Serving the Counties of Borden, Dawson, Garza, Howard, Lynn & Scurry

LEDBETTER TO BE WRITE IN CANDIDATE

Herman Ledbetter has announced that he will be a write-in candidate in the November 6 General Election for the office of Commissioner, Precinct 1 of Borden County.

Ledbetter expressed his reasons for the move saying, "I

have had lots of encouragement from my friends and neighbors or I would not think of trying for a write-in candidacy.

"I feel that I have served the office of Commissioner Precinct 1 very well and if the voters in my precinct see fit to vote me back into office, I will continue

to do the best that I can," said Ledbetter. "I want the job and I have sufficient time to devote to the duties of the office."

He filed a Declaration of Write-In Candidacy for the precinct one office with County Judge Van York last week.

PHIL GRAMM NAMES COUNTY CHAIRMAN

U. S. Rep. Phil Gramm, candidate for the U.S. Senate, has named John Anderson of Gail as chairman of the Phil Gramm for Senate campaign in Borden County.

"I am honored to have the active support of key leaders in the economic, political and civic life of Texas," Congressman Gramm said in making the announcement.

"We now have county

chairmen and steering committees working in more than 200 counties across Texas," Gramm said. "Strong grassroots organizations like this are gathering strength for campaign."

Congressman Gramm, of

Big Spring, is seeking the United States Senate seat being vacated by U.S. Sen. John Tower.

He holds a Ph.D. in economics and is the co-author of President Reagan's economic recovery program in the Congress.

WE'VE GOT THEM ON THE RUN, BOYS.... The Coyotes came out victorious by a score of 39-14 in the season opener last Friday night.

COYOTES SINK DAWSON

The third time must be the charm because often two years of defeat, the Coyotes tasted the thrill of victory. "We were very excited before the game and we wanted to be the first team to defeat Dawson," said Coach Frisbie. Dawson's only loss the last two years were to the state championship team, Highland. Dawson scored on its first possession with the ball,

keeping it for about six of the first ten minutes of the game. "We played well and stayed with what we wanted and needed to do and did not get excited that early in the game," stated the coach.

Chris Cooley carried the ball 21 times for 196 yards and Dennis Buchanan carried 13

SEPT. 30 LAST DAY FOR CROP INSURANCE

Big Spring, Texas--September 30 is the last day to apply for Crop Insurance for BARLEY and WHEAT in BORDEN County, Texas, according to Dottie Sampley, District Director for the Federal Crop Insurance Corporation (FCIC).

Crop Insurance covers unavoidable loss of production resulting from adverse weather conditions, wildlife, earthquake, or fire.

"Three coverage levels (50, 65, or 75 percent) are available for insurance protection. Additionally, FCIC offers three optional price elections for valuing production lost or damaged," says SAMPLEY.

"To assist producers, the Federal Crop Insurance Corporation will cost-share up

THE COYOTE MARCHING BAND IS ONE OF THE FEW BANDS WHO SUPPORT THEIR TEAM EACH FRIDAY NIGHT.

COMMISSIONER'S COURT SETS TAX RATE

The Commissioners' Court of Borden County, Texas meet on August 27th with all members present.

There were no visitors in attendance at the Budget Hearing and the budget was approved as made public.

The tax rate was set at 16 cents per \$100.00 valuation. The motion was passed to offer

split payment of taxes and to give discounts of 3 cents, 2 cents and 1 cent for early payment of taxes in October, November and December, respectively.

During the meeting, the motion carried to use Revenue Sharing money for County road improvements.

The First pep rally of the season was short but apparently long enough to put the team in a winning mood Friday afternoon.

COYOTES WIN

times for 68 yards. Dawson's defense was watching for Cooley which allowed Buchanan to really run well up the middle. Bric Turner played well on offense and defense

"Our defense did a super job the second half, we adjusted our defensive ends at half time and played the run more with our line-backers. Dawson made two first downs the last twenty minutes of the game.

Coach Frisbie stated that he played every boy on the squad, some only on kick-offs and extra points; but all players saw some action.

The Coyotes host the Three Way Eagles Friday at 7:30 p.m.

Jeanette Massingill,
Coyote Mascot.

YOUNG PENS WRITE THEIR FAVORITE.....

