

Added Curricula Lends Prestige To Fair Program

New Features Include One
Mile Parade and More
Premiums for 1929

Legion Boys Enter

Premiums Are Increased
This Year; Prices
Are Same

Plans for making the Collingsworth County Fair of 1929 the most successful fair that the community has ever known are now under way according to the announcement of Bill Goforth, fair manager. Added features for this season are a one-mile parade to be staged on the opening day, the county baseball tournament, and a larger list of premiums than is customarily offered. Many organizations are now preparing to enter the one-mile parade.

Legion To Enter Parade

Members of the American Legion at a special meeting, called on Monday night of this week, decided definitely to enter the one-mile parade to be held the first day of the Collingsworth County Fair, Thursday, September 12. The boys say they are going to recall the days when they rode the box car labeled, 40 hommes and 8 chevaux (40 men and 8 horses). Committees were appointed to make the final arrangements and the American Legionnaires say that they are going to leave nothing undone when they attempt to show the people just a slight repetition of the days "over there."

Lee C. O'Neil, Col. R. E. Sammon, Guy E. Clay, Johnnie Payne, and Dee Fulton have been appointed as committee to make the final arrangements.

\$2,500 Offered In Premiums

With several additions made to the list of premiums offered at the fair of last year, it is expected that more interest than usual will be concentrated on the livestock and agricultural exhibits for 1929. As usual the divisions have been made and premiums will be paid on articles and animals which win; and have ribbons of: Royal Purple, Championship; Blue, first; Red, second; White, third. Spaces will be allotted to exhibitors who apply to the secretary and pay an initial fee, these spaces will be decorated at the expense of the exhibitor.

School Day To Be Observed

The second day of the Fair has been set aside as school day and will be observed as such by the people and management of the fair association. On this day the children will be allowed to attend the fair free from entrance charges at the gate. As usual the features for the afternoon will be shown in front of the grandstand and the rural baseball contest will be added for the entertainment of the school children. At all other times the following admission prices will be observed by people who attend: season tickets, adults, \$1.50; season tickets, children (6 to 12 inc.), \$1.00; general admission, adults, \$.50; general admission, children, \$.25; automobiles, general admission (day) \$.50; automobiles, general admission (night), \$.25.

Saleslady From Indiana Is Here

Mrs. Fred Marvin of Indiana has been placed in charge of the ready-to-wear department of the C. G. Bower Dry Goods store, according to an announcement made this week by Mr. Bower. Mrs. Marvin is an experienced saleslady having worked in the department stores in the middle western states for a number of years. She is thoroughly familiar with ladies ready-to-wear, and will be able to help the women of Wellington in selection of smart fall attire.

Mr. Bardell of Colorado made a speech from the band stand Monday and explained the process of filing on land in that country.

New Mexico Editor Likes The Leader

Here is what H. A. Lanzer, editor of the Roosevelt County Herald thinks of The Leader. He writes:

"I have recently had the pleasure of looking over several copies of The Wellington Leader and was pleased to see such a neat paper, with a splendid make-up and ad display. I am writing now to find out if you will exchange copies each week."

Local Ginners Attend Cotton Meet in Quanah

Standardization of Prices
And Ginning Methods
Are Discussed

With almost a hundred West Texas ginners present, prices of ginning for the coming year and methods of handling the cotton crop of 1929, were the chief subjects at their annual meeting, held at the court house in Quanah Friday.

To this date there has been no especially important meeting of the ginners in the Panhandle for the purpose of forming a closer union, establishing standard prices and means of handling their products. Ginners from several localities have constantly insisted that such a meeting be held each year, but this is the first time that any solid organization has been formed, which will meet annually for such a purpose.

The organization is composed of the independents and cooperative ginners of the community who are developing a plan, through which they may work together with more success and maintain better ginning and standard prices for each local community. George Simmons and G. A. Vestal presided over the meeting in Quanah.

Ginners from Wellington who attended the meeting are R. C. Dryden, J. A. Coleman, Bill House and Paul Starr.

Little Over Half Births Registered

Census Enumerators Say
Only 63 Percent Babies
Are Registered

According to figures from data secured by the scholastic census enumerators and checked with the birth certificates on file in the State Health department only 63 percent of the children born in Collingsworth county during 1928 were registered by the physician or midwife in attendance as required by law. This means that more than one third of the children born in your county last year were deprived of the protection of a legal record of their age, parentage, and citizenship through the failure of the physician or midwife in attendance to comply with the law.

The bureau of the census is co-operating with the state health department in a concerted drive to improve registration in Texas so that it can be admitted to the registration area during 1929. Much improvement will be necessary in some counties as 90 percent efficiency is required for admission. At the present time only two other states are outside of the registration area. These are South Dakota and New Mexico.

Ballanger Plans Entertainment For Press Men

Ballanger is making plans for the entertainment of the Heart of Texas Press Association on Sept. 9. The program will include a luncheon, an automobile ride, golf tournament and a special program of Ballinger talent. An attendance of 150 editors, publishers, reporters, supply men and others is expected.

Church of Christ Conducting Most Successful Meet

Evangelistic Powers Of
Wallace and Singing
Of Robertson Good

Big Congregations

Large Audiences Receive
Message of Right
Conversions

That large crowds have been attending the revival meeting which began at the Church of Christ on Friday, August 16, was announced Tuesday by Rev. W. R. Wolfrum, local pastor. The meeting is being conducted by Cled E. Wallace, Temple evangelist, who is assisted by Rev. Wolfrum. Another added feature is the song services which are conducted by V. P. Robertson, local business man. "Interest in the meeting has developed rapidly and we are expecting one of the best meetings in the history of the church, Rev. Wolfrum said.

"We are exceptionally glad that we secured the service of Brother Wallace," Mr. Wolfrum said. "He is a very competent man, has college education and has done much toward advancing the cause of God. The appeal he makes to the public in his services is a simple gospel appeal. It is the appeal of plain Bible preaching, the congregational singing of stirring hymns, and earnest prayer. Our meeting is not intended to be widely sensational, but there is power in it; come and be convinced."

"It is a wonderful thing to be able to pick up a New Testament compare one's experience in religion with its teachings and find that in its essential points they harmonize. It is a tragedy to be something in religion that the New Testament does not mention. Man is a sinful creature in need of conversion. A good conscience is enjoyed when a man is conscious of having obeyed God and is in possession of divine Bible assurance that he is a child of God. The wise man puts his confidence in the promises of God."

Services are held at 10 A. M. and 8:15 P. M. All are invited and it is the earnest desire of the church that everyone who comes will receive a distinct benefit." Rev. Wolfrum said.

R. E. Farmer Suffers Broken Ribs In Fall From Tree Thursday

R. E. Farmer of the Marella community was painfully injured last Thursday when he fell from a tree on his place. Mr. Farmer was topping a tree so that more wind could get to his windmill. Three of his ribs were broken and his shoulder was badly bruised in the fall. Dr. John W. Harper, who is attending him, says that he is recovering nicely.

Magazine Thieves Like Love Stories

Honesty of Community Not So Bad, Says News Stand Owner

That there is one honest man in Wellington is the firm conviction of Miss Gwendlyn Hooker, proprietor of Mac's News Stand, located in the arcade to the post office. Through carelessness Miss Hooker left one of her magazine racks out in the entrance Friday night and when she returned the next morning she found that a large number of her wares were gone. A few hours later one of her customers entered, handed her the correct change for one of the magazines and saying he happened to be passing by and took one to entertain him for the evening.

There were also several people who did not have such a clear conscience according to Miss Hooker's report. About thirty five magazines were left in the rack and the amount taken was between twelve and fifteen. Most of these were of the True Story and Picture Play type, which leaves a general impression of the type of people who would steal such trivial sums.

Leading psychologists of the country, have in recent times placed a bunch of magazines on a table in the main building of senior colleges over the country, a card was attached which said: "I am working my way through school—take one, and leave the change." Ninety five percent of the students taking magazines always left the money. Miss Hooker, however, feels that there are plenty of people in Wellington who never studied psychology and that no psychologist who was selling magazines for the profit would try the test more than once in Wellington. Maybe she will leave only the Whiz Bang and Police Gazette next time and we can give the boys a test.

Believe It Or Not; He Chopped

Lee O'Neil went out to the plains country last week to inspect some land he owns out there. He found all the renters so busy that they did not have time to talk to him. He got a hoe and started working with them in order to keep them from stopping work. He chopped for three days. Evidently he must have had lots of conversation on his mind.

M. E. Revival Ends After Two Weeks

Many Conversions Were
Made During Meet
Recently Held

After two weeks of concentration the revival at the First Methodist church closed Sunday night, August 18. The revival was conducted by Jack and Bill Thompson, evangelistic twins, who held the meeting and preached on alternate nights.

Three conversations were the report that Rev. I. A. Smith, local pastor made Tuesday. "The meeting was a success, but it hardly comes up to our expectations," Rev. Smith said. "There were lots of people but most of them were members and therefore there were fewer conversions than we expected."

This meeting began August 4 and although there were only a few conversions, the people feel like they have conducted a most successful meeting, because there has been developed a spirit of fellowship that did not exist in the church before. "The very fact that members began to attend the meeting in large groups before it closed is a credit to the church," Rev. Smith said.

"The Thompson twins are most capable and competent and I am sure that the people who heard them were well pleased with the gospel that they offered."

Loco Will Have Electric Lights

Electric lights to illuminate the Store buildings and houses in the Loco community will be installed next Monday, August 26, according to the report of Paul Vinson, West Texas Utilities man who has charge of this area. This is made possible because Loco is installing an electrically operated gin and a power line is being brought in from Dodsonville.

Although the only the people living between Loco and where the power line crosses the road, four miles north, will be supplied, it will be a great help to the community, the people think.

Misses Gladys and Mary Towns of Amarillo are visiting this week in the home of Mr. and Mrs. J. D. Thomas.

Prizes For Base Ball Tourney At Fair Announced

\$100 in Cash and Many
Other Prizes Will
Be Distributed

Four Teams Enter

Contest Will Create Spirit
Of Cooperation At
Coming Fair

Definite announcement that teams from Quail, Plymouth, Nicholson and Bean Hill communities will enter the baseball tournament on the second day of the Collingsworth County Fair was made by J. N. Wallace, Tuesday. The baseball team which wins the tournament will be awarded \$100 in cash, Mr. Wallace who is in charge of the arrangements for the contest said. Many other prizes of merchandise for the contest will also be distributed.

The contest will take place on Friday, September 13, which is also school day, a time when all school children will be admitted to the ground free. This is the first time that such a contest has been sponsored for by the Fair Association, but the eagerness with which the teams entered the tournament and the willingness with which the merchants cooperated with the association gives assurance of its value, Mr. Wallace thinks. It is something that will cause the school children to show more interest in the fair and help enjoy themselves, the officials said.

George McCullough has agreed to serve as umpire for the games and the prospective material which has been developed in these communities gives the outlook for a good display of Collingsworth's local talent.

The following prizes will be given to individuals making the plays specified:

FIRST GAME
First Hit, \$1.00 Barber Work, (City Barber Shop).
First Stolen Base, \$1.50 Pocket knife, Shields & Lewis.
First Run, Suit Cleaned & Pressed, Self Tailor Shop.
First Error, 5 Gal. Gas, Pigg-Alley Motor Co.
First Put Out, 1 Dinner, City Cafe.

SECOND GAME
First Hit, \$1.00 Barber Work, Sims Barber Shop.
First Stolen Base, 2 years subscription, Wellington Leader.
First Run, Suit Cleaned & Pressed, French Tailor Shop.
First Error, 2 Years Subscription, The Standard.
First Put Out, \$1.50 Tie, C. G. Bower & Co.

THIRD GAME
First Hit, \$1.00 Barber Work, McCulloughs Barber Shop.
First Stolen Base, Suit Cleaned & Pressed, Strickland Tailor Shop.
First Run, Suit Cleaned & Pressed, The Toggery.
First Error, \$1.25 Pair Hose, C. G. Bower & Co.
First Put Out, Shirt, The Dixie

Continued on Page 7

Baseball Fans Urged to See Play-off Games

Baseball lovers of Wellington are urged to attend the games between Wellington and Cordell which will last through Friday. Hot contests each afternoon are scheduled for the fans who witness Wellington and the Oklahoma teams as they battle for the championship of the Texas and Oklahoma league.

Shields & Lewis To Move to New Location Soon

Two Buildings Are Being
Lengthened With Addition to Rear

A new location with a fifty foot front extending from the Ritz Theatre to Lewis Grocery to be occupied by Shields and Lewis Hardware company on September 10, according to a report given Tuesday by J. M. Shields, manager. The reason given for leaving the present location was to secure a better display room for their products.

An addition is also being made to the rear of the two buildings, one of which is now occupied by the Express company at the present. This addition will give the firm a building 115 long. Display windows are also being added by the owner, R. H. Templeton.

"The chief reason that we are moving is to get a better place in which to display our new line of furniture, which will be added to our present stock, this fall," J. M. Shields, manager, said Tuesday.

Wellington Wins From Elk City

Seven Game Series Begins
In Wellington Next
Wednesday

With the local team playing at its best, Wellington took the last regular season game which will be played this half in the Texas-Oklahoma League. Only five hits were made off the Wellington team and the score ended Wellington 4, Elk City 2.

Wednesday, August 21, a seven game series will start between Wellington, who won the first half and Cordell, winners of the last half. The series will open in Wellington and three games will be played before the teams go to Cordell where three more games will be played if necessary. In case the teams are tied when this is through it has not been decided whether the tie will be played off.

Knight pitched the first seven innings of the last game and only 1 hit was made while he was pitching. French finished the game and pitched exceptionally good ball. It was one of the most spectacular games of the season, spectators said.

A few additions have been made to the team and the players feel their chances to win are exceptionally good. Wellington players who will be eligible are: McMahon, McKenna, Andree, Newman, Wilson, Holland, Dukeminer, Brown, Bunt, Knight, Veneable, French, Gaither, Nicholson, Hartley, Wanager.

French is an addition to the pitching staff and comes from Mangum, where he is highly recommended. His work in the game with Elk City proved to the fans that he was capable of pitching first class baseball. Veneable is also another addition to the pitching staff and is from Mangum.

Gaither, the new third baseman came from Lubbock where he has been playing all season. He gained quite a lot of recognition in the tournament at Amarillo.

Zook Thomas of Wellington was in Amarillo last week.

First Bale Of Cotton Ginned Last Tuesday

Premiums On First Bale
Amount to \$79.50
In Cash

Two Bales Ginned

Eighteen Cents Per Pound
Is Price Paid for
Each Bale

Two bales of cotton have been ginned and sold in Collingsworth county. The first was produced by N. J. King and the second by A. M. Ledbetter. The first one was ginned last Thursday, August 15, and the other one on Friday. Premiums amounting to \$79.50 in cash and a subscription to each of the local newspapers were awarded for the first bale.

Mr. King lives on the M. J. Wilks farm southeast of Wellington and says that the cotton was planted on April 15. It has been plowed four times and harrowed five times, Mr. King said. The cotton was ginned at the Wellington Gin Thursday afternoon and sold to Baker and Hanna Dry Goods Company Friday morning. Mr. Ledbetter had his bale ginned with the farmers Co-Operative Society No. 1.

Low Price For First Bale

For the last four consecutive seasons Baker and Hanna have bought the first bale of cotton produced in Collingsworth county and this is the lowest price they have ever paid according to the report of H. A. Phillips, local manager. Prices have varied each season, 18 cents per pound being paid this time; the highest price that they have paid is 25 1/2 cents, last year 22 1/2 cents was the price Mr. Phillips said.

