

A Little About Everything Not Much About Anything  
By JAMES E. KELLY  
(Opinions expressed in this column are the views of the writer and should be so interpreted).

READING THE FRONT PAGE of The Stanton Reporter last week, I learned some additional information about the plans that were in incubation for the city-wide clean-up campaign. From information gleaned from reading the news story, the campaign is to have the backing of all the various organizations and civic clubs of Stanton, or at least the organizations and clubs represented in the Martin County Forum, which, I understand, number twelve. Then there are the organizations and clubs not members of the Forum, that have expressed their willingness to join the clean-up crusaders. That's a pretty good representation of the town's citizenship that are interested in cleaning up the old town, and if these organizations will incorporate some dynamic power in their activities, the town will be CLEANED-UP! as well as any property owner who ignores their plea to clean up.

The die is cast as to the date for the clean-up campaign to start. Mayor Woodford Sale has issued his proclamation, all stamped, sealed, etc., designating the first week in June Clean-up Week in Stanton. There is no restriction placed on number persons joining in the campaign — the gaps are down to include the child with strength enough to drag a rake to pile up loose trash or weed a hoe with enough power to cut down a weed, to the oldest older who with trembling hands and wobbly legs can push a lawnmower to cut down the ragged grass in the yard and push a wheelbarrow or yard truck to carry off the accumulated trash, waste paper, empty tin cans, etc., to pile in a place that will be in easy reach of a truck to pick up and haul away. Loose papers and dead grass should be raked up and burned.

I'd hardly go so far as to compare alleys back of some downtown stores with a sewage disposal plant as to filth and the stench arising from them that greets the nose of the citizen living on the other side of town, but it won't miss it far. Cess pools under the house made by waste water from kitchen sinks and bath tubs oozing from leaky pipes come in for their share of spreading obnoxious odor, besides setting up an ideal breeding ground for flies and mosquitoes. This brand of pests take a delight in landing on the exposed parts of the human body a stinging blow that can very easily land some member of your family in bed with a case of typhoid fever, malarial fever, or maybe, send you on a long and dangerous battle to fight—poliomyelitis — that crippling disease that is no respecter of person, color, or age. And don't overlook the danger the rat carries on his back — the flea that bites you and lays you low with undulant fever a form of disease that lingers with the patient long after he's left his sick bed. As aggressive fight should be made to rid your premises of the rodent, as any part of the clean-up campaign.

The mention of polio gives me the opportunity to quote the lead paragraph to a story on polio published recently in one of Texas' popular magazines. Here it is: "The bandit of the Old West, who lived by his gun and created terror wherever he went, has disappeared from the picture except in the movies and on radio and television. But another marauder who counts life just as cheap and who strikes with the same malevolence, refuses to come out of hiding. The threat of poliomyelitis, instead of fading from the picture, become increasingly great each year."

The magazine article went on to say: "We need to utilize our parent - teacher organizations, our teacher workshops, and educational meetings to acquaint teachers, parents, and the community as a whole with the nature of poliomyelitis, its cause, the methods of minimizing likelihood of developing the disease, and the essential elements in treatment."

## STANTON BAPTISTS NAME COMMITTEES TO FILL PULPIT

Recommendation of a pastor for the First Baptist Church of Stanton to succeed the Rev. T. R. Hawkins, was left this week in the hands of a pulpit committee.

The committee consists of Grady Cross, Glen Petree, J. T. Davis, Clyde White, Guy Eiland and J. G. Spraws.

Rev. Hawkins resigned recently after holding the pastorate for five and one-half years. With his family, he has established a home in Northeast Texas.

In the absence of a pastor a supply committee headed by Joe Bauch and including Mrs. J. R. Sale and Tom Adams is arranging for preachers to fill the pulpit each Sunday.

The Rev. J. Wm. Arnett, district eight missionary, of Big Spring, conducted the morning service last Sunday and the Rev. E. R. Hammock, associational missionary to Mexicans, of Stanton, was in charge of the evening service.

The Rev. W. P. Kirk, of Lees, will conduct both services Sunday.

## GEORGE BURNS ANNOUNCES FOR MARTIN SHERIFF

Announcement of his candidacy for the office of Martin County Sheriff and Tax Assessor-Collector was made this week by George Burns. He has been a resident of the county the last 28 years.

Burns is a farmer and property owner in the northeast part of the county. He is married and the father of three children, Shirley, 10; Dorothy, 17; and a son, Wayne, who is a law student at the University of Texas.

He said he had "watched the growth of this area through the years and is deeply concerned for the welfare of the county and the people." He promised, if elected, "to carry on the duties of the office in an efficient and practical way for the people."

## AMARILLO MAN IS INJURED IN TRUCK MISHAP

Eugene Johnson, 24, of Amarillo, is being treated in Martin County Memorial Hospital for a broken leg and other injuries received about 10 a. m. Monday when the butane gas transport he was driving jackknifed and overturned about five miles north of Stanton.

Johnson's truck was one of three in a convoy. The truck in front of Johnson was forced to stop suddenly when an auto pulling a trailer halted unexpectedly.

No one else was injured in the resulting traffic confusion.

## ALPINE JUDGE IS CANDIDATE FOR APPEALS POST

Judge Alan R. Fraser of the 83rd District Court today formally announced as a candidate for the Eighth Court of Civil Appeals, El Paso.

Judge Fraser has long experience in the courts of this state, having served for twelve years as District Attorney and District Judge. He was elected District Attorney in 1936, and served continuously in that capacity until the early spring of 1943, when he resigned to enter the armed forces. He returned to the U. S. in the fall of 1947, and was appointed District Judge of this same district and has served as such ever since, and is now completing his fifth year as District Judge.

**World War Veteran**  
Judge Fraser resigned his position to volunteer for the armed services. He spent over 4½ years in the Army, of which 3½ years were spent overseas. Judge Fraser saw service both in the infantry, until the end of the war, and then as presiding judge of the Military Government Courts in Frankfurt, Germany. His overseas duties carried him into seven foreign countries, including the invasion and landing in France and the campaigns in Holland and Germany.

**Experience in Oil Business**  
Although a resident of West Texas, for twenty years, Judge Fraser has long experience in the oil business. He was born at Bradford, Pennsylvania where his father was an oil producer. Judge Fraser's grandfather and his partner developed one of the first leases in the Bradford field more than sixty-five years ago, which property is still in production. Judge Fraser himself spent all of his spare time and summer vacations working in the oil field as a pumper and tool dresser. Although his father died in 1942, his relatives still continue in the oil business in the Bradford field. Due to his natural interest in the oil and gas industry, Judge Fraser has paid special attention through the years to the progress of the laws that regulate the in-

(Continued on Back Page)

## MARTIN GIRLS WIN 4-H CLUB DISTRICT MEET

Martin County 4-H Club Girls swept top honors at the District elimination meet Saturday at Monahans.

Members of the winning teams will represent this district at the State meet at Texas A&M College on June 9-10-11.

Members of the Shrub Identification Team winning first place were: Mary Beth White, Beanie McCoy, Jo Jon Hall, and Mary Ivy Henson.

Lorene Burns won first in the Dairy Foods individual demonstration and Shirley Shoemaker and Anna Belle Heckler won third.

The Vegetable Preparation Team composed of Eula Belle Mott and Yvonne Ory won second.

Mary Lynn Hamilton was one of the three girls named to represent District 6 in the State Dress Revue.

The District 6 4-H Council named Jo Jon Hall as their chairman and she will go to A&M College June 8th, to help make plans for the State 4-H Round-Up.

The Martin County girls were accompanied to Monahans by the Martin County Home Demonstration Agent, Mrs. Mildred C. Eiland and their adult leaders, Mrs. J. C. Mott and Mrs. Clark Hamilton.

