

BLANCHE E. BEAN, EDITOR

A very lively party was given yesterday afternoon when Miss Anna Spikes entertained the members of Alpha club at her home, 125 Broadway. In the course of the evening which was played Miss Ruth Sloan won with much noise and Miss Joan Hartlow. The hostess served a splendid course to the following: Miss Fay George, Ruth Sloan, Sue Bryan, Nancy Bennett, Virginia Conley, Rosam Beth Sanders, Mathew Bryson, John H. Sanders, and Miss Joan Hartlow. The evening closed with a delicious Lemonade and cake at McWhorter, Hill and Sons of 40 North Street.

For summer afternoons, nothing is newer or more charming than these little clocks with hand-painted clocks of field flowers.

PRAYER: "My faith looks up to Thee, Thou Lamb of God, Saviour of the world."

## DEGREES OF COWARDICE AND TRAFFIC VIOLATIONS

When the Rev. Dr. Edwin H. Shapin was editor of The Christian Leader, and for some years after his death, none of his many striking comments on character-building was more quoted than this:

"At the bottom of a good deal of the bravery that appears in the world there lurks a miserable cowardice. Men will face powder and steel because they cannot face public opinion."

That admirable Universalist minister died about forty years before the blight of hit-and-run drivers of motor vehicles came upon this country. Doubtless he would be moved to dilate on the degrees of cowardice were he alive to read such news as appeared yesterday in San Antonio Express, under this head:

Two Struck by Hit-Run Autoists—Both Victims Women.

And, "Both Victims Women" supplies almost the last touch needed to render the condition and circumstances relatively perfect for speech or print on the theme just suggested. Quite the last touch would be—or would have been:

"Both Victims Children."

Compared with the hit-and-run driver, the man who faces powder and steel because he cannot or dare not face public opinion, is courage sublimely personified. For the hit driver dares not face the legal consequences—not to mention "public opinion," which is probably the most loosely used term in the language. But it is over the running away that public opinion and the police and the courts should be aroused far more vindictively than they have given signs of being in most jurisdictions, including Texas.

The hit and run automobile driver is one character that certainly should not be given much consideration, and certainly shown no mercy.

Traffic violations have caused much concern for many years, even before the days of the automobile, and there is an insistent demand for the enforcement of these laws by some people, still we find that there are many people who will violate the traffic laws possibly quicker than any other law. A general traffic law seems necessary. A travel through the state brings a man in contact with many different ordinances and different parking laws and turns and twists, and it certainly should be made more uniform. It would be such a great thing for the general traveling public.

There has been for some time a growing conviction on the part of authorities ing violations of traffic laws should be segregated so that each class can be handled in the most effective manner. A logical classification is to group violations against public convenience in one class. These are offenses of a technical nature which merely inconvenience, but do not endanger, the public. This group makes up fully 95 per cent of all traffic violations, and includes such acts as improper parking.

The second class of offenses are those against public safety, and vary in degree from acts of carelessness, such as reckless and drunken driving.

With this classification and the machinery of a Traffic Violations Bureau it is possible to obtain more logical and certain enforcement of the law in the courts. Technical violations of the first class can be handled with extreme rapidity at such a bureau, for violators may pay stipulated fines without the formality of court procedure and with a minimum of inconvenience. This clears the courts of the great majority of cases that would otherwise burden their time and permit of a real consideration of the more serious offenses.

The operation of the bureau in Detroit, which was the first city to adopt this system of handling minor traffic offenses in an attempt to keep its court dockets cleared, has been closely studied. Similar bureaus have been established in

Kansas City and Chicago, and plans are under way for the establishment of another in Los Angeles, which expects to have the new system in operation by September 1.

In Chicago the Violations Bureau has been called the "cafeteria traffic court," due to the speed with which it is equipped to handle violations. When a driver breaks a minor traffic law he is handed a slip on the back of which appears a list of traffic laws and the respective fines for first, second and third offense. The driver may make his formal plea of "guilty" by signing the slip and agreeing to pay the fine at the Violations Bureau within 36 hours. If the driver refuses to admit an offense, his case is handled by a special court which functions as a branch of the bureau.

The driver need not appear in person to pay the fine. He may send a messenger or pay by mail. When payment is made the case is entered in a high-speed filing system that keeps track of old offenders and serves as a check on repeaters. After the third offense, cases are handled by the court, which may impose heavier fines or jail sentences.