The Farmers Co-Operative Society bought the other bale which also brought 18 cents per pound. C. of C. Sollets Premium

The premium was made up through the efforts of the Wellington Chamber of Commerce, who solicited prizes and gifts from the merchants to the amount of \$79.50 and a subscription to each of the local newspapers. Those who donated to the fund were: R. C. Dryden, City National Bank, Cochran Drug, Pioneer Hardware, Dixie Store, Baker-Hanna Brothers, Cicero-Smith Lbr. Co., Kraft's Mint, First National Bank, M System Store, Lewis Lbr. Co., C. D. Shamburger Lbr. Co., Johnson Grocery, The Famous, J. N. Wallace Men's Store, Pigg-Alley Motor Co., Jitney-Jungle, Hunter's Men's Store, B & M Grocery, Piggly-Wiggly, Frank's Furniture Store, Co. C. G. Bower, Little Mercantile Barnes-Hastings Grocery, Shields & Lewis Hdw. Co., The Leader Store, Ball Filling Station, C. E. Stone & Co., Joe Hardy Drug, A. Bailey & Co., Snell's Cash Grocery, Wellington Leader, Collingsworth Standard.

Pavement Repairs
Are Result Of
Sewer Lines

Pavement on the corners of East Avenue and Ninth street, and at West Avenue and Seventh street have been repaired during the last week. These slight repairs were necessitated because of a depression over the sewer and water lines, Bura Handley, city overseer, said Tuesday. No other repairs are planned unless something unexpected happens, Mr. Handley said.

Sea Island Cotton Looks Like Beets

John W. Jackson, who lives northeast of Wellington, has seven acres of cotton that isn't showing any bad effects from the hot dry weather. The patch which is planted in Egyptian Sea Island cotton looks more like a beet patch in color than it does like ordinary cotton. This cotton has a dark stem and dark leaves, and in the hottest part of the afternoon shows no sign of wilting while "Acala cotton of the same age growing alongside is wilted badly.

\$2.00 A YEAR INSIDE OF TRADE TERRITORY
\$3.50 A YEAR OUTSIDE OF TRADE TERRITORY

WHY NOT SENATOR SMALL

Under this heading, William Russell Clark, editor of The Memphis Democrat, urges that Senator C. C. Small be drafted to run for United States Congressman from this district. Since last January various papers in the Panhandle have advocated such a course for the Wellington Senator, but few of these editorials are more noteworthy than this one from our neighboring town. Editor Clark is a newspaperman of wide experience both on daily and weekly publications, and has done considerably reporting of a strictly political nature. Furthermore, Editor Clark's interest in Senator Small is not personal for at the most their acquaintanceship is casual even though it is due to ripen into a warm friendship when these two splendid characters come to know each other better. This disinterested viewpoint lends added significance to the Memphis editorial, for it comes to us as the impartial observations of an astute student of politics. The editorial from the Memphis Democrat follows:

"We have surveyed the field of West Texans who might, with credit, represent the Eighteenth Congressional District in Congress, and after giving a considerable amount of attention to the matter, we have reached the conclusion that Senator C. C. Small of Wellington is the man. We believe the Wellington Senator is not only capable, but what is of far more importance, he has the business acumen plus the will and desire to serve well his constituency.

"The present incumbent Honorable Marvin Jones has held office for about fourteen years, and it seems to The Democrat and we believe it will seem to West Texans generally, that Mr. Jones should devote his energies to other pursuits after his present term of office expires. We realize that he has hundreds of friends throughout West Texas, and the man that beats him in 1930 will have to be up and doing. That is the kind of a man Senator Small happens to be.

"Probably no man has done as much for our section of the state during the past fifty years than has been accomplished by Senator Small since he has been a member of the Texas Legislature. Newspaper comment has been widespread as to what this Texas has been able to do, despite obstinate opposition and even in spite of Governor Moody himself.

"Of one thing we feel certain: once Senator Small is elected to Congress West Texas will have no cause to worry that their interests not being looked after. He will make a name for himself in Congress just as he has made in the state legislature, and it will be a name that will carry with it a considerable amount of weight and respect.

"Clint Small is no cheap politician. We have followed his career with interest. We think we know what he is capable of doing and it is in the interest of the Panhandle of Texas that we make the suggestion that he run for Congress. We well know what such a race will entail. It will mean sacrifice on his part. It will mean that he must give up a lucrative law practice; it will mean that he will, of necessity, have to be away from home a considerable part of the time, but the call to duty surpasses all others and we do not believe Senator Small will fail to heed that call.

"It may be taken for granted that Marvin Jones will seek re-election. It may be taken for granted, with equal certainty, that should Senator Small announce for office, his friends will see to it that he is elected. It is too early now to say what the Wellington man will do. Frankly, we do not know. If sufficient pressure is brought to bear on him, we believe he will run. We are for that pressure being utilized, and this paper stands willing and ready at all times to help, in its feeble way, to bring this thing about."

PUBLIC UTILITY STOCKS

So far as the general public is concerned, it does not appear that the investigation of public utilities which has been going on for a year and a half has had much effect.

In a recent financial article in the New York American, one of the principal newspaper antagonists of the utilities, it was declared that in the opinion of several hundred business executives, who had responded to a questionnaire, public utility stocks were the favorites among the investing public. General Electric perhaps the favorite individual company, with Electric Bond & Share, Westinghouse, United Gas Improvement standing near the top of the list.

By groups the favorite stocks were listed in the order of their preference as follows: Public utilities, railroads, steel, electrical equipment, oils and motors.

In view of the recent unprecedented trend of business and industry toward mergers, it is natural that investors should seek the securities of the larger and better managed corporations. The investor may criticize these mergers, but when he puts his own money into something he wants it to be an enterprise as big and successful as possible.

TEXAS & TEXANS

By Will H. Mayes

Texas Rural Routes

Texas is now fairly well covered with rural mail routes, there now being 2,194 routes in the state serving 1,209,000 persons. The cost of this service is \$15.25 a year for each family, which is small when it is considered that Texas is yet so poorly covered by good roads.

There is nothing that has contributed more to rural life than the improved mail service unless it be the improved roads that have made the mail service possible. The annual salary of Texas rural carriers average \$1,927, exclusive of the allowance for equipment maintenance, or about \$160 a month, which is enough to secure good service "with a smile."

When it is considered that most of the state highways in Texas are comparatively new, their maintenance appears to be rather expensive. The highway department appropriates \$8,403,930 for the maintenance of 18,000 miles of road, or nearly \$500 a mile a year. However, this amount takes care of contingencies such as flood damages to roads and bridges.

An argument advanced by the proponents of a state bond issue of considerable size is that the sooner permanent state highways are built just that much sooner will maintenance cost decrease.

Prison Commission Tours

Eleven members of the Texas Prison commission, created by the last legislature, are away on a visit to a score or more of northern and eastern prisons, accompanied by an architect and a secretary. The tour will last a month and at its end the commission expects to be informed as to the most modern methods in prison management.

While such a jaunt seems expensive, if it only leads to the right improvement of the Texas prison system and to lessening the operating cost to taxpayers, the trip will be worth many times its cost.

The reduction of the cost of operating the penitentiary, while at the same time making prison life more tolerable for convicts, is one of the greatest economic and humanitarian problems with which the state has to deal.

Brazos County Roads

Brazos county voters are to vote on the issuance of a \$1,250,000 road bond issue, with which it is proposed to liquidate a half million dollars in bonds and build state roads intersecting the county, and numerous laterals leading to these state highways. People who have occasion to travel in Brazos county will readily agree that the roads are needed.

Orient Extension

The hopes of the people of a vast section of West Texas will be realized sooner than some have expected in recent years if the Santa Fe makes good its proposal to complete the Orient line to Christoval by early September and to Sonora by the first of the year. The work, however, has reached the stage where there is every reason to believe this will be done.

Tomato Tariff

Commercial organizations of the lower Rio Grande Valley are protesting the action of some of the commercial bodies in other parts of the state in opposing the proposed tariff on tomatoes. They claim that if the tariff is increased, it would mean \$10,000 additional revenue to the Valley each year. It has not been long since the humble tomato was regarded as rank poison. It may yet become the chief source of Texas prosperity. Who knows?

The Milk Industry

To whatever proportions the tomato industry may grow it will likely find a rival for supremacy in the milk cows. Dairy products plants of all kinds are increasing rapidly in all parts of Texas, and farmers are finding difficulty in getting enough cows to supply the demand for milk and cream. While the milk plants are not showing extraordinary profits, they are proving a boon to farmers by keeping them supplied with ready cash throughout the year.

In Southeast Kansas the bankers have agreed to put up a million dollar fund to be loaned to dairymen for the better development of the dairy industry, and they not only expect to get back their money with interest, but to increase their deposits largely. Something of the kind may have to be done in Texas.

Lockhart Creamery

The Lockhart Creamery, one of the many coming concerns of the kind, capitalized at \$25,000, and owned in small amounts by local people, has recently held its annual meeting, and is highly pleased with itself. One reason is that it has paid farmers \$200 a day for milk and is seeing the milk herds of the district much increased and improved.

Rockdale's Lights

Rockdale is putting in a system of incandescent street lights under the outed edge of the awnings of business houses. Most towns of the size are lighted in that way, and it creates a most favorable impression on both home folks and travelers. There is something about a well-lighted place that creates a home-town pride, and in this day of general use of electricity the unlighted town has a neglected and forbidding appearance.

Clay Products Plant

Natalie, Medina County, has a \$146,000 clay products plant to specialize in tiles. Much of the Texas soil is adapted not only to the making of tiles and fine brick, but to a high class of ceramics equalling the best pottery of the country. Some day Texas will become famous for its pottery, although as yet but little is produced except the coarsest of the clay products.

Building Associations

Building and loan association assets in Texas increased more than \$20,000,000 last year, bringing the total to \$113,000,000. These associations are now under the supervision of the state banking commission, and will get the same close supervision given to state banks. The results of this, the law for which has only lately become effective, will likely be to increase assets of the association even more rapidly.

The Great American Home

Press Clips

That 4 cent gasoline tax brings in lots of money now and every year the people ride more, visitors come more and roads are used more. Let us learn to spend the added millions coming in for a few years and get our bearings.

The big cities in Texas are already connected up with good roads and our road tax is wonderfully increased. Spending money has spoiled many a young fellow and we shouldn't spoil our nice, political spenders who have not yet learned to earn.—Greenville Messenger.

Major General William Lassiter, eighth corps area commander told Texas National Guardsmen this week that wars of the future will be fought by small, highly mobile units. He prophesied that in the future troops would be transported at high speed for long distances to meet enemy forces, and said that the next war, should it come, would be as different from the world war as that conflict was from those preceding it. The war department is planning to motorize two regular divisions at once.—Floyd County Hesperian.

Referring to the disappearance of the old Youth's Companion in a period when our youth demand "livelier companions" and to the notable changes in many American magazines, the New York Times

observes that "the old North American Review was long superior and unyielding, but had to bow at last to a lighter-minded public.—Althus Times-Democrat.

The dear people turned down the constitutional amendments to raise the governor's salary and increase the number on the state court. We did not think much of the court amendment for it is like all our other courts—all they need is to work and stop fooling around. But we did hope the salary raise would carry. You can't get a good man to go through all the mud slinging and abuse to be governor for the small sum of \$4,000 a year.—Pampa Daily News.

What is a boy worth? Different to put it in dollars and cents, isn't it? Boy Scouting is doing a lot to give boys high ideals and straightforward thoughts on citizenship without any sissy stuff which a real boy, of all persons, most thoroughly detests. Give Boy Scouting any support morally and financially that you can. And don't make excuses just to let yourself down light.—Vernon Times.

"When I get out of debt," used to be a popular preface to the statement of some contemplated action. It has become obsolete in the last few years. The high degree of efficiency reached in the installment buying and selling game has eliminated the possibility of most folks ever arriving at that desirable end.—Claude News.

Side Lights

BY MARCY B. DARNALL

Mrs. Bobby Burns, the widow of a Baltimore puglist, applied for a permit to become a professional boxer. She says she will take on women. Intimating that some of the male pugs are not so hot, she all comers in her class, men or declared: "I can hold my own with a lot of palookas who claim to be prize-fighters."

Chief of Police Robert Williams of Wink, Texas, recently arrested a man he should have winked at. His prisoner revealed that he and the chief had done time together in the Oklahoma penitentiary, from which the chief, then known as Joseph Reocket, escaped in 1915.

Laws forbidding persons to drive automobiles until they reach a certain age are common, but in Cape May, N. J., it has been decided that being too old is as bad as being too young, so a renewal of his license was refused "Uncle Jimmy" Clark, aged 90. Indignant, Mr. Clark declared: "I'll bet I can see and hear better than most of the youngsters."

Recently three American college girls swam the famed Hellespont, emulating the mythical Leander, the real Lord Byron and others. One girl made the crossing in an hour and 20 minutes. This stratagem, now known as the Dardenelles, while not much more than a mile wide at its narrowest point, has a swift current.

DECK'S Didactics

By H. D. W.

Ralph Ball took me over the coals for writing about the scent of hay in the old time wagon yard, etc. He thought my truthful narration of the emotions of my youth was something of which a person should be ashamed, and which above all things should not be mentioned in public. However, he was tolerant enough to admit that this was a purely personal column, and that things could be said in this space without the readers thinking that they represented the opinions or tastes of the paper as a whole. After cogitating over the whole talk, I have come to the conclusion that Ralph didn't smell the same odors that I did in the old time wagon yards. I guess what you are looking for determines what you find—not to mention smell.

I haven't had a chance to tell of the return of "Ed Blain," the water spaniel that belongs to W. W. Sugg. He was found in a car on the square by Bill Sugg, and great was the family rejoicing when the prodigal came home. After "Ed Blain" had been licked by the two black cats of the Sugg family and had pawed all over his owner, he was fed and settled down to his peaceful existence. Now then Bill wants me to give him the year's subscription I offered for the return of that dog. Can you beat it?

A recent notice sent out by C. C. Bishop, secretary of the Retail Merchants Credit Association, says that out of ten marriage licenses issued in Hollis recently only two were issued to Oklahoma people. All the rest were from Texas. That shows something of the popularity of the new Texas marriage laws. If those young hot bloods only knew what every married man and woman knows, they would have more respect for the wisdom of this new Texas law.

There is another thing that I have been wondering about. When a man gets married that fact is published in the bulletin of the Retail Merchants Credit Association on the same page with those who have given hot checks and on the page next to those who have mortgaged their farm, crops, house, chickens, children and hogs. Now what I want to know is how much does it hurt your credit rating when you get married? It is slightly better than giving hot checks and a little worse than giving a mortgage? Just how much does it discount a person, Mr. Bishop?

The other night while sitting on my front porch listening to the radio, I became absorbed in watching the stars. A little reflection on the vast universe in which millions upon millions of planets and suns much larger than our own hurtle endlessly through space, makes a person feel smaller than anything else can possibly do. I know very little about astronomy, but it is fascinating to speculate upon the terrible extent of the universe.

There are stars which are so far away that it takes light, which travels at the rate of 186,000 miles a second over a hundred million years to reach us. Betelgeuse is a giant sun that is twenty five million times as large as the sun which furnishes the earth light and heat, but even Betelgeuse is only a toy sun compared to the super giants which are farther away. If we were living on one of these distant stars we could not even see the light of our sun with the aid of the most powerful telescopes. If our sun should suddenly go out, it would be hundreds of thousands of years before the inhabitants if any, on even less remote planets, would observe the change and then only by the flickering of a faint light. And the age of these heavenly bodies is also awe inspiring. They still will be drifting through space millions and millions of ages after the earth has become too cool for human life to exist.

