlated to the years of formal education achieved, shows that education does not cost — it pays.

Assisting Mrs. Gorman as hostesses were Elwanda Nall, Durelle Gorman, and Pauline Turner. Members present were: Ruby Anderson, Barbara Bigham, Evelyn Boone, Maydelle Burns, Bobbye Combest, Georgene Galloway, Durelle Gorman, Joyce Gorman, Virginia Grove, Hazel Hanback, Laura Holladay, Bess Johnston, Lillian Jones, Philomen Kelley, June McGlaun, Elwanda Nall, Carol Miller, Dorothy Miller, Sally O'Rear, Lida Rhodes, Pauline Turner, Marybeth Vestal, and Agnes Kunkel.

Crisp Ginger Cookies

2 cups unsifted regular flour (stir to aerate before measuring)
2½ teaspoons baking powder
¼ teaspoon baking soda
¼ teaspoon salt
1 teaspoon cinnamon
½ teaspoon ginger
⅛ teaspoon cloves
1½ sticks (¾ pound) butter or margarine
1¼ cups sugar
¼ cup dark molasses
1 large egg

On wax paper thoroughly stir together the flour, baking powder, baking soda, salt, cinnamon, ginger and cloves. In medium bowl, cream butter and 1 cup of the sugar; add molasses and egg; beat well. Add sifted dry ingredients; stir until blended. Cover tightly and refrigerate overnight. Shape level tablespoons of dough into balls; roll in remaining ¼ cup sugar; place, 5 inches apart, on buttered cookie sheets. With fork tines, flatten balls until no more than ¼-inch thick. Bake in preheated 375-degree oven 8 to 10 minutes. Makes about 50.

Scientists from the United Arab Republic and the United States are measuring the flow of cosmic rays through the second of the three great pyramids of Giza near Cairo.

AAUW Has Session

Snyder Branch of American Association of University Women met in the home of Mrs. Martha Zeck for the September program Thursday evening. President Laura Holladay introduced four guests: Mrs. J. Guthrie, Mrs. Carolyn Lemmer, Mrs. Alpha Walker, and Miss Addie Rich.

Elizabeth Odom spoke on the "Values of AAUW Membership" and enlivened the discussion with appropriate illustrations from the Peanuts cartoon.

Mrs. Edna McConnell presented the new AAUW International cookbook and told that recipes sent in by Mrs. Laura Holladay, Mrs. Jewel Summers and Mrs. McConnell were included. Title of the new cookbook is "Favorites of University Women."

An educational booth at the fair was planned, with Mrs. Rhoades, and Elizabeth Odom co-chairmen. Others on the committee are Mrs. Lee Smyth, Mrs. June Anderson, and Mrs. Edna McConnell.

The hostess served refreshments to 20 members and guests.

The American Field Service Representative for the groups requested that the support usually given in March be made at this time. The club voted to comply.

The world's biggest fish is a whale shark. Curiously, the 40-foot monsters feed on microscopic plankton and tiny fishes.

Outdoor Party

When giving a cookout for a hungry crowd, a large capacity steamer will come in mighty handy. Available at hardware and department stores everywhere, these steamers simultaneously cook clams, corn-on-the-cob, potatoes, frankfurters, lobsters and the like.

They are made of durable, heavy gauge steel and sheathed in a satin-smooth ceramic for ease of cleaning. Steamers come in Imperial Blue, decorated with a bright red lobster, containing golden corn, and mouth-watering clams. A recipe book is enclosed in each carton.

Motels are a $3 billion-a-year business.

His, Hers And Children's

Plastic laundry baskets appropriately labeled for each member of the family can help train children and untidy husbands in picking up and putting away — and be a boon to the washerwoman. A convenient bin for linens and waterproof ceramic tile walls and floors in the laundry will also ease housekeeping chores.

Jumbo Percolator

Twenty-five cup jumbo coffee percolators are great for large parties year-round and are ideal also for dispensing chilled beverages, according to home economists.

Why Let Tension Make You Ill And Rob You Of Precious Sleep!

Do everyday tensions often build up to the point where you find it hard to do your work? Where you have difficulty getting along with your friends . . . frequently "take it out" on your family . . . even feel ready to explode? It's true! Tension can actually make you ill.

Don't let this happen. First see what B.T. Tablets can do for you. B.T. is so safe that you don't need a doctor's prescription. Yet each tablet contains tested ingredients that help you relax during the day—help you to get the restful sleep you need at night. Try this trusted way to more peaceful living. Ask your druggist for B.T. Tablets—and relax!

INTRODUCTORY OFFER WORTH $1.50

Chevrolet introduces 1969.

Caprice. Match this, you other 69's!

There is no joy in the land of our competitors today.

But let us ask you this.

Should we have made Caprice shorter instead of the longest Chevrolet ever built? Or adorned it with flashy nicknacks to make it look less expensive?

Just because competition doesn't, should we not have offered you washers to clean your headlights, new variable-ratio power steering, liquid tire chain you can apply to your rear wheels at the touch of a button?

Should we have given you less power, instead of the largest standard V8 in its field?

Some people think so.

Our competitors.

'69 Caprice Coupe

GM

'69 Camaro SS Sport Coupe, plus RS equipment

Camaro. Who needs to say "announcing" or "new".

The Hugger.

And just look how it all hangs together. No gingerbread anywhere.

We've improved the interior, too. Quieted the ride. Made the Astro Ventilation ventilate better.

The power range is very impressive.

Standard V8 is 210 hp. SS engines available up to 325 hp. For added SS appeal: sport striping; power disc brakes; wide oval, road-hugging tires.

Your Chevrolet dealer offers this advice:

Go on, you other sportsters. Gnash your gears and look tough.

Maybe it will help.

Putting you first, keeps us first.

PONTIAC REVEALS 1969 FIREBIRD, LEMANS — Both the 1969 Pontiac Firebird and the LeMans models combine sports car design and big car luxury. The Firebird, represented above by the hardtop coupe, is also available in a convertible model. A choice of five engines and now a three-speed Turbo Hydra-matic transmission option make the Firebird one of America's most popular sports cars. The LeMans convertible, along with the two-door sports coupe, two-door hardtop coupe, four-door hardtop and station wagon feature new interior fabrics and colors, draft free ventilation and additional padding for safety and comfort.

New Styling For Pontiac Of '69

New styling from the ground up, the latest engineering innovations and added safety are all part of the 1969 Pontiac story.

Styling highlights include a new split bumper look to complement Pontiac's traditional split grille, new roof lines and the removal of vent windows from all Catalina, Executive and Bonneville models adding picture window visibility.

Sixteen models, offered in three series, go on sale tomorrow at Snyder Motor Co.

The Bonneville series has been given specific treatment in 1969 and features a separate and distinct grille, a rear bumper with a rubber-like pad and a 428 cubic-inch V-8 engine as standard equipment.

The 1969 Pontiac interiors present a pleasant and safer environment with molded instrument panels of a sweeping one-piece design with heavy energy-absorbing padding, a new instrumentation arrangement and complete upper level ventilation.

"The styling and engineering design of these new cars will bring to Pontiac an even greater amount of attention and admiration from the automotive public," John Z. DeLorean, a General Motors vice president and Pontiac general manager said.

The front of the new Pontiacs is striking in appearance and functional in design.

A center section of a rubber-like plastic material, called Endura, splits both the grille and the bumper setting a dominant theme. It is painted in body color. Parking lamps are below the massive bumper at the outboard ends of the valance panel and dual, horizontal headlamps complete the wide clean look.

Bonnevilles have a die cast grille separate and distinct from the other models.

The new side appearance emphasizes full length side peak line and new roof lines. The sides are accented with vinyl plastic moldings which are thicker and contain both the front and rear side markers integrated at each end of the molding.

Executive station wagons have an exterior walnut wood design which extends from the front fender rearward over the doors and rear quarter panel. A border of wide, lighter tone teak gained vinyl is used to complete the design.

A major advance in Pontiac's built-in safety is a steel beam within each door which will provide greater protection against passenger compartment penetration in case of a side collision.

The safeguard, which is standard on the new Pontiacs, includes a box-like steel beam positioned horizontally within each door plus additional door-pillar reinforcements.

The beam is designed to reduce the possibility of the striking vehicle riding over the rocker panel and penetrating into the passenger compartment. Concentrating the crash force against the beam will generally cause a deflecting action and in so doing, both vehicles will escape the full impact of the collision.

Pontiac rear ends have new wide tail lamps incorporating back-up lamps and reflex turn signals.

The Bonnevilles have a special energy-absorbing body color insert on the rear bumper for added protection to impact surfaces.

Another feature on the Pontiac station wagons is a swing gate. The tailgate may be lowered in the conventional manner or may be swung open. A special cut-out on the right side of the bumper provides a built-in step for easier entry into the load area.

The 1969 Pontiacs ride on longer wheelbases - 122 inches for Catalinas and station wagons and 125 inches for Executives and Bonnevilles. This is a one-inch increase over last year.

Catalina models have also increased one inch in overall length to 217.5 inches, Executive models remain at 223.5 inches and Bonnevilles are increased one-half inch to 224.0 inches overall.

Overall width is 79 inches and overall height 54.8 inches.

Ask Homestead Law Revise

AUSTIN (AP) — The Texas Constitutional Revision Commission wants the homestead law changed so swindlers cannot hide behind it.

The commission voted 11-5 Tuesday to place a flat $25,000 limit on the value of a homestead that can be kept out of the hands of creditors.

The present constitution says a creditor cannot force the sale of a man's homestead so long as the lot it is built on cost no more than $5,000. If the homestead is in the country, 200 acres are exempt. It makes no difference in either case how much the house is worth.

Steele Wright, president of Texas Farm Products Co., Nacogdoches, urged the change to $25,000 maximum on land and house combined, whether in the city or country.

"People have actually swindled us out of several thousand dollars and hidden behind the homestead exemption," Wright said. "This (present) law is a great inducement for swindlers to come here from all over the United States."

Judge T. C. Chadick, Texarkana Court of Civil Appeals, opposed Wright's motion. One of his objections was that a lawsuit would be needed in each case to determine the value of the homestead.

Deadly Serious Research With Make-Believe Targets

ORLANDO, Fla. (AP) — Using a make-believe world for deadly serious intentions, a team of missile guidance experts here regularly "attack" Hoover Dam, Baltimore's Friendship International Airport and Philadelphia's harbor.

They also zero in on a Vietnamese airstrip, roads and mountains such as those in Southeast Asia, oil storage areas, a power plant, railroad and bridges.

The object of their warlike attentions is 20 square miles of terrain compressed onto a 40-foot-square platform inside the Guidance Development Center at Martin Marietta Corp.'s Orlando Division. Built on a scale of 600:1, the three-dimensional terrain model is constructed with detail that would make a model railroad buff drool.

Toward the "targets" on this model are launched optical guidance systems being developed to steer U.S. aircraft to ground missiles toward targets in Vietnam or other potential world troublespots.

Built at a cost of more than $2 million, the laboratory—with terrain model inside—permits engineers to "simulate all the conditions which an aircraft pilot, or a missile, would encounter in trying to zero in on a target on the ground," said George E. Smith, general manager of Martin's Orlando Division.

