Fear 85 Dead In Jet Crash At Boston Airport

BOSTON (AP) — A Delta Airlines DC9 jet carrying 90 persons aboard crashed and disintegrated on landing at Logan International Airport in heavy fog today. Police said it had reports 85 persons died.

Only two survivors were reported initially by Massachusetts General Hospital.

An eyewitness said the twin-engine plane crashed on a runway about 1,000 feet from the edge of the water at the busy airport that juts into Boston Harbor.

State police said it appeared that the jet struck a seawall at the approach to the airport. A state police spokesman said there was a break in the 2½-foot high wall, indicating the craft's landing gear had struck it.

An observer said personal effects and parts of bodies were strewn all over the runway.

He said the plane, arriving on a flight from Burlington, Vt., seemed to have disintegrated on impact.

He said the largest portion of the plane he could see was a 10-foot portion of the fusilage.

State police said a temporary morgue was set up at the airport fire station at the airport.

Reports from the scene said numerous vehicles drove to the crash site to collect bodies from the debris and mud. Some of the vehicles became mired in the mud.

A Delta ticket agent at Burlington said the plane, scheduled to leave Burlington at 9 a.m., made an unscheduled stop at the municipal airport in Manchester, N.H.

He said he did not know the reason for the New Hampshire stop.

One of the survivors at Massachusetts General Hospital was identified as Leopold Chouinard, 20, of Marshfield, Vt. A hospital spokesman said he had third-degree burns over 80 per cent of his body.

The craft was identified by the airline's from Atlanta headquarters as Delta Flight 723.

It had 85 passengers and a crew of five, according to a spokesman for the airline in Boston.

The crash occurred on the Birds Island Flats area of the airport.

A witness at the scene said the only parts of the craft still intact were the rudder and stabilizer, the two engines and two pieces of wing.

The crash site was believed to be in the area of the Oct. 4, 1960, crash of an Eastern Air Lines jet into Boston Harbor with the loss of 62 lives.

There were 10 survivors of the accident, which occurred as the craft was taking off.

Authorities said starlings pulled into the plane's jet engines caused that crash.

Logan Airport, which bills itself as the world's eighth largest, sits on a large landfill area. It is the second largest airport in the country for overseas departures.

The SDN Column

People up at Lubbock have planned a celebration for 11 a.m. Wednesday, Aug. 8, the 50th anniversary of the announcement that Lubbock had been selected as the site for Texas Technological College, now Texas Tech University.

The announcement by Gov. Pat M. Neff brought to a close years of surveys and studies which had involved many cities and towns, including Snyder. In fact, at one time, Snyder community leaders thought they had a fairly good shot at landing the new college which had been authorized for West Texas. The site selection committee came here to inspect the local situation and there was a local committee working feverishly in efforts to get Snyder designated as the site for the college.

Lubbock was the eventual winner, and, as the Chamber of Commerce of that city notes in its announcement of the 50th anniversary celebration, the selection probably was the biggest single factor which transformed Lubbock from a small town of 8,000 people to a city of over 150,000.

A state college in West Texas with emphasis on agriculture and related subjects had been a goal for several years. In fact, at the very outset of discussion concerning the college it usually was referred to as "West Texas A&M." This name fell by the wayside when attention was temporarily diverted during World War I, and when a new proposal came out in the early twenties it was for Texas Tech.

★ ★ ★

Both Texas Tech and Texas A&M likely are thankful that the West Texas A&M name was abandoned along the way because each now enjoys exclusive identity.

The trend in the University of Texas System has been in the other direction in recent years, with Universities of Texas now located not only in Austin, but also in such widely separated points as El Paso, Arlington, Odessa, San Antonio, etc. Alumni of UT at Austin must shudder sometimes when they hear other schools using the UT name, and the same could be true of those who attended Arlington State, Texas Western, etc., a few years back.

Some of the current students apparently are alert to possibilities for distinction, however. It has been reported that some students at the University of Texas at Arlington now refer to UT-Austin as their "south campus." — WACIL McNAIR.

Today In History

By THE ASSOCIATED PRESS

Today is Tuesday, July 31, the 212th day of 1973. There are 153 days left in the year.

Today's highlight in history:

On this date in 1777, the Marquis De Lafayette offered his services to the American colonies, and the French nobleman was commissioned a major general in the Continental Army.

On this date:

In 1498, Christopher Columbus discovered the island of Trinidad.

In 1790, the U.S. government issued its first patent—to Samuel Hopkins of Vermont for a process to make potash.

In 1877, Thomas A. Edison took out an early patent leading to his development of the phonograph.

In 1917, the World War I battle of Flanders began.

In 1945, the French occupation leader, Pierre Laval, surrendered to U.S. occupation authorities in Austria.

In 1948, President Harry S. Truman dedicated New York's Idlewild airport now the John F. Kennedy airport.

Ten years ago: The U.N. Security Council called for an embargo on arms shipments to Portugal for use in maintaining Portuguese rule over African territories.

Five years ago: President Lyndon B. Johnson warned that an increase in steel prices in the United States might have dire economic consequences.

One year ago: Sen. Thomas F. Eagleton of Missouri withdrew as the Democratic vice presidential nominee after questions were raised about his medical history.

The Weather

SNYDER TEMPERATURES: High Monday, 86 degrees; low, 66 degrees; reading at 7 a.m. today, 67 degrees; precipitation, trace.

Northwest and Southwest Texas: Partly cloudy with little temperature change and widely scattered thunderstorms through Wednesday. Thunderstorms more numerous southeast. High today and Wednesday 82 mountains and extreme north to 95 south. Low tonight near 60 mountains and extreme northwest to 72 south.

North Central and Northeast Texas: Mostly cloudy occasional thunderstorms northwest and north central portions otherwise partly cloudy, scattered thunderstorms today and tonight. Increasing cloudiness. Chance of thunderstorms over area Wednesday. Cooler through Wednesday. High today 84 northwest to 92 southeast. Low tonight 65 northwest otherwise 60 to 75. High Wednesday 84 to 89.

South Central and Southeast Texas: Partly cloudy and warm with chance of thundershowers all sections except extreme south portion more numerous northwest portion through Wednesday. High today 88 to 104. Low tonight 71 to 82. High Wednesday 88 to 102.

Port Arthur to Brownsville: Southeast winds 6 to 16 knots with chance of thundershowers through Wednesday. Winds gusty in thundershowers.

Protection From 'Big Brother' Urged By Panel

WASHINGTON (AP) — A government advisory committee today recommended new safeguards to protect Americans from "Big Brother" misuse of computerized information about their lives.

"Today it is much easier for computer-based record keeping to affect people than for people to affect computer-based record keeping," the 24-member panel told the secretary of health, education and welfare.

The report strongly advised curbing the growing use of Social Security numbers for personal identification and proposed legislative restraints to protect individuals from unwarranted invasion of privacy.

Although there is no immediate danger of a computerized intelligence dossier being compiled on each citizen, because of economic and organizational problems, public concern about such a possibility erodes confidence in government, it said.

"The public fear of a 'Big Brother' system, in effect, focuses on the computer, but it includes other marvels of 20th Century engineering, such as the telephone tap, the wireless microphone, the automatic surveillance camera and the rest of the modern investigator's technical equipage," the report said.

"Such worries seem naive and unrealistic to a data-processing specialist, but as in systems, the apprehension and distrust of even a minority of the public can grossly complicate even a safe, straightforward data-gathering and record-keeping operation that may be of undoubted social advantage," it added.

The committee said it opposed establishment of a national identity number system "now or in the foreseeable future," and urged restraints on the use of Social Security numbers which it said "the federal government itself has been in the forefront of expanding."

The report, "Records, Computers, and the Rights of Citizens," recommended new legislation prohibiting secret data banks, guaranteeing the right of an individual to find out what information about him is in the record and how it is being used, protecting him from use of information obtained for one purpose to be used for another purpose, and allowing him to correct or amend information about himself.

Misuse could bring criminal and civil penalties accompanied by injunctive relief and the right to sue for damages.

Ball To Forfeit Games

AUSTIN, Tex. (AP) — Ball High School of Galveston must forfeit all 1972-73 basketball victories in which it used a player who received cash, the University Interscholastic League executive committee ruled today.

The committee also censured Sanderson High School for using two nonresident players in football and basketball games, and also for using one of them on the mile-relay team in track.