Pasturing Sweet Clover for Results

A common mistake in the management of sweet-clover is to pasture a first-year stand too heavily. New seedlings should seldom carry more than one mature animal to two acres. The rate of grazing may be heavier than this in August, but by September 15 the rate should be decreased, to allow the plants to store food in the roots. Each plant should go into winter with at least 6 inches of top growth. Sweet clover pastured too heavily the first year will start slowly and grow unevenly the second year, and will yield considerably less forage than if pastured lightly the first year.

Abortion Causes Dairy Loss Says Dr. H. Schmidt

Contagious Abortion Ruin Best Dairy Herds Says Expert

Telling dairy farmers at the Farmers Short Course, A and M college of Texas that "contagious abortion is a very unprofitable thing to have around your place," Dr. H. Schmidt of Texas Agricultural Experiment Station outlined the cause, spread and control of this cattle disease. "Contagious abortion," he said, "caused by the *C. bacillus* and is always introduced into a herd by some infected animal. Abortion may occur at any time during the pregnancy but most frequently during the fifth to seventh months. In large number of cases the animal does not readily conceive again and a comparatively large percentage of animals may even become barren.

"For each abortion occurring we have lost the offspring, much if not all of the expected milk flow, and upkeep of the animal during the unproductive period resulting from abortion, to which must be added the outright loss of all animals that become barren. The disease does not stop after the animal has aborted, for it may again abort during the next period of pregnancy or it may carry the next calf to full term or even the next two or three calves and then abort again," Dr. Schmidt said.

The infection may spread in a herd through feed and water, or through either the bull or the milk, the speaker pointed out, and its control is difficult. "Knowing that the disease is always introduced from the outside the farmer must see to it that an infected animal does not enter his premises for any purpose, that his cows are not bred to a bull in an infected herd, and that his cows do not mingle in any way with those of infected herds either at home or at fairs. Farmers must raise their own animals for replacements to be safe, but if animals are to be introduced into the herd a blood test should be made in a special laboratory."

Marshal Cook Gets Fire Warning From State Fire Officials

A fire warning concerning cotton gin fires has been received by Jim Cook, city fire marshal, from the state fire insurance commissioner.

Attention of gin owners and cotton growers is directed to the message, which reads as follows:

"Fires in cotton gins cause a large annual loss in the United States each year, in some seasons amounting to \$1,250,000.

"Fires during the ginning process may be due to a number of causes, such as matches in cotton, static electricity, overheated bearings, friction between the saws and cotton stuck in the ribs, and sparks struck by the passage of metal and other foreign material through the equipment.

"Static electricity is the principal cause of fires during the ginning process. In seasons when the greatest number of fires have occurred electrostatic changes have been abundant and troublesome. At such times the humidity was low, and the cotton being ginned was particularly dry and dirty—conditions ideal and necessary for the formation of changes of static electricity. These three conditions, low humidity, dry cotton and dirty cotton, are essentials for high electrostatic charges in the gin.

"Some ginners remove static electricity by hanging wet bagging in the building, some by wetting down the plant and grounds every day or even twice a day, and others by injecting a little steam into the suction pipe in the direction of the flow of the cotton. A few ground the machinery. The effective operation of any one of these methods will put an end to trouble with gin fires."

Bacteria Germs Sour Most Milk

Bacteria are single-celled plants, so small they can not be seen with the naked eye. They are found in large numbers in the soil and in many other places. They multiply rapidly when given proper food and a warm temperature. Warm milk is an ideal food for bacteria. Bacteria cause milk to sour and produce other undesirable changes. For this reason milk should be produced in a sanitary manner and kept cold.

Paris Combines Silks and Wools Neatly To Gain Distinctive Note in Frocks

BY HARRIET

Paris is making a fetish of combining figured materials and plain in new and novel manner.

The idea of yokes and the increasing importance of cuffs and collars all have had their influence.

With the breaking up of the straight and narrow lines, details are of increasing importance. Therefore, Paris emphasizes them by introducing different fabrics to make much of them.

It is not uncommon in the new Paris modes to find silks and wools combined in the same frock. One may have a plain worsted frock with puff cuffs of gaudy silk and perhaps the yoke and collar of the silk too. The ends of the sash the binding of the skirt's tiers, or pipings of panels may be of the silk.

This all means much more attention given to hand-finishing. The woman clever with her needle will welcome this return to the "dress-maker" modes. For there was no good way to make over a straight-line frock of which one tired. Now modes can be refashioned until Milady herself who plies the needle making the change will hardly recognize the frock she started with.

One very stylish dark blue dress in the new styles has four godets of polka-dotted blue and beige silk introduced into its skirt, a slot seaming down the back of the blouse that is of the silk. One can quite fancy a plain, straightline ordinary blue frock of worsted made over with very little work into this new, cute, belted frock of plain blue and polka-dotted silk.

Still another sample of the way to make old things into the very latest. A brown asperic worsted frock has box pleats all around its skirt, with every box pleat tan asperic on the inside of brown. Merely slash a plain brown skirt and insert the tan, stitch and press and you have the latest version. All in all, the new modes give the needlewoman the breaks.

Two very new Paris models which should be pregnant with suggestions for the modish seamstress are shown today.

One is a little silk ensemble of green and white polka-dotted crepe,

At left, a green and white ensemble; at right, a stunning creation in black crepe satin combined with red, black and white tartan. The hat is of natural bangkok.

with plain green coat. This coat has puff cuffs and bow ties on the cuffs of the fancy silk. And its collar has one of the newest Paris touches, bow tie with fancy silk ends.

The frock has three ties in front and an all-around lower tier that flares to width in the back. This manner of lengthening old frocks that are now too short is not so bad. Add a collar, the puff cuffs and sash of fancy fabric to any plain colored frock from last winter and then put a low full flounce of figured fabric on to the bottom and, presto, there is a very new quite Parisian frock.

The second frock shown today

is just as rich in suggestions. It is a stunning Paquin creation in black crepe satin combined with red, black and white tartan. There is a deep drop yoke both front and back of the plaid silk and this is cut in points where it points the plain fabric. Below the plaid uppers to the sleeves, the plain fabric makes a wide sleeve that slips into a tight waistband of the plaid. The plaid is inserted in one side of the waistband to knot into a charming bow and decorate ends that hang almost to the knees.

Both of these could be made quite simply.

ANNOUNCING A VARIETY OF COLORS on the Chevrolet Six at no extra cost!

In keeping with the progressive policies that have carried Chevrolet to record-breaking heights of success—the new Chevrolet Six is now made available in a wide variety of colors at no extra cost.

Still further enhancing the inherent beauty of the marvelous bodies by Fisher, these striking new colors give to the Chevrolet Six an order of smartness unapproached in any other low-priced car in the world.

And when you drive the Chev-

rolet Six, you will realize that its performance is equally as outstanding as its beauty. It flashes away at the traffic signal. It tops the steepest hills with an abundant reserve of power. The steering wheel responds to your slightest touch. And the quiet, non-locking, four-wheel brakes are unusually quick and positive in action.

Come in today. See this sensational Chevrolet Six which actually sells in the price range of the four.

The Roadster, \$525; The Phaeton, \$525; The Coach, \$595; The Coupe, \$595; The Sport Coupe, \$645; The Sedan, \$675; The Imperial Sedan, \$695. All prices f. o. b. factory, Flint, Mich.

COMPARE the delivered price as well as the list price in considering automobile values. Chevrolet's delivered prices include only reasonable charges for delivery and financing.

GOOD PRINTING--

Is Demanded By The Better Business Firm

Every business firm who would keep the prestige and standing it has acquired knows that every piece of printed matter bearing its name should be the best.

Letter Heads, Order Blanks, Envelopes, Invoices, Statements—any printed matter bearing the name of a firm, traveling to thousands of places each year, are silent messengers of that firm's business standing.

Artistic printing for the Business Firm who is particular about the kind of printing it gets, has made The Leader the choice of the majority of progressive business firms of Wellington.

Modern facilities insure you of quick service as well as moderate prices.

THE New BUICK

The Greatest success in all Buick history

More people have purchased New Buicks during the past two weeks than in any similar period of any previous year

The New Buick with Body by Fisher has met with a veritable landslide of public demand. Many purchased before ever seeing the car—many thousands of others placed their orders the first few days it was on display—other thousands have been taking demonstrations and then making Buick their choice.

More Buick owners have entered orders—more men and women who owned other cars have turned to Buick—more people who formerly paid from \$1000 to \$2000 higher for their automobiles have purchased Buicks—than

ever before during a similar period in Buick's twenty-six year history.

The total demand during these two weeks is from three to five times as great as that for any other automobile priced above \$1200.

Popularity so overwhelming carries an unmistakable message to every prospective motor car buyer: See the new Buick—drive it—compare it—and you'll quickly discover that it's the greatest dollar-for-dollar value in the entire quality field.

Earthquakes Are Felt In Eastern States Monday

Slight Damage Reported From Quake That Extends To Canada

A series of earth tremors, varying considerably in intensity and length of duration, rocked portions of five eastern states and one Canadian province today.

Quakes were reported at intervals from as far east as Springfield, Mass., west to Ashtabula, Ohio, south to various points in Pennsylvania and north to Toronto.

In most cases the effects of the shocks were confined to the waking of sleeping and the violent rattling of windows and dishes, but in western New York, where the tremor appeared to have reached its maximum intensity, considerable damage was done.

Seismographic readings at Canisius College, Baltimore fixed the time of the principal shock at 24 minutes, 55 seconds after seven a. m., Eastern Daylight Saving Time, the main tremor lasting 12 seconds and being followed by minor shocks at intervals throughout the next six minutes.

Reports of shocks from other points, however, fixed the time as early as three a. m.

In Canadaigua, where the tremors lasted nearly three minutes large apartment houses were said to have swayed noticeably, and police and fire departments were besieged with telephone calls from terrified homeowners.

In Elmira a woman reported her bed broke down from the force of the quake.

At Elmira dishes and pictures were thrown to the floor during the shock which lasted about 15 seconds.

Binghamton reported the earliest experience of the quakes, fixing the time between 1 and 3 a. m., sleeping residents were awakened by the violent tilting of their beds but no damage was reported.

Most serious damage was reported from Attica, where one of the walls of the Methodist Episcopal church collapsed and falling chimneys damaged the roof of the building. A huge chimney on an industrial plant at Warsaw, Wyoming County collapsed.

Phillips Station Going Up Fast

A modern filling station is being erected by the Phillips Petroleum Co., on the corner of Eighth and Childress streets, and will be open within two weeks, according to the report of J. R. Darrow, local agent. "We think that it is one of the most modern types and are building it on the 'ancient style' which is often found in the larger cities. Mr. Darrow said. "It will have three pumps and all of the most modern equipment available."

At present the Phillips company does not have a local filling station and most of their business is transacted in their office directly northwest of the Harrison Gin Co.

In making bloomer dresses for children it is a good plan to make two pairs of bloomers as they are likely to wear out before the dress does.

Try Double Span Of Continent

A refueling endurance flight twice across the continent and then back to Cleveland, O., to fly over the Cleveland airport until forced down—that's the ambition of Captain Ira Eaker, below and Lieutenant Bernard Thompson, army flyers. They will start from San Francisco and New York is their eastern goal.

Women's Encampment

By Phebe K. Warner

Five years ago the Home Demonstration Clubs of Baylor and Wilbarger counties held their first encampment. Was it a success? Well, I guess. If we are to judge a tree by its fruits.

It was my happy privilege to attend that first encampment. It was my happy privilege again to attend their sixth annual encampment last week.

On the first occasion about a dozen women from each county met out in the woods by the side of a dry creek, somewhere about half way between Vernon and Seymour. On the occasion Miss Halsey was chief boss of the camp. And none of us who spent that night out under the trees and stars of Wilbarger county will ever forget how she stayed up all night to herd the hogs away from camp to protect the vitals and the women who pretended to be asleep.

It was a great occasion. Great, because of all its future influence. The women brought along enough food to last a week. But that was not all. There was only one baby and one or two little children in camp and for protection two or three men were allowed in camp. They might be needed for something in case of an accident.

It was one new experiment in the history of the farm women of Baylor and Wilbarger counties, and everybody felt a little stiff and strange because most of the women of one county had never

met their neighbors in the adjoining county. But that stiffness did not last long after the home demonstrators started their program of contests and demonstrations, story telling, club reports and songs. That was a wonderful night out under the stars and the first time most of us had ever spent a whole night in the woods.

But times have changed and so have women during the past five years. And this year Haskell and Knox county clubs joined Baylor county clubs for their encampment at Seymour. But instead of a couple dozen women and a few men there were a hundred and fifty farm women in camp but nary a man. They didn't need any men folks hanging round this year to build the fires, get the ice and keep the pigs away from the tables. Never the less the men played their part manfully in a different capacity.

In the first place the women didn't go to the woods for their encampment, but encamped for two days vacation in Seymour's beautiful city park provided by the citizens of that live town. The tables were already made and the park full of play ground equipment for the children. Mothers with little tots brought along their jumpers and hung them, babies and all in the trees while they entered into all the camp activities. And the babies seemed as happy as the mothers, swinging in

the shade until the birds sang them to sleep. Cots, hammocks, cushions and blankets covered the park in every corner. Comfort smiled on everybody. Rest and ease, and freedom and a genuine good time was the order of the day with Miss Beulah Bradley home demonstrator for Baylor county and Miss Grace Gibson home demonstrator for Knox county in charge of the camp.

The first thing on the program was the selection of headquarters for the camp. Every county selected a big friendly tree and swung their banner under its shade. That was to be the center of their county camp. The next on the program was the election of a camp president and camp secretary.

Mrs. L. L. Brookshire of Red Springs, Baylor county was chosen president and Mrs. H. L. Bosse of the Post demonstration club, Haskell county was chosen camp secretary. Immediately the fun began. Green, purple and red badges had already been provided and the whole camp divided into three divisions with the definite understanding that no woman should be allowed in their own county group.

The big idea of the Farm Women's Encampment is new friendships. Getting acquainted with your neighbors across the county line. You might like them. As soon as the new groups were organized, dinner was served. What a dinner. Everything brought from home all ready to serve for both dinner and supper the first day. No cooking for one day in the year. Dinner over, an hour was spent in songs, readings and talks by various members and

guests. And then a visit to one of Seymour's most beautiful homes to study the yard arrangements and the beautiful use to which the native rock of Baylor county had been applied. And the day program closed with a visit to Seymour's dairy after which supper was served. And then came twilight, evening skies, starlight, music, songs and stories and bed time, and morning. And now comes the new order of things. Think of two whole days and no cooking to do. For when morning came, here came the Seymour Lions club out to camp to serve breakfast to that

hundred and fifty women. And when noon came round there was the Seymour chamber of commerce with the whole dinner. Thing of it! Instead of the women feeding the men, the men fed the women! Such is the evolution wrought by the Farm Women's Encampment.

Feeding the Livestock

The careful livestock feeder watches each animal and feeds according to the animal's needs. Many farm animals are underfed and can not produce a profit on the feed they get.

Trustees to Meet Here August 24

The annual meeting of all the trustees of all the school of Collingsworth county will be held at the courthouse in Wellington on Saturday, Aug. 24, at 2:30 p. m., according to J. D. Wilson, county superintendent.

It has been the policy of the state superintendent for the past three years to send a representative of the state department of education to the institute of the county and district trustees in our annual meeting to discuss school problems and school legislation. The state department this year is sending to Collingsworth county Prof. S. E. Clark, state rural school supervisor.

