175,725 Pounds of It

Beef Aplenty Is Shipped From Here

Some 175,725 pounds of beef on the hoof were shipped from McLean to El Paso during the past week.

This was the estimated weight of 213 head of fat cattle sent by the Triangle Ranch Feed and Cattle Co. to Peyton Packing Co. in El Paso.

John C. Haynes, manager of the local feed lot, said the animals weighed an average of 825 pounds each, and they had gained an average of two and three-fourths pounds per day while being fed on Triangle Ranch Feed and Cattle Co. rations for 100 days.

A huge cattle truck arrived at the feed lot west of McLean shortly before noon last Thursday to take most of the animals to El Paso.

The remainder of the 213 were shipped by truck on Sunday.

The cattle were purchased from the local feed and cattle company by Johnny Hankins, Pampa buyer, for Peyton Packing Co.

Haynes did not disclose the price received for the beef, but said it was higher than they would have brought in Amarillo.

This wasn't the first time the Triangle Ranch Feed and Cattle Co. has sold such cattle to Peyton. Several loads have been shipped to the El Paso firm in the past.

(Pictures made by The McLean News of the cattle shipment last week had not returned from the engravers this morning. These will be published in the July 22 edition of the News.)

For National Pageant

Miss Grain Sorghum Entries Are Needed

Entries are still being sought in McLean for the Miss Grain Sorghum contest, the Junior Chamber of Commerce announced this week.

Any young lady who will be 17 years of age by Aug. 7 of this year is eligible to enter the competition to determine the local contestant in the national Miss Grain Sorghum pageant.

Entry may be made by writing to the McLean Jaycees, Box 250, by July 23.

James A. Foster is chairman of the local contest. Foster said the McLean entry will be announced at the regular Derby Town Jubilee on Saturday, July 24, in the high school auditorium.

Scheduled in Dimmitt

The national pageant will be held on Aug. 7 in the Dimmitt High School auditorium, and the winner there will represent the grain sorghum industry through the coming year at public appearances and other events.

A \$300 scholarship will go to the winner, a \$200 scholarship to the first runner-up and a \$100 scholarship to the second runner-up.

Funeral Is Friday For Paul Johnston

Graveside services for Paul Johnston, former McLean resident, will be at 2 p.m. Friday at Hillcrest Cemetery.

Rev. Dan Beltz, pastor of the First Baptist Church, will officiate, and interment will be by Lamb Funeral Home.

Mr. Johnston died Saturday at the Hillcrest Rest Home in Tucson, Ariz., after suffering a heart attack.

He was born on Aug. 27, 1895, in Forrestburg, Montague County, and moved to McLean from Pampa in 1963. He moved to Tucson from McLean in April of this year.

Mr. Johnston was a retired car salesman and a member of the Central Baptist Church in Pampa. Surviving is a sister, Mrs. Rosa Smith of McLean.

Ronnie Hunt Finds Military Academy Is a Busy Place

Ronnie Hunt, son of Mr. and Mrs. Lloyd Hunt of McLean, is finding the United States Military Academy at West Point, N. Y., a busy place for a newcomer.

The young cadet, who reported to West Point on July 1, wrote his parents a hurried note last week and indicated that there was not enough time for a letter.

Hunt, who was valedictorian of his McLean High School graduating class this spring, received his appointment to the Military Academy through Congressman Walter Rogers of Pampa.

Rogers named the McLean youth first alternate for the appointment early in the spring.

4 Years to Go

After undergoing several days of tests and examinations shortly before the 1964-65 school term ended, Hunt was found fully qualified, both mentally and physically, and he was given an appointment.

For the next four years he will attend classes and receive military training at the academy, and then he is to be commissioned a second lieutenant in the U.S. Army.

In the note to his parents, Hunt told them of a desire to hear from his friends.

His address is: Ronald L. Hunt, 5th New Cadet Company, New Cadet Barracks, West Point, N. Y.

PAT WINDOM WINS AGAIN IN TOURNEY

Takes Medalist Honors in Playoff With Sonny Back

Pat Windom kept his medalist-winning streak going Sunday afternoon by again taking honors in a tournament at the McLean Golf Course.

