PANHANDLE'S FIRST COUNTY JUDGE DIES IN INDIANA

Rev. Emanuel Dubbs, aged 89, buffalo hunter, first county judge in the Panhandle, Christian minister, Indian fighter, Treasurer of Donley county, and all around good citizen, died Saturday at his home in Milford, Ind. The remains were brought to Clarendon that he might be buried by the side of his first wife, who died in 1911.

Funeral services were held at Clarendon Wednesday, conducted by his grandson and namesake, Rev. Emanuel Dubbs, pastor of the First Christian Church at Drumright, Okla.

Bro. Dubbs had a number of friends in this community who have known and esteemed him for many years.

All the New Beads and Ear Screws to match.

B. & B. Variety Store.

CARD OF THANKS

We wish to take this means of thanking the good friends who were so helpful and kind to us during the sickness and after the death of our beloved little son and brother.

We trust you will have as good friends in your times of sorrow.

A. L. Wall and Family.

CREAM WANTED!

Sell your Cream to Independent cream buyers. If you will stop to consider, it's the big boys that have put our country on the bum today.

We own our own equipment, and therefore we believe we can pay you more for your butter fat.

Let us have your next can.

Eads Produce Co
Phone 167.

R. W. Alewine and Ed Z. Gordon attended a district meeting of the Rural Letter Carriers at Childress Tuesday afternoon. A good attendance was present and they had an interesting discussion of the things Congress is trying to do to the Postal Service at the present time.

G. W. Johnson, from Vance, Arkansas, is visiting in the home of his son, G. L. Johnson.

MARRIED

Luke Armstrong put one over on his Hedley friends some three weeks ago, by going down into Wise county and getting married. His bride was Miss Crawford, a member of a prominent family of that section. Our good wishes are cordially extended.

We still have ladies' Spring Hats, men's Straw Hats, and boys' and youths' Caps.

B. & B. Variety Store.

Mrs. A. T. Simmons, Mrs. W. H. Moffitt and Tommie Moffitt motored to Amarillo one day the past week.

BABY CHICKS

All varieties, from State Accredited flocks.

Immediate delivery
Clarendon Hatchery,
Clarendon, Texas.

Louis Youree has been quite sick the past several days at the home of his mother, Mrs. W. T. Youree. We were glad to hear yesterday that he was better.

REVIVAL MEETING CLOSES AT CHURCH OF CHRIST

The series of meetings at the Hedley Church of Christ were brought to a close last Sunday night, after having accomplished much good in the community.

A baptismal service was held Sunday afternoon, at which two were baptized.

Two members were added to the local church, and the entire membership was refreshed and strengthened.

Brother Hukel is recognized as a great preacher and is highly esteemed by our people.

CABBAGE AND TOMATO

Plants, 25c per hundred

W. G. Brinson.

W. T. Hall returned the past week from a visit to relatives and friends in Wise county. We understand that he is telling some tall fish stories since his return.

JOHN LIONEL WALL

Little John Lionel Wall, sixteen months old son of Mr. and Mrs. A. L. Wall, passed away at the Northwest Texas Hospital, in Amarillo, last Saturday morning about 11 o'clock. The little fellow had suffered about three weeks from a throat affection, the exact nature of which was never determined.

Funeral services were held at the home Sunday afternoon with Elder D. L. Hukel in charge. Interment was in Rowe Cemetery.

Surviving him are his parents and three sisters, Wauline, Ione and Louanne. To them we extend our sincere sympathy.

Among the out of town relatives who attended the funeral were: L. A. Wall and family of Quail, J. A. Sanders and wife of Clarendon, C. H. Grooms and family of Naylor, Edgar Weed and wife of Amarillo, Mr. and Mrs. Weldon Marcum and baby and Mr. and Mrs. Caldwell of Estelline, R. L. Lamberson and family of McKnight.

DISTINGUISHED VISITOR

Hon. John F. Grant, Houston lumberman and Republican nominee for Governor of Texas, was a visitor in Hedley for a short time some days ago, and in company with Postmaster Everett made this office a pleasant call.

Mr. Grant impressed us as a genial gentleman, with a clear understanding of public affairs, large and small, and he makes some splendid suggestions concerning our State government.

Mr. Grant believes that the Republican party is destined to grow stronger in Texas, and that such growth will be to the best interests of the people.

G. R. HARDWICK

G. R. Hardwick, who lived on the S. S. Adamson farm north west of town, died at the Adair Hospital at Clarendon Tuesday afternoon, following an operation for appendicitis. Mr. Hardwick was about thirty years old, and is survived by his wife and one child.

Funeral services were held at the Nazarene Church at 2 o'clock Wednesday afternoon by Rev. W. R. McClure, with interment in Rowe Cemetery.

Mrs. Walker Lane and daughter, Beulah, of Wichita Falls and Otis Alexander and family of Barkburnett visited in the J. P. Alexander home Sunday.

Every Day IN THE WEEK

we are on the job to serve you in the grocery line. We surely appreciate your business, and our constant aim is to please our customers.

News Review of Current Events the World Over

President and Congress in Jam Over Reduction in Expenditures—House Passes Bill Giving Philippines Independence—Senate Faces Struggle Over Revenue Bill.

THE battle for reorganization of government bureaus and agencies and for a general reduction in expenditures developed into a partisan struggle in congress with President Hoover's proposals under attack. The President led off with a special message to congress, in which he said that while a further reduction of \$200,000,000 in expenditures, in addition to the billion dollars of new taxes, would be required to balance the budget, an even greater saving could be accomplished by consolidation of bureaus and boards, by reform of administrative methods, by abolition of "less necessary functions," and by temporary suspension of other activities.

President Hoover

Inasmuch as so far reaching an economy program would require the repeal and amendment of a multitude of existing laws, he proposed that the preparation of a comprehensive plan be assigned to a commission composed of senators, congressmen and representatives of the Executive.

The President's proposals met with immediate opposition on the part of Democrats in both houses, and a demand that the Executive submit specific recommendations for the reduction of expenditures. Speaker Garner declared that it was too late to create new commissions and assured the President that any specific recommendations he has to cut expenses will get quick action in the house.

In reply to the opposition voiced against his message, the President in a later statement said: "What I asked for in my message was organized, nonpartisan co-operation by all forces to reduce government expenses in the national emergency which insistently demands relief for the taxpayer."

"What I have asked for is not a commission, but that the senate and house delegate representatives to sit down with representatives from the administration and endeavor to draft a national economy bill."

Continuing, he said that without such action he saw no way by which there can be a maximum reduction in expenditures.

The comeback to this was that if the President failed to present definite proposals for a reduction in expenses the Democratic leaders would present a plan of their own.

Senator Jones, Washington, Republican, acting on the President's proposals, introduced a joint resolution in the senate to create a commission of three senators, three representatives and three officials of the administration to draft an economy program and report within thirty days. It would not only suggest where appropriations should be slashed, but also recommend consolidation and elimination of government bureaus and agencies.

The resolution met instant opposition in the senate.

The major senate contest over the billion dollar tax bill, now the subject of hearings before the senate finance committee, will probably develop with the move already started by independent members of both parties to boost the surtax rates on the higher incomes to a figure above the 40 per cent maximum voted by the house. That a determined effort will be made to restore the manufacturers' sales tax to the revenue bill is a certainty. That it will be accomplished is a foregone conclusion.

The importance of government salary cuts in the economy scheme has been emphasized in support given the idea by Senator Robinson, the Democratic leader, and Senator Harrison, Democrat, Mississippi. The latter forecast with regret, that a general slash was likely to materialize.

The house special economy committee has approved bills to dispense with the army and navy transport service with an asserted annual reduction in expenditures; to postpone indefinitely part of the government's big construction program in the capital at a saving of \$750,000; and to establish the international water commission. This is all the consolidating and disengaging yet recommended by the committee.

Both the house and senate appropriation committees continue to trim each bill down to the bone.

INDPENDENCE for the Philippines, an agitated issue for three decades, is made possible by a bill which passed the house by a vote of 306 to 47, giving freedom to the islands. Not a Democratic vote was cast against the bill, and only two Democrats were paired in the negative. And on the Republican side the 47 who voted "no" were more than doubly matched by 119 who voted "yes." The Democratic total for the bill was 196 and the single Farmer-Labor vote was in the affirmative.