The school legislation which was passed by the last legislature is of vital importance to the local school officials, and a liberal discussion of these and other matters pertaining to the welfare of the public schools will be given at this meeting.

The schools are your concern. They come home to you whether you have any children or not. They affect you. They cost you money. They make your neighborhood, and they help to set the type of citizenship in each community.

Since I consider this meeting and the discussion, which will be given, of so much importance, I wish to urge every school trustee and school patron to be present.

Remember the place, date and time: Courthouse, Saturday, Aug. 24, at 2:30 p. m.

Respectfully submitted,
J. D. WILSON,
County superintendent.

With a rich dinner serve a salad with French dressing, not mayonnaise.

Now look for it everywhere

[THE NEW EMBLEM DEDICATED TO BETTER MOTORING]

What the MARLAND CONTINENTAL Merger MEANS TO MOTORISTS

THE consolidation of the resources and facilities of the Marland Companies and the Continental Oil Company, under the latter's name, is more than a corporate merger. It is a happy union of well balanced production, manufacturing and marketing operations from which will come a host of unusual advantages to the millions of customers and thousands of distributors.

Wide Field for Crude Selection

Out of a total area of more than two and one quarter million acres in eight states, Continental selects the crudes best suited for its manufactured products. Raw materials for oils, greases and gasolines may often come from widely separated regions. Continental controls its own crude supply and chooses the best for each refining operation and thus assures a standard uniform output from year to year.

Strategic Location of Eight Refineries

Economical and efficient operation of petroleum manufacture frequently depends upon the relative locations of the raw

product, the refinery and the market. Continental is fortunate in that its eight modern manufacturing plants are well placed to afford prompt and economical delivery both before and after refinement. These properties are located at Baltimore, Maryland; Ponca City and Sapulpa, Oklahoma; Artesia and Farmington, New Mexico; Wichita Falls, Texas; Florence, Colorado; and Glenrock, Wyoming.

Exclusive Processes Insure High Quality

Continental refinery engineers enjoy a national reputation in the oil business. Not only have they adopted the newest and most efficient mechanical equipment for these big refineries but they have designed machinery and developed processes which are exclusive to this company. Under centralized control, these facilities now are made available in the manufacture of petroleum products of exceptional quality.

Conocoland Covers Tremendous Area

More than forty years marketing experience has spread the distribution of Conoco products over an area which reaches from the western slope of the Rockies, far east to the Mississippi River. Practically half of the United States is dotted so closely with Conoco Stations that a motorist may drive anywhere in that tremendous area without introducing other than Conoco products to his car. The outposts of Conocoland range from the Pacific Northwest to the shores of the Great Lakes and from the Atlantic Seaboard to the California boundary.

Prestige Established in Foreign Lands

The Continental coastwise and export fleet operate from terminals at Texas City, Texas; Newark, New Jersey; Baltimore, Maryland; and Norfolk, Virginia; to a dozen foreign countries. Petrol pumps deliver Conoco gasoline to automobilists in the shires of England and Conoco motor oils lubricate industrial plants in north Europe, South America and the Orient.

In brief, the joined forces of these two great companies afford greater, better service to the users of motor fuels and lubricants wherever the sign of the Red Triangle is displayed.

National W. O. W. Hold Big Meeting

Fraser Is Re-elected By
Big Majority And
Endorses Lodge

Omaha, Neb.—Officers of the national convention of the Association who returned here during the past week from Woodmen of the World Life Insurance Association at Seattle, were happy over the enthusiastic endorsement received by Sovereign Commander W. A. Fraser at the national meeting.

Sovereign Commander Fraser tendered his resignation as a challenge to certain efforts of men to embarrass the society by a series of court suits. As soon as Commander Fraser tendered his resignation pandemonium reigned at the meeting. Efforts were made to prevent the resignation but Sovereign Commander Fraser said he felt he owed it to himself and to his friends to take the step he had. The resignation was then accepted.

Sovereign Gregory, Congressman from Kentucky, placed the name of Mr. Fraser in nomination to succeed himself. Seconding speeches were made by Congressman Kincheloe of Kentucky, Judge Porter of Texas, General Royster of North Carolina and Judge Henderson of North Carolina.

Mr. Fraser was re-elected unanimously.

All the other Sovereign Officers were also unanimously re-elected. "In all my years of activity in fraternal work I never witnessed such a marvelous and wholehearted demonstration of respect and confidence as was tendered Sovereign Commander Fraser at the Seattle meeting," said Sovereign Clerk John T. Yates.

Since the national meeting telegrams and letters have been received by the national headquarters from practically every state in which we do business congratulating the Sovereign Camp for their action in re-electing Commander Fraser. The national meeting of the Woodmen of the World carried on very valuable business in connection with the organization.

Every Sovereign of every state is interested.

Among the changes in laws of the order adopted was one which calls for the nomination of a financial secretary by all local camps, commencing January 1, 1930. This financial secretary will be answerable directly to the Sovereign Camp.

Head Camp or state Woodmen of the World conventions will be held every two years, instead of every four years, as in past.

Another provision requires members who have complaints against the society to file these complaints with the Sovereign Commander prior to the institution of any law suit. The Sovereign Commander will then rule on the complaint and in the event a satisfactory settlement is not reached, the member may appeal to the board of directors of the Sovereign Camp.

Any member under 60 who becomes totally disabled shall receive one-half the face value of his certificate, prior to attaining the age of 60 years.

Arizona and California were united into a new Head Camp jurisdiction and New Mexico was also established as a Head Camp.

The Sovereign finance committee was authorized to invest surplus funds in United States or other bonds and such securities as are permitted by state laws to be purchased by life insurance companies.

Prior to the Sovereign Camp meeting Commander Fraser appointed W. C. Braden, head of Sovereign SENTRY to fill the vacancy of Louisiana, to the post of ancy caused by the death of the late Col. B. W. Jewell and the advancement of other Sovereign officers.

H. O. Fishback, insurance commissioner of the state of Washington and in an address commended the Woodmen of the World on its efficient organization.

"Country Store" Helps Finance Tulia Building

The Tulia chamber of commerce sponsored a movie to help finance the building of a band stand recently. The band played for the audience and a large number of prizes were given at the "Country Store." All ladies present received free of charge a piece of silverware at the entertainment.

Wire hog fence and roofing paper were the only things used by a Kansas farmer in building a silo.

Graveyard Stuff

By Jimmie Gillentine

Do you know the best breed of cows today? If not all you have to do is to ask Jack Deahl, local attorney for the M. K. and T. railroad. A suit has been filed against the railway asking \$207 in compensation for the loss of two Jersey cows. Jack says that the best available breed of cows is a cross between a railroad track and a jersey.

This is the "land of the free and the home of the brave," and another proof to this effect is the new city ordinance which makes it a \$5 fine to drive a horse on the public streets in Greenview, Texas.

West Texas hasn't gone quite that far, however, because a most spectacular badger fight was staged in the alley behind the City Market last Saturday morning. Boyd Bargaenbuich furnished the badger, which was soon worried down by a bull dog belonging to one of the negro shine boys.

If you think that it pays to trifle just ask Lowell Wells. His girl went to Fort Worth last week and during the course of her visit must have been thinking about Lowell because she tried to call him about 10:30 Friday night and central could not locate him in Wellington, Memphis or Childress. If Lowell can think of an excuse which will get him out of this predicament, he is to be congratulated.

It was noticed that Jack Deahl put a new windshield in his Buick Friday, and that his wife came home that night. No one seems to be sure, but here are a few who are in doubt whether the windshield was broken before or after she left.

Max Leder, manager of Kraft's Mint store says that he thinks Wellington is a pretty fair town. Guess most anyone could get that view point if they had as many girls to work with us Max does, or maybe it is the fact that he can see the courthouse from where his desk is.

Tennis seems to be one of the coming fads with the younger generation of Wellington. Each night a crowd may be seen playing at the local park. Either the yare taking a great interest in the game or else they have to have an excuse to get away from their ever-watchful parents. It's a great old game anyway, just look what it made out of William Tilden.

Another marriage took place last week, and another football player is doomed to settle down and become a family man. I will just bet one thing and that is this, if Lutie Benson had seen Ralph play football any one of the past four seasons, he would not have finished his last years in high school a single man.

If these Wellington football stars and high school graduates keep on marrying there will be a need addition to the entrance examinations of all of the leading colleges, for instance: Did you ever play football on the Wellington high school team, and if so when did you get married?

Two local boys were on a trip and while they were eating in a cafeteria both of them happened to spy a good looking cashier at the same time. By mutual agreement they decided to argue over the check, and in the course of time, get to talking to the girl. The walked up to the desk and the first one said: "Have you got change for this five?"

"No! No! Let me get that check" was the response from the other.

"Alright," said the first one and walked out.

The boys refused to let their names be used but it won't be very hard for you to guess which one of the two was telling it.

There are better games than that though and here is how it is done. Just go up to the theatre window and say: "Oh, hello, how are you now? Isn't this the hottest weather you ever saw? I will bet

it is sure cool in there with your new system, say what are you showing now. Oh yeah, I saw that when I was in Amarillo last week. You wouldn't mind if I went and sat where it is cooler would you? Oh, you are so sweet."

Then just go in and enjoy the show.

With one of the biggest baseball series ever held in Wellington, starting next Wednesday, it is pretty hard to find Johnnie Wallace these days and when you do he always tries to sell you a new fall suit.

Some of the most important men in town are still reading the Wellington Leader, and this we know, on account of Murray Wiley is running the leader down because it predicted that with another rain the crops in Wellington would be of the bumper variety. He says that they get through telling a man that he can't have a loan because the frost is sure to get his cotton if it does not burn up before hand and the man goes out and reads the Wellington Leader and then comes back and says he knows that they will not because the paper said so.

Now that we have had rain, it seems that the populace upon which it was visited are wondering why the boll weevils don't come on and eat their crops up. After all life is something like driving around the square on Saturday, it is a "hit or miss" proposition.

The same children's games have been played in certain rural districts of England for 1,000 years.

"The Idle Rich" Has Fine Cast

Will Be Shown At Ritz
Theatre on Thursday
And Friday

There is one splendid example of the superiority of the talking picture over both the silent screen and the stage.

"The Idle Rich," as a new 100 percent talkie from Metro-Goldwyn Mayer, brings to us a picturization of the famous play, "White Collars," a story of an American family that is delightfully intimate and very real in dialogue, action and atmosphere. In directing this novel domestic comedy William de Mille takes us into the bosom of the Thayer family and makes us laugh and cry with them rather than at them.

The cast chosen for the picture which will open at the Ritz Theatre, is obviously a hand-picked one. Conrad Nagel, Bessie Love and Leila Hyams share stellar honors, and those lovable old troupers, Edythe Chapman and James Neill run close seconds as the mother and father. Robert Ober and Paul Kruger are great as Cousin Harry and Tom Gibney, and they rightfully should be, for they played the same parts on the stage for four years.

In filming this cross section of the middle classes De Mille has shown his mastery of stage direction and dialogue spacing. His atmospheric sound effects, the clatter and bang of flat dwelling life, is fitting raucous as a background. There is no attempt whatever at ostentation and the sheer simplicity and crowdedness of the settings is in keeping with the theme.

Nagel, of course, is ideally cast as the multi-millionaire who marries his middle-class stenographer, Leila Hyams, in the picture. Miss Love, who scored such a triumph in "Broadway Melody," is the flapper little sister who is content with her truck-driver sweetie and perky \$8 dresses.

The original play is by Edith Ellis and the talkie adaptation by Clara Beranger.

At Emmerich, Germany, the populace so delighted in crossing the frozen Rhine on foot that traffic policemen had to be called.

At New Desk

Here's Mrs. Mabel Walker Willard, former assistant attorney-general in charge of prohibition enforcement, as she assumed her new duties as Washington consul for a bin aviation corporation.

After 101 Years Matagora Gets Light System

Matagorda, one of the oldest towns in Texas, recently celebrated the introduction of electric lights after existing as a town 101 years without that convenience. The Central Power & Light company, is supplying the town.

The new air line connecting Miami, Fla., and Bolledno, Peru, has reduced the mail service from four weeks to six days.

Blown by a gust of wind a pigeon recently smashed the large white porcelain window of the Christ Church, Ealing, England.

Clarendon Holds Golf Tournament

Inaugurating an annual invitation tournament for the golfers of the Panhandle the Hillcroft Golf Club issued today invitations to the golf clubs of this section for the first meeting which will be held here on Friday, Saturday and Sunday, September 6, 7, and 8.

The tournament will be conducted under U. S. G. A. rules, with certain local ground rules in effect and will give Panhandle golfers opportunity to match their skill against the sporty Hillcroft course here which is regarded as one of the best in the territory. All entries must be registered by nine o'clock Friday morning, Sept. 6th, the first day being given over to eight-hole qualification rounds. Match play will begin the morning of Sept 7, the field being divided into four flights. Eliminations continuing until Sunday afternoon, Sept. 8th.

A tempting array of cups, trophies and merchandise prizes is being arranged by Hillcroft officials, and from the advance interest manifest no less than one hundred golfers from Panhandle towns will tee off the first day for the grueling three day match.

Elegant cups will be awarded to best team play, and for best attendance from visiting clubs, while

suitable trophies and prizes will be given to the low medalist and runner-up in qualification. In the four flights there will be first and second prizes and a consolation prize will be awarded in all flights. The Hillcroft First Annual Invitation Tournament, coming as it does just before the fall rush of business will bring to Clarendon best golfing talent in the Panhandle and some very low scores will likely be chalked up in the three days' affair. The entrance fee has been set at \$2.00 per player and special accommodations have been arranged for at local hotels.

Superintendent Gives Out Rules On Public School

Pointers Given On How to Expedite Registration At Opening

G. L. Farrar has given out the following condensed rules which should be observed by both teachers and pupils to facilitate the opening of the 1929 session.

"Please bear in mind these dates regarding the opening of school:

1. The teachers will attend the institute at Canyon, Texas, the 2, 3, and 4 of September.

2. The seniors of the Wellington high school will be classified on Thursday, September 5. We require 11 affiliated credits to enter and participate in the activities of the senior class.

3. The juniors will be classified on Thursday, Sept. 6. We require at least affiliated credits to enter the junior class and participate in its activities.

4. The sophomores and freshmen will be classified on Saturday, September 7. We no not require entrance examinations for pupils from unaffiliated schools to enter the freshmen class. They should, however, bring their credentials on the day of classification. Those from unaffiliated schools claiming sophomore standing will be given the entrance examinations.

5. All pupils from unaffiliated schools who claim standing above the freshmen class will be given the entrance examinations on the 5, 6, and 7 of September. Applicants should notify G. L. Farrar, box 204, Wellington. It is quite necessary that the pupils make their application in writing before the opening of school in order that we may have time to arrange the examinations with a view to the least possible loss of time.

6. The Wellington school will open for work on Monday, Sept. 9. The opening exercises for the high school will be held in the high school auditorium at 9:00 A. M. with Senator Small, of Wellington, as the principal speaker.

7. Pupils belonging in the Beat and West side schools of the Wellington system will be classified and handed their books on Friday, Sept. 6. The doors of these two schools will be open at 9:00 A. M. on that day for the purpose just mentioned.

8. Graduates of the Wellington who desire to have their credits sent to some college or university will please call telephone number 245, Wellington. Please attend to this matter before we get busy with the various matters pertaining to the opening of school."

"Fall of Eve" To Begin Friday

In "The Fall of Eve," the Columbia all-talking film playing at the Ritz Theatre Friday and Saturday, modern Eve holds forth in all her glory. A modern Garden of Eden; modern Adams and Eves and present day "Apples" and "Snakes" all play important parts in the story. Where there was only one snake and one apple in the original Garden of Eden, there are hundreds of each in the world today. The first Eve had only one temptation to resist, the modern Eve has many.

