

THE JUNCTION EAGLE

Volume 44

Junction, Kimble County, Texas, Thursday, March 8, 1928

Number 47

AMERICAN LEGION IS RE-ORGANIZED

At an enthusiastic meeting held in the Court House Tuesday night, Burt Fleming Post No. 237, of the Texas Division of the American Legion was re-organized. Walter Buck was elected as Post Commander, K. G. Durst as Vice Commander, E. O. Lowgren, Adjutant, Forrest Weldon Finance Officer, and Guy Wynne Sergeant of Arms. Two organization teams were selected with Guy Wynne as Captain of one team and Eddie Lowgren of the other, with the understanding that within twenty days from the 6th day of March, 1928, the side having the least new members would act as host to the other at a banquet to be held at the place designated by the winner. Both teams are already very active.

The Post had Executive Committee George L. Epple of Kerrville here to install the officers, together with his adjutant Rowland Dodd. Mr. Epple made a very interesting address relative to the reorganization plans of the Legion in Texas. Other visitors were Paul Clark, Sherman Curtis, George Womack and J. M. Burks of Kerrville and Legion, Texas.

It is the plan of the local post to reorganize and keep active a post for Junction. There are a number of things that an active Legion can accomplish and our boys are going to afford that service to this community. Perhaps the strongest organization in existence is the National American Legion. It is non-political and uses its influence only in constructive legislation. Many good laws have been made as a result of their work and several good laws backed by them are now pending before Congress, anent the bill to draft industry, the same as man power in the event of another war. When war becomes unprofitable to everybody, there will be no war. The recent war made more millionaires than any other event in the history of this country. When those millions are saved to our people and our government, some of the agencies that caused our recent struggle will cease to exist.

As a last minute report on the membership drive which is now under way, 50 new members have been signed up.

MRS. J. S. WEBBER ANSWERS LAST CALL

Last Friday Mrs. J. S. Webber of this city passed over the Great Divide. She had lived in Junction for the past three years.

Mrs. Webber is survived by her husband, eight sons and two daughters.

Of these present at the funeral were Mr. Lad Webber of Artesia, New Mexico, Mr. William Webber of Brownwood, Mr. Shelby Webber and Mr. Wert Webber of Plains, Texas, Mrs. Ruth O'Neal, Miss Ludie Webber and Mr. Sanford Webber of Plains, Texas, Mr. J. L. Webber, Mr. Ford Webber and Mr. Woodrow Webber of Junction.

The following out of town friends were here to attend the funeral: Mrs. Goldie Young of Dallas, Mrs. Parilee Hunnicutt of Fort Worth, Mr. and Mrs. Price Hunnicutt and children of Fort Worth, Rev. James Ray and wife of Mason, Mr. and Mrs. E. F. White and children, Mrs. S. F. Garner and Miss Ella Davis of Eastland, Mr. and Mrs. Jake Ford and children of Anthony, New Mexico, Mr. and Mrs. C. H. Garner and daughter of Colorado, Mr. and Mrs. Robert H. Garner of Colorado, Mrs. W. H. Hague of Plains, Mr. T. N. Curtis of Medina, Mr. and Mrs. Louis Curtis of Kerrville.

Bill Hamer passed through Junction Tuesday enroute to Goliad. Mrs. Hamer will accompany Bill to Rocksprings where they will make their home.

S. S. Bundy spent the first of the week in San Antonio.

NEW THEATRE BUILDING NEARING COMPLETION

In the near future Junction will have open one of the most modern picture show theatres in all of Southwest Texas. The work of completing this magnificent show building is fast drawing to a close and already preparations are being made by the management for the opening day.

Before the building was begun Mr. Lockley, the manager, made a special trip to Dallas and San Antonio to consult with theatre artists with reference to construction and ornamentation. The very latest design was utilized in the construction of the building for the convenience and safety of the patrons. Practically every fire hazard was avoided, the operator's booth being of solid concrete and every other precaution taken to avoid the disaster which occurred to the old Leroy on September 23.

The interior decorations are of the very latest type and when installed will present an interior finish that will do credit to a town the size of Junction and in fact a city of much more population as the builders have provided accommodation for many more people than live here at present.

In addition to the building, Mr. Lockley states that he has already secured contracts with the best picture producers and will offer his patrons the latest and best that can be obtained. We know that he will do this as he was showing just this class of pictures when his theatre was destroyed by fire last year. We are glad to see this fine building nearing completion in our business district, and feel that the picture loving public will soon again have the pleasure of patronizing home industry.

LONDON SCHOOL NEWS

(By Hazel Emma Herbst)
Miss Dorothy Rivers suddenly took sick last Thursday. She was carried to the doctor at once. We are proud to have her back teaching Monday.

Miss Jessie Weaver, the primary teacher, made a business trip to Brady Tuesday. Mrs. Sam Weaver taught her room.

Mrs. Anna Mae Wooten paid us a visit Friday. Shorty took her place in our basket ball team and toured to Menard with the team.

Ivy school paid us a visit Thursday, the 1st. Several ball games were played. The boys game ended in favor of London.

Villa Massey, Letha Fae Brewer and Buster Smith are still on the sick list.

The leap year party at Bob McKinney's hall given by Misses Faye McKinney and Dulcie Ellis proved to be a great success.

The basket ball girls toured to Menard Friday afternoon. The game was very hard fought, the score being 11-14 in Menard's favor.

We are all studying hard for our monthly exams. We are all anxious to see our report card. We are wishing to be exempt from finals.

We are glad to have three new pupils with us—Verna Ricks of Red Creek and Minnie and Hugh Sehorn.

Leona Lawson is back in school after two weeks of sickness. We are glad to see her back.

We are sorry to hear that we are going to lose Cecil Ray Baker from school. They are moving to Abilene.

Miss Dorothy Rivers was instructing her pupils in the use of a hyphen. "Clara Bessie, give me a word containing a hyphen." Clara B. "Bird-cage."

Mrs. Rivers. "Now, Clara B, why do we put a hyphen in bird-cage?" Clara B. "For the bird to sit on."

Robert Gatlin of the University of Texas was a week-end visitor here.

Mr. and Mrs. Dee Gibbs were San Antonio visitors this week.