MY FAVORITE

My favorite person is someone who is kind and considerate to me. I think that kindness and consideration is a great way to begin an everlasting friendship. This person is always in a joyful and happy mood and she always has something good to say about everyone. She is the ideal friend that everybody should have. I am very fortunate to have such a great person as my friend! Ralynn Key

MY FAVORITE

My favorite aunt is my aunt, Catherine. She is a really neat person. Catherine always seems to be happy whenever I see her. Because she lives in Michigan, her visits are more fun and special. Catherine is always willing to sit down and talk or play a game with me. I especially like her gifts. For graduation I received a scientific calculator, which will really be helpful in high school. I wish I was more like Aunt Catherine.

Shelly Lewis

MY FAVORITE

My favorite Class is Vocational Agriculture. I enjoy it because I think it is the most interesting. For example, now we are studying different breeds of cattle that are common in our area. I know some of what we're being taught, but there is a lot about the cattle I don't know, like the origin of a breed or the weight. Those are the most interesting things.

Later in the year, we'll work in the shop on some craft project. I'm looking forward to that because I like to build things. We'll learn how to use different kinds of saws and other tools.

Will Phinizy

MY FAVORITE

My favorite color is purple. On bright cheery days I like bright purples. On days that seem kinda dull I like dull purples.

My favorite dessert is Strawberry Shortcake. Lot's of poundcake, piled high with sweet juicy strawberries, then topped with lots of whipping cream. Sure does sound good.

Mindy Williams

MY FAVORITE

My favorite place to visit is Victoria, Texas. It is near Corpus Christic. This summer my family and I went down there to visit my sister. She was living down there for the summer because she is a Chemical Engineer working for Mobil Oil Company.

Victoria is a small town. It's a little smaller than Big Spring. The best part about Victoria is the fact that it is so close to other towns. It's about 40 or 50 miles to Rock Port, about 60 miles to

San Antonio and about 100 miles to Corpus Christie. There are other towns nearby such as Port Lavaca, Port Transis and few other small towns.

Joanie Wilson

MY FAVORITE

My Favorite thing to do is shooting. I like shooting because it is easy on me and I win every once in a while. Trapshooting is my favorite. In trap you shoot one bird at a time. The A.T.A. is lots of fun. One can win a whole lot of money in the A.T.A. or can also loose some too. I like it because it is fun.

Kerry Fryer

MY FAVORITE

My favorite friend is Kim Turner. We like most of the same things. She's fun to be with. We laugh too much. We both think our hair is ugly. We tell each other everything. I guess that's what makes us the best of friends.

Felicia Romero

MY FAVORITE

My favorite pet is a dog. I like them very much because you can do many things with them. Such as playing catch, playing chase or you train them to do things. I also like dogs because they seem to understand and

know the way you feel. For instance, if you are upset or angry and if they notice it, they try cheering you up. I like the way they protect the house from any burglars. If they hear something they start barking or scratching on the window or door, as if they are trying to tell that they heard or saw something. I think dogs are very special pets.

Hope Portales

MY FAVORITE

My favorite friend is Felicia Romero. She is so fun to be with! I guess we have so much fun together because we like to do the same things. Most of the time that we are together, which is most of the time, we're acting crazy and laughing. Having such a good and fun friend makes even school seem better.

Kim Turner

MY FAVORITE

My favorite animal is a horse. Horses are very useful. You can race horses or use one for roping calves in a rodeo. Horses are used to herd cattle. They are as different from each other as people are when it comes to personalities. They are different in other ways to sizes, shape, and color. Also they are beautiful animals. Some people keep them for pets others for work.

This wind generator in the front yard of Mickey Tilley's Kingsville home often generates enough power to cut his electricity bills in half or more. As traditional sources of energy become depleted and energy costs climb, alternative sources of power are gaining in popularity around the country. Tilley says that when the wind blows from seven to 22 mph, the generator produces anywhere up to 50 percent of the house's energy needs. When it hits 22 mph or above, the generator can provide all of his home's energy needs.

Wind: A new cash crop for Texas

Kingsville-As monthly electric rates continue to climb, alternative sources of energy also climb...in popularity.

One such source is the wind. It is both renewable and non-polluting and is a plentiful source of power in Texas, even if you don't count politicians.

One Texan who has harnessed the wind to produce electricity is Mickey Tilley who built the wind generator that stands 54-feet-high in the front yard of his home in Kingsville.

The wind, Tilley explains, determines the kind of electricity bill he pays.

"When the wind blows up to seven miles per hour, the generator produces no electricity, but if the wind is blowing from seven to 22 mph, the degree of power generated produces up to 50 percent of my house's electricity needs," he said.

