

PAUL EGGERS, Republican governor hopeful, made a brief stop over in Olton Wednesday afternoon and visited with

members of the Enterprise staff. Others on hand to visit with Eggers were Mr. and Mrs. Robert Meinecke and Bill Thomas.

## Paul Eggers Visits Olton Wednesday

Republican candidate for governor of Texas, Paul Eggers, made a brief stop in Olton Wednesday as a part of his Panhandle bus tour through the Panhandle.

During the past three and one half weeks, Eggers has visited approximately 75 communities in an effort to discuss important issues of the state with citizens.

"People are at the point of rebellion because of high taxes and the high cost of living. We MUST get economy back into the government -- both in state and national levels," Eggers said. "Upon being elected, I'd

appoint a commission of qualified people to streamline our government and cut out waste," he continued. "In business, keeping the overhead down is the important thing and if it works in our businesses, then it will work in government too."

Eggers, an accountant and tax attorney, stated that this was

fundamentally good business practices that should be put to work in government.

"As governor, I will work on bringing new industries into the state. This would create more jobs and therefore the state would have more tax money. This is something that I will attend to personally. I

will not be a ceremonial governor -- I will be a working governor."

Eggers stated that he would visit other area towns and attend the dinner in Amarillo Friday night, honoring Congressman Bob Price. Gov. Ronald Reagan of California will be featured speaker.

## Two Olton Teachers Attend CTA National Convention

Two members of Olton's Classroom Teachers Association attended the annual National Education Association Convention the first week in July. Mrs. Charles Galloway and Mrs. Jimmy Jenkins were voting delegates to the convention.

Of primary interest to the two elementary teachers were

the meetings of the American Classroom Teachers.

Delegations to the Convention were regalia representative to their states. Texas delegates carried out a western theme with women members wearing white dresses with deep bib-type collars of red and blue with white fringe. Men of the Texas delegation wore blue and red vests over white shirts.

Highlight of the convention to the Olton delegates, was the State breakfast held in the Crystal ballroom Antoinette Miller, state president, presided.

A group of students from Woodrow Wilson High School presented an original musical drama, "Alice in Dallas or What's a Good Girl Like You Doing in Dallas." The presentation was a take-off on the teaching profession.

Texas teachers hosted a "real western barbecue" on the 4th of July with western decorations, barbecue and the trimmings and a rodeo for entertainment. The meal was held in the Women's building on the State Fair grounds.

The two first grade teachers returned home with the conviction that smaller schools need to be represented at the NEA conventions.

Mrs. Jenkins reports that after attending the convention and hearing reports from across the nation, "I came home so glad that I lived in such a place as Olton."

## Student Council Represented By Joel Nelson, David Howton

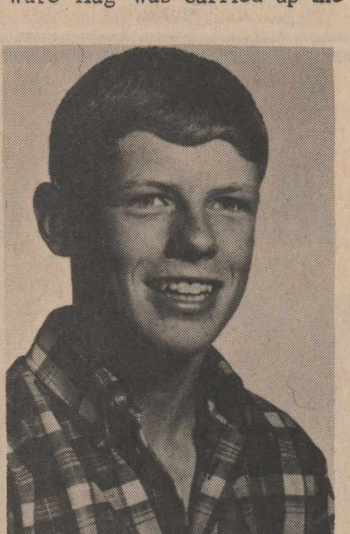

The Student Council of Olton High School was represented at the 32nd Annual National Conference of the National Association of Student Councils held in Hurst the last week in June.

Joel Nelson, son of Rev. and Mrs. Tommy Nelson, and David Howton, Student Council sponsor, attended the five-day meeting.

Theme of the meeting was "Youth in an Era of Conflict." Registration was Sunday, June 23, with the opening session on Monday. Perhaps the most impressive ceremony of the Conference, according to the high school junior who serves as the local Council treasurer, was the flag ceremony.