FIRST VOLUNTEER FIRE DEPARTMENT ORGANIZED

On Monday night, March 5th, an event took place that should go down in history as a red letter day for the city of Junction. That night should be remembered as the night when Junction's first Volunteer Fire Department was organized.

Mr. Hankins reported that he had a list of 36 names who desired to join Junction's Fire Department.

The meeting was then called to order by the temporary president, Brother Hill, Walter Buck acting as temporary secretary, and immediately proceeded to business.

The election of permanent officers came first in the order of business, and the following officers were elected.

John M. Hankins, chief; Leon Powell, assistant chief; Rev. Hill, president; A. W. Loeffler, vice president; Lanan Bissett, secretary-treasurer; Rev. Crab, chaplain; C. T. Hokekamp, recorder.

Many things were then discussed that were of interest to the city, as well as to the fire department. By a vote of those present, it was decided that the chief and assistant chief divide the membership into two drill teams, and to hold in the near future a competitive drill between these two teams.

It was then decided by the membership present that the first important object in view should be the securing of a house adequate to take care of the fire fighting equipment we now have.

The enthusiasm shown at this meeting clearly demonstrated that with the moral assistance of the citizens of Junction, and whatever aid possible from the business men, the C. of C. and the City Council, that Junction would soon have a fire department that would be a credit to this city or any other city in its class.

POLO RESUME

(By Edwards, Plains, Correspondent)
Fort Clark 19; Fredericksburg 8.

Clark carried a handicap of four scores, so Fredericksburg only earned four.

Austin 22; Stonewall 16.

Austin's handicap being 15, Stonewall only earned one score while Austin was making 22.

Camp Wood 13; Army team 12.

A hot one; 10 periods, 7 to 10 minutes each period. Camp Wood had seven scores to go on, the Army team's handicap, so they only earned six scores while their opponents made 12.

Camp Wood 11; Ninth Infantry 8.

Beginning at scratch, or even, as we start all our games here, the game would have been 7 to 8 in favor of Ninth Infantry, but their handicap of four goals gave Camp Wood 11.

At this time Camp Wood looked a favorite to win. Their next game was with Fort Bliss of El Paso, a team that carried a nine goal handicap, but Camp Wood was only able to earn two goals while Fort Bliss was making 13, leaving the score 11 to 13 in favor of the El Paso mallet men.

This "low down" on the insides of the game is copied in part from the San Antonio Express, and will enable all of us to know just how far we are from being the polo champs of the universe. San Antonio polo experts said that Camp Wood's inability to hit and ignorance of "relay formation" were the causes of their downfall. Personally I was not able to detect any of these defects in them last summer at Sonora but we will have to bow to the judgment of men who have talked polo in their sleep for the last twenty-five years or more.

Anyway, they sold their horses and went home, and will be a lot easier for us fellows to get along with than if they had copped that much sought-after silver cup. As it is they may even play a little polo with

JUNCTION-KERRVILLE ROAD TO BE RESURFACED

Perhaps the most cheering news that we could announce came to us this week with the information that a portion of the road that will be surfaced this year in Texas by our State Commission is the highway between this place and Kerrville.

One of the most travelled roads in all the State, there has been an urgent need that highway 27, or better known as the Old Spanish Trail, be surfaced. Gravel surfacing was much better than the old system of having black mud to negotiate occasionally, but perhaps there is nothing that wears a tire more than gravel top, and the construction of a smooth surface by our commission will save the travelling public many hundreds of dollars and also the state much maintenance money.

Of late months, due to the necessity for driving stock and for other reasons, it has been deemed necessary for highways of this class to be eighty feet in width and for that reason our Commissioners' Court have been requested to secure the eighty foot right of way on highway 27, east of the court house to the line. We must bear in mind that the court can only do what they have funds to do with, and they now have no funds that could be availed of for that purpose, and our problem is to help them get them, for we surely cannot afford to let an opportunity like this get by us. It will be worth more than any other one thing to Kimble County at the present time. Now is the time to act.

The State proposes to spend approximately fourteen hundred dollars per mile for twenty-five miles. This would amount to about \$21,000.00. It would probably cost the county ten thousand dollars to move the fence and fifteen hundred dollars to buy the added right of way. Let us get busy at once.

TO THE PEOPLE OF KIMBLE COUNTY:

A fire prevention committee has been selected, and chairman appointed to provide fire protection for this community.

A company known as the Fry-Fyter Company has agreed to give a \$275 40-gallon chemical fire engine free to the community, provided a reasonable number of property owners will co-operate with the local committee.

An agent of the Fry-Fyter Company will demonstrate the superiority of these fire extinguishers on Monday at 3:00 o'clock p. m. in the town of Junction. The people of Kimble County are cordially invited to witness this demonstration.

The plan, which will be explained by the committee, does not call for any subscription or payment of money except for the purchase of one or more portable Approved Fire Extinguishers at a very nominal sum, which you will keep on your premises, and as your own property.

Keep the date in mind and be on hand.

Chamber of Commerce and City Council.

CHURCH OF CHRIST

Bible classes will meet at 10 a. m.

Praching at 11 a. m. and at 7:30 p. m.

Our protracted meeting will begin June the 3rd and run over the 10th, and include the first and second Sundays in June.

J. S. Newman, Minister.

Mr. and Mrs. J. M. Livingston visited the Rev. Warren and Mrs. Homer Livingston, Sr., in San Angelo last week.

SAN ANTONIO BEARS VS. DETROIT TIGERS

In these columns it will be noted that a real treat is in store for local baseball fans at our neighboring town, Fredericksburg, where on March 14, at 3:30 an exhibition game between the Detroit Tigers, of the American League and the San Antonio Bears of the Texas League will be played. The best of each team will be in the lineup, and it will be the first time in history that fans of this section will be accorded an opportunity to see the "big boys" in action. For instance there will be Harry Heilmann, last year's champion slugger of the American League, and Fothergill, the great Detroit left fielder and biggest, heaviest man in the Major League. With the Bears will be seen Frank Gibson, famous catcher, and popular Bear pilot with his string of players that are said to be the best in the history of San Antonio Club.

