## Miss Clydette Cox Chosen As Local FFA Sweetheart

Clydette Cox, high school junior, was elected sweetheart of the Burk Burnett Chapter of the Future Farmers of America at the chapter meeting, Monday night at the vocational agriculture building at the high school.

New officers for the chapter were elected at the same meeting, with Kenny Bob Roberts, president; Tony Landers, vice-president; Hubert Smith, secretary; Larry Sullivan, treasurer; Charles Klinkerman, reporter; and Steve Cozby, sentinel.

James D. Easter is vocational agriculture teacher and sponsor. Miss Cox has been a Bulldog majorette since her freshman year and is a member of the student council. She is the daughter of Mr. and Mrs. Clyde Cox, Burk-Charlie Road.

A scrap iron drive will be conducted by the FFA chapter as one of its major money raising projects. The boys have secured the use of a truck to haul the scrap and although they plan to contact as many persons as possible, they have asked that those having scrap to donate contact an FFA member or the school.

Money earned through the drive will help the group pay entrance fees to judging contests and defray part of the expenses of the annual Father-Son Banquet held each spring.

## Hardin HD Club Has Recent Meet In Lawrence Home

The Hardin Demonstration Club held its regular meeting Sept. 14, 1966, at the home of Mrs. Cordie Lawrence, 411 Holly, Burk Burnett. This meeting marked the beginning of our fall work following an absence of meetings during the summer months.

The meeting was called to order by our President, Mrs. E. W. Roderick, and the opening exercises were given by Mrs. Hewell. She read a poem which made us mindful of the beauties and blessings of this lovely autumn season.

Various committees gave reports. These included the presenting of our new officers for the coming year. They are Mrs. A. A. Jacobs, President, Mrs. W. E. Howard, Vice-President; Mrs. W. E. Howard, Vice-President; Mrs. Roy Mahaffey, Secretary; Mrs. Bill Dorland, Treasurer, and Mrs. James Roderick, Council Delegate.

We are to hold a rummage sale on Saturday, Oct. 1. This will be held downtown and will be a good place to get some bargains.

The club made plans to entertain the Enterprise Club of Vernon, Oct. 19 was selected, if this is acceptable to the other club. Mildred Dorland, Carol Roderick and Mildred Mahaffey are to decide on the entertainment for the social.

All club members were encouraged to invite new members into our club. Let's each invite someone to our next meeting, which will be Sept. 28, 1966, at the home of Mildred Mahaffey, 605 N. Ave. C. Mrs. Lawrence served refreshments to one guest, Mrs. Simmons, and the following members, Mildred Dorland, Alice Enderli, Johnnie Hageman, Sallie Hewell, Altha Hillis, Icie Howard, Lila Jacobs, Mildred Mahaffey, Carol Roderick, and Julia Roderick.

## KINGS SHOT DOWN BY PISTOLS, 38-7

With fourth down and inches to go for a touchdown, the Burk Burnett Kings failed to score the tying touchdown, then collapsed beneath a fourth quarter barrage and succumbed to the loaded Pasadena Pistols, 38-7, in a Texas Professional Football League game here Saturday.

The third quarter attempt completely wind-d the King offense, and Pasadena came on stronger, picking off stray King aerials and having a field day with the dejected hosts.

From a 13-7 lead when the final quarter started, the Pistols exploded for 25 points in the final 15 minutes. It was the worst defeat in the Kings' five year history, only their seventh since their inception, the third loss in three years. It knocked them out of a first place tie for the league lead, pending the outcome of the Tulsa Oilers-Midland-Odessa Comets game.

The Pistols fine quarterback, Charles Green engineered the downfall of the Kings. With the help of six intercepted King passes, Green and his smooth catching ends went to work to bomb the sub-par Kings.

Green passed to Ken Higgenbotham for 31 yards just as the last stanza started, spotted Pat Norwood for a 19 yard score, then hit Higgenbotham again for 47 yards. With all this he added three tallies of his own, all on a little fake rollout that left the Kings standing in their tracks. Green scored from the five in the first period, again in the second from the three, and added another in the fourth on an eight yard scamper.

Through the first half it appeared that the Kings would hold the lead. The Pistols scored first, but quarterback Eugene Guthrie hooked up for three straight passes, the last an eight yard scoring shot to Mike Davenport. Phil Fancher kicked the extra point for a 7-6 lead with only a minute left in the half. But Green wouldn't be denied and with only seconds to play drove his club 66 yards in six plays to score.

The Kings hooked up near the end of the third quarter and drove 50 yards after Tony Jackson had hauled in a stray Pasadena bomb at his own 49. Sonny Gossett ripped off a 33 yard run to set the Kings on the Pistol four. A penalty put the ball on the two, but with eight inches to go on fourth down, Guthrie called a quick pass to Gossett, but overthrew.

The Kings record now stands at 2-1 in the league wars. Saturday night at the new Bulldog Stadium, the Kings host the Tulsa Oilers in an important contest, hoping for an upset to get back in the driver's seat.

# Mathis Chevrolet Formal Opening Sept. 29 - Oct. 2

## FIRST 1966 BALE OF COTTON

First bale prize money was claimed this year by Wayne Horton who farms about 300 acres east of Wichita Falls. Horton brought the 2340-lb. load of cotton to Farmers Coop Gin, Thursday, September 22. Grown on about 1 1/2 acres of irrigated land, the cotton bale weighed 586 pounds. It was strict low middling grade, staple 15 1/8 length.

Shown in picture above: A. G. Earp, gin manager presenting two checks to Horton, one for \$25 from Farmers Cotton Co., the other from North Texas Compress and Warehouse for \$5. Joe Salter, (right), Burk Burnett Chamber of Commerce president hands Horton a \$25.00 check from the Chamber of Commerce. Farmers Coop Gin, ginned the cotton free of charge for Mr. Horton. Also shown in picture is Carey Elkins, ginner, on left and Paul Gossaway standing behind the newly baled cotton.

## Free Prizes To Be Awarded Each Day; 1967 Autos To Be Shown

Grand opening of the new Mathis Chevrolet building in Burk Burnett has been scheduled Sept. 29 through Oct. 2. Jack Mathis, agency owner and general manager, has announced.

