FOOD WITHOUT FEAR

The fight against faddism is an exceedingly difficult one. All manner of exaggerated unsupported and plain misleading claims are made for diets which the medical fraternity, out of its wealth of research and experience, regards as dangerous to health and life. But great numbers of people innocently accept the claims and follow the advice. And the problem has become steadily worse in recent years.

Writing in Today's Health, Dr. W. W. Bauer, Director of Health Education Emeritus of the American Medical Association, put the case for a sound diet in simple and unequivocal terms: "Anyone whose diet contains items in sufficient quantity from each of the four basic food groups can forget all the extraneous worries about food. He can rest assured that if he is a normal individual and will eat as he should he will suffer no deficiencies of vitamins or minerals or proteins. He need not be disturbed by fears of cholesterol and other substances which are of concern mainly to the abnormal individual under medical treatment. You can and should sit down to a well cooked, well chosen, attractively served meal in a happy frame of mind, enjoy yourself in reasonable moderation."

This means that the normal individual needs—for both mental and physical health and general well being—meat, dairy products, fruits and vegetables. The food faddists who would change this represent a danger to health and frequently, their unsupported claims have a commercial origin. They have a product to sell. Special diets should be established only under the direction of a qualified physician.

THE EMPLOYMENT BARRIER

The Jefferson, Ohio, Gazette, has made this interesting editorial observation: "Many a boy through his high school years earned enough to get a start at college. Often this part-time employment led to a career in the business."

But now, the Gazette goes on, all this has changed. And one of the reasons is the minimum wage requirement. In its words, "Minimum wages have their places in the modern industrial scheme of things, but they have deprived lads of an opportunity to earn spending money and to save for their future, in the hundreds of small towns and rural communities, the social reformers, with their well-

WASHINGTON AND**"SMALL BUSINESS"**

By C. WILSON HARDER

Despite all the furor emanating officially on the action of France's Charles DeGaulle in keeping England out of the European Common Market, this publicized anger is in no way unanimous.

While it is quite a wry sense, there is a quiet admiration held by many that the French leader only did the inevitable.

His claim that British entry in the Common Market would bring the United States into the management of Europe was largely based on the well known fact that for several years it has been U.S. State Dept. policy to egg Britain into seeking membership, looking toward the eventual setting up of some supra-national government to be called the North Atlantic Community, or some similar name.

This Gallic action of DeGaulle's, preceded by his prior treaty with West Germany, was a manifestation, long known to many but largely ignored, that proud nationalism does not want to accept domination by the U. S. State Dept., or anybody else.

It makes little difference that the U.S. taxpayers have been bled of billions of dollars to throw around in France as well as in West Germany.

Now they are on their feet, have a more thriving economy, from the standpoint of expansion, than the American economy.

© National Federation of Independent Business

omy, which has been seriously crippled by the billions of dollars given them.

So the attitude is, "who needs America?" We will run our own affairs from now on.

This attitude, while quite irritating, is not unexpected. The biting of the hand that has fed is nothing new in human affairs. But there is a grave danger now that these nations now hold the whip hand over the United States.

While the foreign give away boys have been shoveling American dollars overseas, they have remained in substantial volume in European hands. They have been gradually exchanged for U.S. gold with result nation's gold reserves are now down to low level.

As a matter of fact, they can now make large enough demands on the U. S. gold reserve to practically deplete the supply. The former beggar nations are now in the saddle, and the U. S. can be reduced by their actions to beggary.

Naturally, no one likes being out-manuevered. DeGaulle would not win a popularity poll in the United States, but the real deep bitterness is against the self-appointed American Messiahs who laid the groundwork with billions of tax dollars for the American people to be so badly taken.

Years ago European political cartoonists often depicted Uncle Sam as a rather bumbling country bumpkin. It appears that in the area of world politics and economics, they had something there.

intended laws have barred youth an opportunity for self independence."

The record supports this view. Take for instance, retail business—large or small, chain or independent. Large numbers of retail stores can offer jobs, often on a part-time basis, to people who are without experience or any particular skill. Obviously, their value to the store is limited. Yet the work they are given can prepare them for advancement to more responsible, better paid positions. But, if an arbitrary wage-hour law forces the costs of this kind of employment to unprofitable levels, it will be cut to the limit.

The moral is a simple one: The fundamental element in determining earning power is an individual's productivity. The two can't be separated.