## TREND OF EMIGRATION FROM THE PHILIPPINES

In most official reports all natives of our Far East possessions are listed as "Filipinos." In the archipelago, however, the term generally excludes the hillmen of Northern Luzon and Mindanao, the Moros and the Negritos. During the past few years emigration from the Philippines—particularly to Hawaii Territory—has increased rapidly. Most of the Filipinos proper, who are divided into seven groups by differences in language, are content with their lot and seldom wander far from home. But there is in every group a number who desire to get ahead even if this involves leaving native land and kindred. The Filipinos in this country largely came here as students and many are doing excellent work. Some are in the Army or the Navy; others follow civil professions or occupations. Emigration from the Philippines to the United States and its other possessions is unrestricted. Hawaii Territory—with its extensive sugar plantations—has attracted many Filipinos, particularly from Central Luzon and the Visayan Islands. Numerous Ilocanos from Northern Luzon also are found in Hawaii, where dwell 40,000 natives of our Far East possessions. Recent statistics as to the Filipino contingent living in the States are lacking, but it probably has doubled since the 1920 Census was taken. That count revealed 5,603 here, of whom only 371 were women and girls. Most Filipino men in Hawaii Territory have families to support and are industrious and law-abiding. Fisheries and canneries lately have drawn Filipinos to Alaska, notwithstanding the cold weather often prevailing in the Territory's coastal waters and islands. Because of proximity, several Chinese treaty ports also have Filipino colonies. In the international settlement near Old Shanghai, these migrants are willing to do their share toward defending the area. They constitute a company of the Shanghai Volunteers. Among all the peoples in the Far East, the Filipinos proper have been most eager to adopt European civilization. Perhaps their greatest progress has been in music. In Luzon a pipe organ constructed wholly of bamboo, which still is used after many years' service. It is a poor village which lacks a band and an orchestra, and most such organizations play well. So far, Philippine precedence as a scholar and an author belongs to Dr. Jose Rizal a Tagalog whom the Spaniards executed in 1896 for alleged complicity in the uprising that year. Rizal was only 35 years old when he fell in Manila, but his fame is secure. He longed for a day when his countrymen would be free to seek learning anywhere, and he advocated separation of church and state in the islands. Now one of the most flourishing provinces in the archipelago bears Rizal's name.

Cal Coolidge has gone and went and started something now. He says he does not care to make the race for President in 1928. This does not say anything however, for he has not said he would not accept the job if it is offered him. We still think that Silent Cal is just trying to find out how badly the G. O. P. wants him to accept.

The proposition of marking the highways into Lubbock certainly appeals to us as a very wise expenditure of money by the Board of City Development. It is a good thing to have the distances marked for at least a hundred miles away. People become more and more interested in every town that keeps it constantly before them the fact that on a head there is a city. This silent advertiser showing up at regular intervals means more than merely telling one how far it is to that place. It makes folks think there is really something to the town—and there usually is.

The revival meetings hopped off under most favorable conditions Sunday evening, and with the interest displayed in the big tabernacle meeting it would seem that there is bound to be some wonderfully favorable results from the efforts of Evangelist Hogg. More than four thousand heard the evangelist in his first sermon Sunday night, and the largest number ever seen at a Monday morning service was there to hear his message at the ten o'clock hour. The leaders of churches in Lubbock believe that the people here need a revival of religion and that Will Hogg is the man that will be able to wake them up to a sense of their duty.

## OUT OUR WAY

THE NOMAD

THEY'VE CROWDED US INTO THE COUNTRY  
WHEN YOU COULDN'T RAISE A BALLOON  
SO WE STARTED TO BREED UP SOME CATTLE  
THAT COULD LIVE ON THE LIGHT OF THE MOON.  
WE MADE OUR LAST MOVE WE ALL FIGURED  
NO FARMER COULD USE THIS HERE SOIL.  
BUT ALONG COMES A GOGGLEEDED SNOOPER

## SO THINK WE

We think that it will be a great thing when we can secure home-grown mutton and roasting ears on the local markets.

We think that just a drive over the South Plains will be convincing that this country is progressive and up to the minute in every line.

We think that it is a very easy matter to get others to agree with you. Just admit that you are wrong.

We think that chickens that come home to roost have more sense than some people.

We think that when a public speaker pauses for a reply it breaks him all up if he gets it.

We think that there is probably a many an untold story in a cord of wood.

We think that some motorists are practicing a very dangerous habit by ignoring the city stop signals.

We think that the meaner a man gets the more he seems to like himself.

We think the Lubbock County old timers enjoyed themselves in the third reunion here yesterday afternoon.

We think that education must seem less wonderful to the boy whose educated dad can not help him with his studies in the eighth grade.

We think that nothing remains of the football season except trying to get the other fellow's couch.

We think that most of the big jobs are being held by men who could not even name three naughty magicians.

We think that nothing is calculated to jar an eligible girl like a young man who talks about his money but says nothing about matrimony.

