Don't Use a Scarecrow

To Drive Away the
Mail Order Wolf

You can drive him out quickly if you use the mail order houses' own weapon—advertising. Mail order concerns are spending thousands of dollars every week in order to get trade from the house merchants. Do you think for a minute they would keep it up if they didn't get the business? Don't take it for granted that every one within a radius of 25 miles knows what you have to sell, and what your prices are. Nine times out of ten your prices are lower, but the customer is influenced by the up-to-date advertising of the mail order house. Every article you advertise should be described and priced. You must tell your story in an interesting way, and when you want to reach the buyers of this community use the columns of this paper.

Let Us Be Your Waiter

We never tire of helping others when they ask for good job printing. We can tickle the most exacting typographic appetite. People who have partaken of our excellent service come back for a second serving. Our prices are the most reasonable, too, and you can always depend on us giving your orders the most prompt and careful attention. Call at this office and look over our samples.

MAKE YOUR APPEAL

to the public through the columns of this paper. With every issue it carries its message into the homes and lives of the people. Your competitor has his store news in this issue. Why don't you have yours? Don't blame the people for flocking to his store. They know what he has.

The Buyers' Guide

The firms whose names are represented in our advertising columns are worthy of the confidence of every person in the community who has money to spend. The fact that they advertise stamps them as enterprising, progressive men of business, a credit to our town, and deserving of support. Our advertising columns comprise a Buyers' Guide to fair dealing, good goods, honest prices.

YOUR DOLLAR

Will come back to you if you spend it at home. If it is gone forever, if you send it to the Mail-Order House. A glance through our advertising columns will give you an idea where it will buy the most.

STORE NEWS

That is what your advertising is for. It is to tell the public, and bring to you that increase of business you are looking for if you give us your store news to print.

J. F. Reid,

Lawyer and
Land Agent.

THINK ABOUT IT

About what the Home Paper means to you and yours. It means all the interesting news of the community, of your neighbors and friends, of the churches and schools, of everything in which you are directly interested. Don't you think the Home Paper is a good thing to have?

For the Little Miss

THE little miss has a much wider choice in hats than she had a few years ago. Since it became the fashion to copy shapes made for grown-ups, in small sizes, for young heads, children's millinery has become much more interesting to the purchaser and much less taxing in its demands on the milliner. The variety in shapes makes it possible, also, to suit the child's individual style.

Two good designs are shown here, suitable for girls from about 8 to 16 years old. They are made on the familiar bell and helmet shapes and only differ from these shapes made for grown people, in the matter of size. The bell-shaped hat appears to be covered with silk, but would be just as effective in a braid. It is covered with rows of blue-meshed lace, alternating with motifs in flower forms made of braid. The petals of each motif is filled with a figured net.

A wreath of small ribbon roses, set in millinery foliage and showing more buds than blossoms, is divided and placed part on the upper right brim and the under left brim. The design is particularly good for girls who wear curls. White is the color chosen in this model, but any pale tint is pretty.

GRACEFUL GOWN.

This is of soft satin draped with Ninon-de-soie of the same color, and trimmed with lace and satin bands. The hat is of tulle straw trimmed with roses.

A light blue braid of straw covers the helmet shape, shown in the second picture. A band of rose petals, made of ribbon in a slightly darker shade of blue, is laid about the base of the crown, finished with a flat rosette at the front, made of the same petals.

A short, fluffy, "made" quill in dark and iridescent feathers is posed at the left front of the hat, and may be dispensed with when the hat is made for a very young girl. The same design is pretty with small flowers set in the ribbon band at intervals or with four rosettes like that at the front, dividing the band into four lengths.

These little shapes stay on well and provide some shade for the eyes. Wide-brimmed Leghorns and other straws are never out of fashion and probably never will be. Lace bonnets with simple outlines and fluffy lace hats are worn every year. The lingerie hats made of embroideries and of flowered fabrics like dimity and cretonne are ideal for misses, made in simple, youthful fashion. The time has gone by when it was hard to choose a hat for the little girl or young miss. She is sure to be pleased among the many styles that the designers of millinery have this season made for her.

GOWNS FOR THE SUMMER

Wide Choice of Colors is Allowed for the Gown of the Pre-vailing Season.

Gowns of liberty satin are practical as well as effective, and quite as many colored as black ones are made, while the same can be said of the soft-finished taffeta silks. Many of these gowns have jackets to match, but there is always a waist to match the skirt, fashioned in such manner that the appearance is given of a one-piece gown. This style is perfectly possible on warm days as well as cool, for yoke and sleeves may be of transparent material.

Extremely practical, also, are the coat-and-skirt costumes for cool days in plain color, with trimmings of striped black and white, there is quite a new model with which is worn a lace waist of white over the color of the gown. It is of flit and Irish lace combined. It is not necessary that real lace be used to carry out the model satisfactorily, for there never was a time when so many effective imitation laces could be bought at such low prices.—Harper's Bazar.

Restoring Faded Flowers.
One may freshen faded artificial flowers by retinting them with water colors. After they are tinted, curl the petals again with the blunt side of a case knife.

Notice how the petals curl back before tinting them and then curl in a similar manner and do not apply the paints too wet or it will be impossible to obtain good results.

This is the best home method of restoring flowers that have become faded.

FARM AND GARDEN

EXCELLENT AS CORN CUTTER

Two Old Saw Blades Bolted Onto Piece of Timber Makes Indispensable Farm Implement.

An excellent corn cutter may be constructed at an expense of less than a dollar if two old saw blades are available.

Bolt the front end of the cutting blade on top of a piece of 2 by 4 Rip the second piece of 2 by 4 about four inches and let the blade

Good One-Horse Corn Cutter.

into it. Bolt underneath the last 2 by 4. Cover this frame with a substantial platform. Two men stand on the platform and catch the corn as it falls. With it they can cut from six to seven acres per day.

