

Ochiltree County Herald

OFFICIAL PAPER OF CITY OF PERRYTON, TEXAS.

OFFICIAL COUNTY PAPER OF OCHILTREE COUNTY

VOLUME VI.

PERRYTON, OCHILTREE COUNTY, TEXAS, FRIDAY, SEPTEMBER 14, 1923

NUMBER 32.

RECKLESS MOTOR DRIVERS TO BE FINED

City Marshal Castleberry has declared war on reckless motor driving around Perryton. He is taking this means of giving notice that after all laws for regulation of motor cars will be strictly enforced and that all violators of these laws will be arrested and if found guilty. We think that at this time some of these laws should be enforced for Perryton has a share of reckless drivers, jaywalkers and immature kid drivers. The limit for the town is twelve miles per hour and five miles per hour on school streets. A short time ago the writer saw a party drive up Main Street of our city at a speed not less than 35 miles per hour and a few minutes later he was back down the street at a snail's pace. We understand that one of his farm machines had broken down and he was making a hurried dash for repairs. Well suppose he had not that life have been worth more than all the farm machinery crops that that man or any other in this county owned or ever will own. This speeding should stop and we hope that the only sure cure is a few police court fines. The following are extracts from the Texas Highway Laws and Regulations: "On Motor Vehicles; Motorcycles and Bicycles.—(a) Every motor vehicle other than a motorcycle on the public highways of this state, when in operation, during the hours of one-half hour after sunset and one-half hour before sunrise, and at times when fog or other atmospheric conditions render the operation of such vehicles unusually dangerous, shall carry at the front at least one lighted lamp showing the white light under normal atmospheric conditions at least five hundred feet in the direction toward which the vehicle is facing, and shall also at the rear a lighted lamp extending one red light plainly visible at a distance of five hundred feet to the rear. (b) At the times and under conditions hereinbefore specified in this section, every motorcycle or bicycle, while on the public highway in operation shall carry on its front a lighted lamp showing a light visible under normal atmospheric conditions, at least two hundred feet in the direction toward which the motorcycle or bicycle is facing, and shall also carry at the rear a lighted lamp showing a red light plainly visible from the rear at a distance of five hundred feet to the rear. (c) The following communication from A. B. Spencer, President of the Traffic committee of the West Texas Chamber of Commerce is self explanatory in regard to the work which has been done by that organization in regard to getting a reduction in freight rates from Panhandle points to Kansas City on live stock.

FIRST NUMBER OF SCHOOL LYCEUM COURSE

The Sorority Singers will give a program here on next Wednesday evening at the High School Auditorium under the auspices of the School. This group is made up of four comely young college girls who have been singing together for some time and whose programs have been received everywhere with the greatest enthusiasm. Their voices have been thoroughly trained and the program they present is one that will please old and young. It includes a variety of vocal combinations, and the selections used are of standard and popular composition, with one group of old favorite college songs which is one of the most pleasing features of the evening. The various numbers are given in costume, which adds to the interest. The members of the company are charming young women who win their audience with their gracious manners as well as with their pleasing performance. This entertainment promises to be one of the most enjoyable of the season's Lyceum course.

NEW CITY WELL NOW IN OPERATION

The second of the new city wells was put on the pump the latter part of last week and is proving to be the best well that has ever been put down in this city. It is now putting out water at the rate of over sixty gallons a minute and experienced well men have expressed the opinion that it is good for a greater volume of water. This well was drilled 396 feet deep but the casing was only sunk to the 378 foot depth. With the two new wells in operation and giving excellent service we are assured of a sufficient supply of city water for all present needs. We understand that our city officials are conferring with Santa Fe officials in regard to furnishing them with all water for their trains at this point. If this is done the railroad company would discontinue operating their pumping station west of town and the one at Booker also.

LIVE STOCK RATES TO KANSAS CITY REDUCED

The following communication from A. B. Spencer, President of the Traffic committee of the West Texas Chamber of Commerce is self explanatory in regard to the work which has been done by that organization in regard to getting a reduction in freight rates from Panhandle points to Kansas City on live stock. "We suggest advising your cattle shippers that in case No. 13002 Kansas City Livestock Exchange vs. A. & S. Ry. Co. at all submitted to the Interstate Commerce Commission June 22nd, and alleging that the rates from Kansas City, Mo. to Texas points on livestock, in carloads, including cattle, calves, hogs, sheep and goats, for slaughter, as well as stock or animals, were unreasonable and unduly prejudicial, that the Interstate Commerce Commission in its decision finds these rates are discriminatory to the extent that they exceed or may exceed the rates for similar distances based on the scale applicable over dependants' railway lines between Texas points, and Wichita, Oklahoma City and other points."

ANOTHER RAIN

We received another good rain on last Tuesday night. The gauge in Perryton registered the downpour at .36 of an inch. Some parts of the adjacent territory report a heavier precipitation. This will be fine for the early wheat man.

Mrs. Hattie Allen left Friday for a visit with her daughter, Mrs. Walter Dunn, at Cimarron, New Mexico.

sections the right of way. Be sure and observe this rule.

Never use your muffler cut-out in incorporated cities or closely built up territory far it is unlawful.

Before attempting to turn always give notice to the vehicle approaching from the rear.

Never pass another vehicle that is moving in an opposite direction at a greater speed than 15 miles per hour.

Peace officers are authorized under law to arrest without warrant persons violating provisions of the Highway Laws.

HUNTOON MAN CHARGED WITH FORGING CHECKS

Garland Pray of the Huntoon community was arrested last Monday on a complaint sworn to by W. M. Wilmot, Cashier of the First National Bank of Booker, charging him with forging two checks on the Huntoon Equity. These two checks were cashed on August 9th in this city, one being cashed at the Perryton National Bank and the other at the First National Bank, the total amount of the two checks being \$193.03. One of the checks was for \$84.63 and was made payable to T. C. Smith and the other was for \$88.40, being made out to C. A. Miller. It is believed that both of these names are fictitious as neither of the parties are known in this community. Tellers at the local banks cannot remember the party or parties who cashed these checks. The examining trial of young Pray was to have been held here Monday morning but it was postponed to September 25th by request of the state's attorney.