Ruby Overton, Glasscock County 4-H Club Girl, participated in the Dress Revue accompanied the Martin County group.

## Barbara Holcombe Is High School Valedictorian

Barbara Holcombe, 17, daughter of Mr. and Mrs. H. C. Holcombe, with a scholastic average of 97 plus has been selected as valedictorian of this year's graduation class at Stanton High School. She will deliver the valedictory address during the commencement exercises scheduled for 8 p. m. Monday, May 28.

She moved to Stanton from Tarzan where her father had served as school principal. He is the High School math instructor here.

**Harriet Higgins Wins**  
Harriet Higgins, 17, whose grade average was 95 plus, has been selected as salutatorian. Daughter of Mr. and Mrs. R. S. Higgins, of Midland, she will give the salutatory during the commencement program.

Delbert Downing, Midland Chamber of Commerce manager, will be the principal speaker.

The baccalaureate sermon at 8 p. m. Sunday, May 27, will be delivered by A. Elmore Johnson, Church of Christ minister.

An elaborate program for both graduation ceremonies has been arranged.

# \$400,000 Housing Project Near Completion in Stanton

## STEWART GERDES DIES IN ACCIDENT NEAR STANTON

A-3c Stewart L. Gerdes, of the 356th Air Police Squadron, Big Spring Air Force Base, was killed early Saturday night in a highway accident about five miles east of Stanton on U. S. 80.

He was hit by an auto he was attempting to flag down.

Witnesses explained Gerdes and three other airmen had encountered tire trouble on their automobile, and were standing alongside the road as Gerdes tried to stop the passing vehicle. The driver of the second auto was Air Cadet Roger A. Miller, also of Big Spring Air Force Base.

Gerdes was dead on arrival at Martin County Memorial Hospital, Martin County sheriff's deputies reported. No charges have been filed against Gerdes.

All of the Air Force personnel were off duty at the time of the accident.

A native of Benkelman, Neb., Gerdes enlisted in the Air Force Dec. 29, 1950. Previous to his assignment to the Big Spring Base, he had been stationed at Lackland Field, Texas, and at Mather AFB, California.

Gerdes is survived by his father, Herman Gerdes of Benkelman, where the body was forwarded for services and burial.

## MARTIN C OF C SCHEDULES TOUR OF AREA SCHOOLS

National Chamber of Commerce Week May 19-24 will be celebrated in this area with officials of the Martin County chamber explaining the functions and advances of the local organization to the students of the various schools.

Trips are scheduled to every school in the county that is still in session.

The tour was decided at a meeting Tuesday afternoon of the Chamber's executives attended by Stanley Wheeler, president, Cecil Bridges, vice-president, James Jones, treasurer, and Hila Weathers, manager.

Jack Bentley, chairman of the chamber's aviation committee, urged a large attendance at the openhouse and dedication Sunday at the Big Spring Air Force Base.

Held in observance of Armed Forces Day, the planes and weapons at the Base will be open to the view of visitors.

## MARTIN OFFICIALS NOT TO BLAME FOR WORKER BAN

Neither Tarzan Marketing Association, Martin County officials, nor any other person in West Texas was involved in the situation which arose last year regarding the importation of Mexican Nationals to Howard County. This was revealed this week in letters received by Martin County Judge James McMorries from the U. S. Department of Labor and the Texas Employment Commission.

Reports had circulated earlier that Martin County had had something to do with blocking the sending of Mexican laborers into Howard county by a South Texas Association. It had been vigorously denied here.

**Letter Quoted**  
According to Ed. McDonald, Dallas, regional director for the U. S. Department of Labor, here is what happened:

"The situation which arose last year had nothing to do with the basic eligibility of Howard County but rather concerned a request from a South Texas Association desiring to add Howard County to the area of employment for that association. Neither Tarzan Marketing Association, County officials, nor any other person in West Texas was involved in this situation.

"As a matter of policy this office does not approve requests to include widely separated areas of employment for an association under a single order. Experience has proven that an association cannot adequately police the fulfillment of contract terminations by its membership under such conditions. We therefore require that associations having two or more widely separated areas of employment place order with the Texas Employment Commission in each of those areas.

**South Texas Association**  
"Had such an action been taken by the South Texas Association this office would have had no reason for turning down a certification from the Texas Employment Commission for the employment of Mexican workers in Howard County."

Henry Bengt Crozier, Austin, chairman and executive director, Texas Employment Commission, wrote McMorries: "During 1951, we did not receive any information from you as to the eligibility of Howard County or Howard County Farm Bureau to contract Mexican Nationals. Furthermore, we did not receive any information from the regional office of the Department

## 58 HOMES IN TRACT

Officials of the Martin County Construction Company expect to complete here during the next thirty days the Company's \$400,000 housing project known as the Clardy addition.

Construction started on the 57 houses in the tract last Oct. 27. Fifty four of the homes have been sold and occupied. The tract, containing 16 acres, was annexed to the city of Stanton.

The houses range in value from \$5,500 to \$9,300. The four remaining to be constructed will be three bedroom residences.

Forming the Martin County Construction Company last year to meet a sudden, increased demand for homes were two Midland men, Frank True and F. A. Forrest, and one man from Stanton, Floyd Smith. The Company has established offices here in the Old Bank Building above the Walgreen Agency drug store.

The Company has continued to build homes to meet the demands of new residents.

Another tract of 55 acres has been purchased by the Company and new houses will be constructed there in keeping with the demand, spokesmen said. The latter edition will be known as the Manning tract.

## CLASSING SERVICE SIGN UP STARTS

Martin County Cotton farmers can now sign up for the benefits of the Smith-Doxey services.

This announcement was made today by H. J. Matejowsky, who is in charge of Abilene cotton classing office, U. S. Department of Agriculture's Production and Marketing Administration.

Application forms may be obtained from the county PMA office, county agent or local ginners. One application covers all farmers in the group.

Under the Smith-Doxey Act, farmers who organize into cotton improvement groups and file an application get their cotton classed by USDA without cost. Also, they receive a market price quotation sheet from USDA with which they can figure out what their cotton is worth locally according to its grade and staple.

of Labor stating that Howard County or the Howard County Farm Bureau was ineligible to contract Mexican Nationals." Farm Bureau was eligible to contract Mexican Nationals."

# Oil Found in Tests of Blocker Wildcat

By JAMES C. WATSON  
Humble Oil & Refining Company has started production tests at its No. 1 J. W. Blocker, and others, Central-South Martin County possible discovery from the Dean sand of the lower Permian.

The project is testing naturally on perforated section at 8,810-75 feet.

The project had been shut in for several days while the rotary drilling rig was moved off and a portable unit was moved in for the testing.

After the shut in it was opened up and it kicked off and flowed 15 barrels of new oil in 50 minutes and the flow died.

**Swabbing to Test**  
Operator started swabbing and in 11 hours swabbed out 26 barrels of new oil. There were no signs of formation water. The swabbing was continuing.

The perforated section probably will be washed with mud acid during the next 24-hour period to clean off the pay section and stimulate the petroleum yield.

After the acid wash the project will be tested further and then it likely will be fractured and tested again.

Location is 660 feet from north and west lines of section 10, block 17, T-1-S, T&P survey. It

is seven miles west and slightly north of Stanton and three miles northeast of Germania.

**Plugged Back**  
This wildcat drilled to total depth of 12,100 feet in barren Ellenburger. It then plugged back and tested the Wolfcamp at 8,099-9,200 feet. That section failed to show any possibilities of production and the project plugged back to test the Dean.

Plymouth Oil Company No. 1 W. R. Morris, Southeast Martin County wildcat has reached 6,991 feet in Permian shale and is trying to gain lost circulation.