The San Antonio Bears whose training camp is this year at Fredericksburg have been in two daily workouts since their arrival in camp, and manager Gibson says they will be in tip-top shape for the game with Detroit on the evening of March 14. The Tigers who are in training at San Antonio have also had daily workouts for the past three weeks, and in all probability will make it hot and peppery for the Bear squad.

Fredericksburg on this day is expected to be the scene of thousands of baseball fans and visitors, for there still exists the old time hospitality and its people know how to entertain. This is made evident in the admission charged for the exhibition game which will be 75c for adults and 35c for children under fifteen years of age. At night a dance will be given in honor of the two teams, Bears and Tigers, to which the public will be cordially invited.

Beginning March 11 and every Sunday during the Bear training season, exhibition games will be played between the Fredericksburg Giants and the Bears which will also prove interesting to fans. The Giants have about three weeks training on the Bears.

TO THE PEOPLE OF KIMBLE COUNTY:

A fire prevention committee has been selected, and chairman appointed to provide fire protection for this community.

A company known as the Fry-Fyter Company has agreed to give a \$275 40-gallon chemical fire engine free to the community, provided a reasonable number of property owners will co-operate with the local committee.

An agent of the Fry-Fyter Company will demonstrate the superiority of these fire extinguishers on Monday at 3:00 o'clock p. m. in the town of Junction. The people of Kimble County are cordially invited to witness this demonstration.

The plan, which will be explained by the committee, does not call for any subscription or payment of money except for the purchase of one or more portable Approved Fire Extinguishers at a very nominal sum, which you will keep on your premises, and as your own property.

JUNCTION TAILOR SHOP BURGLARIZED

On Friday night of last week an unknown burglar broke into the cleaning room of the Junction Tailor Shop, crawling thru a window into the press room and thence into the gent's furnishing department where he opened a cash register and obtained the sum of \$6.25 in cash.

So far as the proprietor has been able to determine there was no other article taken. No clues of any nature were left that would disclose the identity of the party.

This is the first time in many days that any place of business has been burglarized in Junction. In fact the criminal docket of this county will disclose very few of this nature of cases ever having been charged to anyone in Kimble County. With the road bums and other questionable characters that are passing through, our business interests should be especially particular in closing their business houses and placing all their valuables in a good safe.

MAYOR AND MRS. HOLEKAMP IN AUTO WRECK

Word was received here Wednesday that Mayor and Mrs. Hokekamp's car was wrecked near Boerne Tuesday. Both received painful bruises and cuts from flying glass.

From what we can gather the mayor's car was struck from the rear by a truck driven by a negro, causing the car to leave the highway.

The Mayor and Mrs. Hokekamp are expected to return to Junction Thursday.

THE METHODIST CHURCH

Do you go to Sunday School? If not, you are missing something worth while, something you can't afford to miss. So come next Sunday. Classes not only for boys and girls, but for men and women—all ages. A welcome awaits you.

Morning worship, 11 o'clock, the pastor preaching. The subject will be "Putting First Things First."

Epworth League, Senior and Junior, meets at 2 p. m. Hi-League meets at 3 p. m. The great cause of Jesus Christ has a wonderful appeal to young people. Get with this splendid work.

Prayer meeting Wednesday night at 7:30 o'clock. You will enjoy this service. Choir practice follows.

You are cordially invited to attend all the services of the week.

BAPTIST NEWS

Sunday School at 10 a. m.

Preaching at 11 a. m. and 7:30 p. m.

B. Y. P. U. at 6:30 p. m.

Prayer meeting each Wednesday at 8 p. m.

W. M. U. will meet at the church Tuesday at 3 p. m.

"Be thou faithful unto death, and I will give thee a crown of life."

The employer always demands of the servant a full day's work. The rancher always expects his punchers to be faithful and in days gone by that often meant unto death.

Most present day Christians spend six days of the week thinking only of making a living and then on Sunday they get up about 10 a. m. and loaf the rest of the day. What if your hired man got up every morning about 10 and then loafed the rest of the day? He wouldn't last long. Truly God is long suffering. If you expect loyalty, why not give loyalty? An evidence of loyalty to God is attending His worship.

The argument that Sunday must be spent in recreation is faulty because God's promise is questioned. He demands that the Lord's day be kept holy. Honor God with your substance, keep His Sabbath, take time during the week for recreation and God will bless abundantly. Try it and see for yourself.

"GO WEST, YOUNG MAN!" AND HE WENT WEST

(By Chet Harris, en route)
Starting from Kentucky, en route to the Pacific Coast, we have traversed many glorious miles in the Southland, which seemingly has grown more beautiful and wonderful with each passing mile.

Industry, too, and the general activity of its people, have surprised us, so much in fact, that it deserves a story.

Not so many years ago the slogan of the nation to its youth was, "Go West, young man, go West." For there, it was said, lie vast opportunities for the individual with a willingness to endure hardships to earn success.

Adventurous spirits of the day were thrilled by stories of gold, tales of conquest and adventure. They answered the call. The West was won.

Today there is at hand a readjustment. There is still the call of undeveloped lands, the longing for conquest and adventure and the promise of fortune's favor. And the answer is, The Southwest.

It is a land that has known hardships, that has broken the ashen crust and moistened it with tears, but withal it is a land of marvelous beauty, untold treasures and undeveloped resources.

Men of vision are beginning to comprehend and to recognize this territory as the treasure house of the world. The tide of capital and population is turning south and westward. The outcome is inevitable. The land will be won.

Kimble County and Junction, situated in the largest sheep-raising region in the country, and nestled in an atmosphere of natural beauty, will share in the coming tide. Kimble County and Junction will be won.

NOTICE

Notice is hereby given that the first Saturday in April is Election day for the election of County and District School Trustees.

The law provides that the District School Trustees shall order the election, post the notices and appoint the election officers to hold said elections. This probably will not be done.

However, I consider it my duty to advise the people of the election and to suggest that they have a constitutional right to have said election regardless of whether the above law has been complied with or not.

All County or District School Trustees serving by appointment, only hold office subject to re-election or re-appointment on the 1st Saturday in April thereafter said appointment.

If the people of any of the Common School Districts in this county desire to hold these elections, you may call at my office, get the election supplies and hold your election on said above named date.