COLLIES MADE VERY USEFUL

Animals Can Easily Be Taught to Go Long Distances Into Pastures or Woods for Cows.

We do not think collies are dangerous with children. We have raised two farm puppies and they became firm companions for the children and we never knew them to snap at the little ones or show a disposition to harm them. A collie is an excellent guard dog. Collies are very useful on the farm. They can easily be taught to go alone long distances if necessary into the pastures or woods for the cows, bringing them home night and morning for milking. It is far

A Well-Bred Collie.

cheaper to send a dog for them, especially on a wet morning, than to walk a mile or so for the animal or to hire a man to do it.

The Benefits of Wood Ashes.

I had brought up and sold a few collies, which were only four years, very small and thin at that time. I put on three barrels of wood ashes and covered them well. The next year I put on more ashes and had a full crop of collies. I put the collies directly on the soil. A man bought a farm to grow five acres of alfalfa, and as the old saying is, "could not raise beans." He could only keep one cow and a horse the first year, but he made what money he could and not on about ten barrels of alfalfa to the acre. He followed this for three or four years and during his six years' stay he bought about \$25 worth of manure. The last two years he cut a heavy hay crop, sent four cows and two horses, raised 40 bushels of oats, considerable corn and potatoes for his own use and some to sell. He paid \$500 and sold for \$1,200.

Endive Not Hard to Grow.

Endive may be sown early in cold frames or in the open ground like lettuce. Sowing may also be made at any time during the summer, although plants grown in the heat of midsummer have not the best quality. Full grown plants may be taken up with a good supply of adhering earth and stored in a dry cellar for winter use. There are several distinct varieties of endive, those having smooth leaves being the larger and coarser. The finely cut and curled varieties, and more particularly those with naturally whitened leaves, are most attractive and usually most tender.

Farm Help.

The scarcity of help is preventing the agricultural development of the country, and is especially affecting the extension of the dairy industry. There seems to be no remedy unless women and girls of the cities and towns will take to farm and field work, at least through the summer. The few who are doing it confound to making good money easily and with the gain in health and strength, and without loss of independence, position or dignity. If it were not for the help outside of our own women and children, one trucker says, most of us would have to abandon the business.

RYE AND RAPE CATCH CROPS

Sown Just Before Cultivating Corn. Last Time in July—Value as Fertilizer \$6 Per Acre.

(By J. N. CLOVER, Pennsylvania.)

Of the crops which I sowed ahead of the cultivator at the last cultivation of corn and potatoes to get a growth to turn under in the spring and to protect the land from winter washing, rye and Dwarf Essex rape were most satisfactory.

Rye was sown one year when the potatoes were taken out in September, and a heavy seed it made to turn under for oats in April.

Another year rye was sown on corn stubble after the corn was cut at the rate of one and one-quarter bushels per acre, and it made a fair cover crop, which I know prevented washing, though the ground was harrowed only twice before drilling in the seed.

I should judge its value as a fertilizer is about six dollars per acre, and the seed costs only seven cents per pound. Some of the rape was sown all winter, and persons seeing the growth it had made in the standing corn were surprised, while the growth of cow peas in the same field was not encouraging. Crimson clover is a good catch crop, if one can secure a seed, and it lives through the winter. Rape is the best crop for me, considering the cost of seed and its fertilizing value, and rye is very good, especially when it is to be turned under for potatoes, or one wishes to pasture it in the fall.

SHED FOR STORING MANURE

Cheap Shelter Prevents Leaching Where Not Convenient to Haul Fertilizer to Fields.

Manure is one of the most important things on a first-class farm. How

Cheap Manure Shed.

to get the most out of it is one of the questions. The illustration shows a shed 8x10 with sides 7 feet high and the corners 7 feet to the eaves. The end boards are held in place with stakes at two corners so that one side is movable and may be hauled out until the wind is nearly killed. This prevents leaching where it is not convenient to haul it to the field immediately after it is made.

Pleasant Easy to Grow.

Pleasant is easily produced in a commercial way, grows immensely, and is easily cultivated and put into shape for the market. It can be shipped almost any distance. Then, too, the demand for it in the market makes it one of the two best vegetables for commercial use. Pleasant is usually set in rows four feet apart and two and one-half feet in the rows. Like asparagus it should be carefully tended and heavily manured. It should be fertilized every winter.

Will Return Profit.

The preparation for conserving natural manure entails some expense, but will return a margin of profit commensurate with the outlay.

FARM NOTES

The necessity of the silo is highly apparent.

Have you provided a green crop for July and August?

Plants cannot penetrate or feed in a cold, compact soil.

Do not fail to drain your soil; it will pay you for your toll.

It is never a sickly, put on time; that will bring the soil to time.

Growing corn much water needs; keep a soil moist; kill the weeds.

Proper reinforcement is an important item in successful concrete work.

Club roof of cabbage is one of the most annoying yet easily controlled of diseases.

Watch sweet clover. It begins to look as if it had a very valuable place among our farm crops.

A lawn mower will be found about the premises of the farmer who cares about his surroundings.

The question of farm power and farm transportation is one of the most important questions connected with farming.

Dig up grain plants and you will find that they form their roots at the same depth whether planted deep or shallow.

To be on the safe side, cabbage plants should be started in soil which has not been previously used for cabbage culture.

GREAT YEAR FOR FLYING MACHINES

AEROPLANE MAIL SERVICE—A VISION OF THE FUTURE

THIS is going to be the biggest year yet for aviation. Not only in America and Europe, but in far-off countries like Japan air craft are being built

by the hundreds and scores of exhibitions are planned for the next few months. In this country and in Europe alone a total of more than \$1,500,000 is offered in prizes to aviators. No such wonderful progress in a new means of transportation has ever been witnessed in the world before. The flying machine is coming into general use more than twice as rapidly as did the automobile. Although travel by land and water will not be rivaled by travel in the air for many years to come, yet the airship is likely to outstrip all other methods of rapid transportation within the next year or so.