"With the aid of the moving terrain model, television display screens and a bank of computers, we can program an infinite variety of flight missions and flight test any kind of optical or radio frequency guidance device. We can do in a matter of hours what would take several weeks of expensive flight testing in the field to accomplish," Smith said.

When technicians want to test the performance of a missile guidance unit, they connect it to a mechanism at one end of the building. Following signals from the guidance device, the mechanism moves up and down, sideways and swivels.

"Not only does this save money and time in flight testing various guidance devices, but it also makes it possible for us to try out a lot of ideas that we couldn't afford to have carried through to the flight test phase," Smith said.

A wall at one end of the guidance lab is removed, the terrain model rolled outside and the missile steering unit aimed accordingly when engineers want to test how well an optical guidance device "sees" under natural conditions such as moonlight. Lighting can also be altered inside the building and weather conditions such as wind cranked into the control computer.

The terrain model does not show any specific area of the world, but is a conglomeration of a number of targets of military significance. Hoover Dam represents a typical hydroelectric plant, Friendship Airport a typical municipal runway and Philadelhia's port area a typical harbor with oil storage plants and freight yard.

Two-Car Crash Claims Two Lives

ROCKWALL, Tex. (AP) — A two-car crash near the Dallas-Rockwall County line killed two persons Tuesday.

Police identified the victims as Erwin McCollur, 67, and Ethel Mae McCollum, 65, both of Mount Pleasant.

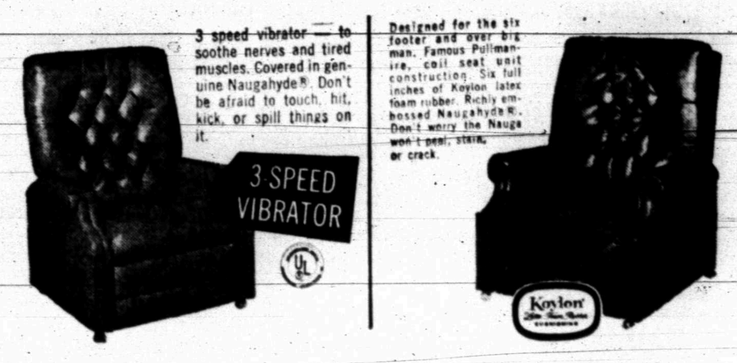

The collision occurred on Interstate 30.

Swaziland, a rapidly developing monarchy smaller than New Jersey and with fewer people than Newark, gained independence Sept. 6, 1968.

Forty of Salem, N. C.'s, original buildings still stand. Their steeply pitched tile roofs, hooded doorways and walls of hand-made brick suggest an 18th century European town.

PONTIAC ANNOUNCES THE GREAT BREAK AWAY!

This is the year to say good-bye to humdrum driving!
'69 Wide-Track Pontiac Grand Prix.

If you've never driven a car like this before, that's because there's never been a car like this Pontiac Grand Prix before. So new, it's got its own 118" wheelbase. So new, it's got its own aircraft-type interior. A new steering wheel with a "soft" material rim. With a Wide-Track on big tires. With a new hidden radio antenna we're daring everybody to find.

Or maybe you'd like to break away with a brand-new Firebird. With typical Wide-Track handling and a range of available V-8 choices that'll make your head spin (including the fabulous 400 Ram Air option). Brand-new styling, too. Lean, clean, ready looks. Plus 13 exciting new colors . . . new anti-theft ignition, steering and transmission lock.

There's also The Great One. Our GTO, the one that started it all. Complete with baseball-bat-proof bumper, fully padded instrument panel, distinctive Redline tires, along with specially designed suspension. Plus an assortment of V-8's that'll make your break from dull driving just about as pleasing as any you've ever made.

And don't forget our luxurious Bonneville. With a standard, 360-hp, 428-cubic-inch V-8, a long, long 125" wheelbase, a new upper-level ventilation system, color-keyed energy absorbing bumper at both front and rear, plus the kind of interiors you'd like to install at home. Bonneville. Who needs more?

GM
Pontiac Motor Division

THE NEW 1969 GRAND PRIXS, BONNEVILLES, BROUGHAMS, EXECUTIVES, CATALINAS, GTO's, LE MANS, CUSTOM S, TEMPESTS AND FIREBIRDS ARE AT YOUR AUTHORIZED PONTIAC DEALER'S NOW.

Justice System In Cuban Courts:

HAVANA (AP) — In a hot, almost airless room, a militiaman turns toward the people and announces the Spanish equivalent of "all rise."

Two ordinarily dressed men and a woman, looking for all the world like fans headed for a night baseball game, enter the room. Taking their seats beneath a big color portrait Ernesto Che Guevara, they announce that Popular Court No. 6 of Vedado is in session.

One of nearly 400 People's Courts is ready to begin its weekly task. Before its session is over, a typical court may settle a neighborhood squabble, judge a worker who has a record of absenteeism, censure parents for not properly rearing their children, and penalize someone for spreading antigovernment rumors.

Court No. 6, which has more than one team of judges, has averaged eight cases a session for the past three months.

These three-judge courts—known before the Castro revolution as Correctional Courts—are restricted to hearing misdemeanors. Judges have the power to sentence the guilty as much as 18 months in jail, house arrest or labor on a state farm.

The main difference between the People's Courts and their predecessors is that judges now are ordinary citizens with no formal legal training. Exemplary workers and militant Castroites, they are chosen at mass assemblies by their colleagues to judge "antisocial conduct cases." They receive guidance and a cram course from the Justice Ministry, which operates the court system. Judges' terms usually run three to six months.

A typical court may be composed of a factory worker, a technician and a store employe.

The courts normally meet at night. Procedure is streamlined and the verdict swift, usually within 15 minutes after the trial is over.

Anybody living in the court's jurisdiction can step forward as either prosecutor or defender. Or the parties involved may prefer to go it alone. Anyone appearing before the court has the right to request replacement of a judge he thinks might be prejudiced against him. No written record of testimony is kept and the judges' deliberations sometimes consist of stepping outside to discuss the case over a smoke.

Trials normally are open to the public.

THE 1969 CADILLAC is dramatically restyled to look lower, wider and longer. The Fleetwood Brougham (top) shows the new dual horizontal head lamps and the combined parking and cornering lights wrapped around the leading edge of the front fender. The familiar cross-hatch grille features horizontal and vertical bars in a "floating fin" effect. The ultimate in luxury personal cars, the Cadillac Eldorado, (bottom) features styling changes while continuing the strong character lines popularized by two successful years of production and sales. A new finely textured grille bears a family resemblance because of the cross-hatch theme. Elegant new wheel discs add distinction to the side view. The new Cadillacs will be on display tomorrow at Snyder Motor Co.

Archaeological Society To Meet

The Scurry County Chapter of the South Plains Archaeological Society will meet Thursday night to make plans for preparing a booth at the Scurry County Fair.

The meeting is set for 7:30 p.m. in the Snyder Savings and Loan Association Community Room.

The chapter hopes to arrange for a comprehensive display at the fair this year and all members have been urged to attend the Thursday night meeting and help plan the exhibit.

Storm Watchers Rested, But Wary

By BEN FUNK
Associated Press Writer

MIAMI, Fla. (AP) — Not a single major storm has come howling out of the tropics to attack American shores this year, but "don't write off the hurricane season yet," says director Robert H. Simpson of Miami's National Hurricane Center.

"It takes only a week," Simpson said, for a vast change in atmosphere conditions that could yield a whole rash of storms or develop one giant hurricane. We don't predict that, but it's possible."

For U.S. residents, Simpson said, it has been a tame season for two reasons.

The first is that the upper atmosphere of the tropics has been abnormally cold. The air column of a hurricane, rising like a giant smokestack to great heights, cannot develop and hold together without a concentration of heat all the way up.

The second restricting factor is that surface winds have been blowing from the east and upper winds from the west, making it impossible for an air column to grow.

Simpson said the winds blow like this in the wintertime, "and that's why we don't have hurricanes then," but such a situation develops only periodically in the storm season.

While it has been a dull season from a public standpoint, Simpson said, it has been a humdinger for the forecasters. Of the 15 hurricanes that have formed in the eastern Pacific this year, virtually all of them were tracked for thousands of miles by Miami weathermen.

"They're up to the letter 'O' in the alphabet over in the Pacific," Simpson said, "and they got virtually all of them from us. We probably cracked the record for the number of organized disturbances we have tracked."

Unable to develop in the Atlantic, they found the proper conditions in the Pacific, although none grew into major storms.

Miami forecasters have given names to only four Atlantic storms this year. The first, Abby, drove thousands from their homes in western Cuba and moved across Florida, but her winds never exceeded 75 miles an hour and damage was minor.

Candy formed in the Gulf of Mexico and brought heavy rains to Texas. Brenda, Dolly and Edna never crossed a coastline.

Presenting Cadillac for nineteen sixty-nine

Above, the 1969 Fleetwood Eldorado. Below, the 1969 Hardtop Sedan deVille, Cadillac Motor Car Division.

Even Cadillac has never built one like this!
The craftsmen who engineer and build Cadillacs are accustomed to creating the finest of motor cars, but they take special pride in these brilliant 1969 models.
A single glance at this automotive masterpiece reveals striking poise and beauty, dramatically new, yet unmistakably Cadillac. For 1969, Cadillac's traditional dignity is complemented by youthful styling unique in the luxury field.