A ribbon drive-through, utilizing one each of the new 1967 Chevrolets, Oldsmobiles and Pontiacs will be held at 10 a.m., Thursday, Sept. 29, officially launching the opening. The cars will be driven by Joe Salter, President of the Burk Burnett Chamber of Commerce; C. J. Lippard, Burk Burnett Mayor; and Jack Mathis, owner.

Showing of the new car models will be held in conjunction with the opening, it was explained.

Hours of the grand opening will be 8 a.m. to 9 p.m. daily. Ten hostesses, designated the "Mathis Misses," will be on duty each day to assist in serving refreshments and conduct-

ing of tours throughout the ultra-modern, contemporary-style building which was completed at a cost of more than a quarter of a million dollars.

Daily prizes will be awarded with drawings at 8 p.m. each day. They include a Barbecue Grill; Garcia Rod. Reel and Tackle Box; Samsonite card table and 4 chairs; and a Kodak Instamatic Camera with Electric Eye and Automatic Film Advance.

A color television set also will be awarded as a grand prize in a special drawing at 9 p.m. Sunday, Oct. 2, Mathis continued. Favors also will be distributed during the opening.

A special invitation has been extended to the general public from throughout the North Texas and Southern Oklahoma area to attend the grand opening and to view the new cars.

## Bulldogs Suffer First Loss, Drop 27-14 Contest To Eisenhower

By DEE UNDERWOOD

Grabbing an early first quarter lead, the Burk Burnett Bulldogs failed to hold on and tasted defeat, 27-14, at the hands of the Eisenhower Eagles in Lawton Friday night, before a crowd of better than 5,000 enthusiastic fans.

The Bulldogs threatened to make a rout of the game in the early stages, but prosperity must have been too much for them, as they saw the Eagles storm back to lead at the half. The Bulldogs kicked off to the Eagles, who put the ball in play on the twelve yard line. In two plays they had lost six yards. On their third play, the Eagles fumbled at the line of scrimmage and the Bulldogs recovered the football. Before anything could take place, a flag flew and the Bulldogs were assessed five yards because, under Oklahoma rules, a substitution failed to check in with the officials. The Bulldogs did not let that shake them, as they drove it in two plays. Rusty Todd carried for five, then Tony Hodges passed seven yards to Bill Roe for the touchdown. Dale Hoffman booted the extra point to make it 7-0.

It took just one more play to put the Bulldogs back in action, as the Eagles fumbled the kickoff on their one-yard line and the Bulldogs pounced on it. A flag went down and

the Bulldogs were given a fifteen yard penalty. Bill Roe picked up nine yards, caught a Hodges pass for five more. The Bulldogs drew another five yard penalty, but Tony Hodges picked that back up on a keeper. From the two yard line, Rusty Todd dove in for the touchdown. Hoffman kicked another point to make it 14-0.

The Bulldogs mounted another drive in that same quarter. However, a combination of penalties killed it.

The Eagles first tally was set up by a short Bulldog punt in the second quarter. The scoring play came on a 38 yard shot from Earnest Sheppard to Mike Frazer, a fine catching end. A pass attempt for the conversion failed and it was 14-6.

Shortly thereafter, the Eagles got another break, as an intended lateral from Hodges to Roe went astray and the Eagles recovered it on the 28 yard line of the Bulldogs. On the first play, Murray Rogers, the Eagle fullback, went around right end, evaded several tackles and raced all the way to the end zone. Sheppard passed to Mark Torbert for two points to tie the game.

Forcing the Bulldogs to give up the ball, the Eagles moved from their own 48 yard line to score. A pass from Sheppard to Fraser covered the final four yards. Murray Rogers kicked the extra point to make it 21-14, the score at halftime.

The Bulldog defense stifled the Eagles in the third quarter, holding them to no gain on the ground. The Bulldogs had a serious threat going in that same stanza, but a questionable pass play broke their back. On a second down play, Hodges hit Steve Cozby on the 50 yard line, the latter being driven back to the 43 by his tackler. For some reason, Cozby was not given his forward progress, so instead of having third and one, they had third and eight and failed to pick up the first down.

The defense continued to do a good job for the Bulldogs through the fourth quarter. Just before the end of the game, they had the Eagles in a fourth and 22 from the 27 yard line. But then Mike Fraser got in the open and took a pass from Sheppard on the two yard line for a first down. It took four plays and a half the distance penalty for the Eagles to get the ball by the stubborn Bulldog line. It was Mike McAdams who finally carried it over from

## Parade, Ball Game Crowning Feature Homecoming Day

Friday, September 30, will be Homecoming Day for the Burk Burnett High School, featured by a parade in the afternoon and a football game in the evening.

The Burk Burnett Bulldogs will meet the Iowa Park Hawks in a non-conference game scheduled to begin at 8 p.m. at Bulldog Stadium.

Homecoming Queen will be selected by the student body Friday from a slate of four Senior girls, but the Queen's identity will be kept secret until half-time when she will be crowned by John Strayhorn, Senior Class President. The candidates are Gail Crutchfield, Donna Greer, Katy Korpany and Jan Robertson.

"America the Beautiful" will be the theme of the Homecoming parade, which will convene at Hardin Park and proceed down Ave D to Main Street, beginning at 3 p.m.

"The Ole South" will be the theme of the Senior Class float; "Hawaii, Gem of the Pacific," theme of the Juniors; "Cypress Gardens," theme of the Sophomores; and "Six Flags Over Texas," theme of the Freshmen.

School clubs and other organizations connected with the student body will sponsor decorated cars in the parade, which is a project of the Student Council.

## Acknowledgement From Nursing Home

Harrelson Nursing Home gratefully acknowledges the following gifts to their patients:

Two vases cut flowers from Dr. and Mrs. Carl Morrison, 802 Sycamore Road.  
Fruit juice from Mrs. Willie E. Stegall, 201 Ave. C.  
Flower arrangement from the University Study Club, President, Mrs. Rigby, 107 S. Ave. D.

Mrs. LeRoy Mumford was admitted to Sheppard Air Force Base hospital on September 20

## Local Skaters Attend Institute

Forty-six roller skaters from throughout the United States attended the 18th annual American Skating Institute at Warnoco Roller Rink in Greeley, Colo.

