

## Many Are Joining Red Cross During Wellington Drive

Local Workers Are Securing Hundreds of "Members" Over Country

## Preserves Health

Preservation Of Health Is Paramount Aim of Red Cross

Hundreds of people over Collingsworth County are willingly joining the American Red Cross during the local drive for membership which is now being staged in this county under the direction of Mrs. Davis Robinson who is chairman for the membership committee in this county. Working with Mrs. Robinson are Mrs. W. Y. Burden, Miss Effie Lee Richards, Mrs. C. E. High, Mrs. J. B. Deahl, and Miss Bess Royal. J. D. Wilson has been appointed chairman of the rural division while Miss Effie Childress is chairman of the junior Red Cross.

The local drive opened Armistice Day and will close Thanksgiving Day, in keeping with the dates announced for the national drive by President Herbert Hoover, who is also national chairman of the Red Cross.

A comprehensive, nation-wide program to prevent illness and to save lives through proper nursing care, advanced methods of life-saving, and first aid is fostered by the American Red Cross.

The organization is the largest employer of rural public health nurses in the United States, thru its chapters. The policy of the Red Cross is to encourage its chapters to extend its public health nursing service, where leadership in this field is not taken by some other agency in the community.

The Red Cross health and life-saving campaign embraces the following: preservation of health through skilled nursing care; prevention of loss of life in accidents; prevention of illness through cleanliness in the home and knowledge of methods of home care of the sick and raising the standard of health and physical efficiency through proper nutrition.

During the year just closed, more than 42,000 certificates have been issued in the Red Cross course in Home Hygiene and Care of the Sick, and since the courses were inaugurated, more than 500,000 persons have been taught; 149,000 children were instructed in proper eating through the Nutrition course; 46,898 individuals passed the severe Red Cross tests in Life Saving and 52,596 persons passed the rigid examinations in the First Aid course.

## Women Make Best Scholastic Record

NORMAN—The best grades ever made by women students during the first few weeks of any school year were reported for the 2,000 women enrolled in the University of Oklahoma during the first six weeks of this semester, according to Edna E. McDaniel, dean of women.

Miss McDaniel made a check of the grades made by each woman student in each course and found that only 360 co-eds made either failing or conditional grades in one or more subjects. Of these, 266 made a low grade in one subject, 70 in two classes, 19 in three subjects and only three in four courses.

"This unusually good showing of university women in scholarship is the result of a two-year campaign of the Women's Self-Government association to interest girls in studying," said Miss McDaniel. "It happened not by chance but as an effect of organized effort."

Women students who made one or more low grades will be assisted in bringing their standings up to average before the end of the semester through cooperation of presidents and hostesses of organized houses and sororities for girls.

## "It" Sometimes Makes A Difference

## School Play Is Presented Here Tuesday Night

Delightful Play Given For Funds for Publication of Yearbook

"Take My Advice" was the title of a splendidly enacted three-act comedy drama presented at the Wellington High School Tuesday night by members of the Senior Class for the benefit of the yearbook fund. The play was written by Eugene Hafer, author of innumerable amateur plays who has contributed many successful skits to the American stage.

The cast, composed entirely of members of the Senior class, included Raymond Ray who portrayed the part of Bob Mannion, editor of the "Eureka News;" Pete Boverie who acted the part of Jimmie Samson whose business was to "wake up the town and show them what it was all about;" Harold Watkins who appeared as Jud Fenton, a town character who possessed scruples against working; John H. Parker who was seen as John Wargrim, a "power" in the state who controlled and dominated his home town; Annalu Harper who played the part of Peggy Acton, a girl who had lived in the small town only a short while; Carrie Nola Campbell who capably managed the role of Virginia Mannion, Bob's snappy sister; Cora Cocke who, as Mrs. Nelson-Dodd was a would-be social lioness and president of the small town "up-lift" society; and Julia Slough completed the cast in the role of Marcia, John Wargrim's sister.

The play was thoroughly humorous from the rise of the curtain until the fall. Mrs. W. F. Decker who had charge of the staging and presentation, proved quite completely her ability in dramatic supervision, as this play was unanimously declared one of the very best home talent productions ever offered in Wellington—and scores of similar productions have been presented here in recent years.

Profits from "Take My Advice" will be used by the Senior Class in their fund for the publication of "The Flashlight," yearbook for Wellington High School which being edited and published by members of the Senior class.

## Cotton Expert

Clarence Ousley who is conducting a comprehensive study of the cotton industry in Texas, declares importations from Philippines may result in destruction of Texas cottonseed market.

## Clarence Ousley Makes Prediction

Texas Farmers Have Not Been Informed Concerning Foreign Conditions

Destruction of the market for Texas cottonseed may result within the next five years unless something is done to curtail free importation of Philippine Island vegetable oils, according to Clarence Ousley, former assistant secretary of the United States Bureau of Agriculture.

In a comprehensive study of the cotton industry of Texas and its potential competitive commodities, Mr. Ousley discovered what, in his opinion formed one of the greatest obstacles to economic independence of the Texas farmer.

"This," he said "lies in the fact that our farmers, working in a country where living costs are based on supply and demand, are trying to compete with Filipino laborers who get paid less than 20 cents a day, regardless of living costs."

Mr. Ousley pointed out that the Texas farmer has not been informed sufficiently about foreign conditions with which he must compete.

"Unless this is done you cannot

(Continued on page 8)

## Former Citizen Of County Dies In California Home

J. W. L. Cook Was Well Known to All Citizens of Collingsworth

## Was Field Editor

Had Served Formerly As Field Editor For Wellington Leader

J. W. L. Cook, one of the old-time pioneers of the Texas Panhandle and a former citizen of Collingsworth who was undoubtedly as well known to the people of this county as any other individual, died November 6 at the home of his daughter, Mrs. W. D. Crutchfield, in Sanger, California, where he was residing.

Mr. Cook has been in declining health for a period of more than a year and his death, therefore, was not entirely unexpected. During this time he had traveled over the western part of the United States for the benefit of his health. He went from Collingsworth County to Nebraska where he remained for a time and later continued his journey on to the Pacific Coast. Mr. Cook was 73 years of age, but despite his advanced years he was interested in the affairs of the present day and was open-minded to modern methods of farming, etc. He was interested in seeing "new places and new ways of doing things," as he often expressed it, and together with his wife had traveled through a great many states in the west. Mr. Cook derived great pleasure from this, and seemed to be best satisfied when he was on the go.

During a period of two years, while the Leader was being published as a semi-weekly, Mr. Cook served this newspaper as field editor, and in this manner he became acquainted with those few people he had not already known before he took up this work. He was known as the Leader's "rambling editor" and his column, called "Rambles Over the County," appeared as a regular feature in this newspaper and derived a great deal of satisfaction from this work.

J. W. L. Cook was born in Anderson, Grimes County, Texas, on July 17, 1856, while a young man he joined the Baptist church and had lived his life as a consistent church worker. He was the first deacon to ever serve the Baptist church at Tolbert, in Wilbarger county.

On November 15, 1877, Mr. Cook was married to Miss Margaret Williams at Anderson, eight children being born to the union, six of whom survive. E. W. Cook died at Wilcox, Arizona, in 1912 and J. E. Cook died in 1923 and was buried at Quail. Mr. Cook is survived by his wife and the following children: Chas. H. Cook of Sanger, California; Mrs. W. D. Crutchfield of Sanger, California; A. S. Cook of Tombstone, Arizona; Mrs. L. A. Moore of Wellington; and W. G. Cook of Poolville.

Mr. Cook was a member of the Woodman and Masonic lodges. He moved to this county in 1918 from Arizona, where he lived for ten years but prior to residing in Arizona, Mr. Cook had lived in Wilbarger County, Texas. He was a true West Texas pioneer, coming to this section at least 30 years ago.

Burial was made at Sanger, where his wife and the two children of Sanger were present, the distance of California preventing the attendance of other members of his family.

The Leader joins Mr. Cook's legion of friends and acquaintances in extending sincerest condolence to his family during their hour of bereavement.

Beef calves on the range that are weaned in late fall or winter should be fed liberally, as they make better use of the feed than when older. It is not usually advisable to feed yearling steers and heifers so liberally. Two-year-old steers must be wintered cheaply to insure profit in holding them until they are three years old. If steers come off the range in the fall fat enough, it may be more profitable to market them at that time.

## Dies Recently

J. W. L. Cook, former field editor of The Wellington Leader, who died recently in Sanger, California. Mr. Cook had been in declining health for the past year.

## Enterprise Has Splendid Spirit For Development

Is Ranching Community With Strong School And Church Spirit

Enterprise, a community of Collingsworth County, is located in the extreme northern part of the county and consequently is quite a distance from the county seat, but nevertheless this is one of the most progressive communities of the county. Few people have ever recorded the events of this place and therefore Enterprise has not received the publicity in its own country that it merits, but pictures of cattle from the famous old Bar-Lo Ranch, located at Enterprise, have appeared in several state papers and other activities of the Enterprise people are beginning to win recognition, despite the community's isolated position.

Enterprise school opened September 30, with a small enrollment which is attributed to the fact that this district is composed mostly of large cattle ranches and also to the fact that the McLean High School secured many of the older students every year. Miss Alva Beach and Miss Bernice Wood of Wellington constitute the faculty at the Enterprise school. They report an excellent record for the first six weeks of teaching. Pupils making a perfect record in attendance with no tardy marks are as follows: Ruth Hess, Paris Hess, Edna Mae Kunkle, LaVerne Kunkle, Laura Ellen Kunkle, Gladys Shirley, J. C. Breeding, Wilson Beck and June Kinard. Students making an average of 87 per cent or over are as follows: Ruth Hess, Gladys Shirley, Paris Hess, Edna Mae Kunkle, Ruby Hughes and Wilson Beck.

Enterprise has a strong Parent-Teacher Association which meets every third Friday in each month. The first meeting of the organization was held the third Friday evening in October. New officers were elected at that time and they are as follows: J. L. Hess, president; Mrs. W. W. Breeding, vice president; Miss Bernice Wood, secretary-treasurer; Mrs. Glen A. Nicholson, Mrs. Olva Beck and Miss Alva Beach, program committee. A short literary program followed by a social meeting consumed the time of the evening. This P. T. A. not only meets regularly, keeping proceedings of its meetings, but it supports every movement that is for the advancement of the school. It sponsors the hot lunch system which many schools twice the size of Enterprise cannot boast. It is also partially responsible for Enterprise being classed as a standardized rural school.

The spiritual program of Enterprise, like the educational and social activities, has no lack of supporters. October 13 was a big rally-day for the Union Sunday School, with dinner on the ground as one feature of the day. In the afternoon a rally day program was followed by a talk from Rev. P. W. Wilkins, Methodist minister of McLean.

## Skyrockets Win 12-7 Victory Over McLean Tigers

Wellington Takes Game From Tigers Friday Afternoon

## Is First In Weeks

Game Friday Is First Won In Several Weeks By Local Team

Wellington Skyrockets won their second victory for the 1929 season Friday when they defeated McLean on the home field. By a score of 12-7, local boys showed the result of Coach Jimmie Smith's ability to come out of the rut.

Friday's game is the first that the Skyrockets have won in several weeks, and was a surprise to local fans because of the absence of "Runt" Rowland, star back. With Rowland and Watkins out of the running, the Tigers expected a walk-over but Wellington's backfield, working behind a good interference showed remarkable ability at carrying the ball.

In the first quarter of the game, Wellington carried the ball from her 31 yard line across for the first touchdown. This was accomplished by plays through tackle by Johnson and King, and by Gilbreath circling right end for a 21 yard gain. Williams carried the ball 33 yards for touchdown on a cut-back play.

The second quarter saw both teams playing a defensive game. Latham showed extraordinary ability punting for McLean. A 70 yard punt carried the ball from under the shadow of the Tiger's goal. Half ended with ball on Wellington's 8 yard line.

Wellington advanced ball to within five yards of McLean goal but was held for downs in third quarter. Again, after receiving punt, Wellington marched steadily up the field but were held for downs on McLean's 21 yard line. Wellington had 8 first downs to her credit for this quarter.

After recovering a fumble on her 40 yard line, Wellington advanced up the field for another touchdown. The Tigers made their only touchdown in five plays after receiving kickoff. Three long passes by Kieck were responsible for 49 yards of this advance to the goal line. Wellington being offside gave the Tigers an extra point.

Wellington had 17 first downs to her credit at end of game to the Tigers' 8.

Friday's game play by play is as follows:

## First Quarter

McLean kicked to Wellington. Skyrockets' ball on her 31 yard line. King lost 3. Johnson

(Continued on page 8)

## Farmers Doing More Dairying

Reports of a strong tendency to ward dairy, poultry and livestock in twenty counties which have their urban centers in Dallas and Fort Worth were made by county agents attending the semi-annual conference of extension work of the Texas Agricultural and Mechanical College, College Station. Reports were made by the agents representing each of the following twenty counties: Dallas, Tarrant, Wise, Denton, Cook, Montague, Jack, Palo Pinto, Parker, Johnston, Somervall, Hill, Ellis, Navarro, Limestone, Freestone, Rockwall, Collin, Grayson and Hood.

In outlining their demonstration work the agents discussed their work in corn, cotton, grain, live stock and farm engineering and other objectives calculated to make the farm better and sounder. Their discussion of the service which they are rendering brought the agents to declare that the farmers are now anxiously seeking for demonstrations where 25 years ago and even more recently they would not countenance it.

In charge of the conference are G. W. Orms and Miss Jennie Camp. State home demonstration agents are also attending. All are of College Station.

## Grain Growers' Body Endorsed By Farm Board

Is Looked Upon As Model Set-Up For Other Grain Cooperatives

WASHINGTON.—The Federal Farm Board Sunday approved the North Pacific Grain Growers Association with the assertion that it was looked upon as a model set-up for other grain co-operatives that are to affiliate with the National Grain Corporation.

The new association was the outgrowth of a movement started several weeks ago among the grain producers of Washington, Oregon, Idaho and Western Montana. Representative of the Farm Board at the invitation of the growers, materially assisted in the organization.

The new co-operative will be a stock corporation organized under the laws of Delaware. It will have an authorized capital of \$1,000,000 shares to be sold only to local co-operatives' elevator, warehouse or other grain handling associations on the basis of the average volume of business handled annually. Farmers in localities not served by any affiliated co-operatives may subscribe directly for capital stock at the discretion of the board of directors. This directly subscribed stock will be transferred to local organizations when they are formed.

The North Pacific Association will subscribe to its pro rata share of the stock of the National Grain Corporation and take part in the management of that organization in proportion to the amount of its annual business. In localities where there are no co-operative associations an effort will be made to organize them.