The Garden of Eden was all that the world's first heroine had to lose. Being the only woman, she had neither friends nor rivals for

Rialto FRI. and SAT.

Quickly Recovers His Old Strength

"The Sargon treatment is simply wonderful for bringing back strength and energy for now, after a few weeks taking it, I feel like

a different man entirely.

"On account of my work I was forced to eat and sleep irregularly for a long time, the result that I became very run down and debilitated. Chronic indigestion gradu-

ally weakened me and kept me in bad health. I would suffer terrible pains after every meal, no matter how light it was. At night these pains robbed me of sleep and my condition finally got so bad I couldn't even eat an orange or a grape fruit without suffering afterwards. Naturally, I was always tired and listless.

"Then I started Sargon—and commenced to feel better right from the beginning. I now enjoy my food and my digestion is fine. I'm never bothered with stomach trouble and get plenty of good, sound sleep. I feel better and stronger than I have in years—and I'll never be without Sargon again."—E. D. Frank, 1610 20th St., Galveston, Texas.

her husband's affections. Since there was as yet no moral code, she had no reputation, good or bad, to lose; and as she slept in the open air and there was no such thing as money she could neither lose her fortune nor the roof over her head.

When the Eve of 1929 listens to the lure of the serpent and two-times her boy friend, she risks the loss of her friends, home, man reputation and money. The modern Eve in "The Fall of Eve" is up against this situation but is clever enough to come out of it all unscathed. Supporting Patsy Ruth Miller, as the modern Eve, are the modern Apples Snakes and Adams portrayed by Ford Sterling, Gertrude Astor, Arthur Rankin, Jed Prouty, Betty Farrington, Fred Kelsey, and Hank Mann. Frank Strayer directed.

Special Trained Mechanics Are Like Specialists

Oakland Service Manager Says Garage Now Is Auto "Clinic"

A striking analogy between the procedure followed at the modern automobile station and the methods in vogue at the present day medical clinic is drawn by R. A. Armstrong, service manager for the Oakland Motor Car company.

"In recent years the ways and means of maintaining both the human body and the automobile at the highest peak of efficiency have progressed along strikingly similar lines," declared Mr. Armstrong.

"Not long ago, a large majority of the medical profession was composed of general practitioners—physicians who attempted to treat all the ills to which human flesh is heir.

"And identically the same condition obtained in the field of automobile service. The Mechanics in the service stations of that day tried their hand at maintaining all the various designed cars of different make. Each man possessed a smattering of general service knowledge about different cars and each was assigned in rotation whatever maintenance job was next to be done.

"But the medical profession today has largely split into specialized branches of practice. We now have the eye specialist, the specialist who treats only stomach diseases, the expert on spinal troubles, the pediatricist and many others whose professional activities are equally concentrated. In a modern clinic usually is found a diagnostician who merely locates the patients difficulty and then assigns him to a man specializing in that particular ailment. Apparently the medical profession realized that no one man can possibly excel in the treatment of every disease. Specialization was the natural result.

"And the same evolution is taking place in the profession of automobile servicing. Like the human body, the automobile is a mechanism so intricate and so finely built that no individual can achieve maximum skill in servicing the entire field of automobiles. This is true because of wide variance of design among different types of cars which require servicing knowledge. Thus we have seen the gradual development of automobile service specialists—men who devote their entire time to the maintenance of one type of automobile. Of course like the average medical specialist, these service specialists possess a comprehensive background of general servicing knowledge. Just as the medical specialists know the entire human body, so do they possess general knowledge about all makes of cars. But they know more about their own car than any general mechanic can ever know.

"The Oakland Motor car company provides special factory training for the mechanics who comprise its army of service specialists in Oakland-Pontiac garages throughout the country. The company maintains a 'medical college' or laboratory where classes of mechanics are brought in from the field each week for factory instruction. In addition to this instruction to men already employed in Oakland-Pontiac garages, the factory conducts one-year course of intensive instruction for large classes of student mechanics. After 'graduation' they return to their home towns as service managers or special service mechanics.

"Of late years, individuals, who value health as their greatest asset have adopted the custom of subjecting themselves every year or every few months to a complete physical inspection. They undergo tests to determine the condition of their teeth, blood, heart, lungs and in fact every portion of the body. Thus minor and incipient ills may be discovered in time to be easily remedied. Naturally this regular inspection by experts results in better health and higher physical efficiency.

"Now the same custom is spreading among thinking motorists. Cars are brought in for periodical inspection. Although the automobiles may be performing most excellently the trained eye or ear of the service specialist may detect and remedy some minor difficulty that later might prove serious. Just as the individual assures himself of continued health and long life by regular medical inspection, so also does the intelligent motorist assure his car of high efficiency and long trouble-free operation by regularly subjecting his machine to the inspection of our Oakland-Pontiac service specialists.

"I would like to reach every Oakland or Pontiac owner with this message. Don't wait until you believe your car requires adjustment or service.

It's Germany's New 100-Passenger Plane

It's the largest plane in the world, this craft pictured here, the huge 100-passenger plane which recently made successful trial flights at Friedrichshafen, Germany. The ship carries a crew of 12 men. Three decks provide space for luggage, passengers and crew, the middle deck offering passengers luxurious quarters. The 12 motors which enable it to have a cruising speed of 112 miles an hour can develop 500 horsepower apiece. Incidentally, the plane is 137 feet long and has a wing spread of 157 feet.

Ways To Harvest Sweet Clover Seed

To get the most and best seed from the sweet-clover crop, harvesting should be done when about half of the pods are black, as the seed matures unevenly. The self-rake reaper is a good machine for cutting. A mower will cause heavy loss of seed. Self binders and even corn binders are sometimes used. Self-binders can be equipped with pans for saving shattered seed. On some farm machines have been devised that beat the seed off and leave the stalk standing. These machines are made by installing a heavy reel with four to six bars on an old binder. These machines are so geared that each plant is struck several times as the machine moves forward and the seed is thrown back into a box. On some machines a coarse wire screen is thrown back into a box. E.T.A.O.I.N. placed back of the reel so as to keep leaves and coarse sticks from going into the seed box. The seed must be removed from the box and spread out to dry, and if the weather is damp or the pile of seed deep, the seed must be stirred frequently.

Trade where you can get tickets.

Checking Losses In Spring Wheat

"Docking" the losses from dockage in spring wheat can be accomplished by the use of a self-cleaning screen at threshing time, says the U. S. Department of Agriculture. The self-cleaning screen consists of a series of agitating racks rubbing on the under-side of the screen which remove it from clogging. Over 800 of these self-cleaning screens were used in the spring-wheat area in 1928 and successfully removed large quantities of small weed seeds and part of the wild oats. The average feeding value of dockage produced each year in the spring-wheat area from wheat, flax and rye is about \$10,000,000. If this dockage is removed as part of the threshing operation, it can be used as livestock feed and handling charge for it will be saved. All dockage fed to livestock should be ground to prevent spreading weed seed on the farm.

Trade with the merchant that gives tickets.

Storing Persimmons In China

A unique method of open-air cold storage is used for storing persimmons in northeastern China, says Dr. P. H. Dorsett, agricultural explorer of the U. S. Department of Agriculture. Practically the entire winter's supply of persimmons grown in the vicinity to the north of Peking, amounting to many millions of fruits, is stored in outdoor beds along terraced river banks, in orchards along streams in village compounds, and on river bottoms of sand and gravel. The fruit is without protection of any kind except the bed of kaoliang stems (a kind of sorghum) and a thin covering of red-grass matting which, after the fruit is frozen, is supplemented with a covering of dry mountain grass or other litter to a depth of about two feet. The fruit is thawed out by the consumer as wanted. Thawing is done in the open or by putting the fruit into cool water and thawing it slowly, when it is as good to eat as when freshly picked.

It won't be long now. Ask for your tickets.

Doris Dukeminer and Velma Dukeminer had their tonsils removed Tuesday morning at Dr. High's office.

Will Fly Atlantic Westward

Captain Charles Kingsford-Smith, right and C. T. Ulm are heading back for America in the "Southern Cross." Having traveled through the air from America to Australia and from there to England, they will hop off soon on a trans-Atlantic flight to New York.

Ants Keep "Cows" To Insure Good Private Stock

Aphids, or plant lice, are one of our most remarkable group of insects, one of the most interesting facts about them being their association with ants. Ants are very fond of the excrement of aphids, known as honeydew, and will attend their "cows" very carefully, carrying them from one place to the other where the "pasture" may be better. With underground aphids, the ants carry them from one plant to the other, and sometimes build a shed of soil over a colony of aphids above ground to protect them.

Buy it in Wellington and get tickets.

Cleaner Fields Will Prevent Tobacco Germs

Control of tobacco diseases, as of other plant diseases, should be based on prevention rather than on cure. It is not too early now to reduce the chances of infection in next year's crop. If seed beds are infected with any leaf disease, plow under the plants as soon as you are through with them, advises the U. S. Department of Agriculture. Sometimes it is well to locate the seed bed elsewhere for the following crop. Do not save seed in wildfire or blackfire infested fields unless you plan to disinfect the seed thoroughly. If the field crop is affected with wildfire, blackfire, or mosaic, plow the land as soon as possible after harvest. Do not store seed-bed frames, or cloth covers over winter in curing sheds with infected tobacco, as this may introduce the disease in the seed bed again next spring.

Watch for card in window. They give tickets.

Six Cent Cheese Makes Good Bait For Anglers

Cheese at 6c a pound, probably makes economical fish bait, but it is surely far from profitable for a cheese factory to produce cheese of such poor quality that only six cents a pound will be received. Such, however, was the situation found at a cheese factory recently visited by a specialist of the Federal Bureau of Dairy Industry. By adopting improved manufacturing methods recommended by the specialist this factory was able to make cheese of such improved quality that no trouble was experienced in marketing it at the current market price which at the time was 22 cents a pound.

Mrs. R. C. Stephenson returned Monday after a visit in Oklahoma with friends.

J. D. Holland and wife and son J. D. Jr., of Amarillo spent the week end in the home of Mr. and Mrs. A. P. Smith.

Hogs Thrive On Alfalfa And Help Stand

Hogs thrive on alfalfa pasture and cause less injury to the stand than heavier livestock. The carrying capacity of alfalfa depends on the stand and the locality, but ordinarily an acre of good alfalfa will carry from 8 to 10 hogs weighing 100 pounds each with little danger of injury to the stand. In the East where a stand is more easily injured by overgrazing, it is not advisable to carry as many hogs as in the irrigated parts of the West. To get hogs into condition for market, it is necessary to feed a small quantity of grain with alfalfa pasture. With this combination, hogs can be made ready for market cheaper than by any other feed. A grain ration of 2 pounds for every 100 pounds of liveweight has been found the most economical, though with a larger grain ration the gains are more rapid and the returns per acre somewhat higher.

Watch for the big card in the window. They give tickets.

Grain Mixtures For Cows Need Few Proteins

A grain mixture for cows on good pasture as a rule have as high a percentage of protein as the winter ration. The two following grain mixtures for supplementing pasture, without other roughage, are recommended by the U. S. Department of Agriculture: Ground oats, 100 pounds; wheat bran, 100 pounds; and corn meal, 50 pounds; or wheat bran, 100 pounds; corn meal 100 pounds; and cotton seed meal, 25 pounds.

Lower Key Rate On Insurance In Comanche

Comanche's insurance key rate has been reduced 4 cents with the installation of the new pump. This brings the key rate down to 40 cents. This will allow mercantile establishments to carry full-value insurance instead of three-fourths as heretofore.

Wooldridge Yard Is Robber Friday

Burglars entered the J. C. Wooldridge Lumber Co., last Friday night and took \$73.25 in cash and checks. The following checks were included, and all of them were made out to Wooldridge Lumber Co.: T. D. Summers, \$25.00; Ed Riley, \$7.20; Independent School District of Wellington, \$10.00, endorsed by W. W. Neely; Q. T. Nicholson, \$6.05 on F. and M. Bank at Shamrock.

Anyone who presents one of these checks should be reported to Mr. Wooldridge or to the Retail Merchants Association as soon as possible.

Ace of Clubs Meets With Mrs. Walter King

Mrs. Walter King was hostess to the Ace of Clubs at her home last Thursday afternoon. At bridge Mrs. John West was winner of high score for guests, Mrs. Vernon Morris, high score for members and Mrs. Leonard Merritt, winner of low score for members. Attractive cut prizes went to Mesdames Ansel McDowell, Vernon Morris, and Leonard Merritt.

Attending were: Mrs. Floyd Shields, Mrs. Clarence Hunaker, Mrs. LeMoine Edwards, Mrs. Ansel McDowell, Mrs. Sandy Parsons Jr., Mrs. Vernon Morris, Mrs. John West, Mrs. Jess Hancock, Mrs. Fred Taylor, Mrs. Leonard Merritt, Miss Annabelle West and Miss Eva Glenn.

Mr. and Mrs. Fuller Entertain With Bridge Party

Mr. and Mrs. Joe Fuller entertained their sister Mayme Lou and seven guests with a bridge party at their home of 1004 Bowie street. High score for ladies went to Miss Mayme Lou Fuller while Frewen Morrow received high score for men.

The guest list included Misses Lois Sherwood, Iona Foraker, Mayme Lou Fuller; Messrs. Frewen Morrow, Herschel Combs, John Gentry; Mr. and Mrs. J. N. Wallace and host and hostess.

Mrs. Roy Pinkston Entertains Thursday Luncheon Club

It was to entertain members of the Thursday Luncheon Club that Mrs. Roy Pinkston entertained Thursday afternoon at her home, 905 South Floyd.

A green and lavender color scheme was carried out in all the appointments for the occasion. Flowers in the same shade, artistically arranged were used as centerpiece, while other bowls were placed here and there in the rooms.

At bridge Mrs. J. B. Stevenson won high score prize and Mrs. Earnest Lewis won second high score prize.

Covers were laid for a luncheon. Present were Mrs. C. C. Small, Mrs. E. N. Lewis, Mrs. Pink Sullivan, Mrs. Lee O'Neil, Mrs. Roy Horn, Mrs. C. G. Bower, Mrs. Earnest Lewis, Mrs. J. B. Stevenson, Mrs. Morris Wells, Mrs. Earnest Winn, Mrs. W. R. Orr, Mrs. Ralph Lewis of Arizona, Mrs. Pickrel, Mrs. LeRoy Long of Oklahoma City, Okla., Mrs. E. W. Alley, Mrs. Deskins Wells, Mrs. Ben Boston, and hostess.

Business Meeting of Domestic Science Club Held Tuesday

A miscellaneous program has been planned for the Domestic Science Club for the ensuing Club year. At a business meeting of the Program Committee in the home of Mrs. Lee O'Neil Tuesday morning, four programs on the State of Texas, four on music, four on insurance, four on the home, and many other subjects were arranged for the club.

The club will meet the first Wednesday after the county fair is over in September.

The following were present at this meeting: Mrs. Pink Sullivan, Mrs. W. R. Orr, Mrs. Cleo Templeton, Mrs. Ben Stever, Mrs. C. C. Small, Mrs. Roy Pinkston and Mrs. Lee O'Neil.

Miss Emanuel Entertains With Slumber Party

Miss Margaret Emanuel was hostess to a group of girls last Saturday when she entertained with a slumber party. In the early part of the evening the girls and their dates were entertained at the slumber party.