America is still far behind Europe, both in the giving of prizes and the flying of machines. This, however, is not likely to continue to be the case. Not even France is showing more activity in aviation than America is.

The list of prizes that are open for competition thus far this year in America totals almost \$300,000. Under the auspices of the Chicago Aero club, there will be a competition that in the wealth of its prizes and the distinction of its contestants will exceed anything the world has seen.

The most expert of pilots will be in charge and the most famous of inventors will there meet in contest. The prizes are fixed at a minimum of \$100,000. At the very first meeting of the club, called by Harold F. McCoy, \$50,000 was subscribed, and since then the total originally designated has been made up.

Like all the other contests of this year, it will be a cross-country meet—that is, it will be a long-distance affair and not merely an exhibition. It will be utilitarian, and nothing will be permitted in the way of competition that will not have for its intent the evolution of the science of aviation. The Chicago Aero club in this particular is following closely the lines laid down by the Aero Club of America, which has for its basic principle the making of mere sport subsidiary to utility and advancement. Hence it is that it has enlisted hundreds of thousands of capital contributed by men whose economic genius forbids a questioning of the correctness of their foresight.

These men do not fly machines. But at their desks they write out the checks that stimulate "pilots" and in the inventors to their best efforts. They pay the expenses, precisely as "the grocery men" in the days of the Argonauts "grab-baked" the prospectors for gold and other precious metals.

Among the other prizes that will be competed for this summer is that offered by the Automobile Club of America, motor reliability, \$1,000. Then there is the \$15,000 prize offered by Edwin Gould for the most perfect and practical heavier-than-air flying machine designed and equipped with two or more separate motors and propellers so connected that they may be operated individually or together. There are two big prizes for long flights. One of these is \$50,000 for a flight across the continent, and the other \$30,000 for a flight from New York to St. Louis.

In England the biggest prize that has been hung up thus far this year is for the 1,000-mile race around Great Britain, and the winner's purse is \$50,000. On the continent the French government's competition for military aeroplanes has \$240,000 in prizes. The prizes at miscellaneous meets and circuits in Germany, Italy, Russia and Belgium amount to \$150,000. There are many big individual events. All

over the world the story is the same. They are having aviation meets in Hawaii, in China, in Japan, in Australia, in India, and even down in South Africa.

Almost as important as getting the right sort of notice is the finding of the secret of autograde stability of aeroplanes. More has been learned in the last twelve months about the swirls and turmoils that beset the navigator in the fields of air than ever was known before. But the aero plane will have to become a steady, well-balanced machine under varying conditions before it can surpass the automobile in popularity and general use. Many devices are being tried to accomplish this end. There is no doubt that the problem will be solved satisfactorily before long, and that the annual death roll of the aeronauts will be cut down considerably.

A great many enthusiastic people have been urging their governments to stop building battleships and spend their millions for air craft. They have pointed out that for the cost of one Dreadnaught an air fleet that would be the equal of the navy could be constructed. In fact, the nations of the world are feverishly preparing for aerial warfare. Great as has been the rivalry between the great powers to build and equip battleships, the rivalry between them for mastery of the air is fully as keen. Even the United States has caught the fever and within a few months expects to have 100 aeroplanes under its command. The last congress appropriated \$120,000 for the purchase and building of aeroplanes for naval and military purposes. The aerial corps is already under organization and the most noted aviators in the United States are now commissioned officers in it. The aerial corps of the regular army has been seeing some service during the maneuvers still under way in the southwest and have done scout duty for the marching columns.

The air of the United States will be full of machines during the summer. As in the old days, the nation relied for its fighting sailors upon the seafaring men of the New England coast. In these later times it must rely upon the citizen aviator to aid in manning its machines in the event of a conflict.

In Europe the military use of the aeroplane is well recognized. Russia has given orders for the purchase of 300 warplanes of the latest type. Germany has anywhere from thirty to fifty dirigibles and a score of aeroplanes carefully guarded in her military department. England is nervously arming with warplanes, that she may be able to defend the air as she has long held the water. Italy is strong in the fighting potentiality of these new creations.

A first-class steel warplane costs \$7,500 in the open market. The modern battleship costs nearly \$10,000,000, so that the cost for one battleship is a good-sized fleet of aerial craft might be assembled. In France the manufacturers are behind with their orders. They have been swamped with orders during the past few months and have enough now to keep them busy for a year.

His Promotion. "When I was working on a salary," said the head of the firm, "I was always the first one in the establishment in the morning and the last one to leave it at night."

"Was you?" replied the office boy. "How long did you keep it up?" "How long did I keep it up? For twenty-two years."

"Gee! It took you a long time to coax the boss to let you marry his daughter, didn't it?"

CHICAGO GIRL WHO SWINDLED FARMER

JURY RETURNS VERDICT AGAINST MISS MILLER AND BROTHER IN \$11,000 CONFIDENCE GAME.

WORKED AN ANCIENT STUNT

Bride-to-Be Had Got the Granger's Money, Then Told Him to Accept the Bible, Join a Church and Marry a Rich Widow.

Chicago.—Miss Lodavine Miller and her brother, Attorney J. Marion Miller, who swindled "Tommy" Foulkes, the sentimental Iowa farmer, out of about all of his considerable wealth while he was under a spell wrought by the charms of Miss Miller, were found guilty of conspiracy. They will have to serve a sentence of from one to ten years in the penitentiary at Joliet.

Miss Miller did not flinch when she heard the word "guilty." She was much cooler than her brother. "Sentimental Tommy" Foulkes showed no feeling of revengeful elation.

"They swindled me out of everything I possessed, and should be punished for it," was his cool comment.