You are further advised that if you fail or refuse to hold said election it becomes the duty of the County School Board to appoint District Trustees, and if no election be held for County School Trustees then it will become the duty of the Commissioners' Court to appoint a full Board of five members.

J. B. Randolph.

AMERICAN LEGION TO HOLD REUNION

San Antonio, March 5.—Members of the famous Ninetieth Division, made up of Texas and Oklahoma men, will hold a reunion at San Antonio during the national convention of the American Legion here October 8 to 12.

Preliminary arrangements for holding the reunion were made here recently by Arthur J. Reinhart, street commissioner of Dallas, president of the Ninetieth Division Association, and W. C. Menton, also of Dallas, secretary, with the Legion convention bureau here.

The reunion will be in the nature of a visit to the old division's training camp, as the Ninetieth was trained at Camp Travis at San Antonio.

Major Sylvan Lang, of San Antonio, was appointed general chairman of the arrangements committee for the reunion. Joe Sheldon, also of San Antonio, is vice chairman.

Major General Henry T. Allen, of Louisville, war-time com-

mander of the division, will be present at the reunion, according to Secretary Menton. Gen. Patsy O'Neil, of Oklahoma, General McAleander and other high ranking officers of the division will also be present.

One entire floor of the Lanier Hotel has been reserved for the division. Headquarters for the convention will be in this hotel.

The annual banquet will be held at the Gunter Hotel on the night of October 8, the opening day of the Legion convention.

Members of the division are advised to arrive at the hotel, 1128 Kirby Building, Dallas, Texas, for information concerning arrangements for the reunion. They are especially urged to write in and make their room reservations early.

For saving and speed**

This Week

By Arthur Brisbane

"If a drop of salt water could talk it would tell the whole story of the Pacific."

One Santa Fe freight train going through the Kansas City yards to Kansas, Oklahoma and Texas grain fields told the story of progress and prosperity in this country and promised a solution of its labor problem, aggravated by immigration restrictions.

That train of thirty-one cars carried \$250,000 worth of "Combine Harvesters" and will soon be followed by a thousand carloads of those labor-saving machines. They cut grain, thresh it, pile up the straw, delivering the grain in sacks or by spout to miniature grain elevators. In Kansas last year they saved the work of 40,000 men.

Employment conditions are not satisfactory in New York State and Governor Smith instructs public officials to help "take up the slack" by putting men to work on public enterprises.

That should be, automatically, part of National and State programs.

A farmer finds something for his farm hands and his own hands to do in Winter, when crops are in. A good farmer keeps his horses at work, earning their keep in Winter, hauling wood or otherwise.

National and State governments, all needing roads, canals, drainage, all sorts of improvements, should find work for everybody willing to work, and at decent pay.

Thomas A. Edison says he is really 162 years old, because he has done two days' work every day of his eighty-one years.

He did ten thousand years' work when he changed man's lighting system from kerosene to electricity. His habit of working two days in one accounts for the fact that mentally he is forty, not eighty-one.

An active mind stays young in man or woman.

Women grow old prematurely because badly organized civilization gives them nothing to do except talk and dress when their children are grown.

Eskimos, within reach of civilization, sell their valuable furs to white traders and wear coats of leather and cheap, ready-made suits. They can sympathize with some farmers that sell cream and butter to cities and eat oleomargarine.

"Flaming youth," dancing, drinking or shooting worries other countries also. Lawyers from Japan, France and Britain are watching a Berlin murder trial. Hans Krantz, aged nineteen, helped his young friend, Scheller, and Scheller's sister, Hildegard, to pass an evening pleasantly with dancing, tobacco and much drink. Hildegard, only sixteen, smuggled a friend, Otto Stephan, into her bedroom, and Hans, attached to Hildegard, told the girl's brother he ought to kill Stephan. He did it, then killed himself.

The question is, did Krantz commit murder when he told his friend, "Avenge your sister's honor by killing the man?"

Americans talk today of many things—prosperity, politics, assorted crimes, sports.

News that will interest future generations is the fact that actual moving pictures of human beings were sent through the ether, without wires, across the Atlantic Ocean.

Human beings actually saw each other, separated by three thousand miles of water.

If this is done by a race only 17,000 years from the Stone

Age, who can doubt that a million years hence will see pictures, coming through the ether, of life on other planets.

Mr. Bonfils, through his Denver Post, tells the world he wants "every family in the United States to own a home, automobile and radio," because "this would tremendously increase the happiness and prosperity of all our people."

It would have seemed preposterous in Rome to suggest that anyone but the Emperor and a few of the great should own a bathtub. There was serious protest against installing the first bathtub in the White House, on the ground that it was not democratic. The Bonfils trinity of comfort—home, auto-

mobile and radio—for every family will be realized, plus freedom from worry in old age, more important than the other three.

The office should seek the man, but if a man waited for it to seek him every morning he might have to go hungry.

Some one should see to it that the Democratic donkey gets new shoes before he's turned loose with all those Texas longhorns.

Charity not only begins at home but in most cases ends there, too.

The human body is a marvelous piece of machinery, all right, for no matter how much it's used the tongue never seems to wear out.

**THE CITY DIVIDED
AGAINST ITSELF
CANNOT PROSPER**

Only a few months ago Junction was a town; now it is a city. Fires were very destructive in the past year, but the brave people soon began to rebuild. Where the frame structures once stood, we now find large fire-proof buildings going up. But not only is the city rebuilding, it is enlarging by adding many other business buildings. Such a building program, as is now in progress, has never been seen heretofore.

The traveler, who journeys through the splendor of Kimble County marvels at the beautiful mountains and streams which are the handiworks of the Great Creator, but surely as this traveler enters the prosperous little city of Junction, in the fork of the Llanos, he sees complete unity and a great future for the fast growing city. He can't help but wish the little city success and continued unity.

Our people must forget self and our little differences. Why shall we now wreck this wonderful unity, this fast progress, and kindly feeling toward one another? We are now facing a great problem, which is in our control. We are endangering our own unity and our own interests and our own prosperity, with the "Water Question." An ounce of prevention is worth a pound of cure; yes, an ounce of prevention is worth a ton of cure. Why not use the prevention? People of Junction, this peaceful and prosperous city will continue to be united, or it will not be peaceful and prosperous if it is divided. We will make it by unity, or we will break it by division. Let's get together on this all-important question. "The house divided against itself cannot stand." The only way out is to have unity by a "Gentleman's Compromise."