The guests at the slumber party were: Miss Thelma Lucas, Miss Lottie Mae Green, Miss Tennoka Bell, Miss Marion Sewell, Miss Mildred Scruggs, Miss Mary Lewis, Miss Pattie Lee Lewis, Miss Oletha Vaughn, Miss Virginia Phillips, Miss Margaret Goforth, Miss Dorothy Hunt, Miss Lucille Miller, Miss Lois Miller, Miss Greta Mae Cayton, Miss Johnnie Helm, Miss Al Helm, Miss Clara Castleberry, Miss Aylene Blaine, Miss Pauline Fox, Miss Lina Rose Carson of Corsicana and hostess.

Better be safe than sorry. Call for your tickets.

Back With Cards

Bill McKechnie, above, deposed as manager of the St. Louis National League team during the winter after he had won a pennant with the Cards last season, again is manager of the club. He was appointed to succeed Billy Southworth had failed to keep the club in the pennant race.

Big Spring Will Open Airport

On September 11-12, the city of Big Spring will dedicate its 230 acre air port which is equipped with two steel hangars, 80 x 100 feet, 60 x 80 feet, machine shop 40 x 60 feet, five room administration building built of tile and stucco, telephone, telegraph and restaurant accommodations and is lighted with border, flood and beacon lights.

A program that will be an aid in furthering aviation in Texas has been planned by the general arrangement committee representing the American Legion, Chamber of Commerce, City Commission, County Commissioners, Kiwanis Club, Business Men's Club, Rotary Club, Lions Club and Retail Merchants' Association represented by E. E. Fahrenkamp, R. V. Middleton, C. S. Bloomfield, H. O. Timmons, R. King, McCall Gary, and Joyce Fisher.

One of the unique features of entertainment will be a parade to be staged on the morning of the second day illustrating the evolution of transportation showing the primitive modes of travel to the present day, the parade to be ended with decorated floats and automobiles of practically every business firm of the city. The Pathe News Service has signified its desire to be here and produce a movietone production of the event. Approximately \$2,000 will be given in premiums for aeronautical maneuvers such as stunt flying, balloon bursting, wing walking, parachute jumping, dummy bomb dropping, spot landing, dead stick landing and races, the races to include provisions for ships of ninety horsepower or less and free for all.

Among the invitations issued to air celebrities and people of national reputation to be present and participate in the program are Col. Lindbergh, Miss Amelia Earhart, Miss Ruth Elder, Capt. Ira Eaker, Gov. Moody, Senator Tom Connolly, Representative Penrose Metcalf, Mayor Thompson, Mayor Flores of Jaurez and others. The U. S. Army will have planes here to participate in the program of the air according to statements issued from Washington. Free entertainment features are being planned for the occasion such as receptions, teas, dances, barbecues, etc. by Shine Phillips, Chairman of the Entertainment Committee.

El Paso Herald To Publish C. of C. Edition Soon

The El Paso Herald is obtaining material for the special West Texas chamber of commerce edition which will be published shortly before the eleventh annual convention there October 24, 25 and 26.

Officers of the 1924 Study Club Meet Monday

Officers of the 1924 Study Club met last Monday at the home of Mrs. C. E. High to discuss and review the year book and course of study which has been planned for the club. The study for the year will be a "Review of English Literature", the lives and works of the writers from Chaucer on down to modern writers will be studied.

This year the club has a standard year book, which will be entered in the year book contest of the Seventh District of Federated Clubs. The year books are printed and conform to standard size and other requirements.

The first meeting of the club will be held the second Thursday in October.

Iowa Park Oil Man Testifies

Wife Gains on Orgatone; "Wouldn't Be Without It," He Says

Still another well known and popular oil stillman came forward with his unqualified endorsement for Orgatone. This time it is Jim Kelly, a well-known stillman of this district who resided on rural route 1, Iowa Park, Tex.

"My wife has actually gained wonderfully since she began taking Orgatone," said Mr. Kelly, in an interview recently, "and it seems impossible for anyone who was suffering as she was to have gained such complete relief in so short a time."

"She has been in such a nervous, run down condition for the past several years that she didn't feel like her old self at all. She was subject to frequent attacks of sick headache and often had spells of dizziness. She also suffered intense pain from the gas on her stomach, especially after eating. She was constipated and had practically no appetite.

"She has been wonderfully benefited by Orgatone, in fact, I consider it remarkable the way she has been built up, for she is almost like a different person. She has been relieved entirely of stomach trouble, head ache and nervousness. I am delighted more than I can tell with what Orgatone has done for her, and we would not be without it now for anything. It is by far the best medicine she has ever taken."

Genuine Orgatone may be obtained at Wellington by the Palace Drug Co.

Frank Price Jr. Dies Last Sunday

Frank Price, jr., 10 months old son of Mr. and Mrs. T. P. Price, died at 9:42 Sunday morning from a stroke of paralysis. The funeral was held at 2 p. m. Sunday and was conducted by Rev. C. R. Joyner, local pastor of the Baptist church. He was buried in the Wellington cemetery.

Frank, jr., had been in bed for two weeks and had not been conscious for the past week. He was the only child of Mr. and Mrs. Price. His death is regretted very much by friends of the family.

CARD OF THANKS

We wish to thank our friends and neighbors who were so kind to us during the illness and following the death of our son Frank Price, jr. Your kindness and sympathy has made our burden lighter, and we are extremely grateful for your many kindnesses.

Mr. and Mrs. J. P. Price.

If not why not trade where you get tickets.

Camp Warner Has Firework Display

Featuring a pyrotechnical display in which Joe Hardy used all the fireworks which he had left over from Christmas, Boy Scouts encamped at Camp Warner, near Claude, Texas, were entertained royally last Sunday night according to the statement of I. M. Jolly, scout executive.

Mr. Hardy, Dr. E. W. Jones, and J. B. Castleberry went to the Scout camp for the purpose of entertaining the boys and besides the fireworks carried several boxes of fruits and other food. "The boys all enjoyed the generous donations very much," Mr. Jolly said.

ORDINANCE 222

Defining "milk" and certain milk products "milk producers" "pasteurization" and etc. Prohibiting the sale of adulterated and misbranded milk and milk products requiring permits for the sale of milk and milk products, regulating the inspection of dairy farms and milk plants. The testing, grading and labeling placarding. Pasteurization regarding distribution, sale and denaturing of milk and milk products. Providing for the publishing of milk grades, the construction of future dairies and milk plants. The enforcement of this ordinance and the fixing of penalties and declaring an emergency.

Be it ordained by the City Council of the City of Wellington as follows:

SECTION 1. Definitions. The following definitions shall apply in the interpretation and the enforcement of this ordinance.

MILK. (A) Milk is hereby defined to be whole, fresh, clean, lacteal secretion obtained by the complete milking of one or more healthy cows, properly fed and kept, excluding that obtained within fifteen days before and five days after calving, or such longer period as may be necessary to render the milk practically colostrum free, which contains not less than eight and one-half per cent of solids not fat and not less than three and one-fourth per cent of milk fat. Milk fat or butter fat is the fat of milk and has a Reichert-Meisner number of not less than twenty-four (24) and a specific gravity of not less than 0.905 (40c/40c).

CREAM. (C) Cream, sweet cream is that portion of milk, rich in milk fat, which rises to the surface of milk on standing or is separated from it by centrifugal force, is fresh and clean, and which contains not less than eighteen per cent preferable twenty per cent milk fat; providing that the cream having less than eighteen per cent milk fat shall be known as sub-standard cream.

Cream having less than thirty per cent milk fat shall be known as light cream.

Cream having thirty per cent or more and less than forty per cent milk fat shall be known as heavy cream and cream having forty per cent or more milk fat shall be known as extra heavy cream.

Whipping cream and manufacturing cream are creams containing not less than 30% milk fat intended for whipping or manufacturing purposes, and the grades of same shall not be based on bacterial count.

SKIMMED MILK (D) Skimmed milk is milk from which substantially all the milk fat has been removed.

CHOCOLATE MILK. Chocolate milk is defined as whole or adjusted or skimmed milk to which has been added in a sanitary manner, a chocolate syrup composed of wholesome ingredients, and which is labeled with the grade of milk or milk products from which it is made. If chocolate milk contains less than three and one-quarter per cent (3¼) milk fat, the label shall indicate the percentage of milk fat to which the milk has been adjusted. (This section is optional with states.)

BUTTER MILK (F) Butter-milk is the product which remains when milk fat is removed from milk or cream, sweet or sour, in the process of churning. It contains not less than eight and five-tenth per cent (8.5%) of milk solids not fat.

CULTURED BUTTERMILK (G) Cultured buttermilk is the product resulting from the souring of treatment of a lactic acid culture of milk or milk products.

EXAPORATED MILK (U - unsweetened) (H) Evaporated milk (unsweetened) is milk from which a considerable portion of water has been evaporated and which contains not less than twenty-five per cent (25%) of five-tenths per cent (25.5%) of milk solids and not less than seven and eight-tenth (7.8%) milk fat.

CONDENSED MILK (Sweetened) (I) Condensed milk (sweetened) is milk from which a considerable portion of water has been evaporated, to which sugar has been added, and which contains not less than twenty-eight per cent (28%) of milk solids and not less than eight per cent (8%) milk fat.

CONDENSED SKIMMED MILK (J) Condensed skimmed milk is skimmed milk from which a considerable portion of water has been evaporated and which contains not less than twenty per cent (20%) of milk solids.

POWDERED (dried milk) Whole Milk. (K) Powdered whole milk is milk from which substantially all the water has been removed, and which contains not more than five per cent (5%) of moisture.

POWDERED (dried) Skimmed Milk. (L) Powdered skimmed milk is skimmed milk from which substantially all the water has been removed, and which contains not more than five per cent (5%) of moisture.

RECOMBINED MILK (M) Recombined milk is a substance produced by combining powdered

whole milk, powdered skimmed milk, condensed or evaporated whole milk or skimmed milk and butter fat, with water and shall conform in milk fat percentage and bacterial counts to the provisions of this ordinance relating to milk.

MILK PRODUCTS (N) Milk products shall be taken to mean and include cream, skimmed milk, adjusted milk, buttermilk, cultured buttermilk, evaporated milk (unsweetened) condensed milk (sweetened) condensed skimmed milk, powdered whole milk, powdered skimmed milk and combined milk.

PASTEURIZATION. (O) The terms, "pasteurization," "pasteurized," "pasteurize" and similar terms shall be taken to refer to the process of heating every particle of milk or milk products to a temperature of not less than one hundred and forty-five degrees (145) Fahrenheit, and holding at such temperature for not less than thirty (30) minutes in pasteurization apparatus approved by the health officer, the temperature and time being automatically recorded by a temperature and recording device approved by the health officer.

ADULTERATED MILK AND MILK PRODUCTS (P) Any substance claimed to be any milk or milk product defined in this ordinance but not conforming with its definition as given in this ordinance shall be deemed adulterated and misbranded.

MILK PRODUCER (Q) A milk producer is any person, firm or corporation which own or controls one or more cows, a part or all the milk from which is for sale, or sold or delivered to another person, firm or corporation. This section shall not be construed to include what is generally known as "family cows."

MILK DISTRIBUTOR (R) A milk distributor is any person, firm or corporation which has in possession, offers for sale, sells, or delivers to another any milk or milk products for consumption or manufacturing purposes.

DAIRY OR DAIRY FARM (S) A dairy or dairy farm is any place or premises where one or more cows are kept, a part or all of the milk or milk products from which is sold or delivered to any persons, firm or corporation. This section shall not be construed to include what is generally known as "family cows."

MILK PLANT (T) A milk plant is any place, or premises or establishment where milk or milk products are collected, handled, processed, stored, bottled, pasteurized, or prepared for distribution.

MILK OFFICER (U) The health officer shall be taken to mean the health officer of the city of Wellington in person, or his authorized representative.

Average Bacterial Count (V) Average bacterial count shall be taken to mean the average of the bacterial counts of all samples taken during the grading period, including any last four samples taken upon separate days.

Grading Period (W) The grading period shall be such period of time as the health officer may designate, within which grades shall be determined for all milk and cream supplies, provided that the grading period shall in no case exceed six months.

Disinfectant (X) A disinfectant is any germicidal substance approved by the health officer.

SECTION 2. The sale of adulterated or misbranded milk or milk products prohibited.

No person, firm, association or corporation shall within the City of Wellington produce, sell, offer or expose for sale, or have in possession with intent to sell any milk or milk products which is adulterated or misbranded.

SECTION 3. Permits.

It shall be unlawful for any person, firm, association, or corporation to bring into or receive into the City of Wellington, for sale or to sell or offer for sale therein, or to have on hand any milk or milk products, excepting evaporated milk, condensed milk, condensed skimmed milk, powdered whole milk, and powdered skimmed milk, who does not possess and unrevoked permit from the health officer of the City of Wellington, and on whose vehicles or in whose place of business there does not appear in a conspicuous place a placard showing the permit number in figures at least three and one-half inches wide.

Such a permit may be revoked by the health officer upon the violation by the holder of any of the terms of this or any other health ordinance of the City of Wellington, provided that the holder of said permit shall, after complying with such revocation, have the right of appeal to the board of health.

SECTION 4. Labeling and placarding.

All bottles, cans, packages, and other containers enclosing milk or any milk products defined in this ordinance shall be plainly labeled or marked with (1) the name of the contents as given in the contents, are graded under the provision of this ordinance; (2) the

grade of the contents if said contents are graded under the provisions of this ordinance; (3) the word "pasteurized" if the contents have been pasteurized; (4) the "raw" if the contents are raw; (5) name of producer or distributor. The label or mark shall be in letters of a size and kind approved by the health officer and shall contain no marks or words not approved by the health officer.

Every grocery store, restaurant, cafe, soda fountain, or similar establishment selling or serving milk shall display at all times, in a place designated by the health officer, a card furnished by the health officer stating the grade of milk at the time when delivered and whether same is raw or pasteurized.

SECTION 5. Inspection of Dairy Farms and Milk Plants for the Purpose of Grading or Regrading.

At least once during each grading period the health officer shall inspect every dairy farm producing milk or cream for consumption within the City of Wellington, and all milk plants whose milk or cream is intended for the consumption within the City of Wellington. In case the health officer discovers the violation of any item of sanitation he shall make a second inspection after a lapse of such time as he deems necessary for the defect to be remedied but not before the lapse of three days, and the second inspection shall be used in determining the grade of milk or cream. Two violations of this ordinance within any one grading shall call for immediate regrading.

One copy of the inspection report shall be posted by the health officer in a conspicuous place upon an inside wall of one of the dairy farm or milk plant building and said inspection report shall not be removed by any person except the health officer. Another copy of the inspection report shall be filed with the records of the health department.

SECTION 6. The Testing of Milk and Milk Products.

During each grading period at least four samples of milk or cream from each dairy farm and each milk plant shall be tested by the health officer. Samples of milk and cream from stores, cafes, soda fountains, restaurants, and other places where milk products are sold shall be tested as often as the health officer may require. Bacterial counts shall be made in conformity with the plate-count method of the standard methods recommended by the American Public Health Association. Tests may include such other chemical and physical determinations as the health officer may deem necessary for the detection of adulteration. Notice of bacterial counts shall be given to the producer or distributor concerned as soon as made, or to any interested person on request. Samples may be taken by the health officer at any time prior to the final delivery of the milk or milk products. All stores, cafes, restaurants, soda fountains and other similar places shall furnish the health officer, upon his request with the name of the milk distributor from whom the milk is obtained.

Should the market value of any single sample exceed twenty-five cents the City of Wellington shall pay the distributor therefor.

SECTION 7. The Grading of Milk and Cream.