It is thought by officers that there are others involved in this crime and further arrests will in all probability be made.

JUST A MOMENT

Stop and consider, just a moment, before you criticize some public servant or some one with the courage and pride of their town or city at heart, that is trying to do something. How would you do this or that if the job was given you. Would you have the time, or would you make and take the time. The town and country in which you live is just what you make of it. If it is a dead town, then what are you doing to keep it alive. Are you always too busy to help or too stingy to donate to a good cause.

Take our fair. There are a little handful of men and women that have been working for months to work up a fair that would have for its foundation, an educational value that would be an honor to our city and country in which we live. One where neighbors can meet and discuss their various problems and learn from each other.

The people that have put the most money and time into the fair to date are the ones who will get the least out of it from a personal or business standpoint. Just because you have donated some money, don't think that there is nothing else for you to do or that little money can make the whole thing go. It takes hours and hours of hard work to make something of this kind go over and just a few cannot do it all. Put your shoulder to the wheel and help the officers and the others that are trying to make this fair a success.

Make your arrangements to be on hand and help do some of the thousands of things that will have to be done. Instead of criticizing and blaming the few that are at work, get in and get your feet wet and then you may decide that those that are doing it are doing pretty well. If you have a better plan any of those in charge will be glad to step down and give you the rein and be glad to work by your side.

There will be a lot of work to be done the week before the fair. Mr. Tenney will need the assistance of a lot of good men to build the cattle and hog sheds. Mr. Coffee will need help in getting the farm exhibits in line. If you know of an exhibit, go and get it or help some one else in gathering their exhibits. The above gentlemen will appreciate an offer of your services. The women's department will need several handy men to help them with the various shelves, tables and other display.

So come on in, get in the game and let's put this fair over and make it one that the whole country will be proud of, one that we can look back on in a few years and say that it was well worth the effort.

"WE NEED YOUR FLOWERS"

Any one having pot plants or cut flowers please bring them and have them on exhibition at the Perryton Fair.

Help to make the fair a grand success.

Every effort will be put forth to protect your plants.

Mrs. J. C. Beever, assisted by Mesdames A. C. Witt, D. D. Shanks, H. C. Coffee, W. B. Lilly, G. R. Wilson.

The Herald \$1.50 a year in advance.

ANTI-KU KLUXERS ORGANIZE IN THIS DISTRICT

An organization known as the National Protective League was launched at a meeting held at LeFors in Gray County on last Friday night. This new order is said to be for the purpose of fighting the Ku Klux Klan and it is said that they will put a ticket in the field for the 31st Judicial District in this next election. This will be a good opportunity for some of our good Republican friends to get their name on a ticket in this District. They will at least have the pleasure of saying that they were in the race. The press report that we read did not say anything about Jim Ferguson or George Peddy being enrolled as charter members. Don't see how they could have slighted them. One of the most popular of our indoor sports today is listening to disgruntled politicians and unsuccessful office seekers attribute their defeat to the Klan. We almost forgot to mention, there is an admission fee to join the order for without that it could not exist. In fact their would be no reason for it coming into existence. Few movements like this are started for anything but pecuniary reasons and we are of the opinion that this item in a big factor in this organization which promises to save the country from going to the bow-wows. We predict that this so called Protective League will be short lived and will meet with very little success in the political field, for this great Panhandle country is purely a Democratic stronghold and the pro and anti Klan movements have caused scarcely a ripple on the lives of our citizens.

MANY FROM HERE ATTEND BEAVER FAIR

At least a hundred people from Perryton and vicinity attended the Beaver County Free Fair at Beaver, Oklahoma on Tuesday of last week. They were all enthusiastic in their praises of the exhibits at our neighbors fair and the way in which they treated. W. B. Hanley, county agent of Beaver County, was right on the job in explaining the various methods which have made the Beaver Fair the success which it is and we are sure that our people derived much benefit from this booster and good will trip. Among those making the trip were Mr. and Mrs. J. H. Neufeld, Mr. and Mrs. M. R. Coffee and daughter, Mr. and Mrs. W. D. Tenney, Mr. and Mrs. R. T. Correll and family, Mr. and Mrs. W. B. LaMaster, Mr. and Mrs. Harry Barnes and family, Mr. and Mrs. Van W. Stewart, Mr. and Mrs. Claude Jones, Mesdames C. R. Nelson, Harriet Thornton, W. E. McMillen, J. M. Grigsby, Fred Butler, J. M. Bull, J. H. Shearer, Otis Shearer, W. C. Barber, Thos. Thompson, F. A. Edwards, E. C. Lee, Lois Welter, Ed Morgan and Miss Louise Perry, Messrs. C. W. Callaway, G. R. Wilson, L. L. Price, Fred W. Hood, Guy E. Holt, Walter Allen, H. C. Coffee and J. L. Donley.

SUGGEST A NAME FOR PERRYTON "HI" TEAM

The Perryton "HI" football team is without a name, so the boys have decided to put on a little contest offering a season pass to the one who suggests the most appropriate title for this brilliant bunch of gridiron artists. Various football teams in this vicinity have names, the Amarillo team are known as the Golden Sandstorms, the Canadian bunch as the Wildcats and the Pampa aggregation as the Harvesters. Now here is your opportunity to get a free season pass, think up a name and mail it to Prof. J. F. Meade, the football coach. The judges for the contest will be the members of the High School faculty. Prof. Meade informs us that prospects for a winning team are looking brighter every day. The boys are all hard at work and a good squad is out for practise each afternoon. The first game will be played at Beaver on the 21st of this month. Then a game with some Texas team will follow here on the 29th. The Beaver team will come here for a return game during the fair. As it looks to us Perryton has an excellent chance to cop the Panhandle championship. At least they will be strong contenders for this honor, so let every one of us give all possible support to the boys this year.