As soon as practicable the regional association will obtain signatures to the standard marketing contract between the grower and the local association on a triple option basis. These options are: Sale upon the day's price prevailing at the time of delivery, deferred sale with storage privileges with a definite time limit and seasonal pooling basis.

## Texas University Cooperating With Journalism Survey

AUSTIN.—Cooperation is being given by the department of journalism of the University of Texas to the American Society of Newspaper Editors in its survey of journalism in the United States.

Paul J. Thompson, chairman of the University journalism department. The survey is being made by the Association, in collaboration with the American Society of Newspaper Editors, in order that the various institutions may be classified according to the number of courses offered, the number of degrees available and other related matters.

Reports of questionnaires that have been sent to the 300 or 400 journalism schools in this country will be discussed at the annual convention of the Association in Baton Rouge, La., during the Christmas holidays, Mr. Thompson said. The results are expected to be extremely enlightening, both to member schools and to the members of the American Society of Newspaper Editors as well as to prospective students of the various schools.

The University is one of the 21 schools and departments of journalism in the United States at present ranking high enough to be accorded membership in the American Association of schools and departments of journalism.

The growing of peanuts is advised by the U. S. Department of Agriculture for the South. Peanuts are in increasing demand for the making of many peanut products, and if there is not a good market for the crop, every part of it can be utilized in feeding. For use in rotation with cotton and other crops peanuts are one of the best money crops. Peanuts, after becoming fully mature, should be dug during bright weather and allowed to dry for a few hours before stacking. Many losses have resulted from the common practice of windrowing the peanut vines for curing, says the Department of Agriculture. The only way to cure peanuts successfully is to put them in small stacks around poles to which two cross-pieces have been nailed to keep the vines off the ground. After a curing period of at least eight weeks, the seed peanuts should be picked and stored in bags in a dry place.

## Famous Explorers Use Willys-Knight

and important of their African expedition and will keep them away from the United States for about two years.

The explorers will head for Central Africa where, on the Victoria Nile and in the Belgian Congo, are to be found in the last unexplored parts of what was once a little known part of the world. In the Victoria-Nile region, an extremely tropical section, there are probably more crocodile and hippo than in any other place in the world, Mr. Johnson said. There are also enormous herds of elephant to be found here and in this region are to be found specimens of the fast vanishing white rhinoceros, all of which Mr. Johnson will photograph.

Mr. and Mrs. Johnson will for the first time in history take sound pictures in the African jungle. In fact, the primary purpose of the trips is to reproduce in color and sound all of the life of the jungle, a record which will be invaluable to scientists.

Assembling and selecting the equipment for an expedition of this nature is a task of no small proportions and Mr. Johnson heaved a sigh of relief when a ship containing motor cars and trucks, provisions, cameras, chemicals, camp equipment, guns, ammunition and sundries left New York bound for Mombasa on the East Coast of Africa.

"We have been particularly careful in selecting the right motor cars and trucks for our expedition," Mr. Johnson pointed out. "They must stand a great strain and be not only powerful but very durable, as well. For this reason we have again selected Willys-Knight."

make good mechanics too. In fact, it is amazing how proficient these boys are along mechanical lines. They seem to have a marvelous mechanical instinct and they, in common with their fellow-countrymen, are always pleased when we let them help us with the Willys-Knight. We rely greatly upon our motor cars and because of them we are enabled to accomplish a great deal in a relatively short period of time."

All of Martin Johnson's expeditions have been interesting and all have been fruitful from a scientific point of view. Through his work science has learned much about the Dark Continent. Even so, the trip upon which he has just embarked is expected to be richer in scientific developments and results than any of the preceding trips.

David Burns of Edinburg celebrated his 102nd birthday by taking a 15-mile walk.

A former royal castle near Salzburg, Austria, will be converted into a meat packing establishment.

## 50 Commercial Failures During Month In State

Austin, Texas.—Commercial failures in Texas during October numbered 50 firms, having liabilities of \$630,000, according to Bervard Nichols, editor of the Texas Business Review, issued monthly by the Bureau of Business Research at the University of Texas.

"This compares with 29 failures with liabilities of \$128,000 in September and 39 insolvencies having liabilities of \$407,000 in October, 1928. Normally, a seasonal increase in the number of failures occurs from September to October but the gain this year of nearly 75 per cent is the largest on record," Mr. Nichols said.

The first steel and concrete Buddhist temple ever erected is being built in Tokio, Japan.

When Mrs. Victoria Langford of St. Paul committed suicide she was found with her hand resting on the Bible.

## Participate In 'Fireside Forum'

AUSTIN.—Participants in this year's "fireside forum" program conducted at the University of Texas by the University Young Men's Christian Association total more than 1,000 individuals, according to Dean V. I. Moore, chairman of the committee in charge of the program. Thirty-nine fraternity and boarding house groups are holding the fireside forums one each week, with some faculty members leading the discussions.

There is no drug or combination of drugs which can be converted into a competent treatment for pyorrhea, say medical authorities. The Food, Drug and Insecticide Administration is at present in the midst of a campaign to remove from the market tooth pastes, mouth washes, and similar preparations fraudulently labeled as a competent treatment for this serious ailment.

### What They Say About the Farmall

I Cultivate 140 acres with my Farmall at a total expense of \$101. In my opinion it does the work of six horses cheaper and twice as fast.—A. E. Watson. I used my Farmall to cultivate 160 acres at a total cost of \$180 for gas and oil, and there were no repairs. Including listir.g, stalk cutting and cultivation. I went over all my land eight times and thirty five acres was gone over nine times. I am more than satisfied with the performance of my Farmall.—Gilroy Rummel

## The FARMALL Proves its Economy in the hands of Collingsworth Farmers

The best test of any farm implement is to ask the men who have used it how they like it, and to find out from them what its performance is. Besides Mr. Rummel there are sixteen other satisfied owners of Farmalls in Collingsworth county, and we invite you to ask them about its economical performance.

From their own lips get the story of whether or not The Farmall is a satisfactory, all year, all crop, all purpose tractor. We are ready to stake our reputation on the Farmall as an ideal plowing tractor. It moves handily and rapidly over the fields, leaving well-turned furrows in excellent shape for the operation and crops to follow.

It is the same on belt work. All through the winter the Farmall

can be gainfully used about the farm. The built in fly-ball governor supplies a steady flow of profitable power. The power is tempered to the load for efficient machine operation, which reduces the wear and tear on the machine materially.

And in the spring the Farmall will be ready for planting and cultivating of row crops. It will do all farm power work that any other type of tractor of equal capacity can do in addition to all row crop planting and cultivating operations.

The Farmall is an all-purpose, all-crop, all-year tractor. On all crops, all jobs in the field or barnyard, it sets new

standard for easy handling and operating efficiency.

Come in today and let us explain terms on the Farmall tractor.

### Ask any of these Progressive Farmers about the Farmall

Raymond Scott—2 years.

W. O. Alford—1 year.

Number opposite each name indicates number of years Farmall has been used.

## THIS CHRISTMAS!

Give Mother What She Really Wants

THE entire family will benefit from this marvelous Christmas gift Mother receives this year.

—For, with the Hotpoint Electric Range she will eliminate hours of kitchen drudgery. She will have more time for rest and recreation — more time to spend with her family and friends. Don't let another year go by without presenting her with this "gift" of gifts.

—Mother will be so happy when she receives this wonderful Electric Maid. It is finished in white porcelain enamel and is equipped with Hotpoint Automatic Heat Control and Thermometer, the new Hi-Speed Calrod Unit, Thrift Cooker and patented smokeless broiler pan. It is the fastest, most economical electric range in the world . . . and as a gift, the most wonderful of all for Mother!

## WHEN GOD MADE TEXAS

By PHEBE K. WARNER

Today I am rambling over the Grand Old T. P. R. R. across the plains and through the vast spaces of West Texas. Often for miles and miles and miles there is not a living thing in sight outside the car window except the sage, the yucca, the cedars and other native plants. Then suddenly we see a herd of cattle, a flock of birds, a prairie dog darts out of its hole and barks his welcome through his town. And you know there's a tank of water somewhere round.

In the dim distance a conical shaft lifts its pinnacle toward the sky and you run into a typical oil town of the plains. Just outside the window parallel with the railroad a gray and tan band seem to have tied East and West Texas together and all along the way you are meeting summer tourists scampering across the continent before the Autumn rains or the Winter snows overtake them. But never before has West Texas seemed so gloriously beautiful as today. Evidences of recent rains and approaching rains are to be seen everywhere. The gray thirsty plains have been transformed into rich velvety greens by the rains and here and there and everywhere Autumn is placing her golden stamp over the plains and the mountains. And the whole picture is framed in the sun-lit mountains with great fleecy clouds playing hide and seek among the peaks. And you wonder where did all this vast expanse come from? What made it, and when and how? And what was it ever made for?

It seems that where the country is all plowed up and covered with millions of acres of cotton, corn, wheat, orchards and vineyards and homes and people that we seldom stop to ask ourselves what all that country was made for. We read the answer in its products. It's the great empty spaces that make us think. And we wonder what God's plan was when He made Texas. We forget that all Texas as was just a big empty space just a few short years ago. We forget that the whole world was empty just a few thousands of years ago.

We forget that away back in the very beginning of time and creation that God must have thought of us and planned then and there for our lives here in Texas today. And aren't you glad that He made Texas so big and far away from the rest of the world that there

was still room for us when we arrived. And aren't you thankful that He hid so much wealth away in her soil and so deep down below the soil that no one could find it until this generation came along. What if somebody, white folks for instance had discovered everything in Texas a thousand years ago. Where would we be and what would we have today? No telling? But here we are five millions of us and about the luckiest people on earth, with a million years of development ahead of us for our children and all the generations to follow instead of all our history and development in the past.

All of which makes me believe there is a divine plan hidden away in every acre and every mountain peak of this great Western world here in Texas. Some day, it may be thousands of years, every particle of this great empty region will be in use.

There is evidence of it now. When we need new building materials to house our people, when there are 50,000,000 people in Texas and all our native timber has been destroyed, these giant rocks will crumble and fall thru scientific power and be transformed into millions of homes. And every little town you see nestled among these mountains has already become a bower of beauty by the touch of human hands applied to this rich soil. The flowers bloom here just the same as anywhere else when the natural elements are brought together by men and women.

You and I and even the children of today may never see this country blossom as the rose or with roses and other lovely plant. But somebody will when the world needs it. It is all stored up here just waiting. Just the same as the wealth of East Texas and South Texas and North Texas was all stored away until a few years ago.

Included in the Loraine Diversified Farming Exhibit and Poultry Show were a flower how, farm and merchant exhibits, and a poultry and rabbit show. One of the features of the diversified farming exhibits was a hog guessing contest. The hogs were six months and two days old on the first day of the exhibit, and they were fed a balanced ration of ground threshed maize and a protein supplement in a self feeder. Much interest was created in this contest and a prize was given to the first person guessing the correct weight of the hogs on the second afternoon of the exhibit.

Bombs for sky-writing which form letters as they explode are the invention of an Englishman.

## Color Comes to Our Farm Homes

Significant changes have been wrought in the lives of those residing in rural communities during the last decade. Some of the things which the Oklahoma Farmer-Stockman points out that have brought the desirable conditions of urban life to the farmer are, radios, automobiles, good roads, better school systems, magazines, newspapers, telephones, and club organizations.

Among other things farm people are giving as much attention to the "beauty treatment" of their farm houses and buildings as to the protection of these buildings, farmers have learned from experience that when they paint their buildings for protection they might as well choose attractive colors.

Fences alone do not make the farm a "unit." The buildings must "match" the house they serve before they may proclaim a definite identity with it. Barns need not be painted red to be good

barns; they will serve their purpose quite as well if they are painted to harmonize with the house in which the farmer lives, and this is true of the other farm buildings on the place.

White is a popular choice of country houses and all shades of gray colors may now be used for relieving the austerity of a white house. Cherry red, jade green, terra cotta, orange and even black are frequently used on the "trim." One distinctive farm boasts buildings freshly painted with white and all of the windows and doors are outlined with red and black, while the wide colonial door and window shutters are the gayest Chinese red.

Farm life should be made as cheerful and happy as possible. All the beauty of nature can be an inspiration to make the necessary farm buildings as attractive as possible and not mar an inch of landscape which the city fellow has come to appreciate through his lack.

Brazil is said to contain more potential hydro-electric power than any other country in the world.

## Chevrolet Again Breaks Records

DETROIT—All October production records in the history of the Chevrolet Motor Company were broken last month with an output of 85,915 cars and trucks, it was announced at the central offices today.

Compared with the output of 65,052 units for October of last year, the 1929 October manufacturing volume shows a gain of more than 20,000 units. It indicates an increase of more than 900 cars and trucks a day over the showing for the corresponding month of a year ago.

Chevrolet's record October performance brings output up to 1,275,778 units as of November first. This is more cars than Chevrolet has ever built in an entire year and is nearly five times the number of any other six cylinder car built in an entire year.

Due to the continued high demand, Chevrolet plants are working

ing on the biggest November schedule on record. An indication of the volume of business that Chevrolet is doing nationally is seen in the report for the last ten days of October which shows a gain of 49 per cent over the corresponding period of last year. The figures for the period are 36,640 for the last ten days of this October as compared with 24,539 for the corresponding period of 1928.

Tribute to its leadership as an automobile producer is again paid the Chevrolet Motor Company in the announcement by the National Automobile Chamber of Commerce that Chevrolet has again been awarded first place at the 1930 national automobile shows.

The award is given annually to the member doing the largest annual volume of business, and is one of the most coveted honors that the automobile industry can bestow on an individual automobile manufacturer.

William J. Curtis, an ex-convict given work by J. R. Glennen of St. Louis repaid his employers kindness by robbing him.

## Marked Poultry Feared by Thief

The biggest thievery problem in Oklahoma and Texas today is the thievery of poultry. Farmers make it just as easy as possible for the thieves by refusing or neglecting to mark their poultry. Very few instances of theft of marked birds are reported.

According to the November 15 Oklahoma Farmer-Stockman, its records show that not one farmer in 200 can identify either his chickens or turkeys. Thieves know this to be true. Officers know it. There is probably not an officer in the southwest who has not faced the necessity of having to release chicken thieves because an owner could not positively identify his own property.

One big advantage to the farmer in marking poultry is that if they are located, the owner can immediately repossess them. A peace officer may take possession of property alleged to be stolen.