The bill agreed to provides for complete freedom for the Philippines after the islands have adopted a suitable constitution and undergone a probationary and semi-autonomous period of eight years, during which tariff ex-

ports to the United States shall be limited to present levels and immigration restricted to 50 persons annually.

On the fourth of July following the conclusion of the eight-year period, American sovereignty is to be withdrawn without any native plebiscite as provided in other measures. The United States will reserve only the right to retain certain naval and military bases.

THE senate finance committee presided over by Chairman Smoot, has opened its hearings on the billion dollar revenue bill passed by the house. A veritable avalanche of applications for hearings have been received by the committee.

Reed Smoot

Secretary of the Treasury Mills was the first witness at the hearing. He offered suggestions to eliminate defects and criticisms in the house measure.

Senator Reed of Pennsylvania, Republican member of the committee, began a drive to line up support for a general manufacturers' sales tax in the new revenue bill.

After informal discussions with Republicans and Democrats, Reed announced prospects for inserting a sales levy, similar to that rejected by the house, were by no means as unfavorable as forecast.

He will offer the sales tax amendment to the finance committee, of which he is a member, if he finds the proposal has a chance to pass. Excise taxes substituted by the house for the sales levy were described as "cock-eyed sales taxes." The sales tax, he held, is equitable and fair.

NEW YORK STATE'S primary was a walkover for the Roosevelt and the Hoover tickets in the lone Democratic and the Republican contests.

In the Democratic contest, in the forty-first congressional district in Buffalo, supporters of Gov. Franklin D. Roosevelt swamped a ticket favoring to former Gov. Alfred E. Smith by better than 2 to 1.

The Republican contests were in New York city and in Brooklyn. Delegates favorable to the renomination of President Hoover won by approximately 18 to 1 in one and by about 4 to 1 in the other district over supporters of Joseph I. France of Maryland.

There was no opposition to the regular tickets anywhere else in the state. The Republican delegates to the national convention will support the President. Most of the upstate Democratic delegates are Roosevelt supporters, but the powerful Tammany bloc has not announced its stand.

SENATOR ALFRED W. BARKLEY of Kentucky will deliver the keynote address for the Democratic party when the national convention meets in Chicago on June 27. His selection was made by a subcommittee of 23 national committeemen in an all-day session in Chicago. J. Mott Shouse of Kansas City, who was Senator Barkley's chief rival for the honor, is to be recommended for permanent chairman of the convention.

Mr. Shouse, who is executive chairman of the national committee, issued the following statement at the close of the meeting:

"By unanimous action of the committee it was decided to recommend to the national committee, to be in turn recommended to the convention, the selection of Senator Barkley for temporary chairman and the selection of Mr. Shouse as permanent chairman of the convention.

"Our conference was one of the most harmonious ever held."

INFERIATED by months of distress from unemployment and disaffection with the government policy, a mob of 10,000 stormed the house of assembly at St. John's, Newfoundland, and forced the resignation of the government. Windows were smashed and public documents strewn in the streets.

Police were powerless in the demonstration. World war veterans then took charge of the situation and succeeded in partially restoring order. Citizens obeyed only the World war officers and the veterans under them on the streets of the capital, while most of the police were hotted up in the assembly building by the irate mob which milled outside.

The war veterans closely guarded the residence of Premier Sir Richard Squires, who narrowly escaped serious injury in the riot when he was aided to his home by three clergymen, who quieted a small portion of the mob which recognized the premier as he was hurried away.

THERE will be no "discussion or negotiation" on the question of European debts by Secretary of State Stimson during his visit to Geneva, was the emphatic declaration of President Hoover.

Secretary Stimson

Stimson's visit is solely in the interest of securing concrete and definite results from the general disarmament conference, even though those results may not be revolutionary in character, the President said.

"The world needs, both economically and spiritually, the relief that can come from some degree of successful issue by the disarmament conference," the President said.

"Some two months ago I presented ideas which I believed would contribute to a solution of some of the problems, and which were incorporated in the general program.

CLEAR signals were visible during March that important results were following from the co-ordinated plans of public agencies and private finance to bring about basic improvement in the condition of business, the American Bankers' Association Journal says in its monthly review.

It notes that, although immediate stimulations in current commercial and industrial activity were lacking and favorable trends in standard trade indexes were not apparent, growth in financial confidence and decrease in public fear were "too definite to be based on anything but solid facts and carried greater weight than formal statistics."

Concrete expression of a return of financial confidence was given for a period during March in the bond market, which evidenced a relaxation in the pressure of financial distress and fear, and a turn in the direction of safety and confidence, the Journal says.

"The most important aspect of business betterment has been the widespread return of the banks to more normal operating conditions," it says, attributing this to the Reconstruction Finance corporation and other co-operative arrangements for assisting both closed and operating banks that are "clearly having the desired effects."

ASSISTANT ATTORNEY GENERAL Seth Richardson, in a report to the senate, described police administration in Honolulu as "impotent, undisciplined, neglectful and unintelligent."

The report was in answer to a senate resolution cutting for information on law enforcement in Hawaii. It followed the wave of criticism in navy and congressional circles over the reign of terror in the islands, and particularly in Honolulu, brought to light by the attack and assault by five natives upon Mrs. Tralin Massie.

Mr. Richardson recommended the appointment by the President of a territorial police head for the entire territory, with full power of control and organization, and similar appointment of an attorney general to be the public prosecutor.

Regarding conditions in general, Richardson reported:

"We found no organized crime, no important criminal class, and no criminal rackets. We did not find substantial evidence that a crime wave—so-called—was in existence in Honolulu. We did find, however, ample evidence of extreme laxity in the administration of law enforcement agencies.

"We believe that a continuation of such laxity is fraught with much social and political danger."

THE pinch of national economy prompted Senator Pat Harrison of Mississippi, ranking Democrat on the finance committee, to issue a declaration against full payment of the veterans' bonus certificates. Citing the \$2,000,000,000 deficit in prospect for the government this year and the pending bill to raise new taxes, the senator in a letter to veterans of his state said:

"I regret that existing conditions impel me, in the interest of the country, to oppose the legislation at this time."

The stand taken by Senator Harrison, coupled with the known view of other senate leaders, is believed to doom any prospect of enactment into law of the bonus payment measure.

In his statement the Democratic financial leader of the senate pointed out that \$1,000,000,000 of the \$1,000,000,000 government budget now goes to the relief of war veterans.

A DECISION which brought to a stop the congressional career of Peter C. Granata of Chicago gave the Democrats of the house a full vote lead over their Republican opponents.

Granata was voted out and Stanley H. Kunz was voted in by the house members. It was a decision on an election contest brought by the latter, the Democratic congressional candidate in the Eighth Illinois district, against the Republican who had been seated at the outset of the session on the strength of his certificate of election.

The standing of the parties in the house now is: Democrats, 221; Republicans, 211; farmer-labor, 1; vacancies, 2.

CONSISTENT COOKERY . . . with a Modern Electric Range

YOU CAN eliminate the disappointment of cooking "failures" . . . can be assured always of perfectly cooked, attractive and appetizing foods . . . can feel secure in the knowledge that your every meal will please the most particular—by entrusting your cooking responsibilities to the never-failing Electric Range!

Results obtained this modern way are ever the same, because Electric Cookery is scientifically accurate and controlled. Thus, perfect results always can be duplicated. You merely set the controls at the proper point each time—and uniformly delicious meals are produced automatically.

And you will find that when meals are cooked electrically foods won't bake dry, flavors are not lost, sauces do not dry up, breads and cakes bake evenly, and roasts are done to juicy perfection. And because of controlled electric heat and the use of a minimum amount of water, your foods will contain all the vital mineral salts, soda ash and vitamins necessary to proper body tone.

Call in at the Merchandise Showroom and ask to see the new Hotpoint Ranges. They are moderately priced, and a convenient payment plan simplifies immediate purchase. Profit by Electric Cookery advantages, benefits and economies without delay. Call a salesman now.

Call us for an individual investigation of your use of electric service, to determine the cost of cooking by electricity in your home. You may be surprised to know that there are many cases where electric cookery actually decreases the total of electric and gas bills.

West Texas Utilities Company

"Cat Nap" Hour in a Modern Preventorium

THIS "cat nap" hour is one of the most important in the daily routine of the children at the modern new preventorium at Grasslands hospital in Valhalla. The institution is operated by Westchester county's department of public welfare as a part of the campaign to eliminate incipient cases of tuberculosis in the children. All of the sleep, work, and play of the little patients is mapped out for them.