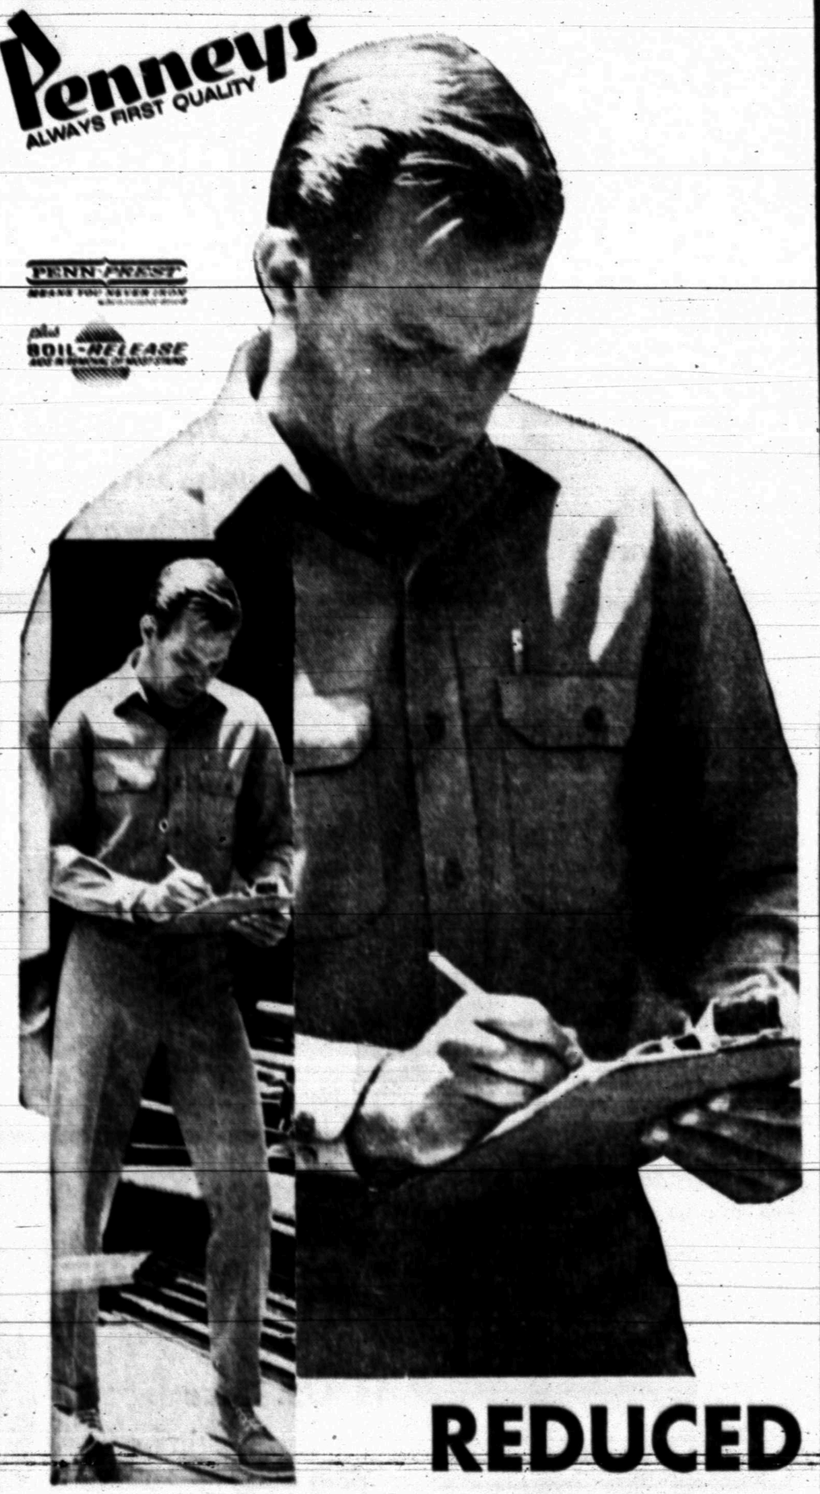

New concepts in comfort and convenience.
The 1969 Cadillac is completely new inside, with major innovations in design, convenience and decor. A newly contoured "control center" instrument panel makes controls even more accessible, and virtually surrounds passengers with luxurious protection and convenience.

A smoother, more responsive engine.
Cadillac's great 472 V-8 engine—the largest V-8 ever to power a production passenger car—is smoother, quieter and more responsive. Never before has power been employed so efficiently in the operation of a car and its equipment. And for 1969 front disc brakes are provided.

Your judgment is invited.
There are eleven different models of the 1969 Cadillac, more than is offered by any other luxury car manufacturer. Each is truly a masterpiece from the master craftsmen.
Your authorized Cadillac dealer welcomes your personal inspection of this once-in-a-lifetime motor car. Stop by and drive one at your earliest opportunity. We think you'll agree that this is the greatest Cadillac ever built.

THE NEW 1969 CADILLACS WILL BE ON DISPLAY TOMORROW AT YOUR AUTHORIZED CADILLAC DEALER'S

Urban University System Proposed

By LEE JONES
Associated Press Sports Writer

AUSTIN (AP) — Concentration of three—and ultimately four—state colleges in the Dallas-Fort Worth-Denton area under a single "urban university" system has been proposed by the Texas College Coordinating Board Staff.

Board member Charles Scruggs, Dallas, acknowledged there would be political difficulties getting the plan through the legislature.

"We knew it was fraught with tremendous political implications as well as local and alumni loyalties," Scruggs told newsmen Tuesday after the report was issued.

Dr. Bevington Reed, state higher education commissioner, said "the urgency of the matter was brought to a head" by the University of Texas' recent proposa to set up a sub-administration of the UT System in the Dallas-Fort Worth area and to acquire the Southwest Center for Advanced Study (SCAS) in Dallas.

But "this is not meant to be a counterproposal" to the UT plan, he said.

The staff recommended that North Texas State University, Texas Woman's University and the University of Texas at Arlington be brought under the new system. Each would retain its own administration and grant undergraduate degrees under its own name.

Also under the system would be an additional Dallas - area school offering the junior and senior years of college work which the board has recommended should be open by 1973.

Graduate and professional degrees through the Ph. D. would be awarded by the "urban university" under its own name.

The staff proposed that the system attempt to contract with SCAS for use as a "specialized research and docoral laboratory" and with private colleges in the area for the use of facilities and teachers.

A new board of regents would be created to govern the system, and the TWU and NTSU boards would be dissolved. UT-Arlington would be separated from the UT System, which it joined just three years ago.

The coordinating board will conduct a hearing on the proposal here Oct. 11, the same day as other hearings on the staff's recommendations for medical and dental education. The board has the right to change the recommendations before finally acting on them.

"We have reason to believe there may be two more proposals in this area before the hearing," said board member Harry Provence, who joined Scruggs and Reed in presenting the staff study to newsmen.

The report said the Dallas-Fort Worth-Denton area's colleges and universities "are now largely uncoordinated, lack unity of purpose and are not operating at peak potential."

Altnough the area's schools offer 30 per cent of Texas' doctoral programs, they graduated less than 10 per cent of the state's Ph.D's. in 1967, it said.

"The central need, if the problem of inadequate graduate production is to be solved, is for the development of an unified administrative control over the several state-supported campuses in the area," the report declared.

Reed said the staff did not deal with the question of whether TWU at Denton should remain a women's school, feeling the proposed new board of regents should have a free hand.

New Safety Regulations Demanded

PORT ARTHUR, Tex. (AP) — A union leader demanded tighter industrial safety regulations on the heels of Tuesday's explosions and fierce flames at the Atlantic Richfield Co. refinery.

Three workmen burned as sheet of fire destroyed a chemical unit at the plant were reported in very critical condition, meanwhile, at John Sealy Hospital in Galveston.

The injured men are W. S. Bond, 55, of Port Arthur; John C. McKague, 29, of Nederland, and Seigle Stewart Jr., 43 of Groves.

An exploding tank of premium gasoline hurled debris 200 yards and the massive blaze burning for hours, caused civil defense officials to order 500 families from homes just outside the refinery area.

Two tank cars of chlorine gas were moved to safety before the flames could cause them to burst and spread the gas through the neighborhood. The fire was confined to the chemical unit at the south end of the plan and other refinery operations continued.

A vice president of the Oil, Chemical & Atomic Workers Union, A. C. Sabatine, flew here from union headquarters in Denver, Colo., after learning what had happened.

"The tragic situation... at the Atlantic Richfield refinery demonstrates why the Oil, Chemical & Atomic Workers will demand from the oil industry the establishment of joint management and union safety standards," Sabatine declared.

"This is about the fourth incident of its kind in this area within the last 18 to 24 monhs."

There was no immediate comment from Atlantic Richfield spokesmen.

Another fire at the refinery, on the east edge of Port Arthur, killed seven persons and injured six more Aug. 17, 1967.

TAX ANSWERS

This column of questions and answers on federal tax matters is provided by the U. S. Internal Revenue Service and is published as a public service to taxpayers. The column answers questions most frequently asked by taxpayers.

• • •

Q — I just finished paying some big medical bills. What records should I keep in case I get audited?

A — You should have sufficient records to show that the expenses were deductible and that they were paid in the tax year for which the return was filed.

Keep your cancelled checks or receipts that will establish the amount of the expense, the date paid and the purpose. It is a good practice to have a special envelope, cigar box or similar place where tax records can be stored. This will make it easier to prepare an accurate return next year.

Generally, to be deductible the expense must be paid for the prevention, treatment, diagnosis or cure of a mental or physical defect or illness.

Q — I worked on a farm this summer and the formean said I will have to pay estimated tax on my wages. Is that right?

A — Farm wages are not subject to income tax withholding and you may have to file as estimated tax return to put you on a pay-as-you-go basis. September 16 is the next deadline for filing an estimated declaration or for amending a declaration filed previously.

Declarations must usually be filed if the estimated tax exceeds your expected withholding by $40 or more. Details on the estimated tax requirements and the tax forms needed are available at local IRS offices.

Taxpayers who have already filed estimated tax declarations should be sure to take the new 10 percent tax surcharge into account when they make their third payment in September.

Q — I am due a refund but a question about my Social Security Number has held it up. If it comes after I move will the Post Office forward it?

A — The Post Office will forward the refund check to your new address providing you have filed a change of address card with them.

Q — I play the drums and from time to time I play with a where I report to the office at combo at local dances. Do I have to pay tax on the money I make?

A — Yes, income from this source should be reported for federal income tax purposes.

Q — I have a selling job where I report to the office at the beginning and end of the day. My boss doesn't pay my driving expenses. Can I deduct them on my tax return?

A — If you have to use your car on business then the costs can be deducted. However, the costs of getting to and from your job are personal and not deductible.

You may deduct the actual expense including depreciation, or if you prefer, a standard rate of 10 cents a mile for the first 15,000 miles of business use and 7 cents a mile thereafter. Related parking fees and tolls may be deducted in addition to the standard mileage rate.

Q — How do I report the money I received for trees I cut from my property and sold?

A — You may elect to treat the cutting of the trees as a sale or exchange of a capital asset. For details send a post card to your District Office requesting IRS Documents 5048, Sales and Exchange of Assets, and 5050, Depreciation, Investment Credit Amortization, Depletion.

The Department of Agriculture also has a publication on this subject. It is Handbook No. 274, "Federal Income Tax Tips for the Small Timber Owner," and is available from the Superintendent of Documents, U. S. Government Printing Office, Washington, D. C. 20402 for 35 cents a copy.

Modern department stores flying the Hudson's Bay Company's historic red ensign span Canada.

Ever since Marco Polo returned to Venice in 1295, Persian rugs have been prized by connoisseurs.

Agnew Sees No Threat In Wallace

LOS ANGELES (AP) — Gov. Spiro T. Agnew of Maryland says he sees no threat from George C. Wallace, the third-party candidate for president.

"Wallace is simply not electable," Agnew told a news conference in Hilo, Hawaii, before flying to Los Angeles Tuesday night.

The Republican vice presidential nominee was met by a small group on his arrival in Los Angeles, where he spent the night. He campaigned in the islands for three days.

Agnew flies to Baltimore today.

The Republican candidate said he was pleased by crowds along his campaign and has "a particularly good feeling about our chances of winning in Hawaii." He said he has not planned to go to all 50 states but would go to Anchorage, Alaska, because he considers it important to campaign in the newest state.

Agnew was asked why he went to Hawaii, which has only four electoral votes. He said he didn't go for the votes, adding, "I don't think it's going to be that close."

A modern airport under construction soon will give isolated Bhutan a major link with the outside world.

Giants Clinch Second Place In National

By MIKE BRYSON
Associated Press Sports Writer

The Say Hey kid isn't a kid anymore, but you'll sure have a hard time convincing the Houston Astros.

Wondrous Willie Mays, all 37 years of him, cracked his 22nd homer of the season and a two-run bunt to spark a come-from-behind 5-4 victory over the Astros Tuesday night that clinched second place for the Giants.

A two-run bunt?

Yep. Willie, more noted for his long hitting feats, came up with that little oddity to cap a four-run rally in the eighth inning.

Astro third baseman Doug Rader took so much time fielding the slithering little dribbler down the baseline that not only did Dave Marshall score from third but also Jim Davenport from second.