# Announcing

## a revolutionizing Motor Oil, a new principle and a Challenge

### the Challenge

Several years ago, the exclusive North American patent rights on the Germ Process were acquired by this Company. It was evolved and patented by two British scientists after exhaustive chemical and physical laboratory tests.

Germ Process oils were revolutionary in that they met every requirement, through special characteristics, for each type of internal combustion motor. These scientists, by the Germ Process, eradicated the prevalent weaknesses existent in motor oils, regardless of their base.

This Company has made innumerable laboratory and road tests, under every conceivable condition, over the past seven years, and we are now prepared to state definitely that your motor oil problem is solved by the Germ-Processed Motor Oils.

By comparison, our tests prove that the "Germ Essence" creates the only safe motor oil under all conditions and at all times operates at the highest obtainable efficiency.

We are now prepared to meet any challenge of competitors. I confidently believe that Conoco Germ-Processed Paraffin Base Motor Oils are superior to any other motor oils made from any crude by any process.

More than twenty thousand outlets are now prepared to offer to the public such a motor oil for the discriminating buyer, and for a technical problem which has always been recognized but not solved until now.

*W. J. Moran*

President,  
CONTINENTAL OIL COMPANY

### Here are our Claims for Conoco Germ-Processed Motor Oil—

Check against the oil you are now using

**1** Under the Germ patents . . . exclusive to CONOCO for North America . . . there is imparted to CONOCO Germ-Processed Motor Oil an "oiliness" which is responsible for its greater lubricating value, greater film strength, greater penetrativeness, greater adhesiveness, greater tenacity, greater permanence, greater stability, greater stamina and a more nearly perfect compression seal than any other oil on the American market. Because of this affinity for metal—this actually combining with the metal itself, CONOCO Germ-Processed Motor Oil never leaves the bearings. Where other oils drain out and leave the surface dry, Germ-Processed oil penetrates the metal surfaces, forming a film that adheres for months. This "carry-over" film—this always present film gives ample lubrication to all parts needing it when a cold motor is started, until such time as oil from the crank case can reach them.

**2** This remarkable and exclusive feature of CONOCO Germ-Processed Motor Oil is reinforced by the fact that these oils are refined from only carefully selected paraffin base crudes by the most modern and scientific methods known to the petroleum technologist. Patented processes are used to remove all objectionable elements, leaving a perfectly balanced, stable product that is 100% lubricating oil. Thousands of tests demonstrate its remarkable resistance to corrosion.

The majority of motor oils never receive this degree of refining. None ever exceed it.

**3** Increased gasoline mileage and improved motor performance are realized through the use of this new oil. The exclusive CONOCO Germ Process so adds to the "oiliness" of this lubricant that metal-against-metal friction is eliminated, even in motor starting after all oil ordinarily would have drained from the motor into the crankcase. The perfect sealing qualities of the CONOCO fracture-proof

film insures a high compression efficiency, that results in greatly increased motor performance. Marked improvements in power, speed, acceleration and flexibility are noticeable.

**4** Due to the Germ Process and the select, premium, paraffin base crude stocks used, CONOCO Germ-Processed Motor Oil positively does not break down under the most intense cylinder wall heat. A climb, high speed, heavy load, temperature extremes—none of these strains cause this oil to heat sufficiently to actually burn, break down or evaporate to any appreciable degree. By comparison with many oils on the market, you may confidently expect a saving in oil consumption up to 50%.

**5** Automotive engineers agree that 40% to 60% of all motor wear occurs during the starting period. This destructive wear is definitely reduced by the use of CONOCO Germ-Processed Motor Oil. Ordinary oil, thinned by heat and dilution, drains down past the piston rings when the motor is stopped, leaving little or no protective film. On starting the motor, a considerable time is required for the oil to reach all bearings and working surfaces. Under adverse conditions, such as winter temperatures, this time may be from 15 to 20 minutes or even longer.

Since CONOCO Germ-Processed Motor Oil never leaves the bearings and working surfaces, it is always there under any and all conditions to provide needed lubrication until the normal supply of oil arrives.

**6** Unlike other oils, dilution does not impair the "oiliness" value of CONOCO Germ-Processed Motor Oil.

**7** CONOCO Germ-Processed Motor Oil retains its fluidity at sub-zero temperatures. No practical operating conditions in winter will affect its immediate lubricating value at the first touch of the electric starter.

We invite you to enjoy the many additional miles of pleasure your motor car owes you by using this amazing new motor oil regularly. You will find it today at all stations displaying the CONOCO Red Triangle.

## Club Girl Writes Concerning Trip To Dallas Fair

Entire Trip Thoroughly Enjoyed by Collingsworth Club Girls

By Hazel McClure

The 4-H club girls who represented Collingsworth county at the annual state encampment are unanimous in declaring it to be the most successful yet held. The girls who went from this county were Trula Morrow, Florence Pepper, Nola Capps, Inez Atkins and Hazel McClure.

The girls left Childress on the morning train, going east. Before we reached Dallas we knew all of the agents and most of the girls who were on the train. Miss Myrtle Murray met us at the train and directed us to the fair park.

I cannot describe our amazement when we entered the fair park; neither can I describe what caused our surprise. The extra lighting was glorious. It made you feel as though you were in fairyland. This lighting alone cost \$25,000. This was in memory of the famous inventor, Edison.

When we reached camp we were assigned to our rooms. Each one made herself comfortable as soon as she could so she might have the privilege of reading the prize list. I happened to win third place on having the best complete garden exhibit in the state. Inez Atkins won third place on her dress, so Collingsworth again carried off prizes from the state fair.

After eating supper, all of the girls met in the living room for a pep meeting. They also held the tryouts for hostess, yell and song leader. The next morning at the pep meeting, Miss Murry announced that I had been selected out of 31 girls for hostess. This is the first time in history that a girl from this entire district has ever been selected as hostess for the encampment. After this we visited the fish hatchery and agriculture building. Tuesday afternoon we went to see the Hagenbeck-Wallace circus, one of the largest in the world. We enjoyed this and are proud that the state fair association has them engaged for another year.

Tuesday evening we went to see the "Red Robe." The fair association paid for our tickets. The girls as a whole enjoyed this opera better than the other entertainments.

Wednesday morning we made a tour of Dallas and went to the top of the Magnolia building which

## He Shrinks

His height has shrunk nine inches in the past eight years. Joseph E. Mayott, above, Spanish-American War veteran at the National Soldiers' home at Sawtelle, California, is suffering from a rare malady known as Paget's disease, which causes shrinkage of the bones. The malady is not necessarily fatal.

is 29 stories high, and it was quite a treat to look out over the big city of Dallas. That afternoon we went through Merchant's Hall and through the art building.

Wednesday evening we went to the new arena and saw the horse style show. Prize winning horses from all over the United States were there. Here again the fair association paid our ways.

Thursday morning we made a tour of the fair park and that afternoon we were permitted to go to the carnival grounds. All of the girls had been looking forward

## New Building Is Opened At Olds Factory

Sole Purpose To Provide Parts and Maintenance Service of Oldsmobile

A huge new building containing 169,300 square feet of floor area has just been opened at the Oldsmobile-Viking factories for the sole purpose of providing parts and maintenance service to the hundreds of thousands of Oldsmobiles and Vikings throughout the world. It is considered the most modern parts and service building, both in design and equipment, to be found in the country.

The purposes of this department is to supply replacement parts for

to this.

On Thursday evening the girls began leaving for their homes. This was a sad hour for all but now we are thankful we are back at home.

We five girls want to thank those who made it possible for us to attend, and we are going to try to do our best to make you feel glad that you sent us to Dallas: Hobbs Brothers, Farmers Gin Company, Planters Gin, Lurie Gin, and the Farmers Cooperative Gin.

any model Oldsmobile—or the Viking, built since this veteran company started operations in August 1897, more than 32 years ago; to work out improved methods of performing service maintenance operations, and to train field men in the most efficient and economical service methods.

To accomplish these results, this new parts and service building houses a large machine shop, a box factory, pyroxylin painting booths, thousands of steel bins, a technical investigation laboratory and a service promotion school, in addition to receiving and shipping rooms and similar business departments.

"Orders received by this department disclose the surprisingly long time some owners keep their cars," says T. H. Stambaugh, general service manager of the Oldsmobile-Viking factories. "It is not unusual to receive requests for replacement parts for cars 10, 15 and even 20 years old or more. In fact there is an occasional order for a part for the curved dash, one cylinder Oldsmobiles manufactured between 1898 and 1904."

Parts for these ancient models are not kept in stock. But if an order is received a blue print of that part is given the mechanics and the part required is manufactured in the past model machine shop. This shop is equipped with 125 large machines, including lathes, grinders, arborers, boring machines—in fact every type required in manufacture of automobile parts.

Orders received for recent models are dispatched through pneumatic tubes to the proper department where the order is filled and the package slid onto a moving conveyor which carries it to the shipping room. The entire procedure is accomplished in minimum of time so that Oldsmobile and Viking dealers part stocks are adequate at all times to properly care for owners and their requirements.

Pyroxylin spray booths have been installed to permit faster service on colored sheet metal parts. If the owner of an Oldsmobile which has been finished in a special color desires a new fender, the order is sent to that department. A new fender is painted the required color and is on its way to the owner in 24 hours time.

All parts carried in stock are kept in steel bins, of which there are 9,000 in the small parts department alone. The extent of this stock carried can be gleaned from the fact that there are 600,000 pounds of steel bins used in equipping the building. This parts stock forms a reservoir from which the thousands of Oldsmobile and Viking dealers draw supplies so as to keep a complete stock on hand in their individual parts departments.

In addition a corps of experts are now engaged in the technical investigation laboratory testing new tools and methods which will improve Oldsmobile and Viking maintenance operations. Other skilled men are employed teaching these improvements to field men and dealer service managers.

## Texas Bureau To Handle Loans On Cotton, Reported

Legge Informs Moody Farm Board Ready to Send Money

WASHINGTON.—The Federal Farm Board will make its loans on Texas cotton through the Texas Farm Bureau Cotton Association of Dallas, it was shown in an exchange of telegrams between Alexander Legge, chairman of the Federal Farm Board, and Gov. Dan Moody of Texas, made public here Friday.

Governor Moody telegraphed the farm board under date of Nov. 7 that Texas farmers had held their cotton following the board's recent announcement that it was ready to loan up to 16c a pound on cotton, and that the price of cotton meanwhile had gone down and suggesting that the situation would be improved if the board announced availability of loans before further losses are sustained. Governor Moody's telegram to the Farm Board follows:

"Your statement of some weeks ago to the effect that you would make loans to the extent of 16.35c per pound on cotton prompted many of our farmers to hold their cotton in the belief that a loan would be available to them. Your statement was followed by one from the Farm Bureau to the effect that the Farm Board would use that agency for making the loans.

"The farmers were later advised that the necessary machinery had not been set up for making the loans. In the meantime cotton has declined about 1.5c per pound, resulting in loss of about \$5 to \$7.50 per bale to such farmers as held their cotton under the belief that 16.35 loan per pound was or would soon be available. This has caused considerable dissatisfaction. Permit the suggestion that this situation has considerably disheartened many and that the confidence of the cotton farmers will be considerably stimulated if you make your announced loans available before further losses are sustained. If you can not promptly set up the machinery to make the announced loans, then a request from you that the banking interests of the State carry loans on this basis and that such loans will be taken up by the Farm Board would give the board

## Here Is "Four-Speed, Jr."

"i-Speed, Jr." is the name given this bright looking little three-pound dog when he joined the crew of the 16,000 mile Durant air tour as their mascot. With his sleek, black coat and his red sweater and hat to match the red and black of the Curtis Robin plane he attracts much attention at each airport visited. That air travel agrees with "i-Speed Jr.," the crew are firmly convinced, judging by the ravenous appetite he displays whenever milk and food are offered and frequently when they are not available.

great prestige with the agricultural people and be a tremendous stimulant to the confidence of the cotton farmers in the ultimate success of the board in the administration of the farm relief act."

To Governor Moody's telegram, Chairman Legge replied as follows Friday: "Reference your wire Nov. 7, the Federal Farm Board advises you that the Texas Farm Bureau Cotton Association meets the requirements of State and Federal co-operative statutes and is a qualified borrower under agricultural marketing act. Association advised board yesterday that formal application for advances in accordance with board's cotton loan program had been executed and mailed to board. Immediately upon receipt of application board will act without delay, and on approval funds will be disbursed at once. Board has acted promptly on every cotton loan application, in many cases transmitting funds by wire within a few hours after application was received. Board regrets that Texas Farm Bureau Cotton Association is not used more extensively by cotton growers, but is hopeful that growers will patronize co-operative associations more in future."

Coincident with Governor Moody's protest, the board announced approval of application for supplemental commodity loans for cotton totaling \$13,500,000 to enable co-operative associations to make

advances to the grower members, in accordance with the cotton loan policy announced by the board on Oct. 21. The board also increased from \$500,000 to \$2,500,000 the maximum of a commodity loan to the North Dakota-Montana Wheat Growers' Association at Grand Forks, N. D. supplementing loans from the Federal Intermediate Credit Bank at St. Paul.

The amounts of the three cotton commodity loans and the organizations to whom advanced follows: \$2,500,000 to the North Carolina Cotton Growers' Co-operative Association at Raleigh; \$5,000,000 to the Oklahoma Cotton Growers' Association at Oklahoma; \$6,000,000 to the Staple Cotton Co-operative Association at Greenwood, Miss.

The loan to the Mississippi Association is a revision of the supplemental commodity loan, so the association may make loans to its grower members on a new basis. Of the \$5,000,000 loan to the Oklahoma Cotton Growers' Association, the board last Thursday advanced \$493,000. The loans in all cases were made supplemental to funds obtained by the association from local banks.

What makes this longevity business so puzzling is the fact that a Missourian who has never smoked nor chewed nor drank lives until 80, and a Californian who has drank all his life is 103 years old.

## Automobile Has Vital Function

The necessary function the automobile plays in the transportation of the people of this country is evidenced by the continued growth of all-year driving in nearly every section, according to V. A. Watts. He says.

"This increase in year-around driving is apparent on every side. Today in the cities of the nation—north, south, east or west—there is a parking problem to be found during the entire twelve months of the year, whereas this situation used to be confined to the good weather periods only.

"In the suburban and rural sections evidences of the full year use that owners are obtaining from their automobiles is plentiful. No longer are those families isolated who live a distance from rail transportation. In rain, hail and snow their automobiles afford them quick, safe, comfortable and dependable transportation.

"Improved roads are, in part, responsible for some of this increased use in automobiles, but the practically universal use of cars throughout the year can be attributed to the more comfortable automobile interiors and dependable performance characteristics of the cars of today.