Young Windom and Sonny Back were tied with scores of 68 each after the regulation 18 holes of the tournament, and then battled it out in a sudden-death playoff for the championship.

Each shot a par four on the first hole, and a fence ball spoiled Back's chances as they teed off for No. 2. Despite the two-stroke penalty for knocking the ball over the fence, Back managed a five for the second hole—just one over Pat's four.

Windom, who also took the trophy for having the fewest number of putts in the tourney, fired a 34 on each of his nine-hole rounds, while Back shot a 32 on the first round and a 36 on the second.

Top Partnership

Back and Bob King finished in first place in the partnership matches of the championship flight, while Clyde Windom and E. J. Windom Jr. took second. Clyde also won medalist honors in the first flight.

Bill Cranford was awarded gold colored tees for posting the highest score during the afternoon.

Naomi McCarty, with a 47, had the low score among the four women golfers. Lavern Back was second, with a 48.

Sammy Haynes, tournament chairman of the McLean Lions Golf Association, said Wednesday another tourney is planned for the near future. "Something special" is set at that time for the younger golfers.

Local Group At State Convention

Three representatives of the McLean High School Future Farmers of America chapter left Tuesday morning to attend the state FFA convention in Houston.

Eddy Finley and Gary Phillips are delegates from the local chapter, and they are being accompanied by Nelson Christie, vocational agriculture teacher and FFA advisor.

Finley, president of the McLean chapter, will receive recognition for being named the runner-up for the state Chapter Farmer Award.

Some 10,000 boys were expected at the annual convention, which ends on Saturday.

Color Brochure Will Boost City

A full-color brochure pointing out the merits of McLean will be distributed within the next few weeks.

The city commission Tuesday night approved a recommendation from the newly appointed brochure committee that at least 5,000 copies of the colorful booklets be ordered.

At least four, and possibly seven, pictures showing the most attractive features in and around McLean will be printed in full color.

Also included will be vital statistics about the city which are expected to help attract industry and new residents.

Three members of the committee, appointed by the commission last month, met with the governing board Tuesday night to discuss the project.

Evan L. Sitter, Mrs. Lavern Carter and Mrs. Erma Hester presented their ideas to the commission. The other committee member, R. T. Wood, was unable to attend.

Booklet Form

Copies of other brochures from which ideas for McLean's have come were displayed at the meeting.

The brochure will be in booklet form and contain at least eight pages. Attached to the back cover will be a detachable postage-paid card which interested persons may mail to the city to obtain additional information.

Mayor Boyd Meador appointed Aldermen Joe Burroughs and Jack Shelton to work with the committee in the final preparation of the brochure.

Cost of the initial 5,000 copies was estimated at between \$600 and \$800, depending on whether four or seven color pictures are used.

Paving Requested

Mayor Meador, in appointing the committee last month, pointed out that the city has long needed such a brochure to help attract more people and industries to McLean.

In other action at the monthly commission Tuesday night, Frank Simpson and Glen Curry appeared to request the paving of three blocks of West Sixth Street near (See BROCHURE, Page 2)

TV RECEPTION BEST FOR NOW Weather Blamed For Bad Picture

Dale Greenhouse, owner of the McLean Community TV System, told the city commission Tuesday night that co-channel interference on the cable at the present time cannot be eliminated.

Greenhouse explained that unusual weather conditions are causing the signals from television stations in Oklahoma City and elsewhere to "crowd in" on the local cable.

This results in the distorting of the reception from the Amarillo TV stations.

These Oklahoma City stations and others are on the same frequency as the Amarillo stations, and it is impossible to prevent their interfering—especially during the hot summer months, Greenhouse said.

He reported that the local cable system equipment is in excellent condition.

Greenhouse appeared before the commission after several cable subscribers had complained of the poor reception on certain channels.

Factory Needs Women

Greenhouse, who also is production superintendent of the Marie Foundations factory in McLean, advised the city commission, too, that reports recently circulating concerning the closing of the factory are nothing more than false rumors.