Ball was disqualified for the 1973-74 basketball season and placed on probation for the 1974-75 season. That means it will play its schedule both years but be entitled to win district honors only in 1974-75.

For Ball opponents, the games will count as if there had been no disqualification.

Ball won district and bidistrict this year, then lost in the regional playoff.

Sanderson must forfeit all football and basketball games in which the two players participated, the committee ruled, but since the school lost all of its football games that portion of the decision is meaningless.

Haphazard Rains Endure

Unpredictable shower activity continued around the Snyder area today, dumping substantial amounts of moisture on small areas while skipping around the country-side.

Storm warnings went up Monday afternoon when a sighting of a tornado was reported north of Snyder, but it apparently did not touch ground. Showers fell to the north, west and south, but the official gauge at the city water plant in Snyder had only a trace.

The haphazard shower pattern had resulted in only small catches for lakes of the Colorado River Municipal Water District. Lake J.B. Thomas caught only a trickle following rains in Borden County which covered only a small area. The Colorado River was flowing three feet deep at Silver this morning, but was not expected to put much water into Lake E.V. Spence, unless more rains fall.

Granbury Man Dies Here Today

Leroy Scott McElroy, 65, of Granbury died at 4:20 a.m. today in Cogdell Memorial Hospital.

Mr. McElroy had been in Snyder about a week, coming here to visit a sister, Mrs. Corena Cole, 212 Thirty-fourth Street.

A retired carpenter, he was a native of Bosque County. The body was taken this morning from Bell-Seale Funeral Home to the Stephenville Funeral Home where funeral arrangements were to be made.

EL SOMBRERO GRANDE—Hubert Taylor of Greenville, Tex., found this massive Mexican hat helped beat the heat while bicycling along city streets recently. Not sure if he is guided by radar, but it appears he might have trouble seeing the road. (AP Wirephoto)

Haldeman Says He Ok'd 'Black Projects' Funds

WASHINGTON (AP) — Former presidential chief of staff H. R. Haldeman testified today that he approved a $90,000 campaign budget for "black projects" prior to the Republican national convention last year. He said he didn't know what the projects were.

Haldeman began answering questions of the Senate Watergate committee after testifying Monday that he listened to two White House tapes he said refute John W. Dean III's testimony about two key meetings with President Nixon.

Haldeman acknowledged that he had approved a memorandum, dated Feb. 3, 1972, seeking campaign funds for White House political projects, such as presidential travel and mailings to special-interest groups. Among the items was $90,000 for "black projects" to be carried out by Charles W. Colson, another White House adviser.

Asked what the projects were, Haldeman said, "I'm not sure." He said he didn't think they had anything to do with previously disclosed "black advance" work, because Colson wasn't an advance man.

Former campaign aide Robert C. Mardian testified earlier that he was told the Nixon reelection campaign had an extensive budget for "black advance" work, which he described as political sabotage.

Haldeman said the budget memo only covered campaign funds that would be needed through Aug. 20, 1972, the time of the Republican convention.

The beginning of Haldeman's interrogation, expected to take most of this week, delved mainly into his responsibilities at the White House and went over points Haldeman made in his opening statement Monday.

Haldeman said Dean came to him in recent months to remind him that Dean told him about two meetings at which the Watergate burglary and other political espionage activities were discussed.

These were the meetings Jan. 27 and Feb. 4 attended by Dean, former Atty. Gen. John N. Mitchell, Jeb Stuart Magruder and G. Gordon Liddy, the father of the plan.

"As I recall he told me they had been in December and January and that he attended two meetings and that he had come to me after the second meeting and reported to me that there had been an intelligence plan that had been totally inconceivable and absurd," Haldeman said.

"Do you recall his doing that?" asked committee counsel Samuel Dash.

"I don't recall it with any clear recollection," Haldeman said. "But I was willing to accept Dean's specific accounting to me that it did happen."

Haldeman insisted though that he recalled Dean telling him the meetings were in December 1971 and January 1972, not January and February.

The question of whether the Liddy plan, scaled down from $1 million to $250,000, was finally approved by Mitchell is in dispute. Magruder, Mitchell's deputy, said the former attorney general approved it at a third meeting March 30 last year.

Hearing On City Budget Sept. 4

The Snyder City Council amended its bridge construction contract with Price Construction Co. and set Sept. 4 as the date for a public hearing on the proposed city budget for the fiscal year beginning Oct. 1 in a special session Monday night.

The Thirtieth Street bridge contract was amended to provide for additional charges for restoring a concrete support at the west end to its original position and anchoring it permanently. It had shifted some five inches after work began on rebuilding the bridge, which was destroyed by the flood of Aug. 13, 1972. The city will pay $1,250 to have the extra work done.

Members of the council were handed copies of the proposed budget for the 1973-74 fiscal year. It will be up for first reading next Monday night at the council's next regular meeting and for final approval following the public hearing on Tuesday, Sept. 4.

A replat of a portion of Park View Addition was approved. Dillard Teal, developer of the addition, had requested the replat to change boundaries of some of the lots. The change also had been approved by the Planning and Zoning Board.

Action on bids for cleaning, repairing and painting elevated water storage tanks at Twenty-fourth and Avenue B and at Thirty-second and Avenue Z were delayed again, pending receipt of a report on materials the apparent low bidder plans to use.

Councilman Truett Bryan was appointed to the Motel Tax Advisory Committee to fill a post held the past year by former Councilman John Boren.

The council concluded its special session with a discussion of possible methods of preventing salvaging and scavenging at the city's sanitary landfill south of town.

Skylab 2 Crew Goes To Work

By RICHARD SALTUS
Associated Press Writer

SPACE CENTER, HOUSTON (AP) — The Skylab 2 astronauts, still struggling with motion sickness but pronounced on the mend, hoped to finish tidying up their space lab today.

Because of the continuing illness, a space walk was postponed another day until Thursday.

Skylab commander Alan L. Bean, Dr. Owen K. Garriott and Jack L. Lousma managed to work steadily Monday. The three are taking stomach-soothing medicine.

For the first time since the planned 59-day mission began Saturday, the three ate most of their food and no vomiting occurred.

"Generally speaking, everybody feels pretty good until meal time, and it gets pretty tough then," Bean said. "But if you can get through meal time, you're okay."

Most of today was to be spent putting things away and dealing with some troublesome, but not dangerous, mechanical problems.

Mission officials said the space walk might have to be put off yet another day, depending on the astronauts' conditions.

Flight surgeon Dr. Paul Buchanan said he thought the men had passed the crisis of their sickness. Space agency physicians are quite sure the illness was caused by the disorientation of weightlessness. Buchanan said three days was not an unreasonable length of time for adapting to zero gravity.

If things had gone as planned, Garriott and Lousma would have stepped outside the orbiting workshop for a space walk today.

They need to replace film in a set of astronomical cameras so observations of the sun can begin. They plan to erect a new sunshade over the lab's outer surface where a heat shield was ripped away during the lab's launch.

The orbiting workshop was occupied by the first Skylab crew in May and June.

Evans Rites Set Thursday

Funeral service has been set for 10 a.m. Thursday at the Bell-Seale Funeral Home Chapel for George H. Evans, 42, who died Sunday afternoon.

The Rev. George Magnor and the Rev. Jack Riley will officiate. Burial will be in Hillside Memorial Gardens, under direction of Bell-Seale Funeral Home.

Surviving are his mother, Mrs. Minnie Evans of Snyder; three sisters, Mrs. Gladys Russell and Mrs. Martha Poindexter, both of Big Spring, and Mrs. Mary Lois Graham of Snyder; and a brother, Ralph Evans of Singapore.

Mother wants to keep grad's new nose quiet

By Abigail Van Buren

© 1973 by Chicago Tribune-N. Y. News Synd., Inc.

DEAR ABBY: For my high school graduation, my parents gave me a new nose. I had it done last week, and even tho it's still swollen, I just love it!

I am going east to college in the fall. I will be meeting lots of new kids, and my mother told me that I shouldn't tell anybody I had my nose done. I told her I hadn't planned on wearing a sign saying: "I had my nose done," but if it comes up in a conversation, I am not going to lie about it.

She said it would be foolish for me to admit it, and she asked me to promise her I wouldn't tell anybody.