"An instance of the extensive thought and comfort devoted to automobile bodies and driver and rider comfort is to be found in the Viking, the eight cylinder companion car of the Oldsmobile Six. In this car the designers have succeeded in baffling climatic conditions, be they those of the cold northern states, the variable weather of the east and middle west, or the rainy season of the south.

"The practical insulation of the Viking front driving compartment contributes much to this weather-proof comfort. The inside of the partition between the compartment and engine is covered with a heavy

rubber and felt lining. The floor mat also is of rubber heavily interlined with felt. This mat fits snugly about the foot pedals to eliminate drafts coming through the floor board openings.

"This insulation of the front compartment is made possible by the excellent ventilating system of the Viking. This consists of the V-type windshield, which can be opened to throw an indirect current of air to the bottom of the compartment or more fully opened to provide a direct draft through the car. In addition there are ventilators at each side of the compartment to give added ventilation when it is required. These are quickly and easily operated by the foot.

"Another feature which provides comfort through its factor of safety is the automatic double windshield wiper. This keeps clean almost the entire windshield glass, regardless of weather, and gives both driver and passengers a full view of the road."

Dr. Rita Shelton, a young and attractive woman, is one of Cuba's leading authorities on tuberculosis.

Cheese eating in the United States is still in its infancy, according to a recent report. Americans eat only about four and one-third pounds per year, while Swiss eat 23 pounds, French 13 pounds, Germans 9 pounds and English 8 pounds. Cheese consumption in the states is growing however, having increased nearly one pound per capita in the last ten years.

A baby girl born in Eketahuna, New Zealand, weighed only two pounds, but lived.

Jimmy Ito, Japanese boy living in California reads both Japanese and English at the age of 4.

## Stomach Test Free

If poor digestion makes you suffer from gas, bloating, heartburn, acidity, or sick stomach, try the Diotex 15 Minute Test. Absolutely harmless. Works fast. # LIGHT TESTING

This is the only official Light Testing Station in Collingsworth County, we having been appointed by the Commissioners' Court to serve the people of Collingsworth in this capacity.

Avoid the last minute rush. Have your car lights tested here early, get your receipt from us, and save yourself needless effort and worry later on.

Just as this station was able to comply with the requirements of the County Commissioners, so are we able to meet the demands of every motorist who desires the best service possible.

### WINTER MOTOR NEEDS

Let us service your car for the winter with reliable anti-freeze, proper lubricants, etc. Remember, we operate a "One-Stop" Station whereby the motorist can get all his needs at one and the same time.

Jack Gibson  
Magnolia No. 2

## FACTS EVERYONE SHOULD KNOW

1. The Leader Printing Company employs only printers who have spent years in their line—who are craftsmen in the art of printing.
2. This shop is equipped with all that's required to produce better printing. Every machine, every type face, every press and every paper stock that is necessary to artistic printing is maintained here.
3. The Leader's prices are never higher than you'd pay for job printing of inferior quality, and our service enables you to get printing when you want it.

When you need job printing a telephone call will bring a Leader representative to you in a matter of minutes.

LEADER PRINTING CO.  
PHONE 16

## ONE-HALF DOZEN REASONS

Why it pays to trade with Sugg Brothers

1  
Winter is here and cars need extra care at this time. We know how to expertly service your car for the winter months.

2  
We always keep a complete line of every motor need. Prestone is one of them . . . and this item alone will save you worry and expense if you'll come by now—before your radiator freezes.

3  
We have the proper oils for winter driving. Let us drain your crankcase so your car and your motor will run smoothly on these cold mornings.

4  
You can get more miles from Phillips '66' gasoline—the kind we sell. Buy gasoline here and you'll come back again.

5  
You'll save considerable money in a month's time if you let us supply ALL your motor needs. Ask your friends about our prices.

## Skyrockets—

(Continued From Page One)

failed to gain through right tackle. Gilbreath's punt out of bounds gave the ball to McLean on Wellington's 30 yard line.

Butler followed interference through right tackle for 10 yards gain on McLean's first play of the game. Grogan lost 2 while trying to circle right end. Latham made 3 through right tackle. McLean failed to complete two passes, giving ball to Wellington on her 28 yard line.

Gilbreath made 3 through right guard. Johnson tore through left tackle for 10 yards. Wellington fumbled losing ball.

McLean's ball on the Skyrockets 31 yard line. Heasley failed through right tackle. Tigers penalized 15 yards for holding. Watkins intercepted pass.

Wellington's ball on her 23 yard line. King failed to gain. Gilbreath made 2 through right tackle. King made 6 through right tackle. Wellington held for downs.

Tiger's ball on Wellington's 31 yard line. Butler gained 2 through right tackle. Grogan circled right end for 15 yards. Grogan again carried ball for gain of 2 yards through right guard. Butler lost 6. Gladney tackling. McLean failed in try for field goal giving Wellington ball on her 20 yard line.

King made 4 through right tackle. Johnson also hit the tackle for gain of five yards. Gilbreath plunged through center for gain of 6 yards. Time called out for McLean. Johnson followed interference for gain of 24 yards being carried out of bounds. King gained 9 through right tackle. Johnson fumbled. McLean recovered ball.

McLean's ball on her 31 yard line. Grogan failed to gain through right tackle. Heasley's pass was not complete. Latham punted.

Wellington's ball on her 39 yard line. King made 4 through right tackle. Johnson lost 6. Gilbreath punted.

McLean's ball on her 25 yard line. Latham punted. Wellington's ball on her 31 yard line. Time called out for Wellington. Gilbreath circled right end for 21 yards after seeing that his punt would be blocked. Wellington made 4 on pass. Johnson made 4 through right tackle. Gilbreath again hit right tackle for 4 more yards. Williams ducked from his position at left end, received ball on crisscross play and made touchdown after carrying ball 32 yards. Wellington failed to pass for extra point.

Wellington kicked off. McLean's ball on her 37 yard line. Butler made 6 through right tackle. Quarter up. Score, Wellington 6, McLean 0.

## Second Quarter

McLean's ball on her 43 yard line. Butler made 3 through right tackle. Butler gained 1 through right tackle. Heasley failed to complete pass. Latham. Williams tackled Heasley for 6 yard loss. Pass to Grogan was incomplete. McLean punted.

Skyrocket's ball on their 23 yard line. King made 4 through right tackle. Johnson lost 3. King made three through right tackle. Gilbreath punted. McLean's ball on Wellington's 49 yard line.

Grogan made 2 around right end. Heasley failed to gain through right tackle. Gilbreath gained 4 through center. Johnson made 2 through right tackle. Gilbreath punted.

McLean's ball on her 45 yard line. Butler failed to gain. Breedlove intercepted pass.

Wellington's ball on her 35 yard line. Time called out for Wellington. Stafford and Taylor go in. King failed to gain. Johnson lost 2. Gilbreath punted over goal line.

McLean's ball on her 20 yard line. Butler made 2 through right tackle. Hampton replaced Worley. Latham failed to gain. Latham's punt was blocked, but McLean covered ball. Latham's punt was blocked but McLean covered ball. Ball on 18 yard line. Latham punted 70 yards.

Wellington's ball on her 8 yard line. Half up. Score, Wellington 6, McLean 0.

## Third Quarter

McLean kicked over goal line. Wellington penalized 15 yards for holding. King tore through left tackle for 22 yards. Gilbreath made 4 through left guard. Johnson failed to gain. Johnson made 4 through right guard. Gilbreath 4 through left guard. Johnson Breedlove followed through center for 5 more yards. Johnson gained 6 through right tackle. King failed to gain. Breedlove passed to Gilbreath for 17 yards. Breedlove made 1. Johnson gained 8 through right tackle. Wellington penalized 5 yards. Johnson circled right end for 4 yards. Johnson failed to gain. Gilbreath made 5 through center. Gilbreath failed to gain. McLean's ball on her 5 yard line. Latham punted.

## Smartest of New Suits and Coats Betray A Tendency Toward Curved Lines

BY HARRIET

It has taken the winter coat and suit quite a time to decide definitely what course they will take.

Dresses actually took a stand—they added to their length and subtracted from their bodices, and cultivated a normal waistline. But coats took longer to crystallize.

Consequently there are many versions of the winter coat, both in suits and in separate coats. Some are long, some are short, some outline the waistline and give a princess line at the waist, others cannot be budged from the straight-line policy.

However, the newest and smartest coats and suits betray an awareness of curved lines and new feeling, and they are growing more characteristic as the season advances.

THE suit of this season is quite apt to be long coated—naturally that is the most practical length, and it has its own blouse of jersey, crepe or satin that is particularly designed for it.

Suits for dress wear come in velvet, broadcloth and the soft wools, but for day or for sports wear, nothing exceeds in popularity the model that is developed in tweed.

A PARTICULARLY successful model is the one illustrated which was created by the French couturier, Madame Jenny. It comes in autumn colors—brown, beige and yellow, and the blouse is of yellow crepe de chine outlined with brown crepe—just enough to give emphasis and snap.

The long, comfortable, and extremely smart coat is voluminously collared and cuffed with brown seal skin, and the skirt is banded and manipulated to give the smart line across the front. The hat is of beige felt, and takes the smart turban line.

AMONG the coats that is so original, that it can hold its own

Wellington's ball on her 41 yard line. Johnson made 4 through right tackle. King followed through right tackle for 4 more yards. Breedlove gained. Time called out for Wellington. Worley replaced Gladney. King lost 5. Johnson failed to gain. Johnson again failed to gain. McLean fumbled Wellington's punt and Wellington covered ball. Ball on McLean's 30 yard line. Johnson made 3 through right tackle. Williams made 8 around right end. Gilbreath failed to gain. King also failed to gain. Wellington penalized 5 yards. King failed to gain. Breedlove's pass to Gilbreath was incomplete. Another pass was incomplete.

McLean's ball on her 21 yard line. Grogan tore through right tackle for 20 yards. Time called out for McLean. The Tigers made 15 yards on pass. Quarter up. Score, Wellington 6, McLean 0.

## Fourth Quarter

Grogan made 2 around left end. Heasley failed to gain. Pass to Grogan was incomplete. Wellington blocked Latham's punt, but the Tigers recovered ball. Ball on 50 yard line. Heasley made 3 through right tackle. Latham's pass was incomplete. Latham made 4 through right tackle. Wellington recovered McLean's fumble.

Skyrocket's ball on their 40 yard line. Johnson made 1 through center. King gained 3 through right tackle. Breedlove passed to Gilbreath for 15 yards. Johnson made 6 through left tackle. Williams circled right end for 6 yards. Breedlove passed to Gilbreath for 13 yards. Johnson made 1. King lost 1. Pass to Gilbreath gave Rockets 8 more yards. Another pass resulted in 4 more yards. Gilbreath made 1 Johnson carried the ball over for a touchdown. Wellington failed for extra point.

Wellington kicked off. McLean's ball on her 43 yard line. Latham's pass to Butler gave McLean 12 more yards. Another pass resulted in 15 more yards. Latham made 9 through center. Savage replaced Willoughby. Butler made 1. Time called out for Wellington. A pass gave the Tigers their first touchdown. Wellington offsidess gave McLean extra point.

McLean kicked off to King who returned ball 22 yards. Wellington's ball on her 35 yard line. Breedlove made 2 through center. Gilbreath followed again through center for six more yards. King gained 5 through right tackle. Johnson made 3. Time called out for McLean. Breedlove gained 3 through left guard. Johnson made 1. Game over. Score, Wellington 12, McLean 7.

Wellington's line-up consisted of Williams, left end; Willoughby, left tackle; Worley, left guard; Watkins, center; Gladney, right guard; Stout, right tackle; Campbell, right end; Breedlove, quarterback; Johnson left half; King right half; Gilbreath, fullback. Substitutes for Wellington were Hampton, Stafford, Savage and Taylor.

Newest styles in coats and suits are pictured above. At left, a jaunty black cloth afternoon suit, trimmed with white shaven lamb; at right, a tweed ensemble in beige, brown and yellow.

whichever way coats decide to go is the smart afternoon model created by Lucien Lelong. It has a cleverly cut cape across the back, which not only gives a smart touch, but is a clever line to disguise the broad back, and one of the smartest of standing collars, trimmed with white shaven lamb. This lamb is repeated on the deep-

ly scalloped cuffs which add such a clever touch to the sleeves. This coat, while it has something of the feeling of the shorter coats, with its circular cape, has the practical features of the longer coat which entirely covers the costume, and may be worn with colored frocks as well as those of black and white.

## Clarence Ousley—

(Continued From Page One)

expect the American farmer to understand what he needs for his own salvation and demand it," he said.

"Official figures show that within the next five years the free importations of coconut oil from the Philippines will be equal the total production of cottonseed oil by Texas and other cotton producing states," Mr. Ousley said.

"This expansion of the Philippine coconut oil industry appears inevitable in view of the fact that at this time less than two per cent of the arable land of the Philippines is under cultivation. In addition, land is easily acquired under Philippine law by individuals or corporations, labor is astoundingly cheap, under this regime, profits are great.

"Profits upon coconut plantations cultivated according to modern scientific methods are about 45 per cent annually upon the investment after the first five years of waiting for the trees to reach their maximum fruitfulness within 10 years and maintain it for at least 100 years."

With such potential expansion and such a margin of profit Philippine coconut oil production under the present American tariff policy promises competition with cottonseed oil production to the point of the practical extinction of cottonseed oil as a worthwhile by-product of cotton production, Mr. Ousley said.

## Basketball—

(Continued From Page One)

was composed of Willie Lee McInnis and Trula Morrow, forwards; Ila Sasser and Helen Cook, centers; Lucille Duke and Ruby Johnson, guards. Wellington's only substitution was that of Juanita Flowers who went in for Morrow during the last quarter.

Dodsonville's line-up was Wesson and Johnson, forwards; Smith and Orbison, centers; Fillpot and Sanderson, guards.

The entire game was interesting and exceptionally swift and hard-fought, with the victory remaining doubtful for either team until the final whistle. Ross Smith served as referee, while coaches are R. L. Davidson for Wellington and Jno. William Peoples for Dodsonville.

Coach Davidson is working on his schedule of games for the remainder of the season and the calendar of games will be announced in the near future.

## Culture of Indian May Be Preserved

NORMAN—A unique department for the preservation of Indian culture and the consideration of the problems of the American Indian will be established on the campus of the University of Oklahoma if plans of President W. B. Bizzell are carried out.

Definite action toward establishing an annual institute for creating interest in the Indian is being postponed because of insufficient funds. Hopes are entertained that some person who is interested in Indian culture will make a contribution for the building of a teepee for the preservation of relics and as a headquarters for research workers.