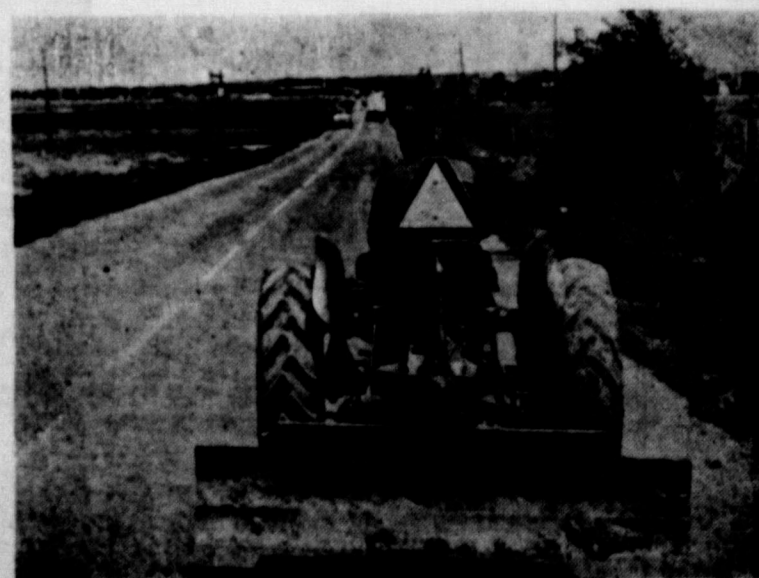

"There are absolutely no thoughts (See TV, Page 6)

Baptists Will Host Third Sunday Singing

The First Baptist Church Fellowship Hall will be the scene Sunday of the regular Third Sunday Singing.

Everyone is invited to attend the monthly gathering, starting at 2 p.m.

It was announced that new song books have arrived and will be available for use at Sunday's singing.

SAFETY PROGRAM: A comprehensive safety program being inaugurated in Texas and other states could sharply reduce losses of life and property caused by rear-end collisions with slow-moving vehicles on public roadways. The emblem, shown mounted on the rear of the above tractor, is brilliantly colored for quick recognition either in daytime or at night.

Just Between Us

With the controversial Medicare bill now passed by the Senate—over the objections of at least a majority of those senators' constituents—another equally distasteful piece of legislation is nearing the voting stage.

Last year during the presidential campaign, Lyndon Baines Johnson and Hubert H. Humphrey apparently made a promise to organized labor leaders, and they're now obviously going to see it through.

The pledge was to repeal Section 14 (b) of the Taft-Hartley Law, which permits the individual states to enact right-to-work laws.

Nineteen states—and Texas is one of them—now have such laws, which guarantee a person the right to hold a job without having to join a union. The laws also provide that same person the right to join a labor union, if he desires.

The number of states passing such legislation has continued to grow.

But, again, the will of the people is being ignored by the Johnson administration, which has a debt to pay for organized labor's support.

-JBU-

The unions have put up vigorous battles in each of the states which passed these right-to-work laws, but the majority of the people favored such legislation.

Unable to win at the state level, organized labor has turned to the federal government to get the job done by further infringement on states' rights.

With the powerful President waving the big stick over the heads of our congressmen, there is little doubt that the repeal of Section 14 (b) will be achieved.

We agree with Sen. Harry Flood Byrd of Virginia, who wrote recently in "Spotlight for the Nation," a publication of the Committee for Constitutional Government:

"I have conceded to legitimate citizens in the rank and file labor unions the privilege of organizing. I have conceded to legitimate labor unions the privilege of collective bargaining when they represent their members.

"But I also concede to men and women the right to work if they choose. This is certainly a basic right."

-JBU-

Isn't it strange that discrimination can be prohibited by reason of religion, color or race but permitted in compelling a worker to join a labor union or lose his job?

Sen. John G. Tower of Texas was one of the minority of senators who voted last week against (See JBU, Page 6)

Highway Department Asking for Bids On Buildings, Equipment

The State Board of Control is offering for sale to the highest bidders several buildings and pieces of equipment acquired in the Texas Highway Department's purchase of right-of-way for Interstate 40 east of McLean and at Lela.

