65TH YEAR

ELDORADO—SCHLEICHER COUNTY, TEXAS (76936)

Thursday, June 9, 1966

Number 23

Ratliff and Dannheim
Winners In Run-Off

Schleicher county voters went to the polls Saturday to make their decision in two local races and one state race.

Receiving the Democratic nomination for County Judge was Tom Ratliff, who received 472 votes as compared to 381 for his opponent Bob McWhorter.

For Commissioner Precinct No. 4 Lawrence Dannheim received 62 votes to lead his opponent Johnny Mayo who got 52.

County voters also expressed their preference for State Attorney General by giving Crawford Martin of Hill County 496 votes, and his opponent Franklin Spears 323 votes. In this race Schleicher followed the state trend.

Smaller Vote

Approximately 124 voters who cast ballots in the May primary failed to vote Saturday in the run-off. These figures are based on the totals in the Judge's race. In the May primary with five in the race, 927 votes were cast, while only 803 voted in this race Saturday.

Precinct 4, however, was an exception. Voters there again turned out in full force and cast 114 votes Saturday—one more than the 113 tallied in the first primary.

Double - Header
Starts Little League

The four teams composing Little League had their initial fling here in a double header Tuesday night. From a look at the score it would appear that the teams either have a strong pitching staff this year or they are all weak on batting. Only three scores were run in the two games.

White Sox defeated the Tigers 2 to 1 in the first game, and Christoval Cougars beat the Red Sox 1 to 0.

Thursday night will see the Cougars cross bats with the White Sox. A large crowd was present for the opening games.

Demonstration Set
Tuesday at Emmons'

The Eldorado-Divide Soil and Water Conservation District will sponsor a demonstration of the Stull Chem-Cut System of brush control on Tuesday, June 14.

Stull Chemical Company of San Antonio will be putting on the demonstration. The demonstration is to begin at 10:00 a.m. at the Floyd C. Emmons ranch, 3 miles south of Eldorado on the Sonora highway No. 277.

The Stull Bifluid Spray System was developed for the purpose of reducing dangerous pesticide drift by using Viscuous or Invert emulsions as carrier mediums for active chemicals.

All who are interested in this type of brush control are invited to attend.

TO LET CONTRACT

Commissioners Court will be in session Monday morning and one order of business will be to open bids and let contract for construction of a concession building at the park.

MOVING HERE FROM PAMPA

Mr. and Mrs. R. A. Williams are being transferred here from Pampa by Northern Natural Gas Co. The Williamses were here Wednesday looking over the housing situation.

SALES PADS for sale at the Success office.

Judge Nominee

TOM RATLIFF

School News

Mr. and Mrs. Curtis Humphries returned Sunday night from Waco where their daughter, Betty, received her degree from Baylor.

Jack Bell started driver's education instruction Monday, with 32 students turning out.

Jack Wilson has resigned his coaching and teaching job in the local schools. Kenneth Thomas has been hired as new Jr. High math instructor and football coach and he and his wife and two children moved here Sunday from Spearman. They will occupy the house near the school vacated by Mr. Wilson.

Raymond Mittel is attending a summer course at Arkansas State, at Jonesboro, Ark.

Robert Jay is taking summer work at the University of Texas. Mr. Janes, who was hired as new elementary principal, is in summer school in Colorado and will move here later in the summer to the house to be vacated by Earl Barnett. Ray Morgan, who is on the job as Little League coach and will be head football coach of the Eagle team, will move to the house being vacated by Mr. Whitis.

Construction is continuing on the new Band Hall and Vocational Ag. building, and earth moving for the new football field is also continuing.

Tucker Test Flows
Oil From Canyon

Tucker Drilling Co., et al, No. 1 Pearl Williams, in section 102, block TT, has been brought in as a producing oil well. It is located 16 miles northwest of Eldorado, and is 2½ miles northwest of the Velrex, S.W. (Penn. conglomerate) field.

Flowing oil from Canyon sand from perforations at 6844 to 6852 feet, it flowed approximately 9 barrels per hour while cleaning to test.

Additional tests will be made of the Pennsylvanian conglomerate section through perforations over the interval 7491—7499 feet. This lower section flowed dry gas on drill stem test.

Cottonwood Street
To Be Paved

Cottonwood Street, the street which runs north and south past the City Hall and the Presbyterian church, is slated to be paved for several blocks through northeastern Eldorado, according to word this week from City Hall.

The street is to be extended a new route north past the Scout hall and will pass one of the sites slated for the Public Housing project. The City of Eldorado is in the process of acquiring some of the new right-of-way that will be needed.

At the north end, the street will terminate in the Latin-American community.

West Texas Cafe To
Close On June 15th

Mrs. Lester Henderson announced that she plans to close her West Texas Cafe in the Eldo Hotel building the 15th of this month.

Increased overhead costs and shortage of help were factors cited by Mrs. Henderson in making the announcement. She thanked all patrons for their present and past patronage.

Post Script

When the sky diving event was announced recently in Eldorado, I'll have to admit that it was something completely new to me. Sure, I know about riding clubs all over Texas and was familiar with the fact that contestants traveled long distances to compete for prizes in rodeos.

But sky-diving clubs—that was a new one to me until Ben Keel ordered 50 fancy invitations which, he said, he was mailing to various "clubs" over the state.

Fifty clubs? Really!!

Yes, he explained there were nearly that many when he included several in adjoining states, such as Oklahoma and New Mexico, who were also being invited. Oh well, you're never too old to learn, so I took him at his word, but I wondered who in the h-l would go jumping out of an airplane just for kicks!

Then this week I learned some more.

In a national news magazine there was an article about how Americans were going all-out for recreational thrills of all kinds—among them sky diving. The article goes something like this:—

As the battle for a place in the sun grows increasingly fierce, more and more Americans are taking to the air. Indeed, the popularity of sky diving in the U. S. has risen so fast that the airlines have petitioned the Federal Aviation Agency to tighten rules on the chutists before they begin colliding with airlines. The sport would be even more popular if it were less expensive; initial training costs about \$50 and a top-line rig-chute, suit, boots and helmet—can run as high as \$700. Nevertheless, even wives are beginning to share their sky-diving husbands' euphoria.

The article went on to say that 750,000 jumps were recorded last year vs. 250 in 1956.

So, Eldorado and its American Legion post has had the honor of sponsoring the first sky-diving event in West Texas—a new kind of contest that is gaining nationwide popularity.

If Eldorado doesn't soon announce its SECOND annual sky-diving event, some other West Texas town will beat us to it.

Here is a local serviceman's address for about the coming two weeks:

PFC Leo Ussery, Jr.
24th Evac. Hosp.
Fl. Sam Houston, Texas.

I mentioned in this column last week about Rusty Gibson's Southwestern Fence Company and the deal he has on making welded sheep panels. Rusty is gradually getting into mass production.

I dropped by there again this week and was shown the stacks of panels that had already been made and watched two welders busily going on making more. One of them was a Latin, whose name I didn't get, and the other was 19-year-old Jodie Wagley, who recently graduated from Eldorado High School.

How come, I wondered! Wasn't this the high school boy who was always driving around damaging his daddy's cars? Now here he was with a welder's hood over his face, turning out sheep panels on a piece-rate basis and earning a man's good daily wage. I began inquiring around and found out that Jodie learned electric welding in the ag. course at Eldorado High School. He is making good money during vacation and plans to go to Texas Tech this fall.

It made me feel a lot better about the quality of training offered in our own local school and it made me feel more assured about the young generation coming into the labor market. Fifty years ago the boys in my group were all 19 years old. We sowed our wild oats for a little while and then—went to work.

So if you're wondering what this young generation is coming to, just remember, they'll be just about like us old codgers in time. Don't sell 'em short.

Incidentally, Rusty is looking for a third welder.

Building going on:

Kenneth Rosford was successful bidder for the house he is living in at the Northern Natural Gas Co. plant. He will move it to the lot he purchased in Sunset Acres, between the Bill Rozean and Raymond Mobley houses. Foundation work was being done this week. The other Northern house was sold to a McCamey buyer.

New curbing has been put around the front of the Davidson Hardware store.

Leslie Baker has added a new carport and den to his house south of the school. Knight-Susen was contractor.

M. E. McEwen has re-painted the wood trim around the front of his building on South Main.

Bill Collins is continuing foundation work on the house he is building in northeastern Eldorado on the site of the old Sam Jones house.

Among local housing moves reported by City Hall are the following:

David Cavness, the barber, to George Neill house;

Raymon Mobley is in the house in Sunset Acres he purchased from J. D. Huckaby;

W. R. Howell, to Watson house; Mrs. Bernice Byrd, to Sadie Davidson's house;

Danny Becknell, to Curtis Short house.

—ps—

With our subscribers:

Mrs. L. D. Ochsner is back home for the summer after serving as a dorm counselor at Angelo State College during the school year which has just ended.

Mrs. Sherwood Barker, the former Ann Ballew of this place, has renewed her subscription from 4809 44th Street, Dickinson, Texas.