"It is hoped that this will be the beginning of a program of studies in Indian languages, history and traditions," said "Doctor Bizzell. "Perhaps there are more students of Indian descent in this university than in any other. If some institution does not provide a department of this kind, much of the past civilization of the Indian will be lost.

## Best Time Plow Garden In Fall

The most important step home gardeners may take this fall toward making a good garden for next year, according to the November 15 Oklahoma Farmer Stockman, is to manure and plow the ground.

Where it is convenient, it is suggested that the garden be manured, and the manure disked into the soil prior to breaking the garden. In this way the manure will be more thoroughly mixed with the soil.

There are a number of advantages of fall and winter manuring and winter plowing of the ground. In the first place the manure will add the three most important elements of plant food that are most likely to be absent from the soil; namely nitrogen, phosphorus and potash. The fertility of the soil may thus be increased at practically no expense. Again, the manure will add organic matter to the soil which will make the ground more easily worked during the regular garden season and at the same time increase the soil's capacity for catching and retaining moisture.

The decomposition of the manure will also make the other food material available in the soil that might stay locked up during the growing season were it not for the effect produced by the decomposition of the manure.

No doubt farmers have noted in walking across ground that has been plowed during the fall or winter and left rough until spring that the plowed ground is much softer and springier than spring plowed ground.

## Took Soda For Stomach For 20 Years

"For twenty years I took soda for indigestion and stomach gas. Then I tried Adlerika. One bottle brought complete relief."—Jno. B. Hardy.

Adlerika relieves GAS and sour stomach in TEN minutes! Acts on BOTH upper and lower bowel, removing poisons you never knew were there. Don't fool with medicine which cleans only a PART of the bowels, but let Adlerika give stomach and bowels a REAL cleaning and see how good you feel!—Palace Drug Co. Adv-F1

## Clear Evidence Of Progress Revealed In Highway Plans

That comprehensive highway planning is getting someplace is evidenced by the number of through paved routes the national highway map now reveals.

Most of the through concrete pavements are in the Middlewest, although there are many lengthy stretches in all other sections. In the East, replacements of worn-out surfaces built with the limited experience of several years ago, is going on slowly but surely.

The most notable all-paved eastern road extends from New York City, through Baltimore, Washington, Richmond and on to Raleigh. Another concrete highway extends from Philadelphia through the northern part of Pennsylvania to Erie.

In the Middlewest several lengthy highways radiate from Chicago. Motorists may travel from Chicago to Louisville, via Indianapolis, without leaving concrete. All but one short bit of

highway connecting Chicago and Des Moines is paved. Chicago also has paved motorways to Detroit and to Toledo.

What cooperation between state highway departments can do is illustrated by the continuous strip of concrete extending from Hibbing, Minnesota to Topeka, Kansas. This roadway, also linking Duluth, St. Paul, Chicago, St. Louis and Kansas City, is of tremendous economic and social importance.

Another highway accomplishment worthy of note is the concrete road that extends itself practically all the way round Lake Michigan.

## District Court Opened Here Monday Morning

### Cases Await Trial During Current Term District Court

## Grand Jury Meets

### Grand Jurors Convene To Begin Investigations of Charges

District Court opened in Wellington Monday morning of this week before Hon. A. J. Fires of Childress, district judge, and the current term of court will bring many cases before the jurors. With more than 90 cases docketed before court opened, and with other cases which will be added when the grand jury returns its indictments, the present term brings such legal work before the court during its November session.

Only a few non-jury cases are being tried this week, according to Miss Lenore Sherwood, district clerk. Miss Sherwood announced that appearance cases were being called Tuesday morning, and the remainder of this first week would be devoted to these non-jury cases. The grand jury is also in session at this time, having been called together Monday morning. The complete list of all grand jurors and all petit jurors for the five-week term was published in The Leader October 24, as selected by the jury commission. This showed that grand jurors selected for this term are: B. W. Boorman, B. P. Clark, W. S. White, E. G. Pierce, W. W. Johnson, O. R. Weathers, Henry Tice, W. L. O'Rear, Elmer Strong, L. A. Rollings, J. L. O'Hair, W. W. Neeley, O. O. Adams, W. L. Browning, O. L. Couch and W. W. Carter.

Petit jurors who will be called upon to serve during the week of Nov. 25, are: G. F. Elliott, J. W. Loter, W. D. Forbes, G. W. Moody, J. B. Forbis, R. E. Morrow, H. M. McCaskill, J. C. Ford, J. G. Gardner, J. A. Lucas, C. D. Buerger, W. J. Boykin, T. E. Benge, E. M. Edgar, Lee Fontenberry, W. A. Box, Frank Mitchell, C. M. Mims, Ed Meaders, R. R. Martin, J. H. Gibson, J. W. Gimmell, J. A. Mahan, O. A. Kiker, W. H. Masten, J. B. Long, E. C. Blevens, J. L. Burt, O. D. Holton, E. N. Lewis, W. T. Love, W. F. Chandler, Jake Lemley, A. O. Brewer, E. C. Clements and L. E. Leggett. The complete list of all cases which had been docketed prior to November 14 was published in The Leader last week. All these cases will come before the court during the present term, as well as others which have been added since then, together with the indictments returned by the grand jury.

## Car Registration Open December 1

The issuance of 1930 licenses for automobiles will be started December 1, it has been announced by Claude McKinney, sheriff and tax collector. People are urged to buy new licenses as early as possible to avoid the rush and confusion which is always in evidence as the time limit draws close.

It is also essential that the car lights be tested before application for new licenses is made. The Magnolia Station No. 2, operated by Jack Gibson and located immediately east of the Hotel Wellington, is the only official light testing station in Collingsworth County, having been appointed by the commissioners court to operate the official test station. All cars tested by the Jack Gibson station are given a receipt which is recognized by the tax collector. The county derives a tax of 2 cents from each car tested at this station.

## Frank King Post of American Legion Now Beginning Countywide Drive for Members

Members of the Frank King Post of the American Legion are now staging a membership drive in order to place the local post on a more substantial footing and to arouse more interest in Legion work among the ex-service men in Collingsworth. There are a number of men residing in Collingsworth who have Army service to their credit but who do not belong to the local Legion post, and this membership drive is designed to bring them into the Legion work.

Bill Burden is captain of one group which is working to secure new memberships, while Jno. T.

Payne is captain of the second group. Legion dues are only \$3 annually, and this figure includes a year's subscription to the American Legion's monthly magazine.

The Legion will hold a banquet on the night of December 5 at the City Cafe for new and prospective members of the local post. All ex-service men residing in this county are urged to be in attendance. Prior to the banquet a meeting will be held at the Legion Hall, and the ex-service men are especially urged to be present at this time. Those who will be unable to attend regardless of whether they belong to the Legion or

not, are requested to send their names to Post Commander W. R. Rooker or to Adjutant Vertrees Langford.

Other recently elected officers of the local post are: Roy Horn, vice commander; E. W. Jones, service officer; C. C. Bishop, chaplain; Jno. T. Payne, athletic officer; Walter G. Shields, historian; and Jno. F. Bevers, sergeant-at-arms.

The following list shows all who are active members in good standing, of the Frank King Post at the present time:

W. H. Tice, A. B. Smith, Ralph Royal, Jno. T. Payne, E. W. Moss,

G. Ward Moody, E. F. Lewis, E. W. Jones, Roy Horn, J. E. Hobbs, C. E. High, S. G. Henry, Travis Healy, T. W. Harshbarger, Jeff Harrison, Frank Hajek, C. L. Geesey, Joe T. Fuller, R. S. Fisher, G. T. Corry, Henry Cocke, A. L. Cochran, Cecil G. Bower, Clark B. Anderson, C. W. Barnett, Dodson James, J. W. Jeffries, J. B. Stevenson, W. E. Spears, Fred Kyser, W. D. Wiles, Jno. W. Harper, Ross Wilkerson, Felix Handley, A. C. McKinzie, J. G. Peters, H. B. Patterson, C. E. Coleman, Bryan Denley, John C. Harper, Art Gowin, John K. McGill, Walter G. Shields, L. R. Urquhart, W.

C. Seaberry, D. M. Blanton, A. L. Shaw, George Kelley, Grady C. Brooks, J. G. Finley, J. H. Armstrong, John Wood, Hal Owen, J. F. Prince, A. E. Smallwood, Geo. E. Clark, Joseph C. Thompson, Seth Horn, Lee N. Gragg, J. R. Collins, C. C. Bishop, Marvin Somerville, Robert H. Trimble, R. E. Sammons, O. L. Glasgow, John F. Bevers, Guy E. Clay, Roy Dobbs, Riley Dunson, D. E. Fulton, Allen L. Harper, Vertrees Langford, W. H. Lynn, Lee O'Neil, W. R. Rooker, E. L. Winn, C. B. Harrison, J. N. Wallace, C. M. Weaver and W. V. Whitley.

## Unsolved Mystery Surrounds Death Of Robbery Victim

### Unidentified Man Dies In Hospital From Wounds Inflicted Monday

## Find Bloody Sticks

### Bloody Sticks Discovered On Highway By Sheriff In Investigation

All efforts to identify an unknown man slugged into unconsciousness and found on the Mangum highway one mile east of Wellington late Monday night have thus far been of no avail. The man, evidently a victim of robbery, was discovered in an unconscious condition by E. O. Watson and Joe Simpson and brought to the Wellington Hospital for

Bob Copeland, who is employed on the H. K. Wellington farm, Tuesday afternoon said he thought the slugged man was Luna Luck, formerly of Vallent, Oklahoma. Copeland states that he used to work with Luck and that the robbery victim is the same man. Communications from the sheriff's office were being sent Tuesday afternoon to Gaston Luck at Benton, Ark., and to J. B. Luck at Magnolia, Ark., in an attempt to positively substantiate Mr. Copeland's identification of the slain man as Luna Luck, but as yet no definite report has been ascertained.

treatment where he died shortly after six o'clock Tuesday afternoon without having ever regained consciousness.

The lower part of his body was lying in water in the ditch by the roadside, and his head had been badly battered. All clothing was bloodsoaked. Sheriff Claude McKinney in investigating the case found signs of a terrific struggle about three-quarters of a mile nearer to Wellington, and also found fence sticks spotted with blood which had been used to beat the victim over the head.

In the victim's pocket were two keys, a pocket knife and a cobb pipe. In his pocket he was carrying a cotton book, but most of the pencil writing had been rendered illegible by the ditch water in which the man was found. In this book were references to Memphis and Mangum, and also the names of Pendley, John, Evert and Jacobs were jotted down.

The man appears to be between 45 and 50 years of age, according to latest calculations. He was red complected, with sandy hair almost red and which was beginning to turn gray. He is about five feet, eight inches in height and stockily built.

He was wearing cotton trousers with tiny blue and white checks and wore a heavy imitation chambray overshirt. His coat was of brown material and was sleeve marked by tailors "M. Odems."

The body is being held by Wellington undertakers and hundreds of people are attempting identification but none are as yet successful. The body will be held here two or three weeks unless identification is made and the body claimed.

## John French's Car Stolen Friday Is Still Unrecovered

A 1928 model Buick sedan owned by John French which was stolen Friday night from the curb in front of the Ritz Theatre where it had been parked has not as yet been located. The car was parked in front of the theatre for two hours while Mr. French and his family were attending the performance and was not missed until they came from the theatre.

## Entire City To Be Decorated During Christmas Holidays Is Recent Plan

### Chamber of Commerce To Furnish Christmas Trees at Small Cost

In accordance with plans now under way in Wellington, this city will, for the first time in its history, be decorated for the Christmas holidays. Evergreen trees appropriately decorated with tinsel and Christmas lights will be strung about the square in Wellington and along the side streets leading from the square. It is also intimated that many of the business houses will decorate trees and place them in front of their stores. It is probable that a number of individuals will place decorated trees on their porches or about their lawns, and the city will radiate the Christmas spirit of friendliness and good cheer to all who visit Wellington during the holiday season.

It is planned to begin the decorative movement shortly after December 1. Christmas trees may be obtained from the Chamber of Commerce at a very small cost, providing orders are placed immediately. Some of the trees six and eight feet in height will be distributed by the Chamber of Commerce for as little as \$1, but all who wish to buy trees are urged to notify the Chamber of Commerce to that effect just as soon as possible.

## J. L. Warrick and Miss Edgar Marry

Miss Josephine Edgar and J. Lawrence Warrick were united in marriage Sunday morning at 8 a. m., November 17, at the Nazarene parsonage with Pastor M. V. Dillingham officiating. The ceremony was performed in the presence of only a few close friends. Following the nuptials, Mr. and Mrs. Warrick left for a honeymoon trip to points in eastern and southern Texas, to be away two weeks.

The bride is the daughter of Mr. and Mrs. E. M. Edgar of Wellington and quite well known to the people of this city where she attended high school. She was enrolled in the Wellington High School until last year when she withdrew from the Junior class to enter school at the National Business College in Abilene.

The groom is the son of Mr. and Mrs. J. E. Warrick and has been employed at the Warrick Feed Store for quite a while as bookkeeper. He is interested in this grain business which was established by his father and he assists him in the management. The groom is also a former student of Wellington High School, having attended school here until 1925 when he withdrew to enter the National Business College at Abilene. He was enrolled there in 1925 and in 1927.

Mr. and Mrs. Warrick will make their home in Wellington where they are both well known and held in highest esteem.

## Christian Church Will Give Dinner

### Donors Will Be Entertained Thanksgiving Day With Turkey

On Thanksgiving day, the First Christian Church will entertain all donors to their church with a turkey dinner and barbecue. Dave Thomas, chairman of the reception committee, says that every person in the county who has contributed to the church is invited to be present at this Thanksgiving dinner. The dinner will start promptly at 10 a. m. and continue into the afternoon until everyone has been served.

Mr. Thomas says that this is not an effort to raise funds as no collections will be taken or asked for, but that it is simply the method the members of the First Christian Church have selected to show the appreciation they hold for the people who have helped them in their church work.

## Plan "Sock Supper" Bean Hill School Wednesday, Nov. 27

An old-fashioned "sock supper" is being planned for Wednesday night, November 27, at the Bean Hill School house, to be conducted by the Parent-Teacher Association of Bean Hill. The public is extended an invitation to be present, with all ladies invited to bring one pair of socks with one filled. The men are requested to bring bulging pocketbooks. A cake for the prettiest girl will be sold and also one for the laziest man.