GRASS ROOTS OPINION

PECOS, TEXAS, INDEPENDENT: "We subscribe to the belief that freedom is a gift of God and not a political grant. We believe that freedom is consistent only with Christianity. We believe that our welfare shall depend on our own initiative and ability, we believe in maintaining a society in which the citizen has fullest individual freedom and the government's primary and paramount role is the protection of that freedom."

MARSHFIELD, MO., MAIL: "A year ago when President Kennedy gave his 'State of the Union' message to the Congress he said he was submitting for fiscal 1963 a balanced budget. His budget message promised a surplus of \$500 million. It appears now that the deficit for this period will be 8.8 billions of dollars."

Vehicles Must Be Inspected By Apr. 15

Many motorists in Texas are going to be faced with long lines and waiting periods in order to have their cars inspected prior to the April 15 deadline. Only 39 per cent of the 586,270 registered vehicles in Region 5 of the Texas Department of Public Safety have visited safety inspection stations and obtained their 1963 safety inspection sticker, according to Captain Alen Johnson, Motor Vehicle Inspection Service of the DPS.

"All registered vehicles in Texas must be inspected by April 15 and have a 1963 inspection sticker on the windshield," Captain Johnson said. He stated that there would be no extension of the April 15 deadline and advised motorists who have not had their cars inspected to do so now, before the long lines start forming. "In the past, many people wait until the last few days of the inspection period to have their vehicle inspected and have had to wait for a long period of time at the inspection station," Captain Johnson stated.

According to the records of the Motor Vehicle Inspection Service of the DPS there are 51,428 vehicles registered in Wichita County and only 21,660 or 42 per cent of the vehicles have been inspected to date. Due to this low number the Captain suggested that all motorists check their vehicles and see if they have a current 1963 inspection sticker on the windshield and if not to have their vehicle inspected today in order to avoid the last minute rush.

Feather For A Gun Barrel
Maybe your hunting friends will think you are nuts. And they may even laugh at you. But if you will tie a small feather to the end of your shot gun barrel you'll improve your marksmanship.

The feather will record the slightest wind action, which will help you to subconsciously adjust your lead accordingly.

Delaware, the first state to join the union, ratified the Constitution on December 7, 1787.

AND Sidelights
by Vern Sanford
TEXAS PRESS ASSOCIATION

Legislators received two proposals for the state's money during the two years starting September 1.

One came from Gov. John Connally, the other from the House Appropriations Committee.

Governor Connally's suggestions marked the first time a governor had tried to work a budget after taking office.

His message he dealt in detail with 19 of the major state departments. These are mainly ones over which the Legislature has direct control.

Connally trimmed fat out of agencies to provide new money for others. His stress was on higher education. Here he suggested \$14,000,000 worth of increases for faculty salaries and more research libraries facilities, as a means of getting good professors and training new ones.

Finance his program, Connally suggested that the "temporary" corporation franchise tax, which has been extended twice before, be retained. It would provide about \$11,000,000.

He also suggested that the sales tax law be revised to begin taxing clothing under farm implements and all of food by restaurants, to raise the sales tax on trucks from 1.5 to 2 percent.

Nothing tax proposals would add \$10,000,000 a year. Motor vehicle tax increases would

provide \$2,500,000. Farm implements tax would run \$1,000,000. Fire quickly developed from rural legislators over the proposed farm implements tax.

Both Connally and the House Appropriations Committee proposed expenditures totaling about \$3,100,000,000 during the coming two years.

Before Connally laid out his proposals to the Legislature, he invited Texas newspaper editors to Austin to show them how the state's complicated fiscal structure works. His "illustrated lecture" revealed that the Legislature has actual control over only 15 percent of the \$3,100,000,000. Rest already is earmarked by constitutional and statutory provisions.

Will Farmers Foot Education Boost? — When Rep. Don Garrison of Houston spread before the House Revenue and Taxation committee his bill to boost the Available School Fund by \$3,000,000 a year, a spokesman for Texas farmers and ranchers registered a strong protest.

Garrison plans to get the additional \$3,000,000 by amending the state law that allows a 98½ percent exemption refund from the State Motor Fuel Tax for gasoline not consumed on the highways. His bill would cut the refund to 73½ percent.