David Day of radio station KFJZ, Fort Worth, was narrator. The ceremony opened the Day calling the name of the first state to enter the Union - Delaware. The Delaware delegation stood while

the organist played the State song and the narrator read a list and onto the stage. There it was placed in a flag rack, brief article about Delaware. During the reading, the Delaware flag was carried up the

This was repeated for every state that had a delegation at the Conference. Forty-eight states were represented, Venezuela and Canada were also represented.

The flag ceremony was concluded with all delegates repeating the Pledge of Allegiance and singing the National Anthem.

Wednesday afternoon, June 26, delegates were taken to Six Flags Over Texas and guests for a barbecue supper at the picnic area near Six Flags. Olton was one of 25 Texas schools invited to the Conference.

Perry Hall High School in Baltimore, Md. will be the host school for the 1969 Conference.

## Four Accident Investigated On Rural Highways In June

The Texas Highway Patrol investigated four accidents on rural highways in Lamb County during the month of June, according to Sergeant Thurman Keffer, Highway Patrol supervisor of this area.

These crashes resulted in no persons killed, one person injured, and an estimated property damage of \$2,735.

The rural traffic accident summary for this county during the first six months of 1968 shows a total of 44 accidents resulting in five persons killed, 17 persons injured, and an estimated property damage of \$39,085.

"During the first six months of 1968 in Texas there were 1472 traffic deaths, or four less as compared to the 1476 traffic deaths for the same period of 1967," the Sergeant stated. However, if past trends continue the last six months will probably raise the 1968 total to one percent over the 1967 total of 3,367 deaths.

The Sergeant also stated that a training school for 120 new patrolmen with the Texas Department of Public Safety will start July 30.

To qualify for employment

in the uniformed services of the DPS, a man must be between the ages of 20 and 35, not less than 5 feet 8 inches tall, have a high school education or its equivalent, be in sound physical condition and be a citizen of the United States.

All interested young men who can meet these qualifications are urged to contact the nearest DPS patrolman or DPS office for complete details concerning the position of a patrolman, training and benefits.

## Talking With The Soviet Union

For the information of the Press: The following is the text of Senator Tower's weekly report to Texans:

I know you have been closely following, as I have, this week's news about possible new talks and negotiations between the United States and the Soviet Union. It is always important when the two greatest world powers can arrange to sit down and talk about things, but I believe Americans must be very cautious, very restrained in their enthusiasm, and not build up great expectations for major progress from any U. S. - Soviet talks.

Our historic experience with the Russians tells us clearly that they do not talk to us or to anybody else except when they feel it is in their own best interests to do so. Therefore, we ought to explore for a moment just why they may want to talk now.

The key issue proposed for joint discussion is, of course, limitation of both offensive and defensive missile strength.

It is interesting to me that this sudden Soviet decision to talk came within a week after the Senate -- supporting the advice of its Armed Services Committee -- decided to begin emplacement of a missile-defense system for the United States. The Soviets already have a missile-defense around Moscow, Leningrad and probably elsewhere across their vast country.

I have a suspicion that in any talks with us they will be talking not about scrapping the defensive system they already have, but about preventing us from putting in any at all.

In the area of offensive missiles which are the chief deterrent weapons on both sides the Soviet Union has observed that the United States has halted ICBM employment at about 1,000 hard sites. We know that by January the Soviets -- who are continuing to build hard sites -- will have more such offensive bases than we have. Then, presumably, they will talk about

limiting such sites with the U. S. in a permanently inferior position.

So far as missile-firing submarines go, the Soviets have said they want to talk to us about limiting activities of such systems. That would hobble the deterrent effectiveness of our Polaris submarine force and restrict our submarine development at a time when our navy knows well that the Soviets are vigorously pursuing development of submarines that are faster and more silent than any we have under development.

Also, the Soviets, having brought to the point of deployment their orbit-capable, nuclear bomb system, are anxious to talk us into further procrastination on development of American defensive systems in near-space. Again, they would leave themselves a vast military advantage.