Mays, whose solo blast in the first was the 586th of his career also had a single in four trips and stole one base.

Meanwhile, Pittsburgh's Steve Blass recorded his third consecutive shutout, and ninth straight victory and eighth straight complete game—and in the process helped teammate Matty Alou grab a share of the National League batting lead—as the Pirates subdued Cincinnati 2-0.

In other NL games, World Series-bound St. Louis was a 2-1 victim of Philadelphia, Atlanta socked the New York Mets 7-4 and the Chicago Cubs edged Los Angeles 3-2.

Over in the American League Detroit's champions nipped Baltimore 5-3, New York topped Cleveland 5-1 in the opener of a doubleheader before losing 5-2, Washington trounced Boston 10-2, the Chicago White Sox outlasted Oakland 5-1 in 12 innings and Minnesota dropped California 5-3 in 10 innings.

Blass, who hasn't been beaten since Aug. 10, aided Alou in his battle with the Reds' Pete Rose the hard way.

He struck out six Reds—fanning Rose three times.

Deron Johnson lashed a two-run homer and Tommie Aaron had three hits and scored two runs as the Braves squelched Met rookie Jerry Koosman's hopes for 20 victories.

Koosman, 18-12, battered hard during the early going, finally was chased in the sixth.

However, the Cubs' Ferguson Jenkins survived an eight-hit Los Angeles attack to win his 19th. Adolfo Phillips doubled, homered and scored twice to back him up.

Gary Sutherland's run-scoring double with two out in the eighth let the Phillies sidetrack St. Louis. Rookie Jerry Johnson, who scattered eight hits, picked up the victory, while Ray Washburn, making his first appearance since hurling a no-hitter ance since hurling a no-hitter last week, was tagged with the loss.

A Few Tickets For Slaton Game

Snyder football fans will have limited seating space at the Snyder - Slaton game Friday night at Slaton, based on response to requests for tickets here.

The school business office here received a small supply of general admission tickets and student tickets this morning and these were put on sale immediately. In the allotment of tickets were 241 student tickets and 275 adult tickets.

There are no reserved seat tickets. Local school officials said they understood that the visitors seating facilities at Slaton are not numbered for reserved seats.

Chest Pains Hit Hodges

ATLANTA (AP) — Gil Hodges, manager of the New York Mets, was hospitalized Tuesday night after complaining of chest pains during the game between the New York Mets and the Atlanta Braves.

He was taken from the dugout to Crawford W. Long Hospital for examination.

After Xrays and a cardiogram had been performed, the cause of the pain had not been determined.

The 44-year-old Hodges will remain in the hospital at least four days for examination.

BACK TO BACK NO-HITTERS — San Francisco's Gaylord Perry left, and St. Louis' Ray Washburn, both righthanders, pose in the Cardinals dressing room at San Francisco after Washburn pitched the Cards to a no-hit victory over the Giants. Perry recorded a no-hitter against the Cardinals the previous night. (AP Wirephoto)

Feds Throw Pro Golfers In Rough

WILMINGTON, Del. (AP) — The American Professional Golfers organization's drive to start its own tourney circuit is temporarily into the rough as the result of a federal court restraining order.

Chief U.S. Dist. Court Judge Caleb M. Wright issued the order late Tuesday on the complaint of the Professional Golfers Association.

The APG signed up scores of month in the throes of a feud between the PGA hierarchy and some of the PGA tour's top money winners.

The AG signed up scores of PGA members and even hired away the PGA's tourney director, Jack Tuthill, as its own.

One of the PGA's prime complaints is apparently directed at Tuthill. Wright's order specifically prohibits the rebel group from "employing documents, mailing lists or confidential information transferred from the PGA to the APG by a former PGA employe."

The judge's order however, mentions no persons by name.

Other stipulations prevent the APG from "entering into any agreement with a sponsor of a 1968 PGA golf tournament" or "soliciting any prospective tournament player to participate in or conduct a 1968 qualifying school."

The APG's board of directors includes the PGA tour's leading money winner, Billy Casper, and Gardner Dickinson, Jack Nicklaus, Doug Ford, Dan Sikes, and Frank Beard, all in the PGA's upper income bracket.

The APG spun off from the PGA over grievances including demands for a greater voice for players in PGA affairs, money and partial elimination of qualifying tournaments.

Is Avery Tolerant?

CHICAGO (AP) — Avery Brundage, president of the International Olympic Committee, says racial charges against him are a "complete distortion of facts."

Brundage made the statement Tuesday after 21 Negro athletes and an assistant coach of the U.S. Olympic team training for the Games at South Lake Tahoe, Calif., signed a petition calling for Brundage's removal as head of the IOC.

Brundage, who will celebrate his 81st birthday Saturday before leaving for Mexico City, site of the Olympic games Oct. 12-27, allegedly made the racial statements on a national television program.

The Negro group, including assistant coach Stan Wright charged that Brundage "dared us to participate in protest and then threatened us with a quick trip home."

Brundage said he questioned remarks apparenty stemmed from a question and answer session following a Sept. 17 speech before the National Press Club in Washington.

Brundage said "There seems to be a complete distortion of facts in the matter. There were no dares nor threats.

"The fundamental basis of the Olympic movement is no discrimination of any kind—racial, religious or political. Every competitor is judged on his own merits.

"The Oylmpic Games, however, must not be used as a tool or weapon in any controversy and they are not a forum for protest or demonstrations of any kind.

"I made a general statement that demonstrations are not permitted at the Games, that the word boycott is not used in Olympic circles and that demonstrators of any nationality would be sent home. This is a permanent Olympic policy."

Purdue-Irish Clash Highlights Schedule

By DICK COUCH
Associated Press Sports Writer

NEW YORK (AP) — Bowl fever in September?

That's the state of the State of Indiana this week as Purdue and Notre Dame, 1-2 in the latest college football power ratings, gird for Saturday's Poll Bowl clash at South Bend.

The Fighting Irish, who've had more than one national championship dream spoiled by the Boilermakers in recent years, are certain to pull out all stops to reverse their 28-20 setback at Lafayette last season. For one thing they're bringing back Knute Rockne.

Pat O'Brien, who portrayed the legendary Notre Dame coach in the movies, is scheduled to keynote Friday night's pep rally at South Bend. After he gets the Irish up, it'll be twice as difficult for Purdue to bring them down.

But, while Notre Dame might have the makings of a psychological lock, the Boilermakers have the Keyes to the kingdom. And the hunch here is that All American halfback Leroy Keyes' versatility will offset ND's Terry Hanratty-Jim Seymour air power ... giving the visitors' superior defense just enough leverage to carry the verdict.

The 40th Notre Dame-Purdue collision (the Irish hold a 23-14-2 edge) tops a full major college card that includes several other long-standing rivalries and some intersectional dandies.

Here's how we see the outcomes (with seven ties counted aganst us the early season hit-and-miss mark is 49-21 for a .700 pace):

Saturday Afternoon

Princeton over Rutgers: When these two gave the football its first Jersey bounce 99 years ago, Rutgers prevailed 6-4. Then the Princetons got their single wing off the ground ... and they've taken 50 of 58 meetings.

Florida over Florida State: If the Gators can get their teeth into Ron Sellers, State's pass-catching marvel, they'll rule the Everglades.

West Virginia over Pittsburgh: It will take the young Panthers another week to get over last Saturday night's 63-7 debacle at UCLA.

South Carolina over North Carolina: Fullback Warren Muir is running on the S.C. ticket ... and Strom Thurmond couldn't ask for more.

Kansas over Indiana: The Hoosiers hurried 80 yards in the closing minutes for a 40-36 nod over Baylor last week. This time the chariot will turn into a pumpkin before they can get home free.

Minnesota over Nebraska: The Gophers' opening tussle with mighty Southern California has toughened them for this bitter flatlands feud.

Michigan over Duke: Rambling Ron Johnson, stalled by California last week, should put the bite back in the Wolverines' attack.

Oklahoma over North Carolina State: The Wolfpack defenders tackle like their namesakes, but Oklahoma swifties Eddie Hinton and Steve Owens will lead them a merry chase.

Miami, Fla. over Georgia Tech: Tech's passer is (Larry) Agood but Miami's new running whiz is (Bobby) Best. And the Hurricanes can do even better ... All American defensive end Ted Hendricks.

Saturday Night

Arizona State over Texas-El Paso: After destroying Wisconsin 55-7, the Sun Devils should be able to cope with UTEP's aerial circus and take a giant step toward the Western Athletic Conference title.

Mississippi over Kentucky: The Wildcats' Dicky Lyons lowbridged Missouri last week, but Ole Miss will be a rougher river to cross.

Coach Tells Boosters Of Slaton Challenge

"They're tougher than that score with Lamesa indicates," Wayne Tyrone, Tiger Coach, told members of the Booster Club last night during their regular weekly meeting. He was speaking about Slaton — Friday night's District 3-AAA foe for the Tigers.

Although Lamesa won 34-0, Slaton played the Tors a good ball game and trailed only one touchdown at halftime and two touchdowns going into the final period.

Tyrone declared the Slaton Tigers have one of the better runners in the district in Richard Washington, a 190-pound fullback. He and halfback Nicky Farrell and quarterback Jimmy Williams were described as being fast. Williams, a good passer, likes to run with the ball after faking on the belly series.

"They (Slaton) have a good offensive line with sharp blocking," Tyrone continued. He said the Snyder Tigers had trouble defensing Slaton offensive plays during a lengthy workout yesterday.

Slaton employs an 8 - man front on defense.

Concerning the 48-0 Snyder triumph at Lake View last Friday, Tyrone said the Bengals gained confidence against the Chiefs and looked good. The films revealed that Bill Bilberry was outstanding on defense, and Eddie Ray McClain did an exceptional job on punt coverage. Punt returns by the backs accounted for two of the touchdowns with David McGinnis and Willis Harrison striking from long distance.

The Bengal mentor said punt returning has been a bright spot with the backs averaging about 30 yards per return, including the opener with Dunbar.

Efrain Cervantez, a 145-pound senior halfback, made a nice run on a perfectly - executed "crash play" except that a penalty for illegal motion nullified it. There were several individual mistakes with various linemen firing out too soon, but overall the Bengal performance, both offensively and defensively, was superior.

Coaches in the system gave reports on their various teams.

Vonnie Black, club president, reminded members that a pep rally is slated for Friday morning at the high school.

Cale Sacks Up Auto Cash

DAYTONA BEACH, Fla. (AP) — With two major races remaining, Cale Yarborough of Timmonsville, S.C., already has clinched the all-time season high for money won in National Association for Stock Car Auto Racing competition.

A second-place finish at Martinsville, Va., last Sunday ran his season total to $130,706.

That beat the previous high $130,275 won by Richard Petty of Randeman, N.C., ast year.

Four races remain on the 1968 schedule. The next will be a 250-miler Sunday at North Wilkesboro, N.C., for $22,675 in awards.

Then come two big-money races—500 miles at Charlotte Oct. 13 for $100,800 and 500 miles at Rockingham, N.C., Oct. 27 for $85,700.

The season final is 100 miles at Jefferson, Ga., Nov. 3 for $5,330.

Second in the year's money winning is David Pearson of Spartanburg, S.C., with $103,767. Lee Roy Yarbrough of Columbia, S.C., is third with $78,879 and Petty fourth with $63,202.

