Shopping Center Architects Are Named

R. F. Borden of Rockport and Tulsa, Okla., announced today that architects have been named to design the FUL-ROC Shopping Center on Highway 35 just north of Rockport.

The architectural firm of Wilkinson & Walker of Tulsa will be head architects, with Jack Rice Turner and his staff of Corpus Christi as the associate architects.

Preliminary schematic design drawings sufficient to work out leases with store owners will be started on immediately, Borden said, and will be available within three or four weeks.

The FUL-ROC Shopping Center will be located on 17 acres and will supply approximately 75,000 square feet of floor space for a wide variety of shops and stores offering numerous products and services.

Sale of the land was handled by Security Real Estate, Inc., and Ed Harper. Borden estimates that when the shopping center is completed, the total expenditure will be approximately $1 million.

"There is very strong interest indicated," Borden points out, "for a large super market, drug store, beauty shop, barber shop, furniture store, gift and specialty shop, auto supply store, variety store, and men's and women's apparel stores."

Sacred Heart School To Close Its Doors

For the first time in many years Sacred Heart School will not be conducting classes for children from the first through the sixth grade this fall.

Rev. Paschal Bergin said the reason for the closing is that the Sister teachers who have been here have been relieved of their commitment and have received other assignments, and it has been impossible to get other Sisters.

Last year, Father Bergin said, there were 150 boys and girls at Sacred Heart School including kindergarten. This year there will be two kindergartens with registration scheduled for Aug. 22.

The remaining children — first through sixth grades— will attend the Rockport and Fulton Elementary Schools.

Grade School Registration Aug. 22-Sept. 2

Registration for pupils in all grades who are entering the Rockport Elementary School for the first time will begin August 22 and continue through Sept. 2. Registration will be in the principal's office from 8 to 12 and 1 to 3:30.

Pupils entering school in the first grade, must have proof of being born on or before Sept. 1, 1960.

Pupils entering school in grades other than the first, should bring their report cards and immunization record.

Pre-registration will be a great help to the pupils as it will cut the length of time needed to get into classes the first day of school.

If there are any questions please call SO 4-6344 or come by the principal's office.

All students who had their report cards withheld because of book fines and book damage should pay these and pick up their cards. Pupils will not be permitted to enter school until they do this.

Chamber of Commerce Needs Many Souvenirs

The Chamber of Commerce needs some attractive souvenirs to distribute to wives of delegates to the Texas-Louisiana Hug-the-Coast Highway Association who will meet Sept. 11 and 12 at the Sandollor Motel.

Mrs. Mary Juergens, secretary of the Chamber, asks all members to supply brochures and souvenirs which can be placed in gift sacks and presented to the visiting ladies.

"We'd like for these ladies to take home with them some interesting things from Rockport," Mrs. Juergens explained, "so will all members either bring their articles and booklets to the Chamber office or give me a call."

Valley Whitewing Season Is Longer

Hunters who make the annual trek to the Rio Grande Valley for the short white-winged dove season will get a break this year, according to Robert G. Mauermann, Director, Regfion V. Texas Parks and Wildlife Department.

Not only will the season be longer but the bag and possession limit has been raised.

There will actually be two short seasons, Sept. 3, 4, 5, and Sept. 9, 10 and 11. Shooting hours will be from noon to sunset each day.

The mourning dove season will be open in those counties at the same time.

The daily bag limit for each species will be 12 birds each and the possession limit after the first day will be 24 birds of each species.

The counties in the white-wing zone are Brewster, Brooks, Cameron, Culberson, Dimmit, El Paso, Hidalgo, Hudspeth, Jeff Davis, Jim Hogg, Kenedy, Kenney, La Salle, Maverick. Presidio, Starr, Terrell, Val Verde, Webb, Willacy, and Zapata.

Pirate Band To Begin Practice

All members of the Aransas County high school Pirate Band may pick up their music for the coming football season at the band hall Monday morning, Aug. 15.

Freshmen band members will begin practice at the band hall Monday, Aug. 15, from 8:30 to 10 a.m. and continue at the same time Aug. 16, 17, 18, and 19.

Full band rehearsal for all members will begin Monday, Aug. 22 from 7:30 to 9 p.m. The dates for these night practices are Aug. 22, 23, 25, 26 and again on Monday and Tuesday, Aug. 29 and 30.

The band director, J. O. Robertson, will be assisted this year by Douglas Lankhart. More instruction will be possible and the 200 instrumental students in the Aransas County school system and the community as a whole should benefit greatly.

Laguna Apparent Low Bidder On Bulkhead Work

Laguna Construction Company with a bid of $16.80 per linear foot was the apparent low bidder on bulkhead work to be done at Cove Harbor.

The bid was submitted to Aransas County Navigation District No. 1 on Aug. 3. Vermillion Construction Company bid $17 per linear foot.

In another matter at the Navigation District meeting, a letter from attorney James C. Larsen was read stating that Mr. and Mrs. Ray Burns of Rockport are making claim against the District for damages which, according to Larsen, stem from injuries Mrs. Burns received in a fall from a swing on Navigation District property. The letter was turned over to Ellis Clark, attorney for the District.

Next item of business was approval of a request by the Chamber of Commerce to set up a huge replica of a crab on Navigation property to serve as a tourist attraction and as a background for photos. The crab is now atop the old Del Mar Cafe. The Navigation District asked the Chamber to submit a sketch showing exactly where the crab will be located.

Following this, James Garnette of Lockwood, Andrews and Newnam, Inc., appeared before the Navigation Board to discuss plans for the proposed west shore program. A sketch which he presented was accepted by the Board.

In another action, the Board voted to give Elva Mullinax a 20-year lease on his property.

Actions at School Board Meeting

In another article in this issue, the School District's plans for expansion are described. This story concerns other happenings at the School Board meeting Tuesday night, which included:

—Bids were opened for sales of 1956 International bus and 1951 Cadillac chuck wagon. Clarence Carpenter got the bus for $301, and Zenon Hernandez got the chuck wagon for $50.

—Due to increased expenses, cost of lunches was increased to 35 cents for elementary school pupils, 40 cents for junior and high school students, and 45 cents for adults.

RYSCO Building Unique Clammer

The first boat of its kind ever to be built in a Texas shipyard is a clammer now being constructed for Captain Trygve Stolan by Rockport Yacht & Supply Co.

Captain Stolan of Wildwood, N. J., intends to use the clammer, Tempo II, on the east coast and says that not only is the boat the first of its type to be built on the Gulf Coast but also is the first ever constructed exclusively for clamming. Others now in use, he says, are converted from various other types.

When completed and in use, Stolan says, the Temp II will drag a 60-inch clam dredge, seeking sea clams as far as 25 or 30 miles off shore, in water as deep as 105 feet.

The dredge, according to Stolan, is much like a huge sled towed behind the Tempo. At the front edge of the sled is a manifold which feeds jets of water to uncover the clams and wash them back into the steel mesh bag which holds them until they are brought to the surface and eventually unloaded at the canneries or the Wildwood docks, from where they are trucked to the next destination.