Sealed bids will be received by the Board of Control, Sam Houston Office Building, 201 East 14th Street, Austin, until 11 a.m. on July 28.

The property may be inspected at the locations between 8 a.m. and 5 p.m. Monday through Friday by contacting Harold L. Preston at the Texas Highway Department in Childress.

Available at News

Copies of the invitation for bids and the bid forms are available in The McLean News office.

Most of the property is located from four to six miles east of McLean, while the remainder is at Lela.

The buildings and equipment were recently purchased as the Highway Department bought right-of-way for 140 projects through Lela and east of McLean.

Preston said successful bidders must remove the property from the right-of-way not later than 60 days from the date of the bid opening.

Ice Cream Supper Friday at Park

The Pentecostal Holiness Church will hold an ice cream supper at the City Park Friday evening, starting at 7:30 p.m. Everyone is invited to attend. Donations will be accepted.

The Greatest

WHAT DO YOU THINK of Jesus of Nazareth? Many people regard Him as a great teacher, a prophet, a gifted philosopher, or the best man ever to live; but do not accept that He is the Christ, the divine Son of God, the promised Messiah, and Saviour of the world. (Matthew 26:63, 64; Luke 2:11; John 1:41).

Careful consideration reveals that Jesus must be what He has claimed or else He was not a good man at all. IF Jesus is not the Christ, the Son of God; He was a fraud, a liar, a false prophet, and the greatest imposter the world has known.

The influence of the life and teachings of Jesus is proof of His claims. The supreme test of His divinity was met in the death He died and the life to which He was resurrected. "... He showed Himself alive after His passion by many infallible proofs..." (Acts 1:3).

Surely it is evident that we cannot think more highly of Jesus than we think of the claims that He has made. To refuse to believe on Him as the Son of God and accept through obedience His gift of salvation, is but to believe Jesus an imposter.

Refreshments of pie, tea and coffee were served by the hostess. The next meeting will be Aug. 11.

CARD OF THANKS

I want to thank my friends in McLean for all the gifts, flowers, letters, cards and prayers I received during my stay in the hospital for surgery in Amarillo. I'm sure there are no better people on earth, than the ones in McLean. Sinclair Armstrong

Veral Lynn Wood made a business trip to Amarillo Monday.

NEWS OF CONSERVATION

Wiley Reynolds is in the process of completing about 60 acres of borders on his place north of Pampa. He plans to establish these borders to alfalfa.

Harvey Taylor, Alvin Bell, H. W. Youngblood and Bob Sherrod have completed cross-fences to get better distribution of grazing.

Olin Weldon of Borger has seeded 101 acres of undesirable cropland to grass. Olin also has completed a cross-fence and installed a windmill. This stockfarm is located southwest of McLean.

Fertilization and proper time of watering are very important in managing irrigated pastures. Irrigated pasture grasses and alfalfa will use about four inches of water every 10 days.

On bermudagrass pastures on our clay soils, we should apply 80 pounds of nitrogen per acre every time the grass is grazed off.

In a rotational grazing system this would be about every 28 days. By fertilizing three or four times a year, this helps to keep the grass in greener vegetative stage. This also helps to keep the protein content up during the late summer months.

Mr. and Mrs. Doug Groves drove to Wynnewood, Okla., Saturday to visit their son, Doug, who was hospitalized following a car accident between Red Cliff and Velma, Okla. He was not seriously injured and was released from the hospital the following day.

Loamy soils should receive about 80 pounds of nitrogen and 60 pounds of phosphate in the early spring. This should be followed by about 60 pounds of nitrogen every time the grass is grazed off.

Sandy soils should receive 80 pounds of phosphate and 60 pounds of potash per acre during the early spring. This should be followed by 60 pounds of nitrogen every time the grass is grazed off. 20 per cent more grazing can be expected where the grass is rotated.

Mrs. Jim Hudson and son of Lubbock are visiting her parents, Mr. and Mrs. F. J. Hess.