Pearson leads the point standings with 3,011. Bobby Isaac of Catawba, N.C., is second with 2,955 and Petty third with 2,712.

Charlie Fogs 'Em In There

OKLAHOMA City, Okla. (AP) — Left-hander Charlie Richard pitched a perfect game for the United States Tuesday to beat the Philippines 4-0 in the World Softball Championships.

Richard's winning game was the secon. no-hitter of the day. Mexico's Erick Voight hurled a no-hitter in beating New Zealand 1-0.

Richard struck out 15 batters and did not aow a ball out of the infield in seven innings.

Canada defeated Japan 2-0 to remain unbeaten, along with the U.S. team as the tournament entered its fourth day.

Canada has won four, the U.S. squad three. They are the only undefeated teams left in the 10-team field.

Fete For Rodney

AUSTIN (AP) — Rodney J. Kidd, who retired Sept. 1 after 30 years with the University Interscholastic League including 20 as league director, will be honored at a dinner Sept. 30.

Kidd joined the league in 1938 as athletic director and became director in 1948.

"His friends just wouldn't let him retire without a real honest tribute to all his accomplishments," said the new UIL director, Dr. Rhea Williams. A "This Is Your Life" slide presentation is planned for the dinner.

Kidd now works with the Texas Interscholastic League Foundation, an organization he helped form which seeks scholarships for the winners of UIL academic and literary contests.

Beginning in 1820 with Maria Hester Monroe, seven daughters of Presidents have been married in the White House. Grover Cleveland was the only President to marry there.

Test Your Skill... Win CASH PRIZES

HERE ARE THE RULES OF THE CONTEST

In each advertisement on this page you will find the contestants in a prominent football game being played in the country this week-end. Get an entry blank from one of the merchants who are helping sponsor this contest and whose message is on this page. Fill in your selection of the WINNING TEAM only . . . opposite the name of the firm on the entry blank. Then send your complete blank to FOOTBALL CONTEST EDITOR, THE SNYDER DAILY NEWS, Entries must be in the hands of the editor by 12 o'clock noon, Friday. Games ending in a tie score must be specified as a tie or else it will be considered a miss.

If there is a tie for first place the winners will divide the cash money of $12.50 and no second prize will be given. If there is a first place winner and a tie for second place, the second prize winners will divide the money for the place. If more than two persons tie for second place, no second prize money will be awarded and the cash will be added to next week's prize. Tie for perfect score will split $25.00. There will be fun for the entire family. Only one entry blank will be permitted from any one person. More than one will disqualify all of the person's entries. Scores listed on the entry blank will have no bearing on the choice of the winner. Sign your entry blank and list your address and phone number — and watch for the story on next Wednesday's front page for the winners. Hurry now, and get your entry blank from one of the merchants on this page. The contest blank must be in your own handwriting. Employes of The Snyder Daily News and their families are not eligible to enter.

A CLASSIC AUTOMOBILE that won't be upstaged, even by a beautiful girl, is Ford's 1969 LTD. This four-door hardtop leads off with a unique full-width recessed grille. The lower, longer car with a wider stance displays all-new design from front to rear. The 1969 Fords will be on display Thursday night at Wilson Motors in Snyder.

All-New Lines Highlight 1969 Ford Automobiles

Ford Division passenger cars for 1969 are highlighted by all-new Ford and Mustang lines, new performance - oriented Mach I and Cobra models, a luxury Mustang Grande, new engines and more comfort and convenience across the board. They will be displayed at the big preview showing Thursday night at Wilson Motors.

"Our 1969 Ford is an all new car from the completely redesgned body to the interier 'Better Idea of a Flight Cockpit instrument panel," said John Naughton, Ford Motor Company vice president and Ford Division general manager.

"Mustang for 1969 introduces two new models — the hot performing Mach I and the luxury car with sports car handling, the Grande.

"Economy, high performance and luxury are available in the Fairlane lineup which introduces a new series, the performance - oriented Cobra," Mr. Naughton said.

"A new grille and a new taillamp design highlight the 1969 front-to-rear Thunderbird modifications.

"The Falcon, Ford's economical family car, includes an optional 220 - horsepower engine," he said.

Ford's 21 models, with lower and longer exteriors and a wider stance for better handling, alalso feature a ned instrument panel, an energy-absorbing frame and new engine options.

XL and LTD models feature a new front end highlighted by a classic, die-cast, hidden headlamp grille.

Hardtops and convertibles have ventless side glass and the station wagon's Magic Doorgate, an original Ford "Better Idea," can now be opened like a door with the window up.

The LTD and the Country Squire station wagon come with a 302-cubic-inch-displacement, 220-horsepower V-8 as standard equipment. All other models feature a standard 240-c.i.d., 150-h.p. six cylinder engine. The 429-c.i.d. V-8 engine, introduced on the 1968 Thunderbird, is an added performance option.

Almost four inches longer and about half an inch lower and wider, Mustang's three veteran models are joined by two exciting new additions for 1969.

The Mach I, a fastback design Sports Roof performance model, is available with an optional 335-h. p. 428-c.i.d. Cobra Jet Ram-Air engine. The Grande is a super luxury model with custom car touches inside and out.

Outside, Mustang features a new grille constructed in a cellular design with a lowgloss black finish. Inside, Mustang has a four-pad instrument cluster set directly in front of the driver.

The car also contains more hip, shoulder and rear leg room as well as more room to enter the rear seat passenger compartment.

New Mustang engines include a new 4.1-litre (250-c.i.d.) six-cylinder, new 351-c.i.d. V-8s with two-and four-barrel carburetors, and the 428-c.i.d. four-barrel V-8 with and without Ram-Air induction.

Fairlane's 16 models for 1969 include the Fairlane, Fairlane 500, Torino, Torino GT and the hot new one — the Cobra.

All models have new grille and taillamp design.

The Cobra, available in hardtop and Sports Roof models, displays youthful lines and has extra handling characteristics and a hot 428-c.i.d. engine.

Still more luxury and more distinctive features unite with major ornamentation changes and engineering improvements in Thunderbird's three 1969 models.

Two - door Landau models provide a more formal appearance and more privacy for back seat passengers by eliminating rear quarter windows and adding wider rear roof pillars.

Thunderbird also offers a new grille and taillamp design and an improved braking system.

New options include an electrically - powered sun roof, an electrically-heated back window and a "headlights on" warning light.

Seven Falcon models add up to a complete line of smart, roomy and economical family cars. Highlights for 1969 include an optional 220-h.p. 302-c.i.d. V-8, a new safety steering wheel and new side-marker lights.

The Falcon line continues to feature clean, distinctive styling and offers more hip and shoulder room than mnay competitive models.

Coin Show Slated At Sweetwater

SWEETWATER — Nolan County Coin Club is sponsoring its third annual coin and wildcat show the weekend of Sept. 28 and 29. The new exhibit building of Nolan Couty Coliseum in Sweetwater will be setting for the show.

Space has been arranged for approximately 75 displays with 12 of those from out of the state of Texas. Reservations have been received as far away as Seattle, Wash., and the state of Pennsylvania.

Admission to the show is free and hours on Saturday will be from 9 a.m. until 9 p.m. and Sunday from 9 a.m. until 6 p.m.

Trophies will be awarded to the top three displays and ribbons will also be given. Judges for the show are Wilson Guest, Paul Cain and Nolan County Judge E. L. Duncan.

Ben Monroe is president of the host club and other officers include, J. V. Younger, first vice-president; Kirby Kinsey, second vice - president; Mrs. Benny Hobbs, secretary and Benny Hobbs, treasurer.

Marshall Voters Approve Sales Tax

MARSHALL, Tex. (AP) — Residents here voted Tuesday to approve a one per cent city sales tax.

City Secretary Donald Duncan the one-cent levy and 702 voted against it.

Cyclist Seeks Injunction Against Law

AUSTIN (AP) — A 1967 state law requiring motorcyclists and their passengers to wear helmets violates the United States Constitution and should be voided, a Dallas man says in a suit filed in 53rd District Court Tuesday.

Fred Biersdorf, a Dallas motion picture distributor, filed the suit against the Department of Public Safety and Atty. Gen. Crawford Marin.

The Dallas man seeks a permanent injunction forbidding the department to enforce the helmet law.

The law is a "deprivation of his personal and property rights, as well as a denial of due process," Biersdorf claims in his petition.

The Dallas man claims helmets reduce cyclists' ability to hear, send blinding sweat trickling into their eyes, reduce side vision and create vibrations which cause headaches and nausea.

Similar laws in Michigan, New York and Louisiana already have been held unconstituitonal, Biersdorf's suit declares.

The suit alleges the law denies a cyclist due process of law "by depriving him of his individual liberty in respect to the wearing apparel he might choose to effect while riding a motorcycle."

The suit alleges a provision in the law allowing policemen to stop cyclists to inspect their helmets permits "indiscriminate deprivation of the plaintiff's liberty by and all police officers."

CAREER CORNER

By F. J. LAIN

Miss Lain awards a new Mercury portable, courtesy of the Royal Typewriter Co., to Kevin Black, Annadale, Va., for his request:

"I'm a senior in high school and would like to know about the career opportunities offered by NASA."

A —My thanks to Grove Webster, director of personnel, National Aeronautics and Space Administration (NASA) for his helpful comments on the Civil Service area of aerospace technology.

NASA IS THE CIVILIAN SPACE AGENCY in charge of all non-military space flight projects. From its Washinton, D.C. Headquarters, NASA operates research centers, space flight centers and auxiliary installations throughout the country, including the famous Manned Spacecraft Center in Houston, Tex.

ALMOST HALF OF ALL NASA PERSONNEL are technical men and women — scientists, engineers, supporting technicians and craftsmen. (The remained of NASA employes are engaged in diverse functions from administrative to clerical, too varied to detail here; see suggested resources below.)

NASA SCIENTISTS AND ENGINEERS ARE THE CREAM OF THE CROP, recruited from the best in national brainpower. They enjoy not only public esteem and the chance to work with some of the most brilliant minds of this century, but are receiving increasingly better salaries and fringe benefits as well. Job security is excellent at the upper technical levels, although changes in Federal expenditures cause fluctuations in the number of new employees hired. Right now, in fact, a reduction in NASA's budget has forced a temporary employment cut-back.

HIGHLIGHTS OF NASA TECHNICAL CAREER SPECIALTIES include SPACE SCIENCES: investigation of atmospheres and space phenomena; FLUID AND FLIGHT MECHANICS: establishing criteria for aerospace vehicle design and flight; MATERIALS AND STRUCTURES: production of aerospace vehicle structures; PROPULSION SYSTEMS: arranging for fuel or power for flight; FLIGHT SYSTEMS: reliability studies, systems integration etc.; MEASUREMENT AND INSTRUMENTATION SYSTEMS: includes tracking systems, telemetry, radio, optical and mechanical systems; DATA SYSTEMS: mathematical and numerical computing of data.

Other specialties are EXPERIMENTAL FACILITIES AND EQUIPMENT; RESEARCH PILOTING: piloting of space vehicles and aircraft, and ground simulation of advanced missions; LIFE STUDIES: envir, onmental stresses upon living organisms and systems; EXOBIOLOGY: research on the nature and origin of life in the universe; MAN - MACHINE SYSTEMS: man's stresses in a man-machine flight system.