"On good ground," he said, "we may get as much as 800 to 900 bushels of clams in a day, but the average is between 500 and 600. We can't hold them on board more than 24 hours because they will begin to spoil after that. So, necessarily, our trips are limited."

However, Stolan has built into the Tempo II a system whereby he hopes to make it possible to stay at sea until he gets a boatload of from 1,200 to 1,500 bushels.

In the past, clams were carried on deck without refrigeration. Now, Stolan has a big hold constructed in which he plans to store the shellfish in chilled sea water until they can be unloaded.

Along with the refrigerated hold, Stolan has incorporated a number of other improvements in the boat which carries a crew of five.

And since the clammers use loran (long range navigation equipment) to locate clam beds, while the hoisting gear for the dredge is different from that usually used on shrimpers, Stolan has had lots of questions asked.

LOCAL MAN'S BROTHER KILLED BY TRUCK

Will Freeze, 86, Aransas Pass, brother of Ed Freeze of Rockport, was killed Tuesday night when struck by a pickup truck as he walked beside a disabled automobile on Interstate 35 about five miles north of Waco.

Freeze was a passenger in a car which had a flat tire and he apparently stepped onto the highway in front of the oncoming truck, according to police.

SPEAKER PRAISES LOCAL ROTARIANS

Coke Williams, district governor of District No. 593, Rotary International, praised local Rotarians Wednesday noon at the local club's weekly luncheon meeting.

He praised their service to the community in the past and for their planning for the future. These plans were discussed Tuesday night in a Rotary Assembly. The assembly consists of club officers and committee chairmen.

Williams also spoke of the growth and meaning of Rotary International and listed the recommendations of Richard Evans, president of Rotary International, for a successful year.

Guests were Howard McMillan, Hallettsville; Roy Rogero, Rockport; Bill Planky, Fort Worth; Carlos McAtee and Bill Rumpf, Ingleside; Ernie Horine, Alice; J. L. Bates and James Reynolds, Corpus Christi; and Ralph Power, Port Lavaca.

School District Plans New School for 1967

Determined to maintain its high standard of education and provide adequate facilities for all school children in this area, the Aransas County Independent School District is busy planning not only for the opening of the 1966-67 school year but also for the years ahead—at least through 1972.

At a meeting of the School Board this week, the following facts emerged with respect to the imminent need for expansion of facilities:

—The School Board and the School System Staff have been working for months to figure out exactly what is needed with regard to new building, additions, etc.

—The heaviest burden this fall will be on Rockport Elementary School, partly due to the fact that 104 pupils will be coming over from the closed Sacred Heart School.

For the best teaching situation, it is known that one grade school class should have not more than 25 pupils; this fall the average will be from 25 to 35.

—By extensive studies of the increase in children's "population" since 1956, the School Board and School Staff estimate that the present total of 1,569 school children in this county will increase to at lease 2,500 by 1972.

An indication of the accuracy of past projections is that the estimates made in 1962 for 1966 were less than 3 per cent off.

—As a result of the School Board's conviction that more classroom space is urgently needed, the following actions have been taken:

1) The School District has purchased the 14-acre Harrist and Eller tract at the intersection of FM 881 and Dupnik Corner as the site for a future new elementary school. The District expects that construction work will be under way in 1967.

2) Architect Lynn Evans has prepared drawings of the new school and of proposed additions at the high school, junior high school and Fulton Elementary School — changes considered necessary to take care of the constantly increasing enrollment.

3) First Southwest Company of San Antonio has been employed as financial advisors for a proposed bond issue to finance the essential expansion program.

Fall Bay Shrimp Season to Open August 15th

Commercial bay shrimp boats will start trawling in the major bays of Texas on Aug. 15. This is the opening date of the Fall bay shrimping season.

Hours during which these boats may work are 30 minutes before sunrise to 30 minutes after sunset. During this season, Bait shrimp boats are prohibited from working from sunset to sunrise except in Laguna Madre.

Commercial bay shrimp boats in these waters are limited to one 65' trawl, as measured along the cork line from board to board and one 12' try net. Five stretched mesh of the 65' trawl must measure no more than 8¾ inches.

There is no limit to the amount of shrimp taken, but the catch must meet "legal count." This means that there must be no more than 39 heads-on count to the pound or 65 tails to the pound.

The major bays, as defined by law, include Sabine Lake, Trinity Bay, Galveston Bay, East Galveston Bay, West Galveston Bay, Matagorda Bay including Keller's Bay and East Matagorda Bay, Tres Palacios Bay, Espiritu Santo Bay, Lavaca Bay from the present causeway seaward, San Antoni Bay, Ayres Bay, Aransas Bay, Mesquite Bay, and Corpus Christi Bay.

RIDING ASS'N TO MEET

The Aransas County Association will meet Friday, Aug. 12 at the Rockport Fire Station to discuss plans for the next rodeo. All members are asked to attend.

Little Bay Annexation Passes Public Hearing

No voice was raised Monday night in opposition to the annexation of Little Bay subdivision Unit No. 1 at the public hearing in the City Hall.

With annexation moving one step closer to reality, the next step will be passage of the annexation ordinance which is scheduled to take place at the next meeting of the City Council on Aug. 22.

The public hearing was combined with the regular meeting of the City Council at which the following matters were discussed and the following actions taken:

—The proposed long range planning project was discussed briefly. This is the project which, if carried out, would be paid on the basis of one-third by the city and two-thirds by the Federal government under Public Law 701.

Although the proposal did not come up for vote, Alderman Charlie Garrett stated emphatically that he is opposed to it. "The cost would be too much for what it's worth," he said.

—Next discussion was on the proposal for the city to lay approximately 2,875 feet of water pipe to increase the amount of water being supplied to Key Allegro. With Key Allegro agreeing to pay part of the cost, the city's expenditure has been estimated at a little over $5,000.

Mayor Delmar R. Hiller showed Alderman Garrett, Earnest Harrist, N. C. Vandagriff and N. F. Jackson a tentative contract for consideration of the city and Key Allegro. A number of details were questioned and Hiller agreed to have a new contract drawn up.

Alderman Garrett said he was opposed to the city paying any part of the project. "I'm not against the city helping Key Allegro with its water supply but I think Key Allegro should pay the entire cost for pipe," Garrett said.

—Discussed next was the city's procedure of paying up to $3,000 per year to the Rockport Volunteer Fire Department to help pay for clothing damaged or destroyed during fire fighting. The aldermen agreed that the Fire Department is to furnish regular reports on the number of fire drills, and number of men participating. These figures serve as the basis on which the city makes its allocation of funds to the department.