Mr. and Mrs. Norm Cash are subscribing at 14890 Lauder, Detroit 27, Michigan.

Mr. and Mrs. Jerry Doyle have moved from Plains, Texas, to Box 163, 3102 4th Street, in Lubbock.

Mr. and Mrs. C. C. Henderson have moved from Amarillo to R1, Box 76-2B, Marble Falls, Texas.

—ps—

"What made you decide to become a parachute jumper?"

"A plane with three dead engines."

—ps—

The Chamber of Commerce and the Lions Club have erected a new "Welcome To Eldorado" sign across from Dan Griffin's service station.

—ps—

Can there be such a thing as too much business?

Well, not exactly, but Orland Harris must have come close to it.

He advertised last week that he'd be selling hot barbecue on Saturday and he came on the job with several hundred pounds of barbecued meat and 24 chickens. One customer promptly came by and bought 50 pounds of meat; another got 28 pounds and still another bought 38. Then a woman showed up and bought 12 of the chickens.

"You just don't stay in business very long that way," observed Orland.

We asked him if he would be in business this Saturday, but he said no—that hot barbecue sells good only once in about 30 days.

Evidently you can over do it.

—ps—

Sarah, a valued colored cook and household worker, asked her white mistress on Thursday for permission to get off Friday afternoon in order to attend a funeral at the African Methodist Church. Request granted.

Sarah was back on the job Saturday morning and her mistress asked,

"Well, Sarah, you attend the funeral?"

"Yes, ma-am."

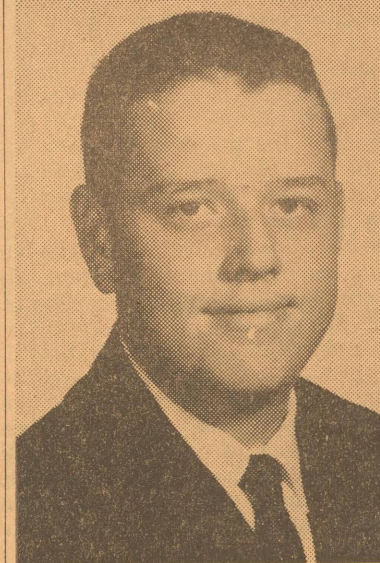

"How did it go; was it nice?"

"Oh, yes, ma-am; the corpse looked real nice, the flowers were real pretty and the music was awful nice too, but, I declare, it was so hot in there—we just couldn't enjoy it."

—ps—

REMINDER:

The Social Security representative will be at the Schleicher County Courthouse on Friday, June 10th, from 1:00 p.m. to 2:30 p.m.

Schrank To Attend
Boys State In Austin

GORDON SCHRANK

This year's local delegate to Boys State in Austin will be Gordon Schrank, son of Mr. and Mrs. Raymond Schrank, who was selected by the Bev McCormick Post of The American Legion to attend. Gordon will be a Senior this coming year in Eldorado High School. L. D. Mund, commander of the Legion post here, announced Schrank's appointment a while back.

Austin, June 9.—High school boys, 750 strong, will converge here on June 11 for the 1966 session of American Legion Boys State, sponsored by The American Legion, Department of Texas, Waggoner Carr, chairman of the Legion program, has announced.

The popular Legion program will be in session on the Campus of the University of Texas from June 11 to June 18. Chairman Carr said. Sessions will move to the State Capitol on Friday, June 17, where the newly elected officials will govern for the day.

The first Boys State program was held in Austin, June 19, 1940, with 108 boys attending. The program has steadily grown in size until the present ceiling was reached in 1965.

Boys State in Texas can be thought of as a mythical 51st state, where each citizen participates in the program of "learning by doing." When a boy arrives at Boys State, knowing no one and little more about Boys State itself, and works himself up to holding a state office, he can truthfully and honestly say he has learned by doing.

The American Legion in 49 states will sponsor Boys States where boys who have just completed their junior year in high school will study the organization, operation, and political processes of state government. Youths will participate in the organization of political parties, campaigns, elections, and the enactment and enforcement of their own laws within the mythical state.

"Boys State is one of the outstanding youth training programs of the Americanism Commission of The American Legion," Chairman Carr stated. "Not only do the youths learn more about the functions of government but also they see the importance of the role played by each citizen in discharging his basic citizenship responsibilities. They soon discover how the quality of government is related directly to the active interest of each citizen."

Keynote speaker for this year's program will be Dr. H. Roe Bartle of Kansas City, Missouri. Dr. Bartle, a former mayor of Kansas City, has received numerous academic degrees and has been honored by ten foreign countries for his efforts in the cause of freedom. Dr. Bartle, who is sometimes called America's number one speaker is, by popular demand, a repeater from the 1965 session. His address is scheduled Wednesday evening, June 15th in the Student Union.

A Governor's Ball will climax the week's activities at the Student Union on Friday night.

ATTEND WEDDING

Mrs. Evelyn Pennington and Mickey were in Austin the past week end to visit with Mr. and Mrs. Kenneth Pennington, and to attend the wedding of a nephew, Darrell Blakeway to Miss Marsha Lee Simpson in the Westminster Presbyterian Church at 4:30 Sunday afternoon.

Formal Organization
Set Up By Golf Club

The Eldorado Golf Club held its organizational meeting Monday night, June 6, 1966, on the putting green of the Schleicher County golf course.

Twenty of the 35 charter members were present for the meeting. C. W. "Chuck" Adams was elected president of the newly-organized club and Bob Bradley was elected secretary-treasurer.

Elected directors of the club are Guy Whitaker, Carroll Ratliff, Dick Preston, Ralph Waldron, John Hodges, Granvil Hext, Patton Enochs, and Adams and Bradley.

President Adams appointed Carroll Ratliff to head a committee to draft by-laws for the club. The club voted affirmatively on a motion by Carroll Ratliff to allow ministers courtesy of the course.

President Adams expressed appreciation to the many volunteer workers who donated many hours of labor toward the building of the course and particularly to county, city, and school officials who have extended their whole-hearted cooperation and help in establishing this fine recreational facility.

The club was organized to operate and maintain the public course. All interested persons are invited to join the club. Annual dues for family membership has been set at \$40. This fee covers green fees for an entire family at an average of 75c per week. Green fees for non-members have been set at 50c on week days and 75c on Saturdays, Sundays, and holidays.

Salvation Army
Drive Is Under Way

Joe Moore, Salvation Army field worker out of the Midland office, was with a group of local canvassers today, Thursday, for a kick-off breakfast in the dining room of the Java Junction Cafe. The breakfast kicked off the drive for this county and the committeemen and workers will be calling on local individuals and businesses for this worthy cause.

It is hoped to conduct the drive through the month of June. County Judge W. R. Bearce is general chairman for the drive.

Local Boys To Camp

The Salvation Army camp session will be held at the camp near Midlothian the last week in June.

Sheriff Edmiston heads the committee to select as many as three local boys to attend. This week, Steve Toburen and Robert Blackman were signed up to attend.

The local Salvation Army committee pays the transportation to and from camp for the boys.

Mrs. Ernest Finnigan returned home early this week after spending several weeks in Galveston.

News Of The Sick

Billy Frank Meador, who fell from a horse around Easter, was taken to Phoenix, Arizona, recently where he is undergoing treatments in a hospital. His family are with him and they expect to be there through June. Their address is: Mr. and Mrs. W. F. Meador, Room 115, Chilton Inn Motel, 30379 E. Van Buren, Phoenix, Arizona.

Mrs. Bertha Wilson was brought home last week from a San Angelo hospital where she spent several days undergoing tests.

Mrs. Rutha Boyer is continuing convalescence in Clinic-Hospital from her broken hip.

Jerome Mitchell is still confined home after undergoing surgery last month in Shannon hospital.

Fred Smith was taken to a San Angelo hospital last week.

Mrs. Carles Wimer is completing about four months in a coma in Memorials Hospital. Her condition remains about the same.

Ernest C. Hill is reported making very gradual improvement in the Sonora hospital where he has been for many weeks. Mrs. Hill is with him.

Billy Charles Gunstead, 3-year-old son of Mr. and Mrs. Bill Gunstead, received a painful electrical burn last Saturday morning when he put an extension cord in his mouth. He was treated for the burn and is now making good recovery.

Receives Degree At Baylor University

BETTY HUMPHRIES

Miss Betty Humphries, '63 graduate of Eldorado High School, received a Bachelor of Business Administration degree in Accounting from Baylor University during Commencement Exercises for 750 graduates June 3 in Waco. She was one of six students to graduate with honors from a class of 108 students receiving degrees from Hankamer School of Business.

Betty, daughter of Mr. and Mrs. C. T. Humphries, has been active in various campus organizations while attending Baylor. She was secretary of Beta Alpha Psi, national accounting organization, Student Congress representative from the school of business, and president of Baylor's chapter of AIESEC, world wide organization for student exchange program. She was a member of Laurel Society, Alpha Lambda Delta, Alpha Chi, and several honor societies from the Hankamer School of Business.

Betty spent the summer of 1965 working in Zurich, Switzerland, as an exchange student in the AIES-EC program.