It is contracted to 8,000 feet to try for production in the Spraberry. So far it has not logged any shows of oil or gas in any zone it has penetrated.

Top of the Grayburg-Permian at 3,470 feet. Top of the San Andres-Permian is at 3,120 feet. Elevation is 2,712 feet.

Location is 690 feet from west and 1,980 feet from south lines of section 7, block 35, T-1-S, T&P survey.

**Northeast of Stanton**  
It is one and one-half miles northeast of the town of Stanton.

Argo Oil Corporation has resumed operations at its No. 1 Brown, a Pennsylvanian failure in North-Central Martin County. Operator is now drilling plugs at

8,250 feet and will clean out to the old total depth of 10,606 feet in lower Pennsylvanian and then drill ahead to the Ellenburger.

That formation is expected above 12,000 feet.

The project was plugged on total depth of 10,606 feet in November, 1951. The project was re-entered in December of the same year and the Spraberry, Dean and Strawn sections were re-tested without developing commercial production.

Location of No. 1 Brown is 660 feet from north and west lines of section 15, block 36, T-2-S, T&P survey and 17 miles northwest of Stanton.

**Running Surveys**  
Phillips Petroleum Company No. 1-C Schar (Scharbauer Cattle Company), Spraberry wildcat in Southwest Martin County, is at a total depth of 9,018 feet and is running electric logs.

Operator took a drillstem test from 8,740 feet. Tool was open one hour. Recovery was 20 feet of mud with no shows of oil or gas.

The project had already reached its contract depth of 9,000 feet in Spraberry.

Location is 1,320 feet from south and 7,000 feet from west lines of section 325, LaSalle School land survey and four and one-half miles north of the discovery well of the Glass-Spra-

berry field and four miles west of the shallow Mabee pool.

Stanolind Oil & Gas Company is drilling below 2,790 feet in anhydrite on its No. 1 Marion Flynt, a 14,500-foot wildcat in Central-West Martin County.

It is located 28 miles north of Midland and 24 miles southwest of Stanton. Drillsite is 5,025 feet from east and 6,000 feet from south lines of league 248, Hartley County School Land survey.

The project also spots 660 feet from south and west lines of labor 12, league 258, Hartley County School Land survey.

The scheduled destination of 14,500 feet is calculated to take the wildcat into the Ellenburger.

**Preparing to Test**  
Stanolind No. 1 Cowden, slatle 14,000-foot wildcat in extreme Southwest Martin County, is at total depth of 8,144 feet in Spraberry sand and is preparing to take a drillstem test.

Official top of the Spraberry has not been reported. The section being tested had logged some slight oil signs.

The wildcat is due to continue drilling until it tests the Ellenburger.

Location is 660 feet from south and east lines of the Southwest quarter of section 30, block 40, T-1-N, T&P survey. It is 10 miles northeast of the city of Midland

and 30 miles west of Stanton. It is also six miles southwest of the Glass-multipay field and six and one-half miles south of the Mabee field.

**Making Hole**  
DeKalb Agricultural Association, Inc., No. 1 Kitta Belle (Mrs. Richard H.) Knox, scheduled 12,500-foot wildcat in Northwest Martin County, is drilling below 8,991 feet in sandy shale and lime.

It is 11 miles north of Tarzan and 660 feet from north and 2,777.7 feet from west lines of league 253, Ward County School Land survey.

Pan American Production Company and others No. 3 F. D. Breedlove, northeast stepout two-well Breedlove field in extreme Northwest Martin County, is making hole below 11,770 feet in lime and shale.

It is to drill around 12,200 feet to test the Devonian pay of the Breedlove field.

**Location Reported**  
Location is 2,300 feet from south and 1,980 feet from east lines of section 258, Briscoe County School Land survey.

That puts it 13 1/2 miles northwest of Tarzan.

ener of the Breedlove field. It is also due to dig to about 12,200 feet to try for production in the Devonian.

Location 660 feet from north and 5,940 feet from east lines of league 255, Briscoe County School Land survey. It is 12 1/2 miles northwest of Tarzan.

**Digging in Dolomite**  
Tom D. Fowler of Midland and associates No. 1 Tant Lindsey, Southwest Martin County wildcat to 5,000 feet to test through the Grayberg-Permian had reached 4,040 feet in dolomite and was drilling ahead.

Top of the Grayburg was called at 2,955 feet. Derrick floor elevation is 2,778 feet. No shows of oil and no possibility had been logged in the section of the Grayburg which had been penetrated down to 4,040 feet.

Operators expect to run casing after making a little more hole and then drill ahead into the zone which is expected to be porous and which might carry oil and gas.

Location is 660 feet from north and west lines of the northwest quarter of section 16, block 38, T-1-N, T&P survey.

**West of Stanton**  
It is 14 miles west and slightly north of Stanton and approximately the same distance northeast of Midland.

# CRUMBS

From Exchange Table

Sterling City is on the road to being all "lit up," and that to be soon, so reported the Sterling City News-Record last week. A committee from the Lions Club and the County worked out a route the lighting project is to take. The 21 flood lights will go up and down the highway street in Sterling City from the Baptist church to the Methodist church. Four of the powerful lights will be placed on the courthouse square—one at the hospital, one at the Church of Christ and one at the Presbyterian church. The West Texas Utilities Co. will install the lighting system.

After 12 years of serving Glasscock County as sheriff, Walter Teale has withdrawn his candidacy for re-election. At the time he filed his name for re-election he had no opponent. As soon as he learned that S. F. Bell had filed for sheriff, Teale withdrew, saying he now feels free to enter business for himself.

Fifty years experience in the drug business is a long time, but that's the record chalked up behind Shine Phillips, Big Spring who is holding a formal opening of his new drug store Thursday (today), in Big Spring. The Big Spring Weekly News says: "Shine is not only a darn good druggist — he is a darn good citizen and booster for Big Spring." Phillips is author of the book "Big Spring." Lots of folks in Martin County are personally acquainted with Shine Phillips and they have high praise in speaking of him, and wish for him unbounded success in his

new and modern drug store and building.

Re-action to the new water ordinance passed by the city of Big Spring last week, the fastest single selling merchandise in one day were lift pumps to be fitted to air conditioners which allow the same water to be used over and over until completely evaporated. The new ordinance was passed owing to the very critical condition of the city water supply. The Big Spring Daily Herald said: "The new ordinance specifically prohibits the use of water for washing business and residential buildings, outhouses, garages, sheds, driveways, and sidewalks, and also for washing any type of automobile, truck, or water for irrigating any ground, lawn, shrub, flower, tree, and garden plant." And this is what brought on the rush for lift pumps — "and only those water air conditioners that collect water and re-circulate it."

Every citizen in Stanton should overflow with gratitude for the water situation here hasn't reached the stage of placing any restrictions on the amount of water the consumer uses. Stanton and its area is going through the same drought period as Big Spring and many towns in West Texas. With the serious water shortage existing in the towns and the rigid restriction placed on the amount of water used, Stanton is moving right along with plenty of water for the customers. But with all the heavy load of providing water to meet the demands made upon it to provide sufficient water for local consumption, the Martin County underground water reservoir will soon be called upon to provide many million gallons of water to go out of the county. This edition has his finger crossed on

the time arriving when the reservoir fails to produce.

The penalty to be assessed to a Big Spring water user fails to comply with law set down in the ordinance is a "fine of not less than \$10 and not more than \$100 for the first offense, and the second offense, the person's place will be cut off and not resumed until such person shall have posted an approved \$500 bond payable to the city."