We think that the people who have been away from Lubbock for a year or so can hardly recognize the old town.

## OPINIONS

## LEST WE FORGET:

Secretary Hoover's report to the President on flood conditions and remedies is a reminder that a great unsolved problem calls for National attention. There is no question that floods can be prevented at moderate cost. The secretary believes an additional expenditure of 20 millions a year for 10 years on higher and more comprehensive levees and on spillways would give adequate protection. The danger lies in National forgetfulness combined with a possible desire on the part of Congressmen to play selfish politics. Unless there is an alert public sentiment and a general insistence that the recommendations of the engineers be followed, an area half as large as the State of Kansas will continue to be menaced from the overflowing Mississippi—Kansas City Times.

## CHEAPER THAN WAR:

Since he became chief of staff of the United States Army, Major General Charles P. Summerall has developed as a public speaker to such an extent that he is regarded as the foremost orator in the United States Army. General Summerall is called upon to address gatherings of veterans, training camps and similar military organizations all over the country. He delivered an address at the reunion of the Forty-second Division at Des Moines, in which he uttered a few words which might be well for the good part of posterity, when

## WHAT ABOUT THE BOYS

It was pointed out to the editor of this column this week that the boys in Midland are sorely neglected.

Practically any up to date and progressive town of Midland's size has some good boys organization, either the Boy Scouts or the Boys Y. M. C. A. work.

Boys in Midland have very little to do except to attend to their regular jobs, find what amusement they can around home or to roam the streets.

A good live organization of some kind, with a gymnasium or regular meeting place, would provide entertainment for the boys that would give them a place of constructive amusement at all times.

It is high time that some action is taken toward taking care of the boys.

Growing boys in a growing town must have something to do—Reporter.

The editor of the Midland paper has quoted in part a saying one of the great truths of civic growth and full development.

A boy is a man in the cocoon—one does not know what it is going to become. His life is big with many possibilities. He may make or un-

make kings, change boundary lines between states, write books that will mould characters, or invent machines that will revolutionize the commerce of the world. Who knows but that that boy whom you just passed a short while ago may be the one to whom you will go not many years hence, to borrow money, or to hear him preach, or to beg him to defend you in a lawsuit; or the one who will stand with pulse unshaken, bare of arm, in white apron, ready to do his duty while the cone is placed over your face, and night and death come creeping into your veins.

It is worthwhile to be patient with the boys—you are dealing with soul-stuff, with Destiny just around the corner; but patience alone with the boys cannot impart to them the fuller duties, responsibilities and capacities which they must have in later years if they are to continue the march of progress and civilization which we have started. There must be organized, definite action, early training, that let them go forward as they will.

"What is your brother in college?"  
"A half-back."  
"I mean in studies."  
"Oh—in studies he's away back."

## Decreasing Death Rates of Babies

By DR. MORRIS FISHBURN  
Editor Journal of the American Medical Association

Everyone who has followed the decreasing death rates of civilized communities during the past hundred years realizes that much of the decrease is due to the substantial reduction that has taken place in the deaths of infants during the first year of life. In 1926, the death rate of infants under one year was 41 per thousand; in 1910, 141 per thousand, and in 1920, 105 per thousand.

The number of deaths under one year decreased considerably, but under one month decreased only slightly, and those under one week hardly at all. In other words, as pointed out by Dr. Howard W. Green of the Cleveland (Ohio) Health Council, the better economic conditions and public health work of the past 20 years is apparently not affecting greatly the cause of deaths of infants in the first week of life.

Most of the deaths that occurred during the first year of life were due to disturbances of digestion and

infection of the gastrointestinal tract by food not properly safeguarded. This has been largely eliminated.

The deaths which now occur are largely due to infection of the lungs, such as broncho-pneumonia, bronchitis, influenza and pneumonia. The number of deaths in the infant has decreased somewhat, but the number of deaths from congenital malformations and from injuries at birth remains approximately the same.

The one factor which has steadily increased during the past generation, as a cause of deaths in infants is the rate from prematurity. This apparently is associated with parental infection and with obstetrical care, and indicates the necessity for more attention to the condition of the mother during the period before the child's birth. Certainly the mother who wishes to save her baby should see a physician just as soon as she realizes that she is to have a child, and should visit him regularly until after the child's birth.

## Market Facts for Farmers

By J. W. FIOR  
Market Specialist, Georgia State College of Agriculture

With the growth of the country, with the increase of city population, and with modern association and scientific efforts making our trading complex, there has come into existence various agencies and people doing business between the farm producers and the ultimate consumers.

For example, consider eggs. The farmer's wife trades eggs for goods at the village store or sells for cash to a huckster. She may also, under certain conditions, have a direct outlet to consumers in a nearby town, or she may belong to a co-operative, or perhaps to a local market.