STORY FOR BEDTIME

By THORNTON W. BURGESS

Oh, who shall say to the king, "Nay, nay?"
Not I! Not I!
Oh, who shall refuse the king his way?
Not I! Not I!
For the king is great and the king is strong,
And the king, you know, can do no wrong.

AT LEAST that is the way kings themselves seem to think. Too often they think that might makes right. You and I know better. But kings, poor things, never have had the advantages that we have. Too often they never have learned to do things for themselves, because they never have had to do things for themselves. They simply command that things be done for them. And, so, because they have this power to command, they too often have come to think that they have a right to command any thing that they please. They cannot understand that other people have rights.

It is some times this way with King Eagle. He likes fish, but he never has learned to catch them for himself. So because he likes fish and wants fish and is big enough and strong enough, he feels that he has a perfect right to take them from Plunger the Fish Hawk, and that Plunger should gladly give them up at his demand because he is the king. If he were not the king, I suspect he would be called just a plain robber. But no one thinks of calling the king a robber—that is, no one but Plunger.

When fishing is good and Plunger can catch plenty without half trying, he doesn't much mind giving up a few to King Eagle. He may grumble a little, but that is all. But when, as on this particular morning, he has fished patiently for a long time without catching a single fish, and then when he is almost ready to give up, does catch a fine, big fat fish, he thinks it rather too much to have King Eagle suddenly appear and demand that fish. So Plunger made up his mind that he would not give it up until he absolutely had to, in spite of King Eagle's orders to drop it.

Now, Plunger the Fish Hawk is a wonderful flyer, but, wonderful as he is, King Eagle is a still more wonderful flyer, and Plunger knows it. In spite of this he did his best to out-fly King Eagle. But the fish was big and heavy, and so of course Plunger could not fly his best. He dodged this way and that way, mounted high in the air and dropped suddenly, all the time working toward the Green Forest. But all the time King Eagle kept right with him without half trying, actually flapping his great wings in Plunger's very face, and all the time commanding Plunger to drop that fish. Plunger was about ready to give up when Mrs. Plunger arrived to help him. She flew in King Eagle's way and did her very best to interfere, all the time screaming at King Eagle and calling him a robber and thief and everything bad she could think of. She was trying to

make King Eagle so angry that he would leave Plunger alone and try to punish her.

But King Eagle is altogether too smart to be fooled in any such way as that. He knew exactly what she was trying to do, and he paid no attention to her except to threaten her

"Stop Fooling and Drop That Fish!" Hissed King Eagle.

with his great claws when she ventured too near. He wanted that big fat fish and he meant to have it. At first he was simply mildly threatening. He did not want to hurt Plunger. Not that he cared particularly for Plunger. He didn't. His reason for not wanting to hurt Plunger was purely selfish, I suspect. He wanted that particular fish, but he would want more fish in the future, and if he hurt Plunger and disabled him, who would catch those fish for him in the future? So his whole idea was merely to frighten Plunger into dropping that fish.

Plunger knew this, for Plunger is no fool, and so he held on and hoped with all his might that King Eagle would lose patience and give up. And at last King Eagle did lose patience, but with no intention of giving up. He began to lose his temper. Plunger saw a sudden change in the fierce eyes

"Even if you take scandal with a pinch of salt," says generous Gene. "It doesn't make it savory."

of King Eagle. They grew more fierce. Plunger's heart failed and he shivered with fear.

"Stop fooling and drop that fish!" hissed King Eagle.

With a scream of rage and disappointment Plunger obeyed. He didn't dare do otherwise. The king was no longer to be denied. It was night and not right that gave him his way.

FISH DISHES

ANY kind of fish in the market may be used with little variation for these recipes. When one can purchase a thick slice or fillet of rich fish there is little waste. A pound goes a long way. Any that is left may be used in salad, souffles, or creamed and served on toast.

Baked Fillet.

Wash the fish and wipe dry. Melt a tablespoonful of butter and brush over the fish. Sprinkle with salt and pepper and rub gently with a tablespoonful of flour. Put on the rack of a roaster, cover and bake forty minutes in a rather hot oven. The flour and butter will make a nice crust over the fish. Serve with wedges of lemon and garnish with parsley.

Broiled Fillet of Haddock.

The household will be healthier if the broiler is used more and the frying pan less. When one has a stove with a good broiler there is no reason to use a frying pan. It is the simplest thing in the world to broil your breakfast bacon, chops and steak on a broiler. It must be carefully watched, of course, but the results are worth while. Have the broiler hot, grease the rack lightly and lay on the fillet of fish—not too close to sear it, turn and cook on both sides until well done. As soon as it is placed on a hot platter pour over the fish two tablespoonfuls of melted butter and two of lemon juice. Dust with pepper and serve with a tartar sauce.

Molded Ramekin of White Fish.

Combine five tablespoonfuls of tapioca with one cupful of milk, one-half teaspoonful of salt, dash of cayenne, one-half tablespoonful of minced parsley and two and one-fourth cupfuls of finely flaked fish. Let stand five minutes then turn into greased custard cups or ramekins and bake in a moderate oven until well cooked. Unmold and garnish the top of each with a sprig of parsley. Serve with caper sauce.

THE MARKET PLACE

By DOUGLAS MALLOCH

TO THE market place of men Comes a buyer now and then With his purse of yellow gold, Money-wise and money-bold, Bright the money, brisk the trade, And the buyer, rich arrayed, Jingles, jingles everywhere Gold to make the people stare.

"First, a woman. What's the price?" "Love, and then love's sacrifice." "Are not some not bought with love?" "Yes, not worth the buying of." "I would have a child, a son." "Do you know the price of one?" "No." "The price that you must pay Leaves you lonely, old and gray."

So he goes from booth to booth, Finding some things bought with truth, Some with kindness, oft in vain, Some with sorrow, some with pain, Some with patience, some with prayer— Not a single treasure there Bought with anything as cold And as poor as yellow gold.

(© 1922, Douglas Malloch.)—WNU Service.

Australian Runner

Eileen Weirne, Australia's greatest woman sprinter, who is expected to make a strong bid for the 100-meter title in the 1932 Olympics, in which she will represent the commonwealth.

Tiered Skirts Popular for the Evening Frock

Rack interest still characterizes many of the new evening frocks, although most of them show little back above the waistline. But the intricate strappings that mark and make the back décolletage and the bows at the waistline are very interesting and almost make the frock.

This season there will be many flounced, ruffled or tiered skirts done in the manner of Worth and much liked by women always. The ruffled skirt gives a soft look that is most attractive, especially for the younger woman, by whom it should be worn.

Printed Crepes

Printed silks and cotton crepes are coming back into vogue, but cautiously. Paris has turned a cold shoulder on prints, but American designers are using them for sleeves on black crepe dresses and for vestees, gilets, or boleros.

He's Gone to Measure Cosmic Rays

PROF. ARTHUR H. COMPTON of the University of Chicago has started on a journey that will take him to the mountain ranges of Panama, Peru, New Zealand, Australia, Hawaii and Alaska and on many peaks he will try to measure the intensity of cosmic rays with the instrument with which he is here seen. The device consists of a steel "ionization chamber" containing argon. Around the chamber are spheres of lead and copper weighing 200 pounds. Through these walls of metal no other but "cosmic rays" can penetrate. The effect of the rays will be to set up an electric current in the argon. This current will be measured with an electrometer.

DAIRY

PROFIT SHOWN IN "SELLING" TO COWS

Good Method of Disposal of Surplus Forage.

Fourteen dollars worth of farm-grown feed fed to good average cows will produce \$28 worth of butterfat at present prices and will leave \$5.00 worth of skim milk on the farm, to say nothing of manure.

At the present prices for butterfat, the man who has produced a surplus of forage and other dairy food can sell this feed through cows for a fairly good return for his labor," says A. C. Kinrey dairy extension specialist at North Carolina State college. "The relation between the farm price of dairy feeds and butterfat is favorable now and bids fair to remain so. Records kept on present market conditions show that if \$14 worth of feed is fed to good average cows, it will produce 100 pounds of butterfat. When sold for buttermaking purposes, this fat is worth \$28. In addition, there will be left on the farm about 1,000 pounds of skim milk worth 35 cents a hundred pounds. This is excellent for feeding the poultry or hogs and when so fed has a value of \$5.00."

In addition to these values, 75 per cent of the plant food in the feedstuffs go back to the farm in the form of manure, and thus cut down the fertilizer bill, says Mr. Kinrey.

