According to County Attorney Alfred Walker, three more bootlegging cases are pending with court due to re-open Monday morning.

Evidence presented by Walker showed that both Love and Causey had sold whiskey within a dry area to Pedro Cordona, a resident of Crosby County. Gordona and Crosby's deputy sheriff, Otto Ottwell, were working with and for Sheriff C. C. Kimmel of Dickens county prior to the arrests. Sheriff Kimmel was the arresting officer in each case.

Late Wednesday Sheriff Kimmel stated that there had been talk of appealing both cases. However, H. A. C. Brummett, the defense attorney, could not be contacted at his home or office Wednesday to verify the appeal talk.

Both cases were tried in a packed court room with church workers, pastors and civic leaders present. Sheriff Kimmel states that many of the moral leaders were present in court on his invitation. "It is of vital concern to our churches and civic organizations to eliminate the illegal sale of whiskey and beer in our county and we appreciate them showing this interest," the sheriff stated.

Love was arrested in Spur Wednesday morning on perjury charges by Sheriff Kimmel and was in the process of making \$1,000 bond late Wednesday. The perjury charge is a felony and is punishable by penitentiary sentence. The charge will be considered by the Grand Jury at its next regular session, states Walker.

The Association has suffered no losses for a number of years, and only \$739.00 total since organization in 1934. According to Mr. Hill, 1951 will probably be a better year than 1950, from the business handled in the first six months of 1951.

The terms of two directors, J. F. McCulloch and Lasater Hensley, expired at this meeting. The Chairman of the Nominating Committee, Mr. Olin Potts of Anson, read the report of this Committee, and submitted four nominees: J. F. Dickens County Electric Co-op Joins Observance of Electrification Completion

The private utility industry will observe Rural Electrification Week starting August 26. According to an industry spokesman it marks the completion of rural electrification in America.

The Dickens County Electric Cooperative, Inc. has just released a statement in regard to the cooperation of its area coverage. According to Manager W. M. Hilley the co-op has brought electrical service to 80 percent of the rural dwellings in its area.

Since the REA-financed co-op was organized in 1941, 1150 miles of power lines have been built which now serve 1603 rural consumer-members, he said. But, he pointed out, approximately 200 farm families are still waiting to be connected to the co-op's power lines as materials and power supplies permit.

Manager Hilley notes that his system has seen the average monthly kilowatt-hour demand increase from 26 kw to 91 kw per consumer in the past 6 years. He predicts that 150 miles of new lines, (other equipment, substations, etc.) will have to be built and much equipment installed in the near future to accommodate increasing demand for electricity. However, he warned that power supply will be the greatest problem to solve, with materials and manpower next in importance.

Government figures, based on the 1945 Census of Agriculture, estimated that as of June, 1950, 86.3 percent of all farms in the United States had central station service. However, first tabulations of the 1950 census reveal that this estimate was too high. Claude R. Wickard, Administrator of the Rural Electrification Administration, Washington, D. C., now finds that there are probably 15% or more of the nation's farms still without electricity.

Love was arrested in Spur Wednesday morning on perjury charges by Sheriff Kimmel and was in the process of making \$1,000 bond late Wednesday. The perjury charge is a felony and is punishable by penitentiary sentence. The charge will be considered by the Grand Jury at its next regular session, states Walker.