At least every six (6) months the health officer shall announce through the press the grades of all milk and cream supplies delivered by all producers or distributors and ultimately consumed within the City of Wellington. Said grades shall be based upon the following standards, the grades of cream being identical with the grading of milk;

Certified Milk. Certified milk is milk which conforms with the requirements of the American Association of Medical Commissions, and is produced under the supervision of the Medical Milk Commission of the Medical Society of City County, and of the State Board of Health or City or County Health officer.

Grade "A" Raw Milk. Grade A raw milk is milk the average bacterial count of which is determined under section 6 of this ordinance does not exceed 50,000 per cubic centimeter, and which is produced upon dairy farms conforming with all of the following items of sanitation.

Cows: Tuberculosis and other Diseases. A physical examination and tuberculin test of all cows shall be made before any milk therefrom is sold, and at least once every twelve months thereafter by a veterinarian approved by the health officer or by the state livestock sanitary authority, and said tests shall be made and any reactor disposed of, in accordance with the current requirements approved by the United States Bureau of Animal Industry for accredited herds.

A certificate signed by the veterinarian and filed with the health officer shall be the only valid evidence of the above test. Every

diseased animal shall be removed from the herd at once and no milk from diseased cows shall be offered for sale. All reacting animals shall be isolated at once and immediately excluded from the premises. All animals failing to pass the T. B. test shall be branded with the letters T. or T.B. on the shoulder, hip, or jaw, and removed at once and slaughtered under the direction of the health officer. Each letter in the brand shall be not less than two inches high and one and one-half inches wide.

Dairy Barns. Lighting. Such sections of all dairy barns where cows are kept or milked shall have at least three square feet window space for each stallion.

(3) Air Space. Such sections of all dairy barns where cows are kept or milked shall have at least five hundred cubic feet of air space per stallion and shall be well ventilated.

(4a) Floors. The floors and gutters of such parts of all dairy barns in which cows are kept or milked shall be constructed of concrete or other equally impervious and easily cleaned material approved by the health officer and shall be graded to drain properly, and shall be kept clean and in good repair. No horses, pigs, fowls, etc., shall be permitted in parts of the barn used for dairy purposes.

(5) Walls and Ceilings. The walls and ceilings of all dairy barns shall be white washed once each year or painted once every two years or finished in a manner approved by the health officer, and shall be kept clean and in good repair, in case there is a second story above the part of the barn in which cows are kept or milked, the ceiling shall be tight.

(6) Cow Yards. All cow yards shall be graded and drained as well as practicable and kept clean.

(7) Manure Disposal. All manure shall be removed and stored or disposed of in such manner as best to prevent the breeding of flies therein.

(8) Milk house and Room Construction. There shall be provided a separate milk house or milk room for the handling and storage of milk and the washing and sterilizing of milk apparatus and utensils, provided with a tight floor construction of concrete or other impervious material and graded to provide proper drainage. The walls and ceiling of the milk house or room shall be of such construction as to permit easy cleaning and shall be painted at least once each year or finished in a manner approved by the health officer. The milk room shall not open directly into the barn or into any room used for sleeping or domestic purposes.

(9) Cleanliness and Flies. The floors, walls, ceiling and equipment of the milk house or room shall be kept clean at all times. All means necessary for the elimination of flies shall be used.

(10) Toilet. Every dairy barn shall be provided with a sanitary toilet construction and operation in accordance with the ordinance of the City of Wellington.

(11) Water Supply. The water supply shall be easily accessible, adequate and of a safe sanitary quality.

(12) Utensils. Construction. All containers or utensils used in the handling or storage of milk or milk products must be made of non-absorbent material and of such construction as to be easily cleaned and must be in good repair. Joints and seams shall be soldered flush. All milk pails shall be of a narrow mouth design approved by the health officer.

(13) Storage. All containers and other utensils used in the handling, storage or transportation of milk and milk products must be thoroughly cleaned after each usage.

(14) Sterilization. All containers and other utensils used in the handling, storage or transportation of milk or milk products shall be between each usage be sterilized with steam or chlorine or in a manner approved by the health officer.

(15) Sstorage. All containers or other utensils used in the handling storage or transportation of milk or milk products shall be stored so as not to become contaminated before again being used.

(16) Handling. After sterilization no container or other milk or milk product utensil shall be handled in such manner as to permit any part of the person or clothing to come in contact with any surface with which milk or milk products come in contact.

(17) Milking. Udders and Teats. The udders and teats of all milking cows shall be cleaned at the time of milking.

(18) Flanks. The flanks of all milking cows shall be kept clean of dirt at the time of milking.

(19) Milkers Hands. Milkers hands shall be cleaned, rinsed with a disinfectant, and dried with a clean towel immediately before milking. Should the milking operation be interrupted, the milkers hands must be redisinfectant. Wet hands milking is prohibited. Convenient facilities shall be provided for the washing of milkers hands.

(20) Clean Clothing. Milkers

and milk handlers shall wear clean outer garments while working.

(21) Milk Stools. Milk stools shall be kept clean.

(22) Removal of Milk. Each pail of milk shall be removed immediately to the milk house or straining room. No milk shall be strained in the dairy barn.

(23) Cooling. Milk must be cooled within one hour after milking to 50 degrees Fahrenheit or less and maintained at or below that temperature until delivery, unless it is delivered to a milk plant for pasteurization or separation, in which case it must be cooled or pasteurized within two hours of the time of production.

(24) Bottling and Capping. Capping shall be done by machine. Caps shall be purchased in sanitary tubes and kept therein until used.

(25) Personal Health Certificates. Every person connected with a dairy or milk plant whose work brings him in contact with the production, handling, storage or transportation of milk or milk products shall have within twelve months passed a medical examination made by the health officer.

(26) Personal Notification of Disease. Notice shall be sent to the health officer immediately by any milk producer or distributor upon whose dairy farm any case of sickness or any infections, contagious or communicable disease occurs.

GRADE B RAW MILK. Grade B raw milk is the milk with average bacterial count of which at no time prior to the delivery exceeds 200,000 cubic centimeter or which falls in class one as determined by the reductase test as described in the standard methods of milk analysis of the American Public Health Association, and which is produced upon dairy farms conforming with all the items of sanitation required for grade A raw milk except (2), (3), (4), (5) or (6) provided that cleanliness of the barn and cow yard shall in no case be omitted. Item (23) shall apply except that the cooling temperature shall be changed to sixty degrees Fahrenheit.

GRADE A PASTEURIZED MILK. Grade A pasteurized milk is grade A or grade B raw milk which has been pasteurized, cooled and bottled in a milk plant conforming with all the following items of sanitation and the average bacterial count of which at no time after pasteurization and until delivery exceeds 50,000 per cubic centimeter.

BUILDING AND EQUIPMENT (1) **FLOORS.** The floors of all rooms in which milk is handled shall be constructed of concrete or other equally impervious and easily cleaned material and shall be smooth, properly drained and provided with trap drains, and kept clean.

(2) **Walls and Ceilings.** Walls and ceilings of rooms in which milk is handled or stored shall be frequently painted with a light colored paint or finished in manner approved by the health officer and kept clean.

(3) **Doors and Windows.** All openings to the outer air shall be effectively screened to prevent the access of flies. Doors shall be self closing.

(4) **Lighting and Ventilation.** All rooms shall be well lighted and ventilated.

(5) **Protection from Contamination and Flies.** The various milk-plant operations shall be so located and conducted as to prevent any contamination one to the other. All means necessary for the elimination of flies shall be used. This requirement shall be interpreted to include separate rooms for (a) the pasteurizing, cooling and bottling operations, (b) the contained washing and sterilization operation. Cans of raw milk shall not be unloaded directly into the pasteurizing room.

(6) **Toilet Facilities.** Every milk plant shall be provided with toilet facilities conforming with the ordinances of the City of Wellington. There shall be at least one room or vestibule not used for milk purposes between the toilet room and every room in which milk products are handled or stored. The doors of all toilet rooms shall be self closing. Toilet rooms shall be kept in a clean condition, in good repair, and well ventilated. In case of privies or earth closets are permitted and used, they shall be located at least 100 feet from the building, and shall be of a sanitary type constructed and operated in conformity with the ordinance of the City of Wellington.

(7) **Water Supply.** The water supply shall be easily accessible, adequate and of a safe sanitary quality.

(8) **Washing facilities:** Washing facilities shall be provided including hot running water, soap and sanitary towels of a type approved by the health officer. The use of a common towel is prohibited.

(9) **Milk Piping.** Only a sanitary milk piping of a type which can be easily cleaned with a brush shall be used.

(10) **Construction of equipment.** All equipment with which comes in contact shall be constructed in such

a manner as to be easily cleaned.

(11) **Disposal of Wastes.** All waste shall be disposed of in conformity with the requirement of the health officer.

(12) **METHODS.** All milk containers and milk apparatus shall be thoroughly cleaned after each usage and sterilized in a manner approved by the health officer immediately before usage.

(13) **Storage and Containers.** After sterilization all bottles, cans and other containers shall be stored in such manner as to be protected from contamination.

(14) **Handling of Containers and Apparatus.** Between sterilization and usage all containers and apparatus shall be handled in a manner as to prevent any part of the person or clothing from coming in contact with any surface with which milk or milk products come in contact.

(15) **Storage and Caps.** Milk bottle caps shall be purchased and stored only in sanitary tubes and shall be kept therein until used.

(16) **Pasteurization.** Pasteurization shall be performed as described in the definition section of this ordinance. The time and temperature records charts shall be dated and preserved for a period of three months for the information of the health officer.

(17) **Cooling:** All milk not pasteurized within two hours after it is received at the plant shall then be immediately cooled to temperature of 50 degrees Fahrenheit or less and maintained the heat until pasteurized. And all pasteurized milk shall be immediately cooled to a temperature of 50 degrees Fahrenheit or less and maintained thereafter until delivery.

(18) **Bottling.** Bottling shall be done in automatic machinery approved by the health officer in such manner as to prevent any part of the person or clothing from coming in contact with any surface with which milk or milk products come in contact.

(19) **Overflow Milk.** Overflow milk which has become machine contaminated shall not be sold for human consumption.

(20) **Capping** shall be done by machinery approved by the health officer. Hand capping is prohibited.

(21) **Time of Delivery.** Milk to be consumed in the form of whole milk shall be delivered to the final customer within 36 hours of the time of pasteurization.

(22) **Personal Health Certificates.** Every person connected with a dairy or milk plant whose work brings him or her in contact with the production, handling, storage, or transportation of milk or milk products shall have within twelve months passed a medical examination made by the health officer.

(23) **Notification of Disease.** Notice shall be sent to the health officer immediately by any milk producer or distributor upon whose dairy farms or in whose milk plant any case of sickness or any infections contagious or communicable disease occurs.

(24) **Cleanliness.** All persons coming in contact with milk or milk products containers or equipment shall wear clean outer garments and shall keep their hands clean at all times while thus engaged.

SECTION 8. Grades or Raw Milk Which Must Be Pasteurized.

At the expiration of six months from the date on which this ordinance takes effect and thereafter, all grades of milk sold in the City of Wellington, Texas shall be pasteurized before delivery to the consumer, except grade A raw milk.

SECTION 9. Supplementary regrading.

At any time between regular announcements of milk grades any producer or distributor may make application for regrading his product.

In case the applicant's existing low grade is due to excessive bacterial count said applicant must be supported by at least two bacteriological examinations made subsequent to the end of previous grading period and indicating that the quality of the applicant's output has improved since the last grading announcement and conforms with the requirements of a higher grade. The samples upon which the said two analysis are made may be brought to the health department laboratory by the applicant.

Upon the receipt of a satisfactory application, the health officer shall make at least four bacteriological analysis upon the samples collected by the health officer of the applicant's output within a period of not less than two weeks and not more than three weeks of the date of the application. The health officer shall award a higher grade immediately in case the said four analyses indicate the necessary quality.

In case the applicant's existing low grade is due to a violation of any item of sanitation other than bacterial count, said application must be accompanied by a statement signed by the applicant to the effect that the violated item of sanitation has been conformed with. Within one week of the re-

ceipt of such an application the health officer shall make a re-inspection of the applicant's establishment and, in case the findings justify, shall award a re-grade.

At any time between regular announcements of milk grades the health officer may lower grade of any milk producer or distributor, if as a result of inspection or milk analysis, a lower grade shall be justified in accordance with the milk analysis, a lower grade shall be justified in accordance with the terms of this ordinance.

SECTION 10. Transferring or Dripping Milk:

No milk producer or distributor shall transfer milk or milk products from one container to another upon the street or in any vehicle or store or in any place except a bottling or milk room especially used for that purpose, except as may be especially permitted by the health officer in the case of milk being delivered in bulk. The sale of dip milk is hereby expressly prohibited.

It shall be unlawful for hotels, soda fountains, restaurants and similar establishments to sell or serve any whole milk or adjusted milk except in the original containers in which it was received from the producer or distributor.

SECTION 11. Milk Not to Be Pasteurized Outside of Collingsworth County.

No milk or cream shall be sold in the City of Wellington that has been pasteurized outside Collingsworth county except as may be authorized by the health officer.

SECTION 12. Spitting. No person shall spit into a receptacle provided for the purpose, in any part of any room, vehicle or other place used for the sale, storage, handling, or transportation of milk.

SECTION 13. Vehicles.

All vehicles used for the delivery of milk in the City of Wellington, shall be so constructed as to protect the milk from the sun and contamination. Such vehicles shall be kept clean while used in transporting milk or milk products. No substance capable of contaminating milk or milk products shall be transported with the milk or milk products in such manner as to permit contamination.

SECTION 14. Denaturing Misbranded Products:

The health officer shall immediately denature with rennet or some harmless coloring matter any milk or milk product found misbranded with respect to grading or sold without a permit.

SECTION 15. Repasteurization prohibited.

No milk or milk products shall be pasteurized more than once.

SECTION 16. Future Dairies and Milk Plants:

All dairies and milk plants from which milk is supplied to the City of Wellington, which are hereafter constructed, shall conform in their construction to the requirements of the health officer, which shall not be less than grade A requirements of this ordinance.

SECTION 17. Proscribed Milk. Only grades described in this ordinance shall be sold in the City of Wellington, Texas. To-wit: Grade A pasteurized milk, Grade A raw milk.

SECTION 18. Penalty.

Any person, firm, association, or corporation who shall violate any provision of this ordinance shall be fined not more than one hundred (\$100.00) dollars at the discretion of the recorder.

SECTION 19. Repeal and Date of Effect.

All ordinances and parts of ordinances in conflict with this ordinance are hereby repealed; and this ordinance shall be in full force and effect immediately upon its adoption and its publication as provided by law.

SECTION 20. Unconstitutional Clause:

Should any section, paragraph, sentence, clause, or phase of this ordinance be declared unconstitutional or invalid for any reason, the remainder of said ordinance shall not be affected thereby. Each and every violation of the provisions of this ordinance shall constitute a separate offense.

SECTION 21. The fact that the City of Wellington, Texas has no ordinance regulating the sale of milk or milk products within the corporate limits of said city and that many contagious diseases are communicated through milk and its products and such milk and milk products are furnished by milk plants to nearly all the inhabitants of the City of Wellington, Texas, creates an imperative and public necessity making it imperative that the rules requiring that an ordinance be read at more than one meeting be suspended and the same are hereby suspended and this ordinance shall be in full force and effect from and after its passage, approval and legal publication.

Passed and approved this 15th. day of July A. D. 1929.

W. P. MOORE,
Mayor City of Wellington.

ATTEST:
JACK KNIGHT,
City Secretary.