That 25 percent then would be credited to the school fund. Charles H. Huff of the Texas Farm Bureau said almost half of the new school fund money — about \$1,500,000 a year — "would be coming out of the pockets of farmers and ranchers."

They get motor fuel refunds of about \$5,700,000 a year — or 49.11 percent of the usual total refund. Much of their refund comes from motor fuel taxes paid on farm machinery.

Airlines and private plane owners, who get about 30 percent of the refunds, would be the second biggest contributor to education under Garrison's bill.

Four members of the subcommittee named to study the bill are from ranch or farm country — Reps. George Cook of Odessa, Ben Barnes of DeLeon, William Davis of Midland, and James L. Slider of Naples. Rep. F. Lee Duggan, Jr., of Houston

is the fifth member.

House Vacancy Election — As soon as government officials began recovering from the shock of the news of the sudden highway death of Rep. James L. Latimore of Corpus Christi, they began studying the election code to see what must be done about filling the seat he left vacant in the House of Representatives.

Customarily, if a vacancy occurs in the legislature when it's not in session, the governor leaves the calling of a special election up to local officials.

But since the 58th Legislature will be in regular session until May 27, Governor Connally is expected to move fast to provide Nueces County with a needed voice in legislation. A late-April election date has been predicted.

Law states that the governor must call an election within 20 days. But it also provides that candidates must file 30 days before the election.

Last time a tragic death crippled the Legislature was on March 23, 1957, when the late Charlie Heitmann, representative from the Nacogdoches area died. Gov. Price Daniel gave election notice on March 28 of that year. A new representative was elected in May, in time to spend some three weeks with the 55th Legislature.

Mineral Estate Tax Proposals — Proposals to set up tax procedures on mineral estates, severed from the land, have been filed by Reps. Emmett Lack of Kountze and Clyde Haynes of Vidor.

Proposals are part of a package that should be favored by small tract landowners and independent oil and gas producers.

One piece of the package is a constitutional amendment to increase the Railroad Commission from three to five members.

Second would give the Legislature the authority to "establish the duration of any interest in an undeveloped mineral estate."

Texas Landowners and Independent Oil and Gas Operators Association contends that some major oil companies hold onto undeveloped mineral interests for an unreasonable length of time.

Two other bills by Lack and Haynes are aimed at forcing development of mineral interests.

One provides that mineral interests would revert to the owner of surface land if no development attempt is made for ten years.

Second provides for a county tax assessment of no less than \$5 an acre, if the mineral estate isn't developed.

Rep. Bob Bass of DeKalb proposes a 25-cent minimum tax assessment on each acre of undeveloped mineral estates. Strong Support for Screw-

worm Bill — Rep. Jack Crain of Nocona had 50 co-signers lined up when he introduced a bill to provide \$2,840,837 as the state's matching share of the \$12,000,000 federal-state-private screwworm eradication program.

Since it is backed by Governor Connally's strong recommendation the bill should be off to a good start.

But the House Appropriations Committee didn't include a provision for screwworm eradication in its 300-plus page appropriations bill.

Crain said Legislators would seek a separate appropriation to cover the proposed state contribution.

Cars for Commissioners — When county commissioners stopped asking the Legislature to authorize horses and wagons and won the right to drive pickup trucks on their appointed rounds, they thought they were thoroughly mechanized.

As their operations became more streamlined and pickups no longer were necessary some switched to automobiles. But a pickup is not an automobile. Atty. Gen. Waggoner Carr ruled. So Williamson, Cochran, Hockley, Terry and Yoakum counties are asking authority from the 58th Legislature to buy cars for their commissioners.

Harris, Tarrant and some Panhandle counties discovered the difference for themselves some time ago. They already have authority to decide whether pickups or autos would be best for commissioner's transportation.

Blanket Hospital Bill — Last November, Texas voters decided to let the Legislature authorize the creation of hospital districts. Already many bills have been filed to create individual districts.

Now Rep. H. G. Wells of Tulia proposes legislation to give every county the right to create a hospital district within its own boundaries.

License Plate Price Hike Asked — Sen. Criss Cole of Houston proposes to increase the annual motor vehicle registration fee by \$1 with the income going to our state parks.

If the Legislature approves Cole's license plate cost increase, the question will be submitted to voters at the general election of November, 1964.

Motor Express Service Proposed — Sen. Franklin Spears of San Antonio has introduced a bill to expedite freight shipments in Texas.