She will be in Houston after August 10 where she has accepted a position with Arthur Anderson Accounting Company.

Jubilee To Start June 11 At Ozona

Ozona, "The Biggest Little Town In the World", is cleaning, painting and preparing for its Diamond Jubilee celebration to be held on June 11th through June 18th. A week of fun and celebrating that includes a cooking contest, baseball games, a trip to Fort Lancaster and four nights of a giant spectacle from June 15th through June 18th that relives the 75 years of colorful history of Crockett county will lead up to the grand finale of the last day. Saturday, June 18th, will be designated as homecoming day for all ex-students of Ozona. 9 a.m., Saturday, will see all of the old fiddlers from far and near gathered in the park for the fiddlers' contest.

A barbecue lunch, served in the park by the Ozona Chuckwagon Gang, will be followed by a two-mile parade of past and future history. The final performance of "From This Rugged Land" played on a 300 foot stage by a cast of 250, will be climaxed by a huge fireworks display and a good old-fashioned street dance.

Alton Roy Mitchell, who was released from the Air Force a while back, is now working in Dallas.

CONSERVATION of WATER

Theme Written By Kathy Robinson

The water problem is not one, but many. There is no national water shortage, but many communities must ration their water supplies. Every year floods strike scores of communities with disaster. Yet hundreds of arid-land communities would greet a cloudburst as a godsend. Drought is a recurring hazard in the Great Plains while drainage is a common problem in the Coastal Plain.

Nearly everywhere there's a water problem, too little or too much, too soon or too late. But each is a local problem, understandable only against the background of local resources, economic development, and needs. The national aspect of the water problem is the need to conserve and manage the available water in each community to best serve the longtime needs of its people. To understand the problem and then how to solve the problem, we need to know some basic facts about water and its use.

There is just so much water. The earth's supply remains constant. But that supply is always on the move. From clouds in the sky to land and ocean, and back to the sky again—it goes round and round in the water cycle, and we use the same water again and again. Vagaries of movement thru the cycle—uneven distribution and irregular timing—give rise to most problems of local water shortage or excess.

U. S. Weather Bureau records show that annual precipitation in the United States if spread evenly over the surface would be about 30 inches. This amounts to about 4,300 billion gallons a day. That is our total water supply.

What happens to the 4,300 billion gallons a day if precipitation that must replenish our water supply is greatly influenced by the managements of watersheds. Whether water enters the ground or runs off depends largely upon the nature and condition of the soil and its vegetative cover. Water, therefore, is essentially an agricultural resource, although man uses it in every aspect of his life.

Plants take their share of water as it comes to us in the water cycle even before man and animals have an opportunity to use it for drinking. Water is essential to photosynthesis, by which plants make food that supports all animal life. Plant growth consumes tremendous amounts of water. A growing tree is at least 50% water. This is one of the most important uses of water.

In the United States we face a number of serious water problems. Some are regional and caused by climatic conditions that cannot be changed or depended on. Others are the result of overuse or inefficient use of water supplies that could be adequate if managed and used economically.

Planned water management is an urgent need that should be attended to in the very near future.

While the potential supply of water after evaporation and transpiration remains constant, needs for human use pramid with growing population. Expanding industry and rising standards of living require more water per person to satisfy the American way of life.

From 1900 to 1950, while our population doubled, total water use, other than for power, increased fourfold. Average daily use for all purposes increased from 600 gallons per capita in 1900 to 1,100 gallons in 1950. By 1960 the per capita water use had increased to 1,500 gallons. The Senate Select Committee on National Water Resources estimates that the country will be using about 2,300 gallons of water daily for every man, woman and child by 1980, and 2,700 gallons a day by 2000.

Water has always been a major item in locating farms and ranches. The pioneer settled beside a water hole or stream to provide water for his needs and those of his livestock. The far West ranchers often feuded over the scattered waterholes.

Irrigation is the nation's greatest consumptive use of water and the extent of irrigation will undoubtedly increase in the years ahead. Unfortunately, prevailing methods of irrigation require much more water to be withdrawn than is actually needed by crops. Part of the water is lost by evaporation, seepage, runoff, or deep percolation in soil.

Water is industry's No. 1 raw material. Industrial use of water from private sources in 1950 averaged 77 billion gallons a day. By 1955 it had jumped to 110 billion gallons a day, and by 1960 to 140 billion gallons a day. Manufacturing uses tremendous volumes of water. As much as 300 pounds of water may be required for each pound of finished product.

Much water is withdrawn from streams and reservoirs to generate power. Most of this water is used to generate electricity. Some turns the machinery in small factories and mills.

Water is the key element in many kinds of recreation. It is indispensable to wildlife, which itself is valuable to recreation. Swimming, boating, fishing and certain kinds of hunting that depend on suitable bodies of water are among the more popular recreational pursuits. Intensive use of beaches, lakeshores, and parks and forests that contain streams and ponds shows the growing demand for recreation facilities.

Local water shortages arise in part from losses that keep some of the potential supply from being put to beneficial use. Flash runoff robs communities of part of their natural resource. Peak flows that exceed storage facilities are an economic loss aside from the damage they do as floods. Sedimentation that reduces storage capacity, evaporation that dissipates stored water, and pollution that makes water unfit for certain uses all reduce the usable supply.

Transported eroded materials deposited as sediment create downstream damages to waterways and water-storage facilities. Each year this deposition in natural and artificial channels and in reservoirs and harbors adds up to tremendous losses in both water supplies and water qualities. Sedimentation damages are costly. In a recent study of 22 cities, it was found that the cost of water treatment amounted to about \$70 per million gallons to make the water usable.

Evaporation from surface reservoirs is a loss that cannot be avoided, but sometimes might be reduced. Normal evaporation from the 11 million acre surface of the nation's major reservoirs equals the quantity of water withdrawn for public use. Evaporation from farm ponds is more than the water used for rural homes and livestock.

Evaporation from reservoirs can be held to a minimum by good design that results in small surface area in relation to storage capacity. Experiments with chemicals that form a thin film on the water surface offer hope of another way to reduce evaporation.

Pollution of streams, lakes, and coastal waters with sewage and other wastes from cities and industries reduces the supply of water suitable for many uses. Our waters are receiving twice as much pollution from municipal sewage systems alone as was considered allowable in 1955. There appears to be no end in causes. Although cities and industries return most of the water they use to natural resources, much of the water may be worthless for reuse. Pollution from sewage can be controlled. Some states have pollution abatement programs that have made dramatic improvements in important rivers.

Too much water at the wrong time can be as serious as too little. Many communities must cope with recurring floods. Much good land becomes too wet for agriculture.

Hardly a year goes by without a disastrous flood somewhere in the United States. Floods can be reduced by soil and water conservation on the farmlands, forests, and ranges that make up the watersheds, and by water-control structures on the upstream channels. Floods can be further controlled by large downstream dikes, dams, and other structures for protection of downstream flood plains.

Water problems are being helped by watersheds. A watershed is any area of land that drains into a particular stream or body of water. People in each watershed have their own water resource with which to meet their own needs. It is within these confines that problems of water shortage, flooding, or pollution arise. And it is within these separate watersheds that communities can manage their water resource to best meet their own needs.

Solution of water problems in a watershed takes teamwork. All the people must plan and act together to make best use of their land and water resources. Since

JOHN STIGLER . . JEWELER

urban and industrial uses make demands on water supply and affect its quality, and city folks as well as farmers must take part in watershed projects.

This water makes news as progressive citizens in individual watersheds act to control and manage their water resources—the first step in solving our critical water problem. But this is just a start. These watershed improvements are only a part of a total management program. Downstream from these watersheds, we must have the great river dams that store many acre-feet of water for power generation, irrigation, municipal water supplies, pollution control, navigation, and large-scale flood control.

When the story of our water resources is written, will be a tragedy, the story of a wasted continent? Or will it be a triumph, the story of how we worked together to avert national disaster?

Complacency is the foe of intelligent action. It is up to us to manage this wealth and use this abundance wisely, bequeath it to our children so that they might live full and rich lives, that the nation might remain great in the years that lie ahead.

Lilburn Hazelwood To Go To Puerto Rico

After having assignments with the Soil Conservation Service in recent years in Washington, D.C., and Holmes, Pa., Mr. and Mrs. Lilburn Hazelwood and Lony, Danny and Mary visited here this past week with his parents, Mr. and Mrs. Vernon Hazelwood and other relatives. They left Wednesday to go to Llano to visit Mrs. Wilson Smith.

Lilburn will fly to Puerto Rico to his new job assignment the 15th of June. He will be administrative officer for the Caribbean area, Puerto Rico and the Virgin Islands. His family will join him there July 15th. Lilburn expects to be assigned there for two years.

While here, they attended and helped with the J. C. Whiteleys' 65th wedding anniversary open house.

'Volt-Liner' Was On Display Here Monday

General Electric's "Volt-Liner," a unique new mobile display of electric utility distribution products, rolled into Eldorado Monday for a visit to the Southwest Texas Electric Co-Op.