"Once the wind hits 22 mph or

above, the generator provides all the power the house needs," Tilley added. And when that happens, his electricity bill plummets.

According to a recent study by the Worldwatch Institute of Washington, D.C., wind currents in the United States are strong enough to provide up to 14 percent of the country's projected electricity demands in the year 2000.

California is already going with the flow, so to speak, and presently leads the nation in the number of operating wind generators. Last year, more than 4,000 such machines were installed on approximately 40 "wind farms" that sell power to utility companies.

Texas has quite a way to go before it too is gone with the wind, but people like Mickey Tilley in Kingsville who can build and install wind generators will help push the current.

"Character is like a tree and reputation its shadow. The shadow is what we think it is; the tree is the real thing."
—Abraham Lincoln

NEW ARRIVALS NOMINEES FOR NOVEMBER GENERAL ELECTION

Pierce Baby Boy

Kristy and Kurt Pierce of Lamesa are parents of a new baby boy. Kyle David was born September 7 at 10:15 in the Lubbock Methodist Hospital. He weighed 7 lbs 14 oz. and was 21 3/4 inches long.

Grandparents are Larry and Wanda Smith of Gail and Mr. and Mrs. Ben Pierce of McAllen, Texas.

Sharp Baby Boy

Toby and Nan Sharp of Gail are the parents of a baby boy, Toby Joe (T.J.). T. J. was born September 6 at 9:26 p.m. in the Lamesa Hospital. He weighed 6' 11 1/2" and was 19 inches long.

Grandparents are Buddy and Margaret Sharp of Gail and Juanita and Bill Mayfield of Lamesa.

Thank You

We would like to say "THANKYOU" so very much for your cards and many expressions of sympathy in the loss of our Father, Grandfather, and Husband, Mr. W. C. Kountz. Your thoughtfulness and prayers were most appreciated. "Make new friends, Keep the Old, One is Silver, and The Other is Gold." We cherish our "Golden Friendships" in Borden County!

May God Bless Each of You.
Sincerely, Van, Shirley, and Sandra Kountz, Debra and Russell Leonard, Mrs. W. C. Kountz.

PUBLIC NOTICE

AT&T Communications of the Southwest, Inc., has filed with the Public Utility Commission of Texas (PUC) a proposal to reduce intrastate, interLATA long distance revenues to offset proposed increases in specialized service rates for private line, WATS, 800, OCC facilities and directory assistance services. The proposed tariff restructure will not result in any increases in the overall revenues of the Company. The proposed effective date for the tariffs is September 20, 1984. All customers and classes of customers will be affected by this filing.

The restructure in the basic long distance service (MTS) results in an overall decrease in the revenues received by the Company from such service of approximately \$100 million. While this proposed restructure results in an overall decrease in revenue, certain MTS rates are proposed to be increased to more nearly recover the access charges approved by the PUC for such service.

AT&T Communications has also filed restructured tariffs designed to more closely recover access costs for private line, DATAPHONE* Digital Service (DDS), OCC facilities, WATS, 800 and directory assistance services. These restructured tariffs result in an approximate overall revenue increase of approximately \$100 million from increases in its WATS, 800, DDS, OCC facilities and private line rates, and institution of a charge for directory assistance.

The result of these proposed tariff changes and the restructure of our service offerings is to more nearly recover access costs from those services for which such access costs are incurred.

This proposed restructure results in no increase in overall revenue to AT&T Communications and is not a major rate change as that term is defined in Section 43(b) of the Public Utility Regulatory Act.

A complete copy of all tariffs and rate schedules is on file with the Texas Public Utility Commission at Austin, Texas. Persons who wish to intervene or otherwise participate in these proceedings should notify the Commission as soon as possible. A request to intervene or participate or for further information should be mailed to the Public Utility Commission of Texas, 7800 Shoal Creek Boulevard, Suite 400N, Austin, Texas 78757. Further information also may be obtained by calling the Public Utility Commission Consumer Affairs Division at (512) 458-0223 or (512) 458-0227 or (512) 458-0221 teletypewriter for the deaf.

ASCS NEWS

by Jerry Stone

MAINTENANCE OF ACR

Remember that you are under contract to maintain your acres devoted to conservation use. Failure to control weeds and wind erosion will jeopardize your eligibility to receive any program benefits. This could mean a refund on diversion payments, a forfeit of any deficiency payments, and payment of liquidation damages.