PAT WALSH GIVEN EIGHT YEARS SENTENCE

The case of Pat Walsh, charged with rape, which was taken from Hansford county to Hemphill and tried at Canadian a few days ago, resulted in conviction and a sentence of eight years was imposed on the defendant. In our opinion he was lucky to get off with a sentence as light as eight years. Hanging is none too good for people guilty of such a crime as this.

For results in advertising use the Ochiltree County Herald columns.

RAILROAD AND IRRIGATION MEETING TONIGHT

Word has been received from Mr. A. S. Stinnett that he will be here tonight, Friday, September 14th, in company with a number of other gentlemen, to attend a meeting at which the proposed railroad from Amarillo to the north plains will be discussed. Mr. Stinnett was the principal speaker at the meeting held here two weeks ago. He is one of the biggest men in the Panhandle and has much experience in railroad work. In the party will be a man who will have a message which should be of vital interest to every person in the Panhandle. It is a message concerning a project that may revolutionize this entire expanse of broad fertile plains. The message that this gentleman brings to us will probably some day mean that we will grow bountiful crops here every year and not have to worry about the rain fall. This gentleman is a government engineer who has spent more than a year surveying and studying this country with a view of building one of the greatest irrigation projects ever attempted in the world.

He proposes to dam the Canadian River at a point somewhere in the vicinity of the New Mexico-Texas line. This would provide sufficient water to irrigate and water millions and millions of acres and the Canadian River has an abundance of water at certain times of the year. It is said that there is an ideal site for a dam near Logan, New Mexico with a large area for the impounded flood waters of the river to spread over. The point at which it is proposed to build the dam is over 4000 feet above sea level. This means that water would not have to be pumped to any part of the Panhandle for all parts of this country could be reached by gravity.

Just stop and think of this proposition. Why, it has untold possibilities. It would be the making of our country. We have the climate, we have the land, we have the best class of citizenship and if we only had plenty of water, we would have the garden spot of the world. Come and hear these gentlemen talk over this proposition. Come prepared to say a word yourself. Let's pack that High School Auditorium to capacity. Let's show these strangers that the people of this section are 100 per cent behind any movement that gives promise of bettering the conditions of our country.

EDITOR ZIMMERMAN POURS IT ON 'EM

Warren Zimmerman of the Liberal News certainly said a whole mouth full when he wrote the following editorial for his last week's issue: "Conditions and men are surely different in Liberal this fall than in years and years. Go around with a subscription paper for some proposition if you doubt this statement. Years like this show up the good fellows, the real boosters, the city builders." We have the same conditions here in Perryton. At the first signs of hard times, some men throw up the sponge, decide that everything has gone to the bow-wows and just fold their hands and wait for the end to come. But the real town builders, the real boosters roll up their sleeves and hit the ball all the harder.

In another article in the News, Mr. Zimmerman remarks that some people complained about the admission charge at the fair grounds. He also adds, "However we never heard of a single complaint clamoring to get on the guarantee or of it being necessary for the committee which made the event possible having to hide out anywhere in order to keep the subscription sheet from being literally overloaded with names. No, that has not been necessary to date." Yes it is a funny old world, so they say, and it takes all kinds of people to make a world, but we fail to see why they couldn't have made a few more boosters and a few less gripers.

USE THE HERALD FOR YOUR WANTS.

PERRYTON FREE FAIR OCTOBER 2-3-4, 1923

The premium lists for the Perryton Free Fair are now being published by this office and will be ready for distribution next week. 1500 copies of this list have been published and it is believed that this will be sufficient to put one in every home in this trade territory. A part of the premium list was published in the last issue of this paper and the remainder will be found in this issue. Save those copies for use until you get your copy of the list.

All departments report that much interest is being taken and that the exhibits at our first fair will be very satisfactory. At this time we put particular stress on the saving of agricultural products for exhibition purposes. Get in touch with the manager of your community exhibit and give him all assistance possible in the gathering of the exhibits from your particular section. This community agricultural exhibit promises to be one of the features of the fair. The exhibit which will be awarded the best exhibit has arrived and is now on display at the Dunlavy Jewelry Store. Go in and see it and then go out and do your best to see that that beautiful piece of work goes to your district.

The Women's Department under the able direction of Mrs. W. C. Barber is getting along nicely, in fact much better than the other departments. If the men of this town showed one-half the "pep" and enthusiasm that the women are showing, this old fair proposition would be there and over right now. Entries are already being made in the various sections of this department.

Prof. L. L. Price, Superintendent of the School Department has his part of the fair well in hand. The various other departments, hog, cattle, horse, mule, sheep, etc. are coming right along. That old Perryton booster spirit is asserting itself and there is no doubt but what that our fair will be a "hum-dinger".

TO HAVE PERRYTON DAY AT AMARILLO FAIR

Thursday, September 27th, has been designated as Perryton-North Plains Day at the Amarillo Tri-State Fair, by the Fair Board of Directors. It is expected that a large number of people from Perryton and vicinity will attend the Fair on the day. Arrangements are being made for a representative exhibit from this county. The management of the Amarillo Exposition are sparing no expense in providing amusement for the thousands that will visit their first big show. It will be housed in the magnificent new Coliseum which was completed last summer by the citizens of Amarillo.

A BIRTHDAY DINNER

Mrs. Elizabeth Cutter, one of our finest old ladies and one of our earliest pioneer citizens was eighty years of age on Wednesday of last week and in honor of this occasion a big dinner was given at her home in this city. Mrs. Cutter and her family came to this county from Ness City, Kansas in the spring of 1887, there being few families living in this county at that time. She has seen this country develop from a bald prairie with nothing but cattle to one of the most prosperous farming communities in the United States. It is just such people as Grandma Cutter who are responsible for this great change. The real pioneers were those people who came here in the early days and stayed through the lean years of adversity. They were the ones who had the vision of the future in which this country was destined to become what it is today. Mrs. Cutter has been a resident of this county for over 36 years and yet some of us who have only been here a few years consider ourselves pioneers and we are to a certain extent for this country has only started to develop. Within a few years we predict that there will be modern prosperous looking farm houses on every two or three hundred acre tract in the county. Those present at the dinner were Mr. and Mrs. H. T. Cutter, Mr. and Mrs. G. W. Cutter, Miss Mable Cutter, Addison Cutter, A. F. Cutter, Mr. and Mrs. S. C. Brillhart and Mr. and Mrs. A. W. Thurman.