The road show on wheels was being used to acquaint electric utilities in G.E.'s line of distribution equipment. General Electric's local Electric Utility Sales Division office headed the visit.

East Side Lions Club Met Last Thursday

The Eldorado East Side Lions Club met last Thursday night in the Latin American community. Ray Boyer and his son, Danny, showed a film on the Lions Crippled Children's Camp at Kerrville. Lion Bill Gunstead also attended

as a guest. Domingo Pina presided. Following the meeting, the group went to the West Texas Cafe for supper.

Mrs. Richard Ray Richard and children spent last week here visiting her parents, Mr. and Mrs. E. T. Davis. They left Sunday to return to their home at Houston.

On The Screen . . .

A Fatal Case Of Amnesia

Amnesia, suspected manslaughter, business intrigue and a glimpse at la dolce vita in a small California city are the main ingredients of "The Third Day," which is in color and which has its second and final showing tonight, Thursday, at the Eagle Drive-In Theatre here in Eldorado.

In the film, George Peppard and Elizabeth Ashley, a highly attractive team, are reunited by a story line that relies on the sheerest of melodramatics for its conclusion.

Peppard, born on the wrong side of the tracks, is married to Ashley, daughter of "old money." In trying to find himself in a social setting he doesn't fully understand and in a business situation for which his direct manner ill-suits him, Peppard goes off the deep end. He develops an affinity for 40-year-old brandy ("It costs \$2.50 a shot"), brawls, alienates his wife and turns to Sally Kellerman, who as Holly Mitchell is a cocktail waitress-entertainer (with the emphasis on "entertainer").

Holly is killed in a car accident after a sordid session with Peppard and because of his record as a troublemaker, a man-slaughterer, if not murder rap, hangs over him.

The non-hero is also faced with a business crisis partly brought about through the clever machinations of his brother-in-law, Roddy McDowall (child-star of a quarter-century ago).

It's a sticky wicket, further complicated by the fact that Holly's husband, a small, horn-rimmed glasses type who plays piano in the local spot, feels he should pay back Peppard for first taking and then destroying his wife.

During the three days that begin with Holly's death and Peppard's final vindication and his reconciliation with his wife, we are given some interesting views of the high and low life of a fictitious area in Northern California. Most telling of these is a dinner party at which a full-scale riding ring is prominent and a Texas-talking (one presumes) gentleman discusses a planned yacht trip.

Among the high points of "The Third Day" is Robert Surtee's fantastic cinematography in color. Surtee's work, especially in capturing the rain-softened landscape in the Russian River country where the film was made, has seldom been equalled.

Peppard is a competent actor, and so is Miss Ashley. The outstanding performances, though, are turned in by Roddy McDowall, Arte Johnson and Sally Kellerman.

As Oliver, McDowall is the perfect conniver. He has the wily manner, the superciliousness, the air of total dedication necessary to seek another man's destruction for his own gain. He own mother aptly describes him as "a rat, but he's all I have."

Johnson, as Holly's husband, the kind of "cripple" she likes to collect, turns in a stellar performance. He is undersized (hardly reaching Peppard's well-tailored shoulders), night-sighted, confused, and as it turns out has a homicidal bent. He believes in an eye-for-an-eye and his attempt to collect his deadly due leads to his own undoing.

As sultry and mixed-up Holly, who is briefly Peppard's playmate, Sally Kellerman, making her big-screen debut, is all that could be asked for. She talks cool, takes life as she chooses and is perfectly capable of turning everything she touches into something as depraved as herself. Miss Kellerman, who already has some impressive television credits, should go a long way in motion pictures.

Let's we forget, Mona Washbourne, as Peppard's aunt by marriage, is persuasive in a warm and understanding characterization; and Herbert Marshall, as a man who has suffered a stroke and cannot speak or move (except for one crucial scene), lends valuable aid to the effort.

Percy Faith's score is effective and the film's one song "Love Me Now," with music by Faith and lyrics by Ray Evans and Jay Livingston, while no Oscar contender, is poignant and well-handled by the talented Johnson.

The cast:
Steve Mallory.....George Peppard
Alexandria.....Elizabeth Ashley
Oliver Parsons.....Roddy McDowall
Dr. Wheeler.....Arthur O'Connell
Catherine.....Mona Washbourne
Austin.....Herbert Marshall
Dom Guardiano.....Robert Webber
Lawrence Conway.....Charles Drake
Holly Mitchell.....Sally Kellerman
Lester Aldrich.....Arte Johnson

Mr. and Mrs. Grover Lee Johnson of Goldsmith visited here during the week end with her mother, Mrs. Bertha Wilson, and with friends.

Steve Blaylock, who was one of the recent grads of EHS, has started to summer school at Angelo State College.

Miss Topliffe To Be Married In August

MARTHA ELLEN TOPLIFFE

Mr. and Mrs. E. H. Topliffe announce the engagement of their daughter, Martha Ellen, to Roger K. Tucker, son of Mr. and Mrs. J. M. Tucker of Odessa. Miss Topliffe and Mr. Tucker are both graduates of Sul Ross State College.

The wedding will take place August 7 in the chapel of the Methodist Student Center in Alpine, Texas.

Whiteleys Honored With 65th Anniversary Event

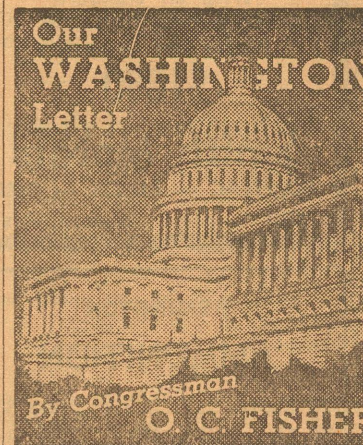

Mr. and Mrs. J. C. Whiteley were honored Saturday and Sunday afternoon with a family get-together on the occasion of their 65th wedding anniversary which came on May 26th. The couple were married in 1901 in Mason county.

Cake squares, punch, and coffee were served callers from the dining table, as a large number of local and out-of-town friends called Sunday afternoon. Others who could not attend in person sent cards and letters, and gifts.

Those from out of town were: Mr. and Mrs. Al Wilson, Terry and Allen from San Angelo; Sue and Karen Powers, Ozona; Mr. and Mrs. Jack Whiteley and Mr. and Mrs. Vernon Carroll, Brady; Mrs. Mary Burns, Voca, Texas; Mr. and Mrs. Tom Carroll, Monahans;

Mr. and Mrs. Jimmy Carroll, and Tim, Mark, Elizabeth, of Morenci, Arizona; Mr. and Mrs. Herman Carroll and Wayne, Andrews, Texas; and Mr. and Mrs. Lilburn Hazelwood and Lonny, Danny, and Mary from Holmes, Pa.

The Whiteleys and their daughters and son expressed appreciation to all who helped make the event such a success.

When the cost of living goes up it means inflation is at work. The housewife who buys groceries knows, without reading statistics, all about the tempo of mark-ups. Even the Bureau of Labor Statistics reports that lowly hamburger is up 11% from a year ago. Chuck is up 13%, liver 12% and some poultry as much as 17%.

When high government spokesmen express alarm and concern over inflation, their voices can hardly be heard because it keeps right on stepping up spending for almost everything at once. Asking the American housewife to buy low-grade steaks seems a bit out of order when, at the same time, federal dollars are being poured into every community in America as if it were going out of style. And in many instances the most fantastic of excuses are used as reasons for spending it.

Living costs jumped more during the past three months than at any similar period since 1951.

A chief cause of inflation is deficit federal spending. With deficit spending as a regular way of life, up goes the size of the public debt—and up goes the cost of living. It is well that the public, which enjoys those federal checks, fully realize the price that must be paid for that form of enjoyment. It is all a part of the pattern of inflation, of pushing upward the cost of living. Even with a \$12 billion-a-year war being waged, all the welfare goodies and new domestic spending schemes continue unabated—and inflation does the same.

Among recent guests have been Mr. and Mrs. Charlie Trigg of Eldorado.

Studies Under Way For Amistad Lake

Del Rio, Tex.—The Texas Parks and Wildlife Department has begun pre-impoundment studies of the \$80 million Rio Grande River basin to be flooded when the giant Amistad Dam is completed.

The huge lake is expected to become one of the best freshwater fishing spots in the southwest, if not anywhere.

The Department has begun a Federal-aid project to make certain that maximum utilization is made of the 82-mile long lake, covering about 87,400 acres of land in both Mexico and the United States.

Now, research is under way to explore the advisability of selective fish kills in Devils Lake and Lake Walk. Both will be absorbed by the immense impoundment.

Such a proposal, according to the Department, is to treat the two lakes sufficiently heavy en-

ough to reduce the undesirable fish and restock with black bass. This approach would be designed to provide an explosive bass population for the big lake once the water reached the two lakes.

The water levels in the lake and the general aquatic environment will provide habitat for varied game fish, according to the Department.

The dam will be seven miles long. The top will be 253 feet above the stream bed. The water will be 218 feet deep at the dam.