If she lives within easy driving distance of a larger town she may develop a trade with retailers there who sell to consumers.

Hucksters and village stores usually ship their eggs by express to the nearest city, where they are bought by wholesalers. Now and then a huckster will have developed trade with stores in the nearby city.

The city assembler carries the eggs and distributes them to jobbers or retailers in his own city, where there is a surplus of eggs in which case he loads a car and sends them to a still larger city and sends them to a still larger city and sends them to a still larger city.

The carter receiver may do one of two things. During the flush season in the spring he may sell to people who will put the eggs in storage. This class of dealers, if often called speculators, because among them there are some who

confine their efforts to speculative buying. Of the carter receiver, the larger city may sell to wholesalers, either in car lots or in large quantities. Then the wholesalers may break up the car lots and sell in smaller quantities to jobbers. These jobbers distribute to retailers, a few cases at a time, and the retailers supply the ultimate consumers.

The point in reference to selling eggs here in the South, is just to know your market. Also know your natural relationship to the market. If you have only a few dozen of eggs a week and if you are located close in to a town where the consumers need eggs, it is usually best to break up the car lot and sell to a huckster or to a village store.

If you are a producer of several cases a week and the nearby town has sufficient buying power, it is usually best to develop trade with retailers. If you have a large quantity of eggs, it is usually best to sell to a carter receiver.

It is not good business to try to sell a case of eggs a week to a family of five; likewise, it is poor judgment to try to sell a car lot of eggs to a few cases of eggs by express.

To sell eggs to best advantage, study the situation.

The same thing applies to other farm products. Recently, we noted a small Southern country store selling butter to a Northern market, when carload after carload of butter was coming South. With the South producing less butter the needed shipping butter North means paying freight both ways.

## Today's Poems

HE HOLDS MY HAND  
(By Lieut. James Parton)He holds my hand, in every trial and care;  
He holds my hand, when no one else is near.  
When all have fled, and I am left alone,  
Oh, strengthening thought, He sits upon the throne!He holds my hand, He will not let me go;  
He holds my hand, because he loves me so.  
Through every storm when waves are foaming high,  
Oh, sweetest thought, that Jesus then is high!He holds my hand, what therefore shall I fear?  
He holds my hand, when all about is drear.  
When clouds of darkness veil His face from me,  
Oh, wondrous thought, I put my trust in Thee.O, wondrous thought, that Thou art ever high,  
When tempest sweeps, and waves are dashing high,  
One thought of Thee, O God, my trusted friend,  
One glimpse of Thee, O God, my friend and friend.THE LAST TRAIL  
(An Old Cowboy Speaks)It ain't as if lone trails was new to me—  
The desert's ways have been to me  
Since I was a boy, a hankerin' to be a cowboy.I drifted dreamin' in the land of the living dead,  
On longsome meadows where the deer  
Seis friendly-like when day is dawning.Stars was my gardeners and  
'T was a friend, a friend, a friend,  
It ain't as if I from some town  
Came.Into the Great Gray Range with  
No end  
I'd step a-shiverin' in the snow,  
Now I'm to go it seems right and  
I wouldn't turn back if I could.It ain't as if adventure was a new thing,  
To me, my life's pack has been  
Along far trackless trails, and  
I'm a cowboy.Now that I drift again tonight  
The rangeland where man and  
are die,  
Somewhere just touches rim to rim  
God's Great Gray Desert, and  
find  
His Last Lone Trail friendly  
and  
I'm a cowboy.Way To Stay Cool  
During AugustYOUR GOLF SCORE  
ISN'T SUCH A  
SERIOUS MATTER

## SOUTH PLAINS OIL NEWS

EDITED BY EARL THOMPSON, PHONE 13 OR 14

## OIL PRODUCTION CURTAILMENT IS SOUGHT

LAHOMA CITY, Okla., Aug. 4.—Flood gates of the greatest oil area will be closed to the first extent of operators to stem prodigious flow that has over the markets and caused a national depression in the oil industry placed over 500,000 barrels of oil on the market.

The Oklahoma oil commission, a plan to be put into effect by the companies operating in the field will go into effect tomorrow. By prorating the output of the various companies, the commission hopes to reduce the daily output of the field down to 75,000 barrels less than the present output.

The commission, which has been in session since the first of the month, has been unable to reach an agreement on the proposed curtailment of production. The commission is now in session on its order to give an order to the companies to curtail production.

The commission is now in session on its order to give an order to the companies to curtail production.

favorable. This well is being closely watched with interest by the oil fraternity, as they are within a few feet of the showing of oil picked up on this same section several years ago by the General Oil company.