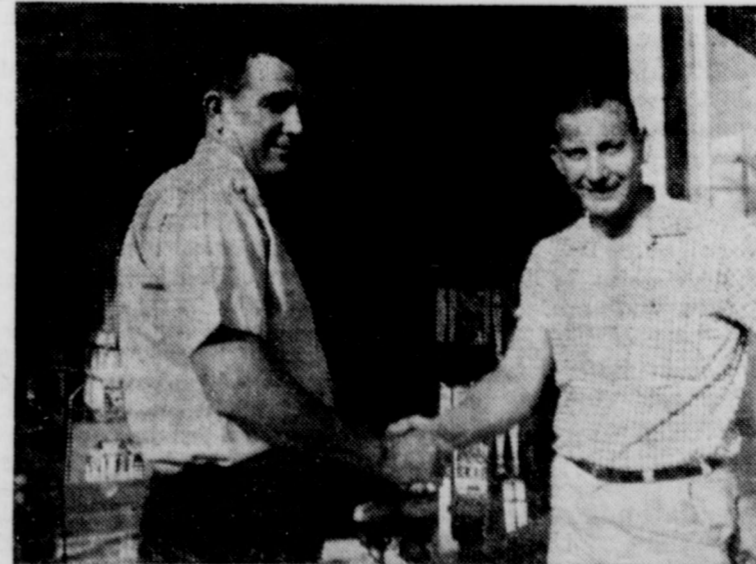

The institute got underway August 9. Instructors were J. W. Norcross, Jr., of Greeley, Elmer Ringisen of San Diego, Calif., and Norma Lee Johnston of St. Joseph, Mo. Norcross has recently been named "Pro Of The Year" by the Roller Skating Teachers Association.

Attending from Burk Burnett were Toni, Kathy and Jerri Savage. Classes they attended were on how to teach skating. The Savages visited relatives while Mr. Savage and his daughters took the course.

States represented besides Texas were North Dakota, Kansas, Iowa, Hawaii, Ohio, Indiana, Wyoming, Colorado, Washington, Idaho and Montana.

The first mill in the United States to use all Southern Yellow Pine pulpwood in the manufacture of newsprint was constructed at Lufkin in 1940.

## RAMADA INN CONTEST WINNER

Joe Ray McCluskey is congratulated by Gene Allen, manager of Cicero Smith Lumber Company, on being named winner last week of a Ramada Inn Weekend. His name was drawn from the box at Cicero Smith. The McCluskeys have three boys, Gordon Paul 12, Jay 10 and Mark 2 1/2 years of age.

### The Care And Feeding Of Progress

### Patents For Progress

The legislative proposal of Senator John McClellan (D-Ark.) to permit invention and patent rights to accrue to private government contractors primarily using their own background information or funds has considerable merit.

A tremendous capital investment is made to develop these "raw" inventions into usable products. In fact for each dollar invested in inventive activity, it takes \$100 to develop production facilities, inventory and distribution channels necessary to create a commercially acceptable product.

In speaking on American inventiveness, Shoichi Inoue, former director of the Japanese Patent Office said, "Even though abundant natural resources did contribute heavily to her prosperity, other factors which have been just as important should not be overlooked. Such factors include the point that the American people have always emphasized creativity and innovation and American financiers and business management have always been keenly interested in industrializing inventions to make the most of them."

The time spread between the basic knowledge and practical application depends on available private capital and market reception. The original discovery of phenomena applicable to photography took 102 years before photography was developed (1727-1829); 56 years (1820-76) between the fundamental research and blueprint and the actual telephone; 26 years (1876-1902) for radio; 14 years (1923-36) for televisions; 14 years (1926-40) for radar and five years (1948-53) for the transistor.

The granting of patents to private industry working on government contracts provides the economic incentive in the incessant search for technological progress.

A report in "Business Trends" shows that federal, state and local governments added nearly a half million workers to the payroll in 1965. These agencies now employ approximately 10.5 million people, a 65 per cent increase over 1955.

The Knoxville Journal reports that the Tennessee Valley Authority, which spent \$7 million overseas last year, already has spent \$10 million abroad in 1966 — another facet of our balance-of-payments problem.

MUNSING, MICH., NEWS: "Government handouts to a selfish, lazy public are making our governmental costs go up, up, and up, as much as anything and it is hard to see when and where it's going to stop."

"For some time now the food population problem has been discussed as though it were a problem of the future. It is not a problem of the future. It is here now . . ." says Secretary of Agriculture, Orville L. Freeman.

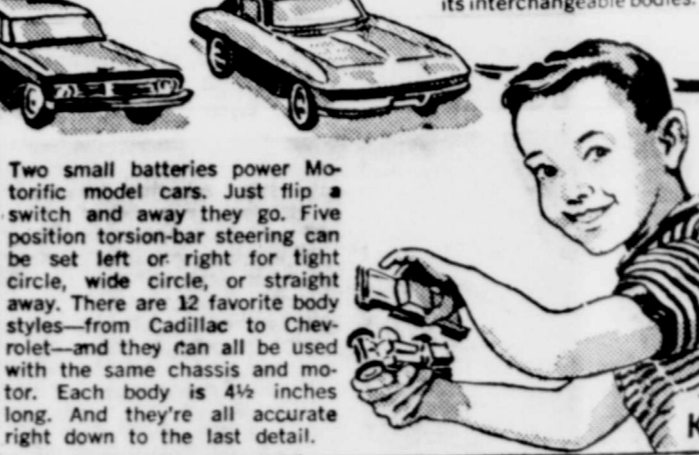

By July 1, 1966, U. S. motorists had paid an estimated \$100 billion in state and federal motor fuel taxes since the first levy was enacted in 1919.

## It all began with The Horseless Carriage

In 1893, the first successful gasoline-powered automobile was produced in the U.S. In those far-off days, Grand-Pop had to get out into the dust and crank his car to start it. Today, a driver can get his car started with a flick of his car key.

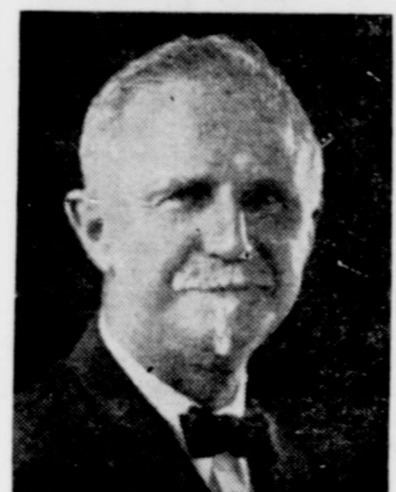

American men and boys have always been car enthusiasts. Even youngsters barely old enough to read get a kick out of recognizing the make and models of the cars they see on the roads. A toy that will satisfy the yearning of every "car hungry" boy is Ideal's Motorific scale-model chassis and motor with its interchangeable bodies.