"Love--Home--Money"

The magic multiple of Love, Home and Money is the keystone of every empire. Americans today enjoy the pleasures of its highest development.

The money appeal is man-made, but natural, because in it man sees preservation—for self and those he loves. Ideas of independence for an old age may vary, but the principle to that realization is just the same. To attain the goal, investment is necessary—either in strong box, bank, business, bonds, securities.

The First National Bank can help you, from the first service of a saving department to our experienced advice on sound investments which will earn the greatest profits for you.

Whether your ideas of success be cottage or palace, we can serve you

LEGION WORKER HAS NO LEGS

State Adjutant of the Department of Idaho Does Not Allow Handicap to Interfere.

Handicapped? Lester F. Albert, state adjutant of the Department of Idaho of the American Legion, considers no physical disability an insurmountable obstacle. For this intrepid veteran of the World war, who at the battle of Cantigny lost both legs and suffered other serious wounds, has not faltered in performance of his work since his return to civilian life.

Albert, who was a lieutenant with Company C. 56th Engineers, was in action with the First French army at Cantigny in May, 1918. Two platoons of the company were under his command, as he was in charge of the Searchlight section. Their position was under the direct and heavy shell fire of the Germans during the night of May 27.

One of the German shells ended active service for Lieutenant Albert.

Lester F. Albert.

It shattered both his legs, tore off a finger of his right hand, and inflicted many severe body wounds. Only immediate surgical aid, followed by blood transfusion, was responsible for saving Albert's life.

After a long period in a government hospital at Fort Snelling, Minn., he returned to his home in Idaho, and took up his chosen work as an electrical engineer.

His activity in the organization of the American Legion in Idaho brought him recognition from hundreds of ex-service men of the state and at the first annual convention he was named to the post of department adjutant. He has held this position since that time, and at the last convention was elected for a three-year period.

Mr. Albert's determination for rehabilitation in spite of the injury he suffered has won the admiration of Legionnaires all over the country. In noting the enthusiasm with which he carries on his work, the extent of the injury is never thought of. He considers that physical handicap will not thwart progress if determination is a factor in the fight against it.

DISABLED FELLOWS SHOW PEP

Legion Rehabilitation Officials Find Afflicted Men Make Good If Given Fair Chance.

It has always been the contention of American Legion rehabilitation officials that if the disabled man is given an equal start with those about him, the "vet" will come through with flying colors. This is borne out in many instances, but in perhaps none more clearly than at the North Dakota Agricultural college, where 106 Veterans' Bureau trainees are in attendance.

Names of five of these ex-soldiers were on the honor roll of the school when it was announced, a proportion of approximately 20 per cent of the total number of trainees enrolled as against 1 per cent of the other students who succeeded in making the honor grades. The average grade of these five veterans students was 92.6 per cent for the quarter.

The veterans are also active in campus affairs. Every officer elected at a meeting of the Draftsmen and Builders' club at the college was a trainee. Burton Odekirk, a trainee, won outstanding honors as a judge of live stock when he was a member of the college team at the National Live Stock show at Chicago in competition with teams representing the other schools.

Harry Eckman, an ex-service student at the School of Agriculture of Minnesota, has won a medal for cattle judging in competition with a large class of other live stock students.

A Market Overlooked.

Excitedly the manufacturer of the World's Greatest Insect Exterminating Powder burst into the export manager's office.

"Hey!" he bellowed. "Have we got an agency in Egypt?"

"Why-er-no, sir."

"Well, why ain't we? I see a movie of them pyramids last night and it says they were covered with millions of hieroglyphics."—American Legion Weekly.

Legion Band and Drum Corps. American Legion bands and drum corps are getting to be the common thing in Minnesota cities. Recently Northfield, Hutchinson and Red Wing Legionnaires formed the corps, and recently the Pine City post took over the home town band. Legion musical organizations already existed at Duluth, Rochester, St. Paul, Minneapolis, Silver Lake and a number of other places.

INSURANCE GROWING CHEAPER

Not long ago the United States Bureau of Labor Statics reported that electricity was only the large item in the cost of living which had shown any reduction in cost to the consumer since 1917.

Whether or not this indicates a recognition of the truth that the expense for fire insurance protection represents only a small percentage of the individual overhead is not made clear, or whether it was merely an oversight of the Bureau in overlooking this bulwark of modern society. It is a matter of record, however, that between 1912 and 1922, the average rate charged in the United States for fire insurance coverage declined to the extent of 7 cents for each \$100 of insurance carried.

The astonishing feature of this situation is the fact that the reduction took place in the face of heavy advances for railroad fares, rents, supplies, wages, advertising and other necessary expenses.

ers with white uppers. 32-2t-cDAIRY
FACTS

GOOD SIRE MOST ESSENTIAL

Dairy Farmer Urged to Stop Working
for Scrub Bull and His Un-
profitable Progeny.Look to the future of your herd—
the herd of tomorrow, and cease work-
ing for the scrub bull and his scrub
progeny, and get a good purebred bull
that will work for you and build up a
high economical producing herd.Study of the yearly production re-
cords and feed costs of 8,094 cows in
a report of the United States Dairy
Division shows the following results:Cows that produce 100 pounds of
butterfat in a year, with an average
feed cost of \$34, gave a return of \$10
over cost of feed; cows that produced
300 pounds of butterfat per year, with
an average feed cost of \$40, gave a re-
turn of \$42 over cost of feed; cows
that produced 300 pounds of butterfat
per year, with an average cost of
\$58 for feed, gave a return of \$74 over
cost of feed; cows that produced 400
pounds of butterfat in a year with an
average feed cost of \$70 gave a return
of \$100 over cost of feed.Thus it is shown that as production
of fat increases, feed cost also in-
creases, but not in proportion, and the
income over the feed cost also in-
creases. It costs twice as much to
feed the 400-pound fat-producing cow,

Coats for Crisp Fall Days

Our Coats for Ladies and Children are especially attractive this
fall. We have the charming straight lines which are so becoming
to every woman. Choice of many combinations in the blending co-
lors of the latest styles. Fabrics of the latest weaves. Straight
lines, large collars. Stunning effects. See them at your first op-
portunity.

