On The BEAM

By J. W. King, Sr.

The election is over now and we can all talk about something else for a change. The campaign has been long and hard fought. If you voted you exercised your right to vote for whom you pleased. The United States is one of the countries in the world where people have such a privilege.

This newspaper was late getting into the mail last week and we are sorry that some of our subscribers did not get their paper at the usual time. We were glad, however, to have extra business enough to cause us to be late. Some of the advertisements came in late and we just couldn't get the paper together soon enough to get it out on time. The mail service out of Lorraine is not as good as it should be. We have been complaining to the T and P for years about it but our complaints seem to do no good. We mailed the paper, those that go to Roscoe, Colorado City and elsewhere, Friday morning and subscribers in those places should have gotten their paper Saturday morning but they didn't.

QUESTIONS AND ANSWERS

Q. I have a total disability income rider on my GI insurance policy which would pay me \$5. a month for every \$1000 of my coverage. I understand the amount which can be paid for total disability has now been increased. Please give me some details.

A. Recent legislation increased to \$10 a-month-per-\$1000 of insurance the amounts which may be paid disabled veterans whose policies carry a total disability income rider. The added cost for this added protection is small. Any VA office will tell you how much the additional premium would be in your case.

Q. I'm going to need an operation for a nonervice-connected condition and expect to be admitted to a VA hospital soon. Meanwhile, there must be X-ray and other examinations before my operation. Can they be taken care of before I go into the hospital, in order to shorten my hospital stay?

A. They can now, by a law which has just been passed. Non-service connected cases, formerly ineligible for this benefit, may now be given as clinical care after it is no longer necessary for them to occupy a hospital bed.

Q. I was in training in June, 1960, taking vocational rehabilitation for a World War Two service-connected disability, when the deadline for completing my training was extended, by law. I am very grateful for this, and wonder if the new law affects other World War Two veterans who may never have started training.

A. Yes. The new law also gave World War Two veterans, whose service-connected disability was so severe as to keep them from rehabilitation within the time period previously available to them, the right to enter on or complete training any time up to July 25, 1965.

Q. Are guide dogs provided without charge by VA for eligible blinded veterans?

A. Yes, they are. Blind veterans entitled to compensation for a service connected disability can

get a dog guide and all necessary training through VA. VA also pays any necessary medical expense connected with the dog's care.

PLANT DISEASE SHORT COURSE ANNOUNCED

College Station, Nov. A special exhibit of plant disease control equipment is scheduled as part of the Plant Disease Short Course to be held Nov. 21-22 in Texas A and M's Memorial Student Center. The Plant Disease Short Course was first held in 1959 with 133 in attendance. It is primarily designed for the needs of agricultural chemical company representatives. Groups such as pest control operators, nurserymen, lawn and shrub service personnel, county agents, regulatory personnel and others will be in attendance.

A special feature will include sessions on diseases of vegetables by leading authorities. Diseases of tomatoes, Irish potatoes, cantaloupe, watermelon, cabbage, sweetpotatoes, southern peas, onions, carrots, lettuce and others will be discussed.

Another feature will include a discussion of cotton diseases by Dr. L. S. Bird, one of the nation's top research workers on cotton diseases.

Other sessions will include plant parasitic nematodes, diseases of small grains and peanut diseases.
 The Department of Plant Physiology and Pathology, headed by Dr. David W. Rosenberg, coordinates the sponsorship of the Short Course. Local county agents or the Department of Plant Physiology and Pathology, Texas A and M College, College Station, Texas, can supply additional information regarding the school.

POST OFFICE HELPS COUNT LIVESTOCK
 Rural mail carriers from the Loraine post office will leave some livestock survey cards along their routes beginning November 16.

"Information reported on these cards is used to set the yearly inventory of livestock and poultry on Texas farms," Postmaster S. J. Coffee explained.

In distributing the cards, rural carriers pick boxes at random along their routes.

"This means that not every box will get a card," Jack said. "For this reason, it's important for everyone who gets a card to return it filled out so that USDA can get a true sample of the State's livestock holdings."

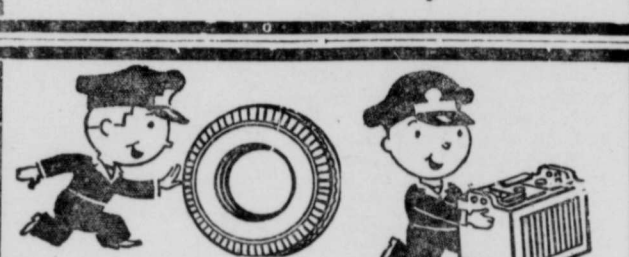

Carriers assisting with the survey are R. B. Cope, Route 1, C. H. Martin, Route 2.

Facts and figures secured in this survey are the basis for the Texas and National pig crop report and inventories of livestock and poultry on farms as of the first of the year. Stockmen and many others use this information in making business decisions.
 Survey results will be widely distributed through Texas Crop and Livestock Reporting Service releases, newspapers, farm magazines, radio and television.
 "This annual survey has been a joint undertaking of the Post Office and the Agriculture Departments since 1924," concludes Mr. Coffee.

We still have some of our plates with the school building pictures on them. If you like to purchase one, see any of the seniors.

You've never driven a heavy-weight that handled like this one!

HERE! EASIER GOING FOR THE DRIVER AND THE LOAD. LONGER LIFE FOR THE TRUCK!

'61 TORSION-SPRING CHEVROLETS

If you don't think scrapping the front axle has made a world of difference, you haven't driven a Chevy in a while. A few minutes behind the wheel and you can feel why drivers are happier and breakable loads are better protected. But the biggest advantage of all, you'll realize, is that the truck itself (sheet metal, tires, chassis components, everything) takes less abuse. With independent front suspension soaking up road shock and vibration, the truck lasts longer, goes extra thousands of miles before trade-in time. Add that to what everybody's always known about Chevy dependability and you find yourself looking at the soundest truck investment you could bet your business on.

and look! NEW REAR-ENGINE CORVAIR 95's

A panel and two pickups that put a thrifty air-cooled engine in the rear, the driver up front and as much as 1,900 pounds of load space in between! That's more capacity than a conventional half-tonner. Yet these Corvaire 95's are nearly two feet shorter from bumper to bumper. Highly maneuverable. Built to last and bound to save on a busy schedule!

CORVAIR—Side doors open a full 49" wide. Loading height is a low 14" high!