## A. W. Hankins Now In Wellington With Strickland Tailors

A. W. Hankins of Dallas has been employed by E. M. Strickland of the Strickland Tailors as superintendent of the plant. Mr. Hankins is an experienced cleaner and is an expert dyer as well as cleaner. He formerly worked for the Metropolitan Cleaners and Dyers in Dallas. He makes a specialty of cleaning fine silks, Mr. Strickland states.

Preliminary announcements concerning the Kiwanis Follies have been made by E. C. Cayton, Kiwanian, who states that the entertainment will be far above the ordinary trend of home talent work and the people are assured of a riot of fun when the Follies are presented by the Kiwanians at the Rialto Theatre in Wellington December 4 and 5.

Rehearsals will probably be started November 25, with an experienced and highly capable di-

## To Slaton

J. A. Smith, pastor of the First Methodist Church of Wellington, who has been transferred to Slaton and who will take up his duties there this week, will be succeeded by E. B. Bowen of Hereford.

## Pastor Here Is Sent To Slaton

### I. A. Smith To Be Succeeded by E. B. Bowen of Hereford Church

I. A. Smith, pastor of the First Methodist Church in Wellington during the past two years, has been transferred to the Slaton church as a result of the Northwest Texas Methodist conference which came to a close at Pampa Sunday night.

Reverend Smith will leave for Slaton sometime during this week, he has announced, where he will take up his new duties as pastor of the church there. During the two years he has served the local Methodists he has made many warm friendships over Collingsworth County and it is with deep regret that the Methodists here learn of his transfer. Reverend Smith came to Wellington from Spur where he had spent four years in the ministry there.

J. A. Laney who has been in charge of the Wellington circuit for the past year has been transferred to Benjamin where he will serve the Benjamin and Vera churches during the coming year. Reverend Laney came to Wellington a year ago from Lelia Lake.

E. B. Bowen of Hereford has been appointed to succeed Reverend Smith in Wellington, coming

(Continued on page 3)

## Kiwanis Follies December 4-5

which will be staged here is a tried and proven "sure-fire" hit and is designed to bring a truly amusing sort of entertainment to Wellington.

Plans for the Follies were worked out by a Kiwanis committee composed of S. P. Buster, H. A. Phillips, Cecil Callahan, F. L. Emanuel, E. C. Cayton and A. M. Duvall. Proceeds from the entertainment will be used in carrying on the work of the Kiwanis Club, Mr. Cayton states.

## Leader Cotton Survey Reveals 26,885 Bales Now Ginned In Collingsworth

### Skyrocket Team Finishes Season

### Opponents Pile Up Total of 151 Points to Only 32 For Locals

Friday marked the end of the 1929 football season in Wellington, at least for that day ended the Wellington Skyrockets' football calendar for this year. Wellington having been definitely eliminated from the Interscholastic League running several weeks ago, no engagements were made for games after November 15. So as a result there will be no "Turkey Day" game; no home-coming game—nor any other sort of game for Wellington until another season rolls around. The Skyrockets have turned in their suits; called it a day.

Wellington's team was a bit disappointing this year, so far as actual victories are concerned, but those who understand the conditions thoroughly are aware of the fact that Wellington was forced to fight a losing battle even before the season opened.

Only two "letter-men" were able to start the season this year when Coach Jimmie Smith called for recruits in September. They were Captain Pete Boverie and Lonnie Watkins. All the other players who had won letters the previous year had either been lost by graduation or else they had failed in their academic work and were ineligible. As a consequence, the Skyrockets went into their first game of the year with a team

(Continued on page 9)

## Thanksgiving Supper At Aberdeen School Next Thursday Night

There will be a Thanksgiving supper served in boxes at the Aberdeen school auditorium Thursday night, November 28, according to an announcement by Mrs. J. L. Light. The proceeds will go to the Aberdeen school and to the Aberdeen women's home demonstration club. There will be ample entertainment provided throughout the evening, and the program promises to be one well worth attending. An invitation is extended to all to attend.

### Only 4,869 Bales Ginned Over Entire County Past Two Weeks

The Leader's fifth regular cotton survey to be taken during the current ginning season and which was compiled at noon Wednesday of this week showed 26,885 bales had been ginned in Collingsworth County at that time. During the past two weeks the county has handled only 4,869 bales as indicated by the fact that on November 6 a survey compiled by The Leader showed 22,016 bales had been ginned then.

Of the present county total of 26,885 bales, the ten gins in Wellington have handled 11,972 bales. The four gins at Dodsonville account for 5,072 bales while the other nine gins of the county located at Abila, Rolla, Quail, Dozier, Plymouth and Luttie have handled the remaining 9,831 bales.

A report issued November 1 by the Department of Commerce at Washington showed that at that time Collingsworth had ginned more cotton than Childress, Donley or Wheeler counties, and almost as much as Hall County. The figures released by the government November 1 were as follows: Collingsworth 21,611; Hall 26,859; Childress 15,323; Donley 9,234; and Wheeler 11,260.

## State Inspectors Visit High School

Miss Bernice Mallory, state supervisor of vocational home economics, and Miss Margaret Cathan, state inspector from Austin, visited the Wellington High School Tuesday and Wednesday of last week.

Miss Mallory highly commended the variety of work being done this year, especially the project recently done by the third year class in furnishing the teachers' rest room and their work in block printing. She was impressed with the high standard of work of the first and second year classes and with a few recommendations Miss Mallory complimented the home economics equipment in regard to selection and arrangement. She was quite pleased with the new books in the library, a condition which scored the local department low last year.

Miss Mallory was enroute to the district home economics conference which was held in Amarillo November 15 and 16.

Miss Margaret Cathan, upon her visit to the local high school commended the work in every department and gave a most favorable report to Austin.

### HERE FROM COAST

C. J. Glenn who has been in San Pedro, California, for several weeks on business, returned to Wellington Sunday to look after business interests here. Mr. Glenn's son, Joe Parker Glenn, is connected with the Bank of America in San Pedro.

## LOCALS

Joe Carter and Wayne Jones of Dodsonville visited their cousins Lester Campbell Thursday.

Mrs. N. L. Jones left Sunday for Dallas where she will spend several days visiting relatives and friends.

Mrs. Jno. French and son and Mrs. Vernon Morris and son went to Dallas Sunday where they will spend the week visiting their sister, Mrs. Vivian Brady and family.

C. C. Wooley of Seminole spent week end visiting in the home of his sister Mrs. W. H. Stuart and Stuart.

L. Jones spent Sunday visiting with his brother in Quanaah.

C. LeDerer returned Sunday after a week's visit and business trip to Dallas.

C. J. Glenn returned home Sunday after several weeks visit with his son Joe Parker Glenn in San Pedro, Calif.

Chas. Cushinberry of Seminole, Oklahoma, spent last week end as the guest of Mr. and Mrs. W. H. Stuart.

Bob Robertson spent last week end visiting friends in Memphis.

Dr. and Mrs. T. L. Lewis of Memphis visited Sunday evening in the home of Mr. and Mrs. Floyd Shields.

G. W. Wilks of Hollis was a Wellington visitor Sunday.

Mr. and Mrs. W. L. O'Rear of the Rolla Community were in Wellington Monday transacting business.

Bob Watkins, employee at the Percy Wells Department Store visited Sunday with Rev. J. F. Graham of Hollis.

Rev. E. R. Bowen, formerly pastor of the Methodist Church at Ford will arrive in Wellington next week where he will be pastor of the Methodist Church the year.

Mrs. Tobe Deahl left for Dallas for several days. They intend to attend the convention there.

Rev. J. A. Lacey and family left this week for Benjamin where he will be pastor in charge of the Methodist churches at Benjamin and Vera during the coming year.

Mrs. Jack Deahl is visiting this week with her parents Mr. and Mrs. John Kniseley in Idabel, Oklahoma.

Mr. Jim Flowers of near Hedley was a business visitor in Wellington Saturday.

Winfield White of Kelley community was in Wellington Monday transacting business.

Ben Webb of Dodsonville was in town Monday transacting business.

C. E. Strong of Dozier was in Wellington Monday transacting business.

Rev. W. R. Wolfrum left Monday for Erick, Okla. where he will conduct a revival meeting this week.

L. A. Manzer was a business visitor in Wellington Monday.

Miss Bernice Brickey spent last week end visiting friends in Childress.

Mrs. Ernest Griffith of Weiner, Texas, spent last week end visiting her parents Mr. and Mrs. E. D. Clay.

C. F. Carmack arrived in Wellington this week where he will be in charge of the circuit charges of the Methodist church.

Rev. L. A. Smith and family left this week for Slayton where he will have charge of the pastorate of the Methodist Church the ensuing year.

G. W. Deahl of Dodsonville was in Wellington Monday transacting business.

W. C. Heare of Shamrock transacted legal business in Wellington Monday.

Judge A. J. Fires was in Wellington this week visiting his son Chester Fires and family and attending District Court.

Miss Otho Cummings returned Sunday after several weeks business trip in Gotebo, Carnegie and Hobart, Okla.

Mr. and Mrs. Herschael Richards of Memphis spent last week end visiting relatives and friends here.

Mr. and Mrs. Carl Saye of Clarendon visited friends in Wellington Monday and transacted business with the Little Mercantile Co.

Mrs. L. C. Jones visited Monday in Shamrock with her daughter Mrs. M. M. Nix and Mr. Nix.

Judge E. E. Diggs of Childress was in Wellington Monday transacting business.

Mrs. J. E. Matton and Mrs. Jess Cook attended the Baptist Sunday School Convention at Beaumont last week end.

Miss Josephine Edgar and Mr. Lawrence Warrick were united in marriage Sunday morning at the Nazarene parsonage, Rev. M. V. Dillingham officiating.

Mr. and Mrs. A. M. Fuquay visited friends in Childress Sunday.

Mrs. Lexie Dell Harrison and Miss Nellie Wright visited with friends in Mangum Sunday.

Mrs. W. W. Clark, J. P. Clark Miss Edna Clark and Mrs. W. A. Nowlin visited Sunday in Duke, with Mr. Clark's sister and family.

Mrs. D. M. Dickey returned to her home in Fredrick, Okla., Sunday after a two weeks visit in Wellington with relatives and friends.

Mrs. T. A. Hudson and Keener Hudson visited relatives in Mangum Sunday.

Judge A. A. Lumpkin of Amarillo was in Wellington Monday to attend District Court.

Misses Ethel George, Stella Young and Mary Duncan visited friends in Shamrock and Wheeler Sunday.

## President Of Firm Endorses Sargon

"At the age of 79 I'm still active in business, and I attribute my splendid energy and vitality to Sargon. I believe it added years to my life."

DAVID S. BEEKMAN  
"Before I took Sargon my health had been failing steadily for five years. What I ate soured almost as soon as it reached my stomach. My nerves were all to pieces and I hardly ever got a good night's sleep. I was continually bothered with constipation and biliousness. I tried many medicines but kept losing weight and getting weaker every day. I thought I would have to give up my business, which would have cost me thousands of dollars.  
"Six bottles of Sargon made me feel like a different man. If I have an ailment left I don't know it. My appetite is keen, all trace of stomach trouble is gone and I sleep like a top. I've gained seven pounds and feel as well and strong as I did 25 years ago. I go to my office every morning ready for a real day's work. It's a pleasure to endorse this remarkable treatment."—David S. Beekman, President Beekman Steel Fence Co., San Francisco.  
Joe Hardy Agents—Advs.

## Minister Wolfrum Preaches at Erick

Billy Wolfrum, minister of the Church of Christ, left Monday of this week for Erick, Oklahoma, where he will conduct a meeting in that city during the present week. He will remain in Erick over the coming Sunday, and his pulpit in Wellington will be filled at that time by Minister John O'Dowd of Erick. The public is extended a welcome to come and hear Minister O'Dowd's message in Minister Wolfrum's absence.

Mrs. O. D. Hill of Dodsonville transacted business in Wellington Tuesday.

## Lecturer

J. N. Allensworth, member Diet League of America, who will speak at the high school auditorium Thursday night.

## Allensworth To Lecture On Diet

### All Wives Urged To Bring Husbands With Them To Hear Lecturer

Mr. Allensworth who will lecture at the High School Auditorium Thursday night under the auspices of the Parent Teacher Association, comes to us highly recommended as a speaker of ability. His subject, "The Relation of Food to Health" is one that is of vital interest to everyone whether sick or well and especially to parents in whose hands lies the responsibility for the proper feeding of children.

Mr. Allensworth says, "The body is built of the food we eat, and whether it be strong or weak, depends upon the material of which it is built." He tells in an entertaining and interesting

way how to select the material food, and shows also how its improper selection and preparation is the foundation and cause of most human ailments, such as decayed teeth, bad tonsils, defective eyesight, underweight and overweight, rheumatism, stomach trouble, goiter and in fact practically every disease known to mankind.

Mr. Allensworth says that in Memphis, Dallas, St. Louis and in fact every one of the larger cities where he has lectured and where health statistics are available in the schools "more than fifty per cent of the school children have some one or more physical defects prejudicial to their health, that will be handicaps for life." And that "these defects can be prevented and largely removed by the application of a few simple rules from the worlds recognized authorities on health and hygiene."

Mr. Allensworth's lectures have been enthusiastically received and endorsed by such authorities as Prof. Oneastant of A. and M. College, who says the program is

the most instructive presentation of the subject he has ever heard. Prof. J. W. Overall, president of Missionary Baptist College, says Mr. Allensworth's program should be heard by every parent who has the responsibility of raising children.

The fact that admission is free to everyone makes it increasingly essential that those wishing to be certain of hearing the wonderful message, from the authorities in the subject, should arrive at the auditorium early. No seats will be reserved, and Mr. Allensworth will lecture only once in Wellington. Present indications are that all available seating capacity will be filled long before the hours of the lecture, which will begin at 7:30 sharp, Thursday night, Nov. 21st 1929.

All wives are urged to bring their husbands with them to hear the lecture which Mr. Allensworth will deliver.

Miss Gladys Poling spent last week end visiting her parents Mr. and Mrs. Walter Poling and family.

## Many Arrests Are Made This Week

According to information issued by the sheriff's department, several arrests have been made during the past week, including one liquor haul.

Sunday afternoon Reed Daniels and Lilly Daniels, negroes, were arrested and 12 gallons of whiskey procured by Sheriff Claude McKinney when the arrests were made. The negroes were driving a Buick coupe when they were arrested by Sheriff McKinney two miles north of Wellington. Both have been released on bond, and will face trial during the present term of court.

Three other negroes have been arrested on charges of forgery. One of these, Alvin Cross, is an escaped convict, having recently escaped from the state penitentiary where he was serving a 25-year sentence for killing his wife. The three were arrested by Sheriff McKinney Sunday, and one of the number is now out on bond. Their cases, also, will probably come up for trial during the present term of court in Wellington.