From reading a communication-written by the Baptist minister and published in the Mitchell County News, this column gathers that "all's not well" with the "goins on" at the Mexican dance hall in Loraine. One Saturday night when a Mexican policeman attempted to arrest an unruly one of his color and extraction, he was sent to the hospital for treatment of several stab wounds, and on the same night, according to the minister, charged there were more guns than one fired by the one Mexican who was arrested for the offense.

In closing his letter to the Loraine newspaper the minister said: "If I am asked to conduct the funeral for some victim of this heathen activity I will feel it keenly my duty to fix the responsibility without mincing any words." Fair enough!

The Baird Star sent an uppercut to the chin of young boys in the community who have been engaging in the game of stealing food from picnickers at the city park. The Star charged upon one occasion before a group of picnickers gathered at the park could spread their food for the meal, boys slipped around and stole the food and broke the dishes. The Star advised picnickers using the park: "When you go to the park for a picnic, you'd better take a club along, it might be advisable to leave your best dishes at home." The Star editor wondered "if such behavior was a reflection upon the parents more than upon the children." That's the 64-dollar-question waiting a correct answer.

The public school in that progressive Howard County town of Coahoma, has just completed a hard-surfaced tennis courts, and was dedicated last week. Obie Bristow, one of this area's prom-

inent men in athletic sports, as well as making the race for State Representative from this district, was one of the speakers at the dedication ceremony, and also presented the school with four new tennis racquets and two cans of tennis balls. The new courts cost the school \$1,500.

Printers of today having at their fingertips the latest and most modern printing equipment — automatic newspaper presses and job presses, linotype machines and many and various kinds of labor-saving devices, laboring under the impression of having a "slave-driving" time to make a living, should look back 50 or 60 years ago and see what the printer of that day had to go through with, they would push their trade about the hard work they have to do for the small salary they are getting.

Here is a sample of the experience and a bit of local color attached to it. The Publishers' Auxiliary has the credit for publishing the information that Charles Harris, editor of the Canton (Miss.) Madison County Herald, was asked the question by the interviewer how he got into the newspaper business, to which he replied: "Why does a fish swim? Seems that heredity is responsible. My paternal grandfather was an editor. My father (the late C. N. Harris) was an editor. As a kid, I stood on a soap box setting type by hand. Later I shook hands with my Pa's George Washington hand press in the office of the Big Spring (Tex.) Pantagraph."

This part of the information, naming the Big Spring newspaper, this column leaves to Joe Pickle, managing editor of the Big Spring Daily Herald, and Joe Hayden, editor of the Big Spring Weekly News, to look up the re-

Stanton

ord of the Pantagraph, the newspaper on which the Mississippi editor got his first "baptism of fire" in learning the printer's trade.

Editor Harris covered considerable ground relating to incidents that happened to him in his early day newspaper experience.

We believe printers know less about the value of a dollar (and I have a right to make that charge — I'm still a member of the old school), than members of any other profession. Harris' first deal for a newspaper back in 1905, will provide an iron-clad clinch to that argument. He paid \$129 for a plant, but soon found out as he said, "paid \$400 too much."

With all of his ups and downs he experienced since that first day he mounted a soap box and with printer's stick in hand went to setting type by hand for his Day on the Big Spring Pantagraph, to-date, at his 69 years of age, Harris has a modern 2-story brick office building, modern newspaper and job plants, equipped with two model 14 linotypes, a Goss Comet press, a Meihle vertical, Kluge, Meihle cylinder, Davidson offset press, two open jobbers, Baum folder, two Rosback perforators, two saw trimmers, an Elrod strip caster, Boston No. 4 stitcher, Hammond Easy-Kaster, and Challenge drill. His printshop building is sound-proof and air-conditioned.

RICH! Well, Editor Harris is in the eyes of the printing trade.

## SCIENTISTS SEEK NEW HORMONE TO AID CROPS

AUSTIN — Scientists are seeking a new flowering hormone which could give farmers closer control over crop production, Dr. Earl Clemens Hamner, University of Texas visiting lecturer, says.

The new hormone, if isolated would allow the farmer to determine when plants would flower, thus helping him take advantage of favorable weather and market conditions and increase production.

The food bill of the more than 150 million American people is enormous. But the Chamber of Commerce of the United States notes that the taxes collected by the federal, state and local governments amount to even more than the total cost of food. Taxes take around a third of the national income.

American natives were called Indians because Columbus thought he had reached India.

## You can swing it if you try

HAVE you, by any chance, been casting eyes at a Buick, and promising yourself that someday you will take the Big Step and have one all your own?

Let us whisper something to you. The "big step" isn't big at all.

We know that's true, because such a high percentage of present Buick owners traded in a car tagged as belonging in "the low-priced field."

So why not set your sights on this star performer?

Why not enjoy big-car comfort — big-car power — big-car prestige for your money?

There's one of these lively lovelies waiting for you to come in and try it.

Get the feel of its mighty Fireball 8 Engine, that's a gas-saving high-compression valve-in-head. You could pay \$300 to \$400 more for a car that doesn't match its horsepower.

Get the feel of Dynaflo Drive\*, that lets you ride relaxed—feeds a silken flow of power — and at the same time cuts down on upkeep costs, by protecting the engine, the rear end, and even the tires, from driving strains.

Get the feel of a ride that cost a million dollars and more for

controls of end-sway and side-roll and vertical "throw" — for X-bracing the frame and V-bracing the torque-tube keel — for a total of 15 ride-engineering features.

One thing you'll know for sure when you've tried it. This car wasn't "built to a price." It's a Buick through and through.

But the fact remains that — when you check the price of a Buick SPECIAL against the price tags on so-called "low-priced cars" — you'll find out you can swing it if you really want to.

And brother, will that make your family happy!

Equipment, accessories, trim and models are subject to change without notice. \*Standard on Roadmaster, optional at extra cost on other Series. †Optional at extra cost on Roadmaster only.

ONLY BUICK PROVIDES THEM ALL

DYNAFLO DRIVE\* — great boon to easier driving, proved on more than a million Buicks

FIREBALL 8 ENGINE — of valve-in-head design, makes high compression count for more

NEW WIDE-BAND BRAKES — for smoother, more positive control

MILLION DOLLAR RIDE — with 4-wheel coil springing and road-steady torque-tube

TOP-CAPACITY TRUNKS — more luggage room than ever in most models

NEW TWO-TONE INTERIORS — in most models, grace Buick's Body by Fisher

SWEEPSPEAR STYLING — adds gleaming smartness to all models

Plus These, Too, On ROADMASTER

AIRPOWER CARBURETION — with highest horsepower in Buick history. MORE MILES PER GALLON . . . POWER STEERING† — greatly eases parking and turning, without losing that firm feel . . . SILENCE — so complete you can speak in whispers under way.

Sure is true for '52

# POLKING the Cradle Back in Style

(continues from page 1)  
 July 29 through the years the question of whether to rock or not to rock the baby has been debated by the public and the medical profession alike. A few years back the picture of a cradle for an infant was so closely allied to old-fashioned notions that it always brought a smile to the lips of the modern generation. Time has turned in mode again, and the picture of a mother gently rocking her child as she hums a little song is as up-to-the-minute as the policy of letting the infant work out his own feeding schedule.