(A school-teacher who wants to live in Junction.)

LUNCHEON

On Wednesday, February 29, Mrs. W. P. Riley was a gracious hostess to the members of the Ladies' Afternoon Card Club and a number of friends.

A Mexican dinner of chile con carne, frijoles, Spanish rice, hot tamales, enchiladas, tortillas, coffee and pineapple topped with whipped cream and cherry was much enjoyed at the noon hour. Miniature Mexican baskets filled with toasted, sweetened nuts were the attractive plate favors.

A Mexican serape was placed on the piano and a Mexican pottery added to the atmosphere of "Mexico," while a bouquet of red carnations and fern and red tapers in pretty candlesticks were used for further decoration.

Bridge was the diversion of the afternoon. An interesting departure from the beaten path was the idea of giving the reward to the holder of the lowest score. Mrs. Carl Wolff made low club score and Mrs. Frank Ridgeway low guest score. These ladies received hand-made reed trays, decorated with exotic birds, similar miniature trays went to the holders of the high scores, Mrs. W. W. Buck and Miss Fae Taylor. Dainty Mexican filigree straw table mats went to Misses Mary and Flora Mae Spiller, Clara Fritz, Mesdames Felix Watson and Ed Allen and others who made low table scores.

A surprise feature of the occasion for Mrs. Riley occurred when Mrs. Wolff presented her with a set of Maderia napkins in behalf of the club with best wishes for "a happy birthday."

This occasion was, also, the club birthday and at the close of the afternoon a pretty cake decorated with clusters of cherries and surmounted by eight red candles was brought in. Mrs. Wolff presided over the cake and Mrs. W. W. Buck poured the tea. Little Mexican feather cards were, also, presented each guest.

**NOTICE OF ELECTION FOR
COUNTY SCHOOL TRUSTEES**THE STATE OF TEXAS,
COUNTY OF KIMBLE.

To all whom this may concern: By virtue of authority vested in me by law, I hereby order, and notice is hereby given, that there will be an election held on Saturday, the 7th day of April, A. D., 1928, by the qualified voters of Commissioners' Precinct No. 1, 2, 3 and 4, in said County, at the voting places in and for each Common School District in said Commissioners' Precincts, for the purpose of electing one County School Trustee in and for each Commissioner's Precinct of said County; and one County School Trustee for the County at large.

Said election shall be held at the same time and place and by the same election officers that hold the election of Common School Trustees in and for said Common School Districts, and the polls at said election places shall be opened at 8 o'clock a. m. and shall not close before 6 o'clock p. m.

OBITUARY

Mr. Frank E. Kelley died in San Angelo February 26, and was buried there the 27th. He was 68 years old.

Mr. Kelley was born in Gonzales, and in early manhood he moved to Kimble County where he lived for some thirty years. He had many friends and acquaintances in this county who mourn his going. Surviving him are his wife, Mrs. Ella Kelley of San Angelo, four daughters, Mrs. Rattie Miller of Uvalde, Mrs. Loma James and Mrs. Mildred Neuman of Edinburg, and Miss Estell of San Angelo, one son, Clinton of San Angelo, a brother, Mr. W. H. Kelley of Sonora, and a sister, Mrs. John Allen of Hunt. All were with him at the time of his death except Mrs. Neuman and his sister. Other members of the family who attended the funeral were Mrs. Taylor Emerson of Big Lake, Mr. and Mrs. Robert Kelley of Sonora, and Mr. and Mrs. Charlie Bishop of Junction.

Don't Wait—Tomorrow may be too late. Let our mechanic look your car over today. It will save you time, money and possibly a wreck. Our shop is equipped with modern time saving machinery.

PHILIP JOSEPH

WATCH OUR WINDOWS

A Complete Water Works System for Junction

The City Council has called an election for authority to issue bonds with which to finance the building of a Water Works System for Junction. Every tax payer who is a voter will have the opportunity to express his will in this matter. This article is printed to inform the voters on the following phases of this matter: 1st. A description of the plant to be built; 2nd. The benefits to the town in reduced insurance rates and water service; 3rd. The cost to operate the plant and its possible profits.

Description of the Proposed Plant

The Water Works System has been designed by the Municipal Engineering Company of Dallas, who have built many successful Water Systems in Texas.

The water for this system will be secured from filter galleries which will be sunk in the gravel strata back from the river bank. This is done so that in periods of flood stage clear water will be available.

The intake from these galleries will be protected by concrete well casing, which will be carried above the possibility of overflow. Near this curbing will be a concrete power house and pump pit where electric driven pumps will take the water and deliver it into a 50,000 gallon concrete covered reservoir. The location of this water supply will be made after a test has been made. It may be located where shown on the plans which are exhibited, or it may be near the South Llano River. Tests will be made, and the best location selected.

In the event that as much as 250 gallons per minute can be secured, the surface reservoir will be omitted and a saving of at least \$2,000.00 effected in this item.

A concrete fireproof power house will have installed in it a 250 gallon per minute motor driven pump. This machine will take the water, either from the

producing strata or from the storage reservoir, and deliver it into a concrete reservoir of 100,000 gallons capacity, located on the mountain west of the City and elevated 100 feet above the City.

There will be 43,822 feet of water pipe in the system of mains laid throughout the town. The location of these mains is shown on the map above referred to. There will 8-inch cast iron mains from the tank and tower and in the business section of the City. Six inch and four inch cast iron pipes in the fire protection lines. Along all these lines there will be connected 29 fire hydrants, 22 of them in the business and residence section will have two hose connections and one steamer connection and 7 in the residence section will have two connections for fire hose.

There will be 31 cast iron gate valves covered with cast iron boxes and covers. These are designed to cut off the water from various sections to facilitate repairs and extensions in the future. All pipe of 2 inch diameter and smaller will be galvanized. These lines are for house service only and are distributed and connected into the larger lines that every house connection will serve water under good pressure for all purposes.