The return from selling feedstuffs through cows does not suggest that anyone will get rich from the project, cautions Mr. Kinrey, but he does suggest that a better price will be received for the grains and hay than if the same material is sold in the raw state. In addition, there is the advantage of a steady income each month from the sale of cream.

Wheat Has Proved Value in Dairy Cow's Ration

The boost in wheat prices may result in corn proving a more economical grain in the dairy ration than wheat, on some farms, according to C. L. Blackman, specialist in dairying in the department of animal husbandry at the Ohio State university.

If the price of wheat should go much higher than that of corn, he asserts it will be good business to sell wheat and buy corn and save the balance. "This, he believes, is a good time to watch prices of all kinds and vary the rations according to the largest possible returns per dollar's worth of feed."

It has been found that when wheat displaces 300 pounds of corn and makes up 30 per cent of the dairy ration, about the same results are obtained from the wheat as are obtained from the corn, if both rations are fed with alfalfa hay and corn silage. The cows gain a little more in body weight on the corn ration but produce a little more butterfat on the wheat ration.

Feeding Skim Milk

Increased use of the cream separator on the farms of this state should do much to increase the income from pigs, chickens and calves to which the skim milk is fed. Recent months have seen the price of milk powder, casein and other skim milk products so unsatisfactory that it has become desirable in so far as possible to keep the skim milk at home for utilization as feed. Co-operative creameries and others have been recommending this practice to their members and patrons. The doubly desirable result of increased profit from poultry and livestock and gradual reduction of the surplus of skim milk products should be noted.—Idaho Farmer.

Approved by Testing

Producing an average of 451.08 pounds of butterfat, 8,544 pounds of milk in a year, the cows in the purebred Jersey herd owned by A. H. Scribner, Mr. Kisco, N. Y., have recently completed a year of official testing through the herd improvement registry of the American Jersey Cattle club. During the year of test Mr. Scribner's herd averaged seven cows in milk. The yield of these cows is equivalent to 563 pounds of butter and 3,974 quarts of milk per cow for the year.—Rural New Yorker.

DAIRY NOTES

Ground soy beans as a feed for growing dairy calves gave nearly identical results with linseed meal in experiments at Purdue university.

Most bacteria in milk come from dirty cows and dirty utensils, but dirty stables, bad air and dirty surroundings all add their share of germs.

Turnips are somewhat better for dairy cows than carrots, though the latter may be used.

Cattle will live to the age of fifteen years if not slaughtered before that time. Unless special circumstances exist, a cow will have outlived her usefulness by the age of ten years.

Bad flavors in butter in winter often come from keeping the cream too long before churning. It is a nuisance to churn a small amount, but may pay

RESTFUL SLEEP for FRETFUL, FEVERISH CHILD

—With Castoria's regulative

When your child tosses and cries out in his sleep, it means he is not comfortable. Very often the trouble is that poisonous waste matter is not being carried off as it should be. Bowels need help—mild, gentle help—but effective. Just the kind Castoria gives. Castoria is a pure vegetable preparation made specially for children's ailments. It contains no harsh, harmful drugs, no narcotics. Don't let your child's rest—and your own—be interrupted. A prompt dose of Castoria will urge stubborn little bowels to act. Then relaxed comfort and restful sleep! Genuine Castoria always has the name:

Rust-Proof Alloy

At the recent meeting of the American Institute of Mining and Metallurgical Engineers Nicholas A. Zeigler, of the Westinghouse company, reported the discovery of a new cheap alloy, made of iron and aluminum, which does not rust when hot. Red-hot rust, you know, is what shortens the lives of furnaces, etc.

It sometimes happens that a man has more brains than his community requires.

Headache
An NR—NATURE'S REMEDY
Tablet—will promptly start the needed bowel action, clear waste and poison from your system, and bring welcome relief at once. The mild, safe, all-vegetable laxative. Try it—See.
The All-Vegetable Laxative
New
TUMS for the tummy! Quick relief for sour stomach, acid indigestion and heartburn. Tums are antacid. Only 10c.

Duly Attested
When Judge Fletcher Riley, Oklahoma Supreme court magistrate, went fishing at Galveston and landed a heavy bass, he sent the fish in a box to Mrs. Riley in Oklahoma City. On the outside of the box was attached an affidavit with fourteen signatures attested by legal minds that accompanied the jurist on his trip. "Justice Riley caught this, we saw him," the affidavit read.

CHAPTER XII—Continued

He tilted the Browning muzzle downward and steadied himself to run a burst at the rear canoe. But that craft darted up alongside the leading boat and hovered there, protected against his machine gun by their proximity to Joyce. With sudden faces upturned, the bandits watched the maneuvering plane, waiting for Alan's next move, defying him to touch them.

Buzzard had banked in a neat hair-pin turn, had dropped down to six hundred feet and was flying back past a hundred yards off the vertical, so that Alan could fire down at them diagonally and double his concentration by ricocheting bullets off the water. It was a superb position. Alan could have killed those five bandits and sunk their canoes in half a minute. But he dared not fire a shot.

It was in that space of hopeless deadlock that Joyce came through. Alan saw her make him some slight sign, a mere gesture which the bandits, leaning up at him, did not see. He read the meaning of that gesture; Joyce was preparing for some sudden action; she was signaling him to be ready!

Without a whisper of warning, so swiftly and neatly that the bandits looked around in dazed bewilderment, she half-rose in the canoe, dived head-long over the gunwale, and disappeared.

It came so suddenly that for moments Alan himself hardly comprehended what she had done. When he did realize that she had given him his splendid chance, his finger tightened on the trigger and the Browning leaped into play.

For twenty seconds, till there was danger of Joyce reappearing, he flailed and swept the two canoes with a rain of bullets. He searched one man, who jumped and yelled. The deadly hail drove them pell-mell in terror of their lives, into shelter of the nearest flags. Fifty feet from where she had dived, Joyce reappeared a moment, cast a frightened glance back, tossed the disheveled hair from her eyes, swam a stroke or two, and then flipped under again like a young otter, making for a soggy reed bed on the other side of the lake.

"Low! Fly low!" Alan shouted into Buzzard's ears. "Sweep low over 'em! They'll try to get her again if we don't force the flight now!"

With rifles snarling at them from flags below, with white puffs of smoke drifting away on the breeze, the plane banked and dived; and less than four hundred feet high, it soared over the bandits. Its third time, its last and fatal time.

Nearly flung out bodily by the quick wrenching maneuvers, Alan braced himself and hung grimly to the Browning and ran a burst at the flags that the bandits were firing from. He killed a man; he saw the criminal fling up his arms and stagger and fall face downward in the reeds and water. With another burst, enfolding those flags from a side angle, he would have wiped out the other four.

But that chance was not given him. The thunder of the engine suddenly slackened, the motor spluttered and died; in place of the throbbing roar Alan heard only the swish of struts and hum of wires. In the sudden quiet he heard Buzzard's cry of consternation and saw his flight partner turn a white face toward him; and he guessed the engine had been put out of commission by those snarling rifles in the flags below.

The next instant, with those rifles still blazing away, a tremor seemed to hit the plane, as though other bullets had struck it. It lurched violently, its nose and right wing dropped, and it started a steep side-slip. With a gesture of sickened despair at this second mortal blow, Buzzard cut off ignition and battled with stick and rudder-bar to keep the plane from plummeting into the bog under keel.

Two-thirds of a mile from the bandits, it fell heavily into the water on one wing and pontoon, rocked a moment uncertainly, righted itself and floated—but disabled, useless, out of the battle.

Before the spray from the plane's heavy fall had fairly settled, Alan was on his feet, stripping off helmet and jacket, looking back at the flags where the bandits lay hidden and the reedy bog where Joyce had found a temporary refuge.

For a moment, numbed by this sudden crash of all his plans, he stared hopelessly across that watery thousand yards. The launch was stranded, miles away; Pedneault and Bill were both out of the reckoning; the plane was disabled; the bandits were free to recapture Joyce and escape in their canoes. In the space of five minutes his whole venture had come to nothing. From the bandit's covert to the bog where Joyce was hiding was a scant two hundred yards. Whatever move he tried, he must act swiftly. In a very few minutes, when those men recovered their wits, they were going to seize their advantage; they were going to whip across, beat through those flags and find her again. She would never flit out of their hands a second time.