EMERGENCY FEED

Applications for the emergency feed program are still being accepted.

1985 WHEAT PROGRAM

To be eligible for program benefits, producers must limit 1985 wheat acreage for harvest to no more than 70 percent of the farm's wheat base. A paid land diversion of \$2.70 per bushel for 10 percent of the wheat base is offered and additional ACR (set)aside acreage of 28.57 percent of the farm's 1985 planted wheat acreage for harvest, must be given.

The 1985 acreage base will be the average of the acreage planted and considered planted to wheat for harvest in 1983 and 1984.

The program also includes a \$3.30 per bushel national average loan rate and a \$4.38 per bushel target price. Sign-up for the program will be October 15, 1984 through March 1, 1985. Program contracts signed by participants will be binding and will provide for liquidated damages for failure to comply with program requirements. Offsetting and cross compliance will not apply to the 1985 wheat program (each farm will stand on its own.)

MEASUREMENT SERVICE

Aerial slides of the county have been made. We will notify you when the service has been completed and then you can certify.

Because its eyeball is fixed, the whale must move its huge body to shift its line of sight.

WOOL RECEIPTS

It is time to start bringing in your 1984 sales receipts for any wool, unshorn lambs, or mohair. The deadline for signing the application for the 1984 incentive payments is January 31, 1985.

FCIC NEWS

September 30, 1984 is the deadline for purchasing Federal Crop Insurance for your wheat, oats and barley. A list of insurance agents that sell FCIC crop insurance is available in the ASCS office.

FAILED ACRES

All program crop acres to be destroyed prior to harvest must be reported before destroying

evidence of the crop.

GRAZING AND HAYING OF ACR

A lot of questions have been asked concerning the grazing and baling of ACR land. Beginning September 1, 1984, all ACR in Borden County is released for grazing whether you own cattle or not.

Hay harvested for ACR must be fed to a producer's own eligible livestock. Remember that baling of ACR is allowed only if you owned cattle on or before April 16, 1984, and you filed a request at this office for emergency haying and grazing of ACR.

Unauthorized harvesting and grazing will result in loss of program benefits.

CROP INSURANCE

Con't from Pg. 1

to 30 percent of the cost of carrying insurance. For more information about the program, producers should contact an authorized Crop Insurance agent," says SAMPLEY.

To select an agent, producers should check the list of agents available at their county ASCS office. Applications should be made no later than SEPTEMBER 30.

STUDY WILL ESTABLISH FACTS ABOUT MEAT AND HEALTH

Washington--Highly respected agricultural research group has agreed to launch a major study of how meat and poultry products affect human health. The study, requested by Congressman Charles W. Stenholm, will deal in established scientific facts rather than media speculation.

Stenholm said he requested that the Council for Agricultural Science and Technology (CAST) study diet and health because of the need for an objective and balanced look at all the evidence.

"There have been too many scare stories in the media," Stenholm said. "People have become nervous about eating meat and eggs--unnecessarily nervous, I think. When people make diet decisions based on magazine articles that tell only part of the story, then the food industry suffers and farmers and ranchers see demand for their products fall."

Stenholm said he was interested in getting the full story before the public, whether the news was good or bad for the meat and poultry industry.

"The public deserves to know the facts," Stenholm said. "And food producers want the facts known too. Those of us who raise the nation's food supply want to be sure the products we're selling are healthy."

He said the evidence on controversial topics like cholesterol may not be as conclusive as many people think from the reports they read in the media.

"Every day, we're bombarded by authoritative advice on what to eat and what not to eat," the Stamford Democrat said. "The only problem with this 'authoritative' counsel is that it changes so often. Just when all of us had resolved to curtail salt in our diets, out came a fresh study saying too little salt was bad for us too."

"If meat and eggs have potential ill effects when eaten excessively, both producers and

the public want to know about it--and they also want to know how much is excessive," continued Stenholm, a member of the House Agriculture Committee. "But producers want all the facts to be weighed before people start passing judgement."

CAST is an independent and highly regarded scientific association. Its membership includes most major American societies of agricultural scientists, and it has issued reports on subjects ranging from acid rain to humane animal-raising practices.

PRP SOLVES PROBLEMS

Experiencing an uncomfortable feeling akin to indigestion regarding an unresolved tax problem? If you have already tried the normal IRS remedies to solve your problem, the tax agency suggests you try its Problem Resolution Program (PRP) office.