Rural Fire Problems Studied By WTCC

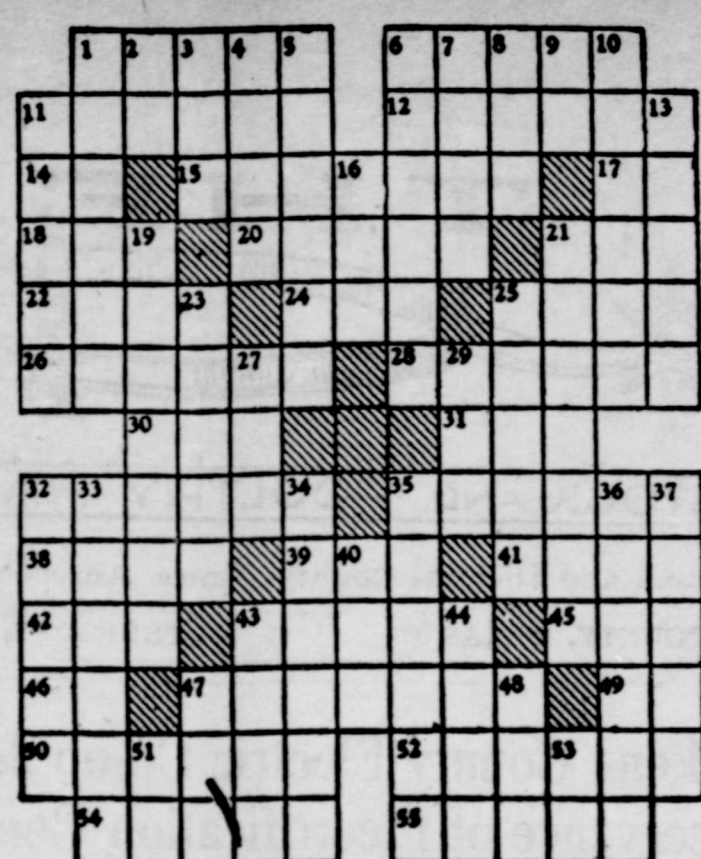

ABILENE, Texas, July—The West Texas Chamber of Commerce is trying to determine whether adequate rural fire protection can be secured on a voluntary basis without resorting to creation of a new taxing agency.

James F. Milton, manager of the taxation and legislation department of the WTCC, has asked managers of local chambers of commerce of the 132-county region to report creation of any voluntary protective association, how they were created, and their ability to solve rural fire problems.

One of five constitutional amendments to be submitted to Texas in November, 1951, would open the way for creation of rural fire prevention districts and authorize maximum tax levy of 50 cents per \$100 valuation to finance them.

Public Must Demand Clean Food Service

AUSTIN, Texas—The Texas State Department of Health can not maintain daily inspection of all eating places and the public is urged by Dr. Geo. W. Cox, State Health Officer to insist on the proper sanitation of the establishment where they eat. If the public is careless in this respect the incentive to maintain clean food service will be lessened and operators will only maintain the level the public is willing to accept. He urged that the public patronize "eating establishments which measure up to a high standard of cleanliness."

The State Health Department is making every effort to improve sanitation of eating places, Dr. Cox said, and there is "no excuse for cafe owners not taking advantage of the food handlers schools which are being offered all over the state, rules and regulations which require the use of approved equipment and methods in such establishments."

"The public should be aware of these sanitary rules and regulations and insist that restaurants observe them. Patrons should realize that tables and counters

will be many times cleaner than the kitchen and other places out of sight," he warned.

He urged milk appraisal by the patrons also. Texas law requires that a milk bottle cap state the grade of milk, and whether it is raw or pasteurized. "Insist on having the milk served in its original container, with a covered cap and a legal label," Dr. Cox advised.

"Obviously," he said, "the best in sanitation can be had only by close co-operation between the public and the investigators of the State Health Department."

He added that there

This one says You've Arrived

HERE pictured is an automobile that may well be the fulfilment of any man's dream of a fine motorcar.

For you've a right to expect, when you pay a fine-car price, that your money will buy more distinction, more comfort, more performance than are to be found in vehicles of lesser worth.

So mark well the things that a ROADMASTER offers.

No other car on the American scene has a prouder bearing.

No other automobile has more spacious dimensions, more luxurious

comfort, or finer appointments.

No other car has a ride more serenely smooth on curve or straightaway, highway or byway.

And no other car, at ROADMASTER's price or above, has Dynaflo, and the supreme command of every traffic condition which it provides.

So you, at the wheel of Buick's biggest and best, have a right to feel distinguished.

But there's a joy of possession which goes deeper than visible things.

There's the feel of a power plant as brilliantly eager as this great car's valve-in-head Fireball Engine — and the satisfying companionship of a brawny traveler instantly responsive to your every wish.

And there's one thing more, which only ROADMASTER can give you in such generous measure. That is the pride of a wise investment, based on the fact that this car stands alone in price per pound, among fine cars similarly equipped.

So why not take that very important first step — and come in and see us soon?

Equipment, accessories, trim and models are subject to change without notice.

Mrs. Paige Gollihar To Lead Workshop At WSCS School

The purpose of this school is to bring to the women of the conference in a condensed form information concerning the total program of the Society for the year. "I REMEMBER"

From Miss Opelle Gurtman, Bedford, Del.: I remember, back in the old days, when we couldn't make it up a hill in first gear, we'd turn our old Ford around and back it up. In those days, reverse was more powerful than first.

From Mrs. Nettie Allen, Covina, Calif.: I remember the first washboard in our neighborhood. An old colored man made it by hand. He cut down the tree, sawed out the blocks, and then sawed it long way for the board. Then with a knife, chisel and sandpaper, he turned out a very good likeness of a washboard.

From Percy Hasten, Marshall, Ill.: I remember when the Prince Albert coat was quite in style. Our family physician began wearing one of the coats when he was dressed up. He told of hearing a small boy remark, "Gee, does that fellow have to wear his overcoat in the summertime?"