Whirling on Buzzard, he demanded sharply: "You can't taxi back there? Can't get me close enough to use the Browning?"

"Can't taxi a foot, Motor's out. They hit something; that's why the engine konked on us. Think the wire to the timber box is cut."

"How long—us to fix that?"

"Take us an hour."

Even as Buzzard spoke, Alan saw the bandits rise up yonder in the flags and start shoving their canoes into the water. They were going to dart across and recapture Joyce.

At the sight of that, his last hesitancy was swept away. Snapping around to the fuselage cubby, he jerked out the frail canvas canoe and unfolded it, Buzzard had been thrusting pliers, wrench and tape into his pockets, but now he stopped and stared wide-eyed at his partner.

"Good Lord! You don't intend . . . ?"

"What else? Stand here and watch them hunt her down?"

"Across that open water? Right into their rifles? Them shooting into you from cover? Alan, don't! For God's sake, don't try that!"

Alan jammed the last thwart-prop into its notch, lifted the canoe one-handed down upon the water, flung in the paddle and jumped down upon a float.

"Hand me the Browning and the cartridge webs. Come alive! Don't you see they're starting across to get

lieved he might get to the flags. Once there, once the Browning leaped into play, he could smother those rifles in a few seconds.

The bandits had been shoving their heavily laden canoes back through the flags to the open water of the pond lying between them and Joyce. But when they saw him skirling away from the plane, they stopped and watched him for a few moments until his intention became unmistakable. Alan saw them hold a quick council. And then, as though realizing how deadly that open water stretch was, how impossible to cross in the face of four rifles, they pulled the canoes back and secreted themselves in the flags and coolly waited.

When he was still two hundred yards from the reed patch and nearly six hundred from the bandits, they opened on him. A rifle boomed dully like a caribou Winchester, and its heavy bullet ricocheted off the water a dozen feet to his left. Another barked at him. A third kicked up spume a little nearer. Then the fourth, a sharp-cracking Savage, spoke out. Better aimed, in the hands of a deadly marksman, it sent a bullet so close past Alan's ear that involuntarily he winced and bent lower.

The second bullet splintered a hole through the blade of his paddle, up-lifted for a stroke. Its third, still closer, struck the water between paddle and canoe, ricocheted off, spun endwise and tore through the fat side of the canvas craft, missing the middle thwart by an inch. The fourth, elevated a little, sang past in air, harmlessly, but with a murderously close wh-aa-ang that jerked a gasp from his lips.

The fifth bullet hit Alan. His left hand felt numb and paralyzed. Glancing down at it, he saw the blood start spurting—falling in crimson splashes upon the white canvas. And then he saw that his ring finger, almost completely severed, hung by a mere shred of skin.

With one glance he realized his finger was beyond any surgery to restore. The dangling thing hampered his grip on the paddle. As though its loss was of no consequence in these moments of life and death, he took firm hold of it and pulled it off. The pain came then, in darting throbs that shot to his elbow and made him shiver.

As he gripped the paddle and turned his eyes ahead again toward the thin patch of reeds, he was hit a second time, by the sixth and last bullet of the "breed" magazine. For a second he was dazed, so dazed he could not realize where he had been struck. Then he felt a pain like a hot iron pressed along his forehead; and something warm and crimson began trickling down into his eyes, half-blinding him.

The Savage did not shoot again just then. The "breed" was evidently reloading and lowering his elevation sight. In the comparative silence, Alan became aware that Buzzard was hoarsely shouting at him. Dimly he heard the pleading frantic yells:

"Back away! For God's sake, back away! They'll kill you, Alan! Look across. To your right. Something like over there! . . . Back away, swing over there!"

Sickened by pain and bullet-shock, Alan scooped up a handful of water and dashed it across his eyes, so that he could see. Glancing north, vaguely wondering what cover Buzzard meant, he saw a little reed bed two hundred yards distant. As he glanced at it, he saw that it was dry ground, standing a foot above water. A swan nest there, a huge structure of willow sticks and reeds and tussock heads, almost completely covered it.

Backing off a few dozen yards, he turned the canoe and flung his whole strength into reaching that swan nest. The three bandits, knowing he was hard hit, seeing the wobbly, erratic course of the canoe, came bursting out of the flags with eager shouts to finish him off.

A bullet, striking a few feet short, ricocheted off the water and tore through the prow. Alan laid the Browning down flat on the bottom to keep the precious weapon safe; and thrusting his boot against the jagged hole, he tried to stop the spout of water that was rapidly flooding his craft.

When Thornton Wilder wrote the "Bride of San Luis Rey," he bestowed upon Lima, Peru, its setting, a wholly fictitious bridge, in exchange, perhaps, for the use of the romantic old city's most romantic old legend, that of Camille la Perichole. La Perichole of the book was a spectacular dancer and actress, very beautiful save in repose, when "one was startled to discover that the nose was long and thin, the mouth tired and a little childish, the eyes unsatisfied." Wilder tells us of her love affair with that worn-out old grandee Don Andres, viceroy of Peru, and of her retirement to a convent after her beauty was marred by smallpox scars.

The real Perichole lived in the Eighteenth century. Of humble parentage, such was her voice and her gift of mimicry that she was a sensation on the South American stage while still in her early twenties, and the magnificent castle which her rakish lover, Marquis de Amat, Spanish viceroy in Peru in real life, gave her still stands and is used as barracks and prison by the Lima police. A Peruvian biographer describes her as "small of stature and somewhat plump, her movements full of vivacity. Her oval face was pale brunette and even during her most successful days pitted by smallpox marks, which she skillfully concealed with cosmetics. Her small, black eyes were lighted by expressive animation. Her nose was, shall we say, snubbed and a tiny mole on her upper lip gave her large mouth an irresistible charm."

JOHNNY APPLESEED

A BELOVED legend of our days of westward expansion is the story of Jonathan Chapman, known to every settler along the Pennsylvania and Ohio frontier, and in much literature since, as Johnny Appleseed. It was his life mission to plant along the paths newly hewn into the wilderness apple trees to give welcome shade and refreshing fruit to the hordes to come. He was an eccentric figure surely, with sacks of apple seeds salvaged each autumn from the cider mills, but the small boys of the frontier regarded him too highly to mock at him and even the Indians esteemed him, allowed him to wander at will un-molested and made it possible for him more than once to give the alarm for an impending attack.

Johnny Appleseed was born in Springfield, Mass., in 1773, son of a Revolutionary veteran and a graduate of Harvard. He traveled for a time in Virginia as a Swedenborgian missionary, and later with his brother joined the tide of migration west of the Alleghenies. One version of the legend has it that he combined in his wanderings his philanthropic purpose with a vain search for a lost sweetheart from whom he had been separated when she and her family joined one of the first expeditions to the west.

However that may be, it was at Pittsburgh, then a mere cluster of log cabins, that Johnny Appleseed was struck by the absence of fruit trees and commenced the life work which gave him his name. He died near Fort Wayne, Ind., in 1847.

THE BUFFALO NICKEL INDIAN

OUT in Glacier National park lives a Blackfoot Indian chief named Two Guns White Wolf. For many years innumerable pictures of him have appeared in newspapers all over the country with some such caption as "You've His Portrait in Your Pocket—Perhaps." For popular legend has it that he is the original of the Indian on the buffalo nickel.

But the man who knows, if anyone does, who was the original of that famous likeness says that it isn't chief Two Guns White Wolf. That man is James Earle Frazer, a famous sculptor whose design was accepted by officials of the United States treasury when the new five-cent piece was issued in 1915.

Mr. Frazer has stated that he "had never seen Two Guns White Wolf" while "on his way to dispose of a legend of the Blackfoot hero—his model. More than that he goes on to say that he used the profiles of three Indians for his design. One was Chief Iron Tail of the Ogallala Sioux, another was Chief Two Moons of the Northern Cheyennes and the third was an Indian whose name he had forgotten. So instead of the "buffalo nickel Indian" having one original, it had three and two of them were very famous Indians, indeed—great chiefs among their people and leaders in the Custer battle in 1876 and other famous battles with both white men and red.

Beauty Talks

By MARJORIE DUNCAN
Famous Beauty Expert

Beauty on Every Hand

HOW many times, I wonder, have you and you and you been shocked by an ugly hand hiding behind a trim and stylish glove. Were it not for the protection they give and the finished look they add to the costume ensemble I would be all for abolishing gloves. For time and again it has been proven that exposure to the incentive to greater beauty.