FALL WEAR FOR MEN

Overcoats and Suits of the finest material and expert workman-
ship are now on display here—garments that you can wear with
satisfaction and confidence anywhere. You surely will be pleas-
ed with both the variety and our prices.

SWEATER TIME

Sweater time is here and we are prepared to fill your wants in
this line. These early Fall days demand the light wrap and the
Sweater fills the bill. All colors and styles for Men, Women and
School Boys and Girls.

Don't Forget To Come And See Us

A Good Purebred Bull Will Aid Mate-
rially in Increasing Dairy Profits.but she makes ten times as great a
return over feed cost, and "what is
left after the bills are paid" is what
interests all of us.A good purebred bull, plus good
feed and care will help you to produce
the above results.—F. E. Ball, Deputy
Colorado State Dairy Commissioner.

GIVE CALF SEPARATE STALL

Make It Possible to Prevent Spread
of Various Diseases Among
Young Animals.The best breeders have come to the
conclusion that it is highly desirable
to provide every new-born calf with a
separate stall for at least a period
of four or five weeks. Men who have
been studying the young calf declare
that at the time of its birth it is likely
to be infected with a variety of germs
which are apt to cause trouble.By investigating the contents of the
calf's stomach, in order to determine
the kinds of bacteria it contains, a
number of disease-producing bacteria
have been found. If several young
sters are kept in a stall together at
this early period, the chances are, if
one is infected with a certain disease,
that all will have the same trouble.
The separate calf stall makes it easy
to prevent the spread of these various
calf diseases and by keeping calves in
separate stalls for four or five weeks,
the usual time of infection, many of
the common ills will be eliminated.

CHURNING TROUBLE CAUSES

Ordinarily Weather Is Determining
Factor, Being Either Too Cold or
Else Too Warm.Churning troubles are due occasion-
ally to the feed or to the fact that it
has been some months since the cows
were fresh. Ordinarily the trouble is
caused by the weather; the cream is
either too cold or it has been made
too warm. Cold weather holds back
the ripening of the cream, also, and un-
ripe cream makes trouble in the churn.
The best plan is to keep the cream in
a warm enough place so it will ripen
as it does in summer, and then to
churn with the cream at a tempera-
ture of 60 to 62 degrees. Cream some-
times makes trouble if the cows do
not have plenty of salt.Put Cows on Record.
Get acquainted with your cows;
they might be cheating you. The way
to do it is to enroll in the Cow Test-
ing association and put them on
record.Delivered Cattle Best.
Dehorned cattle bring better prices
on the market and also cause less dis-
turbance in the feed lot.Raise Their Own Cows.
The most successful dairymen raise
most of their cows.

Your Groceries, Madam!

A Phone Call No. 121 will bring prompt response
and prompt delivery of your Grocery order. We'll
do the selecting with same care you would your-
self. Give us a trial.

CANNED GOODS

GRAIN INSURANCE---

The grain market is now on an upward
trend and many are deciding to hold their
wheat, barley, oats and other grain in hopes
of obtaining a better price. But you should
insure and we advise you to protect yourself
by taking out a Short Term Grain Insurance
policy with us. Don't have the seasons labor
ripped out by a carelessly thrown match, a
bolt of lightning or one of the many other
things that start fires. Come in today and
let us explain this very attractive policy to
you.

DAIRY
FACTS

TANK HEATERS ARE FAVORED

When Milk Cows Are Watered Frequently It Is Poor Policy to Supply Ice Water.

When a cow drinks water, her body at once sets to work raising it. If necessary, to the same temperature as exists normally in the body. In order to warm the water taken in, heat is just as necessary as it is to warm a kettle of water on the stove.

To provide the heat necessary, the blood and internal organs give up a portion of their supply until more is supplied from food previously consumed. As the milk cow is a heavy consumer of water, much heat is required to warm it. Consequently when cows are allowed to drink water that is very cold, a high percentage of the feed eaten is required to heat it. If it is true that some heat is being given off from the body all the time and when the amount of water taken in at one time is small the loss is unimportant. But when the cows are watered only once or twice daily, and then get near ice water, they are likely to suffer injury and more feed is necessary. Stated briefly, it is a question of balancing good feed and the cow's time digesting it, against the cost of a good tank heater and a few pails of cobs or coal. The man interested in getting the most out of his cows and in their comfort will not expect them to be their own tank heaters.

SILAGE READY WHEN NEEDED

Mistaken Idea to Think That Certain Time Must Elapse Before Feeding to Stock.

What is the best time to begin feeding silage, is a question which is interesting many dairy farmers.

The specialists on live stock feeding say that the time to begin using silage is when the dairyman needs it; they feel there is no justification for the idea that a certain time must elapse between the filling of the silo and opening it for use.

Experiments made at the state colleges of the country indicate that fermentation starts almost as soon as the corn is placed in the silo, and that the greatest change takes place during the first five days after filling. After 12

Fermentation of Silage Is Complete After Twelve Days.

days, fermentation is practically complete, and the silage undergoes very little modification after two weeks.

Some farmers do not know that silage will keep for a long time. Experiments indicate that silage is as palatable after several years as that which has been kept only a few months.