The most common problems brought to the PRP office are complaints about missing refunds, mixed up social security numbers, incorrect billings by IRS, and situations caused by taxpayer error, the IRS says. They cautioned, however, that the Problem Resolution should not be used as a substitute for normal procedures.

Although most taxpayers will never need the services of PRP, the IRS says that taxpayers with a persistent tax problem will find PRP willing and able to help. Taxpayers can contact PRP through the IRS assistance number listed in the phone book under U.S. Government.

PROPANE HOTLINE TOLL FREE

Austin, Texas--The Texas LP-Gas Association has established a state wide toll-free propane hotline. Now consumers, architects, builders, developers, and fleet operators have a central clearinghouse for their questions on propane, an economical energy alternative.

To obtain information, call 1-800-252-8232 between 8:30 a.m. and 5:00 p.m. Monday through Friday. Hot line operators will answer, or research questions.

The timing for establishing the toll-free hotline was critical according to Catherine Rips,

spokesperson for the Association.

"By putting the hotline to work now, people have the opportunity to get information and consider making changes before the heating season sets in."

"In some cases, by converting electrical systems to propane or adding gas space heating, consumers could see some startling results in lower heating costs this winter."

The hot line is a new service of the Texas LP-Gas Association established to provide information on the versatile fuel.

LP-gas, (butane and propane) is used for home heating, water heating, cooking, and clothes drying as well as for motor fuel and commercial-industrial applications.

The Texas LP-Gas Association is a statewide trade organization comprised of retail LP-gas dealers and suppliers, whose main objectives are to promote safety and education through the industry.

The state of Maine has 3,500 miles of coastline.

SHOPPING FOR FOOTWEAR

About 87 percent of all Americans suffer from some form of foot trouble, according to U.S. Public Health Service estimates. By understanding the elements of quality footwear, consumers can guard against foot problems caused by poorly constructed or ill-fitting shoes.

Shoes are built over molded forms, resembling feet, called lasts. The upper material is pulled over the last to form the shape of a shoe. In nearly two-thirds of the shoes made today, the upper is cemented to the sole of the shoe. In men's and children's shoes, the upper is usually stitched to the sole.

Leather is valued as shoe material because it has "breathability" which permits moisture to evaporate. That's important because the feet have 250,000 sweat glands, which produce a half pint of moisture a day.

About 35 percent of all shoe upper materials sold in the U.S. are man-made. For some uses, such as sandals, man-made materials may be a better buy or better choice than leather. Vinyls are extremely durable, but inflexible. The urethanes are more supple and softer than vinyl and look more like leather. The poromerics look the most like leather and have good breathability.

You can check the manufacturer's label to determine what material has been used to make the upper. In sandals, man-made materials are often the most economical choice since breathability is not an issue.

In addition, check for these features of shoe quality:

-Lining. Leather linings are desirable in a closed shoe because of the need for moisture release. Other absorbant fabrics linings, such as foam-backed tricort, are also effective. A lining is not always needed on a casual or open shoe.

-Soles. The three most common materials used in soles are leather, leather-like man-mades, and natural or

synthetic rubber. Leather soles breathe, but wear out more quickly and absorb water in wet seather. Polyurethane soles are more durable than leather but can be somewhat slippery. Synthetic rubber soles cushion the foot well, are long wearing and do not get sticky in heat.

-Lifts. A lift is the bottom area of the heel that takes the most abuse and is likely to wear out more quickly than any other shoe part. Nylon and polyurethane lifts are generally sturdier and longer wearing than rubber.

-Back seam. The back seam is a vulnerable part of the show. Look for reinforcement with a collar or an added layer of material at stress points.

-Counter. The counter is a piece of molded stiffening material that strengthens the back area of constructed shoes. The higher the heel on a woman's shoe, the longer the counter should be.

-Counterpocket. The extra lining inside the back of the shoe should keep your heel from slipping. Suede is the preferred material.

-Shank. A steel, wood or synthetic piece is inserted under the arch of a shoe for reinforcement. All constructed shoes, even flat ones, should have a shank. A wsqueaking or clicking should while walking can indicate that the shank is loose.

-Laces and straps. Lace holes should be reinforced, either with rust resistant brass or chip resistant painted eyelets. Some eyelets are reinforced on the inside of the shoe. Straps should have at least five holes for fit adjustment.

-Finishing. All top lines should be neatly finished and all stitching should be neat and even with no loose threads and no missed stitches.

