U of T Eyes Radar Station

The 747th AC&W Station, abandoned by the Air Force here after only four years of occupancy, may become the site of added research facilities for the Institute of Marine Science of the University of Texas under a resolution by Sen. William N. Patman of Ganado which passed the Senate this week.

The resolution says the Federal government has given notice that the facility is surplus, and open for use by other governmental bodies that can show need for the station.

The station includes dormitories, a mess hall and 11 other buildings, plus 27 houses formerly used by married personnel, along with its own wells and sewer system, and is situated at Rockport's airport, about five miles north of town.

The site is leased from Aransas County under a contract extending to June 30, 1981, and comprises some 50 acres adjacent to the modern airport.

Completed in February, 1959, the radar station was put into service by the 747th AC&W squadron, with a crew that ranged as high as 200 men at the peak of its activities.

Until May 2, 1963, when the station was closed, the radar site formed part of the nation's warning system against hostile planes, and while it was in operation it had an annual payroll of around \$650,000, with \$70,000 a year spent in the area for supplies purchased locally.

Closing of the station was a result of a decision by the Defense Department to realign the nation's early warning network in light of technical advances and maximum defense efficiency.

The facility, comprising of 43 buildings in all, with floor space in excess of 137,000 square feet, was declared surplus and went up for disposal to public agencies earlier this month.

Music Lovers Drive Now On

Rockport music lovers have an opportunity this week to subscribe for one of the biggest bargains in music available in the 1965-66 series of the Corpus Christi Music Association, according to Mrs. Florence Frech, secretary of the Association, who is well known to many local people, both through her association with the Music Association and the Episcopal Church retreat.

Two of the major attractions will be Peter Nero, with his trio, recently heard on the Telephone Hour, and Fred Waring and his Pennsylvanians, in Waring's Fiftieth Anniversary Show. Two others are to be announced later, Mrs. Frech said.

The drive continues the rest of this week, and for the convenience of those people in Rockport who attend this series year after year, they may obtain tickets through Mrs. Frech, by mailing their check to her at 6073 Edgewater Drive, Corpus Christi, Texas.

Individual season memberships are \$7.50 each.

Another Delay On Tax Case Sought By Lawyers

Settlement of the tax suit brought by Aransas County Independent School District and Aransas County against the Sid Richardson Estate has been delayed once more.

Although both the District Court and the 13th Court of Civil Appeals have found against the Estate, Supt. J. D. Gray, of the school district, says that he doesn't look for an end to the long-drawn out battle until late next fall.

This morning Gray said, he received a letter from Ross Terry, the school tax lawyer, in which he said:

"This is to advise you that we have received an application for writ of error filed by the attorneys representing the Richardson Estate in the Supreme Court of the State of Texas.

"We will prepare and file a reply to this application within approximately 15 days. The Supreme Court will refuse the application if they find it to be without merit, or the application can be granted if the court feels that error may have been committed."

Terry said that it may be late this year before the case, which involves roughly \$75,000 in back taxes and penalties, is settled.

Cancer Drive Approaches End

The Cancer Drive, for which a quota of \$1,900 had been set, is coming to an end, according to Mrs. A. L. Bachman, local chairman. All promised contributions should be sent to her at Box 171, Fulton, and she expressed the hope that others who had not been reached, due to a shortage of workers, would also contribute, either by letter or in person.

Due to the fact that not enough workers were available to distribute educational folders to every home, Mrs. Bachman, in reviewing the drive listed the seven danger signals. They are unusual bleeding or discharge; a lump or thickening in the breast or elsewhere; a sore that does not heal; change in bowel or bladder habits; hoarseness or cough; indigestion or difficulty in swallowing; and changes in a wart or mole.

Of the funds collected, Mrs. Bachman said, 26 cents out of each dollar contributed is spent for cancer research; 20 cents goes for professional education, fellowships and similar services to keep physicians informed of up-to-date treatments of cancer, providing clinical fellowships, supporting tumor clinics, cancer registries, and professional conferences.

Thirteen cents out of every dollar goes for service to patients; 27 cents of each dollar is spent for public education; five cents for development of the foundation's program and for administration; nine cents out of every dollar go for campaign expenses to raise needed funds.