Although moldy silage apparently does not injure mature cows, it has been found to affect the health of calves and horses. To be on the safe side, careful farmers discard the moldy silage from the top of the silo.

REAL VALUE OF DAIRY COW

Most Reliable Method is to Figure Her Actual Butterfat Production by Weight.

The most reliable way of getting at the real value of a dairy cow is to figure her actual butterfat production. This can be done by weighing the milk produced by each cow and by determining the per cent of butterfat through occasional tests of the milk with a Babcock tester.

COMPARATIVE COST OF COWS

Cheaper to Milk and Feed One Animal Giving Large Yield Than It Is for Three Scrubs.

It is much cheaper to milk and care for one cow giving 300 pounds of butterfat in a year than it is to milk and care for three cows giving 100 pounds of butterfat each, and if the 300-pound cow is heavily fed she will not eat as much as the three 100-pound cows.

Drawback to Dairying. Perhaps the greatest drawback to the dairy business is that a cow will produce a little milk, no matter what she is fed. Too many dairymen are satisfied with that little bit.

Beware of Lazy Bull. Beware of the undersized, lazy, dull-eyed bull; he is never a money maker for his owner.

Success in Dairying. To be successful in dairying, have good cows and feed them properly.

DIVERSIFY—DON'T PIDDLE

This is an age of specialists. The services of the man who knows one subject thoroughly, whether it be medicine, agriculture, engineering or what not, are in greater demand than are the services of those people who have scattered their efforts in learning something of many things without getting a thorough knowledge of any one subject.

To a certain extent the farmer should specialize. He should specialize in the production of those crops or products for which his soils and climate are best adapted, his markets best suited, and about which he knows most. We can't agree with those who preach unbridled diversification. A farmer needs two and in some cases three money crops, a major or most important money crop such as cotton in the South, and one or two minor crops such as dairy products or poultry products or grain. He should of course produce the greater part of the living for the farm family and the farm stock. When this is accomplished, there is conservation diversification. The farmer has not scattered his efforts in attempting to produce small amounts of five or six crops for the market. He has diversified sufficiently to insure himself against disaster in case of a market slump in his major crop, but at the same time he has confined his energies to a sufficiently small number of crops to become adept in their production and marketing. The farmer who tries to grow a little of everything for the market does not often become proficient in the production and marketing of any one crop.

There is probably a larger number of farmers who are failing to make good because of one-crop farming than there are farmers who have carried diversification too far. However, it is never a good plan to carry a good idea to extremes. Practice sane and conservative diversification but don't become a "piddling" farmer. —The Progressive Farmer.

Mrs. E. H. Synder of Ripley, Oklahoma and Mrs. B. M. Hill of Glazier, Texas left Monday for their home after a few days visit with Mrs. Snyder's son, Roscoe, of the Farmers and Stockmens State Bank.

DEEP DISH PIE RECIPT

A deep dish blackberry or blueberry pie is much appreciated by a hungry family. Take an enameled ware bake dish of a proper size to fit the family. Place in the bottom of the baking pan an enameled ware cup upside down. Of course, the dish must be deep enough so that the cup reaches, but does not extend beyond the crust, which it supports. The cup collects the juice from berries and keeps it from making the top crust heavy and from overflowing.

Put in the berries, allowing for every cupful a tablespoon of sugar. This is not a great deal of sugar, even for these days when we are trying to economize in that direction. Roll out the piecrust rather thick; butter the edges of the enameled ware bake dish slightly and put on the piecrust cover. Bake in a slow oven and serve either hot or cold. Milk is a great addition to this dish or better yet cream, if one can afford that luxury. After two or three slices of the pie have been cut the cup can be removed and juice that has collected under it put over the slices already cut.

A SUGAR-SAVING HINT

When one is trying to save sugar, it is well to remember a household hint which came to the fore and was tried with success during the war. This is that in making lemonade or any drink of acid fruit, the sugar will go much farther if added just at the end of the mixing. For example, suppose one is making lemonade. Take an enameled ware pitcher and for each pint of water used, put in the juice of half a lemon. If oranges are to be had, the juice of one orange to three lemons makes a good proportion.

Cut one lemon peel into very thin strips and add to the mixture and set the whole away in the refrigerator. Just before pouring into glasses add the sugar. It will usually be found that half the amount of sugar one would have used, had the regular method of mixing the sugar and water before adding the lemons been followed, will be sufficient. In other words, a tablespoonful of sugar to a pint of the mixture will make a drink sufficiently sweet to please most palates.

Washington as a Mason

Alexandria, Va., was chosen as the site of the \$4,000,000 George Washington Masonic National Memorial. The first president was the Worshipful Master of Alexandria Lodge No. 22 of that city which is just across the Potomac from the national capital. This is the custodian of many priceless relics of the Father of His Country and owns the famous Williams portrait of Washington, by many considered the most truthful of all the portraits of him extant. The cornerstone of this imposing edifice was laid Thursday, November 1, 1922.

Get your boy a pair of heavy Khaki Knee Pants at Montgomery's Store. They won't wear.

MONEY TO LOAN

OCHILTREE COUNTY HERALD

Published Weekly by
THE STEWART PRINTING CO.
Paul F. and Van W. Stewart Editors

Subscription price: \$1.50 a year
strictly in advance.

Entered as second class matter,
October the 10th, 1919, at the Post
Office at Perryton, Texas, under the
Act of March 3rd, 1879.

Published Weekly on Friday

All copy must be in this office by
Wednesday noon to insure publica-
tion.

A grasshopper may not be as wise
and thrifty as a honey bee, but he
makes a better bass bait.

The new automobiles seem to have
about every conceivable sort of im-
provement except softer bumpers.

No man can be happy without a
friend, nor be sure of his friend till
he is unhappy.

Fashion says women will wear
more furs next winter. And if they
don't get it, watch the fur fly.

There is nobody so hopeful as the
political candidate who hasn't a
chance.