I respect my mother's opinion, and I know she means the best for me, but I just can't make her that kind of promise. This is the first really serious conflict we have ever had. Am I wrong? Or is she? NOSE JOB

DEAR NOSE JOB: Mother usually nose best, but not this time.

DEAR ABBY: I am very much in love with Steve and he is very much in love with me. We plan to be married in September. There is only one problem: I am also very much in love with my job.

I'm a secretary and have been with the same company for five years. I intend to keep on working after we are married. I guess you could say I am career-minded.

Steve says before we get married I must promise that I will not work over eight hours a day, and I'll not work at all on Saturdays. Right now I work more than eight hours many days, and I work on Saturdays, too.

Steve doesn't think a woman can be married and have a career, too. I disagree. Abby, do you think it's fair for a man to ask a woman to give up something that means as much to her as my job means to me? I love Steve and don't want to lose him, but I also love this job. Please settle this. STEVE'S GIRL

DEAR GIRL: It's all right for a girl to like her job, but if she is "in love" with her job, her love life with a real live man is in trouble. I don't think Steve's requests are unreasonable, but if you do, hold off those wedding bells. I hear a clinker in the belfry.

DEAR ABBY. is there a way for a couple to be assured they will get the sex child they want? I have heard there is a foolproof method for getting a boy or a girl, whichever the couple prefers. If you know how this can be accomplished with positively no chance of failure, please respond at once, and I will send $25 to any charity you designate. FATHER OF SIX DAUGHTERS

DEAR FATHER: Yes. ADOPT! Send $25 to your local Planned Parenthood chapter.

DEAR ABBY: Grandma wrote that she was embarrassed because her grandson bragged so much about his war record, even saying that he had won 11 purple hearts. She should use an old Jewish saying next time "Junior" starts to boast:

"Do not make yourself so big
You are not so small."

A CATHOLIC GRANDMOTHER, ALAMOGORDO, N. M.

Problems? You'll feel better if you get it off your chest. For a personal reply, write to ABBY: Box No. 69700, L. A., Calif. 90069. Enclose stamped, self-addressed envelope, please.

Hate to write letters? Send $1 to Abby, Box 69700, Los Angeles, Cal. 90069, for Abby's booklet, "How to Write Letters for All Occasions."

Stennis Out Of Hospital

WASHINGTON (AP) — Sen. John C. Stennis has been released from the hospital after treatment of gunshot wounds suffered last January in a hold-up in front of his home.

"This is a happy day for me, and it marks another step toward resuming my full work schedule, which I am anxious to do," the Mississippi Democrat said Monday upon his discharge from Walter Reed Army Medical Center

Stennis, 71, would not be able to resume full duties for several weeks, the hospital said.

Stennis was shot Jan. 30 and was in critical condition.

He was temporarily released from the hospital in the spring but returned for removal of the second of two bullets.

Three young men were arrested in the robbery-shooting.

Cpl. Campbell Is Promoted

BEAUFORT, S.C.—Marine Corporal James R. Campbell, son of Mr. and Mrs. Fred W. Campbell, Route 2, Hermleigh, was promoted to his present rank while serving with the Marine Corps Air Station in Beaufort.

No Parole For Irving

WASHINGTON (AP) — Author Clifford Irving, who tried to peddle a bogus biography of billionaire recluse Howard Hughes, has been denied a shorter prison term.

The U.S. Parole Board on Monday denied a parole for Irving, 42, who is serving a two-year, six-month term in Federal Correctional Institution at Danbury, Conn.

The board said it would review his case in January.

Irving began serving his term Aug. 28. He was convicted of conspiring to defraud McGraw-Hill publishing house with claims that he had access to Hughes.

Irving claimed he had conducted clandestine interviews with Hughes and McGraw-Hill advancedhim$765,000.Hughes said the biography was a hoax.

Dollar Is Improving

LONDON (AP) — The U.S. dollar improved today in all key European money markets for the second straight day. It hit its best price in several weeks in Frankfurt, Paris and London, but trading was light.

Dealers said the dollar has been helped by both the reduction in interest rates in West Germany and the recent support buying by government central banks.

In Frankfurt, the dollar moved up quickly shortly after opening from Monday's close of 2.33 marks to 2.35 marks. In Paris, the U.S. currency advanced to 4.12 French francs, up from 4.0887 on Monday.

Theft Reported

Someone stole hot water heaters and two tires and wheels from two different mobile homes at 5113 College Avenue, over the weekend, according to a City Police report.

The loss was set at $240. Owner of the property is Larry Hall, 4501 Crockett.

UNUSUAL FOR 1973—Mrs. Noel M. Browning got a pleasant surprise when she looked over a peach tree at her home, 3011 Avenue Y. There were peaches hidden among the heavy foliage, something she had not expected because of the late freeze which apparently had killed all peaches in the area. The fruit is large and covered well enough by leaves that it was completely unnoticed for the entire growing season. How it escaped the April freeze and later hailstorm is a mystery.

Arguments Begin On East Texas Oil Flow

By LEE JONES
Associated Press Writer

AUSTIN (AP) — Exxon and General American Oil Co., an independent producer, squared off before the Texas Railroad Commission today over whether production should be increased or lowered in the rich East Texas oil field.

Exxon's testimony probably will run four or five days, said Frank Douglass, lawyer for the giant oil corporation.

Clint Small Jr., general American's lawyer, said his firm's testimony would run less than a day. In addition a group of 31 independent oil operators say they should need only a few hours to present a case roughly similar to General American's.

General American wants to cut the field into two portions, north and south, divided by Texas 31 highway. The proposal also includes a reduction in output from the southern part of the field and an increase in the northern portion.

Under present Railroad Commission proration orders, the the field is operation at 86 per cent of capacity while nearly all other fields are producing 100 per cent.

"Exxon views the General American application merely as a device to obtain increased oil allowables for the north while reducing the oil allowables in the south. Exxon will show that the East Texas field is still one interconnected, inter-communicated reservoir and that whatever is done in the north part of the field affects the south part and vice versa," Douglass said.

He said that Exxon believes the entire field could produce at 100 per cent of market demand without causing any waste.

In fact, Douglass maintained, studies made by Exxon indicated the East Texas field could produce at 100 per cent "for many, many years in the future" and even at wide open production would have a life expectancy of more than 50 years.

Small told the commission's examiner, Mac Coker, that the field already has been effectively severed into two portions by the incroachment of water under ground from the west side to the east side at Kilgore. This results from "the high concentration of wells in this area," Small said.

General American operates 171 wells south of the line and 137 wells north of it, Small said.

Small said General American's evidence shows that the present level of production south of the line "is damaging a substantial portion of the reservoir and will decrease the ultimate recovery." He said "a new problem area" of about 3,500 acres between Kilgore and London has developed with extremely low well pressures. Pressure is necessary to push oil out of the ground through the wells.

GM To Produce Rotaries

TRAVERSE CITY, Mich. (AP) — General Motors President Edward Cole says his company will manufacture 100,000 Wankel rotary engine Vegas in 1974.

Cole told University of Michigan students on Monday that development of the rotary engine is limited only by time and research money available. He said the engine has advantages in size, weight and the low number of moving parts.

Cole also told a university engineering and management seminar here that the Wankel will be able to meet federal emission standards, although he said they were the result of "legislative overkill."

Cole said General Motors has studied several different engine designs—including the gas turbine, stratified charge, steam and Stirling engines. He said the rotary design is most likely to be used extensively in the future.

"While the problem was intricate and sophisticated, several of the autos currently equipped with rotary engines have apparently handled it quite successfully," he said.

Cole said GM's engineers have modified the engine slightly and solved the sealing, emissions and fuel economy problems that originally plagued the Wankel engine.

The GM executive said a major problem remaining in the mass production of rotary engine cars is manufacturing—the cost of factory changeovers and machine retooling might be prohibitive.

Firemen Called Out Three Times

City Firemen answered three calls yesterday. They extinguished a tank battery fire on the Brownfield Lease six miles out on the Ennis Creek Road at 12:45 p.m. Owner of the property is the Sohio Petroleum Company.

They extinguished a car fire at 2501 Avenue R at 2:55 p.m. There was damage to Julian Jones' 1970 Model Pontiac.

There was damage to a 1970 Model International pickup in another fire 11 miles out of town on the Colorado City Highway at 3:55 p.m. Owner of the vehicle is S.H. Gillum.