The lake will be backed up 17 miles on the Pecos river and 26 miles up the Devils river.

Giant canyons will be navigable in the rugged border area, providing access to presently inaccessible areas.

A Department spokesman said fishing in the vast lake will be at least as good as on the downriver Falcon Lake, which now provides round-the-year angling for visitors from a wide area.

In Those Days

Compiled From Success Files

ONE YEAR AGO
June 10, 1965—L. L. Harris died at the age of 80.

Rev. Dempsey G. Salter was assigned here as new pastor of the Methodist church, succeeding C. M. Nyquist who moved to Lampasas.

At a ladies night, Ray Boyer was installed new president of the Lions club. Louis Carothers of Big Spring was the installing officer.

FIVE YEARS AGO
June 8, 1961—John Sedberry returned home from a stay of two weeks in the Sonora hospital.

Five local F.F.A. boys attended the Area II meeting in San Angelo. They were Jim Runge, H. A. Belk, Leonard Kent, Mikel Jurecek, and Danny Burk.

In a ceremony in the Eastside Baptist church, Miss Shirley Carroll became the bride of Sam Granberry.

Ernest K. Nimitz was leaving for a U.S. Forest Service summer job in Colorado.

Mary Leigh Tisdale enrolled in San Marcos academy for an eight-week course.

Susan Rogers was honored on her eighth birthday.

Mr. and Mrs. Peyton Cain were moving back to this county, to a remodeled house in the Bailey Ranch area.

Jim Steward left for two weeks of Reserve training at Fort Hood.

12 YEARS AGO
June 10, 1954—Sam Connally, 38-year-old district attorney of San Saba, who was running for O. C. Fisher's congressional job, visited here in the interests of his campaign.

Mrs. D. C. Royster returned from New Mexico where she had visited her son, Donald J. and family.

A daughter was born to Mr. and Mrs. Walter Pope, and a son to Mr. and Mrs. O. L. Furr.

Rev. Nihil Bulkley of Dallas was called here to be pastor of the Fundamental Baptist church.

Coach Warren was in charge of a summer recreational program, and he reported 50 boys out.

Mrs. Martha Faught died at the age of 88.

Mrs. Ernest Nimitz gave an informal coffee honoring Mary Lillian Ellington, who to marry soon.

Pat Joiner and Mrs. Ila Ruth Alexander married in San Angelo.

June 20 was date set for open house in the newly completed parsonage of the First Baptist church.

35 YEARS AGO
June 12, 1931—Robert Massie, pioneer banker, ranchman, and businessman of the San Angelo area, died in Dallas at the age of 64.

John W. Murr, ranchman of the Ft. McKavett area, died at the age of 54.

Miss Mollie Turner was establishing a Music Club.

Interest was running high in the W. R. Nicks No. 1 J. D. Wesner Oil Well. "Uncle Sam" Nicks visited the site.

Conn Isaacs received his degree from McMurry college.

A two-week revival closed at the Methodist church, at which Rev. J. D. McWhorter did the preaching.

The Presbyterian Young People's Training School was going on at Kerrville. Attending from here were Margaret Bradley, Isabelle Isaacs and Lucile Oglesby.

Joe Jackson, Federal Officer, now stationed at Del Rio, was in Eldorado Saturday shaking hands with friends.

In San Angelo, Lida Nougues and E. E. Glover were married.

Mrs. Preston Bailey entertained the Eldorado Bridge club.

Mrs. Lewis Whitten won high club and Mrs. Eddie Reynolds high guest.

Ambitious man or woman full or spare time. Supply Rawleigh famous products in Schleicher county or Eldorado. Can earn \$125 per week. See W. J. Drgac, Mereta Rt., San Angelo, or write Rawleigh TX E 1540, Memphis, Tenn.

NOTICE OF BOARD OF EQUALIZATION MEETING SCHLEICHER COUNTY INDEPENDENT SCHOOL DISTRICT

In obedience to an order of the Board of Equalization regularly convened and sitting, notice is hereby given that said Board of Equalization will be in session at its regular meeting place in the City of Eldorado, Schleicher County, Texas, at 9:00 a.m., beginning on the 23rd day of June, 1966, and from day to day thereafter, for the purpose of determining, fixing and equalizing the value of any and all taxable property situated in the said Schleicher County Independent School District, until such values have finally been determined for taxable purposes for the year 1966, and any and all persons interested, or having business with said Board, are here notified to be present.

Done By Order of the Board of Equalization of Schleicher County Independent School District, Schleicher County, Texas, at Eldorado, Texas, the 7th day of June, A. D., 1966.

Robert K. Bradley
Secretary
Schleicher County Independent School District 1tc

CONTRACTORS' NOTICE OF TEXAS HIGHWAY CONSTRUCTION

Sealed proposals for constructing 12.504 miles of Reconst. Gr., Strs, Base & Surf. From US 277 To FM 1828 on R.M. Road 33, covered by C 556-12-9 in Schleicher County, will be received at the Highway Department, Austin, until 9:00 A.M., June 22, 1966 and then publicly opened and read.

Plans and specifications including minimum wage rates as provided by Law are available at the office of Robert A. McCulloch, Resident Engineer, Sonora, Texas, and Texas Highway Department, Austin. Usual rights reserved.
(Jun 9-16)

Notice To Property Owners

The following ordinance was passed June 7, and will become effective June 17, 1966

Weed Ordinance
AN ORDINANCE requiring weeds and grass to be cut upon premises and that rubbish and trash be removed therefrom; fixing a penalty for a fine not to exceed \$50 for failure to comply with such ordinance; and declaring that allowing weeds to grow and trash and rubbish to accumulate to be a nuisance.

BE IT ORDAINED By The City Council of the City of Eldorado, Texas:

Section 1. It shall be unlawful for any owner, lessee, occupant or any person in charge of any premises in the city of Eldorado to allow weeds to grow upon the premises, or trash or rubbish to accumulate upon said premises to such an extent as is reasonably calculated to create a fire hazard or calculated to become injurious to the health of the citizens of Eldorado, and either act is hereby declared to constitute a public nuisance.

Section 2. Whenever weeds are allowed to grow, or trash or rubbish allowed to accumulate upon any premises of the City of Eldorado as prohibited by this ordinance the governing body shall hear evidence and determine whether or not such accumulation of rubbish and trash or the growth of weeds thereon, or both, are sufficient to constitute a nuisance as herein defined, and if they so find, they shall pass a resolution declaring that the growth of weeds or accumulation of trash and rubbish upon such premises, or both, constitutes a public nuisance, and shall order same removed by the owner, occupant, lessee or person in charge of such premises, within ten days from the date such notice is given.

Section 3. Failure to cut weeds and remove trash and rubbish or to do either of them when notified to do so, as set out in this ordinance by any party obligated to do so by this ordinance, shall be punished by a fine in any sum not exceeding fifty dollars (\$50.00) and each day that such nuisance shall continue after the time for abatement as herein set out shall constitute a separate offense.

Passed and approved this 7th day of June A. D. 1966.

Approved: Eldon T. Calk
Mayor

Attest: L. B. Burk
City Secretary (J 9-16)

"PLAYING IT COOL" IN A SALVATION ARMY POOL

has sidetracked many a
 boy from the moral perils of
 city and small town streets.

This summer, some 800
 Texas boys will be sent to
 Camp Hoblitzelle, a 380-acre
 summer camp owned and
 operated by the Salvation
 Army, near Dallas.

Two boys picked by Welfare
 Chairman, Sheriff Orval
 Edmiston and his local
 committee, will also enjoy
 baseball, horseback riding,
 fishing and boating.

Eldorado Salvation Army
 funds pay for transportation
 to and from camp.

Camp facilities and trained
 personnel are furnished by
 State Salvation Army funds.

Watersheds Were Well Tested in April

"Never before has the upstream
 watershed protection and flood
 prevention programs in Texas been
 tested so extensively and thor-
 oughly, and never before has proof
 of adequacy been so evident," says
 H. N. Smith, State Conservationist,
 Soil Conservation Service, in com-
 menting on the torrential April
 rains.

Smith went on to point out that
 extremely heavy rains fell over
 large areas of the state, April 17-
 28. Rainfall ranged from 8 inches
 near Dublin to more than 25 in-
 ches in the Marshall-Gladewater area.

Heavy flood damage occurred in
 agricultural and urban areas alike.
 Damages to roads, bridges and
 utilities ran into hundreds of thou-
 sands of dollars. The Texas State
 Highway Department reported da-
 mages to highways totaled almost
 one million dollars. More than a
 dozen Texas counties were declar-
 ed disaster areas because of flood
 damage. Total damage estimates,
 still incomplete, range upward of
 \$15 million.

Only minor flooding was noted
 on watersheds where upstream
 watershed protection and flood
 prevention programs were sub-
 stantially completed. All of the
 approximately 1100 completed
 floodwater retarding dams in Tex-
 as caught and held some floodwa-
 ter.