Mrs. Bachman, Aransas County Cancer Crusade Chairman, extended her thanks to all those who helped in the drive, including:

Rev. Cecil Lang, Jr., and N. C. Vandagriff, Mrs. Birch Addington, Mrs. Ted Atwood, Mrs. Elmo Brundrett, Mrs. Clark, Mrs. Jones Christian, Mrs. J. F. Cloberdants, Mrs. Volney Cavitt, Mrs. Craig, Mrs. Davis;

Mrs. Boyd Faucett, Mrs. Walter S. Falk, Jr., Mrs. Freeze, Mrs. Roy Lee Hart, Mrs. Merritt Hulet, Mrs. J. W. Ingersoll, Mrs. Jackson, Mrs. W. C. Longquist, Mrs. Charles LaBounty, Mrs. O. P. Little, Mrs. Jerre Ledbetter;

Mrs. James Maher, Mrs. Elva Mullinax, Mrs. Harry McDow, Mrs. F. L. McCord, Mrs. James E. Russell, Mrs. Stuart, Mrs. Shelton, Mrs. A. C. Shivers, Mrs. Smith, Mrs. C. L. Thomas, Mrs. H. S. Thompson, Mrs. Ward, Mrs. Ed Whitfill, Miss Lillian Fahr and Miss Winona McFall, as well as school principals in the Aransas County School system.

POOR PROSPECTS. Bad flooding and late freezing have combined to create remote prospects for planting in many areas this spring. Above, farmer Bill Horiham (left), of Lanesboro, Minnesota, surveys his field with U.S. Department of Agriculture expert. His field was covered with 3-foot thick chunks of ice, and debris, and the farmer was unable to locate equipment capable of clearing the land for corn planting. — WFS Photo.

Rowan announced that sealed bids for furnishing a leased vehicle for use at the Rockport post office for the fiscal year ending July 1, 1966 will be accepted until 2 p.m. Wednesday, May 25, 1965. Carriers to Distribute Survey Cards

Postmaster Maynard Rowan reminds rural patrons of the Rockport post office to be on the lookout for June Livestock cards. Next week, mail carriers will leave survey cards in a sample of boxes along their routes.

"USDA bases livestock and poultry estimates on replies to this survey. It is important for everyone who gets a card to fill it out and return it to the carrier. This way, USDA gets a representative sample of the area's livestock and poultry holdings."

The carrier assisting with the survey, Mrs. J. D. Hessel-tine, Star Route 1.

Survey cards will be forwarded to Carry D. Palmer, State Agricultural Statistician, in Austin. After adding and analyzing these cards, USDA statisticians are able to estimate the state's milk production, calf and pig crops, lamb and wool crops, and the number of hens and pullets.

Information from this survey will guide livestock poultry producers in making important business decisions.

Navigation District Construction Is Well Underway for Summer

Navigation projects are rapidly approaching completion and are expected to be ready for the summer season.

A new office building, containing some 1100 square feet of floor space is over half finished and will replace the old concrete block structure on the waterfront.

In the new building will be offices for the secretary and for the superintendent, as well as a conference room for meetings of the Navigation Board.

The old building will be demolished, once the new one is ready.

The District is also constructing a larger-than-Olympic-size salt water swimming pool on which good progress has already been made by the Vermillion Construction Co., which is bulkheading the deep water end of the pool.

When completed the pool will be divided from the Key Allegro Channel by nylon netting, to keep out jelly fish and fish, while still allowing free water circulation.

A three-stage diving board will be part of the pool's equipment, along with slides, and floats, and at the deep end, to provide plenty of water for diving, it will be excavated to ten feet.

Another project that is well under way is construction of a new warehouse for the District, for which the slab has already been poured next to the Texas Parks and Wildlife building, on the waterfront.

Construction of the office building is being supervised by H. H. Dick, while the warehouse is the work of other district crews under Steve Atwood, Navigation District superintendent, who is now in process of constructing a number of new cabanas for use on the Rockport beach.

Regular Flights Planned For Rockport June 1

Rockport will have a regularly scheduled airline flight beginning June 4, Rollin King, president of Southwest Air Lines, told tourist court owners here Friday.