"Tommy" had read the eye-for-an-eye and tooth-for-a-tooth law in the Bible that represents the only thing he got in return from Miss Miller for his wealth, save a lonesome kiss.

"Tommy" said he had expected the verdict, and that he was prepared to stop in Chicago a year longer if necessary, to see that his former charmer and her brother got their punishment.

The story of a remarkable courtship, ending with his being "filleted" after he had given the bride-to-be \$11,212, was told by Thomas Foulkes, a farmer of Danbury, Ia., in Judge Dever's court, here, where his former fiancée, Miss Lodavine Miller, and her brother, J. Warren Miller, a lawyer, were tried on a charge of swindling Foulkes.

"After she got the money from me, she told me to go to Los Angeles, join

a church and marry a rich widow," Foulkes said. "She said she would be a better mother to me than a wife."

Foulkes said he met Miss Miller in 1901 when he came to Chicago with some cattle. The biggest blow of all came in 1907 when notes I had made came due and I had to sell my farm worth \$40,000," said Foulkes. "I went to California to see her and get some money. I took two drafts with me, one for \$500 and the other for \$2,543 and before I got away, she had both of them. When I told her that she was all the money I had, she gave me a Bible and told me to join a church and marry some rich widow, but first to consult her."

Attorney Miller was charged by Foulkes with having fraudulently induced him to settle a suit against G. S. Leonard. This was based on a promissory note for \$2,500, which Foulkes denied ever having made. He also says the lawyer swindled him out of a farm near Pipestone, Minn.

BOLT LIFTS CARPET TACKS

A Pennsylvania Woman's Housecleaning Aided by Curious Freak of Lightning.

York, Pa.—A useful bolt of lightning struck the home of Mrs. Michael G. Finchbaugh of this county just as she was preparing to take up the carpets and linoleum to clean house. The bolt was filled with a heavy smoke after the lightning struck, and when this had cleared Mrs. Finchbaugh found that every tack in the carpets and linoleum had been pulled by the lightning. No damage was done to the house.

KILL 4,000 RATS.

Princeton, Ind.—Four thousand rats were killed in Gibson county in the second annual rat day. As the government estimates each rat costs two cents a day for maintenance, the county by the slaughter saved nearly \$80,000 for a year to say nothing of the progeny cut off.

Prayer. Our Heavenly Father, we thank thee for the wealth of thy provision for us; for the riches of nature, but far more for the untold treasures of redeeming grace. Lord Jesus Christ, we find all these in thee. It is thy vitalizing touch that brings us into sympathy with all things, with nature, with men, and with God. In thy light we see light; we come to understand. It is thyself we hunger for. We pray for greater intimacy with thee, and through thee with the heavenly father. Spirit of God, who dwellest in Jesus Christ, take possession of our hearts. Search out and sanctify every remotest corner of our nature. Fill our souls with reverence and holy trust, and bring us at last to our heavenly home to be with Christ forevermore.

Requisite First Step. Nothing can make good men and women that does not take them first as individuals and go to the very roots of their being. They need to be put right in their fundamental relationship, inwardly, with a sense of their duty to God and man and furnished with an adequate motive power.

—Rev. W. R. Taylor, Presbyterian, Rocheser, N. Y.

The Value of Personal Work

ACH one of us as a creature of God has a part to do in life. Mine may be a much more obscure part than yours, yet I am accountable to God for my part. God does not expect those with one talent to do what those with five talents will accomplish. We are all here for a purpose and if we will answer the purpose of our creation we must give God our hearts and make a full and complete surrender to him, for "out of the heart are the issues of life."

If we would have success in doing personal work we must ourselves be thoroughly converted. Jesus said to Peter, "When thou art converted, strengthen thy brethren."

In doing personal work it is necessary that we lay aside all sin and worldliness and let God lead our way. If we will not let him have his own way, our power will be crippled and men will be lost that we might have been instrumental in saving.

We must have a working knowledge of the Bible. "For the word of God is quick, and powerful, and sharper than any two-edged sword, piercing even to the dividing asunder of soul and spirit, and of the joints and marrow, and is a discerner of the thoughts and intents of the heart" (Heb. 4:12). In Jer. 23:29 we read, "Is not my word like a fire? saith the Lord; and like a hammer that breaketh the rock in pieces?" It is able to melt and break hearts. Oh, Christian friends, how very essential it is to know the Word of God. It is the instrument upon which we must rely in doing personal work.

Prayer Not All-Sufficient. We will be prayerful. We may be free from sin and we may have the Bible knowledge, but unless we are closely connected with the powerhouse of God, all our efforts will be vain.

We must pray to God to lead us to the right person to do personal work. It would not be wise to speak to every one we meet. We must pray to God to show us just what to say to those to whom he leads us. "Study to show thyself approved unto God, a workman that needeth not to be ashamed, rightly dividing the word of truth" (II Tim 2:15). After all when we have studied the blessed word, we need God's guiding hand at all times.

We must pray God to give power to that which he has given us to do. We need not only a message from God but power from him to send the message home. Sometimes in doing personal work we reason and plead with men and even give them the Word of God, but they will not be moved. Why? Soon we will see that we are trying to save them in our strength and as soon as we see the wrong and look to God with a sincere and prayerful heart asking him to take all self away like the song, "the work will become light and we can expect good results."

True Love Needed. Last but not least, love is another important part in doing personal work. We may be a praying people, and we may know the Bible, but unless we have a love for lost souls, our work will not profit us anything. "And though I bestow all my goods to feed the poor, and give my body to be burned, and have not charity, I profiteth me nothing. Charity suffereth long, and is kind; charity envieth not; charity vaunteth not itself; is not puffed up. If we have a love for souls who we know are on the downward road to ruin, we will find opportunities to help them. When we are constrained by love we will not wait for some one else to do it.