—The Council authorized Public Works Director Tom Shults to get estimates on the cost of a new garbage truck with a view of possibly purch-

Outdoors in Texas

By Vern Sanford

"This is not a time for hysteria" says Russell Tinsley in his outdoors column in the Austin American - Statesman. We agree so fully with what he has to say about guns and killers that we are reproducing his comments in full for your own consideration:

This latest macabre incident at The University of Texas provides even more hysterical fodder for ban-the-gun advocates. Considering the circumstances that is understandable. But let's be realistic about it all.

Even if we would have the stringent firearms law now being pondered by Congress, one Charles J. Whitman still would have qualified to obtain both guns and amunitioon. There was nothing in his past record to deny su h a request. He had no criminal record, his character references were impeccable, he was a former scoutmaster, he was honorably discharged from the U. S. Marine Corps, he was not a known alcoholic or mental case. Viewed realistically, he was an All-American boy. Yet in our society of people like this often create havoc. It would have been impossible to deny Whitman a gun without denying it to every American citizen.

Anyway, a deer rifle is not normally a weapon of violence. It is much too prominent to be carried about. Yet in this instance an ordinary deer rifle, one that is quite popular among Texas hunters, wrote a dubious and gory page of history.

Ironically, when the massacre started, the police were ill-equipped to do anything about it. Long-range rifles, scope sighted, are not standard issue. They are seldom needed. Yet in this case pistols and sawed-off shotguns were practically worthless. The sniper had all the advantages.

Sniper Exposing Hihself

In the first few minutes the sniper was roaming about the observation tower and firing at his victims with impunity. Roy Reeves, a well - known Austin hunter, was standing in his print shop at 308 W. 25th St., looking at the University Tower from his back door. He could clearly see the sniper walking about, firing at random. Reeves said the sniper would have been "easy pickings" with his deer rifle. He wouldn't have been a difficult shot. Yet no one on the ground was equipped with such armament at the time.

Meanwhile, the sniper was hitting people at long distances. His arsenal included a 6-mm rifle with a four-power scope sight, a .35 Remington rifle and an Army surplus carbine in .30 caliber.

Obviously these extremely long and accurate shots were made with the 6-mm Remington. Neither the .35 Remington or carbine is capable of such marksmanship, not even in the hands of a skilled shooter.

The 6-mm Remington, then, is just a rifle, a weapon designed for deer hunting and not violence. The gun didn't kill. The man behind it, aiming through a scope and pulling the trigger, killed. Perhaps Whitman would have made some homemade bombs and lobbed them off the Tower into the unsupecting crowd below. When a person sets his mind on killing and is willing to sacrifice his life in the process, then all the odds are in his favor.

Many people were amazed that so many victims died. Actually, knowing the capabilities of the 6-mm rifle since I hunt with one, it is surprising to me that of the number wounded, so few died. The 6-mm is capable of utter destruction. One of the modern high-velocity cartridges, it can reach far out out with fairly flat trajectory and is carries a tremendous wallop when it hits.

Amazingly Accurate

If the 6-mm is sighted in for 300 yards, the mid-range trajectory (at 150 yards) is 6.5 inches. A bullet travels in an arch or curve when it leaves the barrel by putting an imaginary straight line out from the muzzle, the bullet bisects this line twice, once on its way up in the curve and again on its way down. This means the bullet was "on target" somewhere before the 100-yard mark and again at 300 yards. Halfway, or at the peak of its curve, the bullet was 6.5 inches high. This means that from the muzzle out to 300 yards the rifle would pinpoint a bullet within a 6.5-inch diameter circle, by aiming right where the rifleman wanted to put his bullet. Even if it were aimed to impact at 200 yards, the rifleman could compensate for expected drop of the bullet at ranges beyond this by holding his sight pattern slightly high.

From his vantage, at the top of the Tower, Whitman's accuracy was remarkable. Shooting from a high place like this, down at an angle, the tendency is to overshoot. Only a skilled marksman would know immediately to compensate for this parallex.

When a 100-grain bullet in 6-mm leaves the rifle muzzle it is zipping along at 3,190 feet-per-second. Even at 300 yards it retains 2,420 fps velocity. At 100 yards it strikes with 1,890 fot-pounds of energy and at 300 yards there still is 1,300 fp energy. This bullet kills by shock. Hitting a victim at 1,300 fp energy creates tremendous shocking power. I've seen what a 6-mm bullet can do on whitetail deer; thus it amazes me that fewer people were slain.

Oddly, a schoolmate of Whitman's in Lake Worth, Fla., one Frank McCarty, commented that in high school Whitman "wasn't much of a shot." He said he must have been taught marksmanship in the Marines.

No one in his right mind would advocate doing away with the Armed Services because of this incident. Yet there is a parallel here. The Marine Corps didn't kill: the 6-mm rifle didn't will, per se; Whitman killed. It was an unfortunate, gory, shocking thing. But let's be realistic about it all. In our democratic way of life, these things not only are possible, they become reality at times. But we can't sacrifice all our freedoms on the long-shot possibility of preventing another disaster such as this in the future. Such negative thinking never has been a workable or practical solution.

Drownings Take 3380 Texas Lives During Decade

Deaths from water recreational accidents moved ahead of the 1965 pace, as it was disclosed that through last year 3380 Texas had drowned from all causes during the last ten years.

The Texas Parks and Wildlife Department, maintaining an unofficial water death count as a safety reminder, reported 149 persons had died this summer from bathing, fishing or boating mishaps.

This is slightly higher than last year when 200 persons drowned from the same causes.

Adding to the ghastly toll was a report from the U. S. Corps of Eengineers that 277 persons have lost their lives on Corps' reservoirs since 1951.

The official all - causes drownings statistics were given by the State Health Department for the last decade as follows: 1956, 293; 1957, 335; 1958, 333; 1959, 291; 1960, 371; 1961, 322; 1962, 328; 1963, 339; 1964, 359; 1965, 409.

Letters to the Editor

Mr. John Kinsey
Rockport Pilot
Rockport, Texas

Dear John:

Appearing on the front page of today's Pilot is an article headlined "Police Ask for Definite Leads on Hot Rodding." The article makes reference to complaints extended by good citizens about the untoward practices of some drivers. The article also mentioned the fact that some of the complaining callers don't wish to "get involved" when it reached a matter of submitting license numbers, names, etc. It also says, "I don't care to give you my name—just hurry and catch him!"

John I have traveled a bit, and I don't think I have ever encountered such distasteful exhibition of Americanism. Wherein lies the fortitude of our great nation?

Do such people, registering such complaints, really have the interest of the public at heart or are they simply "miffed" by something that irritates them and and ashamed to let it be known what little things it takes to "get their dander up," yet leave more important matters to someone else? Or do they just lack the courage of their convictions?

A Bishop, I know who is recognized as being a sage, said, "It has come to my attention that when I point a finger at another, three fingers of my own hand point back toward myself!" Hold up a hand, John, and point with your forefinger. I find it an interesting lesson, and humbly so.