Pat Invites 130

WASHINGTON (AP) — Pat Nixon has invited about 130 members of the Soviet Union's Bolshoi Ballet Company to the White House on Friday for for a tea and reception. The group is performing at Wolftrap Farm Park near the capital.

Many Confused By Nixon's Top Aides

By DONALD M. ROTHBERG
Associated Press Writer

WASHINGTON (AP) — Was it Haldeman or was it Ehrlichman? Richard A. Moore thought a moment and then apologized to the Senate Watergate committee.

"I sometimes find it hard to recall which was which," said the special White House counsel who had worked with both for several years.

During the 4½ years that John D. Ehrlichman and Harry Robbins Haldeman formed the innermost circle of advisers around President Nixon, a lot of people shared Moore's confusion.

But the picture is clearer now.

For a week former domestic affairs adviser Ehrlichman, heavy-set and dark-browed, testified before the Watergate committee and firmly, sometimes defiantly, maintained his innocence and his rightness.

Haldeman, Nixon's former chief of staff, followed Ehrlichman to the witness stand Monday afternoon.

There is no confusing the two physically. Haldeman is tall and lean, his light hair worn in a crew cut.

But he's just as firm as Ehrlichman in maintaining he did nothing illegal.

At 46, Haldeman is two years younger than Ehrlichman, whom he has known since both were students at UCLA. But Haldeman's relationship with Nixon goes back much farther than Ehrlichman's.

Haldeman was a volunteer worker for Nixon in the 1956 campaign and has worked in every Nixon campaign since then. In 1960, he recruited his old college friend Ehrlichman.

Both men are Christian Scientists and neither smokes or drinks. Like the President, both wear enameled American flags on their lapels and Haldeman even shares Nixon's fondness for cottage cheese lunches.

Married and the father of four, Haldeman is a home movie buff. One of his favorite subjects was Richard M. Nixon.

Five Named To Voting Study

AUSTIN, Tex. (AP) — Chairman Bill Moore of the Senate State Affairs Committee has appointed five senators, including himself, to study voter registration, absentee voting and other related matters.

Moore named Sen. Nelson Wolff of San Antonio as subcommittee chairman and also selected Sens. John Traeger of Seguin, Jack Ogg of Houston and Peyton McKnight of Tyler for the study group.

All are conservative or moderate Democrats.

Soviet Lawmaker Raps US Courtesy

MOSCOW (AP) — Alexei Shitikov, chairman of the Soviet Union's upper parliamentiary body, says Russian lawmakers aren't treated with the proper courtesy in the United States.

Shitikov told American newsmen Wednesday that U.S. congressmen visiting Russia are met by chauffeured limousines, put up in the best hotels and generally given red carpet treatment.

But Soviet lawmakers visiting the U.S. must fight for taxis, make their own hotel reservations and pay their own bills, he said.

Airman Perez Is In Exercise

AUSTIN—Airman Jose L. Perez, whose guardian, Mrs. Joseta Lopez, resides at 1009 Avenue U, Snyder, took part in a recent North Atlantic Treaty Organization training exercise at Alconbury RAF Station, England.

Airman Perez, a U.S. Air Force intelligence specialist, deployed with the RF-4 Phantom-equipped 45th Tactical Reconnaissance Squadron from Bergstrom AFB for the three week exercise dubbed "Creek Bee II."

The exercise tested the procedures for deploying, receiving and operating the NATO-committed Tactical Air Command unit at its host European base.

Airman Perez is a 1972 graduate of Snyder High School.

Working Business-woman Fights Illness With Work

By EVE SHARBUTT
AP Newsfeatures Writer

NEW YORK (AP) — Betty-jane Hilton bought her own business as a reason to stay well.

She had been out of the hospital for one whole year out of the previous five, and thought it ought to continue.

A veteran of five cancer operations, a brain hemorrhage and serious kidney surgery, the attractive blonde president of Sanitized Sales Company of America says she may be a fatalist, but she believes she has been left on earth for some purpose.

The poised former model's firm licenses a wide range of bacteriostats and fungistats used in many products for home and hospital.

Betty Hilton was not always the poised businesswoman who spends about half of her time on the road.

"No woman in my husband's family had ever worked. But I offered to make a deal with him. I had tried playing bridge and working in politics and it wasn't enough. I couldn't have children, so I said we could either adopt four, or I could go back to work.

"He wasn't interested in adoption at that time. So one day in a restaurant I was talking about how bored I was and how I wished I could find a job. A man sitting nearby came over and offered me one," Mrs. Hilton said.

She went to work on a trial basis 16 years ago. Ten years ago the board of directors made her president of the company and six months ago, she bought the business.

"In between, I had a brain hemorrhage, cancer operations and a few other things," she added. "When I think of all the things that have happened to me I feel I should be 222 instead of 45. But the hospital and I have a good agreement. They always put in a special telephone for my business."

Selling a product you can't see and assuring purchasers that it does perform is not always easy. Customers range from manufacturers of wigs to moving vans companies to mattress makers.

"The quality control must be extensive. You can't afford to sell chemicals without knowing where they are going and what they will do. The large and small buyers must know the product is there and working. We can't afford to be wrong," Mrs. Hilton added.

As president, Mrs. Hilton supervises an extensive sampling program. Samples are taken of chemicals at the mill, at the company where chemicals are added to a product and at the retail level.

"I nearly died from a staph infection once, so I believe cleanliness is important," she added. "But still, even I can't see what I sell. I'm lucky I've been able to pick up almost anything I ever wanted to learn."

Born in Kentucky, brought up in Michigan, she attended college for one year, began and ended an unsuccessful first marriage and worked at many jobs. On her first trip to New York she met her second husband, but it was five years before they married.

"We have a strange marriage. If we weren't two individuals it wouldn't work. For much of our marriage we've maintained separate residences, in the city and the country, and been together weekends.

"Now we're involved in a new place at the shore. This business about two people becoming one is nonsense. Two people who marry share a common perimeter," she said.

Mrs. Hilton is not a women's liberation advocate. She calls the movement "malarkey" because it doesn't mention equal responsibility in the same breath with equal pay and equal jobs. She believes all three go together.

"In my life, I have learned to make substitutions. If you can't do that, you sit back and become a women's libber and complain about everything. Of course, I'd like to have a half dozen children and a couple of grandchildren. But I was not dealt that hand, so I can't sit back and complain that life gypped me.

"I went to my 25th high school reunion," Mrs. Hilton added. "After seeing my old friends, I decided my life was a pretty good one. I came away with a feeling of satisfaction.

"I find life interesting. There's so much out there to see and do."

The average woman worker is as well educated as the average man worker. Both women and men in the U.S. have completed a median of 12.4 years of schooling, according to Dr. Jennie C. Kitching, family life education specialist, Texas Agricultural Extension Service, Texas A&M University System.

Columbus Made Corny Discovery

NEW YORK (AP) — If someone asked you to name something Columbus discovered and you answered the United States, you'd be wrong. If you said popcorn you'd be right.

Columbus was the first white man to see natives of the West Indies with corsage-like decorations that were made from exploded corn — today's popcorn, according to researchers for The Popcorn Institute and The World Book Encyclopedia.

In fact, popcorn, which found fame at the movies, was widely used as food and decoration in America long before Columbus arrived.

Archeologists have found evidence in the Bat Cave of western New Mexico that popcorn was known 5,000 years ago. Historians agree that the popcorn plant is the father of the plant that supplies Americans today with corn on the cob.

Probably the first method of popping corn was to place kernels on hot stones over a fire, or to toss kernels directly into the fire or hot ashes and allow them to pop out. Kernels could also be strewn on a cleared hot area near the fire, or covered lightly with hot sand to distribute heat evenly for popping.

English colonists in America were introduced to popcorn at the first Thanksgiving at Plymouth. Quadequina, brother of the Wampawoag chief Massasoit, brought a deerskin bag of popped popcorn to the feast as a gift. The Indians also brought popcorn snacks to meetings with the English colonists as a token of good will during the peace negotiations.

Colonial housewives quickly put popcorn to a practical use, serving it with dinner and also mixing it with sugar and cream for breakfast, the first "puffed" cereal.