Father of European bride—My daughter will have a dowry of \$50,000, but of course I must make inquiries of your antecedents and prospects.

European Suitor—Don't make any inquiries and I will take her for \$25,000.

The cost of doing business with us is as low as you will find on comparable service and products. Let us check your tires, battery, lubrication system etc., before you start on that vacation trip. It could save you costly trouble.

WALTER ROGERS REPORTS

THE CIGARETTE ISSUE

The question: Does cigarette smoking cause lung cancer? Some eminent medical scientists and others say YES. Other equally eminent medical and other scientists say NO.

One eminent psychologist stated that the statistical evidence used to support findings that cigarette smoking caused lung cancer could be used in the same manner to prove that divorce causes lung cancer.

The facts: The facts are that it has never been proven biologically that cigarette smoking causes lung cancer. Millions of dollars have been spent in laboratory and other tests to prove that inhalation of cigarette smoke is the primary cause of lung cancer.

The testimony from all witnesses before the congressional committee on this subject was to the effect that inhalation of cigarette smoke had never caused lung cancer in laboratory animals, although the matter has been under experimentation for more than 60 years. It has been established, however, that certain hydrocarbons, many of which are present in polluted air breathed in many of the cities of this nation, have and do cause lung cancer in laboratory animals.

This is a matter of record in the hearings and also in the surgeon general's report on this subject.

The real issue: The underlying and real issue in the cigarette controversy was never properly publicized. Simply, it was this: Should the Congress of the United States meekly surrender its constitutional legislative powers to a federal bureau not directly answerable to the electorate of this nation?

The cigarette issue was used as a smoke screen in an attempt by a federal bureau to further encroach upon the constitutional legislative powers of the Congress. Those of us who undertook to protect and preserve those powers were subjected to a malicious, false and unfounded attack by a syndicated columnist.

Strangely enough, this particular columnist has long supported absolute centralized power in the federal bureaus and boards over the freedoms and the rights of Americans. Strangely enough, he is the same columnist who has so often visited in Russia and has paid compliments to Khrushchev as well as many of the practices of the Russian economy.

He has the right to his beliefs and his philosophies, but by the same token I have the right to my belief that true representative government will be destroyed if the Congress of the United States, made up of the duly elected representatives and senators, is required to surrender legislative powers to appointed boards, bureaus and agencies.

I do not smoke, chew or dip, and have not used tobacco in any form for more than 14 years. It is my personal belief that any young person who takes up the tobacco habit is very, very foolish.

However, tobacco is the livelihood of many, many Americans and constitutes the basis for a substantial segment of our economy. If tobacco can be established biologically as the primary source of lung cancer, it should be placed in the same category as marijuana, heroin, opium and any other drug. Its production and sale should be forbidden.

Such proof has not been produced after more than 60 years of experimentation. I, as a free American, subscribing to the guarantees of our Constitution, do not propose to write the death sentence of a substantial segment of the economy of the United States and the world on unsubstantiated conclusions of government-paid employees who are not willing to advocate prohibition of cigarettes, but who are willing to spend millions of dollars of taxpayers' money (by their own testimony) to brainwash the American people that their opinions are correct.

A good example of their findings is contained in the surgeon general's report, which I quote: "Although smokers are different from non-smokers psychologically and socially, there are many differences among smokers and among non-smokers, so that some smokers may be like some non-smokers."

Frankly, I think tax money could be spent for much better purposes and more effective results. If they are of the opinion that cigarette smoking is the primary cause of lung cancer, they should be honest enough to demand absolute prohibition of cigarettes.

I shall continue my efforts to preserve the constitutional legislative powers in the Congress, which is the body directly answerable to the electorate.

Folks are real funny: they want the front seat on a bus, the back seat at church, and the middle of the road.

Benjamin Franklin, the first postmaster general, gave the following definition of the postal service: "Messenger of sympathy and love, servant of parted friends, consoler of the lonely, bond of the scattered family, enlarger of the common life, carrier of news and knowledge, instrument of trade and industry, promoter of mutual acquaintance, of peace and good will among men and nations."