Bill permits the creation of a special class of motor vehicle carriers to be known as "Restricted Motor Express Common

Carriers." Service would follow regular routes and schedules, using van-type equipment. Special emphasis would be on small shipments from one to 100 pounds. Rates would be substantially higher than those of existing motor carriers. However, a complete "pick up-and-deliver" service would be provided.

Supervision would be in the hands of the Railroad Commission.

News From The County Agent

Seventy-eight 4H and F. F. A. boys and girls received fifty chickens each Saturday at the 4-H barn. This program is sponsored by the Wichita Falls

Chamber of Commerce. The club boys and girls will feed the broilers for a period of eight weeks. A county wide show will be held at the 4-H barn in Wichita Falls on Saturday, May 4th.

A county 4-H Elimination Contest will be held on Saturday, March 16 beginning at 9:30 a.

m. at the Texas Electric Auditorium in Wichita Falls. This will be for 4-H boys and girls that will participate in district contest.

The Wichita County Junior Horse Club will have their regular monthly meeting at the 4-H barn in Wichita Falls on Tuesday, March 19. The meeting will

begin at 7:30 p. m. All members and parents are invited to attend.

Dairymen with low producing cows are in the business for "fun" says B. T. Haws, county agent.

Good cows are a necessity to make money in dairying, according to the specialist. Cows

that produce less than 6,000 pounds of milk in a year are not making the dairyman any profit but are merely providing him the "fun" of milking, he says.

The value of a cow is determined by what she produces not by the price paid for her, Haws explained. One that produces 12,000 pounds of milk a

year will make the farmer a profit of \$150 or more and is a bargain at \$400 while a poor producer is expensive at any price. And fixed costs, such as time, labor and equipment, are about the same for a low producer or a good cow, he says.

Determining which cow will produce 12,000 pounds of milk

and which will give only a few pounds is the problem in dairy cows. Less than 10 percent of the cows in the States and only three percent in Texas are producers and most cows are producers without knowing their ability. points out the county agent.

Always The Peak Of
Perfection

the GOOD NEWS!

An excited aliveness!... That describes a man getting good news over the telephone. Then, there is the gospel, which means "The Good News" which gives life when it comes to a man. It generates life anew. This Good News is proclaimed weekly and oftentimes daily, through God's messenger in His Church. Jesus announced the Good News when He said, "I am come that they

might have life, and that they might have it more abundantly."

Matthew 10:10. Listen to the proclamation of the Good News in the church of your choice on Sunday.

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

Central States News Views

REMINDER of warmer days to come is sent to chilly Central States by Barbara Clack, co-holder of water ski jump record for women.

NOISE around Bloomington these days is that of the young bongo player, Lori Jane Crewell, 2, who's drumming her way to the Indiana city as the world's youngest bongo player.

VAL OF GAS, first exhibit started at the 1964-65 World's Fair, is previewed by Harold Massey (left), president of Gas, Inc., and John Massey Jr., president of Gas, Inc., sponsor of the project, and American Gas Association managing director.

To Bidders

Proposals will be received by the City of Burkburnett, at the office of the City Manager, Jess Whitley, until 4 p. m. Central Standard Time, March 26, 1963, for the construction of certain water mains along Wichita Street in City of Burkburnett.

NOTICE

Flooring for modern homes. As factory salesman of the largest and rug manufacturer, I offer more patterns and widths than any other dealer in this area.

the office of the City Manager, Jess Whitley, and may be procured at the above office or at the office of R. Ernest Lee, 4729 Neta Lane, Wichita Falls, Texas, with a deposit of \$25.00 as a guarantee of the safe return of the plans and specifications in good condition. No refund on Contract Documents and Plans returned later than ten days after award of Contract will be obligatory.

Attention is called to the requirements that there must be paid on this project not less than the general prevailing rates of wages which have been established by the City of Burkburnett, Texas, and specified in the Contract Documents.

A cashier's check, certified check or acceptable bid, bond, payable to the city, in an amount of not less than five (5%) per cent of the largest possible total for the bids submitted, must accompany each bid. No bid may be withdrawn after the scheduled closing time for receipt of bids, for at least thirty (30) days. The City of Burkburnett, Texas, reserves the right to reject any or all bids and to waive formalities.

The successful bidder will be required to furnish performance and Statutory Payment Bonds in an amount of 100% of his total Contract written by a responsible Surety satisfactory to the City of Burkburnett, Texas.