About 820 completed dams are
 located in North Central & North-
 east Texas where rains were hea-
 viest. It is estimated these struc-
 tures held back over 600,000 acre-
 feet of floodwater and released it
 downstream over a period of sever-
 al days. The holding back of this
 much water in watersheds on
 which the dams are located pre-
 vented damages being several
 times heavier than they actually
 were to crops, livestock, fences,
 roads, bridges and urban areas.

An outstanding example of the
 benefits of a completely installed
 watershed protection program was
 on Cow Bayou which runs through
 McLennan and Falls counties. This
 project, in addition to land treat-
 ment, includes 29 floodwater re-
 tarding dams and 11 critical sedi-
 ment areas. All measures in the
 watershed are completed. No
 flooding and no damages occur-
 red. Without the program on this
 watershed it is estimated damages
 would have totaled \$104,000 during
 April alone.

Even partially completed water-
 shed construction on the Tehua-
 cana Creek watershed east of
 Waco was effective. The work plan
 calls for 30 floodwater retarding
 dams and about 12 miles of stream
 channel improvement. Thirteen
 dams have been completed; no
 channel work has been done. Dur-

ing the heaviest rains, 11,000 acres
 were flooded with damages esti-
 mated at \$412. It is estimated with-
 out any dams completed, 15,000
 acres would have been flooded
 with damages in excess of \$620,-
 000. The partly completed pro-
 ject reduced damages by about
 35% or approximately \$208,000. If
 all floodwater retarding structures
 and channel work had been com-
 pleted, damages would have been
 reduced another 35% and would
 have totaled only about \$211,000
 instead of \$620,000.

"Land treatment such as ter-
 races, waterways, cover crops, and
 good grass in pastures reduced
 land damage and kept thousands
 of tons of dirt, mud and silt from
 moving on to fertile bottomland
 and into downstream reservoirs.
 These benefits were in addition to
 over five million dollars additional
 flood damage that would have oc-
 curred had the 1100 floodwater re-
 tarding dams not been built,"
 Smith concluded.

Cuba Trip Reported As Lions Club Meets

Mrs. Ida Neill, life-long resident
 and long-time employee in the
 Court House, gave a report at the
 meeting yesterday of the Lions
 club of the trip that she and her
 husband, J. L., made in March to
 Cuba.

Their son is civil engineer in
 charge of the desalinization plant
 at the Guantanamo Naval Base.
 Mrs. Neill described the base and
 how life was going on there with
 Castro "next door."

Ray Boyer presided at the club's
 business session. He reminded all
 present of the ladies' night com-
 ing up Monday at 7:30 at which
 officers for the 1966-67 year will
 be installed. Charles Wimer as
 president heads the new slate.

All Lions who can do so have
 been asked to go to the banquet
 room at 4:00 Sunday afternoon to
 help set up the tables.

Bill Rountree presented the pro-
 position of selling stadium cush-
 ions as a money-raising project,
 and the club members approved
 this. Advertising will be sold on
 the back of each cushion.

Benny Patton won the "friendly
 dollar."

Guests were Joe Moore of Mid-
 land, Don Williams of Harlingen,
 and Miss Mickey Phelps and Mrs.
 Ida Neill of Eldorado.

STILL PROMOTING SWIM CLASS

Fred and Flora Riley are still
 working on the swimming class
 for children at the local pool. Plan
 is for an instructor to come out
 from San Angelo. Further details
 are available at the pool.

The pool is open each afternoon
 of the week except Monday, when
 it is closed all day.

ON FISHING TRIP

A number of County officials
 and a few other local men are on
 a fishing trip this week to Lake
 Procter, northeast of Brownwood.
 Some of the group came in Wed-
 nesday and the rest will be in to-
 night, Thursday.

ATTEND FUNERAL

Mr. and Mrs. M. H. Woodward,
 Mrs. Ella Parrent, and Mrs. John-
 ny Hawkins of Eldorado, and Mrs.

 turned home Sunday.

First Baptist News

Circle Meetings Held

The Maurice Doyle circle met
 at the home of Mrs. Kenneth Vau-
 ghan Monday afternoon for the
 last lesson of a series on Family
 Witnessing from Royal Service
 Magazine.

Mrs. Jess Blaylock presided over
 the business meeting and also led
 the program as Mrs. W. O. Alex-
 ander, program chairman, was
 absent.

Mrs. Mary Palmer was appointed
 secretary-treasurer since Mrs. C.
 N. Clark resigned to work for El
 Dorado Woolen mills. Mrs. E. W.
 Brooks led the prayer calendar.

Refreshments were served after
 the meeting to the six members
 present.

The Ruth Dickerson circle met
 with circle chairman, Mrs. W. A.
 Van Dusen, for the circle program
 on My Family: Witnessing in the
 Community. Mrs. E. H. Dannheim
 was leader and was assisted by
 Mrs. Ruth Finnigan, Mrs. D. Wil-
 liams, Jr., and Mrs. J. B. Mont-
 gomery in presenting the program.

Mrs. L. T. Wilson will be hos-
 tess for the next meeting next
 Monday afternoon when Mrs. J. B.
 Montgomery will teach the Bible
 Study.

The Bertha Smith circle met
 with Mrs. T. P. Robinson Jr. for
 a round-table discussion on the
 subject, My Family: Witnessing in
 the Community.

Mrs. Odie Harris presided dur-
 ing the absence of Mrs. Jack Grif-
 fin, circle chairman.

Mrs. George Williams read the
 prayer calendar and Mrs. Robinson
 led the prayer.

A card of thanks was read from
 Judy Sallee. Refreshments were
 served to the six members pre-
 sent.

Miss Cain To Serve As Youth Conf. Counselor

JANE CAIN

At the meeting of the Eldorado
 Lions Club yesterday, that group
 voted to sponsor Miss Jane Cain
 as a Junior Counselor at the up-
 coming Attorney General's Youth
 Conference in Austin.

Miss Cain attended the confer-
 ence a year ago. She graduated in
 May from Eldorado High school,
 and her parents are Mr. and Mrs.
 Peyton Cain.

The two delegates from here
 will be Maureen McCravey and
 Bobby DeLong. The Annual Texas
 Youth Conference will be held
 August 18-21 and will be spon-
 sored by the Texas Law Enforce-
 ment and Youth Development
 Foundation.

Kenneth Henderson To Be Married June 24th

The engagement of Miss Sharon
 Ann Bode to Kenneth Dale Hen-
 derson has been announced by the
 bride-elect's parents, Mr. and Mrs.
 Oscar Bode, Jr., of Brenham.

The prospective bridegroom
 went to school here in Eldorado
 and graduated from McCamey High
 School. He attended Sam Houston
 State College at Huntsville and
 this year is in Junior College at
 Brenham.

The couple will be married June
 24 in the home of the bride-elect's
 parents. Kenneth is a grandson of Mr.
 and Mrs. Lester Henderson of this
 place.

Miss Bode was graduated from
 Brenham High school and attend-
 ed Massey Business College and
 Cecil B. Lee Modeling Academy.

The Eldorao Golf Club is offering free instruc-
 tion in golfing to persons interested in learning to
 play. John Hodges will be in charge of arrange-
 ments for group classes. Any person interested in
 obtaining instruction should call Mr. Hodges. The
 classes will be arranged for group instruction at the
 most convenient time for instructor and students.

COUNTY AGENT'S COLUMN

by Tiny Godwin

Schleicher County Agricultural Agent

This is the only country in the world where as soon as a man can afford a Ford, he buys a Cadillac.

Dear Teenagers:

It is true that your opportunities for a full and rewarding life are greater than at any time in history, but it is also true that you have the capability, willingness and vim to accept any challenge and you have my admiration.

The summer season is here and most of you have changed school activities to other uses of time. You are indeed fortunate if this can be leisure time activities. A large segment of our population have leisure time, but not all have the vitality and courage of youth.

Leisure time is not for idleness and loafing; but it is time you can choose your activities. Many parents and teenagers feel that they must have employment with financial remuneration to feel worthy. Sometimes it is necessary for you to supplement the family income and so by doing gain valuable experience in the art of finding and holding a job. However, there are many gainful activities that can be just as worthy as holding a job.

A civilization of leisure is a civilization of culture. There is time for music, art, flowers, literature, and other interesting things to accomplish. Maybe this is one period of time in your life that an entire summer can be devoted to something you really want to do.

One rewarding use of leisure time is that of service to others. Most of you are quite capable of earning money. You do not have to prove this and it is not necessarily of the most importance, but earning the respect and gratitude of your fellowman is. This is done by giving of one's self. Have you ever considered working in the church yard, helping with Little League, or as a recreational aide at summer activities, or helping with operation "sparkle"? Volunteers are needed at many other locations. To work as a volunteer you must make contacts, secure instructions or appointments, and hold it. Thereby you can prove to yourself your own worthiness, become better acquainted with your own talents, and gain a personal satisfaction of accomplishment. It will help when you desire a paying job. There is always the question of— "What have you done?" or "What can you do?"

After watching those auto ads on TV, you begin to wonder, where do they find all those empty roads where the films are taken?