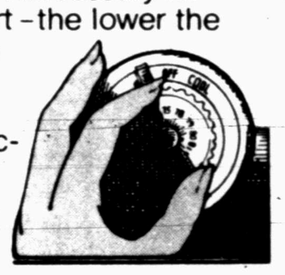
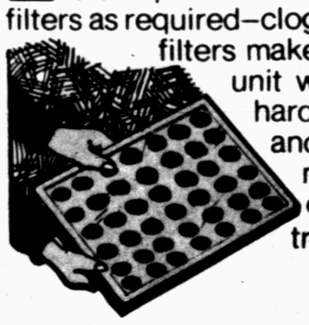
8 ways to save money on air conditioning.

1 Set thermostat no lower than necessary for comfort – the lower the setting the more electricity the unit uses.



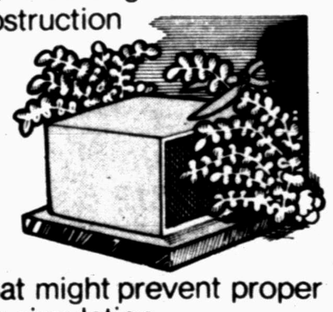
2 Replace disposable or clean permanent type filters as required–clogged filters make the unit work harder and use more electricity.



3 Provide adequate attic ventilation—helps reduce heat buildup.

4 Install proper duct, ceiling and wall insulation and weatherstrip windows and doors—keep hot air out, cool air in. (Helps reduce winter heating costs too!)

5 Keep the outdoor unit free of grass or other obstruction that might prevent proper air circulation.



6 Keep windows and fireplace dampers closed—prevents excessive loss of cool air and infiltration of hot air.

7 Shade windows from direct sunlight with awnings, blinds or draperies—it will reduce the load on the unit.

8 Have the unit checked by a qualified air conditioning serviceman. Do this in the spring, prior to your need for cooling.

Get our free booklet, "Tips to help you use electricity more efficiently throughout your home." Copies are available in our office, or you can request one on the comment portion of your electric service bill.

Discuss Finances Of Others To Forget Yours

By JOHN CUNNIFF
AP Business Analyst

NEW YORK (AP) — There's nothing like a good discussion of somebody else's finances to take your mind off your own. To fuel such a discussion, hoping it remains that and nothing hotter, consider this:

In 1972 there existed a 5.5 per cent guideline for wage increases. In spite of this, the total compensation of chief executives rose about 7.8 per cent, according to a survey by McKinsey & Co., managment consultants.

The survey was conducted among 592 of the largest U.S. corporations in 31 industries. The findings reveal that compensation rose 18.6 per cent in motor vehicles and equipment and 12.8 per cent in railroads.

"Only five industries failed to post increases," McKinsey found, "with meat products alone showing a significant over-all chief executive pay cut—a decrease of 14.3 per cent."

How could such a thing occur, seemingly in violation of guidelines?

The answer lies in the difference between salaries and total compensation, which includes not just the salary but the bonus and incentives and such.

"The fact that executive incentive plans are controlled separately from salaries under existing pay regulations accounts for why over-all executive compensation can increase by the 7.8 per cent that it did, despite a 5.5 per cent wage increase guideline," said George Foote, a McKinsey partner.

A separate analysis of salaries only showed an increase of about 5 per cent from 1971 to 1972, he said, concluding:

"The charge made in some quarters that executives have been lining their pockets at the expense of lower paid employes does not appear to be substantiated by the facts."

And here's another:

If for some reason you had the notion that business hasn't been good, perhaps because the stock market simply doesn't reflect it at all, you should be reminded that seldom in recent history have corporate profits risen so sharply.

Preliminary computations show that after-tax profits of corporations during the April-May-June quarter were about 30 per cent higher than in the same period a year earlier.

In publishing its own survey, First National City Bank commented:

"A rapidly expanding economy and easing of price controls under Phase 3 helped increase earnings at five out of six of the firms covered by the survey."

Here are a few of the after-tax corporate profits reported by City Bank for the first half of 1973 compared with the first half of 1972:

Paper 74 per cent, iron and steel 57, nonferrous metals 51, automobiles and parts 58, chemicals 40, petroleum 46, machinery 35, rubber and plastics 30 and textiles 29 per cent.

Anticipating such increases, Robert Parks, the chief economist for the investment house of Blyth Eastman Dillon commented in a research piece directed at the company's personnel:

"Price violations anyone? The statement ... by the Cost of Living Council that it has found only a few violations of price standards under Phase 3 is astonishing to us on a number of accounts."

He proceeded to list some of them, the first of which was:

"It runs counter to the overall data for several industries, which show rapid price rises, wholesale and retail, in the first half of this year, a large climb in total profits, and a significant rise in profit margins ..."

Many of the profit margins, he argued, rose above the average of the best two of the past four or five fiscal years," which suggested to him that more profit violations could be found than were turned up by the council.

Bentsen Backs Campaign Limit

WASHINGTON (AP) — U.S. Sen. Lloyd Bentsen, D-Tex. went with the majority in a 82-8 roll call vote by which the Senate Monday passed a bill fixing limits on campaign spending and contributions and establishing an independent enforcement agency.

Sen. John Tower, R-Tex, did not vote.

Time To Check Up On Status

By HAL BOYLE

NEW YORK (AP) — Would you be surprised if people suddenly started cutting you up socially or at the office?

Well, you shouldn't be. It is your own fault. Unnoticed by yourself, you have been slowly losing status, and all at once, it seems, people have turned on you.

But they always turn against anyone who doesn't take the trouble to protect his status. In this world you don't need to keep your mind to be successful—but you do have to save face.

How can one safeguard his status? By checking it regularly. How often? Well, if you're the careful type, you'll check it as often as you should brush your teeth—at least twice a day.

Here are a few simple ways to check your status. It is probably triple-A if the following things are true of you:

You have a 10-room suite at the Watergate, but you don't have to testify to the Senate where you got the money to pay the rent.

You've made the last payment on the three original Picasso paintings you bought on credit 10 years ago.

A state official has arranged that the water in the swimming pool at your country place will be changed once a week at no expense.

They have just struck oil on your 100-acre hideaway island retreat in the Bahamas.

No one in your family has gone to Denmark to have a sex change operation in the last decade, and none of them is planning one.

Nobody in your old neighborhood pool hall dares play you for money anymore because you set the stake so high it makes their cues shake.

You get six free tickets every year to the annual policemen's ball.

Well, it's easy to see how a guy fixed like that doesn't have to worry about being snubbed. But what about the loser? How can he tell when his laurel leaves are withering?

Certainly it's time to do something drastic about improving your status if—

When you find a lucky penny, you put it in a gum-ball machine so you'll have something to chew on to still your hunger pangs.

Your wife hasn't spoken to you since you pawned the family television set at the neighborhood bar. And the bartender won't let you in anymore to watch your favorite program.

When you get on the front end of a bus, everybody else gets off the back end, including the driver.

Federal officials have turned a deaf ear to your plea that they declare you a human disaster area.

Your dear old mother returns your letters unopened.

About 122,000 million cigarettes were smoked in Britain in 1971.

Junior Editors' Quiz on THE HIPPOPOTAMUS

QUESTION: *How did the hippopotamus get its name?*

• • •

ANSWER: The hippopotamus is a land and water animal that lives in swamps, streams and marshes of tropical Africa. It is the heaviest of all land mammals, after the elephant. The name hippopotamus means river horse. It is not related to the horse, however, but to the hog.

The common hippo has a barrel-shaped body set on four short, thick legs. A big hippo may weigh up to 4 tons and has the biggest mouth of any mammal except the whale. The baby hippo is born in the water and can swim at birth. Hippos are chiefly vegetarian and live on plants near rivers and also vegetation at the bottom of rivers. The hippo is a mild animal. It would rather hide than attack. Much of the time it will run to the water to hide. Rarely will it kill another animal. In zoos, hippos become very gentle. A big one will eat 100 pounds of food a day. They usually live for 30 to 50 years. The natives of Africa hunt the hippopotamus for its flesh as well as for its teeth which are superior to ivory in hardness.

7-31

New York at Boston

"DAVID FRANCHISE"—David Clyde, right, talks with Texas Rangers owner Bob Short in the dugout at Arlington Stadium recently. The 18-year-old pitcher is often referred to by sports writers as "David Franchise", due to the new life he has pumped into the club at the gate. The Rangers are some 30,000 above last year's attendance when they trailed by 25,000 at one point. Congenial Clyde has received acclaim at every American League city where he has pitched. Manager Whitey Herzog continues to be amazed at the poise of the youngster. (AP Wirephoto)

Rangers' Bibby Hurls No-Hitter

By BRUCE LOWITT
Associated Press Sports Writer

"Things are looking up now," said Jim Bibby. The Texas Rangers' pitcher couldn't have been any more "up" against Oakland.