The very first rule to remember when handling yourself beauty is that the hands must match your face in general tone and texture. Never cream your face without doing as much for your hands. When you cleanse, tone, nourish or bleach the face and neck take a minute to follow the same beautifying process for your hands, too. It will be time well spent. I promise you.

It is a very stubborn sort of skin that does not respond to a week or two of kindly care. Rough, chapped hands soon take on a satin smoothness if treated to a nourishing cream, a hand lotion or a soothing balm. This should be smoothed into the hands at night just before one retires, and also several times during the day after the hands have been washed.

For red and rough hands the old formula of glycerin and rose water, or equal parts of glycerin and spirits of camphor should prove both bleaching and nourishing.

Hands that are chapped should avoid soap and water for a few weeks. A cleansing cream is both soothing and cleansing.

And every hand—from the loveliest to the ugliest should receive the proper protection before it is sent outdoors. In the winter the chill blasts will redden and roughen and chafe the skin. In the summer the sun's heat saps the skin of the natural oils making it dry and leathery looking. A finishing cream smoothed over the hands and a dusting of powder to top the loveliness is sufficient to carry smooth, white beauty through a busy day.

Fruit juice stains are not new to the homemaker. The lovely lemon is a handy thing to have about if you are seeking hand beauty. A bit of tomato juice will also remove fruit stains.

The hands of youth and beauty present a beautifully healthy skin tone, clear, transparent—not a dead white, but the proverbial peaches and cream loveliness. The hands of youth and beauty are hands you love to hold for their satin smooth loveliness. No wrinkles, no discolorations, no ragged nails ever mar the hands of youth and beauty. Hand yourself beauty and remember that beautiful hands are also on the march in the spring fashion parade.

Make-Up Need Not Make You Look Bizarre

IN ADDITION to the many women who have not yet adopted cosmetics, there is still another group. The group consists of women who are under the mistaken impression that using rouge or powder will make them look too-obviously "made up." They associate make-up in general with an eccentric, exaggerated effect.

Make-up is a subtle art. To use none at all is to commit as grave an offense against beauty as to use too much. The pallid, haggard woman is almost as much of an eyesore as the too-obviously painted lady. But by choosing the right rouge and powder—a shade to match the skin, texture to make blending easy, a quality that will in no way hurt the skin—and by applying these touches skillfully one can achieve not only a natural but a beautiful effect as well.

To achieve a natural effect the first requisite is to select a shade of rouge that blends perfectly with your natural coloring.

If you have so little natural coloring that you are in doubt what it is, there are several ways of determining it. When you are flushed, notice your color, or when exercising, the blood will rush to the surface, or after patting skin with skin tonic, notice the color as well as the color outline, that is just where the "key" or deepest shade is and notice how it fades away gradually.

The next step is to blend the rouge to simulate the natural color outline—apply it to the "key spot" then blend it so that it fades away. Edges should never be definitely outlined, but softened so that they are scarcely perceptible. A cream rouge is best suited to this blending process and achieves a warmer, more natural, glowing and healthful effect.

Powder should also match the skin and should harmonize with eyes and hair. Choose a good quality powder and one of good texture. When applying the powder do not rub it into the skin. Put it on in an upward and outward direction, then gently smooth it over.

And while on the subject of make-up, let me urge you to adopt a lip paste or lipstick, too. Rosy cheeks and pale lips do not conform with natural order of things.

A too-obvious make-up should be avoided. But a natural make-up will only serve to enhance your beauty, to make you look more healthful, more alive.

Closed Model

Wilbur's mother took him into his first sun parlor. "See?" Wilbur exclaimed. "It's a sedan, ain't it?"

WOMAN'S TROUBLE . . . Thought She Would Die

Donna, Texas—"I was taken down with woman's trouble, and thought I would die," says Mrs. S. F. Moore, Box 732. "I suffered death. The doctor said there was nothing for me but an operation. I had then been in bed for five weeks, and could not walk without help. I began to take Dr. Pierce's Favorite Prescription and the 'Golden Medical Discovery,' also used the Lotion Tablets, and in two weeks people were saying they had never seen anyone mend so fast. Now I'm a well woman, do all my work, and feel good all the time." Druggists sell Dr. Pierce's Medicine.

The Difference

"I knew my wife three years before I married her." "I knew mine a week after!"

For Women Who Need New Vitality

If you have become weak and run-down through overwork or neglect—start taking St. Joseph's G.F.P. and let it help to give you new vitality and energy. Washington's Mount Vernon

Mount Vernon, America's Most Hallowed Shrine.

Owned by National Geographic Society, Washington, D. C.—WNU Service.

MOUNT VERNON is basking in the spotlight of the two-hundredth anniversary celebration of George Washington's birth. Normally the estate is visited by nearly 400,000 people annually, but 1932 pilgrimages are expected to break all records.

"Mount Vernon is pleasantly situated in a high, dry, healthy country 300 miles by water from the sea on one of the finest rivers in the world," said George Washington, in describing his estate to a friend in 1793.

At the foot of the hill topped by the beautiful colonial mansion of the first President, spreads the broad Potomac. The high, pillared east portico of the mansion offers a splendid view of the river and the wooded beauty of the Maryland hills beyond, though lofty trees which stud the estate's spacious lawns and steel terraces. The west front of the mansion faces the vast farm land once carefully supervised by its illustrious owner.

Uncertainty shrouds the origin of the present mansion. Certain of the records indicate that Lawrence Washington began its construction, while others seem to show that his father built it.

The first white proprietors of the site of Mount Vernon were two old prospectors, who by authority of the royal governor patented it nearly 300 years ago. They made no effort, however, to comply with the provision of the law which required them to place tenants on the property, and in consequence their title to 4,000 acres reverted to the commonwealth.

In 1674 the patent to the land, along with some additional acreage, was issued by Lord Culpeper to John Washington and Nicholas Spencer. Three Washingtons held the land before it came into the possession of Augustine, father of Lawrence and George, who purchased it from his sister for \$300 and built the first house on it about 1734. This small dwelling was burned five years later, and its owner moved with his family to a farm near Fredricksburg, where he died in 1743.

George Went There in 1747.

Under the provisions of his will, the estate on the Potomac passed to Augustine's son Lawrence, who made his residence there and gave the place its name in honor of Admiral Vernon, of the British navy, under whom he had campaigned against the Spaniards in the West Indies and for whom he entertained a deep respect and affection.

In 1747 George Washington came to Mount Vernon to make his permanent home with his high-minded and cultured half-brother.

During Lawrence Washington's mastership, Mount Vernon began to assume a position of some importance in the colony. The able young proprietor was active in public affairs. He was appointed adjutant of his military district by the royal governor and several times represented his county in the Virginia house of burgesses.

Lawrence Washington died in 1752, and left Mount Vernon to his infant daughter, Sarah, who survived her father by only a few months. On her death the property went to George. Before he had reached his majority, George Washington was the sole proprietor of Mount Vernon, then an estate of 2,700 acres.

The Mount Vernon of 1752 and that of today, which is essentially as George Washington left it, were not much alike. The house was a simple one, without the present mansion's third story, banquet hall, library, or the chambers above these additions. Neither did it have the colonnades or the great portico overlooking the river.

The old brick barn, built by Augustine Washington nearly twenty years earlier, had survived the fire that destroyed his house and is still standing, the oldest structure on the estate.

Like most Virginia of his day, the future Father of His Country was possessed of a high land hunger, and by gradual acquisition he increased his Mount Vernon property from the 2,700 acres which he had inherited to a domain of approximately 8,000 acres.

The management of so great a holding presented large problems of administration, but no man in the colonies was better fitted than George Washington to meet them successfully. He was by natural instinct a farmer, and he found his greatest happiness in his marriage and the care and development of his home.

But Washington was not content to be a country gentleman who farmed in the distasteful manner then generally in vogue in Virginia. He early realized that extensive and unbroken tobacco planting was ruinous to the soil. At Mount Vernon he grew only so much tobacco as was absolutely necessary in an age when the soporific leaf served as a medium of exchange. Wheat, corn, turnips, and hay he raised extensively, pursuing a careful system

of crop rotation and fertilizing his fields liberally.

First Experimental Farm.

Mount Vernon was the first real experimental farm on the North American continent. Washington made of his estate an agricultural laboratory, wherein he put to practical application the new theories of soil cultivation and stock breeding that were then being expounded successfully in England.