SALARY SCALES ARE UP TO MEET COMPETITION FROM PRIVATE INDUSTRY. As of March, 1968, representative minimum rates of pay for physical science, engineering and mathematics positions are: GS-5, $7,436; GS-12, $12,580; GS-15, $19,780. Other leves have been similarly boosted.

EDUCATION. A bachelor's degree is the minimum for scientists or engineers and the better jobs require a master's or doctor's degree. Some 30 different coege degree fieds are represented. Typical engineering majors are aerospace, electronics electrical, chemical, nuclear, mechanical and industrial. Scientists frequently are physcists, mathematicians, chemists, metallurgists, phycologists, physiologists and astronomers.

SUGGESTED RESOURCES. "NASA, 20th Century Explorer," Civil Service Announcement 347-B covers educational requirements and professional - level career opportunities. A copy may be had for the asking; address inquiry to NASA Headquarters, Code BPM, Washington, D.C. 20002, you may or St. Louis, Mo. 63105. Sorry, no der "Aircraft Missiles and mail answers can be given. Any Spacecraft Occupational Out- Snyder Daily News reader whose look Reprint 1300-B for 10 cents. letter is the basis of a future NEXT: JOBS FOR VETER- column will receive a free Roy- ANS at Mercury portable typewriter.

BUT THIS IS NO MYTH!

NO MATTER WHO WINS VOTE

Tax Reforms On The Way

By JOHN CUNNIFF
AP Business Analyst

NEW YORK (AP) — No matter which party wins the coming elections, tax reform will be one of the big issues of 1969. In fact the arguments are expected to begin shortly, although some say it's hard to say when they ever ended.

By the close of the year President Johnson must offer his recommendations on the subject, which involves not just billions of dollars and millions of pages of decisions, but almost as many points of view as well.

So complex have taxes become that entire businesses today are built on printing, interpreting and advising how best to use the laws, and the legal and accounting professions have bred mutations adapted only to the tax world.

But tax reform is expected to be concerned as much with inequities as with complexities. This much was indicated here last week by Treasury Secretary Henry H. Fowler in a speech before the National Industrial Conference Board.

Fowler indicated that the administration is especially concerned about the tax burden on the poor compared with "the serious problem of those taxpayers with very high annual incomes who make little or no contribution."

This suggests that a very heated discussion of the negative income tax might be on the schedule. This proposal, which has adherents and enemies of every political leaning, would pay money to those who earn a poverty income.

The discussions also will involve the manner of collection and distribution of tax money. Tax sharing, in which the federal tax collectors would turn part of their revenue over to the states, will be very much an issue.

Distribution of federal money to other governmental units now is through the medium of grants tied to specific projects. Some critics believe the money should be turned over with no string hanging, to be spent as the local unit decides.

This, they say, would permit greater freedom and autonomy for local governments and would help solve their rising costs, which under existing tax laws often cannot be met. Worthwhile local programs often die for lack of funds.

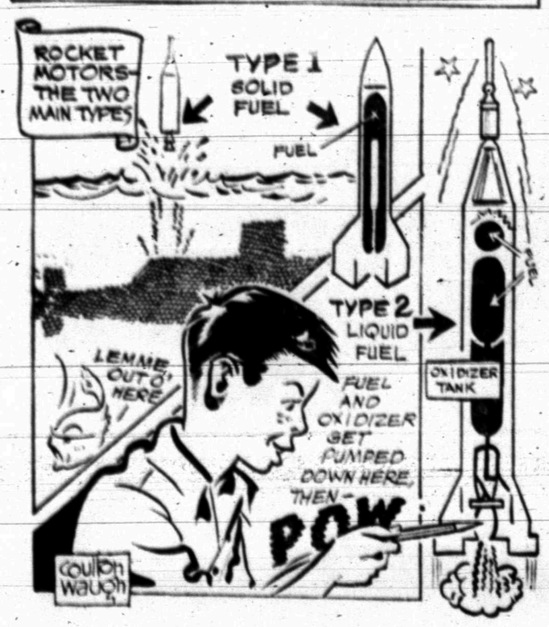

Expansion of tax sources could be a major issue.

For years tax experts have been studying means of obtaining revenue from sources other than incomes. The present income tax ranges up to 77 per cent on personal income and nearly 53 per cent on corporations, which are high compared with other industrial nations.

The answer lies in the source of American tax money. Except on the local and state level, where real estate and some other taxes are high, the greatest amount of American tax revenue is from income. This is not so in many other countries.

Increasingly popular in Europe are indirect taxes, excise and sales taxes and levies on the value added to goods as they move through the production process to their final emergence as finished products. A similar tendency could develop in the United States.

Junior Editors Quiz on ROCKET ENGINES

QUESTION: *How do rocket engines work and why are there different stages?*

• • • •

ANSWER: Rockets work by the same principle as jet engines: fuel is burned inside a combustion chamber with an open end, out of which exhaust gases rush. The force pressing to the rear escapes, which frees the force in front, so that it pushes the jet or rocket ahead. Jets need outer air, but rockets carry their own oxygen supply. Our picture shows the two types of rocket fuel used, solid or liquid. In type (2), the fuel and an oxidizer are carried in separate tanks, but pumped together when needed and ignited. Rockets of this type, when used for putting satellites into orbit or exploring space, are built with several sections or stages, each complete with its own motor. These are necessary to keep boosting the rocket through enormous distances. The first stage, at the base of the rocket, blasts it off from earth; then this part falls off. The second stage fires its motors and pushes the rocket still further. The third stage may release a satellite, or perhaps a device to coast on and land on the moon.

(Charles Muniz of Pueblo, Colo., wins a prize for this question. You can win $10 cash plus AP's handsome World Yearbook if your question, mailed on a postcard to Junior Editors in care of this newspaper, is selected for a prize.)

Middle Age Can Also Be Enjoyed

By HAL BOYLE

NEW YORK (AP) — Middle age is something like the weather—or the state of the Union. Everybody talks about it, but very few do much about it but criticize.

This is very odd because, in the case of middle age at least, something positive can be done about it. For one thing, it can be enjoyed.

There is no particular reason for regarding middle age as a burdensome doom inflicted by a vengeful fate. Taken gradually and in small doses, it can be as helpful as any other medicine.

What possible advantages does middle age have? Well, here are a few:

More than at any other time of life, your feet feel so wonderful when you take your shoes off at the end of the day.

Acne is no longer your biggest social worry.

It is no longer necessary for you to develop new prejudices; the ones you have already acquired will do you nicely the rest of the way.

Of course, you can still risk your neck going skiing if you choose to, but you can get most of the exercise you want merely by pushing yourself away from the table and putting on and taking off your bifocals.

Uncle Sam no longer wants you for the battlefront, but your wife still rather likes to have you around on the home front.

Your over-all health improves as your stomach is now too bad to let you indulge in the wild drinking and eating habits of your youth.

No one expects you to set the world on fire, as they can see at a glance that you're getting short of matches.

There is now a reasonable possibility that you'll finally pay off the mortgage on your home before the roof caves in.

It is about as much fun studying travel folders and reading about faroff places as it would be to visit them—and you escape the nuisance of having to pack, go through customs and worry about how much to tip the natives.

Anytime anything excites you too much you know that if you simply take a couple of aspirin tablets and lie down for a while the feeling will soon pass away.

Girl watching remains a pleasant pastime, but is no longer an industry with a man. He can indulge in this popular hobby and stay an innocent bystander.

Fewer things upset you by catching you completely by surprise. You are wise enough to have learned that in life anything can happen—and sooner or later will. Experience has become a cushion that softens most blows.

Life brings an intenser delight in small occurences—meeting an old buddy unexpectedly, growing a bigger tomato in your garden than a neighbor can, quietly adding another beautiful sunset to your mental memory book.

Finally, the biggest bonus that middle age brings is a capacity to be grateful—a gratitude for being able to share in the great mystery of life itself, which unknowing youth so crassly takes for granted.

Eggers To Tour East, Gulf Coast

AUSTIN (AP) — Paul Eggers, Republican candidate for governor, said Tuesday he will concentrate his campaign this week in East Texas and the Gulf Coast area.

The GOP candidate will be in Lufkin and Tyler today and will ho a news conference Thursday in Austin.

Eggers said Friday's schedule calls for stops in New Braunfels, Corpus Christi and the King Ranch, near Kingsville.

Saturday, California Gov. Ronald Reagan will be the featured speaker for an Eggers airport rally in Dallas, he said.

The candidate will be in Bryan Sunday.

Ancient Romans played a game similar to soccer. So did the Chinese, Aztecs and Polynesians.

New Styling For '69 Buick Autos

Buick Motor Division introduced its 1969 line of cars with completely new styling for LeSabre, Wildcat and Electra models and featuring such mechanical innovations as a revolutionary new suspension, a new three - speed automatic transmission and variable ratio power steering.

The new line, which has a total of 36 models, will go on display tomorrow at Snyder Motor Co.

"While the styling of our 1969 models is new and fresh, we still have maintained the traditional Buick theme which makes our cars instantly identifiable," said Robert L. Kessler general manager of Buick and vice president of General Motors. "The sculptured sweepline down the side has been restyled with an exclusive design for the Electra 225 which distinguishes it from LeSabre and Wildcat models."

One of the most notable changes in the 1969 Buicks is the elimination of the window vents on all models in the upper series cars and on all two-door hardtops and convertibles in the Skylark and GS models. This improves visibility and reduces wind noise.

Engineering changes include an anti - theft ignition lock located on the steering column, which locks the steering and transmission lever as well as the ignition: "60-40" front seats in some Electra models and a new dual action tailgate which is standard on Sport Wagons.

The "60-40" front seat, which is standard on the Electra Limited and optional on the Electra Custom, consists of a split seat with 40 per cent allocated to the driver and 60 per cent to the front seat passengers. Each section is adjustable.

The new dual action tailgate, which has a built-in bumper step for easy entrance to the cargo area, also is offered as an option on Special Deluxe station wagons.

Variable ratio power steering is standard on all Electra and Riviera models and optional on the Wildcat. This makes possible faster steering for parking maneuvers and tight city corners without compromising the smoothness of steering response on the open road.

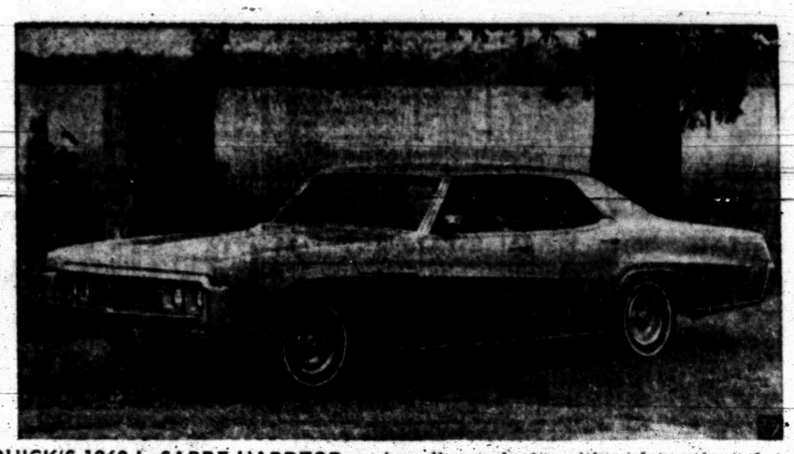

Another inovation for 1969 is the introduction of the electric fuel pump on the Riviera. This new pump is integral with the fuel gage in the gas tank and supplies fuel to the carburetor in liquid form for better performance during hot weather operation.