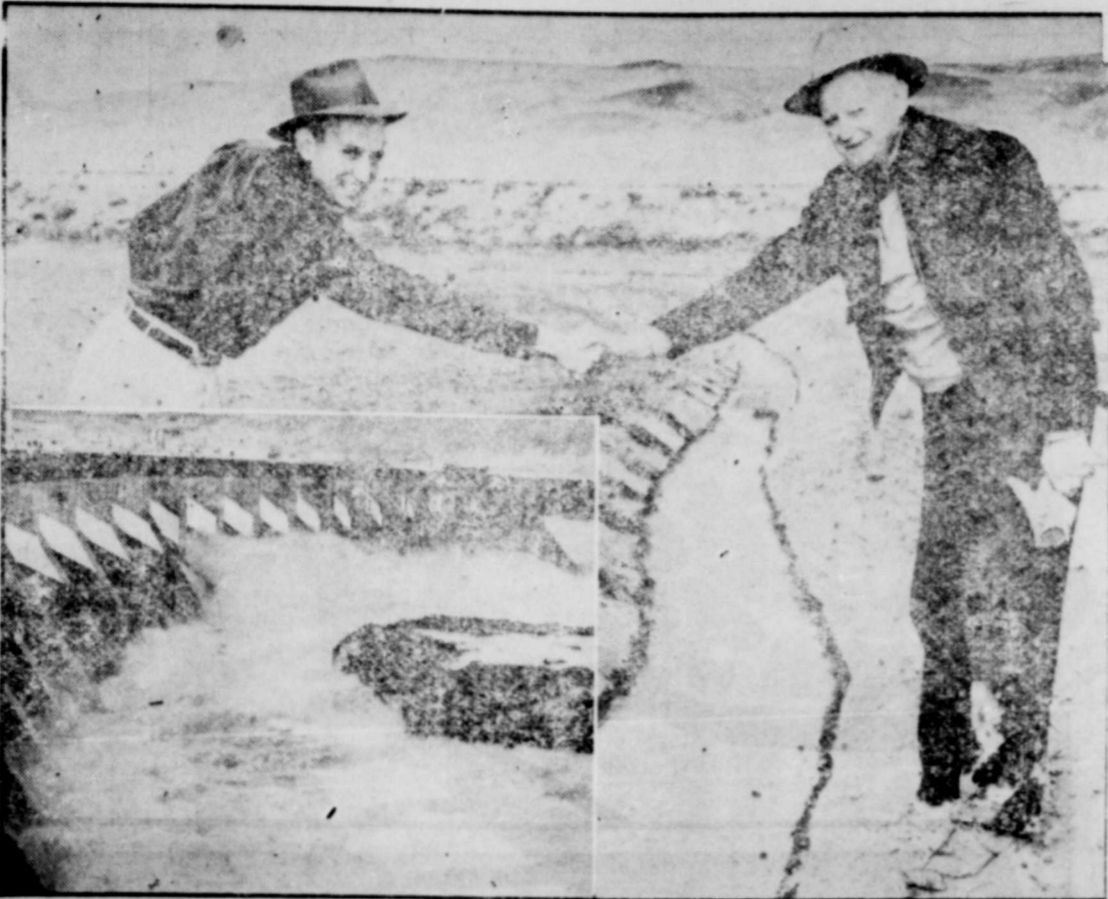

**Lullaby Recommended**  
 These changes in policies have rocked back and forth since mankind first discovered that he could exert some control over the health of his body. Back in 150 A. D. in Rome the question of rocking the baby was a medical topic of the day and Galen, the medical scholar who set up regulations that held sway for 1500 years, took a firm stand in favor of gentle rocking, accompanied by a lullaby. He implied that the rocking gave the internal organs the motion they required and the lullaby seemed to be the motion to sway the mind.

He had bitter opponents for ideas back in these days. Different ideas about health are as healthy for the study of medicine, keeping it in motion and alive, as the rocking motion of each person is vital to his health. Motion is recognized today as the keynote of life. All parts of the body, even the tiny cells, are constantly undergoing some activity. There must be motion to retain life.

**Pendulum of a Clock**  
 Like the pendulum of a clock, the organs of the body follow a rocking motion. Every organ is cradled in a sac which sets the limits of the rocking. Without the power to rock or swing, the organ is unable to perform its duty.

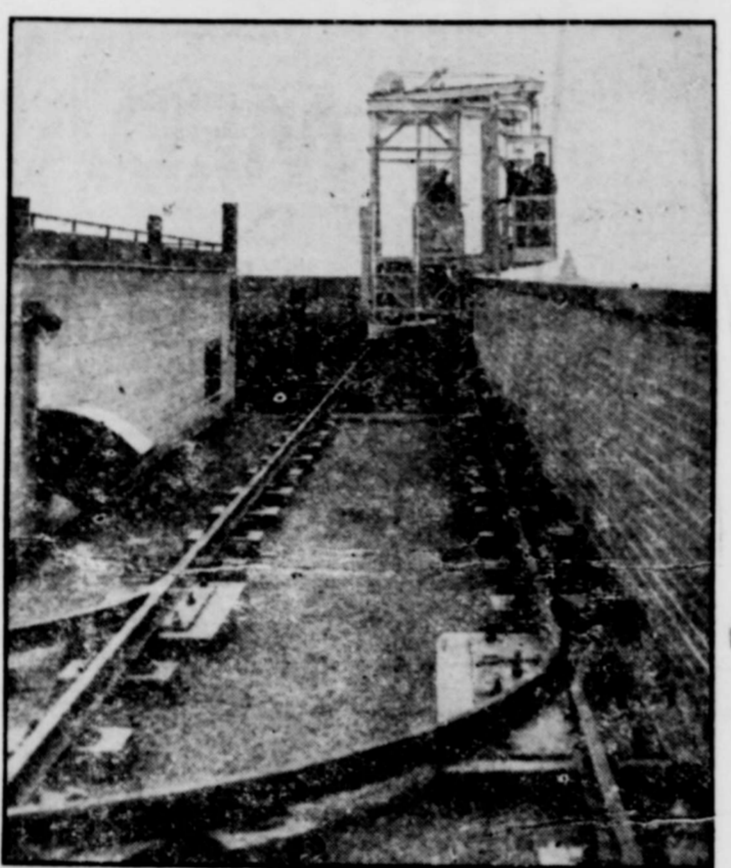

"Stasis" is the medical word for lack of motion, whether it be of the bloodstream or the organs of the body. Stasis in your body, like static on your radio, causes discord. There is a slight pause in the healthy swaying of the parts of the body. When the pendulum of a clock reaches as far to one side as it can go, there is a pause before it swings back. If it gets stuck and fails to swing back, there is lack of motion similar to that caused by adhesions in the body, when one organ or part of the body grows to another, causing a stickiness that interferes with the swing and sway motion. The organs of the body may be considered as the works of many different clocks. The bloodstream and fluid channels of the body are the "springs" of your physical clockwork. Before men learned to coil up wire and fix the spring of a clock, clocks were run by drops of water, comparable to the modern clock springs. The water flowed past a regulator into a basin. In the basin was a tall notched stick set in a cork. As the basin filled, the cork rose and the notches on the stick turned the hands around a numbered disk, the clock face.

Different organs of the body have different clock mechanism but they all need that working of fluid, the springs of their clockwork, to keep them working. Exercise keeps the springs feeding the different parts of the body. Too much exercise winds the springs up too tight, making the organs tick too fast. Too little exercise has the effect of letting the clock run down, not

**WELCOME ROAR FOR THIRSTY LAND**—As just-delivered irrigation water flows onto his farm at Ephrata, Wash., Vic Bell, left, receives congratulations from his father, Frank Bell who is one of the "fathers" of a project that started new construction on the Rock Island dam, inset, at Wenatchee, Wash., on the Columbia River. The task of raising the lake behind the dam, 13 feet, will boost its present 80,000-watt electrical output by 150,000 watts and will reward Columbia Basin farmers with millions of reclaimed acres by the time it is completed in 1953.

giving the vital organs of the body enough drops of water to keep their clocks functioning efficiently.

**EASES THE PAIN**—Confronted with a 24-story glass and stainless steel building, the designers of the new Lever Brothers' building in New York decided to install a special elevator to solve the window-washing problem. The trolley, above, runs on tracks around the periphery of the roof and from it the elevator is lowered to the desired level.