He had his fastball up, down and everywhere else—within the strike zone, that is—and had the world champion A's flailing away helplessly.

And when the flailing ended Monday night, Bibby had 13 strikouts—and a no-hitter!

Not only was Bibby up. So was his salary. Rangers' owner Bob Short, in a moment of exuberance that seemingly ignored baseball's dictum barring performance bonuses, gave the 28-year-old right-hander a $5,000 raise...not bad considering Bibby had a contract with the big-league minimum of $15,000 on the bottom line.

Oakland's Vida Blue, a strikeout artist in his own right and an expert in the no-hit department, was on the short end of the Rangers' 6-0 triumph. He was the victim of Jeff Burroughs' grand-slam home run and Bill Sudakis' solo blast, both in the first inning.

Getting a no-hitter is new to Bibby—but getting close isn't. He's thrown a one-hitter, a two-hitter and a pair of four-hitters since coming to the Rangers in a June 6 trade with the National League's St. Louis Cardinals.

In the rest of the American League, the Chicago White Sox belted the Minnesota Twins 9-1, the Boston Red Sox edged the New York Yankees 4-3 and the Detroit Tigers held off the Baltimore Orioles 4-3.

White Sox 9, Twins 1

Jim Kaat entered the game at Minnesota's Metropolitan Stadium with a 29-10 lifetime record against Chicago. Now it's 29-11.

The White Sox sent Kaat to the showers with a four-run sixth as Pat Kelly walked, Jerry Hairston tripled, Bill Melton singled and Buddy Bradford tripled.

Red Sox 4, Yankees 3

Jim Ray Hart's ninth homer of the baseball season, a two-out shot in the top of the ninth, averted a defeat for the Yankees—but only temporarily. In the bottom of the ninth, Rico Petrocelli, who had hit a two-run homer earlier, led off against New York's ace reliever, Sparky Lyle, with a single, took second on a wild pitch, moved to third on a grounder and came home on Rick Miller's single, giving the Red Sox a 4-3 victory.

Tigers 4, Orioles 3

John Hiller saved Detroit's 4-3 victory with a "pitch that never got there."

With two men on base, Paul Blair of the Orioles struck out on a ninth-inning changeup which bounced in front of the plate. The Tigers' ace reliever replaced Mickey Lolich after Andy Etchebarren's two-run homer had cut into a lead built on solo homers by Dick McAuliffe, Duke Sims and Jim Northrup.

In the National League, Montreal swept a doubleheader from the New York Mets 1-0 and 5-2 in 10 innings, Philadelphia nipped Pittsburgh 1-0, the Chicago Cubs downed St. Louis 3-1, Atlanta ripped Houston 7-3 and Los Angeles beat San Francisco 5-2.

Corwin Resigns

OAKLAND (AP) — Tom Corwin, 30, resigned Monday as traveling secretary of the Oakland Athletics and was replaced by Jim Bank, 23, of Tuscaloosa, Ala., the baseball club announced.

Corwin, a native of Gary, Ind. had been traveling secretary for 4½ years and prior to that worked for a year in the club's public relations department.

Teen Playoff Is Postponed

The area Teenage League playoff tournament slated in Colorado City todat has been postponed until tomorrow due to a wet field. The Snyder Dodgers will meet Kermit at 6:30 p.m. Wednesday, followed by a clash between Colorado City and Sweetwater.

Coach of the Snyder team is O.D. Brewer. The roster includes Garry Greenlee, Pat Dryden, Mike Clifton, Barry Blalock, Roy Villanueva, Kevin Wright, Mark Mueller, Mike Dorman, Marcus Anderson, Brad Browning, Keith Early, Dennis Gary, John Hopkins, Randy Shipp, Nicky Chapman, Randy Gressett, Phil Robinson and Ricky Beard.

Matuszak Too Big For Bed

KERRVILLE, Tex. (AP) — John Matuszak, pro football's No. 1 draft choice, brought his 6-8, 292-pound frame to the Houston Oiler training camp here Monday and found he had no trouble fitting in—EXCEPT IN HIS BED.

Matuszak, who has been at the College All-Star camp, took part in the Oilers' long afternoon workout and pronounced himself satisfied with everything but his sleeping accomodations.

"I've got to find a bigger bed," he said.

But Lewis Mangum, Oiler controller, said unfortunately Big John has the biggest there is a six-foot-eight special.

"I got into the workout quite a bit, but there's always a problem of terminology the very first day," Matuszak said. "As far as physically, I'm up with everybody else. But mentally, it's going to take a few days to adjust. But I'll be ready Friday."

That's the day the Oilers open their 1973 exhibition season against the New York Jets in the Astrodome.

Oiler Coach Bill Peterson said he expects Matuszak will play, as well running back George Amundson and defensive back Joe Blahak, Oiler rookies who, like Matuszak, spent three weeks in Chicago for the All-Star game.

Now it's the white mink saddle cover. New York jockeys' valet Dick Meade had four made up from his wife's stole — with her permission. He sold one to Robyn Smith, two to Jean Cruguet for use in France, and one to Eddie Belmonte.

Abilene Rallies, Nips Eastern 6-4

Abilene Dixie—the team that eliminated the Snyder All-Stars from the playoffs—is going to represent this region in the State Little League tournament. They earned that right last night with a 6-4 triumph over a talented Lubbock Eastern team here in Towle Park.

Trailing 4-3 going into the last inning, the Abilene All-Stars won the game on a 3-run home run by third baseman Bobby Mize, whose blast scored Tracy Thomas and Mike Hopkins ahead of him. Thomas had reached first on a single and Hopkins got on on a fielder's choice.

Lubbock had gone ahead 4-3 in the bottom of the 3rd inning on a two-run home run by catcher Darrell Lewis. His shot scored Kelvin Lusk, who singled ahead of him.

Abilene scored first in the initial frame on a single by Mize, a walk to Mike Anderson and an error by the catcher. Lubbock took the lead in the 2nd, 2-1 on a homer by Curtis Neleon, a fielder's choice that allowed Emmitt Dedrick on base, and a run-scoring single by Darrell Green.

Abilene tied it up in the top of the 3rd on another solo home run by Mize who led the Dixie team at the plate with 3 for 4.

The victors cut the margin to 4-3 in the 4th. With two away Tracy Thomas reached first on a fielder's choice, moved to second on another fielder's choice, and scored on a single by Ron Downing.

Thomas was the winning pitcher, and he went the distance. He seemed to have a little something extra on the ball when he got into a jam. Neleon relieved Darrell Green for Lubbock in the 5th and he was charged with the loss.

Each team made only two errors. Both teams are outstanding and either one would have made a fine representative for this region at the state tournament.

With strong pitching and potent hitting, the Dixie team could win state.

ABILENE	101	103	6	7	2
LUBBOCK	022	000	4	4	2

Since 1937, when the Belmont Stakes chart first showed the position of horses at the quarter-pole, only one winner has been as far back as fifth at that point. That was High Gun in 1954.

Cage Recruiters Busy In Texas

By DENNE H. FREEMAN
Associated Press Sports Writer

DALLAS (AP) — Highland Park Coach Bo Snowden, who is the mentor for the North in Wednesday night's Texas High School Coaches Association All-star basketball game, says Texas schoolboy basketball is improving to the point where out-of-state recruiters are hustling hard for Lone Star talen.

"A lot of schools from out of state are really coming in here now," Snowden said. "The Southwest Conference, of course, has had to raid other states for years. But the quality of players in Texas is getting better and better."

Of the players on Snowden's squad, Tate Armstrong of Springwoods, has signed a letter of intent with Duke. Another player who was supposed to come but did not show up was Ronald Taylor of Midland, who is Nebraska-bound.

On the South squad, Danny Van Rheen of Deer Park is going to Missouri while Drake has snared Huey Smith, a big forward from Houston Lincoln.

Snowden said integration was one key to improved schoolboy basketball play in Texas.

"Integration is one reason we have better athletes," Snowden said. "We also have better facilities and we play an exciting run and shoot brand of basketball in Texas. This excites fans and makes kids want to participate. Of course, the coaching is probably getting a little better, too."