It is a matter of record that I have tried to cooperate with our local law enforcement agencies in several different areas, and I shall endeavor to continue to do so. I shall also endeaver to cooperate with my fellow citizen. In fact, just a few weeks ago a near-by neighbor asked me if I had enough influence to have our County Commissioner erect speed limit signs on our street here in Fulton. Looking in retrospect, I wonder if he was sincere or just being facetious; but I broached the matter to Commissioner Raymond Owens, and in very little Mr. Owens had signs on the road. Yet, when a rather indiscreet driver raced down our street —and "laid rubber" for nearly 400 feet on the street bordering neighbor's projerty — neighbor withdrew from my request to join me in filing a complaint if said driver could be apprehended. Neighbor said, "I really don't want to get involved!" (I hasten to add that Mr. Owens had already forseen the need for these signs so I can hardly look (for extra) "Brown Points" toward by influence merit badge!)

It just so happened that I had aid in obtaining the license number of the car in question, and it is on record at the Aransas County Sheriff's office that I stand ready to testify as to the eye-witness account of what I saw this particular driver do. My good neighbor took visual note of the dual lines of rubber that were left in the street from excessive speed as set forth by an obviously high powered vehicle, this while the Sheriff's Department was already in the process of apprehending the driver—and with all due praise, I hasten to add that the deputy on duty, wasted no time. It was only a few minutes until Mr. Stautzenberger was in face-to-face communication with this driver. Yet, while our deputy was on the alert, my good complaining neighbor ". . . didn't want to get involved!" John even if my neighbor spent more than just an occasional dime for out-of-town newspaper, at my store, I would be happy to debate with him the accuracy of what I have here set forth.

Mr. Editor, can you think of any citizen who is entitled to a legitimate complaint if he isn't willing to cooperate with his law-enforcement agencies? If he doesn't like the way such officers are conducting the duties of their office—is there anything to prevent such citizens from setting forth an effort toward replacing public servants that displeased him? Or would he rather to continue to vote "back home" wherein his greatest nest-egg lies?

Please permit me to submit that in my on humble opinion it would appear we have a rather remarkably efficient staff of officials in Aransas County, and remind those good citizens who "don't want to get involved," that each time they point a finger; three of their own fingers are pointing back toward themselves.

Yours truly,
James M. Furlong.

Regarding the city plan to run more pipe to supply additional water to Key Allegro, I haven't been shown where the money is coming from. Secondly, it's a dangerous thing to do. It doesn't follow our policy.

I haven't been shown where the 10-inch line is going and I think it is illegal to lay a line outside the city limits.

Another thing: I say it's dangerous. We didn't have too many signers on this last bond issue. If this goes through. you won't have another bond issue passed here for another 10 years.

If Key Allegro wants water, they could tie on to the 10-inch line and pay for it. When you (the city) tentatively agreed on a price, you don't know how much it will cost. How about engineering fees?

Looks like Key Allegro would be glad to come that far to get water. They got a 6-inch line on the other side of the storage line. They want to pay for 4-inch line for $1.25 a foot and I haven't seen a map where this 10-inch line will run. We haven't got the money yet—I don't think.

We're trying to spend more money than we have in the $62,800 sewer and water revenue account. Do you want to spend it all?

Are we going to have to put in a treatment plant out there at Rockport's three new wells? Will this come out of the sewer and water revenue account?

We might have to sell some bonds, get one better than Aransas Pass. They had to borrow money to get enough.

Why should Key Allegro be any different? I would rather put seven poor people on a sewer line than have the city pay to run a line for Key Allegro. We got people now who can't pay their water bills.

What is the policy in our city when anybody wants water? When they want water they pay for it at the closest point. That is where we're going to get into trouble.

What is Key Allegro going to pay for laying the line? I'll bet they won't lay a 4-inch line and pay for it. I'll bet they won't lay a 4-inch line if we don't lay a 10-inch line.

Chas. Garrett,
Alderman, Ward 1

Editor of the Rockport Pilot
Wharf Street
Rockport, Texas

Dear Sir:

I am a relatively newcomer to Rockport. I can remember well some of my first impressions of the various names of our bays, etc. One I do remember very well (as I mispronounced it upon my first use of it), was Copano. When I heard it pronounced properly, it made a lasting impression upon me. It is my way of thinking fully of cool expressive beauty.

Since coming to Rockport, I have crossed Copano causeway, back and fourth going and coming from work, at least six times a week for two years. I still feel that the beauty of the name well expresses the beauty of the bay.

Now that we are soon to have a new causeway, we think upon what to name it.

Why is it that everything new and impressive in size must be named after the president who is office at the time of building? Yes, I know that our Chamber of Commerce hopes to receive many thousands of dollars worth of free advertising by naming the causeway after President Johnson. But, all the rest of our lives and long after, the name will forever by Lyndon B. Johnson Causeway, and one more old, beautiful landmark will have dropped along life's way. I for one am for less free advertisement and for keeping the causeway named Copano Bay Causeway.

Sincerely,
Penny Jackson

Mr. and Mrs. J. H. Schleider, Mr. and Mrs. Otis Rouquette and sons Jody and Keith returned Sunday after a week of camping at Pecan Grove near Leakey.

JAMES HUNT, FRIEND OF SERVICEMEN

James W. Hunt and Bob Hewes were huddled together. For the moment Hunt was completely unconcerned about renting a cottage at Hunt's Court, and Hewes, off duty, was not thinking about his job of Chief of Police.

Instead, they were both trying to figure out what they would do to help a sick war veteran and his family.

Hunt is Aransas County Veterans Service Officer and Hewes is Commander of the Veterans of Foreign Wars Post.

Hunt had agreed to an enterview about his work as Veterans Service Officer, but a number of problems had arisen regarding this war veteran, his wife and children.

So the interview naturally had to be delayed until the problems were solved. The reporter appreciated being in on the scene.

To make a long story short, a series of phone calls by Hunt and Hewes accomplished the following:

—Made sure that the veteran would go to the hospital as he had promised to have his heart condition checked.

—Convinced him that he was not to worry about the bills. "Just get well and take care of yourself and your family."

—Found out that the family had plenty of food. "Ho, sure, we got wieners, sauerkraut and mashed potatoes," the wife said. Hunt and Hewes said they'd drop off some groceries anyway.

Convinced that they had done all they could for the time being, for this family, Hewes went on his way and Hunt became available for the interview.

A series of questions brought out the following:

—Hunt has been the Veterans Service Officer almost 2½ years.

—His own military experience consisted of five years with the Army (1941 to 1946, two years overseas), coming out as a Tech Sgt.

—He was appointed Service Officer by the County Commissioners Court.

—Presently he is looking after the needs of 1,398 veterans or their dependents. The veterans and/or their dependents include one widow of a Spanish-American War veteran, with the rest from World War I, World War II, Korean conflict and the present so-called "Cold War."

—In terms of money, these Aransas County veterans and their dependents receive approximately $275,000 a year.

—Hunt writes letters and appeals, fills out lengthy records and makes applications for veterans.