Two small batteries power Motorific model cars. Just flip a switch and away they go. Five position torsion-bar steering can be set left or right for light circle, wide circle, or straight away. There are 12 favorite body styles—from Cadillac to Chevrolet—and they can all be used with the same chassis and motor. Each body is 4½ inches long. And they're all accurate right down to the last detail.

### Roger W. Babson Weekly Report

Babson Park, Mass., Sept. 22 —It is now official. President Johnson would like to see Congress take action to cool off our over-heated economy. He is worried about rising prices and believes that first steps should be taken before the elections to prevent runaway inflation. He also called on the money managers to ease the "inequitable burden" of high interest costs.

#### Steps Recommended

In his message to Congress, Mr. Johnson asked for only a limited amount of legislation now. However, there was an implication that if his first attack on inflation should not be effective, more recommendations for new laws would be made. This would presumably be done after the turn of the year.

But for now—before the current session heads for the hustings—he is asking for congressional action to suspend the 7% tax credit on business investment in new machinery and equipment from September 1, 1966 to January 1, 1968. Also, deferment for the same period is asked for the fast tax write-off on new buildings. All other anti-inflation action sought is in the form of requests: (1) To Congress to go slow on appropriations for non-defense; (2) to the Federal Reserve to ease interest rates; (3) to the government agencies not to add to the demand for money; (4) to business and labor to hold prices and costs down.

#### Boy on a Man's Job?

To us it looks very much as though suspension of the investment and construction tax relief—even if promptly made effective—would be too small an effort in the face of such a mighty inflationary wave. It would be like fighting a big forest fire with a bucket of water. The outpouring of credit which has been going on for years cannot be halted by an attack on one small front.

Furthermore, timing is most important. If the economy is overheated—and most economists agree that it is—any action taken to cut back the demand pressure on our productive machine should bring results fairly rapidly. The President himself pointed out that order backlogs for machines and equipment are months behind production right now. It is not likely that plans already in operation will be cut back very much by the suspension of tax relief. Perhaps the best that

can be expected is that projections now on the drawing board will be postponed. Thus, the desired impact on the economy may be a long way off . . . when it is needed here and now.

#### Asking and Receiving

And, as for the requests made of Congress, the money managers, businessmen, and labor leaders, it is highly doubtful that early decisive action can be expected. It is the same old story. Management may hold back on price hikes . . . but

not if unions keep punching wage costs even higher. Labor in turn points to historically high profits and says they want theirs too! Congressmen who are about to go before their voters are under pressure to "bring home the bacon." No, human nature is not going to change just because the Chief Executive says we must slay the inflation dragon!

As far as the Federal Reserve authorities are concerned, we must not forget that they are charged by law with keeping prices from running away. In addition, for months now, the whole brunt of the inflationary onslaught has been borne by the Reserve Board. They can hardly make money easier and less costly until they see higher-price pressures subsiding . . . especially since this is the first time the Administration has offered to help fight the battle. Hasty moves now toward money ease could really put the fat in the fire.

#### It's A Big Job

We are very much afraid that the enormous size of the job ahead of us — dampening the inflationary fires — is not fully understood. More than a "balance" of the national budget, more than a slowdown in business expansion, more than a tiny and selective tax rise, more than a mild restraint on soaring money and credit supplies . . . will be necessary before inflation can be licked. All of us will have to give up something to win the fight. Otherwise we will be burned by the inflationary fires as they lick ever closer to our own particular homes and interests.

A husband came home completely out of breath. His wife asked what was wrong, and he said: "Nothing, honey, I just ran all the way home behind the bus and saved 50 cents."

"Well, that certainly was foolish," she said. "Why didn't you run home behind a taxi and save three dollars?"

## EVENTS OF YESTERYEAR

From The Burkburnett Star 10 Years Ago

Miss Mary Frances Clark left last week for Marion, Ala., after several weeks visit here with her parents, Mr. and Mrs. O. L. Clark. Miss Clark teaches music in Judson College in Marion.

Mrs. O. J. Ensey is visiting in Plainview this week with her son and wife, Mr. and Mrs. Edward Bankhead and other relatives.

Mr. and Mrs. Ed Lewallen and Mr. and Mrs. A. W. Salter spent a few days last week in McLean, Texas visiting Mrs. Lewallen's mother, Mrs. Stocker.

Tex Willis and family of Washington, D.C., are visiting relatives and friends in Burkburnett this week.

Misses Ella and Annie Billingslea left Thursday, Sept. 21, to attend funeral services for their father.

Pvt. and Mrs. Walter Hewell of Baltimore, Md., are visiting their parents, Mr. and Mrs. E. F. Hewell and Mrs. John Shields. Pvt. is stationed at Halabird Depot with the Counterintelligence Corps.

Mr. and Mrs. E. M. Moore of Plainview, Tex., are in the home of Mr. and Mrs. C. A. Moreman.

Mr. and Mrs. S. L. Houston and Mr. and Mrs. Victor Spearman of Fort Worth visited their mother, Mrs. Cropper over the week.

# WASHINGTON AND "SMALL BUSINESS"

By C. WILSON HARDER

One of the illusions fostered by government is its generosity. It is common to hear that a president or congress has done something for the American people that if you don't believe it just listen to the news.

C. W. Harder

The American people would do better to thank themselves. It is their own enterprise and productivity that has made possible these "pre-aways."

The government shows concern and willingness to spend money on the people, not money they are spending money on the people, not money they are spending money on the people.

about 28 per cent of the gross national product. This GNP is the sum total value of all goods and services produced by the economy.

The Federal tax bite, about 19 per cent, is still the largest single levy, but state and local government taxes are garnering increasingly more of the money generated by the GNP.

The monumental costs of waging wars is well known. The burgeoning of bureaucracy is another expense; it is reported that during the past year, the Federal Government has increased the public payroll by 185,758 federal employees with salaries costing an additional \$1 billion annually.