Buick's famed sculptured sweepline, which has proven so popular the last two years, has been retained for 1969 with new styling that distinguishes the Electra from the ther series.

The new sweepline on Electra models curves up over the front wheel housing and then slopes gently to the rear bumper in a straight, unbroken line, giving the car a longer look.

The sweepline on Wildcat and LeSabre models also curves up over the front wheel housing and slopes back to a point just in front of the rear wheel where it gradually fades out. A second sweepline then curves up over the rear wheel housing and slopes back to the rear bumper. Six vertical paint stripes behind the front wheel and just above the rocker panel identify the Wildcat from the LeSabre. LaSabre models are identified by the three ventiports on the front fender.

All models have distinctive new grilles, new bumpers and new taillight designs.

BUICK'S 1969 LeSABRE HARDTOP — An all-new body with safety-oriented interiors, along with a new suspension that provides better handling characteristics, and a new sculptured sweepline are features of Buick's LeSabre series for 1969. In the four-door hardtop shown here, the new front and rear wheel opening moldings and the rocker panel molding accent the new lower styling of the LeSabre. Side window vents have been eliminated to improve visibility and reduce window noise. New bumpers, grilles and lamps complete the LeSabre styling for 1969. Buick's 350 cubic inch V-8 engine with two barrel carburetor is the standard power plant for LeSabre models.

House Members Anxious To Begin Campaigning

WASHINGTON (AP) — House leaders are telling restless members, itching to get home, for the campaign that there will be plenty of time for electioneering if they only put in a few days hard work on the floor.

The word is out that the House is ready to work only on a few major matters for a day or two a week, and take the rest of the time off.

The Senate still faces action on the nomination of Abe Fortas to be chief justice and the nuclear nonproliferation treaty which may be put over until the next Congress. But House leaders have decided their chamber can limit its work to conference reports, one remaining appropriation bill and, if committees act promptly, one or two other major measures.

So, if the Senate drags out the session, the House will start taking official recesses instead of playing hookey.

Partly because of Jewish Holy Days, partly because of campaign demands, the House came up short of a quorum Monday.

On Tuesday leaders didn't even let the question get to a count. They adjourned 10 minutes after convening.

The Senate Tuesday was able to put in a day's work when 67 of its 100 members showed up. This was a distinct contrast to Monday's Senate performance when it took more than two hours to round up a quorum.

However, the harder it is to keep a quorum. After all, every seat in the House comes up this year, as it does every two years, to be filled. Only a third of the Senate seats are contested every two years.

Advertising contributed for the public good.

No Texans Among Killed In Action

WASHINGTON (AP) — Forty-four servicemen killed in action in the Vietnam war were identified Tuesday n a Defense Department casualty list.

None of them were from Texas.

Missing in action:

Army

Pfc. Walter H. Fennell.

Air Force

Maj. Charles F. Kuhlmann.

Died not as a result of hostile action:

Army

Sgt. Eugene Smith, son of Mrs. Julia B. Chavis, 2309 Dowling St., Houston.

Missing not as a result of hostile action:

Army

Pfc. Roy L. Henley.

Panel Tackles Equal Time Bill Again

By ROBERT A. HUNT
Associated Press Writer

WASHINGTON (AP) — The House Commerce Committe called up the equal time bill today amid faltering hopes that congressional action can be completed in time for television debates between the presidential candidates.

Even if the measure finally is shaken loose from committee chances for debates this year appear slim unless Republican Richard M. Nixon recants repeated declarations he will not take part in a debate involving third-party candidate George C. Wallace.

The bill still must be debated on the floor by a House that is finding it increasingly difficult to get enough members together to do business.

A similar measure suspending equal time rquirements was passed in 1960, making possible the historic debates between Nixon and John F. Kennedy. That bill, however, passed the Congress in plenty of time for the first of the four debates to be held Sept. 26.

The current bill, now modified to include provision for Wallace to be part of any debates between Nixon and Democrat Hubert H. Humphrey, almost made it to the floor last week.

A Republican-backed parliamentary move blocked it. Democrats suggested the Republican action was tied in to Nixon's stated position.

The Senate has passed a suspension bill. The House Commerce Committee approved this measure with only a minor change but then, last week, backed up, reconsidered the earlier action and accepted an amendment directly relating to Wallace.

The equal time requirements say broadcasters who allow time to a candidate must provide equal opportunities to all others competing for the same office. The proposed suspensions relate only to the offices of president and vice president for the 1968 campaign.

Should one of the candidates refuse an invitation from a network, the way would be clear for the others to continue on the same program.

BIRTHS

Mr. and Mrs. Lorenzo Rodriquez, Fifteenth St. are the parents of a 7 lb. 1 oz. baby boy born Sept. 24 at 9:05 a.m.

An 8 lb. baby boy was born Sept. 24 at 12:56 p.m. to Mr. and Mrs. Lawrence Lewis, 1809 Ave. S.

Snyderite's Father Dies Tuesday

O. C. Yorgesen, the father of Russell Yorgesen, Snyder CPA, died at 5 p.m. Tuesday at his home in Othello, Wash., following a lengthy illness.

Rites will be held there at 1 p.m. Thursday.

When you stack one U.S. Savings Bond on top of another, it becomes a habit that's tough to break and hard to beat. That's because it's so painless. Just tell your employer or banker to set aside a regular amount from your paycheck before you have a chance to spend it. Sign up today.

Civilians May Soon Benefit From New Super Spyglass

By RALPH DIGHTON
AP Science Writer

LOS ANGELES (AP) — International espionage has some new electronic spyglasses which not only turn night into day—they pierce camouflage and clouds and even see into tunnels under yards of dirt.

This technique, called remote sensing, uses ever-present waves of energy—electromagnetic radiations and sounds—beyond the range of human eyes and ears.

With remote sensors, a high-flying plane can spot missile silos, tunnels and caves likely to be used for munitions storage 50 to 60 feet below the surface.

Satellites 100 miles up can track a convoy at sea through clouds and at night, and deduce the number and size of its ships from their wakes.

Soon the yield of a nation's farms, even the haul of its fishing fleets, can be forecast accurately months in advance. Such intelligence could be invaluable in a cold war, showing a powerful country where to apply economic pressures on a weaker neighbor.

Military sources are still mum about many of these intelligence-gathering devices, but conclusions can be drawn as adaptations of them are released for civilian use.

Chief among the active sensors are radar and sonar. Radar, which uses microwave frequencies just above the radio-television broadcast bands, works in air and space but not in the ocean. Sonar utilizes sound waves, the only effective communication through water.

Among the first of the lightweight, passive systems developed were infrared—IR—detectors, sensitive to heat given off in varying degrees by different objects.

Recently a new type of sensing has been developed which bridges many gaps in espionage technology.

The technique employs extremely sensitive microwave radiometers, which measure radiations of slightly higher frequency and shorter wavelength than radar.

All materials emit microwave radiations, but the frequency and strength vary from one material to another. Thus every material has a distinctive radiation "signature."

In a cross-country flight at 40,000 feet, a U.S. Space Agency plane carried a radiometer that mapped rivers, forests, freshly plowed fields and cities—regardless of local weather conditions.

Tal Falco of Aerojet-General Corp.'s space division, which made the device, says a major nonmilitary application is detection of subsurface moisture.

"Since we are dealing with emissions from the soil itself, not with reflections from its surface, we can find water in places which may be dry and crusty on the top," he said.

"This means we can predict what yield a farmer can expect because you get optimum crops from naturally moist soil."

The oldest form of remote sensing is, of course, visible light—but even here almost incredible advances have been made.

Sharp lenses and fast films, unavailable on the commercial market, have made it possible for satellite cameras to see tire tracks on a dirt road—on a clear day.

Computer enhancement techniques have been used to improve photographs of the moon and Mars sent back by spacecraft. The computer scans a photograph, records what it sees on tape, then goes back over the tape and eliminates blurs and streaks.

One of the most powerful forms of visible light—the beam emitted by a laser—soon may extend man's vision under water to 1,000 feet, five or six times farther than ordinary light penetrates.

A laser system under test for the Navy by Electro-Optical Systems, Inc., uses a blue-green light which the firm says sees smaller objects over a greater distance than sonar.

Hooked to a television screen, the device provides a visible picture of any target within range and can be used for mapping the ocean floor, avoiding collision with other submersibles or for search and rescue operations.

The system reduces the glare, or back-scatter, of light under water by range-gating. This process calls for transmitting a series of brief pulses of light—20 billionths of a second. By computing the time the light takes to go to the target and return, the recever can be set to accept only the light that has traveled the required distance.

An air-borne device recently released for civilian use and made by TRW, Inc., is the WISP—Widerange Image Spectrophotometer—which senses infrared and ultraviolet as well as visible light.

Its widest nonmilitary application, the makers say, is in sensing the green substance called chlorophyll in the one-celled plankton on which fish feed.

Detection of broad green areas in the ocean is almost certain to mean a good haul for fishing fleets sent there.

WISP's sensitivity to colors is so acute it can tell plastic leaves from natural foliage—an advantage in spotting camouflage—and detect some crop diseases such as rust before they can be seen by a farmer walking through his field.

A heated political campaign was underway in Milwaukee when the typewriter was perfected in that town. Christopher Sholes, one of the inventors, was the first man to pick out "Now is the time for all good men to come to the aid of their party."

In Norway and Sweden, skis 4,000 to 5,000 years old have been found.

By ABIGAIL VAN BUREN

DEAR ABBY: My son is being married soon. Two years ago, his father and I were divorced, and his father is now married to the woman he has been playing around with for the last 5 years.

Under the circumstances I feel that my husband's new wife does not belong at our son's wedding.

My son and his fiancee feel that now that father finally married this little homewrecker, she should attend the wedding.

I am considering asking them to make a choice. If they want me at the wedding, father's wife can stay home. If they want her, I'll stay home. What is your opinion?

WAITING

DEAR WAITING: If its common knowledge, and not just your opinion that father's wife is a "homewrecker," she doesn't belong at your son's wedding. Don't punish the young couple, however, by giving them a choice. Go and be a lady. If father's wife insists on going, to, it is she who may have difficulty holding her head high.

• • •

DEAR ABBY: I am a 14-year-old girl, and my best girl friend is worrying me to death. She is also 14, but she is very developed (physically) for a girl her age. She looks like about 18. She told me that for the last 3 months a 19-year-old boy has been coming over to her house to see her in the evening while her parents are at work. Her parents don't even know this guy exists. She tells me that all she wears when he comes over is a BIKINI bathing suit, and there is no place to swim within 5 miles of her place, so you know as well as I that this can mean big trouble.

I keep telling her to be careful, but she says nothing has happened so far, and nothing will.

What can I do to prevent trouble? I can't tell her mother because her mother will probably tell her how she found out, and my girl friend will never speak to me again. Sign me,

WORRIED

DEAR WORRIED: Tell YOUR mother. She'll know what to do.

• • •

DEAR ABBY: I have been married for 2 years and have no children. Because I have no children, my friends, relatives, and neighbors think I am the perfect baby-sitter. I love children, and I don't mind baby - sitting in an emergency and I never charge for my services.