From Mrs. Mary E. Miller, Crowley, Col.: When my husband was nine years old, he lived near a slaughter house. The men used to call him and say, "Hi, kid, want some ox tails and liver?" They would give him all he could carry, and load his arms with ox tails like cord wood.

From Peter Y. Miller, Crowley, Col.: I remember, when I was five years old, coming into Denver on the first train, August, 1870. We had to keep stopping to let the herds of buffalo get off the track.

(Mail your memories to The Old Timers, Box 340, Frankfort, Ky.)

ence Vice-president has been elected Dean of the school. Other members of the School Committee are the following Conference officers: Committee Chairman, Mrs. B. Hilburn, Lubbock; Co-ordinator, Mrs. George Robertson, Childress; Registrar, Mrs. Carlton Nance, Pampa; Secretary, Mrs. Sam B. Cook, Pampa; Treasurer, Mrs. Paige Gollihar, Spur. Literature Chairman, Mrs. Sam Gholson, Wellington; Devotional Chairman, Mrs. J. E. Peters, Jayton; Music, Mrs. C. C. Coffey, Lubbock; Publicity, Mrs. J. D. Strickland, Plainview; Librarian, Mrs. E. T. Pittard, Anson; Committee Members, Mrs. Rufus Dodson, Shamrock and Mrs. George Turnley, Amarillo.

Special emphasis is being placed on the courses of study to be presented during the year and each member of the school will be allowed to take the Bible study and one other clinic. The studies and the person who will direct them are as follows: "Book of Acts" (Bible Study)—Miss Sue Stamford, Missionary to China until January 1951 and Miss Lyda Gerhart, Field worker from the Women's Division, "Latin America," foreign study by Miss Mary Sue Brown, former missionary to Brazil and Mrs. Joseph B. Davis, former teacher in Panama and in our 1950 Conference School of Missions, "The Family, A Christian's Concern," Christian Social Relation Study, by Mrs. William Dingus, former college teacher and world traveler, and Mrs. Cecil Matthews, Counselor, Wesley Foundation at Tech and in the 1950 School of Missions, "Churches for Our Country's Needs," Home Missions Study, Miss Helen Poe, world traveler and in 1950 School of Missions, and Mrs. Neil Hart, Jurisdictional Secretary of Children's work. DODGE "Job-Rated" TRUCK!

☒ **Plenty of power** for your job. Power has been increased up to 20% in eight great engines—94 to 154 hp. You get top economy, too—thanks to high compression ratio, 4-ring pistons with chrome-plated top ring, and many other extra values.

☒ **Maximum safety**—You get the finest truck brakes in the industry! On many models you get new, molded, tapered, Cyclebond brake lining for smoother, quieter, safer braking. And you'll ride in a welded all-steel cab with an extra-big windshield.

☒ **Easy handling**—You can turn, park, back up and maneuver with the greatest of ease... because of cross-steering, short wheelbase and wide front tread. Other aids to easy handling are the comfortable new steering wheel position and extra cab visibility.

☒ **Bigger payloads**—Balanced weight distribution enables you to haul bigger payloads on a Dodge "Job-Rated" truck without danger of overloading. Because the engine has been moved forward and front axle back, the right proportion of the load is carried on each axle.

☒ **Extra comfort**—Famous "Pilot-House" cab gives you safe, all-around vision with extra-big windshield and rear quarter windows. Roomy, "chair-height" seat is widest of any popular truck. New "Oriflow" Shock Absorbers on 1/4-, 3/4-, and 1-ton models give smoother ride.

☒ **gyrol Fluid Drive**—Only Dodge offers gyrol Fluid Drive. Available on 1/4-, 3/4-, and 1-ton models. You start with amazing smoothness. Gearshifting is minimized. Wear is reduced on vital parts. And Fluid Drive protects your load by minimizing damaging jolts.

How Dodge trucks are

Report Gives Insect Damage In Dickens, Adjoining Counties

A recent report from the extension service of Texas A. & M. College and the United States Department of Agriculture on the cotton insect situation in Texas states that no leafworms have been found in Texas to date.

In Dickens county and surrounding counties, thirty-two fields were inspected. The weevil infestation averaged 3 percent and the fleahopper infestation averaged 3 per 100 terminals. Only a very few fields showed injurious infestations of either boll weevils or fleahoppers.

Webworms and armyworms continue to do damage and need controlling in certain fields, according to the report.