We may not feel the importance of personal work. Look at the vast number of traveling salesmen in the employ of business houses. Where would their work be if it were not for the personal effort they put forth, and how much more necessary it is to be personal workers for the great Master who is all in all—Gospel Herald.

A Prayer. Our Heavenly Father, we thank thee for the wealth of thy provision for us; for the riches of nature, but far more for the untold treasures of redeeming grace. Lord Jesus Christ, we find all these in thee. It is thy vitalizing touch that brings us into sympathy with all things, with nature, with men, and with God. In thy light we see light; we come to understand. It is thyself we hunger for. We pray for greater intimacy with thee, and through thee with the heavenly father. Spirit of God, who dwellest in Jesus Christ, take possession of our hearts. Search out and sanctify every remotest corner of our nature. Fill our souls with reverence and holy trust, and bring us at last to our heavenly home to be with Christ forevermore.

Requisite First Step. Nothing can make good men and women that does not take them first as individuals and go to the very roots of their being. They need to be put right in their fundamental relationship, inwardly, with a sense of their duty to God and man and furnished with an adequate motive power.

FRIDAY, AUGUST 11, 1911

Stockmen and Farmers, Attention!

There has been considerable interest taken in the stock in the last five years, especially the goats, and we would like to have everyone bring in their best stock both registered and non-registered, the day of the 11th at the beautiful barbecue grounds.

There is plenty of fire, shade and water at the grounds, and there will be ample room for all stock. Those desiring to arrange for pens had better come or write to the committee immediately, so that necessary arrangements may be made. Stockmen will have no expense, except that each one shall arrange his own pens.

Also bring in samples of your wool, mohair, or farm products, and let us demonstrate to that great gathering of people that will be here what Kinbuck can produce.

There will be a meeting and speaking at the Courthouse, on the night of the 11th. Everyone is cordially invited to attend this meeting, and it is of vast importance and interest to all stockmen and farmers, and for the betterment of the country in general.

N. H. Staggs, and others.

Cuts and bruises may be healed in about one-third the time required by the usual treatment by applying Chamberlain's Liniment. It is an antiseptic and such injuries heal without maturation. This ointment also relieves soreness of the muscles and rheumatic joints. For sale by all dealers.

Died

Mrs. W. A. Williamson, formerly resident of Junction, died at Austin and her remains were laid to rest at San Marcos the 7th. Mrs. Williamson was the widow of Judge W. A. Williamson who died in 1905. They were among the first settlers here and the marks of the death of Mrs. Williamson bring sorrow to her many friends in Kinbuck.

Billies For Sale

One set of 12 and 16 Registered and Bluetongue Billies for sale with one breeding season in the fall and spring, near South Africa Billies. Holstein stock, by No. 1077, also one Louisiana Billies bred by the first and one Louisiana Billies. It will pay you to get the Billies to see the prices right. And in case of any ranch 30 miles west of Junction. Ed Dwyer.

Card of Thanks

I take this means to express my appreciation for the liberal patronage given me during the time I have had the Farmers and Merchants Restaurant here. Have sold the goods to James Pettit who will have pleasure in serving you, and I hope you will continue to patronize him when you desire anything which is kept by an up-to-date house.

J. W. Franklin

Annual Meeting of Stockholders

Notice is hereby given that the annual meeting of the Stockholders of the Junction Cattle Ranch will be held at the office of said Ranch on the 25th day of August 1911, the said meeting being the 10th Monday in said month at 2 p. m. for the purpose of electing directors for the ensuing year, and transacting such other business as may properly come before the meeting.

Seemed to Give Him a New Stomach

"I suffered intensely after eating and no medicine or treatment I tried seemed to do any good," writes H. M. Youngpeters, editor of The Sun, Lake View, Ohio. "The first few doses of Chamberlain's Stomach and Liver Tablets gave me surprising relief and the second bottle seemed to give me a new stomach and perfectly good health." For sale by all dealers.

F. M. Ragland, from near Houston came in Thursday to visit his brother J. W. Ragland, whom he had not seen in some twenty years.

Bill Nye had the truth well told when he said: "A man may use a wart on the back of his neck for a collar button, ride in the back coach of a railroad train to save interest on his money till the conductor gets around, stop his watch at night to save wear and tear, leave his 'P' or 'Q' without a dot or cross to save ink, pasture his mother's grave to save corn, but a man of this sort is a gentleman and a scholar compared to the fellow that will take a newspaper two or three years and when asked to settle for it puts it into the postoffice and has it marked 'refused'."

Wife Got Tip Top Advice

"My wife wanted me to take our boy to the doctor to cure an ugly boil," writes D. Frankel, of Stroud, Okla. "I said 'not Bucklen's Arnica Salve on it.' She did so and it cured the boil in a short time." Quickest healer of Burns, Scalds, Cuts, Corns, Bruises, Sprains, Swellings. Best Pile cure on earth. Try it. Only 35c at J. A. Heyman's.

Roy King and J. P. Bowers were here today from Segovia.

A. M. Reese was here today from the Red Creek community, and made a pleasant call at the Citizen's sanctum.

A New Sensation.
Little Jean had visited one of the
large summer amusement parks for
the first time, and with the courage
possessed only by those girls whose
playmates are boys and girls older
than themselves, she had not hesi-
tated, when invited, to take a ride on
one of the "thrillers" that abound in
such places.

To her mother, on her return from
the park, she confided the emotions
she had experienced as she swept
round the curves of the "figure eight"
with her elder brothers.

"Mamma," she said, "when I went
round those awful turns so fast I felt
just as if I had been on my stomach."
—Youth's Companion.

Playing Blind.
This is a funny little stunt enjoyed
alike by old and young. If one has
never tried it, it is very amusing to
find anything with your eyes shut or
to those distances.