The Benefits of this Type of Plant

The building of this plant will make effective a key rate of 53c, while night watch service and the posting of a reward for conviction of persons guilty of arson and teaching fire prevention in the public schools will make a further reduction of 5c, or a key rate of 48c. This is less than one-half the present key rate and will save the people of Junction each year at least \$3,000.00.

Many people then can afford to carry insurance, who under present conditions cannot do so.

The pipe lines laid out will serve 285 buildings now existing in the City of Junction. Therefore all the people can have water, whenever they open a faucet. There will be no muddy water, therefore, the service will be good every day in the year.

The pipe and all parts of the system will be of the very best quality of material—cast iron and concrete, which alone can make a plant of a permanent character.

We assume that 250 connections will be made in one year and also assume that the City will fix its rates at not less than \$2.00 for 2,000 gallons, and 25c for 1,000 gallons for all over 2,000 gallons. This should produce a revenue of \$543.75 per month.

This is made up as follows: 250 connections at minimum charge of \$2.00 per month, \$500.00. Hotels, garages, drug store and business houses will average 175,000 gallons per month over the minimum which at 25c is \$43.75, or a total revenue per month of \$543.75, or yearly \$6,525.00. Operating expenses \$170.00 per month, or yearly, \$2,040.00. Yearly net, \$4,485.00. Yearly interest on bonds, bearing 5 per cent interest, \$2,750.00. Yearly bond payments, \$1,000.00. Total, \$3,750.00.

Thus it will be seen that with charges of \$2.00 monthly minimum for water, this plant can be expected to pay off the bonds as they fall due.

It must be understood that at least one year will be required to build the business up to this point, and a tax to cover the interest will have to be collected the first year.

There are those who will question the correctness of this forecast. There was published on August 27th, 1927, a list of 19 towns and quoting the rates

charged in each town as well as the net earnings of each plant. Only three of the towns in that list were making a less net earning than the bond charges against the towns named, and each of those had fixed a rate of \$1.25 per month or less. One of the towns listed did not state their earnings. This was Waelder, Texas. The Municipal Engineering Company built this plant and last week a member of this firm visited Waelder and found that this plant, less than two years old, has 265 connections. They are pumping water from a deep well, raising the water twice as far as Junction will have to raise water, and the net profit is enough to carry the bond issue which built the plant.

Junction is admirably situated for the possession of a profitable water system. Most Texas cities have to rely on wells which are expensive to operate, or to build costly dams and reservoirs, and to treat the water thus impounded, all of which adds to the cost of operation and yet they produce profits from their operation.

The plant designed here will have none of these expenses. Securing the water from the infiltration from the Llano River, will insure the City from the expense of keeping up levees and dams. High water cannot cause loss and damage.

It has been proven that electric current in operating plants the size of this is cheaper than to keep up the expense of a water power in a stream subject to the disasters of overflow as is the case of the Llano.

This condition would not be true if all the power which the river is capable of producing were to be used, but the cost to harness the river in a permanent manner to take only 30 or 40 horsepower is prohibitive. Every phase of this question has been studied and the plant has been designed to operate continuously and economically.

The people of Junction have the opportunity to secure this splendid improvement, to enjoy clear water instantly available, to own and control the plant, to save a considerable sum each year in their insurance, to have cheap water, and this without sacrifice or burdensome taxes, and as the bonds are paid off the water rates may be reduced as has been done in most Texas towns who have built similar plants.

CITY COUNCIL OF THE CITY OF JUNCTION, by E. HOLEKAMP, Mayor.

CONGRESSMAN TOM CONNALLY'S ACTIVITIES

(Condensed statement from speech by Congressman Tom Connally in the House of Representatives, February 9, 1928.)

It is a notorious fact that during the fall of 1927 the cotton market was scandalously manipulated. In August the government estimate was 13,492,000 bales. December cotton on the New York Exchange went to 23.70 per pound. However, the big spot operators and the exchanges began a drive to hammer down the price, and December cotton declined 18.92. The September estimate was 12,692,000 bales—practically a million bales less than the preceding month. Through this conspiracy, with a million bales less cotton, December cotton was beaten down to 20.23, or more than three cents per pound under the August price. The estimate for October was 12,678,000 bales, and in spite of that low estimate, December cotton went to 19.40. And under the November and December estimates, December cotton was hammered down to 17.96. The cotton farmers were robbed of nearly \$30 per bale below the August price, and yet the estimate was a million dollars less than August.

My bill proposes to put the cotton exchanges under practically the same rules that govern the grain exchanges. My bill is designed to prevent manipulation of the market. It provides for violation of its provisions. It will prevent "straddling" and "washing the market." It will prevent artificial schemes to depress the price by fictitious sales of cotton when there is no bona fide intention to buy or sell a single bale of actual cotton. It will prevent the tendering and retendering of low grade cotton to depress the price of the higher staples.

The conspiracy between the big spot cotton operators and the exchanges has been engineered in an endeavor to shake out of the farmers' hands the spot cotton which has been held by farmers all over the country. The operators want to buy this cotton at a low price. Once it is out of the farmers' hands, the price will rise.

The cotton farmers of the South have been robbed of millions upon millions of dollars by the manipulation of the exchanges and through fraudulent conspiracies to depress the price. It is time to stop such raids. The exchanges must be regulated and required to restrict their operations to legitimate transactions. If you will adopt my bill you will give the farmers real relief and you will permit the normal laws of supply and demand to operate.

Congressman Tom Connally gave to the press the following statement with reference to the vote of the Senate on the Walsh Resolution to investigate public utilities:

"The Insull utilities interests had their way in the Senate last night. The investigation of utilities was put to sleep. It was referred to the Federal Trade Commission instead of being conducted by the Senate. It went there because the Power Lobby wanted it to go there. It demanded that it go there. Since the appointment of Mr. Humphrey to the Federal Trade Commission it has been the ally and friend of big and bad business.

"Senator Walsh dug out the

M. E. BLACKBURN
Attorney-at-Law
Junction,
Texas

Will Practice in all State
and Federal Courts

truth in the Tea Pot Dome Scandal. As investigator of the utility companies he would also dig out the truth. There are those who do not want the truth exposed. They favor secrecy.