The Green well on southeast quarter of section 6, block 31, 2 south, Glasscock county, on the Oxshar ranch setting casing at 2,000 feet.

The Landreth well in Glasscock county on northwest corner of northeast quarter of section 12, block 35, 2 south, shut down at 2,275 feet.

The Marland-Gilmer No. 1 on the southwest quarter of section 32, block 24, 1 south, Howard county, drilling at 400 feet.

The Vitek on section 125, Clay pool drilling at 10 feet.

Smith and Others well on north part of section 6, block 22, 2 south, drilling at 1,810 feet. This well is 1-2 miles northwest of Settles No. 1, which came in a few months ago at 1,340 feet. This well is being cored to test the sand. This well is also being closely watched as it is about the same depth where the Settles was found.

Garza County Justice Test Loses Casing

Pandora Oil company No. 1, Justice, 200 feet from the southwest corner of section 12, block 6, H & C. N. survey, Garza county, pulled off the two top joints of 10 inch casing today, which will delay drilling several days.

Douglas Oil company No. 1, Seagraves, on the line of Garza and Kent counties is drilling at 1,235 feet. They expected to find a pay in this well before they reached 1,000 but have failed to find it.

Marland Makes Location

Big Spring, Aug. 4.—The Marland Oil company of Texas made new location on the Gular ranch seven miles west of Big Spring. This location is on section 14, Baugh and Cockrell survey, and is about 1-2 miles south of the Marland well drilled on the same ranch.

Advocating needwork for men, the Chicago Art Institute declares that Charlesmagne and William the Conqueror were expert fishermen. But why did they overlook Dr. Cook?

Roberts Test Plugged Back for Old Sand

Big Spring, Aug. 4.—L. C. Harrison drilling on the Dora Roberts ranch on section 156, block 29, W. & W. survey, Glasscock county, drilling at about 200 feet. Harrison is plugging back on his well in the southeast quarter of same section to 1,635 feet to shoot a sand which had considerable showing of oil. This well was drilled to 1,600 feet, is drilling about 500 feet, one-half mile north of Settles No. 1 in same section.

California company is rigging up on the Joyce & Howard Fisher ranch a new northwest quarter of section 20, block 23, 1 south.

Oil Consumption

The crude oil production is showing new high ground, consumption of petroleum and petroleum products is breaking all previous records.

As disclosed by the latest report on production, consumption of petroleum, petroleum products, and petroleum products, the Bureau of Mines, U. S. department of commerce, and the Washington bureau of the petroleum supply of oil was in the period before the war.

Production Less

It was a lessening of the output of overproduction of the barrel per day, in the month of May to 125,000 barrels during the month of June.

The report shows, consumption of oil was 140,000 barrels per day, a much larger increase than the 125,000 barrels per day, a much larger increase than the 125,000 barrels per day.

Oil Usage Jumps

The showing of total overproduction of the barrel per day, in the month of May to 125,000 barrels during the month of June.

The report shows, consumption of oil was 140,000 barrels per day, a much larger increase than the 125,000 barrels per day, a much larger increase than the 125,000 barrels per day.

Strain Centralized

Furthermore, while the government report shows only a small production for the industry as a whole for July, it shows that the strain is not evenly divided.

It is falling most on the producing companies in the Mid-Continent. This is shown by a study of the barrels of crude in stock in California, most of which are due to the Seminole operation and production.

McDowell Well Drilling at 253 Feet

Big Spring, Aug. 4.—The McDowell well on the McDowell ranch on section 42, block 14, Twp. 2 S., R. 10 E., Glasscock county, is at 253 feet, got the bit at 253 feet, formation looking

## NEW LYNN OIL TEST

The Elpo Oil and Gas company, of Fort Worth, has made a location 200 feet from the west line and 300 feet from the north line of section 6, block c-42, public school lands, Lynn county.

## KING TEST RIGGING

The Humble Oil and Refining company is rigging up with cable tools on its No. 1 Pletcher ranch, 10 miles north of Guthrie, in King county. The location is 200 feet north from the center of the south line of section 171, J. H. Gibson survey.

## HENDRICKS WELL OUTPUT REMAINS STATIONARY

Southern Crude Purchasing company's No. 1 Hendricks, southeast of the northeast of section 44, block 26, which extended the Hendricks field in Winkler county to the north did 872 barrels the last twenty-four hours, and drilling deeper has not helped it so far. It topped the pay at 2,925 feet without any increase in oil or gas.

Texas's No. 1 Grisham and Hunter, to the east of the pool, in southwest of the southeast of section 41, block B-5, which is making 5,000-6,000 feet of gas, have a fishing job. The bit was lost at 2,662 feet.