First place a piece of paper on the
floor before you, shut your eyes, walk
backward two steps, then try to walk
on the paper and pick it up. Then
stick a pin in the wall about four feet
up and try to pick it off blindfolded.
Stand about five or six feet away from
a table, shut your eyes, then try to
walk up to it without knocking
against it.—Woman's World.

Some Aviation Records.
Capt. Frederick of Bulgaria is the
first recorded flier who has made an
aerobion flight. The aviator who
took him up is the first man who ever
was captured in mid-air. Prince Henry
of Prussia is the first professional
aviator of record. Mr. Roosevelt
is the first president of the United States
to have made an ascension in an aero-
plane. Arthur J. Balfour is the sec-
ond.

HEART RIGHT.
When He Quit Coffee.

Life Insurance Companies will not
insure a man suffering from heart
trouble.

The reason is obvious.
This is a serious matter to the hus-
band or father who is solicitous for
the future of his dear ones. Often
the heart trouble is caused by an un-
expected thing and can be corrected if
taken in time and properly treated. A
man in Colorado writes:

"I was a great coffee drinker for
many years, and was not aware of the
injurious effects of the habit till I
became a practical invalid, suffering
from heart trouble, indigestion and
nervousness to an extent that made
me wretchedly miserable myself and
a nuisance to those who witnessed my
sufferings."

"I continued to drink coffee, how-
ever, not suspecting that it was the
cause of my ill-health, till on applying
for life insurance I was refused on ac-
count of the trouble with my heart.
Then I became alarmed. I found that
leaving off coffee helped me quickly, so
I quit it altogether and having been
attracted by the advertisements of
Postum I began its use."

"The change in my condition was re-
markable. All my ailments vanished.
My digestion was completely restored,
my nervousness disappeared, and
most important of all, my heart stood
up and became normal, and on a
second examination I was accepted by
the Life Insurance Co. Quitting coffee
and using Postum worked the change."
Name given by Postum Co., Battle
Creek, Mich.

"There's a reason," and it is ex-
plained in the little book, "The Road
to Well-being." It is a
word by a physician.
Ever read the above letter? A new
one appears from time to time. They
are genuine, true, and full of honest
testimony.

UNCLE SAM'S SECRET METHODS OF COMMUNICATION

RESIDENTS of foreign countries who
visit the United States almost in-
variably marvel at the open and
above-board manner in which our
government does business—the ex-
tent, for instance, to which the pub-
lic is taken into the confidence of
the republic's highest officials,
through the medium of the news-
papers and public addresses. And
no wonder, for such a state of things
is assuredly in sharp contrast to the
practices that prevail in many for-
eign countries, where it seems to be
the policy of high officials to never
tell the people anything until they have to
or until there is grave danger that they will learn
it from some other source and where letters and
telegram are couched in a manner unobscured
in this kind of the free.

But for all that it is not the policy of our gov-
ernment to have many secrets from the sovereign
American people whose servant it is. Uncle Sam
is capable of keeping his own counsel when oc-
casion demands it and what is equally important
has the ways and means for transmitting and re-
ceiving communications without anybody being
in the least of the free.

For all that it is not the policy of our gov-
ernment to have many secrets from the sovereign
American people whose servant it is. Uncle Sam
is capable of keeping his own counsel when oc-
casion demands it and what is equally important
has the ways and means for transmitting and re-
ceiving communications without anybody being
in the least of the free.

telegraph, which transmits handwriting via
electrical wires to any reasonable distance, re-
producing it line by line just as it is written at the
point of origin. This device is being employed at
United States forts and at other seats of gov-
ernmental activity. It has many advantages that
need not be noted at the reader. For instance,
its ability to reproduce handwriting and autograph
signatures supplies a safeguard against tampering
with military orders. If a battery commander
sees an order written out before his eyes in the
well-known handwriting of the officer in command
of the artillery district wherein he is located he
could not have any misgivings as to whether or
not he has received bona fide instructions from
headquarters.

One of the chief aims of Uncle Sam's experts
just now is to devise means for insuring the
secrecy of messages transmitted by wireless
telegraph. Wireless telegraphy and its kindred

invention, wireless telephony, have proven one
of the greatest boons of the age, but from the
standpoint of our public officials, and particularly
our army and navy officers, their value will be
tremendously enhanced if a way can be found to
transmit messages with surety that they will
reach nobody save the individual for whom they
are intended. Under present conditions many
military and naval wireless messages are "picked
up" by private operators and of course this would
not do at all in time of war. It is believed, how-
ever, that a solution will be provided when there
is completed the trio of monster wireless towers,
450 feet in height soon to be constructed by the
navy department at Washington, D. C. The
equipment at the new station will be capable of
transmitting wireless messages a distance of
3,000 miles or more and it is believed that it will
be so powerful that it will be readily practicable
to send and receive messages that cannot be
fished by any wireless station of less capacity.

JEWS MAY YET COLONIZE.
Another attempt will be made to establish
a colony of Jews near the Holy Land. In 1903 the
late Dr. Herzl, after having failed to obtain any
satisfactory concession from the sultan of Tur-
key in respect to Zionist effort in Palestine, ap-
proached the Egyptian government with the ob-
ject of getting a grant of land for Jewish settle-
ment in El Arish district, between Egypt and
the Holy Land, the Jewish Chronicle says. The
territory between these two points includes the
Pelusium plain, which at one time was extremely
fertile and the original habitat of the Hittites.
A tentative offer was made to the Egyptian
government of a tract of land situated within an
isosceles triangle, one side extending from the
east of the Suez canal to Akabah, the other go-
ing from west of Gaza to Akabah, the coast form-
ing the base. It was rejected.

Now once again Jewish eyes have been turned
to this district. The plan offered by the General
Jewish Colonization Organization is far less am-
bitious than that which animated the Zionist
leader. Instead of attempting to colonize the
large territory which Herzl had in view, atten-
tion has been concentrated upon Rapha, which
is situated near to Gaza.