For years prior to the revolution, he experimented in a comparatively small way, and while the struggle for liberty put an end to these activities for a time, it enabled him frequently to come in contact with the methods of agriculture used in the other colonies. As a result, he accumulated much valuable information which he put to good use in later years.

His return after the war marked the beginning of an era of energetic effort to improve and beautify the place he loved so well. Plants, seeds, and cuttings were imported from Europe, while many more were received from friends, both at home and abroad.

In General Washington's day mules were not commonly used in America and those that were seen to have been of an inferior breed. He made earnest efforts to better the stock and was greatly aided in his experiments along this line by two gifts from abroad. Lafayette sent him two spirited Jennies and a Jack from the Isle of Malta, while the king of Spain also made him a present of a similar trio of high-bred Spanish stock.

Seed and soil tests were undertaken, as well as stock breeding, and the general engaged in a voluminous correspondence with the leading agricultural experts in Europe. To have achieved the productivity that he did from Mount Vernon's naturally fertile soil is a standing tribute to the agricultural genius of Washington the farmer and, together with the many successful experiments he conducted there, justified the use of that title which pleased him most—"The First Farmer of America."

His Threshing Barn.

General Washington's capacity for the practical application of his advanced agricultural theories was in evidence in the large barn which he built on the Dogue Run farm. It was a 16-sided brick structure, the construction of which he supervised and the plans for which he drew. The bricks for it were baked on the estate, and among its unique features was a circular threshing floor, the boards of which were laid so as to leave regular and frequent interstices, through which the failed or trodden grain could fall into bins built beneath.

A motive which probably impelled the master of Mount Vernon to include this innovation in his new barn was his abhorrence of wasted time. By providing a good threshing place indoors, he was able to be independent of the weather in preparing his grain and made it unnecessary for his slaves to remain idle because of rain or cold.

For greater convenience, the Mount Vernon estate was divided into five farms, ranging in size from the comparatively small mansion house farm to the river farm of 2,027 acres. On each of these there were slave quarters, an overseer's house, and barns and other outbuildings. On one of them, the Union farm, there was a brick barn, which Washington described in a letter to Arthur Young in December, 1793, as "equal, perhaps, to any in America, and for conveniences of all sorts, particularly for sheltering and feeding horses, cattle, etc., scarcely to be exceeded anywhere." An overseer was in direct charge of each of these farms, but General Washington did not leave the management entirely in their hands.

Just before the Revolution General and Mrs. Washington had come to the conclusion that the demands upon them for entertaining would necessitate an enlargement of their residence. Work actually began in the spring of 1775, but before it was more than well started the master was called away to take command of the army. His kinsman, Lund Washington, took over its active direction, but the interior construction work was not completed until 1786, after the general's return. The mansion, as it stood then and as it stands today, was of Virginia pine sheathing, designed and painted to resemble stone blocks, and built over a framework of oak. The foundations were of brick and real sandstone; the roof of express shingles.

Practically all the food consumed was raised on the place. The slaves subsisted largely on corn meal, pork, turnips, and a few other vegetables, all of which were home grown. For the use of the table in the great house, wheat, fruits, sheep, and cattle were raised.

The hospitality at Mount Vernon was bountiful and seldom did the Washington family sit down to dinner alone.

POULTRY

FOOD OF QUALITY FOR BREEDING HENS

Only Way to Get Best Eggs and Healthy Chicks.

"Poultry has suffered along with other farm crops, but due to the drop in feed prices in proportion to the prices being received for eggs, and because of the mild winter permitting production to stay at level, poultrymen have been much encouraged to go ahead with their work," says Roy S. Dearstyne, head of the poultry department at North Carolina state college. "However, some poultrymen have attempted to increase their margin of profit by decreasing the feeding or substituting certain feeds which do not give as good results. One of the main substitutions being practiced is to use vegetable protein feeds for animal protein feeds. Soy bean meal and peanut meal are good if used in limited quantities, but they should not entirely displace the animal protein, especially when production is heavy and the eggs are being used for hatching."

Any radical change from the usual methods of feeding at this time is likely to be reflected in the hatchability of the eggs or the livability of the chicks, Mr. Dearstyne says. The breeding hens should be fed so that they will produce only the highest quality of eggs.

Mr. Dearstyne insists that green feed, plenty of sunlight, an adequate mineral supply and milk in some form, should be fed the birds to get the best eggs for producing healthy chicks. If the breeding birds are to be through a long laying season and maintain body weight, they must be fed a balanced ration. It is particularly unwise to depend on grain feeds alone without mash.

Chickens a Life Saver, Says Ohio Poultryman

R. W. Sweitzer, poultryman, has told the Ohio Farmer how he managed to reduce feed costs in his flocks. "To make money we had to press down on feed costs," says Sweitzer. He believes the cost of grinding grains for poultry is a wasted expense. He feeds a free choice ration with corn, wheat, germinated oats, meat scraps and milk before the birds at all times. Greens are supplied by cabbage and apples and cod liver oil is fed in the grain.

Mr. Sweitzer raises all his grain and buys only concentrates. "Last year," showed Sweitzer, "we received 6 cents a pound for our grain by marketing it through our hens." Dairy cows were his main line until disease broke out and he had to sell his stock. "Our chickens at this time proved a life saver," he said.

Causes of Paralysis

Paralysis is occasionally seen in chickens that are heavily fed and grow rapidly. It is also seen where there is overcrowding and poor ventilation. Let them have plenty of sour milk and green feed and add one teaspoonful of fluid extract of nux vomica to each pint of drinking water.

There is a form of paralysis that attacks mostly young birds, for which there is no treatment of any value and is usually fatal. In cases of this kind, it is advisable to get a new flock and put them in new buildings on clean land. Changing the old flock to new ground or buildings does not stamp out the disease.—Michigan Farmer.

Incubator Pointers

Level the incubator with a spirit level and place bits of wood under any leg that seems short. This not only helps to keep an even heat in the egg chambers but prevents the vibration that occurs when the floor is uneven and one of the incubator legs does not rest firmly.

A cellar is the best location for the incubator as it is free from vibration and the air will be rather moist. When the machines are operated in an upstairs room the entire family must be careful to avoid running, heavy walking, banging doors or carelessly leaving them open and chilling the air around the machine.

Need Cod Liver Oil

Poultry kept around cities where smoke abounds do not get sufficient sunshine in winter time, and hence cod liver oil is necessary for them. Prof. E. L. Dakan, of the Ohio State university, says after testing out several flocks. Two years ago he fed all flocks without cod liver oil except one, and that one pen laid the most eggs. Next year he fed cod liver to all flocks except one, and that year this single pen without oil had the lowest production of all.—Ohio Farmer.

Heavy Layers

Hens have to meet a high standard before they are used for breeding purposes at the United States live stock experiment station at Beltsville, Md. Poultry men of the Department of Agriculture choose breeding hens only from those which produce at least 225 eggs in the pullet years and whose eggs average at least two ounces in weight. They save only the chickens from hens whose eggs are at least 70 per cent hatchable. Pullets are not used in the regular breeding pens.

WAY TO RESTORE THAT LOST CREDIT

Re-Establishment Never Out of the Reckoning.

Suppose that a man, through ignorance, carelessness, bad luck, or bad management, has thoroughly ruined his credit standing in the community. He realizes how foolish he has been, and wants to re-establish his credit. How shall he go about it?

First—He should begin by keeping a careful, detailed ledger of all his expenditures and receipts. Nothing is more reassuring to a credit man than such a record. Some years ago, when I was credit manager of a company in Chicago, a business man from the Northwest visited me and said he wanted to buy \$10,000 worth of goods on credit. I was very doubtful about extending it. He took from his suitcase two heavy ledgers. "This one," he said, "contains every cent of my personal income and expenses for the last five years. The other is a similar record of my business. Look them over." Fifteen minutes with those books was enough for me. A man who kept such a record could not be irresponsible.

Second—The man who wants to re-establish his credit should go to the merchants with whom he has always dealt, making all his purchases not for cash, but C. O. D., so that a full record of them will be preserved.

Third—After buying for six months or so C. O. D., he should take his ledger under his arm and go around to see the credit managers of the various stores (or the owner or manager if there is no credit manager). He should point out that he is again a regular customer at the store; that he has balanced his budget and is resolved to keep it balanced for the future; and that he would appreciate the extension of limited credit to prove his good faith.