## GARZA COUNTY JUSTICE TEST LOSSES CASING

Pandora Oil company No. 1, Justice, 200 feet from the southwest corner of section 12, block 6, H & C. N. survey, Garza county, pulled off the two top joints of 10 inch casing today, which will delay drilling several days.

Douglas Oil company No. 1, Seagraves, on the line of Garza and Kent counties is drilling at 1,235 feet. They expected to find a pay in this well before they reached 1,000 but have failed to find it.

It is falling most on the producing companies in the Mid-Continent. This is shown by a study of the barrels of crude in stock in California, most of which are due to the Seminole operation and production.

## McDowell Well Drilling at 253 Feet

Big Spring, Aug. 4.—The McDowell well on the McDowell ranch on section 42, block 14, Twp. 2 S., R. 10 E., Glasscock county, is at 253 feet, got the bit at 253 feet, formation looking

## No Epidemic Says Health Officer

Denial that there is any epidemic of infantile paralysis in this section is voiced by City Health Officer Dr. J. W. Rolfe, who points out that there have been only three cases in the county, none of which have been fatal.

While the disease is possibly contagious, local physicians agree, should cases arise here the public will be kept informed about it.

Cases in New Mexico reported recently have also been announced as cured and quarantine lifted, it was said.

## Dr. Horn To Speak At Central College

Returning to his old Alma Mater after an absence of 20 years, President Paul W. Horn, of the Technical school of the commencement address at Central College in Fayette, Missouri, next June, he announced yesterday after receiving an early request for the engagement. President Horn graduated from the college several years ago and has visited on the campus but two or three times since his graduation, the last time being twenty years ago.

A number of prominent educators of Texas are numbered in the alumni of the school which was one of the foremost in the early days of Missouri.

## Hog Raising Aids Farm Pocketbooks

LOCKNEY, Aug. 4.—One of the chief factors in the program of diversification that has contributed to the good financial condition of this section is the hog raising industry. Not a new industry, but one that has been followed by success for many years on the plains. Hog buyers this year report unusually large sales along with the fact that the country is well stocked with hogs.

Farmers, maintaining this as one of their chief money making means are jubilant over the large food crop prospects seen over Lockney's trade territory, according to farmers and bankers.

one of the main factors in promoting the industry in this section is the irrigated districts that raise an abundance of alfalfa and similar feeds.

Hog raising has been given a permanent place in the program of diversification that has been so generally practiced over this section.

## Competition Is Desirable When It Is Clean

Competition is a wonderful characteristic of business, but it sometimes leads to gross misrepresentation in order to make a sale. That feature of competition will not be found in your business relations with firms who are established . . . who expect to serve you in the years to come. You usually find it when you come into contact with house-to-house peddlers or the representatives of an organization that is here for just a comparatively short time . . . an organization that has yet to prove itself.

## Do Not Be Misled by Rash Promises or False Statements

It has been brought to our attention that a lady who is now selling another make of washer is claiming that she was formerly employed by this first to sell the Savage Washer . . . that she was unable to continue with us, due to the fact that the Savage Washer would not give satisfactory performance nor stand up in its operation.

We take issue with these statements, for NEVER IN OUR HISTORY HAVE WE EMPLOYED A LADY TO SELL THE SAVAGE, nor has there been a single instance where we have been forced to take back a Savage because of unsatisfactory service.

## A Guarantee Is No Better Than the Character of the Firm Behind It

You may be told that a certain washing machine will last a life-time, but a statement like that is an insult to the intelligence for the piece of machinery was never manufactured that carried an honest guarantee of life-time longevity. The purchase of a Washing-machine entails the outlay of good money, and the only way in which you can protect yourself, is to buy it from a firm that has proven itself anxious and willing to serve the public and serve it fairly and squarely, without misrepresentation of any kind.

The Savage Washer carries the same guarantee as that of any other standard make, and if you desire a company guarantee, get one signed by an authorized official of the company and do not take the word of an irresponsible salesman that you will get the guarantee at some indefinite period AFTER you have signed the purchase agreement.

## \$25 Reward for the Name of Any Dissatisfied Savage Owner

So confident are we that there are no dissatisfied Savage owners that we will pay \$25 for the name of one.

In addition, we will gladly demonstrate the Savage in your home at the same time as any other washer you may desire to have demonstrated. If we cannot sell you the Savage on its merits alone (and we are confident we can after a demonstration) we will not misrepresent it in order to make the sale. We'd rather have satisfied customers, for we are in business today to serve you tomorrow. The Savage is so good that it does not require misrepresentation to sell it, and we have confidence enough in the judgement of a prospective purchaser, to believe that they will not be misled by any such statement that ANY washing-machine will last a life-time. The Savage is made from the best materials available . . . it is manufactured on a principal that has relieved the burden of wash day in thousands of homes, but unless we can sell it to you in a manner that will make you a friend of this firm always, we'd rather keep it on the floor.