Clearly, the Soviets feel today they have a great deal to gain if they can keep the U. S. talking while they are working on new weapons; or if they can get an American administration to agree to limitations which place the United States in an inferior weapons position.

For these reasons any talks with the Soviets will be long and difficult. We will have to be constantly on our guard against promises and pledges and propaganda. Our experience with Soviet promises and treaties does not indicate we can trust the Russians to honor any treaty they feel like breaking.

We will need more than promises from the Soviet Union before the world can proceed to realistic arms control and toward international order and stability.

We will need open deeds of friendship, good will, and mutual cooperation. So far we have not witnessed many such deeds.

--While professing a desire for peace in Asia, the Soviet Union has kept the North Vietnamese war machine running on Russian oil and arms.

## Milestone

BY SUE CANNON

It's sort of a milestone for us here at the newspaper office this week.

It was just a year ago this week that I became "Boss Lady".

This has been one more year!

It's been work-filled with fun thrown in for seasoning. (Sometime we laugh to keep from crying up here at this place.)

And some of the goofs we pull every now and then (as most people do) sure can get embarrassing and make you wonder if you have any sense at all!

Then about the time we decide what's the use, someone comes up to us and tells us how much they enjoy the paper and that they just look forward to getting it and then we forget how down hearted we were and get our "second wind" and get with it again.

Guess that's true about any role in life though. Farmers probably get so disgusted when Mother Nature treats them bad that they would just like to chuck it all and work at something else.

But then the sunshine comes through the clouds so to speak and everything looks better again and they wouldn't trade places with anyone on earth, no matter what his job.

There have been times in the past year when I felt like I'd like to trade jobs with just about anyone!

Especially when we had to stay here at the office working on Wednesday nights until all

hours because of some machinery trouble or an extra large paper.

But then after recuperating and looking around, I decide I have the best job that anyone could have.

I suppose my most pleasant memory of this past year is reading that letter from the National Newspaper Association stating that we had won one of the three top prizes in the nation with our paper!

It's going to take really something to out do that in this next year! (I think probably a first place would do it though.)

Next to that of course, was the trip to California and getting to meet Governors Ronald Reagan and then John Connally at the premiere of "Texas".