Two new beef cattle bulletins from Texas A&M University are available at my office.

They are entitled "Nutrient Requirements of the Cow and Calf" and "Feeding the Cow and Calf," both written by L. A. Maddox, Jr., Extension animal husbandman at A&M.

According to the bulletins, you must know the grazing habits of a beef cow to fully understand her performance. Beef cows on pasture normally spend 16 to 20 hours a day grazing periods. The first begins about daylight and continues for 3 or more hours. The other is during mid-day with several

short grazing periods for a total of 1 to 3 hours. As a rule, no grazing takes place from about 2 a. m. to dawn.

The cow must increase her grazing work as the grass becomes more mature. She must move some 1,000 pounds of body weight about a mile a day while foraging between 10 and 30 pounds of dry matter daily.

A cow can graze only until the rumen is filled, then she must stop until enough rumination takes place to allow forage to pass out of the rumen.

The length of time grass remains in the rumen depends on the digestibility of the grass. Young tender grasses move out of the rumen at a faster rate than dry mature forages. Thus, consumption of green grasses is high; consumption of mature and weathered forages is low.

Another interesting note: A&M research shows as the temperature increases, the intake of forage goes down. This may account, in part, for low gains during the hot summer months.

Do you remember when mothers' meals were carefully thought out instead of carefully thawed out?

Home Demonstration Agent's Column

By MRS. VIDA KREKLOW

Last fall a series of demonstrations was given all over the County on cooking the less expensive cuts of meat.

The information is highly usable at any time of the year but the approach of the summer barbecue season makes it even more timely.

Mention steak to some people and they immediately think of porterhouse, filet mignon, T-bone, sirloin or rib eye steaks.

But there are other people—the real swingers—who are experimental types. They really go for the likes of flank, round or chuck. Especially—most especially—for barbecuing. We used chuck roasts—about 4 pounders.

These are known as "less tender" cuts of beef. They are long on flavor and generally are more modestly priced than the more popular steaks. The secret is how you get them ready for the grill—and that's easy.

Simply arrange a whole flank steak, or a piece of round or chuck, in a glass or china dish about 24 hours before you plan a barbecue feast.

Drizzle a well-seasoned marinade over the meat. Cover loosely and refrigerate. Turn several times to let the action of the acids in the marinade soften the connective tissues of the meat.

The marinade? Try one made with condensed tomato soup, vinegar or lemon juice and various seasonings. The unusual feature of this particular marinade is that it contains a bit of honey. At some clubs we used simple French dressings, maybe doctored up a little.

Honey Marinade. Combine one (10½-oz.) can condensed tomato soup, ¼ cup honey, ¼ cup wine vinegar or lemon juice, 2 tablespoons salad oil, 1 teaspoon dry mustard, ½ teaspoon black pepper and 1 tablespoon Worcestershire sauce. Beat until smooth. Store in

the refrigerator. Makes about one pint marinade.

Broil the steak to the doneness you prefer, basting a time or two with the marinade. Serve it, beautifully browned, oozing with flavorful juices and piping hot. Oven cooking does a fine job on this cut of meat too. Be sure to keep the temperature at about 350 F.

To serve flank steak, cut it diagonally into thin slices. If you use a thick cut of round or chuck, let your preference be your guide in slicing.

Accompany with baked potatoes and a robust salad: Assorted greens, sliced green onion, tomato wedges, chopped parsley, chunked up avocado, sprinkled with parmesan cheese, then tossed with a garlicky dressing.

Also crispy-crustured warm hard rolls or French bread. For dessert: Ice cream topped with some of June's supply of fresh fruit, all crushed and sweetened a bit.

The poor dry cleaner gets a lot of blame these days that he really does not deserve.

From A&M University comes this article having to do with the problems created by the many artificial or man-made fibers used in today's clothing construction.

Often the fault lies in failing to tell the drycleaner about the fabric and special stains.

It's your responsibility to inform the drycleaner of the type of fiber and to locate spots that will need special treatment. It is also your responsibility to choose a reliable cleaner and give him enough time to do a good job.

Before the drycleaner can satisfactorily press a garment, he needs to know the fiber content. Fabrics of 100% man-made fibers and blends of fibers are heat sensitive. They may become crinkly, shiny, glazed or scorched when pressed with too hot an iron.

The drycleaner also needs to know when something has been spilled on the garment so that he can treat it before drycleaning. This is especially important when the stain is not actually visible.

Cold wave solutions and sugar stain are hard to remove. The chemicals in a cold wave solution, once in a fabric, are not visible. Sometimes a color change will take place after pressing and sometimes it may appear for weeks or months after drycleaning. Sometimes a stain rather than a color change develops. The only way to solve this problem is to keep cold wave solutions from getting on clothing.

Sugar stains may not be visible either, but after pressing or aging they appear as permanent brown stains. Be sure to point out sugar stains to your dry cleaner for spotting before cleaning.

Is the subject of child care becoming like Mark Twain's comment on the weather, "Everybody is talking about it but nobody seems to be doing anything about it" kind of thing?

A well known cliché has it down that the expert on child upbringing is one who has no children.

This almost hits me, only I'm going to leave the last word to the recognized experts. I agree with this author's position; do you?

Be Objective in Child Discipline
Many people find that being objective when they discipline their children is often easier said than done, says Mrs. Patsy R. Yates, Extension family life education specialist at Texas A&M University.

When a child creates a commotion, parents often act quickly out of embarrassment. Disciplining your child should not occur because of what the neighbors might think.

Everyone concerned might be happier if you and other parents could develop the objectivity of a physician along with love and concern. A doctor isn't ashamed just because a patient's temperature goes up, nor angry when blood pressure climbs.

Instead, he looks for the cause of these symptoms. Then he decides what to do. Follow this positive approach in dealing with your child's behavior. His conduct can be explained if you know the reasons for it.

Combine this positive approach with attempts to understand what is going on inside your child's mind. His inner feelings may be the cause for the unacceptable behavior.

If you would like assistance in understanding his behavior, you will find the Children's Bureau pamphlet, "A Healthy Personality for Your Child," a very helpful booklet, states the specialist. You can obtain it from the U. S. Government Printing Office in Washington, D. C.

Now— U. S. Savings Bonds Pay More Interest

4.15% when held to maturity

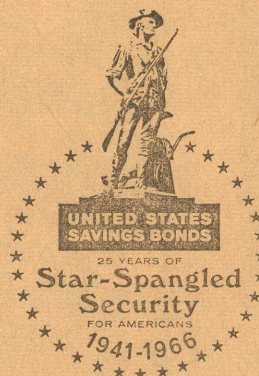

Higher interest on the Bonds you already own, too!

U.S. Savings Bonds are a better way to save than ever

Because now all Series E and Series H Bonds bought after December 1, 1965, will earn the new, higher interest rate of 4.15% when held to maturity. That's only 7 years for Series E—9 months quicker than before. All H Bond interest checks will be larger beginning in June 1966.

And your outstanding Bonds will earn more, too, from now on. So, you don't have to cash in your present Bonds to get the attractive new rate.

Ask about buying Bonds where you work or bank. For America's future. And yours.

"Today, none of us can remain aloof on the sidelines."

"Today, above all, is a time for all Americans to rededicate themselves to the spirit that animated the Minutemen of Concord—who serve as a symbol of the Savings Bond program. For today, as at the founding of our nation, it is freedom which is again at stake. Not all of us are called upon to fight in the jungles of Vietnam, but while our men are there, in the front line of a distant land, none of us can remain aloof on the sidelines. We must all do our share—in every way we can—to support our men in Vietnam. One sure way is open to all Americans through the Savings Bond program."

John F. Kennedy

Ram Sale Set June 23

The 30th Registered Rambouillet Ram Sale will be held June 23rd at the San Angelo Fairgrounds. Approximately 300 top quality stud and range rams are expected from several states. The Sale is sponsored by The American Rambouillet Sheep Breeders' Association.

All Rams must be in the barn by 6:00 a. m. Wednesday, June 22nd, when a committee of five breeders will inspect and sift all rams that do not qualify. Studs and A-B-C pens offered for sale will be selected by the individual breeders. The buyer with the winning bid of A-B-C pens has the privilege of taking all or any part of the pen. The range rams will be sold in pens of 5 or more. The winning bid will take all.

The Sale proper will start Thursday at 10:00 a. m., June 23rd, with Odus Witenburg as auctioneer.

Robert Nixon Marries

Mrs. Gertrude Saupe of Route 2, Paris, Tennessee and Mr. R. J. Nixon of Route 1, Eldorado, Texas, were united in marriage Friday May 27, 1966 in Paris, Tennessee.

The bride's dress was a rose pink crepe with a lace overblouse. She wore a white veil hat and carried white gloves. Her flowers were white carnations.

Their attendants were Mrs. George F. Garner, friend of the bride, and Pauline Franklin, the daughter of the bridegroom.