Few things would upset the average day like not having the morning mail or the postman come our way. Those of us who have lived at the far end of a long mail route will surely agree that to see the mailman coming down the road was the thrill of the day.

The trouble with blowing one's own horn is that it often leaves one so winded that he can't do anything else.

Those who try to please everybody are apt to wind up displeased with themselves.

The best way to lick a problem is to stick with it.

Part of the people count the cost, the rest just let the other fellow pay for it.

A good way to keep in step is to step on it.

Lovers of beautiful fall foliage please mark this on your calendar for next fall. About one or two weeks after the Canadian tour plan another drive to include the Wellington, Quail, Hedley, Lelia Lake and Clarendon area. Last year on Nov. 10 we have never seen it more beautiful, especially the lovely shinnery thickets.

AND Sidelights

TEXAS PRESS ASSOCIATION

AUSTIN—(Special)—Texas Re-
search League warns that another
fiscal "crisis" looms for state gov-
ernment in 1967, when new taxes
of \$10,000,000 a year may be
necessary.

Simple arithmetic points to a
"sizeable" money problem, says
the league. It notes that while
Texas' new fiscal period will be-
gin Sept. 2 with a general revenue
surplus of some \$97,800,000, it will
end Aug. 31, 1967, with little
more than \$1,000,000 in the fund.
Gov. John Connally's budget staff
has estimated a balance of about
\$4,200,000.

Comparing the shrinking surplus
with some non-recurring revenue
measures agreed on by the 59th
Legislature, TRL researchers con-
clude lawmakers in 1967 may have
to pass a \$107,200,000 new tax
bill.

League admits the figure may
be higher or lower. Its staff ac-
knowledges that sales tax revenues
are running well ahead of official
estimates this year and if it keeps
up, the new tax requirement may
be reduced to \$80,000,000.

Actually, general sales tax col-
lections this year are "much higher"
than in 1964, Comptroller
Robert S. Calvert reports. Col-
lections since the current fiscal
year began last Sept. 1 total \$164-
200,000, compared with \$150,600,000
for the corresponding period a
year ago.

TRL observes: "An \$80 million
tax bill is no small matter, but
neither is it a really serious crisis
for a state with the untapped tax
resources and growth potential of
Texas. This is, of course, an
optimistic—as well as an unofficial—
estimate and the tax required
might well be higher if revenues
do not come up to these expecta-
tions, or if expenditures substan-
tially exceed them."

League suggests that the com-
mittee on state and local tax policy
"look at many available revenue-
raising possibilities in the course
of its studies."

SPECIAL SESSION REJECTED
—Gov. Connally has rejected re-
quests for a special legislative
session to deal with rising car
insurance rates in Texas.

State Representatives Carl A.
Parker and J. D. Weldon, both
of Port Arthur, requested such a
session to investigate the rate in-
creases averaging 13.4 per cent
which were authorized by the State
Board of Insurance to take effect
Aug. 1.

Connally said he doubts any
practical benefits would be gained
from a special session at this
time, although he shares concern

FREE COTTON CLASSING

Papers have now been completed
and will be mailed shortly to obtain
free cotton classing service from
the Memphis Cotton Classing office.
Sometimes we take these services
for granted. We should be extreme-
ly thankful that we have unbiased
cotton classifiers to grade our cot-
ton. This is one function of the
government that deserves much
praise. It is impossible for all
farmers to be able to classify their
own cotton. I've heard very
little criticism of the services
rendered. This is especially true
since we got the new cotton class-
ing office at Memphis, Texas.

Mr. Bob Murphy, Nacogdoches,
will be the speaker. I've heard
Mr. Murphy on one occasion and

SCREWORM PROGRAM

Very often I receive a letter
from the headquarters for the
screwworm program in Texas ad-
vising that some individual has
sent in a few specimens of worms
taken from an animal. Leslie Dar-
sey, north of Alameda, recently
sent one in. So far, all these
specimens have turned out to be
non-screwworms. This is good, but
let's keep sending in samples.
Should there be a case, plenty of
help from the state will be dis-
patched to the ranch to assist in
hot spotting that area. A free
spray job on a rancher's cattle
and aerial fly drops made on the
ranch are part of the services
offered.