In June, the President requested Congress to raise the legal debt limit to \$330 billion—an additional \$47 billion from the debt of 1965 when administrations changed.

The people pay \$966 million dollars a month in taxes just to cover the interest on the Federal debt already incurred.

No matter from what angle one views the spiral, it only points to inflation, with its never-ending skyward rocketing of wages and prices.

And no matter what the bureaucrats say, or what governmental programs are launched to give the illusion of stability and progress, the American public will continue to pick up the tab and pay its own way.

tabes you can serve to your family.

Besides produce, food shoppers have a wide variety of choices when shopping the frozen foods department for concentrated fruit drinks. Your choices range from lemonade to fruit drinks or punch to fruit juices.

If you select juices, you have only juice or juices and very fine pulp. There's no water added. The label will indicate if sugar has been added. Cocktails and nectars are usually mixtures of juices and pulps with water and in some instances sugar and seasonings.

Fruit drinks may be artificially flavored and contain none of the natural fruit. Others may contain some fruit juices. Fruit punch is a mixture of juices. The combination of juices is shown on the label with the one named first in the greatest amount.

Instant and powdered drinks and liquid concentrates contain fruit or imitation flavor, fruit acid, and added color. Some are packaged with sugar, and you add the water.

## Women IN THE KNOW

By Jean Kinkead, Women's Consultant, The Travelers Insurance Companies

### For Women Chauffeurs

Women in the know are well aware that chauffeuring youngsters can be wonderful fun or a real nightmare.

What makes the difference is MOM! Here are hints to help you handle this situation with tact, a real sense of responsibility, and just enough authority.

1. Be sure the car is in good condition, and that you are, too. In checking, pay special attention to tires, horn, lights, brakes, and windshield wipers. In appraising yourself, be honest. Are you very tired? Angry or upset? If so, your passengers are probably better off walking.
2. Stow all gear safely.
3. Put small necessities—tissues, sunglasses, chewing gum, toll-money—in your handiest pocket, so that you needn't take your eyes off the road or your hands off the wheel unnecessarily to hunt for them.
4. Seat your passengers so that your view through the rear window is clear.
5. Be sure all doors are locked.
6. Fasten your seat belt and see that your passengers do the same. In fact, Travelers believes so strongly in this that if you are injured in an accident covered by your Travelers Auto Insurance—and are wearing seat belts at the time—your medical payments limit will be doubled automatically and without increase in premium!
7. Attend to your driving. If your passengers' noise or activity strains you, ask for quiet cheerfully but firmly. For the occasionally wild bunch, pull over and STOP the car until they quiet down, don't be timid about insisting on reasonable behavior!

## Big Tex Is Ready For 1966 Texas State Fair Events

Big Tex, a colossal ringmaster in a 75-gallon hat and size 276 jeans will preside over a thousand-ring hippodrome of happiness Oct. 8-23 in Dallas.

The 1966 State Fair of Texas, a kaleidoscopic "happening" in full color and its theme Exposition of Young America.

Entertainment will feature the Broadway hit musical "Fiddler on the Roof" Oct. 7-23; Ice Capades International 1967 Oct. 11-16; the Girl Carousel Riders of Mexico galloping side-saddle through the Horse Shows Oct. 8-16; free Esplanade "Pops" Concerts by the 92-piece Dallas Symphony Orchestra Oct. 8, 9, 10, 12 and 14; and the Young American Singers' "Exposition of Happiness" in free performances Oct. 18-23.

Big free shows daily will include the three-ring colossal Free Circus, Mark Wilson's Magic Land of Allakazam, daredevil high acts in the Mobil Sky Rive, the Parade of Young America around the fairgrounds, and fashion shows, Texas Kitchen Window food demonstrations and Let's Face It! cosmetic and makeup clinics in the Women's Department.

The Pan-American Livestock Exposition featuring 26 breeds of purebred livestock will run Oct. 8-16 with the Junior Livestock Show Oct. 18-22.

Exhibits '66 will include an authentic Viet Nam Village, Chemstrand's "Wonderful Things" fashion extravaganza, a pop-art Agriculture Show, giant Chevy Truck Show, Firemen's Thrill Show and Safety Demonstrations, Emmett Kelly Jr. for Kodak Oct. 10-18, the 50th anniversary of the Automobile Show, The Action Spot stage and Wonderful World of Young America in the Varied Industries Building, Wax Museum, Age of Steam with complete 7-car passenger train and Santa Fe's Cyrus K. Holliday, Texas International Trade Fair and International Bazaar, Natural Gas Show and Electric

Show, Antique Auto Show and seven free Museums.

Cotton Bowl Football games will include Texas vs. Oklahoma Oct. 8; Dallas Cowboys vs. Philadelphia Eagles Oct. 9; SMU vs. Rice Oct. 15; Prairie View A&M vs. Wiley College Oct. 17; plus a number of junior and senior high school games.

There'll be a mile of marvels on the Million Dollar Skyway, from the brand new Skydiver to the antique Carousel, and six big free spectaculars with fireworks in the Cotton Bowl.

## '67 Inspection Period Underway For Texas Autos

AUSTIN — Colonel Homer Garrison Jr., director of the Texas Department of Public Safety announced today that the 1967 vehicle inspection period has begun.

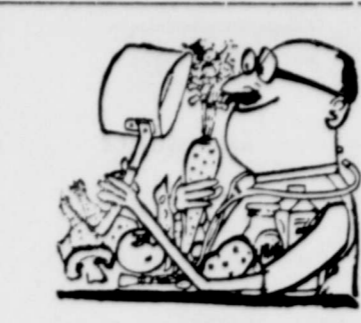

Garrison said that the new inspection period began on September 1 and will end on April 15, 1967 as prescribed by the Public Safety Commission. The inspection period is the same as in previous years.

"This means that between now and April 15, 1967, each of the five and one-half million Texas registered vehicles will have to secure the new green and white 1967 inspection sticker from one of the 5500 official inspection stations," he said.

Garrison pointed out that Texas inspection stations can be identified by the official vehicle inspection station sign displayed at each station.

Garrison suggested that if motorists have their vehicles inspected during the routine visits to garages for ordinary maintenance, the necessity of having to wait in line at a later date for an inspection will be eliminated.

In announcing the new inspection period, the Public Safety Director pointed out that vehicle defects contributing to traffic accidents in Texas during 1965 were the fewest yet experienced since the inspection program began in 1951.