Is there a nice way to tell these people to find somebody else? I am sick and tired of being used. One girl actually drops her child off at my house without even asking me first. Many times my own plans have been ruined because parents don't come back to get their child when they say they will. Thank you.

M. R. H.

DEAR M. R. H.: No one can "use you" without your cooperation. And if you are "used" once by inconsiderate, nervy acquaintances, shame on them. But if it happens twice, shame on YOU

WWI Veterans To Meet Thursday

Members of the Carroll Porter Barracks No. 1738, Veteran of World War I, and their Ladies Auxiliary, will meet Thursday evening.

The session is set for 7:30 p. m. in the American Legion Hall, located at Avenue T and Twenty - first Street. Refreshments will be served and members are urged to attend and bring guests.

The formal title of the wood duck, aix sponsa, a hybrid of Greek and Latin, means "waterfowl in wedding raiment."

Uproar At Opening Of 'Cuban Thing'

By WILLIAM GLOVER
AP Drama Critic

NEW YORK (AP) — "The Cuban Thing" is a play that really doesn't deserve the uproar that surrounded its opening Tuesday night at Henry Miller's theater.

Judged strictly on dramatic value, it is just bad stagecraft, a self-defeating botch.

Outside the playhouse, a small, vocal throng protesting the script's presumed ideological slant provided a recurrent noisy background for the performance.

Inside, a couple of spectators were ejected soon after the performance began. Three others, loudly expressing displeasure, stormed up an aisle just before the final curtain.

Six persons were seized during the demonstrations.

Helmeted police stood guard along the block but there were no tear-gas bombs such as disrupted a preview performance last Thursday. Just as a precaution, the audience was kept indoors during the intermission and supplied with free orange juice.

As spectators emerged after the show they were greeted with hoots and catcalls from across the wooden barricades.

Hardly anything that happened onstage in the play written and directed by Jack Gelber was as interesting.

The script, jerkily interspersed with newsreels and scratchy recordings, tries to span from the incipient rise of Fidel Castro's revolution in 1958 to personal and public problems in the island nation of 1964.

Second Son Born To Princess Beatrix

AMSTERDAM (AP) — Crown Princess Beatrix gave birth today to her second son, giving the Dutch throne a second male in the direct line of succession.

Both the 30-year-old princess and her son are in excellent condition, a medical bulletin said, although the delivery was by surgery.

Beatrix's first child, Prince Willem Alexander, was born on April 27, 1967, and was the first male heir to the throne born since 1650. Holland's last king, Willem III died, in 1890, and was followed on the throne by his daughter, Wilhelmina, and present queen Juliana, Wilhelmina's daughter and Beatrix's mother.

OLDSMOBILE'S 1969 DELTA 88 ROYALE — Oldsmobile for 1969 has simplified its medium price class lineup. All series in the 88 family will be known as Delta 88's and will include this newly-created top-of-the-line Delta 88 Royale.

Oldsmobile Autos Restyled For '69

Oldsmobile for 1969, is introducing completely restyled 88's and 98's, a longer and sleeker Toronado with a major change in rear end appearance, and power train improvements designed for greater economy and performance in F-85 models. They go on display tomorrow at Snyder Motor Co.

These styling and engineering advancements, as attractive as they are, compete for the customer's attention this year with a wide range of new safety-related product improvements," Harold N. Mezel, the division's general manager and a vice president of General Motors, announced today.

He said they included side impact bars inside the doors of 88's and 98's, a more uniform rate of energy absorption in all Oldsmobile steering columns, head restraints as standard equipment, larger rear view mirrors, and a sloping interior header bar from roof to windshield to reduce the likehood of head injury in case of accident.

"Styling changes in every 1969 Oldsmobile," he continued, "enhance their traditional appearance of top quality and emphatically designate series identification. Interior appointments are designed to stress luxury and elegance to a previously unmatched degree.

"From a marketing standpoint," Metzel said, "Oldsmobile has further simplified its medium price class lineup. All cars in the '88' family are Delta 88's. These cars with wheelbases increased to 124 inches are richly designed, longer looking and have more truck room. They include the Delta 88, the Delta 88 Custom, and a newly - created top - of - the - line hardtop coupe the Delta 88 Royale.

"This elegant new 88 has a distinctive backlight, chromed front fender side louvers, identifying hood ornamentation, a vinyl top as standard equipment, and several other distinguishing features including its own exclusive exterior paint striping," he explained.

"The new 1969 Oldsmobile 98's also have been completely restyled," Metzel said. "Wheelbases have been increased to 127 inches. They are longer looking cars with longer hood, longer rear deck, and greater luggage capacity. The new 98 hardtop coupe particularly exemplifies these qualities. The increasingly popular 98 Luxury Sedan has been expanded to two models for 1969. Previously available only in a 4-door pillar version, Oldsmobile in '69 is offering a companion car, identified as the 98 Luxury Hardtop Sedan."

An optional feature in this automobile is a divided front bench seat with independent controls for driver and passenger positioning, representing a significant comfort improvement for front seat passengers.

"The 1969 Toronado, lengthened 3½ inches, displays a dramatically redesigned rear end. It is extremely clean-tailored and involves a new deck and rear quarters.

"The Toronado interior is richer and the Toronado ride has been further improved to better absorb road irregularities without any sacrifice in handling," he added. Other product improvements include a more conveniently located ash tray for the driver, and a rotary latch on the glove box door. Optional on this car is the electrically heated rear window defogging system which Oldsmobile introduced last spring.

"The new Oldsmobile F-85's, including the Cutlass, Cutlass Supreme, 4-4-2 and Vista Cruiser models, have undergone just the right degree of change — front, rear and interior — to achieve a sportier look combined with the high quality detail for which the young family of today is shopping," Metzel said.

Oldsmobile's high-performing 4-4-2 becomes even more distinctive in 1969, aided in part by a special rally hood paint scheme replacing the previous side rally stripe.

Among major engineering advancements by Oldsmobile in 1969 is the expansion, on many F-85 models, of the power train philosophy introduced on full-size Oldsmobiles in 1968. This has been accomplished by combining an all-new 3-speed automatic transmission with a lower 2.56-to-1 axle ratio, resulting in performance and fuel economy gains.

This new Turbo Hydra-Matic 350 transmission, functionally the same as the Turbo Hydra-Matic 400 available in full-size Oldsmobiles, is smaller and lighter to meet the torque requirements of the 350 cu. in. engine.

Front vent windows are eliminated on all 88's, 98's and F-85 hardtop coupes and convertibles. An upper ventilation system like that first introduced on the Toronado in 1966, has air outlets in the ends of the instrument panel. It provides quiet draft-free ventilation.

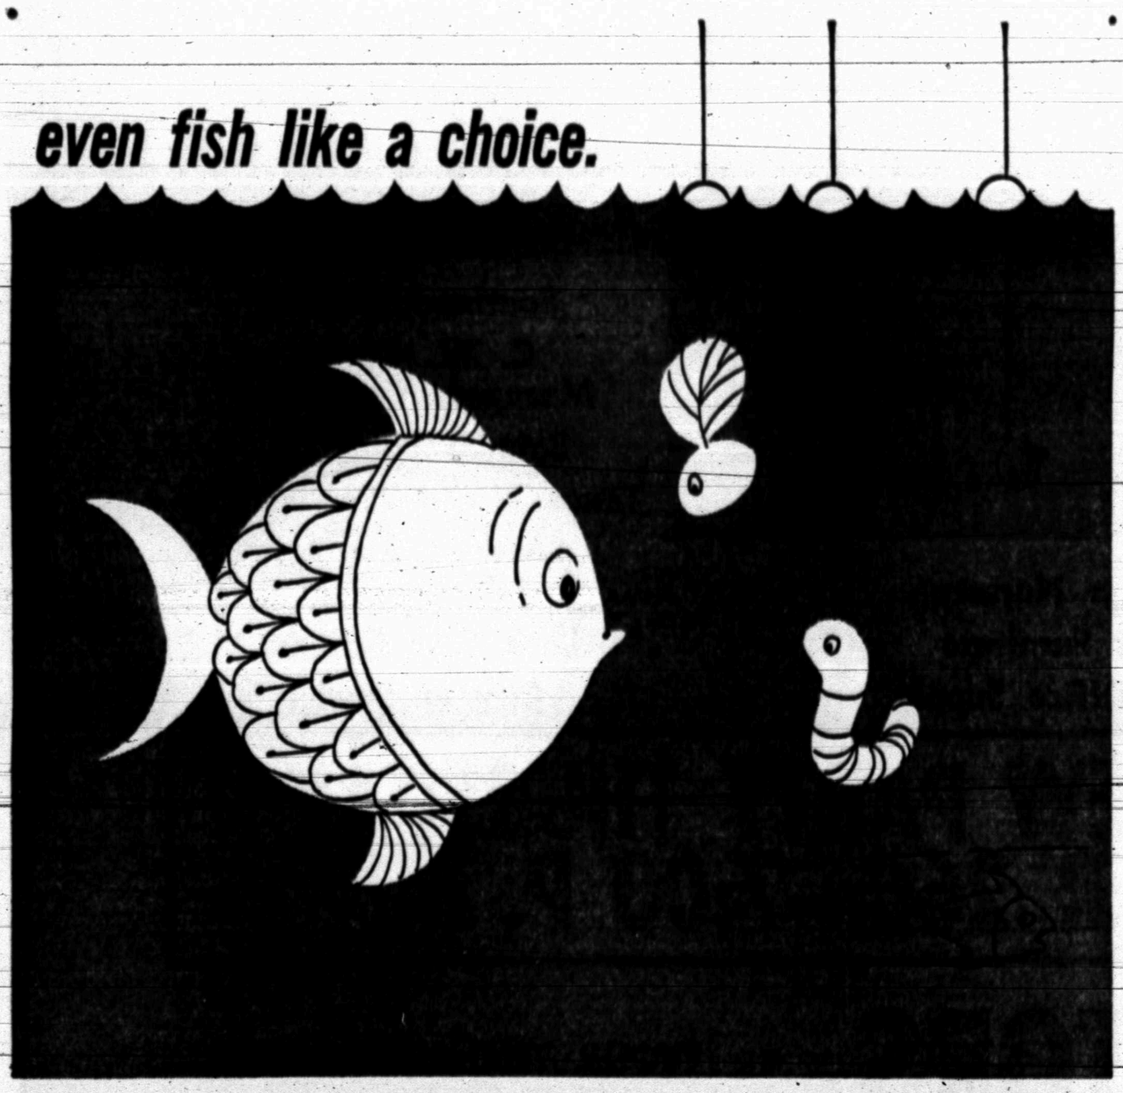

In the area of safety-related product improvements, Oldsmobile 88's and 98's are equipped with side impact bars along the inside of car doors to reduce the hazard of side impacts.

Another new safety improvement for 1969 is the redesigned energy-absorbing feature built into the steering column. Instead of the 'Japanese-lantern' type of collapse used in 1968, the new device uses ball bearings between tubes.

even fish like a choice.

Pardon us for carping on a tired subject, but anybody likes a choice. Fishermen will tell you even the finny tribe wants variety. And we think people deserve better than that!

So it behooves us all to keep advertising alive. For as advertising flourishes so flourishes competition. And where there's competition, you, the consumer, fare better. And that's no fish tale.