On that date, King said, "Sportsmen" flights will be inaugurated, leaving San Antonio every Friday at 5:30 p.m., arriving here at 6:20 p.m. From here the planes will go to Port Aransas, where they are scheduled to arrive at 6:40 p.m.

The return flight to San Antonio will depart from Port Aransas every Sunday afternoon at 4:45 o'clock, and leave Rockport at 5:10, with arrival in San Antonio at 6 p.m.

This is an extension of the service which King says will include regularly flights from San Antonio, to and from Corpus Christi, which start June 1.

Additional service to this part of Texas will depart from Corpus Christi Monday through Friday at 3:15 p.m., for Laredo, with an intermediate stop in Alice, King told local businessmen, and arrive in Laredo at 4:10 p.m. This flight will continue to San Antonio after leaving Laredo.

The Saturday Alice-Laredo flight will leave Corpus Christi at 8:55 a.m., arriving in Laredo at 9:50 a.m.

Return service will depart from Laredo seven days a week at 2 p.m.

With general offices and maintenance facilities headquartered in San Antonio, Southwest Airlines has been offering regular passenger air-flight service to points throughout South Texas for the last two years, as well as a complete, 24-hour charter service to any part of the country.

King commented: "The key to our rapid expansion in the past and that which we anticipate in the future is providing needed air service to communities characterized by unusual growth patterns. The dynamic record established by this area of South Texas reflects the aggressive and forward-looking personality of your business leaders."

"It is with the greatest pride that we join you now in working toward an even more impressive future, and it is with the sincerest hope that we shall be successful in playing some small part in expanding this growth."

Planes used will be rugged Beechcraft 18's, with a cruising speed of approximately 200 m.p.h., which has established a record in air transportation of flying more miles and carrying more people to more places than any other executive twin engine plane.

AREA SHRIMPING PIONEER DIES IN ARANSAS PASS

G. E. Minter, founder of the Aransas Pass shrimping industry, died early Tuesday morning in a Kenedy hospital after a short illness. He was 83.

The industry had its beginning 40 years ago when Minter shipped a barrel of shrimp to San Antonio for resale as fish bait. Minter opened a fish house on the bay-front in 1912, the first for the city. He was the only dealer there for years and the industry on this section of the Texas coast was made up of S. F. Jackson of Rockport, Minter and Mrs. John Massy of Ingleside.

In 1914 he began making 10 and 25-pound packages of headed shrimp to send out to eastern markets to create a demand for seafood. In the

early days of the shrimping industry, trawlers were powered with automobile motors, and Corpus Christi garages sent all the motors from wrecked cars there and to Rockport for the boats.

From the one-barrel beginning, his business grew to a carload a day and operation of a fleet of trawlers. He sold out to Jackson in 1937 and retired as a dealer.

Minton was a member of the Baptist Church.

Funeral services were at 10 a.m. Thursday at Cage-Marshall Funeral Chapel.

Burial was in Prairie View Cemetery.

Mrs. Virginia Bunch, daughter of Mrs. Ruth Gwynn, has recently received a certificate that she has successfully completed the honor lectures given each semester by the A&I biology department for outstanding students.

VIRGINIA RIDGWAY DAY HELD HERE

Leading public relations men from Austin and San Antonio brought their families to Rockport last weekend to honor Virginia Ridgway, public relations counselor of Corpus Christi.

Key Allegro Island Motel was the headquarters for the weekend of fun and business for the Central Texas Chapter of the Public Relations Society of America.

Most were familiar with the area but it was their first close look at the growth and development of Rockport and there were many favorable comments. The fishermen in the group had a lot of fun fishing off their balconies at Key Allegro Island Motel.

The informal meeting settled down Saturday evening for the dinner culminating "Virginia Ridgway Day."

Mrs. Ridgway's contributions to the Public Relations profession and the Public Relations Society of America were outlined by Louis Engelke of San Antonio, past president of the Central Texas Chapter.

Ellis Shapiro of San Antonio, and Aubrey Kline, vice president of public relations, Pearl Brewing Co., presented Mrs. Ridgway with a gold San Antonio Fiesta Commission 1965 emblem in recognition of her contribution to tourism in South Texas.