"Mr. Smith of Illinois was kept out of the Senate because the Insull utility companies contributed to his campaign. If Mr. Smith had been seated he would have voted to send the investigation to the Federal Trade Commission. The Senate held him unworthy to sit in the Senate, and yet a majority of the Senate voted just as Mr. Smith would have voted. Senator Mayfield and a group of Democratic Senators voted with the Republicans, led by Watson of Indiana.

"Stewart of the Standard Oil of Indiana is defying the Senate and the government in the Tea Pot Dome Inquiry. Sinclair defies the government and its courts.

"The Insull interests are having their way in the Senate. How long will they be allowed to rule?"

(This paper is not partisan in the matter of any candidate's political aspirations, but from time to time as information is provided us we will inform our readers of the policies of some of our candidates.

The cut and excerpts reprinted is sent us by Mr. Tom Connally who is a candidate for the United States Senate).

DODGE OUTPUT

Factory output of Dodge Brothers passenger cars and Graham trucks during the month of February from the plants of Dodge Brothers, Inc., in the United States and Canada, according to preliminary figures released by the factory in Detroit was 20,727 units, a gain of 25.9 per cent over February last year when the total was 16,463.

The gain over January this year, when 12,764 units were shipped is 62.3 per cent.

WORDS, WORDS, WORDS

After seventy years of painstaking labor, the celebrated Oxford dictionary has finally been completed. The last word has been found and set down. This last word, "zyxt," the 411,047th word in the language, is the obsolete form of "what" would now be "thou sayest." It seems the ideal last word for a book of words.

Back in 1882, Sir James Murray sent the first pages of A to press. This explains why such a common word—now—as "appendicitis" is not in this huge dictionary of ten volumes. In 1882, "appendicitis" had not been recognized as a separate disease and the word had not

been coined.

But there will be a supplement to the work to take care of just such omissions. The supplement will have to be a very large one, and perhaps it is just a bit early to begin talking about it since Volume X, the last one, of this great dictionary is not to be published until late March. But no dictionary will ever catch up with a language as alive as English.

LONDON LOCALS

D. G. and J. W. Adams visited relatives at Roosevelt Saturday and Sunday, and report a pleasant time.

Mr. Jim Wright passed thru London March 1st on his way to Brownwood.

The leap year party at the McKinney hall on Wednesday night was well attended and all report a pleasant time.

Mr. C. R. Robinson has lost his drill bit in a well on the D. W. Slaton ranch over 300 feet deep.

Miss Jessie Weaver and her mother made a business trip to Brady last week. Mrs. Dick Weaver teaching in Miss Jessie's room during her absence.

Mrs. Velma Stewart of Brownwood is visiting her mother and sister, Mrs. J. W. Ellis and Miss Dulcie this week.

The services held at the Christian church Saturday night, Sunday and Sunday night were well attended.

Mr. L. A. Ivy and G. T. May took a truck load of broom corn brush raised by D. M. Stewart to Abilene which sold for \$130 per ton. Mr. Ivy left last Wednesday with another load for the Weaver brothers.

They think they may receive even more for their brush.

Quite a number of our citizens are attending court at Boerne this week.

All our sick folks are reported doing well.

Mr. Howard Horn, our gin man, brought in a truck load of Mebane cotton seed on Monday. These seed have been ordered by our farmers.

The stock show at Mason was attended by E. H. Kothman and his family, including his married sons and their families, E. I. Cummins and wife, C. E. Lambert and wife, and others. They report it was a good stock show. That ten Poll mules from two to four years old sold for an average of \$257 each. Nine regular Herefords of same age sold for an average of \$258.88 each. Baby heaves as high as 19 cents on foot. Kimble County can do all this and even more.

We all rejoice that No. 10 highway from Denison to Del Rio has been designated.

London's second basketball team defeated Ivy first in a game Friday, the score being 31 to 12 in favor of London girls. We are always glad when our boys and girls win a victory in any undertaking. Yet we read while other boys and girls were engaged with ice cream parties, funny jokes, games and other purely pass times, Calvin Cooleidge was spending his time delving into the thought depths of some standard book of learning. The result of which made him a great man, the president of the greatest nation on earth.

IVY ECHOES

Another school month has slipped away and we are yet striving to make school what it should be.

Ola Walker and Paul Kane were absent from school Monday.

Mr. and Mrs. Clabe Walker and little son of California have come back to Texas, probably to make their home.

Both the boys and girls' basketball teams of the Ivy school went to London Thursday afternoon and played two games of ball, but London proved to be the victors.

Allie Davis visited Loma Pearl Sunday.

Mr. and Mrs. G. N. Walker were the guests Sunday of Mr. and Mrs. Henry Dodd who live at Grit.

Ivy pupils plan to give a play for the school sometime in the near future. This play will probably be the "Arizona Cowboy."

Some ranchmen have begun to shear their goats and many of the farmers are planting corn.

School motto: "United we stand, divided we fall."

CARD OF THANKS

We wish to take this method of thanking our many friends and neighbors for their kind offers of assistance and expressions of condolence during the trying hour when our beloved mother and companion departed from our midst.

J. S. Webber and Family.

IF—You want to see Harry Heilman, king of all sluggers in action be at the Detroit-San Antonio ball game at Fredericksburg, March 14, 3:30 p. m.

R. S. Price spent the weekend at Price's camp.

NOTICE TO ALL SCHOOL TEACHERS

I desire to give notice to all head school teachers teaching school in Kimble County to call at my office and get text book report blanks and personal instructions as to how they should be filled out.

I desire to impress upon you the necessity of making a complete and accurate text book report, as I will need the information before I can correctly make the text book annual report and requisition that I am required to send to Austin at an early date.

The book shortage in some of our schools is caused by your failing to make proper requisition to my office last year.

Please attend to this at once. J. B. Randolph, County Judge.

ONION PLANTS FOR SALE

ELECTION ORDER

THE STATE OF TEXAS, COUNTY OF KIMBLE. On this 14th day of February, 1928, the City Council of the City of Junction, Texas, convened in session at a regular meeting of said Council duly called by the Mayor for the purpose of the following members were in attendance: Mayor, J. A. Heyman, F. S. Blount, W. H. Blount, N. C. Patterson, Jim Maske.