## Doctor in the Kitchen

By W. W. Bauer, M.D.  
Consultant, National Dairy Council

### YOUR NEED FOR POTASSIUM

Among the important advances to modern knowledge of the human body and how it works is that of the part played by electricity. Everyone has had the experience, in cold, clear weather, of collecting static on his skin and getting a shock when touching a metal object connected with the ground. This is one of the superficial evidences of the electrical potential of the living body.

Diagnostic instruments like the electrocardiograph, which measures the electric output of heart muscle, have proved of great value in diagnosis of heart conditions and in monitoring the recovery process after heart attacks. The electric currents generated in the brain have been studied by similar techniques, and so have muscle and nerve functions.

**Electrical Transmission**  
All body chemistry takes place in solution. This includes the transmission of electric currents by means of chemicals dissolved in the body fluids. These are known as electrolytes; the best known is sodium chloride, common table salt. Closely related to sodium chloride is potassium chloride.

Too much potassium is detrimental to the heart; too little causes muscular weakness, pain and paralysis. However, the body normally takes care of the potassium balance automatically, as long as the individual is free

to choose his own diet and has the good judgement to vary it widely.

In heart and kidney disturbances, the potassium balance may be altered, but in heart conditions, at least, there is some question as to whether the change in potassium balance is a result or a cause.

Potassium is contained in fruits and vegetables in a highly soluble state, and may therefore easily be lost if cooking is done with too much water, or if the water in which the vegetables have been cooked is discarded instead of being used for gravies, sauces or soups.

**Food Sources**  
Potassium salts are widely distributed in common foodstuffs. Those in which the largest amount of potassium occurs include: almonds, apples, apricots, bananas, beans, bran, cabbage, cocoa, cowpeas, lamb's quarters, liver, lychee nuts, milk and milk products, molasses, peanut butter, peas, red peppers, potatoes, soybeans, sunflower seeds, instant tea, and yeast. These are of little more than academic interest to one who can and will choose a varied diet with plenty of fruits and vegetables. Dried fruits are high in potassium. So is baking powder. The latter point may need consideration if the doctor advises a low-potassium diet.

Fortunately, for the most part, potassium needs take care of themselves.

### No "Softy"

The term "softwood" lumber is misleading.

Actually, softwoods are so identified because of their needle-like leaves—not surface consistency. In like fashion, the term "hardwood" applies to trees with broader leaves.

While Southern Pine is classified as a softwood, it is actually harder than many of the hardwood species. This accounts for

its high resistance to wear—a quality especially desirable in areas subject to rough treatment such as family rooms.

Ask any one of a dozen experienced sportsmen who do much camping if he has a roll of friction tape with him and he will answer yes.

This little commodity is invaluable outdoors. It is ideal for starting campfires in wet weather, or for binding together brush and limbs when erecting quickie bad-weather shelters.

**EXTENSION FAMILY SERVICE**  
COMMUNITY CENTER  
HD

parents to the state meeting of the Texas Home Demonstration Association are in Corinth this week. Wichita delegates are Mrs. Jack Elbert Seal and Mrs. Elbert Seal and Mrs. E. Roderick. Mrs. E. Roderick and Mrs. J. A. are attending as guests of the county.

Third and final session in a series of meetings called "Be Dressed" will be Wednesday, September 28 in the Times Auditorium, from 10:00 to 11:00. The series was planned and arranged by the Wichita County Program Building Committee on Clothing. Mrs. Elbert is chairman of the committee.

Impressions children about foods are establishing the elementary years. Such impressions develop into strong likes and dislikes that may mean a will avoid the most nutritious.

Important for parents to encourage positive attitudes toward foods and good eating habits. Says Thelma Wirges, home demonstration agent.

Research shows that the many school children essential nutrients—vitamin C, ascorbic acid, and vitamin A. This deficiency can be more serious as the child grows older because he eats less of the food.

Prevent or avoid this nutritional deficiency, parents should provide adequate amounts of milk, citrus fruits, and green or deep yellow

or orange vegetables in each day's meal pattern.

Parents reinforce good eating habits by setting a good example. Miss Wirges notes. Children hardly see the importance of eating a good meal when adults don't. Since breakfast is the most important meal of the day, the family should eat one-fourth to one-third of the daily food needs at this time.

Children often develop positive attitudes toward the right foods when mealtime is a pleasant experience. Interesting, noncontroversial conversation keeps mealtime leisurely and pleasant. Having a set time for each meal is another factor that helps to create the proper attitude toward good nutrition.

"Fresh" is the key guide to use as you shop for produce. Quality is at the highest and prices are at the lowest during the peak season of production.

The secret of smart shopping is to buy vegetables that look fresh, and then take good care of them, says Thelma Wirges, county home demonstration agent.

The refrigerator is the best place to store fresh vegetables. The shorter the time between market basket and your refrigerator, the better quality vegetables you can serve to your family.

# SWINNEY FAMILY

SHEPPARD AIR FORCE BASE, TEXAS — Johnny Ray Swinney, 16-year-old medical marvel, center, poses with his family at Randolph Air Force Base, Texas where his father, M-Sgt. Raymond V. Swinney is stationed. Johnny's life and that of his mother, Ebilene, were

saved at Sheppard Air Force Base hospital where he was born 2 months prematurely in 1950, weighing only 2 1/2 pounds. Left to right are Sergeant and Mrs. Swinney, Johnny, Steven, 14, and Timothy, 7.

(Official U. S. Air Force Photo)

## Baby Born At Sheppard Weighing Two Pounds, Eight Ounces In 1950 Is Now A Healthy Weight Lifter

By A3C Mark Halthaus

SHEPPARD AFB, Tex. — From two pounds, eight ounces at birth to a 147 pound weight lifter is the dramatic story of Johnny Ray Swinney.

Sixteen years ago this month Sgt. and Mrs. Raymond V. Swinney, a young couple at Sheppard Air Force Base, Tex., were expecting their first child. Complications arose and had it not been for the willing help of Sheppard personnel and the people of the surrounding community Sgt. Swinney would have lost both his wife and child.