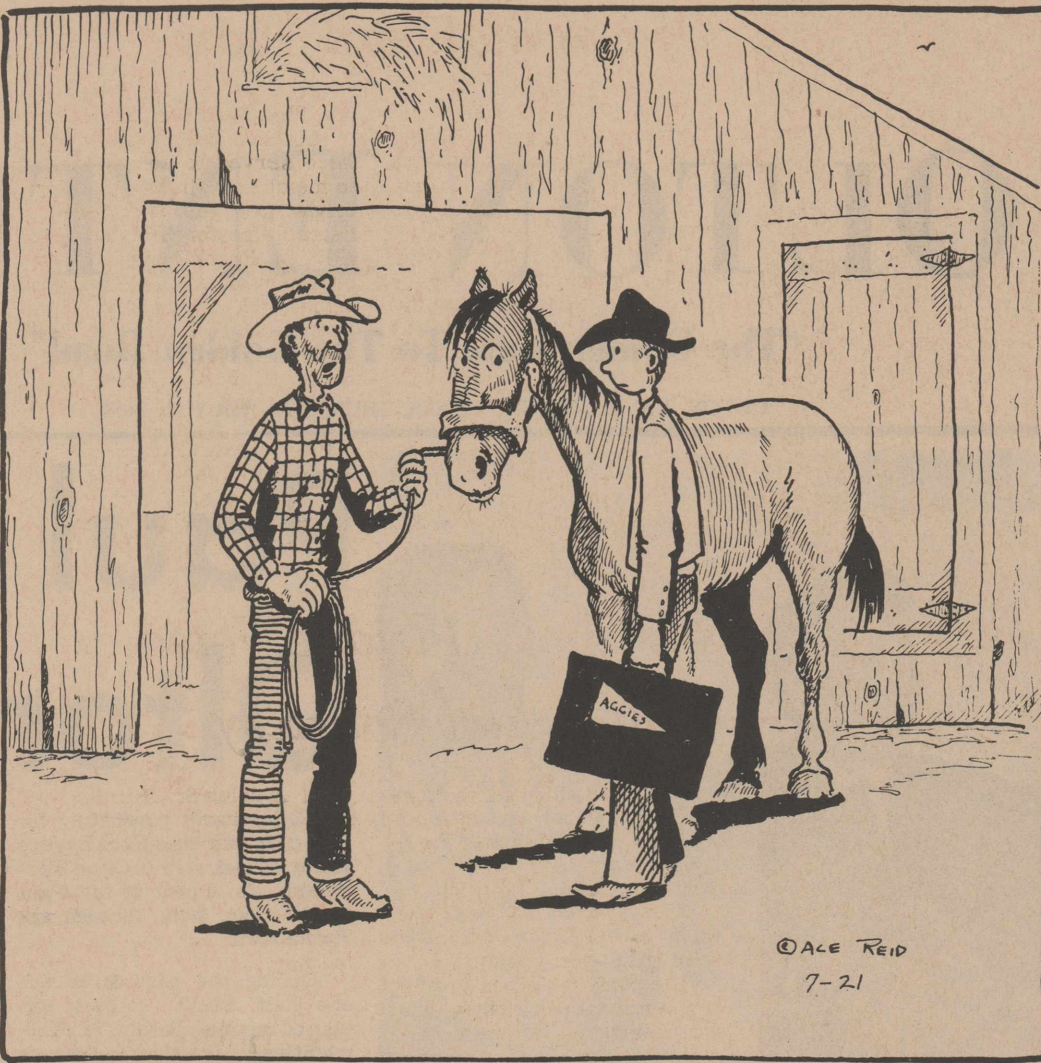

By the way, I got the ticket to the Reagan dinner Friday night! Mozy just wasn't on her toes enough!

I did let her LOOK at it and hold it for a second, but I didn't trust her very far.

And besides that -- she is such a baseball fan, I figured I'd just let her go to the Little League games over at Muleshoe and that would be equal to going to see Gov. Reagan -- in HER book, NOT MINE!

But even after attending the games at Muleshoe, I think she still would like to go to Amarillo and hear Gov. Reagan speak.

So I may just have to weaken and see that she goes along. (And besides, I just might need some help getting pictures and taking notes.)

"So somebody told you this wuz a good outfit to work fer . . . good boss, good pay. Did they also tell you we got the goodest bunch of pitchin' hosses and the goodest fightin' cows in the state!"

## Dear Turnrow Tunkel

O. C. McBRIDE

Did you read that a farm spokesman said farmers were in trouble when a bushel of wheat won't buy a haircut?

I agree, but that's not half of it. A bushel of wheat will buy about as much time in a barber's chair as a bale of cotton will buy in a hospital.

Travel experts predict that the new air service between New York and Moscow will result in more Americans vacationing in Communist countries.

I'm not about to spend my vacation behind an Iron Curtain. When I get ready to come home, I don't want to have to ask permission from anyone but my wife.

I see where the FTC has asked Congress to ban all cigarette advertising on television.

That would throw a lot of people out of work, especially cowboys. However, many ranchers need help, and those people in Marlboro Country won't have any trouble finding a job unless they have been sitting around smoking in front of cameras so long they have forgotten how to fix a windmill.

According to manufacturers of golf equipment, players using

the new clubs with aluminum shafts can drive the ball up to 30 yards farther.

If a different shaft makes that much difference, I may try a set. About the only time I get any distance with my present sticks is when I happen to hit the ball with the clubhead.

Since President Johnson has pulled out of the race, we will have a new Administration after the elections. Do you suppose we will finally be rid of Orville Freeman?

Let's keep our fingers crossed. There's always the chance another vacancy will occur on the Supreme Court before Lyndon leaves office.