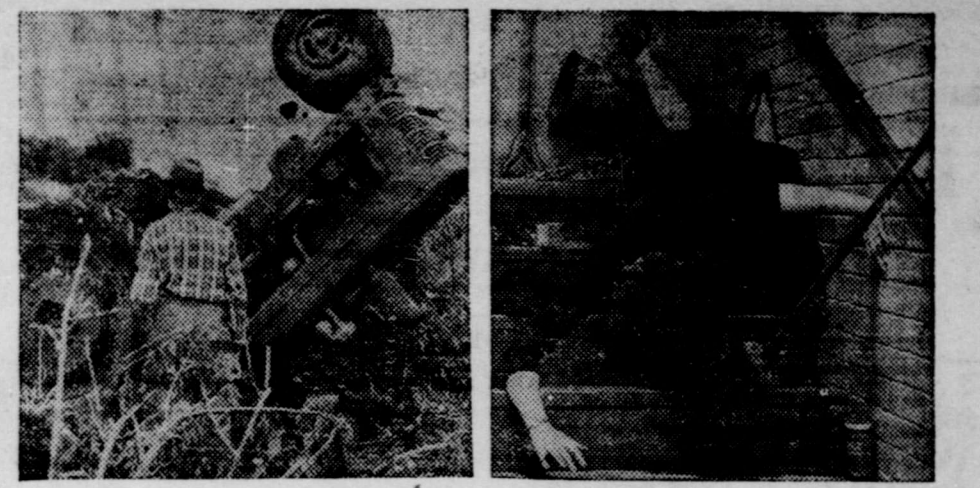

Records show that home gardens in Texas are valued at \$380 per acre. It's higher for the intensively worked and highly fertilized and irrigated smaller plots.

1/2 Million 4-H'ers Helping Reduce Farm Accidents

A recent survey of 2,000 farm accidents shows that 248 involve machinery. In other types, more farm people are injured by falls—476—than in any other kind of accident.

FARM FOLKS, as a general rule, give little thought to safety until a member of their family or a neighbor's is hurt or killed, or fire destroys their home or barn. Then they start doing something about safety.

This year it is particularly important that every farm family should do something about practicing safety, because even though there is a shortage of labor on farms, and new equipment is hard to get, food production must be boosted. That means the present manpower and machinery on

farms must be guarded against accidents.

An average of 47 farm people are accidentally killed every day.

Helping to reduce rural casualties are a half million boys and girls taking part in the National 4-H Farm and Home Safety Program. More than \$10,000 in awards for the best records of accident prevention and education are being provided by General Motors for the seventh consecutive year.

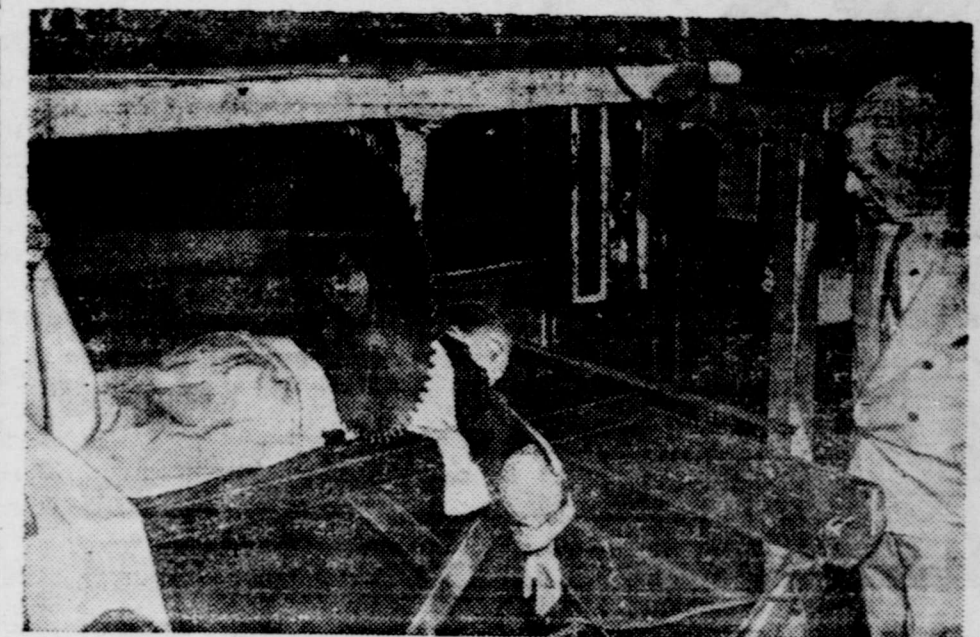

The program is directed by the Cooperative Extension Service.