## Yes, Competition Is Desirable

and we are glad to say sincerely that our competition from old established Lubbock firms is clean, but in justice to ourselves and our fair dealing policy, as well as a desire to protect those who might be misled by false statements, we felt that a true explanation of the conditions prevailing should be made.

We want your patronage only on the Basis of Our Ability to Serve you satisfactorily

## Seahawks Better Laredo Oilers 8-5

LAREDO, TEX., Aug. 4. (AP)—The Corpus Christi Seahawks took their second straight game from the Laredo Oilers at the border city today by a score of 8 to 5 in the play-off series for the Texas Valley league pennant.

Hallie Crumpton, Seahawk third baseman, featured with two home runs during the game.

The final play at Corpus Christi Saturday and Sunday, Friday is an off day.

The score by innings not given. Robinson, Armstrong and Pompa; Webb, Haddock and Arzuff.

## JCE EVANS IS RETURNED TO SOONER OFFICERS

AUSTIN, Aug. 4. (AP)—Governor Moody today honored request of the governor of Oklahoma for rendition of John Evans, charged in Oklahoma with wife abandonment.

Evans is claimed to be under arrest in Borger.

## POLLARD WILL ADDRESS CORPUS CHRISTI C. OF C.

AUSTIN, Aug. 4. (AP)—Attorney General Claude Pollard today accepted an invitation to address the Corpus Christi Chamber of Commerce tomorrow night.

Sunday night he is to speak at the Mother Neff park chalet at McGregor.

## Registration Of Rooms For Tech Studies Asked By College Authorities For Term

With the nearing of the opening of the fall term of the Tech, numerous requests with regard to rooming and boarding places for students have been received by the college authorities. Feeling that the enrollment will be greatly increased this year, the officials are making plans to provide for their comfort in every phase of the school's opportunities.

In order that a complete list of the homes available for men and women students for the coming session, with full information as to the prices and location, may be compiled, the college authorities are asking that those desiring to keep students to file applications for approval of their homes in the office of the Dean of Women and Prof. Cecil Horne not later than August 18.

Those who have kept students during the past term are asked to file new applications in order to insure an accurate list of addresses. Applications should be made in person or in writing unless the applicant has been listed previously.

In accordance with college regulations, women students are not allowed to live in homes not on the approved list except upon written requests of their parents or guardians. Inconvenience and delay in providing proper housing for the students will be avoided if arrangements with the college authorities are made at once.

Stricter regulations are to be placed on the students in regard to their behavior at boarding houses. The House Mothers association did much last year in regulating the conditions existing in the houses and much more is expected to be done this year. The association will include house mothers for both men and women.

## Munn Knocks Out Tucson Big Boy

NEW YORK, Aug. 4. (AP)—Monte Munn of Lincoln, Neb., knocked out Pat Lester, giant heavyweight from Tucson, Ariz., in the first round of a ten round semi final of a heavyweight carnival at Madison Square Garden tonight. Munn weighed 314 against Lester's 245.

The three times Monte floored Lester with jolts to the jaw.

## Hereford Breeder Sells Fine Bulls

HEREFORD, Aug. 3.—Ed East, one of Hereford County's best bull breeders, sold three herd bulls during June, all for attractive prices. He received \$2600 for the three and two of them were yearling calves.

The highest price herd sire went to Geo. Hurch of Danville for \$1250. This bull, Diamond Mischief, by Superior Diamond and out of Miss Handell by Superior Mischief, is one of the best herd bull prospects that has been produced in the Hereford country for some time, according to those who looked him over.

Hardwick Bros. of Clovis, New Mexico, paid Ed East \$750 for Diamond Mischief 2nd, by Superior Diamond and out of a Superior Mischief dam.

East sold Albert Higgins, Dean Blanchard 14th, a grandson of Old Beau Blanchard, for \$600.

Mr. East is a comparatively new breeder in the business, but he is selected females from the cream of the good herds in Hereford county, and never hesitated on the price of a herd sire or a breeding cow. All of his breeding females are straight line bred Anxiety 4th Herefords, and he is saving all his heifers until he reaches twenty-five. This will be the right sized herd for the production of herd sires. He is now building one of the outstanding herds of the country.