When shopping for shoes, aim for the best quality you can afford within your price range and optimal fit. The better the fit, the longer your shoes will last.

SHORT TAKES

Barnacle shells adhere to virtually any surface not poisonous or mucus covered. They even stick to Teflon, says National Wildlife magazine. About the only deterrent ships can use to keep barnacles off their hulls is highly toxic copper or tin-based paints. Even with this protection, most saltwater vessels must be hauled and scraped every year or two.

Experts estimate that eight percent of all U.S. ferns, conifers and flowering plants are presently endangered, says the National Wildlife Federation.

TOUR UNUSUAL- NEW HOMES

Plan to attend the Home Tour, Sunday, September 16, 1984, sponsored by the Lubbock County Family Living Committee. The tour is free of charge and is open to the general public.

The tour schedule includes:
1:15-1:30--Registration at Precinct 1 Clubhouse. Maps distributed. Doorprize registration.
1:30-2:45--Tour of traditional family homes, townhomes and other housing options.

Homes provided through cooperation with Nita Kiesling

Realtors.
2:45-3:45--Tour of John Knox Retirement Facility.

TRAVEL TO LAKE RANSOM CANYON

4:00-4:30--Tour of Earth Sheltered-Solar Home by Dr. Ernie Kiesling.

4:30 -5:00 Tour of "Steel Home" by Mr. Robert Bruno, owner.

A drawing for doorprizes will conclude the tour. Plan to attend! For more information, call the County Extension Office at 806-741-8084.

BANVEL® HERBICIDE

Kill bindweed between crops.

Get cleaner wheat, corn or milo next season with Banvel® herbicide.

Bindweed in your fields can cut into yields and snarl harvest equipment. But you can root out bindweed with a Banvel® herbicide Between Crops Application. When you treat harvested ground or idle acres with Banvel herbicide, you get weed-killing activity that works leaf-tip to root-tip to knock out bindweed as well as lakeweed, blueweed or silverleaf nightshade... all without limiting your crop rotation plans. Check the label for complete rotation alternatives.

See your herbicide supplier for details on the best choice for cleaner fields next season.

WHETHER TO REPAIR OR NOT REPAIR REAL DILEMMA

Austin, Tex....When the toaster gives out or the television set goes, every Texan confronts the old dilemma: Should I fix it or buy a new one?

The dilemma gets harder after October 2, when new tax laws on repairs go into effect.

The cost of repairing personal property...including home repairs...will be taxed under a new law passed by the Legislature and signed by Governor Mark White.

The tax rate is 4½ percent. A local sales tax of one percent or a tax authorized by the Legislature for mass transit in some of Texas' large cities may boost the total tax to as much as 6 ½

percent.

This is the first time such a tax affects every household in Texas directly. Repairs of washing machines, dryers, lawn mowers, vacuum cleaners, microwave ovens (if they are freestanding) telephones and television sets

are all included.

Also included are the extended warranties consumers buy to protect these items. Repairs to real estate are not taxed. Neither are repairs to items that are specifically exempt, such as eye glasses or hearing aids, motor

vehicles and aircraft. Parts are taxed, but not the repair work itself.

If your watch breaks or if your camera's shutter is on the blink, their repair is taxable at the place where you take them to get them fixed.

Any questions involving which repairs are taxed and not taxed can be answered by calling State Comptroller Bob Bullock's office toll free on 1-800-252-5555 or on the regular number, 512-475-1931.

PUBLIC NOTICE

BRIEF EXPLANATORY STATEMENTS OF PROPOSED CONSTITUTIONAL AMENDMENTS GENERAL ELECTION NOVEMBER 6, 1984

PROPOSITION NO. 1 ON THE BALLOT

House Joint Resolution 29 proposes a constitutional amendment that provides to state-chartered banks the same rights and privileges that are or may be granted to national banks of the United States domiciled in this state. For example, if national banks become authorized to maintain branch offices, this amendment would extend the same privilege to state banks.

The proposed constitutional amendment will appear on the ballot as follows: "The constitutional amendment to provide state banks the same rights and privileges as national banks."