Snowden doesn't plan to disappoint the fans who show up for the All-Star title in the Dallas Convention Center. He'll run a three-guard offense.

In fact, the game is likely to be dominated by the guards whereas the big men have gotten the headlines in years past.

"There's not a bad guard on either ball club, Snowden said. "This is one game where the guards should shrine."

South Coach Reggie Davis of Midway agrees.

"Neither team has a weak guard," Davis says.

Snowden's club will run a fast-break offense and a half court or full court press against the South which run a controlled offense.

"We'll be fast-breaking every chance we get," Snowden said. "As the game gets going they'll (the South) probably start running. We sure as heck want to get them to run with us."

Rain has peppered the North-South football workouts but the cooler weather has just served to pep up the teams rather than slow down the drills.

Jerry Micksy, of Richeyville, Pa., and Rick Sherkel, of Madera, Pa., will co-captain Penn State's 1974 baseball team.

$175,000 FOR A USED CAR FULL OF HOLES—Peter A. Simon a 22 year old casino owner from Jean, Nev., bought the "Bonnie and Clyde Death Car" for $175,000 making it the highest priced antique car in the world. The car was auctioned off at the Bay State Antique Automobile Exposition in Princeton, Mass., along with a few hundred others. (AP Wirephoto)

Girls Are Working For Trip To See Elvis

DENISON, Tex. (AP) — Two Calera, Okla. teen-agers, with a yen to see one of America's aging singing idols, Elvis Presley are just $115 short of the trip. But they hoped to go over the top with a garage sale.

The girls are Kay McVeigh, 18, daughter of Mrs. Aretha Barrett of Calera and Robert McVeigh of Denison, and Debbie Wasson, 15, daughter of Mr. and Mrs. A. K. (Bud) Wasson of Calera.

When they learned Presley would be in Las Vegas, they figured that would be a cinch place to see him personally. So they asked their parents if they could earn the money could they go.

"At first they said yes," said Debbie. "But when we had really got busy and worked, then they had some doubts. Now they have told us if we don't reach our goal of $500 for the trip, they just might help out."

Since school has been out, the girls have worked at any kind of a job. They have washed cars, cleaned houses, mowed lawns, worked as baby sitters, washed the windows in the Madill Courthouse and even painted a six-room house.

"We got $100 for the job and it took us a week," the two girls said. "But they were really pleased with our work."

They finished that work up Friday and now are planning the garage sale with a collection of odds and ends they have gathered from some of the cleaning jobs they have been on.

"We took anything people didn't want and were going to throw away," the two said.

Debbie and Kay have reservations at the Las Vegas Hilton Aug. 6-9. They will share a $33 a night room.

"We don't plan to gamble except maybe put a dollar or two in a slot machine," said Kay.

A Madill newsman, Wilbert Wiggs, talked to officials at the Las Vegas Hilton and told them what the two girls had been doing.

Apparently, the girls are in for a surprise when they get to Vegas, because the hotel said they would work out details of a meeting between the two and their idol.

That news has the Oklahoma teen-agers on cloud 9.

Ship's Crew Is In Fight

PORT ARTHUR, Tex. (AP) — Charges were pending today against seven Chinese sailors arrested Monday at this Southeast Texas port after a fight with U.S. Customs agents.

U.S. Attorney Lum Hawthorne said late Monday he was awaiting instructions from the Justice Department on action to be taken against the men who had not been identified.

Hawthorn said the fight began about noon when customs agents attempted to confiscate what appeared to be foodstuffs smuggled aboard the M. V. Collin, a British flagship loading wheat for export to the Soviet Union.

Port Arthur police said they used MACE to subdue crew members who were attacking the federal agents.

Officers said they were trying to identify the men, who do not speak English, with the help of the ship's captain, Patrick John Sullivan.

The crew reportedly is from Hong Kong.

Woman Charged In Riot Admits Claims Untrue

DALLAS (AP) — The 34-year-old Dallas black woman charged with inciting to riot a growing crowd by saying, "Dallas police killed my son," has admitted she lied, police say.

Officers said Mrs. Betty Jean Zepher, Monday said in a sworn statement she fabricated accusations over a police loudspeaker Saturday merely because "she got excited and people were listening to her."

A detective close to the case said Mrs. Zepher grabbed a microphone from City Councilman Pedro Aguirre and jumped atop an unmarked police car.

That was when the woman, presently listing her named as Betty Jean Baker, made statements about her "son's death," police said. Police records, however, indicate she has no immediate family.

Her statement, police said, is part of a routine investigation into the incident, Capt. Jack Davis of the Crimes Against Persons division said Monday.

Officers said the man she described as her close friend, David Baker of Dallas, was arrested last Tuesday for questioning regarding stolen credit cards. She told officers Saturday she was en route to the city jail to take him cigarettes when the disturbance broke out around her.

"She had been drinking heavily," one officer quoted the woman as saying.

Excited by the crowd, officers said, she began screaming about the police and people in the crowd began to listen. She jumped to the top of the car, caving in the roof and screamed, "Kill the pigs!"

Officers, quoting what they said was the woman's affidavit, said she then went to a Main Street bar when she heard the sound of breaking glass behind her.

Police said she was arrested as she attempted to reach through a shattered Neiman-Marcus window.

Mrs. Zepher was held in city jail today in lieu of $4,000 bond under a charge of inciting to riot and two charges of destruction of private property.

A member of the Dallas police said her record reflects that she twice has been charged with murder, convicted once and served 18 months of a three-year sentence. She then was transferred to Rusk State Hospital, where the state sends most of its criminally insane.

Of Mrs. Zepher the officer said, "She's been in trouble since she was a kid."

R.D. PIERCE

Sales Chief Named Here

H.L. Holtzendorf, executive vice president of World Wide Homes, Inc., has announced the appointment of R.D. Pierce as sales manager of World Wide's new location at 5111 College Avenue in Snyder.

Pierce and his wife, Barbara Ann, are life-long residents of Snyder and live at 2703 Avenue U, along with their four daughters, Dee Ann 16, Charlotte 13, Becky 10, and Sherry 3.

Rains Hit North Areas Of Nation

By THE ASSOCIATED PRESS

A few thunderstorms rumbled across the northern parts of the nation today and lingered off the east Gulf and south Atlantic coasts.

Elsewhere skies were generally clear with most temperatures in the 60s and 70s before dawn.

As a heavy thunderstorm rolled over Chicago, three young men drowned when their rowboat capsized on the Chicago River.

Rain measured 1 inch at Quincy, Ill., and Panama City, Fla., just after midnight.

A funnel cloud was sighted in northeastern Colorado, but no injuries were reported.

Fog shrouded the South Pacific and north Atlantic coasts early today.

Temperatures dawn ranged from 52 at Eureka, Calif., to 95 at Needles, Calif.

Some other reports: Anchorage 55 cloudy, Atlanta 71 clear, Boston 70 clear, Buffalo 62 clear, Chicago 73 thunderstorms, Cincinnati 64 clear, Cleveland 61 partly cloudy, Dallas 79 partly cloudy, Detroit 63 clear, Honolulu 79 partly cloudy, Indianapolis 67 clear, Kansas City 76 clear, Los Angeles 62 partly cloudy, Louisville 70 clear, Miami 77 partly cloudy, Minneapolis—St. Paul 67 partly cloudy, Nashville 75 cloudy, New York 73 clear, Philadelphia 71 clear, Phoenix 87 partly cloudy, Pittsburgh 60 clear, St. Louis 75 partly cloudy, San Francisco 54 clear, Seattle 60 clear, Washington 72 clear.

Device To Record Handling

CLEVELAND, Ohio (AP) — A Cleveland firm says it has invented a device that will record how roughly a package is handled — and where serious shocks occur.

Impact-O-Graph Corp., a company that has been building impact recorders for about 20 years, said the new device weighs about one ounce and that it can be produced for as little as $1 apiece.

Top Posts Vacant In China Army

By PETER T. SUM
Associated Press Writer

TOKYO (AP) — The Chinese army marks its 46th anniversary Wednesday with its top posts still vacant after Defense Minister Lin Piao's abortive 1971 palace coup.

China has been without a defense minister and the army without a chief of its general staff since Lin, his wife, son and some close supporters died in September 1971 in a plane crash in Mongolia.