## Had to Go to Frankfort, Kentucky To Find Out About Bill Collins

Don't let the caption to this little story mislead you, readers of The Reporter. The writer didn't really hop an airplane and make the trip to Frankfort, Ky., to get the low down on just what Bill Collins, editor of the Midland Reporter-Telegram did at a recent meeting of the South Plains Press Association at Lubbock, or whether he really attended the convention. Bill had informed the writer he intended attending the Lubbock meeting but facts that he did attend, we never knew.

But the Publishers' Auxiliary, a trade journal for the printing trade, and published at Frankfort, Kentucky, arrived this week on the writer's desk, and located down at the bottom of the front page in the right-hand corner, the "cat jumped out of the bag" as to Bill Collins' presence at the meeting of the South Plains Press Association on May 2.

The story carried a two-line double column head: "Readers Want News of the World But Still Like Lubbock: Collins," date lined Lubbock.

Peering at the double column lead lines to the story, we read a quotation by Collins in his talk that extremely warmed the "cockles of (or in, I don't know which) my heart" because it is the firm foundation on which all live and successful weekly newspapers are built. Bill said: "From the little two or three line personal to the city council feature"—that sells newspapers in the South Plains country. To this writer Billy's quoted words was a recognition by the metropolitan daily newspapers that weekly newspapers like The Stanton Reporter is on the right track of successful newspapering when a representative of the big and successful daily newspapers place emphasis on the "two or three line personal to the city council features"—that's right up the Reporter's alley.

And here again Collins, speaking from the editorial chair of a big daily newspaper, recognizes the ability of the weekly press in selecting the news most important to the reading public, when carrying along what Mr. and Mrs. Local citizen are interested in the way of news: "... but first and perhaps more than anything else, they are interested in what goes on in the old home town."

Here, in his address, Collins included the daily newspapers with the weekly newspapers. He said: "... but I still insist that the newspapers that give the local news top play in preparation, space and position, are the bet-

ter read and more popular. That holds for both dailies and weeklies."

Collins ranged into the field that offered fertile grounds for providing the news, including federal agencies, railway and bus stations, barbershops and beauty shops, tourist courts, motels, schools, churches, women's clubs, and service stations.

The writer agrees with Collins on the sources he mentioned above as fertile territory for gathering news, but how many reporters connected with weekly newspaper visit these places every week in search of not only

## PERSONALS

## Now-choice of FIVE Great Engines

New 1952 Ford F-7 is powered with the completely new LOW-FRICTION 145-h.p. V-8!

## in Ford Trucks for '52!

### 3 NEW Low-Friction engines!

Gas savings up to 14%!

Ordinarily, engine friction alone can steal as much as 30% of the power your engine develops. Ford's new short piston stroke cuts piston travel, reduces gas sacrificed to engine friction, delivers more of the power developed! These three new engines, PLUS the famous 239 cu. in. V-8 (now 106 h.p.), the 112-h.p. Big Six, the new Courier Custom Delivery, mean that there's a Ford Truck that's exactly right for your kind of job—at a rock-bottom per-mile running cost!

Availability of equipment, accessories and tires as illustrated is dependent on material supply conditions. F.D.A.F.

Completely PROVED under toughest conditions! • High-compression punch with regular gas!

**101-H.P. COST CLIPPER SIX:** New LOW-FRICTION design, 215 cu. in. Available Series F-1 thru F-5.

**105-H.P. V-8:** 239 cu. in. Proved in 2,000,000 trucks. Available Series F-1 thru F-6.

**155-H.P. CARGO KING V-8:** New LOW-FRICTION design, 317 cu. in. Standard in Series F-8 Big Jobs.

**112-H.P. BIG SIX:** 254 cu. in. Available in Series F-6 only, 110 h.p. in Series F-6 C.O.E.

**145-H.P. CARGO KING V-8:** New LOW-FRICTION design, 279 cu. in. Standard in Series F-7 Big Jobs.

**Cost still less to run!**

## You're money ahead when you buy on these PLAIN HARD FACTS

**RUGGED** as they come!

first in demand in value in sales

MORE CHEVROLET TRUCKS IN USE THAN ANY OTHER MAKE!

Stack up what you get for what you pay... and join the nation's largest group of truck users by choosing Chevrolet

By far the biggest number of truck users today are Chevrolet owners... and for good hard-headed reasons. Because what they get is this:

Low Cost—in purchase price and in upkeep. A truck that gets the job

done. A truck that's rugged, long lasting.

Take a look at the four facts below... and see why you, too, will be money ahead with a Chevrolet truck. Come in and see us about it!

**FACT NO. 1**  
 Save money on purchase price  
 Stack up a Chevrolet truck against any other truck with comparable specifications. You'll find the Chevrolet truck lists for less.

**FACT NO. 2**  
 Save money on operating costs  
 Hundreds of thousands of truck users have proved to their own satisfaction that Chevrolet costs the least of all to own and maintain.

**FACT NO. 3**  
 Save money on job efficiency  
 Chevrolet trucks are factory-matched to your payload requirements. You don't buy "too much or too little truck."

**FACT NO. 4**  
 Save money on low depreciation  
 Records show that Chevrolet trucks traditionally bring more money at resale than any other make which costs about the same new.

**Valley View  
HD Club  
Holds Meeting**

Mrs. G. Tunnel was hostess to a recent meeting of the Valley View Home Demonstration Club. The meeting was opened with the club prayer. Twelve members answered the roll, giving suggestions on using frozen foods. Nine club members from Martin County attended the district meeting held at McCamey. Mrs. Delmar Hamm was the club delegate, and upon her return, gave a report on the meeting. Reports were also given of the girls dress review and tea, held recently at the court house. Mrs. Mildred Eiland, home demonstration agent, gave a talk on "Accessories in the Home." The next meeting will be held May 23, in the home of Mrs. Joyce Walker, in the Valley View community.

**FIRST METHODIST CHURCH  
James E. Harrell, Pastor**

Family night will be observed Saturday night, sponsored by the men of the church. Rev. William McReynolds, son of Mr. and Mrs. Howard McReynolds, is to be the speaker. A meal will be served and everyone is invited to come and bring the entire family. The officers of the Women's Society of Christian Service will be installed by the Pastor Sunday morning. The Pastor is speaking Sunday morning on, "Thwarted Purposes Leading to Crowning Efforts." Sunday night his message is to be "Learning To Pray." We welcome visitors to all our services.

**THE HAPPIEST HOMES HAVE ELECTRIC RANGES**

Perhaps that's because the average kitchen is the work center of the home and a modern ELECTRIC RANGE eliminates so much work, saves so much time and energy and provides such tasty meals.

Or, maybe it's because an ELECTRIC RANGE is so thrifty. Dependable, low-cost electric service, coupled with the many advantages of modern electric ranges, adds up to the best bargain in the family budget. And that's important to every family.

enjoy These Advantages EVERY DAY... Cook the Modern ELECTRIC Way!

**FAST! CLEAN! THRIFTY!** **COOL! AUTOMATIC! HEALTHFUL!**

Take this tip... see your dealer right away. He has an ELECTRIC RANGE in a size and price to fit your needs.

All matter for publication by societies or organizations for which an admission is charged, a charge of 3 cents a word will be made.

## POLITICAL BATTLE RAGES ON

The struggle for the Republican presidential nomination has really become a horse race. To all practical purposes, General Eisenhower and Senator Taft are running neck and neck so far as solidly pledged votes are concerned. Some eager partisans on both sides still claim that their man has a commanding lead and that the prize is practically in the bag, but this is the sort of wishful thinking that is ever a part of the great game of politics. Eisenhower is strongest along and near the Atlantic seaboard—his extremely impressive victory in Massachusetts demonstrated. Taft, on the other hand, pulls his greatest weight in the mid-west and parts of the south. The Eisenhower camp was particularly flattered by the fact that he attracted many Democratic voters in the State primary. This, they argue, should be the clincher, on grounds that no GOP candidate can win the presidency without cutting deep into the ranks of the Democrats and independent voters.