On the night of Aug. 15, 1950 Mrs. Swinney became ill. The next morning Sgt. Swinney summoned Dr. Phillip Carpenter of Burkburnett, Tex., where the Swinneys were residing. Dr. Carpenter treated Mrs. Swinney (her condition did not then appear critical) and left her in the care of a neighbor. Sgt. Swinney had left for Sheppard where he explained the situation to his commanding officer, Capt. M. E. Mickey of the 3754th Technical Training Squadron. Capt. Mickey promptly released the worried husband from duty for the day.

When Raymond returned to their Burkburnett home he found his wife, Ebilene in a coma. First-aid had been administered by a neighbor, Mrs. V. E. Parrack, when the young woman's condition became serious. Sgt. Swinney believes that Mrs. Parrack was responsible for saving his wife's life at that time.

Dr. Carpenter was called again and he made immediate arrangements to have Ebilene rushed to the Base Hospital at Sheppard.

At the hospital her condition was diagnosed as Toxemia (a form of blood poisoning). Glucose feeding, a blood transfusion and medical treatment improved her condition until Aug. 27 when she had a relapse.

A Caesarean operation and transfusions of Ebilene's fairly rare blood type were necessary to save the lives of the mother and the baby.

The operation was performed on Aug. 31 and the Swinney's new boy, Johnny Ray, was born two months prematurely. He weighed two pounds, eight ounces and was thirteen inches high. His chances for survival were very slim.

Today Johnny Ray is 16 years old and a weight lifter. The 5'9 1/2", 147 lb. high school sophomore can "press" 75 times his weight at birth.

MSgt. Swinney and Ebilene now reside on Randolph AFB, Texas with their boys, Steven, 14, Timothy, 7, and Johnny Ray.

Dr. Carpenter and Mrs. Parrack still live in Burkburnett and keep in touch with the family they helped so much. Mrs. Parrack currently works at a uniform concession on base.

Mrs. Mabry is still a nurse at Sheppard, as is Mrs. D. C. Oxley, Mrs. Swinney's former nurse.

Sgt. Swinney, who will complete 20 years of military service soon, is grateful to the doctors, nurses and hospital personnel who attended Mrs. Swinney, to the airmen who volunteered and donated blood for the transfusions and most of all to Dr. Carpenter, Mrs. Parrack and Mrs. Mabry who were instrumental in saving the lives of Ebilene and Johnny Ray.

From initial feeding from an eye-dropper the tiny boy worked up to an ounce feeding of milk at regular intervals. Under the care of Mrs. H. D. Mabry, the next-door neighbor of the Swinney's and ohhny's nurse at Sheppard, Johnny Ray steadily improved. He remained under Mrs. Mabry's care for about three months.

Refreshments were served by the hostess, Mrs. Mmes. Landrum, Glen Smith, Ver, Cliff Wampler, Ralph Wampler, Oran Wilson, Tom and Al Bellaicco attended the meeting.

## Improvised Reload

Reloading your 22 zine tube can be an arduous job. It needs you will use the hollow of an old round-belly swatter.

Pull off one end of the ter, fill with cartridges fore leaving home when the magazine tips in the field, hold the magazine and feed the cartridges.

## Family FINANCIAL PROTECTION

Policyholder Questions Answered by the Institute of Life Insurance, 277 Park Ave., N.Y., N.Y.

Q. Do life insurance policies differ widely among companies?

A. Actually, premium among life insurance companies do not vary a great deal. The biggest difference arises from fact that some policies are on a "participating" basis, others are "non-participating." Premiums for "non-participating" policies run somewhat lower for "participating" policies. This difference is generally by dividends paid on "participating" policies, which effect a refund of the unused of the premium. No dividends paid on "non-participating" policies.

## PREMIUMS VARY LITTLE

Beyond this, the premium of every life insurance company are affected by the mortality of its policyholders; earnings, investments; and the company's operating expenses. These vary among companies.

Premium rates are affected by seemingly minor differences in benefits provided under similar policies. For example, a policy that builds cash values at a faster rate have a slightly higher premium. But later on, the policyholder have more cash value to put himself with a retirement plan or for some other important purpose.

Q. I weigh 215 and I feel I am too much overweight. Can I get life insurance at standard rates?

A. Weight requirements are somewhat among life insurance companies, but as a general person can get a standard rate if he is no more than 20 per cent overweight. Since the standard for a man your height is 170 pounds, you are right at 20 per cent borderline. Most companies would not consider you a very significant factor in relation to your weight. You would consider such other factors as your blood pressure and medical history of your

## MERITORIOUS CIVILIAN SERVICE AWARDS

**SHEPPARD AIF FORCE BASE, TEXAS** — Ralph L. Feather, left and William S. Neale, civilian employees of Sheppard Technical Training Center, receive Air Force Awards for Meritorious Civilian Service in ceremonies held Friday at Center Headquarters. Brig. Gen. Edward H. Nigro, center commander, right, made the presentation of silver lapel pins, rosettes, and certificates signed by Lt. Gen. Sam Maddux Jr., commander of Air Training Command.

General Maddux approved the awards to Feather and Neale for distinguished and meritorious performance in their positions with the operations division of 3750th Technical School at Sheppard during a period critical to the nation's defense.

(Official U. S. Air Force Photo)

## Meritorious Civil Service Awards Presented To Two At Sheppard

SHEPPARD AFB — Awards for Meritorious Civilian Service were presented Friday, Sept. 23, to William S. Neale and Ralph L. Feather, Air Force civilian employees of Sheppard Technical Training Center, in ceremonies held by Brig. Gen. Edward H. Nigro, center commander of the base.

Both men have a total of 25 years civil service and have been in their present positions since 1960. Neale, senior ranking civilian on the base, has been at Sheppard since 1949 when he arrived with initial cadre to re-establish the technical training school.

He is also chairman of the board of U. S. Civil Service Examiners. His previous assignments have been at Kessler AFB, Miss., Amarillo AFB, Tex., and Chanute AFB, Ill. He resides at 1312 Buchanan in Wichita Falls.

Feather began his federal service as an instructor in aircraft maintenance training with the Army Air Corps at Chanute in Sept., 1941. He was at Sheppard in 1942, then Amarillo and Kessler AFB, Miss. Prior to returning to Sheppard in 1958, he held training staff positions at Francis E. Warren AFB, Wyo. for nine years. He lives at 3503 Kessler in Wichita Falls.