—He handles cases involving non-service and service-connected disabilities, school for dependents, home loans for building houses or doing repair work, and hospitalization, among other things.

—He helps veterans get their discharges straightened out.

—He often gets calls in the middle of the night for help.

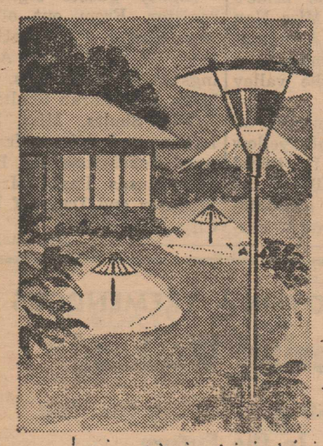

—He seems to like it.

the various things are for," he said, "and finally I developed a stock answer for the questions. Now when they ask, I just tell them it's an experimental research boat, and satisfies them."

The Tempo II, he says, is more or less a "guinea pig, and I've tried to make as few mistakes as possible, although we won't know for sure until we actually start to fish for clams."

The boat is a 76-footer, with steel hull, 20 feet wide, and with a draft of 11 feet. Stolan doesn't believe it will draw over nine or 9½ feet when fully loaded.

The boat was designed by Albert Silchenstedt, vice president in charge of design and production at Rysco. The Tempo II is expected to deliver at least 12 knots at full power.

Captain Stolan is quite enthusiastic about his new clammer and expects it to be seaworthy with as mush as 1,500 bushels of clams on deck.

He is familiar with boats on many seas of the world, and only last winter he sailed a big yacht from Durban, South Africa, to Australia and New Zealand, returning to this country by air. His wife accompanied him from New Jersey to Rockport.

Regarding the boat RYSCO is building, he he says. "It has a beautiful finish and should be very comfortable. We have showers, toilets, comfortable bunks, food freezers, an autopilot, fathometer, radio, and DX navigation aids to obtain fixes which make it easier to find our fishing grounds."

Captain Stolan and his wife, who was an employee in the Norwegian consulate office in New York for many years, like Texas and are enjoying their stay here.

Mr. and Mrs. W. H. Schuster, Jr., and children of Denver City, are spending this week here with his parents.

asing a new one.

—At this point in the meeting, Mayor Hiller informed the Council that he had written a letter to Mrs. Joe Valdez, Jr., regarding the Rockport Cemetery after Mrs. Valdez had inquired what the city's policy was regarding sale of lots.

Hiller's letter stated that the City Council no longer has any jurisdiction regarding sale of lots. The original part of the cemetery, he explained, formerly belonged to the city but all the lots in this part have been sold.

The remaining part of the cemetery is under the direction of the Rockport Cemetery Association whose policy is to sell any lot to any person without regard to race, color or creed, Hiller advised Mrs. Valdez.

—The Council voted to pay Carl Vickers Water. Well Company $38,972.83 for drilling three wells but to hold back 10 per cent until final tests are completed.

—Regarding the sewer plant project, the Council agreed to set up a special bank account for this project as required by the Federal government which will furnish a grant to pay part of the cost.

—Joe Bush was named chairman of the Board of Adjustments to succeed Miss Lola L. Bonner who resigned because she might sometime represent a client appearing before the board.

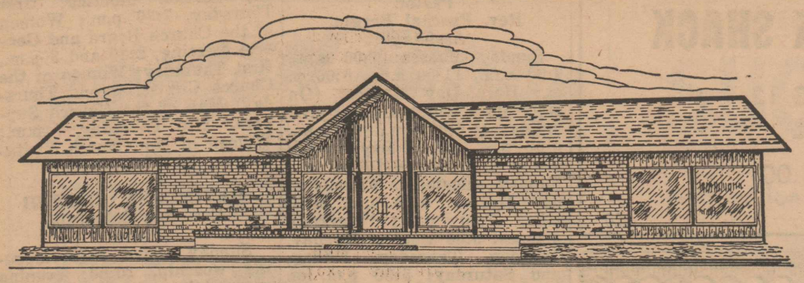

—Jack McDavid's resignation from the Zoning and Planning Commission was accepted. McDavid explained that the press of business made it necessary for him to resign.

How Medicare Works

Other Medical and Health Services

The medical insurance plan helps you pay for a number of different medical services and supplies which may be necessary in the treatment of an illness or injury. These services and supplies may be furnished by a physician as part of his treatment, or by the outpatient department of a hospital or by a medical clinic.

Services or supplies from qualified diagnostic laboratories and other suppliers are covered by your medical insurance when a physician determines that they are necessary.

Payments for most of these services and supplies are handled the same way as doctor bills—the medical insurance payment can be made to you or you can assign your right to payment to the person who provided the services. In some cases, however, the organization furnishing the service must make the claim.

For example, if you receive services as an outpatient from a hospital that is participating in the medicare program, the hospital applies for the medical insurance payment. In this situation, you are responsible for only that part of the bill which is not paid for by your medical insurance.

—Diagnotic tests such as X-rays and laboratory tests (unless covered under the hospital insurance program.)

—X-ray and other radiation therapy.

—Surgical dressings, splints, casts, and similar devices.

—Drugs which a doctor administers to you as part of his personnal service (such as a tetanus injection following an injury.)

—Rental of medical equipment for use in the home (such as wheelchairs, hospital bed.)

—Prosthetic devices (other than dental) to replace all or part of an internal body organ.

Certain ambulance services, but only when medically necessary.

Braces, artificial limbs, artificial eyes, including replacements, required by a change in your condition.

Not covered under the medical insurance program are prescription drugs. Also not covered are patent medicines, hearing aids, eye glasses, false teeth, and orthopedic shoes.

Are there really any sound reasons for buying a Chevrolet in August?

GM Chevrolet Division

During August, it's as easy to own a Bel Air 4-Door Sedan as getting in the car.

Wait till you see how sporty you look sitting in your Impala Super Sport.

In a word: Six

1. Have you ever known the instant delight of selecting a new Impala Super Sport in the color you want, slipping into its Strato-bucket seats, and driving it home from the showroom the same day? Now's your chance. Your Chevrolet dealer has a big choice of models on hand with small August price tags.

2. More than likely, your present car will never be worth as much in trade as it is right now. Money—another good reason to buy a Chevrolet this month.

3. Read those articles about when to buy a new car and they'll tell you that August is one of the best months. And your Chevrolet dealer is ready to show you why . . . with buys that are better than ever.

4. If you think winter's tough on an old car, believe us, so is summer. There's added strain on the engine because of vacation driving. Greater tire wear. The cooling system has to work extra hard. A new Chevrolet can save you a lot of trouble.

5. You do a lot of driving for pleasure so why not ride on Chevrolet's Full Coil suspension. Let your feet feel that deep-twist Chevrolet carpeting. August is to enjoy.

