THE matter of equipping the new city park with lights so the entire grounds could be lighted at night was brought before the city council last Friday night, and after examining the figures as to cost the proposition was passed up. Softball enthusiasts have the matter of preparing a field in south Stanton where it is reported there is a transformer and that the juice is stronger. It is figured to light the field for night playing. The sponsors believe that the expense of lighting the field can be eventually paid off by passing the hat at the night games. It goes without saying that night games will attract larger attendance, and that means more nickles and dimes would be dropped in the hat.

MIDLAND voting \$125,000 to purchase the airport from a private individual and improving the grounds to the point they will meet with the approval of the U. S. flying corps, places Stanton in almost a stone's throw of an airport that will "be home" for many of the army and navy flying arsenals that demand a field on which to light with little jar as possible because of the intricate instruments installed in the planes. Heretofore, that kind of fighting air palaces have had to pass up the Midland airport because the field was not properly arranged.

My, but how these Midland boys do things in a big way. Not long ago Mayor Ulmer of Midland made a trip to Washington, D. C., unknown, perhaps to only half a dozen citizens as to his business. He came back and let the word be known what the high officials of the army and navy air corps wanted to make the Midland airport to meet all requirements, etc., and the citizens by a large majority vote put over a \$125,000 bond issue to prepare such a flying field. Those Midlanders may bow their necks and bend their backs and give not an inch to their competitor when fighting for business, but when it comes to putting over something big for their town, they throw all their competitive implements overboard and unite in one big family to land enterprises that are of value to their town. Paul Barron of the Midland Reporter-Telegram is up in the air so much, we suppose he will have his chest "pooched" over this latest added asset to the town.

THIS paper is in favor of an effort being made to establish a mail route out of Stanton to Flower Grove community. Talking with some Flower Grove citizens last week in Stanton they are anxious that their community be served mail from here. As it 'tis, mail from Stanton to Flower Grove has to go around by Big Spring and Lamesa, causing about a day's delay, whereas, if a mail route out of Stanton the community would get a letter same day it is mailed. This one fact would have a tendency to draw a closer relationship between Stanton and the Flower Grove community thereby proving of much value to both concerned.

THE HAMLIN HERALD, Bowen Pope's newspaper, and Mrs. Pope's too, for she's as much responsible for that newsy country weekly as her husband, came out last week with 44 pages, celebrating the 25th anniversary of the Herald under the administration of Mr. and Mrs. Pope. And in commemorating the 25 years of publishing the Herald, the business and professional men of Hamlin, supported the issue with quarter pages, half pages, and whole pages of advertisements.

The historical features the edition contained, as well as the local news stories and local happenings, must have required a number of new ribbons for the Pope typewriters for they were in profusion. And say, that proof

EMPL'YMENT SERVICE CHANGED TO MIDLAND

According to an announcement today from officials of the Texas State Employment Service, Martin county will now be served out of Midland instead of Big Spring, as it has been in the past.

Persons desiring to register for work through the Service should place their applications at the Midland office, which is located at 200 East Wall Street. This office will also handle all claims for unemployment compensation in the future and people now filing claims for benefits should report to the Midland office on their regular scheduled day, according to John Griffin, manager of the Midland office of the Service.

Employers wishing to secure workers may place their order through either the Big Spring or Midland offices, however, the Big Spring office will no longer have applications for work on file from this county.

Cotton farmers are advised by the Service, that the Big Spring office will still serve their needs for pickers.

reading job! which fell upon the shoulders of Mrs. Pope, demanded a pile of hard tedious work. This job was accomplished with as much precision and cleanliness as the print-shop itself is kept—free of errors.

The edition required 33,000 impression, and that was no little job of press work.

Hamlin is a town, a little excess of 2,000 inhabitants, and the anniversary edition of the Herald is complimentary of a town twice that number of inhabitants.

The edition was published entirely by the local shop force and a former shop employee living in Hamlin—saving the expense of high-powered writers and high-pressure salesmen.

A fine edition Mr. and Mrs. Pope and one that should be greeted with high praise by Hamlin folks, and one we are certain will result in great benefit to the community.