Did you know that the NLRB has ruled that an employee can not be fired for pounding on a manager's desk and swearing at him?

Times have changed, I can remember when this wouldn't have been a Federal case, although it might have been an ambulance case.

## ASTROWORLD

The Crystal Palace got its name for a very good reason -- a beautiful crystal chandelier which hangs from the ceiling just in front of the stage. The chandelier was bought in New York and shipped to ASTROWORLD, with each of its 2,500 pieces wrapped and packed separately. The chandelier itself is about eight feet in diameter and almost that size from top to bottom. When the lights are turned on, it is a show in itself -- the central lighting in the Crystal Palace music hall, Western Junction U.S.A.

**METHODIST CAMPERS**-- This group of Olton youngsters was among an approximate 40 from Olton and Hart attending the Methodist Retreat at Pecos State Park, N. M.

## News Of Our Service Men

In a recent letter from their son Albert, Mr. and Mrs. Doc Key received the following description of a sailor. It was composed by Albert and a buddy.

### WHAT IS A SAILOR?

Somewhere between the security of childhood, and the insecurity of a second childhood, we find a bunch of good Joes who wear funny pants, and who we call sailors. They are worked too hard, get too little sleep, take great verbal abuse, do every imaginable kind of job, at any imaginable kind of hour. They never seem to get paid, never know where they're going, and can seldom tell where they've been.

They come in assorted sizes, shapes, weights, and states of sobriety. They can be found anywhere...on ships in bars, on leave, in debt, and always in love. Girls love them, towns tolerate them, and the government supports them. A sailor is laziness with a deck of cards, bravery with a gun, and a protector of the high seas, with a copy of "Playboy".

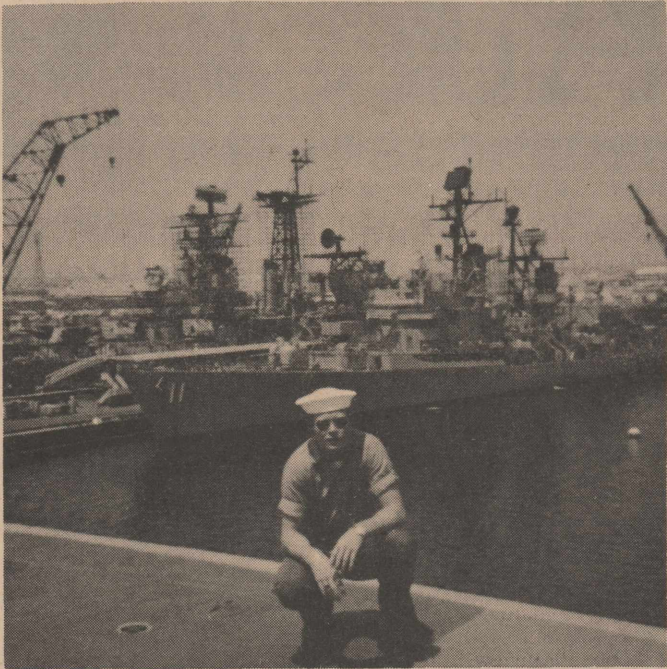

They have the energy of turtles, the slyness of a fox, the stories of a Sea Captain, the sincerity of a liar, the appetite of a lion, the operations of a Casanova, and what

they want most is a weekend pass.