Then, when credit is extended, he should pay his bills immediately on receiving them. Thus, slowly, but surely, the confidence and faith which are credit can be restored. And it is worth all the trouble it costs, ten times over.—Henry H. Heilmann in the American Magazine.

Women Inventors Increasing

The number of applicants from women for patent papers has increased greatly in recent years. When the last detailed analysis was made, women were applying for patents at the rate of about 500 a year, but it is known to have increased considerably, since recently a large number of women have entered industrial life. As might be expected, the highest percentage of inventions of the number studied a few years ago confined themselves to domestic devices, but a great many applications are now from the realms of metallurgy and other higher technical fields.

Has Many Relatives

George Morgan Ferrell, twenty-month-old son of Mr. and Mrs. Roy L. Ferrell, of Appalachia, Va., has twelve living grandparents, or rather eight great-grandparents and four grandparents. A great-uncle of the child is fifteen years old and an aunt is four.

Bills Ignored

Harduppe—I have nothing but praise for the work of my tailor. Cashdowne—Yes, so the tailor told me.—Farm Journal.

Dr. Pierce's Favorite Prescription makes weak women strong. No alcohol. Sold by druggists in tablets or liquid.—Adv.

A man who is proud of his endor instead of cautious with it will overdo it.

Silence rarely needs apology.

HEADACHE

THE woman who lets headaches upset her plans must have her eyes and ears closed to certain facts about aspirin. There is always swift comfort, and never any harm, in genuine aspirin tablets that bear the Bayer cross. Doctors have said so; men and women everywhere have found it so. Any headache—from any cause—is always relieved by one or two tablets. And lots of other aches and pains. Neuralgia. Neuritis. Rheumatism. Niggling pains. The pain from colds which make you "ache all over." Sore throat. Systemic or "muscular" pain. Bayer Aspirin can spare you lots of needless suffering! Just be sure you get the genuine.

BAYER ASPIRIN

Expense and Literature "After all, reading offers the least expensive entertainment." "I can't see it that way," said Mr. Meekton. "Henrietta is buying nothing but fashion publications."—Washington Star.

Big "I see in Yap they use grindstones for currency." "Think I'll go there." "Why?" "That's the place to earn big money."

Why Worry?

When you lose your appetite—not only for food... but for work and play—don't merely go on worrying. Do something about it!

One of the most famous tonics for weakness, "nerves," and "run down condition," is Fellows' Syrup. It stimulates appetite. Lifts the entire bodily tone to higher levels of vigor and energy. The first few doses will prove that "Fellows' is the medicine for "building up." That is why so many doctors prescribe it. Ask your druggist for genuine.

FELLOWS' SYRUP

Graded Success Mrs. Fatleigh—Yes, I'm taking gymnasiun exercises now. Today I chinned the bar. Friend—Indeed! Which chin?—Lancor Commercial.

Preparation Mrs. Gibb—Have you made any special preparation for the bridge party tonight? Mrs. Gabb—Yes, I've picked up several delicious bits of gossip.

Mothers! CUTICURA SOAP

Used Daily Protects the Skin and Keeps it Healthy

EVERY member of the family should use Cuticura Soap regularly.

Price 25c. Sold everywhere. Proprietors: Potter Drug & Chemical Corp., Malden, Mass.

The Honeymoon Mistress—And did you have a honeymoon, Mandy? Landress—We-e-ell Rastus done help me wid de washin' de first two weeks.—Many Laughs.

Requires Careful Picking "Why the coming and coming?" "She is selecting her bridesmaids." "Eh?" "She wants them pretty, but not too pretty."

Women said: You can't keep suds like that But that was before they used the New Oxydol

Why don't you try this amazing soap—see how its suds last till dishes are sparkling clean—how they float dirt out of clothes and hold it out so clothes are cleaner and whiter without rubbing? Softer water. Never balls up. Procter & Gamble

OXYDOL

GET READY FOR SPRING!

Rid yourself of that tired feeling, constipation and by means Black Senna, a vegetable cathartic, thoroughly evacuates the bowels, relieving constipation and renewing energy. NEWSY NOTES FROM THE HEDLEY SCHOOLS

Radio Program

Our school news has a very important prelude this week. This prelude is an expansion of several local school boosters' chests. Under the supervision of Miss Hope Wells, a radio program was given over KGRS last Friday afternoon. The following girls participated: Ethel Fox, Mavis Whiteside, Roberta Mann, Maurine Goin, Helen McEwin, Margaret Doyle, Opal Heath, Ruth Wells, Evalyn Alexander, Sarah Hendricks, Jonnie Webb, Mildred Culwell, Virginia Kendall. Good work, girls!

"Tea Toper Tavern"

The Senior Class will present their last play Saturday night, April 30. The proceeds will go for Commencement expenses. The plot is:
The gay little tea room makes its bow to no customers. A desirable hired man appears. A charming widow is detained by a mysterious puncture; and all of a sudden, comes the thrilling message, "Tess has the small pox."
The gaiety of a fancy dress ball brings defeat to Gloria, a social service to Ann, and a fire. The secret passage leads to safety, the misunderstandings resolve themselves into happy end

ing, and the quarantine is lifted at the news, "Tess has the chick en pox."

The characters are arranged well and promise a good presentation. Come, see the play and help the Class with your 10c

Armstrong Is Tennis Star

The reporter is very glad to state that one of our star tennis player won second place in single tennis at Canyon last week end. This lad is "Speck" Armstrong, president of the Senior Class and good cager and track man. The results are: Perryton 60, 61. Hereford 62, 86, 61, Canyon 62, 75, 61. Armstrong was defeated by a player from Oklahoma Lane, 62, 63. That's mighty good, Speck!

Senior News

Some of the Seniors ordered their invitations from a company in Houston and were all downhearted this week over the news that the order was a considerable sum more than expected. Much confusion ensued, and it seems likely the students will tomahawk the salesman. Take our advice and order from Donley county firms next time, and thus save money and worry.

end with Zella Grigsby at Ring. Buster Stafford and George Hagenfelt spent Saturday and Sunday at Wellington.

The students enjoyed the radio program at the High School Friday. George Gordon and Carl Pool did good work in setting up a radio.

Mildred Culwell and Evalyn Alexander were in Amarillo last week end.

Mrs. Davenport attended to school business in Clarendon the past week.

Ethel Fox went to Childress Friday to visit home folks. Blaine Doherty and Fred Tidwell accompanied Speck Armstrong to Canyon Friday.

Do you want a school paper? Get it reserved by seeing a staff member. Only 10c.

WIFADASOS CLUB

The Wifadasos Club met in the home of Mrs. John Koening Monday with ten members present. A very interesting program was given, each member answering roll call with hints on flowers, followed by parliamentary drill, and the flower exchange being appreciated by all.

The Club adjourned, to meet with Mrs. John Dixon May 9th. Clothing Lines and Finishes will be the study at that time. All members be present.

Reporter.

B. W. M. S.

The B. W. M. S. met Monday with Mrs. Alewine. The following program was rendered:

Topic: Heroines of the Cross
Leader, Mrs. P. C. Johnson.
Hymn, In the Cross of Christ I Glory.

Bible Study, Gal. 6:1-10, 14-15.
Hymn, Must Jesus Bear the Cross Alone

The Heroine of the Frail Barque—Mrs. Wells.

The Heroine of Many Difficulties—Mrs. Bain.

The Heroine of the Quiet Ways—Mrs. Smith.

The Heroine of Sunny Italy—Mrs. Thompson.

Prayer for all foreign mission heroines.

A Heroine Among Foreigners—Mrs. Holland.

A Heroine of the Red Race—Mrs. Simmons.

The Heroine of the Big Canal—Mrs. Heath.

Prayer for all home mission heroines—Mrs. Wells.

Song, Jesus, I My Cross Have Taken

Closing prayer.

After the program a social hour was enjoyed.

STRAYED—One 16 months old Jersey bull. See or notify Ray Doherty.

METHODIST CHURCH

The Methodist Church was the scene of considerable activity Monday. Members were busy throughout the day, running a water line into the church, removing the concrete steps from the west side, making flower beds, and otherwise beautifying the premises.

Oscar Alexander and family of Amarillo visited home folks here Sunday.

A MILK COW—Will trade for 5 tons of good bright maize.
J. A. Pirtle

Mrs. A. B. Howard and little daughter, Arnold Jean, of Wichita Falls, are guests of Mr. and Mrs. C. L. Johnson.

We get in new merchandise every week. See us for your needs. Our prices are right.