In any event, nothing has been decided. It is perfectly possible, for example, though not probable, that by convention time either Taft or Eisenhower could have enough delegates (603) to win the nomination on the first ballot. It is also perfectly possible that they would be so nearly equal in strength as to make the nomination of either impossible, and so force the choice of someone else. This last possibility, however, now seems very unlikely.

One other candidate will have a single bloc of delegates when the convention convenes. That candidate is Governor Warren, with 70 California and six Wisconsin votes. These votes present powerful trading material. Governor Warren is making an aggressive effort to capture Oregon's 18 delegates in the May 16 primary. The forecast is that he will get a substantial popular vote, but that Eisenhower will get the delegates.

There is one facet to this race that has some cool heads worried. Bitterness is beginning to appear among both Taft and Eisenhower supporters. There is a tendency to get down into the political mud and start slinging it. The cool heads believe that the respective campaigns for the nomination should be conducted on a high political level, as political levels go. First of all, they say, both General and Senator are obviously men of the highest character, sincerity and patriotism. You can disagree with their views, but you can hardly call them cheap run-of-the-mill politicians. Secondly, the argument runs, the highest possible degree of unity among anti-administration forces will be needed if a GOP victory is to be won November, and this unity could be seriously undermined by mudslinging between the Taft and Eisenhower backers. As for the two personally, it certainly isn't to be expected that they will go for dirty fighting.

The Democrats are in a pickle. The professionals within the party don't want Senator Kefauver, but he has swamped the field in the primaries. They like Governor Stevenson, an able man with a fine record, but as he has shown no inclination to seek the nomination and he is not well known nationally. Administration support was strong for Senator Kerr, but he has shown no ability to obtain widespread popular support.

## REALITY OUT OF DREAMS

"Capitalism will stand or fall in direct ratio to the support it receives from the public. That support will be fully forthcoming only if all the people share in capitalism and all the people know that they do share in capitalism."

That statement was made by the head of the New York Stock Exchange, in a speech made during Invest in America Week. It is from the sound belief that the best way to preserve our economic system is to get everyone possible to participate directly in that system through ownership of shares in the enterprises that provide us with all our unequalled living standards. No one knows how many people own shares in American business. The first stockholder census is now being taken by the Book-Of-the-Month Club, in cooperation with the securities industry and thousands of corporations and banks. It is expected that the findings will be ready this summer. Whatever the number is—current estimates place it at some 15,000,000—these men and women represent a solid core of strength against the phony blandishments of communists, socialists, and all others who would weaken or destroy the system which made us great. And every time another man or woman buys a share of stock in some corporation, our strength increases—as does our security as a free people. There is an intensely practical aspect to this matter. When we buy our "shares in America" we do so in the hope of making a profit. The much-reviled profit motive is still the most powerful force for progress that exists. It is what makes men take risks—what builds factories and devises new products and creates jobs. It has helped make reality out of dreams.

## Bible Comment:

### Judah's Unsteady Course Indicates Lack of Morality

JUDAH became the Southern Kingdom of Israel after the division of the country into the southern and northern kingdoms by Jeroboam's successful revolt against Rehoboam, son and successor of Solomon.

The strength of David and the glory of Solomon waned when a people who ought to have been united with a common heritage in history and religion became strife-torn and divided. In this history there is a warning for modern nations.

The freedom that our democratic lands accord in speech and action is being used by some to promote discord and draw lines of hate and prejudice, sometimes in the sacred name of Christ and Christianity.

Along that way so surely lies ruin that all who love God must set themselves to do everything possible to promote the national strength that can come only to a people united in justice and righteousness.

The Northern Kingdom, as we have seen, was the first to fall. It was swept away eight centuries before Christ when the armies of Assyria came down upon it. Its people became known to history as the "Lost Ten Tribes." The Southern Kingdom survived for another 136 years, but it also went down before the armies of Babylon.

There was an interlude during this 136 years when a good king, Hezekiah, and the noble prophet Isaiah, were dominant in Judah. But at best, Judah's course was unsteady. Periods of better living, wise kingly guidance, and welfare were intermixed with periods of bad leadership and idolatry.

Hezekiah himself, though a good king, was by no means perfect. He did a foolish thing when he vainly displayed to envoys from the king of Babylon his wealth and the treasures of the palace. The prospect of loot, in ancient as in modern times, was a fruitful cause of war and invasion.

## NEW METHOD FOUND TO AID RANCH SOILS

AUSTIN, Texas—A radical new method for improving farm and ranch soils is the goal of two University of Texas scientists. Drs. Orville Wyss and Wilson B. Stone are seeking to develop a special strain of azotobacter organisms which gather nitrogen from the air to enrich soils. Azotobacter are found in all soils.

If the scientists are successful farmers and ranchers can improve soils permanently by adding the "pedigreed" organisms.

Leonardo da Vinci, the painter, wrote from right to left.

## Test Your Intelligence

Score 10 points for each correct answer in the first six questions:

1. What kind of bird was shot by the "Ancient Mariner" in the poem?  
—eagle —condor —albatross —pigeon
2. What is the galley of a ship:  
—front —rear —mast —kitchen
3. The Republic of Liberia is in:  
—Africa —Asia —Europe —South America
4. Which of the following is not a musical instrument:  
—tambourine —oboe —buffoon —balalaika
5. In an airplane, the tachometer indicates:  
—how fast the propeller is turning —rate of climb  
—ceiling —weather conditions
6. In Britain a pillar-box is used for:  
—rubbish —mail —games —watering horses
7. Listed below are four famous trophies and opposite them, scrambled up, the sports in which they are awarded. Match them, scoring 10 points for each correct answer.  
(A) Thompson —Tennis  
(B) Stanley —Motor Boating  
(C) Harmsworth —Aviation  
(D) Davis —Hockey

Total your points. A score of 0-20 is poor; 30-60, average; 70-80, superior; 90-100, very superior.

## QUESTIONS AND ANSWERS

Q—Is a down payment required for a GI business loan?

A—No. Neither the law nor recent credit control regulations require a down payment for a GI business loan. But your lender has the right to ask for one if he chooses.

Q—I'm studying engineering under the GI Bill. I want to drop my math course for the time being. Am I allowed to do so under VA's post-cut-off date regulations?

A—Yes. VA's post-cut-off-date regulations apply to changes of over-all programs of study. Therefore, dropping or adding a course, within a program of study, is permitted.

Q—I'm drawing a pension, and I wonder if I would be eligible for the increased maximum of \$120 a month which goes to veterans who need regular aid and attendance of another person. My doctor has prescribed rest in bed for a couple of months, while I recover from an illness, and I need constant aid while I'm in bed.

A—You would not be entitled to the \$120-a-month rate during your temporary confinement to bed. The increase is for those who are permanently in need of regular aid.

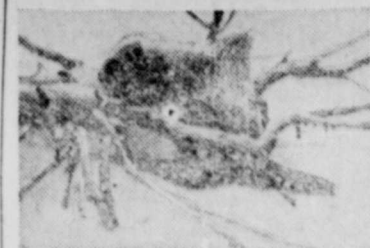

Esther Cleveland, born in 1893, was the only child ever born in the White House.

## Texas Keeps 4-H Safety, Health, Recreation Aids

Three national 4-H programs in which club boys and girls help to make rural America safer, healthier and happier, are being continued this year in Texas, the State Club office has announced. They are the Farm and Home Safety, Health Improvement and Recreation-Rural Arts programs, all conducted under the direction of the Cooperative Extension Service.