6. Make your summer driving safer driving by taking advantage of the eight standard safety features built into every new Chevrolet. If your present car doesn't have seat belts, back-up lights, outside rearview mirror, padded instrument panel, look into a new Chevrolet.

DOVE HUNT PROSPECTS SEEN GOOD

Austin.—Excellent prospects for both mourning dove and white-winged dove hunting this fall were reported by E. A. Walker, director for Wildlife Services of the Texas Parks and Wildlife Department.

Field surveys from the Rio Grande Valley indicate one of the highest whitewing breeding populations in the last 11 years with more than 800,000 nesting birds.

The mourning dove count was described as equally favorable with the Texas population up eight percent and that of the Central Flyway up nine percent over last year.

And 1965 was generally good for Texas mourning dove hunters.

A factor in the promising reports from the Valley, said Walker, has been the rapid recovery of citrus groves damaged by a 1962 freeze.

He said the breeding population in that area has increased one-third over last year and nesting success should be assured as the nesting facilities in the citrus trees have substantially improved.

Walker said citrus acreage utilized by nesting whitewings increased from 10,500 in 1965 to 18,700 in 1966.

Ordinarily the whitewing season is held in early September. Likewise, the north zone for mourning dove hunting usualy opens Sept. 1.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

Section 1. That Section 6, Article XVI, Constitution of the State of Texas, be amended to read as follows:

"Section 6. (a) No appropriation for private or individual purposes shall be made, unless authorized by this Constitution. A regular statement, under oath, and an account of the receipts and expenditures of all public money shall be published annually, in such manner as shall be prescribed by law.

"(b) State agencies charged with the responsibility of providing services to those who are blind, crippled, or otherwise physically or mentally handicapped may accept money from private or federal sources, designated by the private or federal source as money to be used in and establishing and equipping facilities for assisting those who are blind, crippled, or otherwise physically or mentally handicapped in becoming gainfully employed, in rehabilitating and restoring the handicapped, and in providing other services determined by the state agency to be essential for the better care and treatment of the handicapped. Money accepted under this subsection is state money. State agencies may spend money accepted under this subsection, and no other money, for specific programs and projects to be conducted by local level or other private, nonsectarian associations, groups, and nonprofit organizations, in establishing and equipping facilities for assisting those who are blind, crippled, or otherwise physically or mentally handicapped in becoming gainfully employed, in rehabilitating and restoring the handicapped, and in providing other services determined by the state agency to be essential for the better care or treatment of the handicapped.

The Legislature may prohibit state agencies from accepting money under this subsection or may regulate the amount of money accepted, the way the acceptance and expenditure of the money is administered, and the purposes for which the state agencies may expend the money. Money accepted under this subsection for a purpose prohibited by the Legislature shall be returned to the entity that gave the money.

"This subsection does not prohibit state agencies authorized to render services to the handicapped from contracting with privately-owned or local facilities for necessary and essential services, subject to such conditions, standards, and procedures as may be prescribed by law."

SENATE JOINT RESOLUTION NO. 4 proposing an Amendment to the Constitution of Texas by adding to Section 62 of Article XVI a new subsection to be denominated subsection (c), of said Section 62; authorizing the Legislature to enact laws establishing, subject to the limitations stated, a State-wide System of Retirement, Disability and Death Compensation benefits for the officers and employees of the counties and other political subdivisions of the state, and of the political subdivisions of any county.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

Section 1. That Section 62 of Article XVI of the Constitution of the State of Texas be amended by adding thereto a subsection (c) which shall read as follows:

"AGAINST the Constitutional Amendment authorizing the Texas Legislature to establish a State-wide Cooperative System of Retirement, Disability and Death Benefits for the officials and employees of the various counties or other political subdivisions of the state, or political subdivisions of a county; authorizing the Legislature to provide for a voluntary merger into the system authorized by this Amendment by those officers and employees covered by the provisions of subsection (b) of Section 62 of Article XVI of the Texas Constitution as now existing or may hereafter be established; providing that costs of this System shall be borne by the counties and other political subdivisions of the state and political subdivisions of the county electing to participate therein and the officers and employees covered by the System; and forbidding the Legislature from making any appropriations for the operation of this System."

If it appears from the returns of said election that a majority of the votes have been cast in favor of such amendment, the same shall become a part of the Constitution of the State of Texas.

What disease has the fastest growing death rate?

Emphysema.

What is it?

Disease of the lungs which in worst cases causes lungs to cease functioning.

Ten dogs were experimented on.

They were healthy beagles.

By scientific methods, they were made to inhale cigarette smole.

On the 24th day, one dog died.

Second died on 229th day.

By 415th day, half were dead.

The remaining five dags then were mercifully put to death.

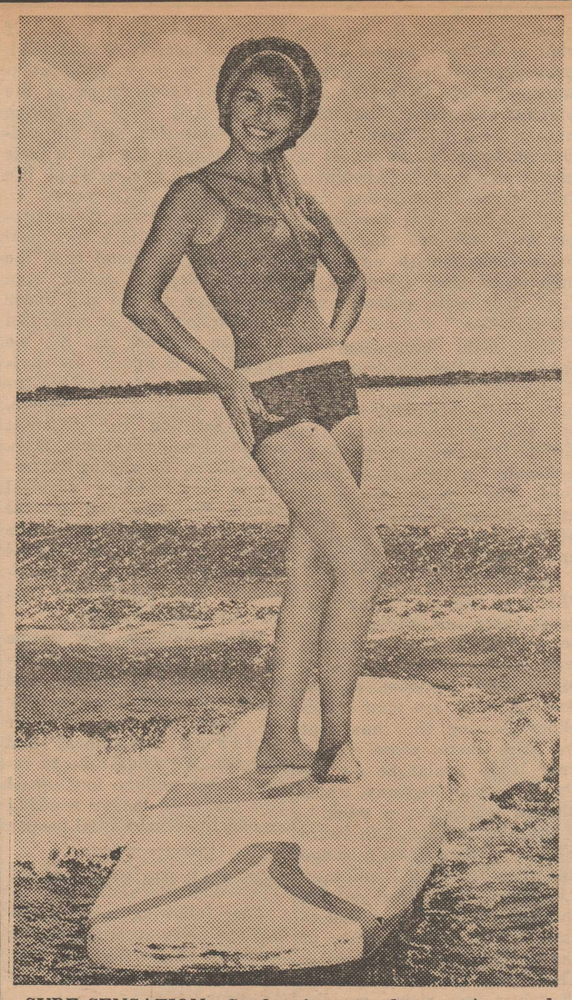

The investigators said they found a striking similarity in the changes of the lungs of the dogs subjected to cigarette smoke and the changes noted in the lungs of human smokers.

The careful study was headed by Dr. Oscar Aurebach of the Veterans Administration Hospital, East Orange, N. J., and E. Cuyler Hammond of the statistical section of the American Cancer Society.

After reprinting the above, it's difficult to thing of anything gay or light for this column. But I did have one unexpected experience last week that was a distinct pleasure.