PROPOSITION NO. 2 ON THE BALLOT

House Joint Resolution 19 proposes a constitutional amendment that restructures the Permanent University Fund to provide: (1) for the expansion of the institutions eligible to participate in the bonding capacity of the fund to include the components of The University of Texas and Texas A&M University systems that have been added to those two systems of higher education since the Permanent University Fund was last restructured by constitutional amendment; (2) for the expansion of the purposes for which bond proceeds can be expended from new construction to include major repair and rehabilitation projects and the acquisition of major capital equipment (e.g., computers and laboratory equipment) and library books and materials; (3) for an increase in the bonding capacity from 20% (½ for The University of Texas System and ⅓ for the Texas A&M University System) to 30% (20% for The University of Texas System and 10% for Texas A&M University System) of the value of the assets (exclusive of real estate) in the Permanent University Fund in order to provide sufficient bond proceeds to care for the addition of 10 new institutions to those authorized to participate in the Permanent University Fund bonding program and to care for the expanded purposes for which the bond proceeds can be spent; and (4) for the dedication of the dividends, interest, and other income from the Permanent University Fund remaining after payment of principal and interest due on bonds and notes issued, to the provision of support and maintenance (over and above normal legislative appropriations) for Texas A&M University in Brazos County, Prairie View A&M University, and The University of Texas at Austin.

House Joint Resolution 19 also annually appropriates \$100 million in each fiscal year, beginning September 1, 1985 (from the first money coming into the state treasury that is not otherwise appropriated by the constitution) for the use of those

education which are not included in The University of Texas or Texas A&M University Systems and, therefore, not eligible to participate in the Permanent University Fund bonding program. The amount of this appropriation could be adjusted every five years by a ⅓ vote of the Legislature, but could not be adjusted in such a way as to affect outstanding bonding indebtedness. Each institution of higher education that is eligible to participate (i.e., those institutions of higher education outside The University of Texas and Texas A&M University Systems) would be authorized to expend directly its share (such share to be determined pursuant to an equitable formula) of the \$100 million appropriation for the purposes of acquiring land, constructing and equipping buildings or other permanent improvements, major repair and rehabilitation of other permanent buildings or improvements, and acquisition of major capital equipment (e.g., computers and laboratory equipment) and library books and materials. Additionally, each institution would be authorized to issue bonds backed by a pledge of up to 50% of its share of the \$100 million annual appropriation for the purpose of land acquisition, new construction, and major repair and rehabilitation projects.

Except in the case of fire or natural disaster and in other extraordinary cases, verified by a two-thirds vote of each house of the legislature, all institutions of higher education would be precluded from receiving appropriations of general revenue funds for the purposes of land acquisition, new construction, and major repair and rehabilitation projects.

The proposed amendment will appear on the ballot as follows: "The constitutional amendment to create from general revenue a special higher education assistance fund for construction and related activities, to restructure the Permanent University Fund, and to increase the number of institutions eligible to benefit from the Permanent University Fund."

PROPOSITION NO. 3 ON THE BALLOT

House Joint Resolution 65 proposes a constitutional amendment which authorizes the legislature to provide for the payment of assistance to the surviving dependent parents, brothers, and sisters of officers, employees and agents of the state or its political subdivisions, including members of organized volunteer fire departments and members of organized police reserve or auxiliary units authorized to make arrests, who die in the course of performing hazardous official duties. Payments to surviving spouses and dependent children of agencies and institutions of higher

education are already authorized by the Constitution.

The proposed amendment will appear on the ballot as follows: "The constitutional amendment authorizing the legislature to provide for payment of assistance to the surviving dependent parents, brothers, and sisters of certain public servants killed while on duty."

PROPOSITION NO. 4 ON THE BALLOT

Senate Joint Resolution 20 proposes a constitutional amendment which abolishes the office of county treasurer in Bexar and Collin counties if a majority of the voters in each of those counties vote in favor of abolishing the office of county treasurer in a local election to be held on the issue. All the powers, duties, and functions of the office of county treasurer in each of these counties would be transferred to the county clerk.

The proposed constitutional amendment will appear on the ballot as follows: "The constitutional amendment to abolish the office of county treasurer in Bexar and Collin counties."

PROPOSITION NO. 5 ON THE BALLOT

Senate Joint Resolution 22 proposes a constitutional amendment which provides a new method of filling a vacancy in the office of Lieutenant Governor. The amendment requires the President pro tempore of the Senate to call together the committee of the whole Senate within 30 days after a vacancy occurs in the office of Lieutenant Governor. The committee would be required to elect one of its members to perform the duties of the Lieutenant Governor until the next general election. This individual would continue his duties as Senator at the same time that he performs the Lieutenant Governor's duties. If the Senator who is elected ceases to be a Senator before the next general election, another Senator must be elected according to the above procedure to perform the Lieutenant Governor's duties. The President pro tempore would be required to perform the Lieutenant Governor's duties pending the election of one of its members by the committee of the whole Senate.