## THE GREATEST WOMAN

For several weeks America has been honored by a visit from the greatest woman scientist that the world has ever known, Mme. Marie Curie of Paris, who, with her late husband, Pierre Curie, discovered radium in 1898.

These great souls scorned to profit by their discovery and gave it to the public for the benefit of humanity. Much of their epochal work in physics and chemistry was performed with meager equipment; in fact, the husband never had an adequate laboratory up to the time of his death from being struck by a truck in 1906.

But he had risen to be chief professor of physics at the Paris University, and his wife succeeded him in that position. She finally acquired a suitable laboratory, but during the war gave all her precious radium to the government, so that at its close she was without any of the rare substance.

In 1921 her friends and admirers in America bought a gram of radium and presented it to her together with a sum of money. She gave the radium to be used at the Curie Institute of the University of Paris and with the income from the money she rented another gram for the cancer hospital of Warsaw, Poland, her birthplace.

During her present visit her friends have given her a second gram of radium, which will go to Warsaw to replace that which has been rented.

Mme. Curie has never had more than a modest income, and at times has been in straightened circumstances, but she has patiently pursued her notable scientific researches, happy in the knowledge that she is serving mankind.

## RED CROSS ROLL CALL

On Armistice Day, November 11, the annual Red Cross Roll Call began, and millions of Americans will again renew their allegiance to the greatest relief agency in the world.

Communities that have not known sweeping disaster have no idea of what the timely aid given by this great organization means.

Whether it be the unhappy victims of a world war, of a West Indian hurricane, of a Galveston flood, a San Francisco fire or a Japanese earthquake—the Red Cross is always ready to give them aid and usually is the first on the scene.

A dollar will make you a member of this preeminent agency of mercy whose roster is indeed a roll of honor.

Unmarried women are said to appreciate fiction more, probably because the married ones are used to it.

Even a stingy man is usually liberal with his advice.

We have noticed that history repeats itself about the first of every month.

The words "find check inclosed" are entirely superfluous if the check is really in there.

## CURRENT COMMENTS OF OTHER EDITORS

Perhaps there is not any one thing that will go all the way toward putting the farmer and the farming section on a sound basis as a whole. Several men are making the grade in every community in spite of the present unsatisfactory relation that farming conditions bear to a more industrialized civilization which would indicate that after all there is something in the efforts of the individual. However, we do not hear a great deal of these things these days. It has ceased to be particularly fashionable for a man to carve out his destiny "on the anvil of adversity," as Homer T. Wilson used to say in his inimitable flow of oratory.—Homer Steen in Floyd County Hesperian.

Whenever our football squad comes to fully realize the fact that it takes dislocated neckbone, jammed new joints, floating ribs and false teeth to win, they will turn the world over.—Cyrus Coleman in Henrietta Independent.

Changes in city traffic regulations will be made by the installation of some new slow and stop signals this week, some of them already in effect. The increased traffic of the city has made these changes necessary and it is the duty of every citizen to become thoroughly acquainted with the signs and to observe them.—R. E. Kessie in Hereford Brand.

The quality of the animals exhibited at the Roosevelt County Dairy and Livestock show last month was surprising to everyone who has watched the development of the dairy and livestock business in Roosevelt county. Visitors from out of the county and out of the state were of the opinion that the show was a credit to any community. It is evident that the work of herd improvement by the use of better bulls and other improvement work has been carried on by farmers in recent years is getting results.—J. G. Greaves in Portales Valley News.

Perhaps the world has not given the lazy man credit for the progress that has been made toward the ideal life. When the lazy man is considered dispassionately, it is seen that some important inventions are the result of his disinclination to work.—E. A. Carlock in Paducah Post.

Clovis establishments have some of the most artistic window dressers in the entire country—evidence of which statement is found in the display spaces of the various establishments of the city. If these windows could be placed along the main thoroughfares of New York City where thousands of people could view them each day, their pulling power would be phenomenal.—Mack Stanton in Clovis News-Journal.

## SHIPPING BY WATER

Renewed enthusiasm has been aroused among advocates of water transportation by the speech of President Hoover at Louisville last month, in which a comprehensive system for further inland waterway development was recommended.

As a matter of fact, river transportation has made great strides in recent years, with a consequent saving of millions of dollars in freight charges. Shipping on the Mississippi River alone now reaches more than 62-million tons a year, as against less than 30 million tons in the hey-day of its steamboats of 40 years ago.

But the Middle West and the Mississippi Valley await the construction of the Lakes-Gulf deep waterway in order that the commerce of that region may be fully developed, according to Silas H. Altorfer, Peoria manufacturer, who declares that his company saved \$8,400 in freight charges in sending a special train of 44 cars of ABC washers to Los Angeles by routing them from Peoria to Baltimore by rail and thence by water through the Panama Canal to Los Angeles. With an all-water routing, such as the Lakes-Gulf project would make possible much larger savings could be made.

In other sections of the country similar opportunities for utilizing water ways are presented, and in most cases the cost of the proposed developments would be a most profitable investment for the nation, resulting in benefits to both agriculture and industry.

## OLD TIME POLITICS

While political campaigns are still waged with vigor, and are often enlivened with spectacular oratory, they do not compare in picturesqueness and enthusiasm with those of the old days.

Back in the nineteenth century the campaign parade was an indispensable feature of pre-election activities, especially in presidential years. Uniformed marching clubs bearing kerosene torches, with banners and transparencies, and led by brass bands, sometimes made up processions miles long in the larger cities, while the smaller communities had similar rallies on a lesser scale.

It was the custom of rival newspapers to enlarge upon the length of their parades by their partisans, while depreciating those of the opposition. The late Vice-President Marshall once told of such a circumstance, in which claims of rival newspapers held a humorous touch. A great parade was held in Crawfordsville, Indiana, in behalf of the candidacy of Governor Hendricks, after which Mr. Marshall says:

"In the morning the Democratic newspaper announced that it was the greatest torchlight procession ever seen in the city; that it took two hours to pass a given point. The evening Republican paper quoted this statement, admitted it was true, but added that the given point was Mike Mulholland's saloon."

## WANTED A SAFE JOB

So rapid has been the progress of science and invention in the past few years that many are wondering where it will all end. Once in awhile someone predicts that we have about reached the limit of new discoveries.

But these remind us of the government clerk in the Patent Office in Washington, who resigned, giving as his reason that inasmuch as practically everything that could be invented and patented had already been invented he wanted to go into some line of work which promised employment for the future.

This is a true story, the most striking part of which is that the resignation of the clerk referred to took place in the year 1837, nearly a century ago.

## DECK'S Didactics

By H. D. W.

About the first week in December Wellington will take on a new appearance. For the first time in its history the whole town will be decorated for the holidays. Festoons of evergreens gaily decorated with Christmas lights will be strung about the square and on the side streets and many of the business houses will have Christmas trees decorated in front of their places. It is also believed that a number of individuals will decorate Christmas trees and put them on their porches or in their yards.

\* \* \*

Christmas trees may be obtained from the Chamber of Commerce at a very small cost if you put in your request now. Some of the trees six and eight feet in height can be had for only \$1. If you want one of these trees you should speak for it now, for most of them will be taken by business firms.

\* \* \*

There is a certain amount of humor in President Hoover's Thanksgiving proclamation. Among other things he says: "God has greatly blessed us as a nation in the year now drawing to a close. The earth has yielded an abundant harvest in most parts of our country. The fruits of industry have been of unexampled quantity and value. Both capital and labor have enjoyed an exceptional prosperity." Of course it is not the president's fault that cotton and wheat are below normal in price, that the stock market crashed, and that the unemployment problem is acute in many sections, but that "exceptional prosperity" phrase does sound like he might have his tongue in his cheek.

\* \* \*

If some big concern should notify the business people of Wellington that they intended to start a business in this county that would release \$600,000 annually, these same business men would fall over themselves to get them a location and help get the business started. But there is such a business that is just getting on its feet in this county, and that is the dairy business. When a few bull circles were started, it was believed by some that the business was underway, but it is really in its very infancy and needs considerable encouragement and development.

\* \* \*

I secured the figures about the \$600,000 business from Jeff Greer, who got them from A. & M. You can take a good average dairy cow—that doesn't mean the highest producers, but it does mean pure blooded animal—and such a cow will yield a net profit of \$120 a year even if feed is figured at top prices. Suppose that one thousand farmers had five dairy cows each, and that isn't too many cows for the average farm, each of these men would clear \$600 a year on their cows. With this amount coming from one thousand farms there would be \$600,000 distributed throughout the year in the business channels of Collingsworth County. Think that over and then start putting in a good word for a few cows on every farm.

\* \* \*

Evidently Rufian Cocke doesn't mind growing older. The other night I was in his shop and remarked that it wouldn't be long until this year will be gone. He said: Yeah, but I can spare it. Probably the price of meat has been low during the past year.

## Fruit Shipments From State Show Unusual Increase

Austin, Texas—Shipments of fruits and vegetables from Texas during October showed a sharp gain over those in September, according to Bervard Nichols, editor of the Texas Business Review, published monthly by the Bureau of Business Research at the University of Texas.

"Moreover, loadings should continue the increase during the next few months and reach a peak in April or May," Mr. Nichols said. "The showing in October is exceptionally good in comparison to the poor month of September and is much better than the record of last October."

"During the month, 696 cars of fruits and vegetables were shipped from Texas farms against 90 cars in September and 225 cars in October, 1928. This is the best October for which the Bureau has records. If the present rate of increase continues, a new high record for this industry in the State will be established in 1929."

## The Great American Home

## SIDELIGHTS

Believe it or not. A golfer at Waxahachie, Tex., drove a ball extremely high and it went 90 miles before again coming to the earth. (The ball landed in an airplane which was taking off for a 90-mile flight.)

Her faith unshaken, Miss Sara Livett of Waynesboro, Ga., waited at the church five hours for Eugene Marks, whom she was to marry. Then Marks appeared, soaking wet and without shoes or coat, and the ceremony was performed. The bridegroom had been detained by floods which caused him to travel 150 miles by boat and motor instead of the usual 27 between Augusta and Waynesboro.

Knoxville, Tennessee, boasts of the oldest Indian long past the century mark. It is a wooden one however—one of the tribe that formerly decorated the front of practically every cigar store—and is owned by S. C. Hockenjos, a cigar manufacturer who keeps it as a souvenir of bygone days.

Some African tribes eat much whale meat, which is supplied by British whalers.

## Jots in Jest

Waiting for the breaks doesn't pay. One usually ends up broke.

McNab, who has been appointed to draft a new prohibition enforcement law, is a native of Scotland. In other words the Scot goes after the rye.

One of the hardest blows in life is to realize that the person you reformed isn't worth it.

A pillow has been invented in Europe to prevent snoring. The Chicago Anti-Noise Association ought to get a million of them.

In these modern days if there is smoke there usually is a testimonial, too.

Many a man who roars like a lion at the office is meek as a kitten at home.

Many a person who went long on the stock market is awfully short today.

After laughing at a radio joke Henry Cullerton coughed up a dime he had swallowed two years ago.

## SNAPPY STUFF

One discharge of a shotgun fired by Thomas Agnew of St. Charles, Ill., killed 40 rats about a bag of corn.

Miss Laure Roberts of Stockbridge, Eng., had Judge Ernest Gill arrested for kissing her when she asked his aid in getting work.

Miss Anna Marvin of Chicago led a horse out of a burning stable without difficulty after the men had failed.

Dealers of Glasgow are a fine of \$100 for every they sell.

The inquest over the James Reid of St. Louis suddenly, showed that his weighed 32 ounces.

Dashing through flames which held several men back, Mrs. Mary Porter of Louisville, Ky., rescued her two-year-old baby.

Joseph Connery of Belfast was arrested for kidnapping his own wife after she had left him to live with her mother.

## TEXAS AND TEXANS

By Will H. Mayes

## Llano Corn Yield

Llano county is in a section of Texas where rainfall is unusually light and it has been lighter than usual this year. Despite that fact, a Llano Country Club boy, working under the direction of the county farm agent has grown 110 bushels of corn on two acres of land. The cultural methods used should interest all corn growers. The land, a deep sandy soil, was broken in winter, bedded and rebedded in preparation for planting. One hundred and fifty pounds of 12-4-4 fertilizer were applied to One hundred and fifty pounds of The crop was harrowed while small and cultivated shallow three times.

The production expense was \$25.30. At \$1.00 a bushel for the corn, a net profit of \$84.70 was made on the two acres. Other corn in the same field, with identical cultivation but no fertilizer yielded only 27 bushels to the acre.

## Texas Millionaires

Figuring on the basis of income taxes, Federal treasury authorities find that Texas has 481 millionaires and 13 super-millionaires. Those whose holdings and investments yield them \$50,000 a year are classed as millionaires, and those who have annual incomes ranging from \$500,000 to \$2,000,000 a year are placed in the list of super-millionaires. Not many country editors, columnists or "dirt" farmers are ever caught in either class.

## Leading Cotton Industry

Ginnings made to date this year show that Nueces County, Texas, leads the entire South in cotton production with 122,046 bales. Do Livar County, Mississippi, comes next with 113,492 bales. The ten counties leading in cotton have

produced in excess of 70,000 bales each. Of these seven are in Texas and three in Mississippi. Arkansas is a poor third with 57,554 bales grown in one county.

## Fort Stockton Creamery

Would you believe it? Look it up on the map. A few years ago Fort Stockton was right in the middle of the leading longhorn cow country in Texas, and a Jersey cow was an unusual sight as an elephant. In two months there will be a modern model creamery there, and the farmers are reported as being "jubilant" about it. Not very far back a proposal to establish a creamery would have been answered with jeers. Now \$125 Jersey cows are being shipped into the county.

## Burnet Lead Mines

Burnet county is rich in many things. Its granite appears to be a source of inexhaustible wealth. Its cedars have made fortunes for a number of men. There is enough rock in the county, if quarried to employ an army of laborers for many years. There are rumors of discovery of silver and copper and other minerals in immense quantities. A lead mine has been successfully operated for several years and another is being uncovered that is expected to yield still richer returns. The new lead mine plant is said to be of sufficient capacity to produce 40 tons of ore a day and will give employment to night and day shifts of 40 men each.