Following the dinner was a discussion of Padre Island as a National Seashore. Ernest

Borgman, chief ranger with the National Park Service, described the Island and the plans for the park, showing color slides of Padre and the water.

Bob Conwell, executive vice president of the Coastal Bend Tourist Bureau, gave an outline of the Tourist business in the area, citing figures to prove that tourists bring income without cost to the taxpayers, and provide jobs for semi-skilled and unskilled workers.

Conwell pointed out that Corpus Christi has not added an industry in ten years and that an existing industry had a multi-million dollar expansion which added only seven jobs.

Automation, he emphasized, is creating unemployment among the group of people who can easily fit into the type of jobs provided by growth of the tourist business.

Seismograph Boat
Is Fourth For
RYSCO This Month

Capt. Ned Baron will leave here over the weekend aboard his new 88-foot seismograph boat the "Galeb," which means sea gull in Croatian but which, in the Captain's mind, could just as well mean the "American Dream."

Born in Austria before World War I on the Dalmatian coast, which became part of Yugoslavia after the war, Baron left that part of the world when he was only 22, landed in New York in the middle of the depression.

The first job he ever had in this country paid him 25 cents an hour, but even on that meager wage he saved some. Since then, by hard work and strict attention to business, he has accumulated two fine boats, and a wonderful family, educated in American schools and doing well on their own.

"I'm proud I'm an American," he said, "but I'm proud of my people too. I learned to work when I was a boy and young man, and America gave me the opportunity that wasn't available in the Old Country."

Asked about the name of his boat, Baron said:

"I wanted to name it something different. At first I thought I'd name it 'Spindletop,' but there are several boats by that name. I didn't want to name it after anyone in the family, because if I ever sold the boat and the new owner didn't keep in in good shape, I'd always feel bad. So I named it 'Galeb.' That means Sea Gull in my language."

The Galeb is a fine, big upstanding 88-footer, the largest built by Rockport Yacht and Supply so far, since it went into production of steel hulls last year, although not the largest which the yard plans to build, as it has plans for a 100-footer on the drawing board.

Baron designed it especially for seismograph work, although it has fish holds built in, in case it becomes necessary to put it to work shrimping between seismograph charters. At present they contain bunks for crew members.

Beam is 22 feet, and the hull draws only eight feet of water when fully loaded. The wheel house is larger than usual in shrimper construction, to accommodate the larger seismograph crews with comfort. Two GM 8-71 diesels drive twin four-bladed Federal Power Thrust 48x46 propellers through 4.5 to 1 Twin-disc reduction gears.

Auxiliary equipment includes a GM 20 KW 110-220 volt paralleled generator with GM 2-71 power, and anchor windlass, complete air conditioning for the deckhouse and wheelhouse, all electric galley, and stainless steel freezer. A Bendix DR9 depth recorder

is part of the navigating equipment, which includes radar, a Patterson 300 radio transmitter and receiver, a Model 15 Metal Marine Pilot, and a Mile Ray searchlight.

Lube oil tanks hold approximately 175 gallons; fuel capacity is approximately 20,000 gallons; water tanks hold 7500 gallons.

The Galeb is the fourth big boat to be completed this month, as three 72-foot shrimpers for the South American fishery were delivered to Henderson Portion Pak of Coral Gables, Fla., last week.

Fishing Buoy
Breaks Loose

Austin.—The \$3,000 lighted buoy that marked the Texas Parks and Wildlife Department's artificial fishing reef in the Gulf off Galveston is missing.

Anchored by a 5,000 pound cement block and 150 feet of heavy chain, the buoy apparently broke its mooring 10 miles south of Galveston some time this spring, and it has not been seen or reported since.

The cylindrical buoy, made of stainless steel, is composed of two sections. The base is about six feet high and four feet in diameter. The upper cylinder, containing batteries and the light, is seven feet high and 18 inches in diameter. Total weight is over a ton.

Coastal employees of the department, looking for the buoy, asked cooperation of fishermen and others who frequent the Gulf beaches. If found, the buoy's location should be reported to the nearest game warden or to the Texas Parks and Wildlife Department's regional office at 105 San Jacinto, La Porte, Texas.