Premiere Chou En-lai said later that Lin, who was Mao Tse-tung's designated heir, was fleeing to the Soviet Union after a plot against Mao's life misfired.

At the time Lin died, Huang Yung-chen, chief of the general staff, and Wu Fa-hsien, air force commander, disappeared from public view. Unconfirmed reports say Huang was purged for collaborating with Lin and Wu died in the crash with the defense minister.

Nationalist Chinese sources in Taiwan claimed last year that Lin's death was followed by a four-month purge of the armed forces in which more than 34,000 officers and enlisted men were court-martialed.

Peking has neither denied nor confirmed the claim. But it has been carrying on a campaign reminding Communist party members and army men of Mao's teaching that the party controls the army and not the other way around.

There has been no indication who will replace Lin Piao as defense minister. Many of his duties have been taken over by Yeh Chien-ying, a 75-year-old Communist veteran who is a vice chairman of the party central committee's military commission.

Judge Rejects Dancer's Claim

BIRMINGHAM, England (AP) — Diane Hemming, 31, lost her suit for damages resulting from a dog bite which she claimed had ruined her ability to dance properly.

Rejecting her claim, the judge said the dog had been generally "amiable" and the attack was "completely out of character."

Limited Supply Of Meat Is Seen

WASHINGTON (AP) — Domestic supplies of red meat for the rest of the year are not expected to exceed the supply of the last six months of 1972, the Agriculture Department Outlook and Situation Board says.

The board's predictions, announced Monday were much more pessimistic than those offered earlier in the day during a press briefing by Agriculture Secretary Earl L. Butz, who contends the long range livestock situation is in good shape.

Butz said, "the cattle are out there," with farmers taking advantage of good range conditions and also delaying taking their animals to slaughter because the freeze on retail beef prices will not be lifted until Sept. 12.

The secretary, who referred to beef as "our national meat," said a glut on the fall market is possible and that could cool high prices some.

The two major points Butz and the situation board agreed on were a prospect for more beef on the hoof headed for slaughter next year and still-high consumer demand, which worked out to 115 pounds per person last year.

The board summarized the outlook for livestock and meat this way:

—Beef output will be down a little, and pork production will be about the same as it was the end of last year.

—With a 9 per cent smaller lamb crop, and a 15 per cent drop in summer and fall slaughtering, the output of veal, lamb and mutton will be down sharply.

—Larger beef imports will not be enough to offset reduced domestic supplies.

—Rising feed costs, bad weather, the consumer boycott and government price controls led to reduced domestic supplies and high prices.

CLIMBING FOR A BETTER VIEW—A third fan tries to shimmy to the top of a 30-foot pole to better his view of the rock concert in progress at Watkins Glen., N.Y. "Summer Jam," Saturday night. The point of wood jutting into photo at left is the 12-foot high stage, upon which three bands entertained nearly 600,000 people.

Small Trade Surplus Is A Possibility In 1974

By R. GREGORY NOKES
Associated Press Writer

WASHINGTON (AP) — Government trade analysts say the United States might have a small trade surplus in 1974, reversing a trend that began in 1971 when the value of imports exceeded exports.

The analysts credit the turn around to the two devaluations of the U.S. dollar and a worldwide economic boom that has led to a rising demand for U.S. goods.

The country's trade picture has been improving rapidly and a Commerce Department analyst has declared as outdated a 1973 trade-deficit forecast made just two weeks ago. The analyst said later figures indicated the deficit could be much smaller than the previous estimate of $2 billion to $4 billion.

The country had a quarterly trade surplus of $22.9 million from April through June, the first quarterly surplus since early in 1971.

Exports during the first six months were up about 31 per cent over last year, to an annual rate of $64.5 billion, while imports were up about 19 per cent, or an annual rate of $66.2 billion, which would lead to a 1973 deficit of about $1.7 billion.

U.S. trade was in deficit in 1971 and 1972 for the first time in modern history. A major goal of the devaluations was to improve the country's trade balance and balance of payments position by increasing the cost of imports and reducing the cost of exports.

The flow of U.S. dollars abroad to cover trade and payments deficits flooded the world with a surplus of dollars and was believed largely responsible for international monetary instability.

But the benefits of a trade surplus, if it occurs, will not be immediately apparent to most Americans.

Because of the devaluations, prices of imported goods, such as transistor radios and foreign cars, have gone up, but so have domestic prices because of domestic inflation.

The result is that the consumer pays more for everything.

By slowing the exodus of dollars abroad, the government also hoped to build confidence in the dollar overseas, which may serve to slow inflation at home.

The devaluations had the effect of making the dollar cheaper, because it took less of a foreign currency to buy a dollar than before, or, conversely, more dollars to buy a foreign currency.

Administration economists estimated the dollar declined in value in comparison to key to European currencies by 25 per cent this year alone.

The first silkworms to be introduced to the new world came from China.

Nomination Of Gregory Is Due

WASHINGTON (AP) — James B. Gregory, a retired oil firm executive now active in charitable work, will be nominated administrator of the National Highway Traffic Safety Administration.

The White House announced on Monday that President Nixon would nominate Gregory, 48, to succeed Douglas W. Toms, who resigned the $40,000-a-year job on March 31.

Gregory managed environmental sciences for Union Oil Co. of California until last year, when he retired after 21 years with the firm.

Artificial Heart Raises Questions

By WILLIAM STOCKTON
AP Science Writer

WASHINGTON (AP) — The long quest to construct an implantable artificial heart, drawing steadily closer to realization, raises a disturbing number of questions, a panel of scientists has warned the government.

Some of the moral, ethical, legal and social questions have the potential for emotion-charged controversy. The scientists said these issues should be resolved before the artificial organ is made available to the estimated 50,000 people whose lives it might save each year.

An advance copy of the National Heart and Lung Institute report, which will be published in two months, was obtained by The Associated Press.

The NHLI is spending about $5.7 million this year on artificial heart and related research and has put at least $36 million into the project since its inception. The Atomic Energy Commission is spending $2.2 million this year and has spent a total of more than $9 million since 1967.

A totally implantable artificial heart is now being tested in animals. The report said it might be as much as 10 years before such a device is generally available to the public, but limited human experimentation may be much closer.

We believe that development of the totally implantable artificial heart should proceed," the 10 lawyers, doctors, sociologists, ethicists and political scientists said.

But they listed a series of issues that must be resolved that included:

—Cost. At $25,000 per patient, the artificial heart will strain current health care financial systems. Unless financial support is made available to all who need the artificial organ, it may become a life-saving device accessible only to the rich.

—Selection of recipients. Once the organ becomes clinically available, it is unlikely there will be sufficient hearts, implantation teams or medical centers immediately to accommodate everyone who would die otherwise. Selection should be made on a medical basis only, resorting to lottery in case of shortages for patients with equally dire medical situations. In no case, the panel urged, should patients be selected on the basis of "social worth."

—The definition of death. How will doctors determine the point of death for persons with a mechanical pump that can continue circulating blood after other organs have died, the panel asked. Doctors and lawmakers should begin now to resolve the legal questions, the report said.

Injunction To Halt Scheme

AUSTIN, Tex. (AP) — Atty. Gen. John Hill said Monday his office has won a permanent injunction against a pyramid marketing scheme involving the sale of pantyhose.

The order by state District Court Judge Noah Kennedy of Corpus Christi against Fashel of Texas, Inc., was the first obtained by Hill under the new Deceptive Trade Practices Act passed by the 1973 legislature.

Sixteen individuals also were named in the injunction order.

Kennedy assessed $2,000 in civil penalties against the defendants and ordered them to make restitution of $3,150 to three Corpus Christi men who had purchased distributorships. Hill said the Corpus Christi and Harris County district attorneys and the Corpus Christi police department took part in the investigation.

Kennedy's order instructed the defendants not to engage in a marketing scheme in which financial gains were dependent on continued recruitment of other participants.

Vienna Has Rolling Lab

VIENNA (AP) — A rolling laboratory equipped with the most modern technical devices is now cruising through the Austrian capital to speed up and facilitate the enforcement of the new environmental laws.

The laboratory examines samples of Vienna's air and water, and monitors the regulated noise level of construction machinery. It also checks on the emissions of Vienna's municipal buses, which run on a nonpolluting fuel mixture, and on the noise made by the city's garbage trucks.