PUTTING IT RATHER NEATLY

Piece of Humor That Lifted Diffident
Professor to the Highest
Summits of Joy.

It is told that after Professor Ap-
ton had made proposals of marriage to
Miss Emily Jane Wilson, daughter
of Christopher North, he was, as a
matter of course, referred to her fa-
ther. As the professor was uncom-
monly diffident, he said to her:
"Emily, my dear, you must speak to
him for me. I could not summon
courage to speak to the professor on
this subject."

"Papa is in the library," said the
lady.

"Then you had better go to him,"
said the professor, "and I will wait
here."

There being apparently no help for
it, the lady proceeded to the library.

"Papa," she said, "I am going to
be married."

"To whom?" asked the professor.

"To the professor," said the lady.

"To the professor?" asked the professor.

"Yes," said the lady.

"To the professor?" asked the professor.

"Yes," said the lady.

"To the professor?" asked the professor.

"Yes," said the lady.

"To the professor?" asked the professor.

"Yes," said the lady.

"To the professor?" asked the professor.

"Yes," said the lady.

"To the professor?" asked the professor.

"Yes," said the lady.

"To the professor?" asked the professor.

"Yes," said the lady.

"To the professor?" asked the professor.

"Yes," said the lady.

"To the professor?" asked the professor.

"Yes," said the lady.

"To the professor?" asked the professor.

"Yes," said the lady.

"To the professor?" asked the professor.

"Yes," said the lady.

"To the professor?" asked the professor.

"Yes," said the lady.

"To the professor?" asked the professor.

"Yes," said the lady.

"To the professor?" asked the professor.

"Yes," said the lady.

"To the professor?" asked the professor.

"Yes," said the lady.

"To the professor?" asked the professor.

"Yes," said the lady.

"To the professor?" asked the professor.

"Yes," said the lady.

WOULD SAVE TOWER

Chicagoans Protest Against Razing of Historic Landmark.

Great Pile of Masonry Which Survived the Disastrous Fire of 1871 Very Rich in Romance and Tradition.

Chicago—Shall the oldest landmark of the north side, a gem rich in tradition and romance, the only remaining monument of the time of Chicago's victory in her greatest struggle for life, be profaned by a city's commercialism and destroyed in the name of economy?

Still the silent sentinel of stone, the ivy-mantled tower where sweet hearts were wont to meet, where children played and heard wondrous stories of other days, he reduced to a shapeless mass of stone and scattered all over the city?

Is it not possible to preserve the picturesque gray tower of the old Chicago avenue pumping station to posterity to serve as a memorial of the great fire of 1871?

These are a few of the questions raised by scores of Chicagoans who had read of the plan to tear down the tower of the Chicago avenue pumping station in the interest of municipal economy. This ancient landmark stands at the foot of "Millionaire row."

North of the famous old structure are the homes of the rich. Since 1871 the tower has stood as a constant reminder of the permanence of the work of the city's founders.

Members of the Chicago Historical society joined in the storm of protest against tearing down the tower. They were unanimous in the sentiment that

Chicago Water Tower.

this landmark should be preserved and made one of the show places of Chicago.

When Chicago began to burn, the evening of October 8, 1871, terror-stricken citizens fled north to the tower in the belief that the fire would be confined to a narrow district. The following day the fire reached the tower and scorched about its base, destroying the machine shop and adjacent buildings. The pumping engines were stopped and the walls of the engine house began to crumble. The roof and dome of the other buildings gave way, but the tower stood firm while the flames raged northward.

The great pile of masonry was preserved when repairs were made, and since that day has been rich in tradition and romance.

Many stories of the tower deal with the romance of the lives of the richest sons and daughters of Millionaire row. An ancient couple is said to have been married at the top of the tower. In the days of old thousands of young men and maidens wandered up the stairway to the summit to plight their troth.

ECZEMA TORTURES INSTANTLY RELIEVED

Cured by an External Treatment

You are remarkably fortunate if you are without some skin trouble. It may be only pimples or blackheads, or chapped hands, or the accidental sore, cut, scald, burn or boil, or the carbuncle or felon, or perhaps the more serious diseases of eczema, herpes, erythema, scabiness, or psoriasis, or inflamed piles, or some common irritation of the skin. There is one standard and sovereign remedy within your ready reach, and which you can purchase at any druggist's. It is Resinol Ointment, put up in screw-top opal containers, selling at fifty cents and a dollar, according to size. It is ever ready for use, and as easy to apply as cold cream or vaseline. "Thousands of physicians enthusiastically prescribe Resinol Ointment, and hundreds of thousands of families depend upon it, and are never without it. Resinol Soap is a chemically pure toilet soap of the highest grade. It contains in a modified form the same medication as Resinol Ointment, and is recognized as a preventive for many skin troubles, including blackheads, chapped hands and pimples. There is nothing better for the cleansing of the scalp and shampooing. It prevents the falling out of the hair. It is the family's soap, par excellence, keeping the skin sweet and healthy and preventing many of the troubles which so often attack the delicate skin of the child. You will find the Resinol Ointment and Soap at all druggists.

Resinol Chemical Co., Baltimore, Md.

HADN'T SEEN IT SINCE.

BABY'S HAIR ALL CAME OUT

"When my first baby was six months old he broke out on his head with little bumps. They would dry up and leave a scab. Then it would break out again and it spread all over his head. All the hair came out and his head was scaly all over. Then his face broke out all over in red bumps and it kept spreading until it was on his hands and arms. I bought several bottles of Cuticura, gave him blood medicine, and had two doctors to treat him, but he got worse all the time. He had it about six months when a friend told me about Cuticura. I sent and got a bottle of Cuticura Resolvent, a box of Cuticura soap and a box of Cuticura Ointment. In three days after using them he began to improve. He began to take long naps and to stop scratching his head. After taking two bottles of Resolvent two boxes of Cuticura and three cakes of soap he was sound and well, and never had any breaking out of any kind. His hair came out in little curls all over his head. I don't think anything else would have cured him except Cuticura."