In this case the judges ruled that

farmer, should be allowed to take
a depletion allowance on the under-
ground water supply of his farm.
In effect, this means (providing
there is no further appeal by the
federal government) that a farmer
can deduct a portion of the price
he paid for a farm in relation to
the amount of ground water that
was depleted. In other words, if
a farmer paid \$500 per acre for
his South Plains farm and dry land
is worth no more than \$100 per
acre in that vicinity, then \$400 per
acre would be subject to a de-
pletion allowance. This is just an
example and should be viewed as
an illustration only. The main thing
we want to point out so that you
can be thinking about the matter
is the fact that the court ruled in
favor of the farmer. It appears
that no further appeal will be
made and that on your 1965 farm
income report you will be able to
deduct a cost depletion allowance
for your underground water. No
doubt there will be a set of guide
lines and many rules drawn by
the Internal Revenue Service by
reporting time.

Old Buildings at Fort Richardson by E. M. Schiwetz

FORT RICHARDSON

... a long time between paydays!

Across the western face of Texas, the brooding ruins of forts . . . here and
there a restored barracks or hospital bring back a bloody page in history.
A history that tells of marauding redskins thundering southward from Indian
Territory, killing in their wake, pushing on to the Mexican border. A history
that tells too of the hard and lonely life of the U.S. Army troopers who
manned these strategic forts.

Fort Richardson, near Jacksboro, was one of the more important of these
outposts. Here Kiowa Chieftains Satanta and Big Tree were incarcerated
before their trial for a bloody massacre. But life in all frontier posts was
much the same . . . best expressed by the soldiers themselves, "a long time
between paydays."

BUT IT ISN'T SO FAR BETWEEN PAYDAYS NOW

... with U. S. Savings Bonds!

Today, there can also be a long time between paydays for those who have
not established the thrift habit. But through the U.S. Savings Bonds program
you can take care of this situation quickly and effectively.

For example, with as little as 63¢ a day you can buy an \$18.75 Savings Bond
every month. Keep this up for 40 months and you'll own a stack of Bonds
worth \$1,000, at maturity, which cost you only \$750 in easy installments.

Buy U.S. Savings Bonds every payday automatically through the payroll
savings plan.

the medical care bill.

He explained his vote in a news release received this week by pointing out that the "severely limited medical care bill" is tied with a high cost to the Social Security taxation system.

Sen. Tower feels that the Medicare provisions are "most inadequate," and added that he fears the "added expense will endanger the financial stability of the entire Social Security system upon which so many older Texans depend."

"The medical care bill covered—at excessively high cost and excessive tax increases on working Texans—only very limited hospital costs," the senator wrote.

"It did not deal at all with the crucial problem of long-term illness. In addition, it provided the limited care for everyone, be he poverty-stricken or millionaire."

He cautioned older citizens not to drop their present medical care policies just because Congress has voted on Medicare, since "even the limited care under this bill will not go into effect until 1966 and 1967."

Another new home is beginning to take form in McLean.

Jim and Carol Allison should be moving into their nice brick residence within a month, according to the builder, Thelmer McPherson of Amarillo, a former McLeanite.

When Thelmer puts his crew to work on a house it goes up fast. Actually, he has several crews and each one specializes in a certain phase of construction.

They erected a large home for Skinny and Maggie (Mr. and Mrs. Elton) Johnston, our neighbors, here in 1963 in about five weeks.

J. B. Roach has started a special fund to rid McLean of one Bill Pettit.

J. B. recently began taking contributions to send Bill "as far away as we can," and we heard one resident pledge \$5 to the fund.

If all the people who have offered to contribute do kick in as much as this one, Bill should have enough money to take a trip around the world—and land right back in McLean.

The practical jokes Bill has pulled on a number of men around town haven't exactly endeared him to them.

of closing the factory," he said and added that attempts are being made even to increase the number of employees.

He invited women interested in working at the factory to make application for employment.

The number of applications on file has decreased considerably in the past few months, and Greenhouse said more are needed.