NUMBER TWELVE ON THE BALLOT

PROPOSED CONSTITUTIONAL AMENDMENT TO BE VOTED ON AT AN ELECTION TO BE HELD ON NOVEMBER 8, 1966.

HOUSE JOINT RESOLUTION NO. 48 proposing an Amendment to Article IX of the Constitution of the State of Texas, providing the method and manner for dissolution of hospital districts created under Article IX of the Constitution.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

Section 1. That Section 9, Article IX of the Constitution of the State of Texas be amended to read as follows:

"Section 9. The Legislature may by law provide for the creation, establishment, maintenance and operation of hospital districts composed of one or more counties or all or any part of one or more counties with power to issue bonds for the purchase, construction, acquisition, repair or renovation of buildings and improvements and equipping same, for hospital purposes; providing for the transfer to the hospital district of the title to any land, buildings, improvements and equipment located wholly within the district which may be jointly or separately owned by any city, town or county, providing that any district so created shall assume full responsibility for providing medical and hospital care for its needy inhabitants and assume the outstanding indebtedness incurred by cities, towns and counties for hospital purposes prior to the creation of the district, if same are located wholly within its boundaries, and a pro rata portion of such indebtedness based upon the then last approved tax assessment rolls of the included cities, towns and counties if less than all the territory thereof is included within the district boundaries; providing that after its creation no other municipality or political subdivision shall have the power to levy taxes or issue bonds or other obligations for hospital purposes or for providing medical care within the boundaries of the district; providing for the levy of annual taxes at a rate not to exceed seventy-five cents (75c) on the One Hundred Dollar valuation of all taxable property within such district for the purpose of meeting the requirements of the district's bonds, the indebtedness assumed by it and its maintenance and operating expenses, providing that such district shall not be created or such tax authorized unless approved by a majority of the qualified property taxpaying electors thereof voting at an election called for the purpose; and providing further that the support and maintenance of the district's hospital system shall never become a charge against or obligation of the State of Texas nor shall any direct appropriation be made by the Legislature for the construction, maintenance or improvement of any of the facilities of such district.

Provided, however, that no district shall be created except by act of the Legislature and then only after thirty (30) days' public notice to the district affected, and in no event may the Legislature provide for a district to be created without the affirmative vote of a majority of the taxpaying voters in the district concerned.

The Legislature may also provide for the dissolution of hospital districts provided that a process is afforded by statute for:

(1) determining the desire of a majority of the qualified voters within the district to dissolve it;

(2) disposing of or transferring the assets, if any, of the district; and

(3) satisfying the debts and bond obligations, if any, of the district, in such manner as to protect the interest of the citizens within the district, including their collective property rights in the assets and property of the district, provided, however, that any grant from federal funds, however dispensed, shall be considered an obligation to be repaid in satisfaction and provided that no election to dissolve shall be held more often than once each year. In such connection, the statute shall provide against disposal or transfer of the assets of the district except for due compensation unless such assets are transferred to another governmental agency, such as a county, embracing such district and using such transferred assets in such a way as to benefit citizens formerly within the district.

Sec. 2. The foregoing constitutional amendment shall be submitted to a vote of the qualified electors of this State at an election to be held on the first Tuesday after the first Monday in November, 1966, at which election all ballots shall have printed thereon the following:

SENATE JOINT RESOLUTION NO. 19 proposing an Amendment to Section 49-d, Article III of the Constitution of the State of Texas, declaring state policy regarding optimum development of water reservoirs; providing for the use of the Texas Water Development Fund under such conditions as the Legislature may prescribe by General Law in the acquisition and development of storage facilities and any system of works properly appurtenant thereto; providing for the sale, lease or transfer of such facilities under General Laws; providing for long-term contracts for water storage facilities; authorizing the issuance of an additional $200,000,000 in bonds by the Texas Water Development Board upon a two-thirds (2/3) vote of the elected members of each house; providing that anticipatory legislation shall not be invalid because of its anticipatory character; providing for the necessary election, form of ballot; and proclamation and publication.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

Section 1. That Section 49-d of Article III of the Constitution of the State of Texas be amended to read as follows:

"Section 49-d. It is hereby declared to be the policy of the State of Texas to encourage the optimum development of the limited number of feasible sites available for the construction or enlargement of dams and reservoirs for conservation of the public waters of the state, which waters are held in trust for the use and benefit of the public. The proceeds from the sale of the additional bonds authorized hereunder deposited in the Texas Water Development Fund and the proceeds of bonds previously authorized by Article III, Section 49-c of this Constitution, may be used by the Texas Water Development Board, under such provisions as the Legislature may prescribe by General Law, including the requirement of a permit for storage or beneficial use, for the additional purposes of acquiring and developing storage facilities, and any system or works necessary for the filtration, treatment and transportation of water from storage to points of treatment, filtration and/or distribution, including facilities for transporting water therefrom to wholesale purchasers, or for any one or more of such purposes or methods; provided, however, the Texas Water Development Fund or any other state fund provided for water development, transmission, transfer or filtration shall not be used to finance any project which contemplates or results in the removal from the basin of origin of any surface water necessary to supply the reasonably foreseeable future water requirements for the next ensuing fifty-year period within the river basin of origin, except on a temporary, interim basis.

"Under such provisions as the Legislature may prescribe by General Law the Texas Water Development Fund may be used for the conservation and development of water for useful purposes by construction or reconstruction or enlargement of reservoirs constructed or to be constructed or enlarged within the State of Texas or on any stream constituting a boundary of the State of Texas, together with any system or works necessary for the filtration, treatment and/or transportation of water, by any one or more of the following governmental agencies: by the United States of America or any agency, department or instrumentality thereof; by the State of Texas or any agency, department or instrumentality thereof; by political subdivisions or bodies politic and corporate of the state; by interstate compact commissions to which the State of Texas is a party; and by municipal corporations. The Legislature shall provide terms and conditions under which the Texas Water Development Board may sell, transfer or lease, in whole or in part, any reservoir and associated system or works which the Texas Water Development Board has financed in whole or in part.

"Under such provisions as the Legislature may prescribe by General Law, the Texas Water Development Board may also execute long-term contracts with the United States or any of its agencies for the acquisition and development of storage facilities in reservoirs constructed or to be constructed by the Federal Government. Such contracts when executed shall constitute general obligations of the State of Texas in the same manner and with the same effect as state bonds issued under the authority of the preceding Section 49-c of this Constitution, and the provisions in said Section 49-c with respect to payment of principal and interest on state bonds issued shall likewise apply with respect to payment of principal and interest required to be paid by such contracts. If storage facilities are acquired for a term of years, such contracts shall contain provisions for renewal that will protect the state's investment.

"The aggregate of the bonds authorized hereunder shall not exceed $200,000,000 and shall be in addition to the aggregate of the bonds previously authorized by said Section 49-c of Article III of this Constitution. The Legislature upon two-thirds (2/3) vote of the elected members of each House, may authorize the Board to issue all or any portion of such $200,000,000 in additional bonds herein authorized.