President Coolidge is dry, they say.
So are millions of other Americans,
some of them involuntarily.

Another version. Get rid of the
dimes and the dollars will get rid
of themselves.

Sometimes, even when a man gets a
good run for his money, he has to
walk home.

The wildest dancing lately was in
Beloit, Wis., when esthetic dancers
saw a mouse.

Some people seem to have an idea
that they can liquidate a debt by pay-
ing compliments.

The measure of wealth, the value
of what we possess, depends upon
what it takes to make us content.

One would imagine all those chan-
nel swimmers would delay boat sched-
ules.

"We speak American" is suggested
as the new slogan. Some of us surely
do.

The man who sits by the side of
the road to be a friend of man these
days will get a lot of dust from au-
tomobiles.

Many men seek fortune in order to
be independent; they should, rather,
seek character, the only true source
of independence.

Alice—As people grow old I like to
see them still keep up with the fash-
ions. Agnes—Yes, we never grow too
old to acquire the latest wrinkle.

There would be fewer automobile
accidents if people would start home
a little earlier at night instead of try-
ing to make up for lost time.

Perfumes today must be much more
skillfully blended than even a few
years ago; the cruder scents have al-
together lost popularity.

Perpetual pushing and assurance
put a difficulty out of countenance,
and make a seeming impossibility
give way.

"Iowa girls demand military train-
ing." These stories are so exagger-
ated. All they ask is the right to
bare arms.

When the boss thinks he isn't earn-
ing his salary, he spends a conscien-
tious hour nagging at those who do
the work.

The country will have to choose be-
tween a political platform put up by
the sky-crackers, or a fairly sane
and conservative program.

The American Venus has changed
from the perfect thirty-six to the
perfect thirty-four, but there is de-
mand for ankles larger than pipe-
stems.

With immigration restricted the
country may be better able to absorb
the millions of college and high
school graduates and let business and
industry make Americans of them.

Most modern and up-to-date dairy
barns have cork floors for the high-
brow milk producers to stand on—it
rests their feet. If a farmer's wife
gets a patch of linoleum in the kit-
chen to caper on she is pretty well sat-
isfied.

Among the great American sports
is averting coal strikes.

When we look at our three-mile
rum line, we are led to wonder what
our tourists find to drink in Europe.

Wild oats are easily sown but some-
times difficult to harvest and the mar-
ket is always overstocked.

Discipline is a good thing, and hus-
bands who have to sew on their own
buttons seldom sow any wild oats.

A Louisville girl who "has not
reached her majority" has had two
divorces. She has reached her plura-
lity.

If the old gag about living on the
interest of what one owes could be
realized upon, Germany should be by
this time well off.

After all, is there a better policy
for our country than one that will
keep the most dinner pails filled and
carried every day in the year?

Prohibition is still in its infancy
in America says one of its advocates.
In some parts it certainly seems to be
still on the bottle.

It has almost gotten to the point
where a wife will divorce her hus-
band for such a trifle as his inability
to support her. In the good old days
that was considered sufficient grounds
only for taking in boarders.

The New England states seem to be
in favor of a few large railroads sys-
tems, under able management of real
railroad men, instead of many little
jerk-water lines, all maintaining an
overhead of officials.

The man who is right in a quarrel
should be cool enough to apologize
and admit that he is the wrong. Of
course the fellow who is conscious of
being in the wrong can't afford to ad-
mit it.

Your hospitality should not extend
to letting the flies eat with you.

Scientist says lady mosquito does
all the biting. Then she's no lady.

Perhaps every married man wants
to have a "den" because he knows
that he already has a keeper.

Occasionally you see a drug store
so new that it hasn't gotten its quota
of boy loafers who have just passed
the spanking age.

Easy way to remember people's
names and faces: Pretend to your-
self that they all owe you money.
Patent applied for.

Something in the argument of the
Indianapolis Star that motorists who
blame the railroads for all crossing ac-
cidents should remember that the
trains stay where they belong.

What do the political parties and
advocates of government ownership
and increased regulation of private
and industrial activity promise the
people that would equal, or in any
way compare with the deals which
Washington and Lincoln struggled to
maintain? Think it over.

Topeka State Journal—At Charles
City, Iowa, a deputy shreiff out for
rum runners, hailed two boys pass-
ing in a motor car. The boys, sus-
pecting robbery, undertook to flee and
were fired upon. One of them is dead.
This is one more added to the thou-
sands of indictments against gun
toting.

STOP THAT ITCHING

HUNTOON NEWS

Broom corn seems to be the most important factor of the community. Everyone is preparing their broom corn for the seed.

Huntoon School opened September 3rd, with R. O. Ford, principal, Miss Clara Cummins, Intermediate and Mrs. Inez Pletcher, Primary.

Preaching service was held in the school house by Rev. Meadows of Canadian.

A surprise birthday dinner was given Sunday at the home of R. R. Morris in honor of Mrs. Morris. The following were present: Mr. and Mrs. J. T. Morris and family, Mr. and Mrs. L. B. Crisk and family, Mr. and Mrs. R. E. Pray and family, Garland Pray, Leona Ellsworth, Faye, Katie and Jesse Morris.

The Misses Celestine and Marie Pearson, who are attending school at Huntoon visited home folks in the Balko community Sunday.

Mr. and Mrs. L. Hollis took their small daughter to Shattuck on September 5th, where she had her tonsils and adenoids removed. She is getting along nicely.

Charlie Slater who is driving the school truck moved his family to Huntoon Saturday. His former home was near Balko.

Miss Katie Morris is visiting her brother, J. T. Morris in Perryton this week.

Carrie Crawford of the Gray community was in Huntoon Saturday on business.

Mr. and Mrs. Frank Mathis were baptised on Clear Creek Sunday afternoon. Several of the Huntoon people were there.

D. D. Hummer is suffering from another attack of heart trouble.

The Misses Gladys and Pearl Morgan have moved to Booker where Miss Gladys will teach and Miss Pearl attend school.