Roger W. Babson Weekly Report

ROGER W. BABSON
BABSON DISCUSSES HEDGES AGAINST INFLATION

Many investors in stocks are holding them in belief of coming inflation. Although inflation would not help non-convertible preferred stocks and bonds, it should help many common stocks. On the other hand, inflation would be a serious matter to most railroad, public utility, and manufacturing companies, which would have to raise wages, pay more for their raw materials, and yet have difficulty raising prices. During the next few weeks I will discuss in this column some companies with inflation-hedge characteristics.

Only A Few Railroad Stocks Appeal to Me

Despite the plight of the railroad industry, the outlook is far from bleak for some of the major roads. Better earnings are showing up with the elimination of unprofitable business, increased efficiency, cultivation of new business, and gradual expansion and development of large land holdings.

ATCHISON, TOPEKA AND SANTA FE is the largest railroad system in the United States. It is no longer heavily dependent upon agricultural freight. Land holdings produce earnings from oil, lumber, coal, and metals.

UNION PACIFIC supplements its revenue from its well-balanced rail freight business with income from oil and gas production, and dividends from extensive investments — both rail and non-rail. Numerous parcels

Policyholder Questions Answered by the Institute of Life Insurance

Q. What are the advantages of permanent life insurance, as compared with term insurance?

A. Permanent and term policies are designed to meet entirely different needs. When used properly, each has advantages.

Permanent life insurance provides basic, long-range protection for a family against financial hardship due to the policyholder's death. Permanent life insurance

also builds up savings to help meet important family goals during the policyholder's lifetime. For example, in later years he can use the policy's cash value to provide a more comfortable retirement for himself. The cash value also makes it possible for him to keep his policy in force as long as he needs it, at no increase in premiums, regardless of how old he becomes. And he can borrow against it in an emergency.

Term insurance meets special, short-range needs for financial protection. A term policy starts out at a considerably lower premium rate than a permanent policy purchased at the same age, but the term premium rises as the policyholder grows older, each time he renews the policy, due to the increasing risk that he may die. When a term policy is kept for long periods of time, it eventually becomes so expensive that the policyholder will likely not be able to keep it in force. Most term policies cannot be carried beyond age 65. And they normally build no cash value.

But a term policy that is convertible to permanent insurance may be a way of providing additional temporary protection for a young man's family for a few years if his income is so low that he cannot afford all the permanent insurance he needs. For example, young doctors with heavy family responsibilities often use term policies to protect their families during their internship. Term policies can also meet other temporary needs. For example, term life insurance is often a good way to guarantee that a debt will be paid off without causing hardship for a family if the policyholder should die.

of land are owned in California, Colorado, Wyoming, and elsewhere.

NORTHERN PACIFIC serves the Pacific Northwest and the northern tier of states. Freight is diversified among manufactured goods, crops, forest products, oil, minerals. Land grants total over 2 million acres.

CANADIAN PACIFIC RAILWAY combines a vast transportation empire with a virtual kingdom of natural resources. Its transportation system spans from Asia to Europe, and includes steamship, air, and trucklines; plus hotels and a telecommunications system. It's natural resources includes 51% control of CONSOLIDATED MINING AND SMELTING COMPANY, ownership of one million acres of land, and mineral rights to about another ten million acres, mostly in Alberta.

Steel Companies

The steel industry also is under the pressure of rising labor costs. Nevertheless, the fundamental nature of this industry enables steel companies to increase their earnings.

The largest steel producer in the world is U. S. STEEL. The

scope of its activities extends into mining, shipping, metals fabrication, and the production and distribution of cement and nitrogenous chemicals. Other properties provide manganese coal, and limestone. Increasing emphasis is being placed upon taconite mining and facilities. Estimated domestic iron ore reserves are close to one billion tons in the Lake Superior region and in Alabama and Utah. Company holds foreign reserves of over 11 billion tons in Canada and Venezuela.

REPUBLIC STEEL is another domestic producer, specializing in alloys and stainless steel. Reserves of iron ore and coal are sizeable. Republic owns 50% of Reserve Mining Company, which supplies a large portion of its iron ore needs in the form of taconite pellets. It also holds an interest in Iron Ore Company of Canada. A considerable amount of money is spent for research, emphasizing heat-resistant high-tenacity steel products for missiles and rockets.