"I have bought Cuticura Ointment and Soap several times since to use for cuts and sores and have never known them to fail to cure what I put them on. I think Cuticura is a great remedy and would advise any one to use it. Cuticura Soap is the best that I have ever used for toilet purposes."

(Signed) Mrs. F. E. Harmon, R. F. D. 2, Atoka, Tenn., Sept. 10, 1910.

Shocking!

Miss D., a victim of unquestioned propriety in all her previous life, was in the throes of embarrassment, and to the host of her ability was entertaining some young men—the authors of her fate. They conversed on some beautiful flowers in the drawing room. "How do you like the red lady?" "But if you think there are pretty, you must think of the red lady and look in the bath-tub of the girls dormitories. They are just full of American beauties!"

In the Future.

"How did you get your start in life?" "I got a flying start. I was born in an albatross."

None are so blind as those who are visionary.

"Familiarity breeds contempt" is one of the rules that work both ways.

Mrs. Winslow's Washing Soap for children teaching, softens the gums, reduces inflammation, always pain, cures wind colic, etc. a bottle.

None are so blind as those who are visionary.

FEELS LIKE A BOY.

Since Doan's Kidney Pills Cured Him of Terrible Kidney Trouble.

Sheldon Smith, Prop. Arlington House, Woodland, Cal., says: "Three years I was almost helpless. Kidney secretion was so terrible and obliged me to arise ten, to twelve times a night. My left limb became so stiff and sore I could hardly walk—just hobbled around with a cane. I had almost every complaint that diseased kidneys produce, and Doan's Kidney Pills removed them all. At the age of 76 I feel like a boy and enjoy health and comfort. Can anyone wonder at my gratitude?"

Remember the name—Doan's. For sale by druggists and general stockholders everywhere. Price 50c. Foster-Milburn Co., Buffalo, N. Y.

Ben's Logic.

"Ben," said his friend, waking up from a reverie in which he had been gazing abstractedly at the shiny expanse of Ben's skatin'-rink-for-dies, "is there nothing you could do for your baldness?"

Ben, by the way, is only forty.

"No," said he, replied with decision. "Fifteen years ago I was courting strong, and I tried lots of things. But about that time t' prince of Wales—Edward, you know—came to open t' new hospital, and I said to myself as soon as I saw him lit'lin' his hat to t' crowd, 'Ben, my lad, this can give it up as a bad job, and save thy brass. If there was owd 'ad cure a bald head they'd 'ave cured his.'"

—Tie-Bits.

FOR TETTER, SCALY FACE ERUPTION

The Tetterine. It is also an absolute cure for skin eruptions, erythema, etc.

"After thirty years experience in the drug business, I can truthfully say that I have never seen a remedy equal to Tetterine for skin eruptions. A few applications have made a complete cure. I have used it for many years, and it is unequalled for chaps and rough skin. Roland B. Hall, Druggist, Boston, Mass."

Tetterine, 50 cents at druggists or by mail from J. T. Murphy, Savannah, Ga.

Thackeray's Kindness of Heart.

Thackeray was the gentlest satirist that ever lived. As editor of the Cornhill he could hardly bring himself to reject a MS. for fear of hurting his would-be contributors. The story of his actually paying for contributions that he never printed, in order to conceal the fact that he had rejected them, may be true or false. We do not remember exactly how the evidence points. But even if it be a story, such stories are not told of men made of the stern stuff of the Thackeray commonly misknown.

STOIN'S DISTEMPER CURE

will cure any case of DISTEMPER, PINK EYE, and the same young boys all ages and prevent all future trouble. Some stable from having the disease. Also cures chicken cholera, and the distemper. And good remedy for the same kind of sore to cure 20 cents and 50 cents bottle. Agents wanted. Free book, Sample Medical Co., 1000 Broadway, New York, N. Y.

The Nature-Fake.

"I had one of your exhibits took a prize at the dog and poultry show."

"Well, keep still about it. I entered a skye terrier and he took first prize as a Mongolian hen!"

A POOR APPETITE QUICKLY REGULATED

Wash laundry work a pleasure. 10c. per pkg. 100c.

W. N. U., HOUSTON, NO. 27-1911.

Worrying Happiness.

The Bishop of Manchester, speaking at a meeting at Church House, Westminster, said the secret of happiness was to have a sufficient multitude of worries.

The man who had only one worry, a blind that would not be pulled up straight by the servant, or a coal scuttle the bottom of which was always coming out, found his way to the lunatic asylum. But the man who had no time to dwell upon his worries because he had to go from one to another, and back again and round and round like a squirrel in a cage, could be a perfectly happy man.

If you make a fool of yourself don't take it too much to heart. The world is full of people who are kicking themselves.

OWES HER HEALTH

To Lydia E. Pinkham's Vegetable Compound

Scottville, Mich.—"I want to tell you how much good Lydia E. Pinkham's Vegetable Compound and Sensitive Wash have done me. I live on a farm and have worked very hard. I am forty-five years old, and am the mother of thirteen children. Many people think it strange that I am not broken down with hard work and the care of my family, but I tell them of my good friend, Lydia E. Pinkham's Vegetable Compound, and that there will be no lackache and beating down pains for them if they will take it as I have. I am scarcely ever without it in my house."

"I will say also that I think there is no better medicine to be found for young girls to build them up and make them strong and well. My eldest daughter has taken Lydia E. Pinkham's Vegetable Compound for painful periods and irregularity, and it has always helped her."

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotics or harmful drugs, and today holds the record for the largest number of actual cures of female diseases.