Our school organized two Literary Societies Friday, "The Washington" and "Panhandle Best." Miss Marie Pearson and Miss Barbara Hurter were elected president and secretary of the Washington society. Miss Vivian Hurter and Miss Inez Langhorn of the Panhandle Best. Each society is to entertain the remainder of the school once every month. The Washington society will entertain first, on Friday afternoon, September 21st.

Parent Teachers Association will meet Friday evening, September 14th. Everyone come as this will be election of officers.

Otto Rochrig, registered Optometrist in Texas, will test your eyes with the Prisoptometer, Punctometer and Trial Case. He has made Ochiltree County since 1911. Will be at North Rooming House latter part of this week and part of next. Anyone desiring work leave word at North Hotel. All work guaranteed. 32-1tp

Lindsay A. Nunn, business manager of the Amarillo News was a visitor here last week working up some special write-ups on the Perryton Free Fair. Mr. Nunn informs us the arrangements have been made whereby his paper will put out an early edition which will reach Perryton on the Liberal mail at eleven each morning giving the very latest news. This morning paper will get here on date of publication and will give all wire news up to 8:45 preceding evening.

Use The Herald For Your Wants.

LIGHT BEARER'S CLUB ORGANIZES HERE

On Tuesday night of last week the Light Bearer's Club No. 1 was organized at the Christian Church. This club which is for young men and boys will meet at the church every Tuesday evening at 8 p. m. The officers elected are as follows: James Coffee, President; Ralph Shearer, Vice-President; Jack Todd, Secretary; Irwin Hergert, Treasurer; Seldon Caradine, Walter LaMaster and Walter Nies, Cabinet Members; M. R. Todd, Sam Hergert, C. W. Callaway, B. B. Kent, B. H. Pittman and E. C. Carver, Directors. The following new members were initiated at the meeting: John Smith, Eugene Wilson and Cyrus LaMaster.

Following the regular meeting a banquet was served by the club members to the following guests: Bernice Fulton, Blanche Todd, Alta Todd, Mildred Todd, Mary Coffee, Beatrice Fulton, Gertrude Smith, Evelyn Fulton, Jewell Balzer, Essie Todd, Katie Shearer, Miss Elmore, Mrs. W. D. Fulton, Mrs. J. M. Cummins, Mrs. M. R. Todd, Seldon Wallis, Paul Packard, Rolland Shearer, Pat Shollenbarger, J. W. Jines, Orville Jines, and Jilton LaMaster.

For Cakes, Pies, Jelly Rolls and all kinds of home baking call Mrs. H. C. Morrison or Mrs. W. D. Fulton. 32-tf-c

CONCERNING TAXES

Those who have the say about the expenditure of tax moneys frequently speak of the wastefulness of armies and navies. They wish, as does every one else, that such national safeguards were unnecessary and that the funds needed for their maintenance might be diverted to serve other purposes.

But as a rule, they have very little to say about our standing army of tax collectors and spenders, which is more than five times the size of our army and navy combined. In this connection the recent report of the taxation committee of the Michigan Bankers' Association is particularly interesting.

The committee asserts that, in the past fifteen years, more than 1,000,000 laws have been passed in the country to control the lives and business activities of our people, and that one individual in twelve of our population is supported by the tax-paying public in one way or another. In the state of Michigan, 50 per cent of the wealth newly created every year goes to pay for government, state, local or national.

The United States government pays salaries to 700,000 civilians and the several states have more than twice that number on their payrolls. Add their families and dependents and you will understand the surprising totals and the cost of our governmental housekeeping.

Is it any wonder that tax-free securities are popular, and that so many supposedly upright citizens are to be suspected of forgetfulness in the matter of their tax return? Is it any wonder that most business men hold up their hands in horror at the thought of government ownership or operation of utilities?—Evansville, Ind., Courier.

Use The Herald For Your Wants.

HOOKEE IS ASSURED OF ANOTHER RAILROAD

The Beaver, Meade and Englewood Railroad Company announces that on August 4, they made application to the Interstate Commerce Commission in Washington D. C. for permission to build a railroad from Forgan, Oklahoma to Hooker, a distance of 39.2 miles, stating that the present and future public convenience require the construction of the line. That Hooker needs another railroad is not to be doubted. At the present time we are paying interstate rates on every thing that comes in and goes out. On gasoline it would mean a saving of over 1 per cent per gallon. On wheat it would mean that the Hooker elevators would be able to pay from 10 to 15 cents more on the bushel. It means that Hooker would be on a direct line with Oklahoma manufactures and derive the benefits of trading with industries within our own state, with out paying an excessive rate for crossing a state line. It means that Hooker will become the metropolis of the southwest.

Liberal has tried hard to complete the Byers road to Forgan in order that they might have some remonstrance to put before the commission when the B. M. & E. made application to build. The two roads would have parallel lines for several miles and would have no doubt caused the abandonment of the project to build to Hooker. With the Byers road in the hands of the receivers and no chance for completion to Forgan, there is absolutely no protests that could be made that would stand before the Commission.

But the Panhandle is coming into its own. Oklahoma has claimed us and the building of a road from Forgan to Hooker is the connecting link. Business men of Woodward, Elk City, Oklahoma City and other cities down state are pulling tooth and toe nail for the extension and the Advance hopes that it will not be many moons before we can announce that the permission has been granted and the work started.—Hooker Advance.

County Clerk David D. Shanks returned the fore part of last week from a vacation trip to Abilene and other central Texas points. Mr. Shanks mother, Mrs. M. D. Shanks, of Abilene accompanied him home for a few week's visit.

Coming Soon

Just a few more weeks now and old JACK FROST will sweep down from the north, and turn this hot August weather into bitter cold, with sleet and snow.

How to make the old house warm and comfy for the long winter months will be the big question.

We have the answer in SHEET ROCK. Economical, fire proof and everlasting.

Easy to put up, and will give a touch of elegance to any room.

We will be pleased to give you and estimate on one room or many.