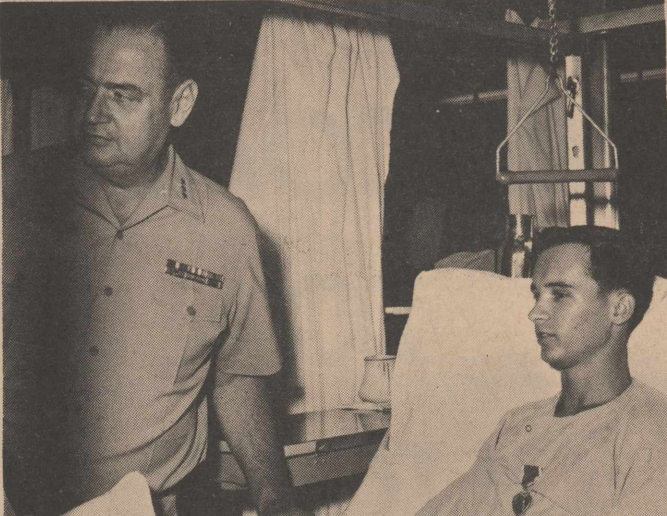

Some of his likes are women, girls, dames, chicks, babes, females, and the opposite sex. His dislikes are answering letters, wearing his uniform, superior officers, lousy chow, and getting up on time. No one can cram into one little jumper pocket a little black book, a Bridget Bardot calendar, a pair of dice, a beer can opener, a picture of his girls, a deck of cards, and what's left of last month's pay (which isn't much), like a sailor can.

He likes to spend his money on whiskey and women, the rest he spends foolishly. A sailor is a magical creature, you can lock him out of your house, but not out of your heart!!! You can get him off your mailing list, but not off your mind. You might as well give up...he's your "Long away from Home Boy!!" your one and only blurry, bloodshot eyed, good for nothing worry is what he is. But all these faults seem insignificant when "MY" sailor docks and looks at me with those blurry, bloodshot eyes and says - HI MOM, I'M HOME!

### THE ANTI-POLLUTION MOTOR OIL

Research in the Phillips 66 labs has proved that... Trop-Artic motor oil fights plugging and sticking of the PCV (Positive Crankcase Ventilation) valve.

Trop-Artic does it by keeping blow-by exhaust contaminants in suspension. To do away with these contaminants... just drain them away when you change the oil.

Change to Trop-Artic... the anti-pollution motor oil... from Phillips 66.

The train was chapel length, detachable at the shoulders with appliques of Venice lace. The triple-tiered veil was fingertip length, secured by a coil of organza lace and pearls. Her bouquet was

A reception was held in fellowship hall. The table was

## 'The People's Choice' Available To Schools

Texas school children and their teachers can learn some interesting facts about some of the men who have been President of the United States in a new audio-visual presentation produced by the Texas Education Agency.

Entitled "The People's Choice," the presentation focuses on the accomplishments of James Monroe, Grover Cleveland, Woodrow Wilson, John F. Kennedy and Lyndon B. Johnson.

Consultants Dan T. Bonner and Jack P. Risher, producers of the series, say they felt that this election year was a particularly good time to make this 15-minute presentation available to Texas teachers.

With "Hail to the Chief" as its unifying theme, the presentation focuses on Monroe and the Doctrine named after him which declared that, henceforth, America was no longer to be considered for further colonization.

It also tells about Wilson asking a joint session of the two Houses for a declaration of war on Germany during World War I; and Cleveland's little-known struggle with cancer, during the financial crisis of 1893. The last part of the presentation contrasts the presidential careers of Kennedy and Johnson and their performance in the job "in which a strong man will grow gray before his time."

The presentation features introductory remarks by Bonner and recordings from the United States Navy Recruiting Service, five transparencies for an overhead projector and a teacher's guide, "Hail to the Chief" is used as background music.

Texas teachers may obtain a free copy of the presentation by sending in a blank tape on which the narrative can be recorded. Inquiries should be addressed to the Texas Education Agency, Tape and Television Laboratory, Austin, Texas 78711.

## Frank Ford Urges Training For The Under-Employed

Frank Ford, Republican candidate for State Representative, has called for greater effort in providing skills training for the under-employed. Stating that "Jobs are the best answer to poverty," he has proposed a plan to utilize existing school facilities and volunteer teachers to step up adult education in Texas that will meet the needs for those skills that will be required for jobs in the 1970's.

"With increasing mechanization of farm labor and other low skill jobs in Texas," said Ford, "the need for job training is well recognized, and I

am not satisfied with the current progress in education."