And, among other proceedings had, was the following: It was moved by Alderman J. A. Heyman, and seconded by Alderman Jim Maske, that there be submitted to the qualified voters of the City of Junction, who are property taxpayers therein, the proposition for the issuance of the bonds of the said City of Junction, as follows:

"FIFTY FIVE THOUSAND DOLLARS (\$55,000.00) for the purpose of the construction of WATERWORKS, in and for the said City of Junction, Texas, the election to be held on the 20th day of March, 1928."

The motion carried by the following vote: J. A. Heyman, F. S. Blount, W. H. Blount, N. C. Patterson and Jim Maske voting "AYE," and none voting "NO."

Whereas, the City Council of the City of Junction, Texas, deems it advisable to issue the bonds of the said City for the purpose hereinafter mentioned. Therefore, be it ordained by the City Council of the City of Junction, Texas, that an election be held on the 20th day of March, 1928, at which election the following proposition shall be submitted to the qualified voters of the City of Junction, Texas, to be authorized to issue the bonds of the City of Junction, in the sum of Fifty-Five Thousand Dollars (\$55,000.00), payable serially within any given number of years not to exceed forty years from the date thereof, bearing interest at the rate of Five (5) per cent per annum, payable semi-annually, and to levy taxes sufficient to pay the interest on said bonds and provide a sinking fund sufficient to pay the bonds at maturity, said bonds being issued for the purpose of the construction of Waterworks, within and for said City, as authorized by the Constitution and General Laws of the State of Texas, par-

ticularly Chapters 1 and 7, Title 22, Revised Statutes, 1925. The said election shall be held at the Court House in the City of Junction, Texas, and the following persons are hereby appointed managers of said election, to-wit: John S. Munn, A. D. Lawler, E. M. Burt, J. A. Miller and D. P. Taylor; and the said John S. Munn shall be presiding judge; and the said A. D. Lawler and E. M. Burt shall be judges; and the said J. A. Miller and D. P. Taylor shall be clerks, at said election.

The said election shall be held under the provisions of the Constitution and Laws of the State of Texas, and only qualified voters who are property taxpayers of said City shall be allowed to vote. All voters desiring to support the proposition shall have written or printed upon their ballots, the words: "For the issuance of Waterworks Bonds."

And those opposed, shall have written or printed upon their ballots, the words: "Against the issuance of Waterworks Bonds."

The manner of holding said election shall be governed by the laws of the State governing general elections.

A copy of the order, signed by the Mayor of the City of Junction, and attested by the City Secretary of said City, shall serve as a proper notice of said election.

The Mayor is authorized and directed to cause said notice of election to be posted at the Court House, the place designated for holding said election, and at two other public places in the City of Junction, all of said notices to be posted for at least thirty (30) full days prior to the date of said election.

Passed and approved, on this 14th day of February, 1928. E. HOLEKAMP, Mayor, City of Junction, Texas. Attest: A. W. BROWNING, City Secretary, City of Junction, Texas.

EVERY CHILD has a right to the Protection of ICE

every month in the year

In every community there are certain families who seldom if ever take ice.

This not only results in great waste of food through spoilage, but frequently causes illness, particularly in the case of young children.

Are you risking your children's health by neglecting to provide this important safeguard?

Ice is so plentiful and cheap that every family can easily afford it.

Arrange for a regular supply, now.

BORDEN ICE COMPANY

Arrange for a regular supply, now.

Mrs. Nettie Brooks is in Austin visiting her daughter, Mrs. Richard A. Jones and family.

Miss Myrtis Merrill is visiting her parents in Kerrville this week.

THE EAGLE ADS GET RESULTS

Miss Mary Ellis Blackburn is spending the latter part of the week in San Antonio.

Mrs. H. H. Whitsett of San Angelo is visiting her father, Mr. T. A. Brooks and sister, Miss Fannie Brooks.

BUILD FOR THE AGES!

Thus we will have a county of which we may well be proud.

Long ago the producers of our nation began to realize the value of collective bargaining in the sale of their products, for by this method only can they expect to receive just compensation for their labors.

Every ranchman realizes this fact, for it has been the means of standardizing the price of wool and mohair.

For years Kimble County citizens have felt the need of a mammoth warehouse in which to assemble these the two most important products of this county. In the past the major portion of Kimble County's wool and mohair has found its way to warehouses outside of this county. To that extent it has assisted in the up-building of other cities and counties.

Now let's build Junction and Kimble County by storing Kimble County's Wool and Mohair in Kimble County's 1,000,000 pound capacity fire-proof Warehouse,

where the market price will be paid or liberal loans on same can be made.

WE ARE NOW prepared to store or buy every pound of wool and mohair produced in our trade territory.

BE SURE and see us before you contract or consign your spring clip.

Junction Cattle Loan Co.

And He Lived Happy

Many a success has been built on the ability to cash in on another's knowledge. The man who relies solely upon his own judgment only, sooner or later rides to a fall. Your banker is schooled in the fundamentals of sound investments and only the test of a few simple questions are necessary to put the mark of approval or disapproval on any proposition. When you bank here you can avail yourself of this service, without any extra charge whatsoever. In savings or business we can serve you. Make this your bank.

The proposition looked good to him. It appeared to be an opportunity to turn a quick and interesting profit. Then he paused to ask himself this question, "Would my bank handle this paper?"

We don't prepare especially high quality meats for one particular day's business, we have it EVERY TIME YOU COME IN! Whether it's Monday morning, Saturday night or any other time.

Cheaper Electricity Made Still Cheaper

Drastic Price REDUCTION

NEW Time Payment PLAN

ALSO NEW COMPETITIVE MODEL made to meet the demand of those who do not need as much electricity as furnished by the larger models. This eliminates any extra investment and takes away the last argument of the salesman of low priced plants. It has all the splendid advantages of the larger models, only smaller.

A BIG PRICE REDUCTION has been possible on all models because of greatly increased production.

The NEW TIME PAYMENT PLAN will now let the HEBCO pay for itself with the money you are now wasting for fuel, oil, repairs, and labor without any great initial outlay of money.

The special discount recently offered by me is hereby withdrawn as it did not harmonize with the policy of the manufacturers. You will hardly need it now.

DON'T FORGET THAT ECONOMY is only ONE of the MANY ADVANTAGES that put the HEBCO in a class by itself.

W. E. DEITERT