SEES AFTER QUARTER CENTURY BLINDNESS

A "miracle" came to Mrs. Q. D. Hall, 79, at her home in Colorado City, one day last week, following almost quarter century of blindness. Her blindness held her prisoner in one room for 10 years, and it was in this same room one morning at her awakening that her room seemed unusually bright. "Something was happening to my right eye. It seemed to come and go. No it wasn't exactly like a curtain or mist. It was more like a spider web. I kept rubbing my eye. Every time the web effect went away I could see a little better. Finally, it didn't come back at all," Mrs. Hall said.

Her left eye has been entirely sightless for years and still is. Riggs Shepperd superintendent of the Courtney high school, is a grandson of Mrs. Hall.

COOKERY OF TENDER CUTS OF MEAT DEMONSTRATED BY H. D. AGENT

"Fundamentally, there are only two methods of meat cooking: dry heat and moist heat," Mrs. Elsie Gilkerson, home demonstration agent told members of Lakeview home demonstration club in their meeting May 26, at the home of Mrs. Glen Jackson.

The method used in meat cooking depends on the nature of the cut to which it is applied. The tender cuts are cooked by dry heat because they contain very little connective tissue. Examples of cooking by dry heat are roasting, broiling and pan broiling. Tender cuts of meat are those secured from that part of the animal which less exercised. Mrs. Gilkerson demonstrated the correct method of cooking a prime rib roast and broiling a loin steak.

A complete well-balanced meal was served following the demonstration. The menu consisted of meat, buttered carrots, cole slaw, buttered peas, potatoes, iced tea, ice cream and cake.

Those present were: Mrs. W. E. Currie, Mrs. Glen Jackson, Mrs. A. A. Chandler, Mrs. Robert Smith, Mrs. H. D. Crane, Mrs. Tom O'Brian, Mrs. Earl Egger, Mrs. Lewis O'Brian, Mrs. W. O. Washington, Mrs. E. A. Hogue, Miss Nora Dean Pearce of Ackerly, and Mrs. Gilkerson.

DAREN'T START DRY

EVEN if this camel holds records for going without more drink, could he last if he had to start dry? Your car and your engine oil can't last either if you keep starting dry this Summer.

You can't help it with any oil that always drains down to the crankcase completely. But you can certainly help it by getting your engine OIL-PLATED.

NEVER all down in the crankcase, no matter how long you park, OIL-PLATING is lastingly close-knit to inner engine surfaces by the action of Conoco Germ Processed oil—patented. Its strong "power of attraction" fastens non-detachable OIL-PLATING throughout your engine. Does chrome-plating drain down? Neither does OIL-PLATING. Therefore in advance of starting, it's ready to slide every working part into easy motion, without rasping dryness. And since OIL-PLATING doesn't fly off or fry up it helps your engine to shatter the record for going without more oil. That's why to OIL-PLATE today with Conoco Germ Processed oil, at Your Mileage Merchant's. Continental Oil Co.

The Legion has agreed to purchase a trophy to be permanently kept by the high school for engraving thereon the names each year (1) the highest ranking scholar in the senior class (2) the names of the boy and girl adjudged by the high school faculty to be the outstanding school citizens for that year.

The selection is based upon the rating by the faculty for the qualities of leadership, loyalty, honesty, faithfulness, dependability, personality, deportment, cooperativeness.

In the selection of the best school citizens, no weight is given to scholarship, except that no student can be eligible whose grades are below average; i. e., who failed to have credit for 4 units per year.

For the American Legion awards the students selected were (1) Mary Ruth Renfro, highest grades (2) Mary Anderson and Berl Dean Clinton, best school citizens.

FORD V-8

EXCELS IN THE THINGS THAT COUNT

These four points — power, strength, safety, comfort — are by far the most important essentials in any motor car. They form the basic value of your investment.

With this solid foundation to build on, the Ford V-8 has been made beautiful, spacious, easy to drive. It is richly upholstered and has all the modern features which add to the luxury and pleasure of motoring.

You can see these things when you take a trial drive, but do not forget that the main value is in the things you do not readily see — quality of materials, precision of manufacture, fundamental engineering.