"Industry must continue to assume a greater role in education, and there must be greater state appropriations for learning as well as increased local effort for education and vocational training. However, with our rapidly increasing tax burden, we find ourselves walking a tightrope. This points up the need for mobilizing those who are willing to volunteer their time and talents to help others become more productive, self-supporting citizens."

"We have many talented retired individuals and others with great ability and a thorough knowledge of a productive skill," Ford concluded, "who have voiced a willingness to offer their services in a well-planned, practical program to meet this pressing need. With this volunteer teaching corps, the utilization of existing facilities during idle hours, and only a token increase in tax cost, giant strides forward can be made in Texas education."

Ford is a candidate in the 72nd Legislative District, including Cochran, Lamb Bailey, Castro, Parmer, and Deaf Smith Counties.

## Weak Muscles May Indicate Serious Problem

Seen through a microscope muscle tissue is a bundle of fibers, each one no larger in diameter than a fine human hair. Yet these slender threads are capable of supporting a thousand times their own weight.

Durable as they are, muscles are subject to a host of disorders, ranging from simple charley-horses to crippling and often fatal diseases.

Muscular Dystrophy Associations of America advises that any muscle weakness of prolonged duration, especially in children, should be reported to a physician.

## Everything But The Kitchen Sink

BY MOZELLE TROTTER

Gracious sakes! Time sure is getting in a hurry. I was a little startled today when I came to the realization that with only two more papers, I'll have been working with the girls at the "Ladies Gazette" for a whole year.

What an interesting year! So many goofs! So much fun! So many wonderful people to write about!

Such smug satisfaction when we get a compliment and such righteous resentment over a criticism!

It just seems to me that everyone ought to "take the Enterprise." (If for no other reason than to line their pantry shelves!) This little item - which I copy from an exchange paper - seemed to go along with my "promote the Enterprise" mood. Hope you get a laugh but remember it's good advice!

"A man, too stingy to subscribe to the hometown paper, sent his little boy to borrow a copy from his neighbor. In haste, the boy ran over a stand of bees and in ten minutes he looked like a wart summer squash. His father ran to his assistance and, failing to notice

the barbed wire fence, tore and ruined a \$9 pair of pants.

"The old cow took advantage of the gap in the fence, got into the field and killed herself eating green corn. Hearing the commotion, the man's wife ran out, upset a four-gallon churn of cream into a basket of little chickens, drowning the entire batch.

"The baby, being left alone, crawled through the cream into the parlor, ruining a brand new \$50 carpet. During the excitement, the oldest daughter eloped with the hired man; the dog broke up 11 setting hens and the calves got out and chewed the tails off four shirts on the clothes line.

"Moral: Don't borrow your neighbor's paper. It's too risky."

## Navy, Marine To Be At Fair

A bigger-than-life view of the Navy and Marines in action will be featured in the 51st annual Panhandle South Plains Fair here Sept. 23-28.

Landing a fast jet on an aircraft carrier, plunging beneath the sea in a nuclear submarine, hitting the beach with the fighting Marines--through Cine-Globe's three dimensional movies you are there.

Cine-Globe is a realistic training device developed by the Navy during World War II to sharpen the aim of its aerial gunners. The special lens used in both the camera and trainer covers the extremely wide angle of 142 degrees, almost matching the field of vision of the human eye.

The hemispheric screen curves around the audience, placing the spectators right in the middle of the action. The theater itself is an air inflatable hemispheric dome.

Several other new attractions are being secured and many of the standard fair features are being expanded as the regional fair enters its second half-century.

Cotton fiber "breathes."

OLTON PRESENTS--Three year old Howard Alford, son of Mr. and Mrs. Don Alford. Maternal grandparents are Mr. and Mrs. Cass Kirkpatrick. Paternal grandparents are Mr. and Mrs. Howard Alford of Lubbock.

Cotton fiber has a "twist." Cotton is non-allergenic.