The proposed amendment will appear on the ballot as follows: "The constitutional amendment authorizing the state senate to fill a vacancy in the office of lieutenant governor."

PROPOSITION NO. 6 ON THE BALLOT

House Joint Resolution 73 proposes a constitutional amendment that permits the use of public funds and credit for payment of premiums on non-assessable life, health, or accident insurance policies and annuity contracts issued by a mutual insurance company authorized to do business in this state. The constitutional prohibition against a grant of public money to an individual, association, or corporation or against becoming a stockholder in a corporation, association, or company has limited life and health group policies of political subdivisions to non-mutual insurance companies. The amendment would permit mutual insurance companies to bid for those policies.

The proposed constitutional amendment will appear on the ballot as follows: The constitutional amendment to permit use of public funds and credit for payment of premiums on certain insurance contracts of mutual insurance companies authorized to do business in Texas."

PROPOSITION NO. 7 ON THE BALLOT

House Joint Resolution 4 proposes a constitutional amendment to change the membership of the State Commission on Judicial Conduct to include one Judge of a Municipal Court and one Judge of a County Court at Law, who shall be selected at large and appointed by the Supreme Court with the advice and consent of the Senate.

The amendment also provides additional grounds for removal from office of judges or justices of Texas courts, and provides additional disciplinary actions that could be taken in lieu of removal or censure. The amendment would extend the Commission's disciplinary authority to masters, magistrates, and retired or former judges who hear cases by designation. The amendment creates a tribunal to review recommendations of the State Commission on Judicial Conduct for removal or retirement of a judge or justice. The review tribunal would be composed of seven (7) Justices or Judges of the Courts of Appeals selected by lot by the Chief Justice of the Supreme Court. The amendment also provides for appeal of the review tribunal's decision to the Supreme Court of Texas and grants an accused judge the right to discovery of evidence.

The proposition will appear on the ballot as follows: The constitutional amendment relating to the membership of the State Commission on Judicial Conduct and the authority and procedure to discipline active judges, certain retired and former judges, and certain masters and magistrates of the courts."

PROPOSITION NO. 8 ON THE BALLOT

House Joint Resolution 22 proposes a constitutional amendment which increases the per diem of members of the Legislature. The amount of per diem allowed during a calendar year would be equal to the maximum amount set in federal income tax statutes as of January 1 of that same year as a deduction for ordinary and necessary business expenses incurred by a state legislator. Current per diem is \$30; the maximum deduction is now \$75.

The proposed constitutional amendment will appear on the ballot as follows: "The constitutional amendment to provide a per diem for members of the legislature equal to the maximum daily amount allowed by federal law as a deduction for ordinary and necessary business expenses incurred by a state legislator."

Estos son los informes explicatorios sobre las enmiendas propuestas a la constitución que aparecerán en la boleta el día 6 de noviembre de 1984. Si usted no ha recibido una copia de los informes en español, podrá obtener una gratis por llamar al 1/800/252/9602 o por escribir al Secretario de Estado, P.O. Box 12887, Austin, Texas 78711.

QUARTERLY TAX RETURN TIME

October 31 is the date by which employers must report on Form 941 social security and withheld federal income taxes for the third quarter of 1984 and pay any taxes due, the Internal Revenue Service says.

This deadline does not apply to those employers who make timely deposits of the full amount of tax due in Federal Reserve or approved commercial banks. They are allowed until November 12 to file Form 941, "Employer's Quarterly Federal Tax Return."

If employers have not received Form 941 by mail, they can order one through the Forms-Tax Information number listed in the phone book under U.S. Government. IRS Publication 15, Circular E—Employer's Tax Guide, is also available through this number.

FUNDS TO HELP FIGHT CRIME

More than \$24 million in criminal justice grants has been awarded to help fight crime in Texas.

Most of these funds will be distributed to law enforcement departments to help initiate programs to put more officers on the street, operate projects to discourage juvenile crime, and organize citizens into neighborhood watch and other crime prevention efforts.

"To establish safer communities, we must encourage citizens and the police to work together to swiftly apprehend criminal offenders and to support programs designed to discourage young people from engaging in criminal activity," Gov. White said.

Funding of these programs is made possible through assessing fines paid by persons convicted of violating criminal laws in Texas.