## Pecan Marketing Organization

A great need of the pecan industry in Texas is a workable marketing association. At the recent meeting of the West Texas Pecan Growers' Association plans were started for the early forma-

tion of such an organization. A meeting is to be held at Bend, San Saba County December 10th at which ten of the leading pecan growing counties of Texas will have representation looking to the creation of a co-operative marketing plan. The counties that will be represented are Brown, Tom Green, Kimble, Mason, Lampasas, Uvalde, Wharton, Gonzales, San Saba, Guadalupe and such others as may be sufficiently interested to send delegates to the meeting.

## Menard Grows And Plans

Menard now has a complete water and sewage system and is paving about 30 blocks of city streets. Future plans contemplate a high school building commensurate with the growth of the town and a court house to meet the present requirements. The town proudly puts forth the claim that it is the best lighted, best paved city of its size in Texas, and invites anyone who may doubt the statement to "come and see."

## Texas Health Resorts

Texas has a number of health resorts, but whenever a Texan thinks of going anywhere for his health, his first thought is of Mineral Wells. "There is one reason" Mineral Wells is the one place in Texas that has persisted in proclaiming its advantages year after year and has not quit just because a season or two may have been dull. The place that has something worth telling about should "keep everlastingly at it."

Of all the 1929 college football teams, George Washington University has probably the most cosmopolitan backfield. It is composed of an Indian, a Greek, a Jew and a Chinaman.

## Special Announcement to the Buying Public

*That the entire stock of Little Mercantile Co., Wellington Texas, consisting of Dry Goods, Clothing, Shoes, Ready-to-wear, of the best quality that can be bought on the American market.*

*This entire stock has been placed in my hands for immediate liquidation, with definite instructions to sell regardless of wholesale cost. Folks really this is a chance of a life time to buy new and seasonable merchandise at only a mere fraction of their real value.*

*I have only a very limited time in which to dispose of this large stock of goods, and in order to do this, prices have been absolutely slaughtered. Even Come, bring the family. This is your opportunity to save many dollars on your winter*

*Look for the Big Signs. Knowing that this will outstrip any sale ever attempted in this section, some may try to divert your attention with a few specials thrown out as bait. Don't Let Them Kid You. This is a bonafide Quitting Business Sale, and every item in our stock is reduced from 25 to 50 per cent.*

VICTOR CORNELIUS, in charge

# SOCIETY

By Mrs. DESKINS WELLS  
Phone 16

## Mr. and Mrs. Pinkston Entertain Dinner Bridge Club

Mr. and Mrs. S. R. Pinkston entertained the Thursday Dinner Bridge Club at their home last week. Following a delicious dinner bridge games were played. In the games Mrs. J. B. Stevenson was given high for ladies and Senator C. C. Small high for men.

Seated were: Mr. and Mrs. J. P. Sullivan, Mr. and Mrs. J. B. Stevenson, Mr. and Mrs. E. N. Lewis, Dr. and Mrs. W. R. Orr, Senator and Mrs. C. C. Small, and hosts, Mr. and Mrs. S. R. Pinkston.

## Domestic Science Club Meets at Benge Home

Last Wednesday the members of the Domestic Science Study Club met with Mrs. T. E. Benge. Roll call was answered by "A Purchase that has added to the Protection of My Home." Mrs. C. C. Small discussed the "History of Home Sweet Home." Mrs. Stover gave an interesting report on "The Education of the Child." Mrs. Lee C. O'Neil gave "Protection of the Home Through Insurance," and Mrs. Luther Gribble concluded the program with a talk on "Other Forms of Insurance."

The following were present: Mrs. S. R. Pinkston, Mrs. E. N. Lewis, Mrs. W. R. Orr, Mrs. Pink Sullivan, Mrs. Cleo Templeton, Mrs. C. C. Small, Mrs. Luther Gribble, Mrs. Lee O'Neil, Mrs. Bea Stover, Mrs. J. B. Stevenson, and hostess, Mrs. T. E. Benge.

## The "Wehise" Club Will Hold Food Sale Saturday

The "Wehise" Club, composed of the Senior high school girls will hold a Food Sale at the West Texas Utilities next Saturday November 23rd. The girls will sell dressed chickens, sandwiches, pies, candy and many other foods.

The name "Wehise" was chosen for the club because it contains the first two letters of each of the following words: Wellington High-school Seniors. The profit made from this sale will be donated to the Highschool annual. Attend the Food Sale.

## 1924 Study Club Meets at Harper Home Thursday

Mrs. John W. Harper was hostess to the 1924 Study Club at her home last Thursday. The leader for the lesson was Mrs. W. H. Lynn. Roll call was answered by a popular Shakespearean quotation and the following subjects were discussed:

Characteristics of the Age of Elizabeth—Mrs. Clark Anderson. Review of Spencer's Fairy Queen—Mrs. W. H. Lynn. Shakespeare's Life and Works—Mrs. Luther Gribble.

After an interesting program refreshments were served to Mesdames W. H. Lynn, E. L. Winn, M. M. Kern, J. B. Castleberry, Clifton High, C. L. Coeser, Chester Fires, Fred Watkins, W. O. Richards, Luther Gribble, J. D. Wilson, Annie Wall, Clark Anderson and hostess, A. L. Harper.

## Choral Club Meets Wednesday With Mrs. Colvin

Members of the Wellington Choral Club met last Wednesday with Mrs. Andrew Colvin who will direct them again this year. Plans are being made for a concert to be given soon. The club members are working on "Ghosts of Hilo" which will be given as their first entertainment this year.

The complete membership for the year consists of the following: Mesdames John W. Harper, Jim Cook, J. B. Stevenson, C. C. Small, Ben Boston, J. L. Montgomery, E. L. Winn, R. E. Morrow, Lee O'Neil, Aubrey Dobbs, A. L. Cochran, S. K. Parsons, W. H. Lynn, Jeff Greer, E. N. Lewis, V. A. Porter, Misses Mandell and Tomazene Dukeminier, and director Mrs. Andrew Colvin.

## Culture Club Discusses Health at Tuesday Afternoon Meeting

Health was the topic discussed by the Mothers Culture Club at their last meeting at the home of Mrs. S. G. Henry. Mrs. Ernest Lewis led the program in which

the various phases of health culture and maintenance were discussed by various members with interest. Mrs. E. C. Cayton gave a very interesting discussion of the New Conception of Health, in which she explained how modern medical knowledge had done away with many of the old practices and beliefs and supplanted them with new methods based on later scientific discoveries.

In addition to the program on health, Mrs. Ernest Lewis entertained the members with a sparkling review of the social problem in Congress caused by the election of a negro from Chicago. The topic of her talk was "Color in Congress."

Members present at the meeting were: Mrs. S. P. Buster, Mrs. Ernest Lewis, Mrs. E. C. Cayton, Mrs. D. M. Blanton, Mrs. Johnnie Payne and Mrs. S. G. Henry.

## Epsilon Sigma Alpha Meets With Mrs. Marguerite Bartlett

Mrs. Marguerite Bartlett was hostess to the local chapter of Epsilon Sigma Alpha at the home of Mrs. T. C. Fuller on Thursday evening, November 14th. After a short business session the following program was given:

"A Great Woman Writer"—Lula Masten. "Is There a Perfect Country"—Hattie D. Wells. "The Story of the Flood"—Inez Leach. "American Leaders in the Field of Writing"—Mrs. Marguerite Bartlett.

## Junior High P. T. A. Members Meet To Plan Bazaar

Mrs. F. L. Emanuel entertained the members of the P. T. A. at her home Wednesday. The purpose of the meeting was to make gifts to sell at the Bazaar which will be sponsored by the Junior High P. T. A. The Bazaar will be held just before Christmas. The exact date has not been set. Many useful and attractive things will be on sale at this sale. More will be announced about the plans later.

## Miss Nora Smith Is Honoree Tuesday Evening

Miss Nora Smith was honored with a farewell party last Thursday evening by Miss Evelyn Joy Burt and Miss Dorothy Lee Love at the J. L. Burt home. Miss Smith is moving to Slaton to make her home. Bunco was played during the evening.

Refreshments were served by Mrs. C. C. Bishop and Mrs. J. L. Burt to the following Misses: Georgia Montague, Mable Williams, Eula Masten, Argen Hix, LaVerne Hayhurst, Elys Manzer, Annalu Harper, Julia Slough, Pauline Rayne, Carrie Nola Campbell, Dorothy Lee Love, honoree Nora Smith and hostess Evelyn Joy Burt. Messrs. Durward Herron, Alfred Emanuel, Ben Baldwin, Merle Cayton, Garland Hampton, Farris Breedlove, C. C. Small Jr., Harris Phillips, Ellis Johnson, Bill Tyler and Raymond White.

## West Ward P. T. A. Meets Friday For Social Meeting

Over one hundred mothers were present at the West Ward P. T. A. last Friday when they met for a social meeting. A Thanksgiving program was given. Every room in West Ward contributed a part to the program which proved to be beneficial as well as enjoyable.

The Mothers were served refreshments in the School Cafeteria at the close of the program. This was one of the largest attendances ever to be had and the Association hopes to keep up this good record.

The next meeting will be held in December due the next meeting date on the 29th of the day after Thanksgiving.

## Couples Club Meets With Mr. and Mrs. Boston

At 7:30 o'clock Tuesday evening the members of the Couples Club met at the home of Mr. and Mrs. Ben Boston. A delectable three course dinner was served which was followed by bridge games. Mrs. J. N. Wallace was winner of high score for ladies and Mr. J.

N. Wallace high score for men.

Seated were: Mr. and Mrs. Morris Wells, Dr. and Mrs. Clifton High, Mr. and Mrs. J. N. Wallace, Mr. and Mrs. J. L. Montgomery, Mr. and Mrs. Budge Harle, Mrs. Deskins Wells, and hosts Mr. and Mrs. Ben Boston.

The club will meet at the home of Mr. and Mrs. Jack Deahl next meeting.

## Mrs. Starkey And Mrs. Mattox Leave for Beaumont

Mr. and Mrs. Bert Starkey and Mr. and Mrs. J. E. Mattox went to Childress Sunday evening where Mrs. Mattox and Mrs. Starkey took the train for Beaumont to attend the Baptist State Convention.

Mrs. Starkey and Mrs. Mattox are representing the local W. M. U. and Mrs. Mattox was also elected to represent the W. M. U. of the district which includes Collingsworth, Wheeler, part of Childress, and part of Gray Counties.

Mrs. Mattox and Mrs. Starkey plan to be in Beaumont all this week.

## Book Week Observed At Junior High P. T. A. Thursday

The East Ward P. T. A. met Thursday, November 14 at the East Ward building at 4 o'clock. In spite of the snow and cold the attendance was good.

Children's book week, November 17 to 24 is being observed throughout the country, sponsored by the P. T. A. organizations and women's clubs.

The purpose of the week, an annual affair established several years ago is to awaken in the child an interest in reading to establish in him the reading habit. Much of the work is devoted to suggesting to parents what world classics are suited to children of various ages. The program of the afternoon was given to observing this "week."

Miss Masten gave an interesting talk covering: 1. "Early and Modern Reading; 2. "Effects of Good and Bad Books;" 3. "Value of Reading in a Child's School Life." Bro. Joyner gave an excellent talk on the effect of good and bad books on the spiritual life of the child, after which he conducted a round table discussion on books and reading. High points in the Round Table were:

"The habit of reading and enjoying wholesome books is one of the most important elements in the development of any human being. Thoroughly introducing a child in to "Book Land" will do more for him than teaching him all the grammar, rhetoric, and etc. in the world."

For some children, supervision of their reading is all that is necessary. For others interest must be stimulated. Easy reading, even if it is of "so-called second rate books" must be resorted to. There are hundreds of wholesome children's books, while without literary merit, are as harmless as they are appealing and of these, many are to a certain extent word reading. For instance the "Camp Fire Series," "Motor Boat Series," annual Stories by Ernest Thompson Seton and Kirk Munroe. However these books are to be considered as "stepping stones" leading on to Scott, Dickens and all the other classics.

At the East Ward, the greatest need is not for more interest in reading, however, but for more books to read.

The P. T. A. plans to spend \$65 of the proceeds from the operetta, "What's The Matter With Sally" in securing more books. This is far from enough. A list of the books actually needed by the public is asked to give any one of these books or a donation for securing them.

—Reporter, Junior High P. T. A.

## Pastor Here Is—

(Continued from Page One) to this city from Hereford where he has been pastor of the Methodist church for the past three years. Reverend Bowen will probably be in charge of services at the local church Sunday of this week, and he comes to Wellington with highest recommendations of the Northwest conference. Communications from Hereford are to the effect that he is one of the best informed pastors in the Northwest conference and that the Hereford congregation keenly regrets his transfer.

C. F. Carwack has been appointed to fill the Wellington circuit. He has been out of the ministry for several years. J. S. Johnson has been appointed to the Dodsonville church.

W. M. Murrell was re-appointed presiding elder of the Clarendon district, which embraces the local Methodist churches. Reverend Murrell has held this position for the past three years.

## Classified Ads

Dr. E. W. Jones and Lee C. O'Neil returned Sunday from a ten day deer hunt in the mountains of New Mexico.

## Skyrocket Team—

(Continued From Page One)

composed almost entirely of green material, with six men who had never been in a game before holding down "regular" berths.

These odds were simply more than could be overcome in one season, although Coach Smith, who is an athletic mentor of proven ability, devoted his every energy to the undertaking, and although the Skyrockets were greatly benefitted by the addition of Adrian Rowland to their ranks. Rowland, a former Waco player, won a wide recognition over the Panhandle this year, even though the local team won only two contests.

A check of the records shows that the Skyrockets were able to score only 32 points in eight games, while opposing teams scored a total of 151. Following is the results of all games played: Mangum Tigers 19, Skyrockets 0; Wheeler Mustangs 0, Skyrockets 7; Estelline Cubs 30, Skyrockets 0; Clarendon Bronchoes 12, Skyrockets 6; Childress Bobcats 13, Skyrockets 7; Memphis Cyclone 45, Skyrockets 0; Shamrock Irishmen 25, Skyrockets 0; McLean Tigers 7, Skyrockets 12.

Coach Smith has not yet completed his list of those boys who have played sufficient quarters to win a letter, but this will be announced by him at a later date.

### MOVE TO WHEELER

Otto Russell and family moved to Wheeler last week where he has accepted a position to work in the C. E. Stone Company store.

Mrs. Mag Hall returned here Saturday after a two weeks visit with her nephew Henry Cauthen and family near Hedley.

C. M. Thompson and wife of Aberdeen were in Wellington Friday transacting business.

Miss Corinne Allen spent last week-end in Wichita Falls visiting her parents.

Miss Pauline Crabtree and Temple Atkins Jr., attended the football game here last Friday.

Miss Mildred McCaskill were in Wellington Friday to attend the football game.