SOCIAL SECURITY
BENEFICIARIES NOW
NUMBER 20 MILLION

Social Security benefits are now being paid to 20 million people. That figure was reached Wednesday, May 5, as William J. Kappel, retired Indiana public utilities worker, received his first social security check from President Johnson in a White House ceremony. Kappel, 65, retired at the end of March after 42 years of employment with the municipally owned Fort Wayne city utility system. He made his claim for social security benefits just as the number of men, women, and children receiving monthly social security benefits neared the 20 million mark.

In January of this year, the social security program rounded out 25 years of monthly benefit payments. H. M. Cleveland, social security district manager in Corpus Christi noted that in this span of years the number of persons receiving monthly payments increased from 222,500 in 1940 to the current 20 million. The amount paid out annually increased from \$35 million to \$16 billion. One out of every 10 Americans is now receiving a social security check each month and nine out of every ten workers are building social security retirement, survivors, and disability insurance protection for themselves and their families.

Amazon River adds an average of eight million cubic feet of water per second to the Atlantic Ocean.

White Wings Sport
1965 Jewelry

White-winged doves in the Rio Grande Valley are again being banded as a part of its homing instinct studies, according to Tom Moore, regional Wildlife restoration supervisor for the Texas Parks and Wildlife Department.

"To date," Moore said, "biologist Ted Clark and his crew have trapped and banded over 4,000 adult whitewings." When the nesting season gets into full swing the adult birds become hard to trap and the emphasis will then be placed on banding nestlings.

Moore said this banding, and the subsequent return of bands from the public, form an important segment in the white-wing life history studies and management efforts.

GOOD NEIGHBOR
CLUB TO MEET

The Good Neighbor Club will meet at the IOOF Hall on Wednesday, May 26, 2 p.m., with Mrs. L. V. McLester and Mrs. Alice Ballou as hostesses. All members are urged to attend.

Mr. and Mrs. C. C. Lipe are on a two week's vacation during which time they will visit in Conroe and West Texas, before returning via Abilene where they will pick up their son, who has been attending Abilene Christian College.

Keith Scott of San Jose, Calif., David Kerr, of Des Moines, Ia. and Jimmy Ben Clobertants have returned to their homes Tuesday after attending the funeral services of G. W. Scott and visiting Mr. and Mrs. Fred Clobertants.

Yellowed Lawns
May Need Iron

Yellowed spots in St. Augustine grass lawns is a common problem in South Texas. This yellowing can be corrected with the application of a spray solution of iron, says Dave Weaver, Extension area agronomist.

Iron deficiency is often the cause of yellow spots in lawn grasses. Iron is necessary for chlorophyll formation. Chlorophyll is the green coloring matter in plants. If iron is unavailable, chlorophyll does not develop properly and chlorosis (yellowing) results.

This condition can be corrected with the application of spray solution of iron sulfate (copperas) or iron chelate. Iron sulfate should be used at the rate of three ounces in five gallons of water for every 1,000 square feet of lawn. About an ounce and a half of detergent should be added to the solution to assure good leaf coverage. Iron chelates should be applied according to label directions.

A repeat application will be necessary every four to six weeks to maintain a green attractive lawn.

In order to avoid leaf burn iron materials should be applied in the evening when the grass is actively growing and there is less evaporation.

Spray equipment should be washed thoroughly after use. Iron bearing materials are very corrosive.

If you have a maid working in your home and you pay her as much as \$50 wages in three months, you must pay the social security tax on her pay. Call your social security office for forms on which to report these earnings.

Picture of a shareholder picking up some capital

One shareholder of an electric company is a boy who got the money to buy his first share by returning empty pop bottles.

He and more than 4,000,000 other shareholders are direct owners of America's electric light and power companies. And its indirect investors—people with money in savings banks, insurance policies and pension funds—are numbered in the tens of millions. (Insurance companies, banks and

pension funds put some of that money to work in electric company securities.)

Thus, from the savings of millions of people, a mighty river of finance flows into this and other industries that have helped give us the best electric service and the highest standard of living in the world.

Isn't it wonderful to be part of a country where there is hope and opportunity even in an empty pop bottle?