NOTICE OF PENDING SUIT

To all creditors who furnished labor or material in the erection of the building for independent school district of Wellington, Texas by J. D. Singleton during the year 1928: You are hereby notified that United States Fidelity & Guaranty company has instituted suit in the United States district court for the Northern district of Texas, at Amarillo in clause No. 276 Equity, which suit is filed in accordance with Title 83, Chapter 4 of the Revised Civil Statutes of Texas, requiring all persons having claims for labor or material in the erection of said building to answer therein and set up their claims as required by said statute.

Said suit as filed by said plaintiff is against H. M. Singleton and others, the purpose of same being to procure a proper distribution of the funds remaining in the hands of the trustees of said Wellington Independent School District among the creditors entitled to receive same, and that all rights, claims and liabilities of any and all persons connected with said transaction shall be settled in one suit.

Said suit will be heard at the next regular term of the United States District Court for the Northern District of Texas, at Amarillo, Texas, beginning on the 2nd Monday in September, 1929, and all interested creditors are required to intervene in said court, all of which you will take due notice.

CITATION BY PUBLICATION

Citation by publication to minors on application for discharge of guardian.

THE STATE OF TEXAS

County of Collingsworth

To the sheriff or any constable of Collingsworth county, greeting: D. B. Tatum, guardian of the person and estate of Edgar Tatum, Verna Straughn, nee Verna Tatum, Verna King, nee Verna Tatum, Ruth Wallace, nee Ruth Carpenter, Myrtle Bigham, nee Myrtle Carpenter, having filed in our county court his final account of the condition of the estate of said wards, together with an application to be discharged from said guardianship, you are hereby commanded, that by publication of this writ for twenty days in a newspaper regularly published in the county of Collingsworth, you give due notice to all persons interested in the account for final settlement of said estate, to file their objections thereto, if any they have, on or before the September term A. D. 1929 of said county court, commencing and to be held at the court house of said county, in the town of Wellington, Texas, on the first Monday in September, A. D. 1929, same being the 2nd day of September, A. D. 1929, when said account and application will be considered by said court.

Witness, Marguerite Bartlett, clerk of the county court of Collingsworth county.

Given under my hand and seal of said court, at my office in the town of Wellington, Texas, this the 6th day of August, A. D. 1929.

MARGUERITE BARTLETT
Clerk of the County Court of Collingsworth County, Texas. 4-40c

NOTICE IN PROBATE THE STATE OF TEXAS

To the sheriff or any constable of Collingsworth county, greeting:

You are hereby commanded to cause the following notice to be published in a newspaper of general circulation which has been continuously and regularly published for a period of not less than one year preceding the date of the notice in the county of Collingsworth, state of Texas, and you shall cause said notice to be printed at least once each week for the period of ten days exclusive of the first day of publication before the return day hereof:

NOTICE THE STATE OF TEXAS.

To all persons interested in the estate of Austin O'Neil, Jr., minor, Austin O'Neil has filed in the county court of Collingsworth county, an application for letters of guardianship of the estate of Austin O'Neil, Jr., which will be heard at the Court House thereof, in the city of Wellington, at which time all persons interested in said estate may appear and contest said application, if they see proper.

Given under my hand and seal of office, in the city of Wellington, the 30th day of July, A. D. 1929.

MARGUERITE BARTLETT
Clerk County Court, Collingsworth County. 3-30c

ORDER OF SALE THE STATE OF TEXAS.

To the sheriff or any constable of Collingsworth county, greeting: Whereas, on the 30th day of May A. D. 1929 Annie Clifton Hughes recovered in the district court of Collingsworth county, a judgment against Frank Barnes for the sum of Fifteen Hundred and Twenty

Dollars and costs of suit.

And whereas, the said judgment is a foreclosure of a lien on the following described property, to-wit: All of the southeast one fourth of Survey Number Ninety-nine in Block Number Sixteen, H. & G. N. RY. CO. Survey in Collingsworth County, Texas.

Therefore, you are hereby commanded that you proceed to seize and sell the above described property, as under execution, and make good and sufficient deed, and to place the purchaser of the same in possession thereof within thirty days after the day of sale, and you apply the proceeds thereof to the payment and satisfaction of said sum of Fifteen Hundred and Twenty Dollars, together with the interest that may be due thereon, and all costs of suit. And if the said property shall sell for more than sufficient to pay off and satisfy said sums of money, then you are hereby directed to pay over the excess thereof to the defendant. But if you fail to find said property, or if the proceeds of such sale be insufficient to satisfy said judgment, then you are directed to make the money, or any balance thereof remaining unpaid, out of any other property of defendant, as in case of ordinary executions.

Herein fail not, but due return make hereof within 60 days, showing how you have executed the same.

Given under my hand and the seal of the district court of Collingsworth county, at my office in Wellington, this the 25th day of July A. D. 1929.

LENORE SHERWOOD,
Clerk District Court Collingsworth County. 3-30c

SHERIFF'S SALE THE STATE OF TEXAS

County of Collingsworth.

Notice is hereby given that by virtue of a certain alias execution issued out of the Honorable Justice Court of Dallas county, on the 10th day of July, 1929, by B. H. Fly, justice of peace of said justice court for the sum of one hundred and seven-one-hundredths dollars and costs of suit, under a judgment, in favor of Pittsburgh Plate Glass Co., in a certain cause in said court No. 27627 and styled Pittsburgh Plate Glass Co. vs. Ben H. Stover, placed in my hands for service, I, C. E. McKinney as sheriff of Collingsworth county, Texas, did on the 23 day of July, 1929, levy on certain real estate, situated in Collingsworth county, Texas, described as follows, to-wit:

Lots E½ of 21, all 22, 23 and 24, Block 164, city of Wellington, Texas and levied upon as the property of Ben H. Stover and that on the first Tuesday in September 1929, the same being the 3 day of said month, at the court house door of Collingsworth county, in the city of Wellington, Texas, between the hours of 10 a. m. and 4 p. m. by virtue of said levy and alias execution I will sell said above described real estate at public vendue, for cash, to the highest bidder, as the property of said Ben H. Stover. And in compliance with law, I give this notice by publication, in the English language, once a week for three consecutive weeks immediately preceding said day of sale, in the Wellington Leader, a newspaper published in Collingsworth county.

Witness my hand, this 29 day of July, 1929.

C. E. MCKINNEY,
Sheriff Collingsworth county, Texas.
By W. H. Stuart, Deputy 2-30c

APPLICATION TO LEASE

Notice of Guardian's Application to Lease the Lands of his Wards for Oil and Mineral Purposes.

Whereas, on the 9th day of August, 1929, I, A. O. Brewer, guardian of the persons and estate of the minors, Annie May Brewer and J. W. Brewer, did make application to Hon. R. H. Templeton, County Judge of Collingsworth county, Texas, for an order authorizing me to execute an oil, gas and mineral lease upon all interests of said wards in and to an undivided one-twelfth (1-12) interest in and to

the Northeast one-half of section 472, S.P.R.R.Co. land located in Eastland County, Texas, to George C. Meridith of Weatherford, Parker County, Texas, and

Whereas, the court by its order has designated Sept. 24th, 1929, at 10 o'clock a. m. at the court house in Wellington, Collingsworth county, Texas, at which time and place said application will be heard, I therefore do hereby give notice of the hearing of said application as

Witness my hand, this 13th day above set forth.

Guardian of the persons and estate of the minors Annie May and J. W. Brewer. 4-7

Nazarene Revival Ends After Most Successful Meet

Closing their revival Sunday night, August 11, the Nazarene are reported by M. C. Willingham, their local pastor, to have conducted a most successful meeting with over 40 confessions and about 20 conversions.

"The success of the meeting may be attributed to the evangelistic powers of O. A. Henry, who conducted it and to the fervor of the people who attended," Rev. Willingham said.

The meeting was held in a tabernacle adjoining the American Legion hall and directly across the street from their local church site where the construction of their new building is under progress.

Your tongue tells when you need

Coated tongue, dry mouth, bad breath, muddy skin, groggy nerves and sour stomach suggest its use.

Dipping of Sheep Is Essential For Greatest Results

August is a good time to dip sheep for ticks. Two dippings are necessary, about 24 days apart; the first dipping may not destroy all the eggs and these may hatch a new brood. Various kinds of dips are satisfactory. Coal-tar creosote, cresol, and nicotin dips may be bought ready prepared. Sheep dips are most effective when used with soft water. If necessary to use hard water, the water may be "broken" by adding sal soda at the rate of from 1 to 4 pounds for each 100 gallons of water. The sheep tick—which is not a true tick but a bloodsucking parasite—is very prevalent and spreads rapidly especially among close-herded range flocks. It is best for a whole community to dip all sheep about the same time to prevent the spread of ticks from flock to flock.

WHY

—do you find one man at the head of a flourishing business making money hand over fist, while another is "small fry" among storekeepers? Answer: One of them had the good sense to enlist the aid of The First National Bank in developing his enterprise.

FIRST NATIONAL BANK

Thousands are saying

"HERE IS A REAL AUTOMOBILE"

Thousands of Oldsmobile owners, prompted by their enthusiasm for Oldsmobile's remarkable abilities in every phase of performance—their

enjoyment of its luxurious riding qualities—their knowledge of its dependability and general thorough behavior—have voluntarily written their appreciation to the Olds Motor Works.

Read what they say—their reasons for buying—and why they are glad they bought Oldsmobiles.

From Milwaukee, Wisconsin:

"I was first attracted by Oldsmobile because its general characteristics appealed to me, and our Chief Engineer—a very discriminating buyer—drives an Oldsmobile. I like its powerful and quiet-running motor, easy steering, smooth flow of power at all speeds, sturdy construction and general good appearance."

From Susanville, California:

"With the protection you give your motor, it looks good to me for 40,000 miles without a major repair. When I selected my car I

discovered that other cars in Oldsmobile's price range had some of the features I wanted, but Oldsmobile had all. It looks like more value to me. It has wide doors and plenty of leg room in front and rear of sedan.

Such things as twin-beam headlamps, fuel pump, and radiator shutters helped to sell me. Also the fact that it is made by a reliable firm. And the way Oldsmobile sales are jumping shows that others think well of it."

The VIKING

—the new 90-degree V-type Eight at medium price—is built in the Olds factories, by Oldsmobile craftsmen, and sold through Oldsmobile dealers. At \$1899 for all models, f.o.b. factory, Lansing, Michigan, it is as outstanding in value in its field as the popular Oldsmobile Six, the fine car of low price.

If you wish to hear this enthusiasm expressed at first hand, talk to Oldsmobile owners in your own community. Then drive the car yourself... put it through all its paces... and you'll know why Oldsmobile owners are so outspoken in their praise.

Sheep Will Bring Profit To Farms

Sheep Will Help Farmer Achieve Balanced Program

When more farmers in Texas add a few sheep to their farming operations as well as the cow and the hen, Texas will have a more balanced system of farming, Ernest Gibbens, of the animal department, A and M college of Texas, told those in attendance at the beef cattle, sheep and goats section of the Farmers Short Course at College Station. "No farm animal is capable of returning a greater net profit than sheep when given intelligent attention, nor of losing money faster when not properly handled," he said. Mr. Gibbens discussed "Sheep Breeding."

There are two phases of sheep production to be considered, the speaker pointed out in opening his discussion, range production and farm flock. Range production in Texas has changed much in the last twenty years, he went on to point out. "Production of sheep on the ranges of Texas is rapidly going through a transition period from production of a strictly fine wool type of sheep as was the case some years ago, to the production of good mutton as well as fine fleece."

Touching on the farm flock phase of sheep raising, Mr. Gibbens said that many farms in the fine prairie section of Texas should add sheep to their system of farming. "A small farm flock brings in funds in the spring at a time when most farms have little or nothing to sell," he continued. "No farmer should stock too heavily on sheep, however, but rather should keep just enough to eat his surplus weeds and turn them into money."

Use Brine to Keep Butter Over Season

Sweet-cream butter made for winter use will best keep if stored in brine made of one part salt to three parts water, says the Bureau of Dairy Industry, U. S. Department of Agriculture. Butter stored by the bureau in dry salt and paraffin deteriorated on the surface. Be sure to use enough salt in the brine wrap the butter in parchment butter paper, and see that the rolls are entirely submerged in the brine.

Japan has more active volcanoes than any other country.

Government authorities tell us that thirty different diseases are transmitted by flies. Any one of these often proves fatal. Flies must be killed. Use FLY-TOX the scientific product developed at Mellon Institute of Industrial Research by Rex Research Fellowship. It is harmless to mankind but death to all household insects. Just follow instructions on blue label of bottle. ISIST on FLY-TOX with the perfume-like fragrance.—Adv.

When a Pope Left the Vatican After 59 Years

These pictures depict the colorful scenes attendant with the emergence of Pope Pius XI from the Vatican in Rome recently, the first Pope to leave the Vatican in 59 years. At right, Pope Pius XI is shown as he was carried in a richly carved chair under a colorful canopy borne by Swiss guards in the procession that wended its way from the Vatican to famous St. Peter's. At left is shown the huge crowd gathered in St. Peter's Square to watch the procession and see the Pope. In the foreground is the famous obelisk and in the background the dome of St. Peter's.

Ninety Four Rural Teachers Will Go To Canyon in Sept.

Collingsworth County will send ninety four rural school teachers to the institute at Canyon. The institute will be held at the West Texas State Teachers college on September 2, 3, and 4. The county school board makes it compulsory for all teachers in the county to attend the institute.

The addition of capers, or the liquid in which they have been bottled, chopped pickle, lemon juice tomatoes, or current jelly to lamb or mutton gravy is suggested as a change and improvement in flavor.

Fires Watched In Rocky Mountains

In the Rocky mountain and Western states, the forests are dry as timber this time of year. Watch out for forest fires. Be extra careful with matches and "smokes," and with camp fires.

The growing of one intertilled crop following a good clover or alfalfa sod is excellent in a rotation, but the common practice of growing two or more intertilled crops in succession after alfalfa is a mistake. Intertillage inevitably causes rapid destruction of the soil organic matter.

4-H Club Boys To Hold Meet Next Saturday

That the 4-H Club will hold a meeting in the district court room at the county court house next Saturday was announced Monday by Harold Leach, local secretary. "The purpose of this meeting will be to discuss a rally which will be held at the Country club soon. Plans will also be made for the construction of a float which will be entered in the fair parade," Mr. Leach said.

When cremated, a body weighing 140 pounds produces about three pounds of ashes.

Large Hatchery Will Be Built In Childress

Childress' largest hatchery, the Scott and Welling, has increased its capacity from 32,000 to 100,000, and a building is being prepared with facilities for hatching from five to ten thousand chicks at a time. Two or three men will be employed in the plant the year round.

That the way to get rid of a fool law is to obey it may be a novel idea, but it worked in Prague, Czechoslovakia, recently. The legal speed limit established in 1910 was 9 miles an hour, thus police were always safe in arresting anyone as a speeder. Taxi drivers got tired of harassment and agreed to strictly limit their speed to the prescribed limit, with the result that traffic congestion nearly drove the police crazy. Now the law is dead.

OVER 8 MILLION A DAY
IT HAD TO BE GOOD TO GET WHERE IT IS

A horse at hard work in the summer needs from 1 1-4 to 1 1-3 pounds of grain and 1 1-4 pounds of hay to each 100 pounds of his weight. The work horse should be fed at regular intervals during the summer.

"Marketing Late Crop Potatoes" is the title of a recent Farmers' Bulletin published by the U. S. Department of Agriculture. This publication, No. 1578-F can be secured by writing to the Department of Agriculture, Washington, D. C.