The citation read with the award to Feather states that his supervision over student programming helped to materially reduce the backlog of students awaiting entry into training, "thereby saving money and decreasing the time interval between initial enlistment and productive utilization."

Both men have a total of 25 years civil service and have been in their present positions since 1960. Neale, senior ranking civilian on the base, has been at Sheppard since 1949 when he arrived with initial cadre to re-establish the technical training school.

He is also chairman of the board of U. S. Civil Service Examiners. His previous assignments have been at Kessler AFB, Miss., Amarillo AFB, Tex., and Chanute AFB, Ill. He resides at 1312 Buchanan in Wichita Falls.

Feather began his federal service as an instructor in aircraft maintenance training with the Army Air Corps at Chanute in Sept., 1941. He was at Sheppard in 1942, then Amarillo and Kessler AFB, Miss. Prior to returning to Sheppard in 1958, he held training staff positions at Francis E. Warren AFB, Wyo. for nine years. He lives at 3503 Kessler in Wichita Falls.

### Lantern Protection

That fragile mantle in your gasoline lantern will last longer if you glue a base of sponge rubber on the lantern's bottom. Shock of setting the lantern on hard surfaces often is enough to start the mantle tearing. The sponge rubber also prevents the lantern from slipping into the water while night fishing.

### HOT WATER BLUES

The best advice to fishermen during mid-summer lulls is to "go deep." But how deep is deep? And why?

Since fish don't measure their living levels in terms of feet, why should fishermen, ask the fishing experts at Mercury outdoor? Instead, they suggest, gauge the proper depth by the factors that govern the fish.

The stratification of lakes mystifies most but the most learned. Reduced to the essentials, stratification merely means that large waters develop three different levels of oxygen and temperature.

The top area, called the epilimnion, is too hot for most game fish, though it is oxygen-rich.

The middle layer, tabbed the thermocline, is a mixture of temperatures fish can tolerate plus a favorable level of oxygen.

Below this line the hypolimnion, a cool region that is deficient in oxygen.

Obviously, then, the place to fish is the middle layer. But how does one find it?

The quickest way to pin point the thermocline is to use a fisherman's thermometer. Lower it away and methodically take readings at 5-foot intervals. When a sudden difference is noted, you've entered the favored region.

When the drop in temperature noticeably slows, you've left it. Perhaps this scientific approach to fishing seems too much trouble, you the Mercury folks, but it does constitute one positive method of fish finding.

Fish can find the best level, can you?

### Catching Crickets Made Easy

At a place where crickets are congregated, sprinkle the ground with water. Crickets don't like wet feet. They will climb anything to escape it. When this happens, you can easily pick them off walls, tree trunks, bushes, etc.

## Tax Man Sam Sez:

**REPORTING OF CASH TIPS**  
 The Medicare law changed the tax reporting requirements for employees who receive cash tips. If you make over \$20 per month in cash tips, you must report them to your employer for tax withholding purposes. The Internal Revenue Service has a pocket size booklet available for you to keep your records on. This booklet is Document 5635, "Employee's Daily Record of Tips and Reports of Tips to Employer."

**Family FINANCIAL PROTECTION**  
Policyholder Questions Answered by the Institute of Life Insurance 277 Park Ave., N.Y., N.Y., 10017

Q. You see these stories about movies and television studios carrying big life insurance policies on their stars. Don't these people make enough money to pay for their own insurance?  
A. Stars of motion pictures, television, radio and theatre do carry their own personal life insurance to protect their families. But their employers also frequently take out life insurance on them as a matter of good business. The employer himself is usually the beneficiary of such a policy. The insurance protects him against a possibly severe financial loss if a star should die before completing an important film, or during the run of a major television program or Broadway show. A movie, TV program or

stage play represents a huge investment of money, and its success may depend on an important actor or actress.  
Also, developing a star's talents and building his or her popularity may require a lot of time and money. For this reason, the loss of a star's future services can be costly — even if it should happen during a period when no show is actually in production.  
For similar reasons, many other types of business firms carry life insurance on their important executives. This is often called "key man" insurance. It protects a company from financial loss due to the untimely death of a key executive.

Q. I've just taken out a loan, and have credit life insurance along with it. How do they work out the premiums?  
A. Many credit life policies are issued on a group basis through banks or other credit institutions which have large numbers of borrowers. The premiums are at a flat rate of about 7 1/2 cents a month for each \$100 of a borrower's outstanding debt. This equals \$9 a year for each \$1,000 of life insurance — which is about the same rate a man would pay for term insurance policy at the age of 45.

## Beef Cattle Short Course For All Area Farmers

There will be a Beef Cattle Short Course held in the ASCS Community Room in Iowa Park on September 27, 28 and 29. The meetings will begin each night at 7:30 p.m. We are fortunate in getting a group of outstanding speakers for this program. Both men and women are invited. The program will be as follows:

September 28  
7:30-8:15 p.m. — 'Beef Cattle Outlook for 1967,' by John McHaney, Economic Department, A&M University.

8:15-9:00 p.m. — 'Diseases of Beef Cattle,' by Dr. C. M. Patterson, Veterinarian, A&M University.

9:00-9:15 p.m. — 'Cost of Maintaining Beef Cows in the Rolling Plains,' by Norman Brints, Farm Management Specialist, Vernon, Texas. Refreshments will be served.

September 29  
7:30-8:30 p.m. — 'Cow-Calf Program,' by L. A. Maddox, Animal Husbandman, A & M University.

8:30-8:45 p.m. — 'Problems of Moving Cattle Due to Brucellosis Program,' by Dr. Jim Barrington, Veterinarian, Wichita Falls.

8:45-9:00 p.m. — 'Trends in Marketing Cattle,' by Mr. Bill Frizzell, Farm and Ranch Department, First-Wichita National Bank, Wichita Falls.

Refreshments will be served. The beef cattle subcommittee has planned an excellent program and I hope you will be able to attend.

**Bulldogs Suffer First Loss, 27-14**  
(Continued From Page One)

two inches out. The kick failed and with short time remaining, the score was 27-14 in favor of the Eagles, the final score.

Larry Johnson, Dale Hoffman, Jim Caddell, Mark Schroder, and Rod Turner turned in top defensive performances. For the Eagle defense it was Dale Watts, Mark Torbert, and Gene Sohl. Next week the Bulldogs are at home against the double tough Iowa Park Hawks.