## PLUMBER QUILTS FAMILY

Forest Lanier Admits Leaving His Folks To Join House Of David Group Years Ago

ST. JOSEPH, Mich., Aug. 3. (AP)—Forest Lanier, plumber for the house of David, admitted today under cross examination in the state's dissolution suit against the colony that he left his family in Birmingham, Ala., in 1906 to join the colony.

He testified he came to the colony with his brother-in-law, James Moore, who also left his family behind, but denied that his children and wife were not provided for.

## FORT WORTH IS WARM

Cowtown Ties With Santos For Being Hottest Place In Texas Yesterday

DALLAS, Aug. 4. (AP)—Fort Worth and San Antonio were the two hottest cities in Texas Thursday. Dallas was next with a temperature of 95 at 4 p. m. The two other Texas cities had a maximum temperature of 94 degrees each.

Mercury in other Texas towns were recorded as follows: Abilene 96, Amarillo 95, Brownsville 92, Corpus Christi 92, Galveston 90, and Palestine 94.

## NO POLAS IN ENGLAND

LONDON.—England never has produced a Pola-Negri or a Lya de Putti—and probably never will. So says a London dramatic critic, who claims that English women are too reserved and lack sufficient glow of personality to make screen stars of that type.

If Coolidge economy had been in vogue at the time, there probably would have been only one Walla in Walla, Walla—Nashville, Banner, and only one King in King Sing.

## BALMORHEA GETS HIGHWAY OFFICES

ADVANTAGEOUS LOCATION IS  
CONSIDERED IN DIVISION  
CHANGE

BALMORHEA, Aug. 4.—Move of the division headquarters of the State highway department from Alpine to Balmorhea is scheduled to take place the first of this month. Arrangements for removal were completed some time ago, and shops located here. The highway department is to erect an office building in the business section for officials of the region.

The relocation of the division headquarters was brought about as a result of the Texas Chamber of Commerce motorcade visit to Balmorhea. State Highway Engineer Thompson and the Highway Commission, who were in the official party of the regional chamber motor caravan party, were convinced of the advisability of the change at that time. The Balmorhea Chamber of Commerce and all citizens of the Valley helped present the invitation for establishment of headquarters here.

**Location Good**

The location of Balmorhea on the Old Spanish Trail and the proposed international highway, and midway between the other two main highways in West Texas, the Bankhead and the Border Highways, was the first thing to appeal to the state authorities. Decision for the change was reached when it was seen that good roads lead from Balmorhea in all directions connecting with these highways and making easily accessible such points as might need construction and repair work.

## Lockney Farmers Have Fine Crops

LOCKNEY, Aug. 3.—Farmers of this section are jubilant over the prospects for good feed and cotton crops at this time. Due to the rainfall over practically the whole territory, the crops of the early and late planting are both growing very rapidly. People making a survey of the crop situation for this section have estimated that the grain sorghum acreage is about 90 percent and the cotton acreage about 80 percent normal with the general condition of the crops considered good, however, late. Even though the crops are late, this is being overcome by rains falling at opportune times and the growth being rushed by good weather.

## Sanger Girl Heads Lass-O This Year

DENTON, Aug. 4.—Miss Eunice Sullivan of Sanger has been appointed editor-in-chief of the Lass-O, student weekly newspaper at the College of Industrial Arts for the second summer session. Miss Sullivan is a sophomore in the college and is carrying out her second year of journalistic work.

Other officers are: Associate editor, Maureen Howie, Terrell; business manager, La Velle Hammett, Denton; circulation manager, Mable Pass, Denton; assistant editor, Caro Crawford, Honey Island. Miss Sullivan succeeds Miss Lois Osburn of McKinney who was editor-in-chief during the first summer term.

Certain inmates of the Oklahoma penitentiary evidently felt that lack of practice was likely to impair their professional efficiency. So they cracked the safe in the prison shirt factory.

## REVIVAL

(Continued From Page 1)

seem that the influence of the services are being felt over a large area, and the coming week will find out of town representation larger, it was stated.

Parking space is becoming quite an item, and the parking committee asks that drivers of cars park them as close together and in good order as possible, so that the space can be utilized.

**Census Is Planned**

Arrangements are being made for taking a religious census of the city and in a meeting of committees composed of the pastors of the various churches in Lubbock yesterday afternoon committees were appointed to complete arrangements for taking this count in one hour's time. It will be taken Sunday morning August 14th. More than three hundred and fifty people will be engaged in this task, and it will be taken beginning at 8:00 o'clock and continuing till 9:00 o'clock. The information will be used in further campaigning in the meeting and afterwards turned over to the various pastors for use in their pastoral work, and for the benefit of church workers in various departments.

**Many Workers**

The workers will be proportioned as follows: First Methodist church 75; First Baptist church 75; Church of Christ 50; First Christian church 50; First Presbyterian