BETHLEHEM STEEL CORPORATION constitutes the nation's second largest integrated

steel producer. In 1962 ingot production came to 14.7 million tons, or about 15% of the industry output. Company is also the largest U. S. shipyard builder. Capital expenditures in 1962 amounted to \$193 million, with \$373 million additional authorized on December 31, 1962 and about as much again scheduled through 1965. Company has increased output of pelletized high-grade ores and has extensive iron ore, coal and limestone reserves.

CLEVELAND CLIFF IRON MINES should also be included in my list. In addition to its own

properties it has large interests in other steel companies, and railroad and fleet transportation connections.

The first major national labor organizations in the USA was known as the "Knights of Labor."

Squirrel-Hunting Trick

Squirrels are mighty bulky to carry in the pockets of a hunting coat.

Also they may overheat and spoil the meat if carried in the pockets too long.

Prevent this by taking along on your next hunt a couple of horse blanket safety pins. When the squirrel is bagged run a pin point through a leg tendon, snap the pin shut and attach to your belt.

By repeating the process, a number of squirrels can be carried this way on one pin. Should you expect to bag a large number of bushy-tails better carry along several pins.

Prevent Forest Fires

One precaution you can take to prevent your campfire from starting a disastrous forest fire is to build the campfire on a double-thick sheet of aluminum foil.

Foil will keep the fire from sinking underground, then flare up later when you are gone. Dousing the camp fire with water doesn't always extinguish the fire.

TRAVEL HINT

Use tissue paper liberally when you pack for a trip. In coat sleeves, dresses and shirts, it's the surest way to avoid suitcase wrinkles. Prompt unpacking when you arrive at your destination will help too.

MEATLESS MEALS

If you're looking for exciting, tasty meatless meals take a second look at the April issue of TRUE STORY. Here is just one of the featured reader recipes you will find.

Meatless Meatballs and Spaghetti

Makes 6-8 servings

Combine

2 hard-cooked eggs, chopped

1/2 cup minced onion

1 cup finely chopped celery

1 cup finely chopped pecans

1/2 cup coarse dry breadcrumbs

1/2 cup grated Parmesan cheese

1 cup wheat germ

1/2 cup melted butter or margarine

2 cloves garlic, minced

1 tablespoon chopped parsley

1 teaspoon salt

1/2 teaspoon pepper

Mix well.

Add:

2 eggs, beaten well

Mix well. Shape in small balls, about the size of walnuts.

Heat in a heavy skillet:

2-3 tablespoons fat

Add egg balls, a few at a time.

Cook over medium heat until lightly browned. Turn frequently to brown evenly.

Remove egg balls from pan as they are browned.

Heat in a heavy saucepan:

2 cans (10 oz. each) marinara sauce or spaghetti sauce

Add browned egg balls and heat through.

Cook in boiling, salted water, according to package directions.

1 package (1 lb.) spaghetti

Drain. Place on platter. Cover with egg balls and sauce.

CAN OPENER CARE

Can openers should be washed with soap and hot water after each use. Food left on the blade may spoil, contaminating food as other cans are opened.

WINDOW CLEANING

There are many excellent window cleaners on the market. If you're a do-it-yourself personality here is the formula for making your own window cleaner. Add a few drops of kerosene and a little bluing for extra sparkle to a warm soapy water solution. Rinse with warm water and polish with a clean, lintless cloth.

GRIMY WORK CLOTHES CARE

"How do you wash dirty, grimy work clothes to get them really clean?" This is the one question most often asked by TRUE STORY readers seeking a solution to their laundry problems. After months of testing, we offer these suggestions which may prove helpful to you.

Dirty, grease-stained work clothes need to be pre-treated outside the machine. A soak or "flush" is recommended. In addition, work clothes should be put through two full washings. In the first wash use ammonia and a heavy-duty detergent or soap. In the second wash use bleach and a heavy-duty washing product. Remember, once clothes have been pre-treated, the hotter the water the cleaner the wash.

USE A MIX

With all the wonderful new mixes you can add eating pleasure to snack hour in a matter of minutes. Here is a quickie for FUDGE NUT BROWNIES. Press 1 roll refrigerated fudge brownie dough into a greased square pan. Press 1/2 cup chopped pecans or walnuts into dough. Bake according to label directions.

proper care. In our modern world of new and improved fabrics, proper care is important, if a family is well groomed. To give this proper care, equipment is most important. Just having the equipment is not the only answer. If it is not used correctly and does not receive proper care, personal appearance is not as good.