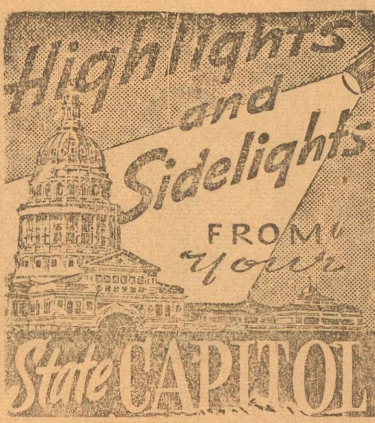

Mr. and Mrs. Nixon will remain in Paris until about the 15th of June, after which they will be at home on their ranch at Eldorado, Texas.

A shower and going away party is being planned for the couple on Wednesday, June 8th at the First Christian Church Fellowship Hall.

Airman 1-C Bobby Proehl is now stationed at Fort Meade, Maryland. His wife is the former Kathy Kinser. Their new address is: Mr. and Mrs. Bobby Proehl, 1241 Scott Manor Courts, Odenton, Maryland.

Austin, Texas.—Comments by legislators and water leaders generally were favorable on the \$3.7 billion preliminary "Water for Texas" plan of the Texas Water Development Board.

This massive plan calls for a "rescue operation" for the Lower Rio Grande Valley irrigated region, where a recent court decision knocked out water rights of more than 100,000 acres.

Project, to be designed by the Bureau of Reclamation, would use two big reservoirs on the San Antonio River (Cibola in Wilson county and Goliad in Goliad county), two on the Guadalupe river (Confluence in Victoria county and Cuero in DeWitt county) and one on the Lavaca-Navidad rivers (Palmetto Bend) to link to a 190-mile canal to the Lower Valley.

Water from the three watersheds could be used for a number of years. As needs in those valleys develop, a canal would be linked to the northern end of pipeline-and-canal system which would start at Texarkana Reservoir, go west to Dallas and Fort Worth to meet their future needs, then down the Trinity, Brazos and Colorado Rivers to link with the southern portion of the canal. Then it could be said that water from Lake Texarkana was being used in the Lower Valley—after repeated use and reuse along the 980 miles of the State Water Project system. Irrigation in the Sinton and Baffin Bay regions also would be supplied from the canal.

In addition to the 14 reservoirs connected with the State Water

Project, the big plan proposed 46 other reservoirs or enlargements. These would supply in-basin needs in all parts of the state except Far West Texas, where there simply is not enough stream flow to justify reservoirs.

For that region, a massive research and development plan is proposed. First, a special West Texas office of the Water Development Board would seek ways to spread present supplies as far as possible. This would include recharge of the Ogallala formation from the 36,000 playa lakes in the High Plains, deepening of those rainwater lakes to cut down evaporation.

Plan also calls for West Texas to be designated by Congress as part of a study by the Bureau of Reclamation for finding new supplies for the Southwest, in the hope of bringing water from the Columbia river in Oregon by 1985, when Plains ground water supplies are expected to become severely depleted.

Attorney General Rules

Atty. Gen. Waggoner Carr has held that veterans and fraternal organizations may charge a service fee for serving drinks from liquor owned by members without having a private club registration permit.

In other recent opinions, Carr decided:

—Texas Educational Foundation, Inc., operator of Gary Job Corps Center, San Marcos, is not exempt from state motor fuel taxes.

—Clarewood House, a Harris county retirement home for aged, is entitled to ad valorem tax exemption as an institution of a purely public charity.

—State agencies may pay registration fees for employees attending required courses of instruction in new laws, programs, etc.

—Only licensed engineers are legally entitled to use such titles as "sales engineer", "safety engineer", etc.

—Parolee "eloper" from another state cannot be turned over to proper authorities without usual extradition formalities. (Restatement).

—State military men on official trips are not entitled to free use of toll roads, and a law attempting to give them that privilege is invalid.

—A soil and water conservation district does not have the power to create a separate, non-profit corporation for operating a natural gas distribution system.

—Arlington State and Texas Western University presidents, deans of South Texas and Southwestern medical schools and the director of the Cotton Research Committee should be compensated for official travels on an actual-expense basis.

—Act requiring taxing authorities, using a county tax office, to place their tax rate in the hands of county assessor-collector by July 20 is constitutional.

—County clerk must file and record properly acknowledged deeds on request.

Courts Speak

In a case dealing with widespread water rights interests the Third Court of Civil Appeals ruled against unrestricted construction of small reservoirs on Medina river. Court, agreeing that permit for irrigation from a 162-acre-foot reservoir was invalid, said the dam was on the bed of a navigable stream, not private property of land owner. Southwestern Cattle Raisers' Association had urged permit be upheld, said many small ponds, tanks and lakes are at issue.

State Supreme Court stood by its earlier decision that Rice University alumni have the right to appeal a trial court decision which said the institution can admit Negroes despite provision to the contrary made by a charitable trust that established the university.

Senate Race Now Spotlited

Now that the Democratic primaries are over the U. S. Senate race moves to the center of the 1966 political stage.

Race between Democratic Atty. Gen. Waggoner Carr and Republi-

can U. S. Sen. John G. Tower is billed as one of top three Senatorial battles in the nation.

It's generally rated among state-house political pundits as very close. Each side can cite polls to prove its man it really out front.

Although the showdown election is not until November 8, both candidates are canvassing the state as though voting time were almost at hand.

Carr now will try to unite Democratic party functions behind him.

Tower's major job is to appeal to conservative Democrats and at the same time, ironically, to attract as many anti-Carr liberals as he can.

Both candidates outwardly are confident, and both are said to be well financed.

National Guard

Sunday 7,000 men from the 49th Armored Division and 5,000 members of the 36th moved into North Fort Hood for two weeks of extensive field training. But Texas Adjutant General Thomas Bishop said he has heard nothing to indicate a possibility of a call into Federal service for the Texas National Guard units.

Answering charges that the Selective Service office in Texas is shirking on draft calls, draft director Col. Morris Schwartz said 102,130 Texans who enlisted and another 16,274 who had been drafted were in the armed forces as of March 31.

Although racial records are forbidden in the armed forces, Schwartz said it is evident from the places where the 53% draft rejection rate of Texas are greatest, the high proportion of rejections occur among Latin American and Negro youths, who failed some service tests.

In April, Schwartz said, Texas' draft quota was only 866, but 1,458 Texans volunteered and another 1,133 were inducted by draft.

Oil Rule Changes

Oil exploration companies got their third boost of the year from the Texas Railroad Commission when the Commission increased from five to 10 the number of oil wells in a new offshore field which get bonus production allowances.

This 10-well rule was urged by spokesmen for major and independent oil companies as a way to speed up identification of new reserves to meet oil supply demands in the 1970's.

Earlier this year, the Commission extended from 18 to 24 months the period during which wells in newly-found fields get bonus allowances, exempt from proration, and granted higher discovery allowances for offshore wells to allow quicker pay-outs there.

Indian Budget Raise Asked

Texas' new Indian Affairs Commission has asked for a budget of \$3.1 million for the Alabama-Coushatta Indian Reservation in Polk county. Money would be used during the next two years to make the reservation a bigger tourist attraction.

Commission is seeking \$1.3 million in state matching funds to meet hoped-for federal grant to further develop a 4,444 acre area 17 miles east of Livingston on U. S. Highway 190. Reservation now operates on a budget of \$158,000 for the current biennium.

Requests presented by Commission Chairman Dempsey Henley of Liberty, include funds for dam and lake, camping and picnic areas, trading post, shopping center, restaurant, swimming pool, logging train, and a real "Indian Village," together with 400 additional acres of land.

DPS in Highway Study

State Department of Public Safety will participate in a nationwide study of controlled access roads.

Many Thanks

voters of Precinct 4, for the vote of confidence given me for Commissioner in the Run-Off Democratic Primary last Saturday. This vote is much appreciated and I pledge again my best efforts in the future.

I appreciate the fact, too, that the entire campaign was a clean one on the part of my opponents. I will be receptive to your suggestions in months ahead as to how I may best serve your interests, both individually and for the County as a whole.

LAWRENCE DANNHEIM.

Col. Homer Garrison says they will seek administrative guidelines for police in determining the needs for supervising traffic and providing motorist services on the controlled access highways.

International Association of Chiefs of Police research and development division is conducting the project under contract with Office of Highway Safety, U. S. Bureau of Public Roads.

Texas is one of six states selected for intensified study, though all states and most metropolitan areas will be covered. DPS was picked because of "outstanding reputation in state law enforcement field," IACP spokesman said.

Short Snorts . . .

Cigarette tax total for May was nearly \$3 million over the \$7.6

million take a year ago, and \$1 million over April of 1966. Liquor and wine tax income is down from 1965.

Texas State Teachers Association endorsed a new statewide water plan on grounds that it will promote greater industrial development and help provide local school districts more tax funds for education.

Constitution party's new candidate slate includes these nominees: James B. Holland for U. S. Senate and Jack Carswell, Houston, for governor. Conservative Party nominated Bard Logan of San Antonio for governor.

Two GOP county chairmen. Segal Wheatley of San Antonio and Douglas DeCluitt of Waco have been added to the Texas Election Law Study Committee.