"The Legislature shall provide terms and conditions for the Texas Water Development Board to sell, transfer or lease, in whole or in part, any acquired storage facilities or the right to use such storage facilities together with any associated system or works necessary for the filtration, treatment or transportation of water at a price not less than the direct cost of the Board in acquiring same; and the Legislature may provide terms and conditions for the Board to sell any unappropriated public waters of the state that might be stored in such facilities. As a prerequisite to the purchase of such storage or water, the applicant therefor shall have secured a valid permit from the Texas Water Commission or its successor authorizing the acquisition of such storage facilities or the water impounded therein. The money received from any sale, transfer or lease of storage facilities or associated system or works shall be used to pay principal and interest on state bonds issued or contractual obligations incurred by the Texas Water Development Board, provided that when moneys are sufficient to pay the full amount of indebtedness then outstanding and the full amount of interest to accrue thereon, any further sums received from the sale, transfer or lease of such storage facilities or associated system or works may be used for the acquisition of additional storage facilities or associated system or works or for providing financial assistance as authorized by said Section 49-c. Money received from the sale of water, which shall include standby service, may be used for the operation and maintenance of acquired facilities, and for the payment of principal and interest on debt incurred.

"Should the Legislature enact enabling laws in anticipation of the adoption of this Amendment, such Acts shall not be void by reason of their anticipatory character."

Sec. 2. The foregoing Constitutional Amendment shall be submitted to a vote of the qualified electors of this state at an election to be held on the first Tuesday after the first Monday in November, 1966, at which election all ballots shall have printed thereon the following:

"FOR the Constitutional Amendment authorizing the issuance of an additional $200,000,000 in Texas Water Development Bonds and providing for further investment of the Texas Water Development Fund in reservoirs and associated facilities."

"AGAINST the Constitutional Amendment authorizing the issuance of an additional $200,000,000 in Texas Water Development Bonds and providing for further investment of the Texas Water Development Fund in reservoirs and associated facilities."

Sec. 3. The Governor of Texas shall issue the necessary proclamation for the election and this Amendment shall be published in the manner and for the length of time as required by the Constitution and laws of this state.

Any city which owns airport facilities not serving certificated airlines which are not purchased or acquired or taken over as herein provided by such Authority, shall have the power to operate the same under the existing laws or as the same may hereafter be amended. Any such Authority when created may be granted the power and authority to promulgate, adopt and enforce appropriate zoning regulations to protect the airport from hazards and obstructions which would interfere with the use of the airport and its facilities for landing and take-off; an additional county or counties may be added to an existing Authority if a petition of five per cent (5%) of the qualified taxpaying voters is filed with and an election is called by the Commissioners Court of the county or counties seeking admission to an Authority and the vote is favorable, then admission may be granted to such county or counties by the Board of Directors of the then existing Authority upon such terms and conditions as they may agree upon and evidenced by a resolution approved by two-thirds (2/3rds) of the then existing Board of Directors, provided, however, the county or counties that may be so added to the then existing Authority shall be given representation on the Board of Directors by adding additional directors in proportion to their population according to the last preceding Federal Census."

Girls Report From Guatemala

Publishers' Note: Susie LeBlanc and Joanne Wolf spent part of this summer doing nurse aid work in Guatemala. Here is their report.

Last Friday we returned home from our month's stay in Guatemala. We enjoyed our trip very much, and hope to return again soon. Here are some of the reasons why.

San Pedro Necta, the town we stayed in is beautiful. It is located 5,400 feet above sea level in the Sierra Madres, but it is nestled in a little valley. The population is about 8,000 in the town and approximately 15,000 additional Indians occupy the countryside. A dialect called Mam (pronounced "Mawm") is spoken primarily, even though the official language of the country is Spanish.

The people exhibit extraordinary friendliness and are very hospitable. They would all gather around every time we went outside to talk and question us and also come to visit us in the afternoons. The principal method of entertainment there is singing and playing the guitar. They also have a long instrument called the marimba, it resembles a large zxylophone. Anywhere from three to nine men can play at once, and the music produced reminds one of a band. Even though we didn't understand their language at first, they were patient with our efforts.

The main occupation is farming. Coffee, corn, and bananas are grown and the small plots make beautiful designs on the mountainsides. The people are extremely poor, especially in regards to their food. They rarely get meat and their main meals consist of rice, beans, eggs, potatoes and tortillas.

Guatemala is called the "Land of Eternal Spring" because there are only two seasons—wet and dry. During the wet season, which begins in March and continues to November, there are many landslides. During the time that we were there, there was a very large avalanche on the Pan American highway, which blocked traffic for a week.

In order to reach San Pedro Necta, one must cross a bridge and then travel 2½ miles up 2,000 feet. For three months, this bridge had been closed to thru traffic because one of the two supports was leaning. The night that we crossed it, the river was rising rapidly, and the rain was pouring down.

Approximately an hour after we crossed the bridge, that leaning support was washeded away and that end of the bridge fell. After that, if one wanted to cross the bridge, one had to walk across and climb straight up the mountain to get to the road. Quite exciting and very difficult with a cast on. (In Mexico City, on the trip down, Joanne broke her foot by missing a step, and for two weeks, she carried a cast on that foot.)

Schooling is not compulsory in Guatemala and in San Pedro, there was a school which went to the sixth grade. If higher education was desired, one had to go to Huehuetenango. However, most of the people had only a fourth grade education, and this sufficed them for the rest of their short lives. The average life span is about 35-40 years.

We went down there prepared to work in a new hospital, but we found that the "new" hospital hadn't even opened yet. It was still under construction and is scheduled to open August 21. So, we helped to complete the hospital and set it up. This included doing many things, from painting the different wards, cleaning windows, making charts, to sorting instruments and making surgical packs. We also had several opportunities to work in the clinic, a one-room medical dispensary, where approximately 50 patients were seen and treated each day.

When we left, the people gave us a big dance, presented a bouquet of flowers and made speeches. This is only one more example of their extreme friendliness and warmth. We would like to return after college and spend two years or longer working among these wonderful people.

Said Judges shall have the same qualifications and receive the same salaries as the Associate Justices of the Supreme Court. They shall be elected by the qualified voters of the state at a general election and shall hold their offices for a term of six years. In case of a vacancy in the office of a Judge of the Court of Criminal Appeals, the Governor shall, with the advice and consent of the Senate, fill said vacancy by appointment until the next succeeding general election.

"The Judges of the Court of Criminal Appeals who may be in office at the time when this Amendment takes effect shall become Judges of the Court of Criminal Appeals and continue in office until the expiration of the term of office for which each has been elected or appointed under the present Constitution and laws of this state, and until his successor shall have been elected and qualified.

The Court of Criminal Appeals shall have power upon affidavit or otherwise to ascertain such matters of fact as may be necessary to the exercise of its jurisdiction.