Many pieces of laundry equipment have many uses, if you use them to their full advantage. For example this spring will mean special uses for automatic clothes dryers.

Used wisely, a clothes dryer will save hours of labor during your spring house cleaning. Use it to freshen these furnishings:

SLIP COVERS. Place slip covers in dryer immediately after washing, and regulate time and temperature settings according to the particular fabric. While still damp-dry, remove from dryer and press any pleats or ruffles. Then replace on furniture where slip cover will finish drying to snug smoothness.

DRAPERIES. Before laundering, remove all trimmings, detachable hooks and weights.

Medical Mirror

PEANUT BUTTER vs. PEANUT SPREAD

Q. My children simply love peanut butter. Is it a good food?

A. Plain, old fashioned peanut butter, which contains nothing but roasted peanuts with a little added salt, is a highly nutritious, but hard to find, food. The old fashioned variety has somewhat limited shelf-life and the oil tends to rise to the surface. To "improve the quality" of peanut butter, many manufacturers add various chemicals and hydrogenated oils (hydrogenation is a process which hardens an oil) to a solid fat with good keeping qualities. These food regulations would require a product containing less than 75 per cent peanuts to be labeled "imitation peanut butter." Manufacturers would object to this labeling and many have now switched to use of the term "peanut spread." If you want to avoid peanuts containing a variety of questionable additives, examine the labels carefully before buying.

LOW-CHOLESTEROL DIET

Q. Do medical scientists recommend mayonnaise as suitable for diets designed to control or lower cholesterol blood factors?

A. Many clinical investigators who have worked out diets for the control of serum cholesterol levels permit the use of mayonnaise. The position of various brand-name mayonnaises probably varies quite widely and it is not unusual for the doctor to specify a brand name to contain suitable fats.

CALL — that's all — and we'll pick up and deliver your prescription.

CORNER DRUG PRESCRIPTIONS STORE

320 East Third St. Phone 569-2684

Store Hours 8 A.M. to 8 P.M. Sun.-Holidays 8 to 11 A.M.

Drying time and temperature will vary, depending on weight of fabric, size and remaining moisture. Allow drapes plenty of room for tumbling. Remove when damp-dry, run drapes lengthwise through ironer, and rehang.

AIRING AND DUSTING CURTAINS AND DRAPES. When curtains or drapes are not soiled, but require airing and dusting, use your automatic dryer to "revive" them. Allow several pairs at a time to tumble freely. Remove from dryer and rehang. . . curtains will be fresh and sunshine fragrant again. Use same tumbling procedure to loosen wrinkles and remove musty odors from drapes and slip covers just taken from storage.

RUGS. For braided or rag rugs, place two small rugs on one medium-size rug in the dryer. Remove when lint or moisture remains. Lay on flat surface to finish air-drying. For Chenille bathmats and shag rugs vacuum before laundering to remove excess lint. Be careful not to overwork the dryer. Remove rugs when completely dry and replace in usual position on floor.

Mrs. Walker is well-qualified to lead this work shop session, since her experience with all electrical equipment is vast. The work shop is sponsored by the Wichita County Program

Building Subcommittee Clothing. Mrs. George Wy chairman of the subcommittee and will preside at the meeting. Those working with Wyatt are: Mrs. Emil R. Mrs. J. A. Fouts, Mrs. Cheney, Mrs. M. F. R. Mrs. Lem Park and Mrs. Wirges, county home extension agent. The subcommittee plans all clothing for the Wichita County Demonstration program.

The work shop is open to homemakers, interested in care of clothing. Other sessions in the series will be laundry aids and pre-laundering clothes and proper drying. Dates for these sessions will be announced at the day meeting.

Don't District Your Pup. Leave your hound alone if he is trying to unravel a rope. If you try to encourage or egg him on to faster and you will only confuse him. The pup usually knows he is doing and doesn't need your help.

Carry a quick reload .22 repeating rifle (of the type) by using the hollow die of a plastic fly swatter. Simply fill the handle with .22's, then when needed, the contents into the tube of your rifle.

He who has a thing to sell
And goes and whispers in a well,
Is not so apt to get the dollars
As he who climbs a tree and hollers.