Illustrative of club members' activities in the three programs, 1951 records show that more than 530,000 members took part in the Farm and Home Safety program checking and correcting accident and fire hazards on home grounds and farmsteads; nearly 750,000 4-Hers improved their own health conditions by their homes and communities, and a half million 4-H boys and girls assisted in developing recreational activities, as well as took part in music and art appreciation.

## THE PORCUPINE

©1951 National Wildlife Federation Porcupine

Some people have the idea that a porcupine can shoot its quills, but that isn't true. While the animal uses its bristles to drive away enemies, it doesn't send the weapons winging through the air.

Instead a porcupine under attack arches its back, raises its quills, and awaits the foe. At the moment its body is touched, the porcupine swings its broad tail and swats its opponent. The stinging blow leaves a patch of quills stuck in the enemy's flesh.

The stiff slender spines are hard to remove, too. Covered with sharp barbs, like the ends of fishhooks, they sink in and cling to the flesh which they stab. An animal wounded in a fight with a porcupine may try for days, without success, to get rid of the quills.

The porcupine is lucky to have this unusual way of defending itself, says the National Wildlife Federation, for it is a slow, stupid animal. It cannot move rapidly, either on the ground or in trees. If it did not have barbed quills, it would be an easy victim of mountain lions, bobcats, and other preying animals.

While it does not run from a fight, the porcupine tries to keep to itself. It likes the life of a hermit, and does not even seek the company of other porcupines.

It may prowls by day or by night, but usually it spends most of the daylight hours in its shelter. Its den may be in a cave, beneath a large rock or a pile of brush, or in a hollow log.

When it comes out of its hiding place, the porcupine roams the woodlands in search of food. It eats some fruit and vegetables, but it is most fond of bark, twigs, buds, and leaves. The worst thing it does is to feast too long in one place. Many a tree has died because a porcupine has chewed away the bark in a circle around the trunk.

When cold weather comes, porcupines make preparations to raise their families. In each den, one baby porcupine is born in the late winter. It is about eleven inches long and weighs slightly more than a pound, but it is strong enough to waddle in six hours and to climb when it is two days old. Right from the start it has a set of sharp quills.

Though they are soon taking care of themselves, the young do not reach full size until they are about three years old. By that age they are three feet long, with six-inch tails, and they weigh between fifteen and twenty pounds. Their quills are yellowish white, mixed with black hairs, and their front teeth are bright orange.

Most North American porcupines live in the deep forests of Canada and the northeastern United States. They are also found in scattered parts of the north and west.

## ANSWERS TO Intelligence Test

- 1—albatross. 2—kitchen. Africa. 4—buffoon. 5—how the propeller is turning. 6—r. 7—(A) Aviation; (B) Hockey; Motor Boating; (D) Tennis.

## MAURY ALBERTS WINS DISTRICT 16 LEGION POST

PECOS.—Maury Alberts, Kermit, was elected commander of American Legion District 16 at the group's convention here.

Other new officers are Robert Brown, Pyote, vice commander; Judge Henry Russell, Pecos, judge advocate; and Marshall Durham, Odessa, sergeant-at-arms.

The new Odessa Women's Post No. 522 was presented a charter to become the third post of ex-servicewomen in Texas.

Also meeting was the Auxiliary with Mrs. Pete Beavers, Pyote, becoming president to succeed Mrs. John F. Crooks, Jr., Odessa. The group also made plans to send delegates to the division meeting at Abilene May 24 and 25.

# POLITICAL CALENDAR

(continued from last week)

July 29 — Returns from precinct conventions to be filed with County Clerk "within 2 days after the precinct convention" for transmittal to the Chairman of the County Executive Committee.

July 29 — "Within 24 hours after primary votes have been canvassed the county chairman shall prepare a tabulated statement of the vote cast for each candidate and shall file said statement by mail "within 48 hours."

July 30 — "County chairman shall within 24 hours after votes have been canvassed" mail to the state chairman complete returns on the votes for candidates for nomination in state and district offices.

August 2 — "Second county convention" meets "on the first Saturday after primary election day."

August 3 — Absentee ballots for second primary may be applied for "at any time not more than 20 days, nor less than 3 days" prior to the date of such election.

August 4 — Candidates appearing on the run-off primary ballot must file sworn statement concerning campaign contributions and expenses "not more than 20 nor less than 15 days preceding the second primary."

August 7 — Candidates in the first primary must file a sworn supplemental statement concerning campaign contributions and expenses "not less (apparently should read MORE) than 10 days after the election."

August 7 — Permanent secretary of the county convention shall transmit a certified list of delegates chosen together with a copy of all resolutions adopted to the Secretary of State "within five (5) days after said county convention."

August 8 — Election contests must be filed "within ten (10) days from the date of declaring the result by the executive committee."

August 8 — Last day for candidates in the run-off primary to file first sworn statement concerning campaign contributions and expenditures.

August 18 — Run-off candidates to file second sworn statement concerning campaign contributions and expenditures "not more than five (5) days nor less than

two (2) days" prior to said run-off primary.

August 18 — Tax collector shall deliver to the chairman of the county executive committee "at least five (5) days before election day" certified supplemental lists of qualified voters for each precinct.

August 19 — Last day to apply for absentee ballot.

August 20 — Last day for run-off candidates to file second sworn statement concerning campaign contributions and expenditures.

August 22 — 7:00 A. M. — County executive committee to distribute primary election supplies to precinct chairman "not less than twenty-four (24) hours prior" to opening of the polls.

August 23 — Second (run-off) primary election held "on the fourth Saturday in August."

August 23rd 1:00 P. M. — County clerk to deliver absentee ballots to special canvassing board.

August 24 — Presiding judges shall seal up ballots, poll lists, tally sheets, etc., and make returns to county clerk "within twenty-four (24) hours after the counting of votes is completed."

August 26 — County executive committee meets "on the following Tuesday" after the primary to canvass and certify election returns.

August 27 — "County chairman shall within twenty-four (24) hours after the votes have been canvassed" prepare a tabulated statement of votes cast for each candidate and file such returns by registered mail "within forty-eight (48) hours" (concluded next week)

SPLASHING FIRST

SLOPPY SECOND

**THE MIRE THE WARRIOR**—Five many of the 26 entrants in the annual Northwest Motorcycle "Mud Race" are still buried in the mire of the rugged course outside Seattle, Wash., as a woman's pique. Kicking up a spray of mud and water, "Donna" Walters, left, of Puyallup, Wash., slips through a deep mud hole as he comes down the home stretch. He slipped his way around the tail-mile bog 15 times to win in one hour and 12 minutes. Donna Walters, right, of Seattle, gets a helping hand after her "mud" splattered out from under her. Donna, one of two women in the race, remounted and finished second. She and Furvell were the only two to actually finish the muddy event.

Socialism charts the course of no return. The Chamber of Commerce of the United States says that history shows that no nation ever has resumed democracy after once embracing socialism. It is a one-way road.

Here's GMC's great new engine for 2½-ton trucks  
**-delivers more power from less weight than anything on the road today!**

**NEW "302" HIGH-COMPRESSION 145 H. P. VALVE-IN-HEAD SIX-CYLINDER GASOLINE TRUCK ENGINE**

Compression Ratio	..... 7.2 to 1
Max. Gross H. P.	..... 145 at 3200 rpm
Net Brake H. P.	..... 130 at 3200 rpm
Engine Weight (dry)	..... 545 lbs.
Bore	..... 4 inches
Stroke	..... 4 inches

New standard equipment in all GMC 2½-ton trucks and tractors. Also available in six-cylinder models.

This new GMC "302" valve-in-head engine excels any other gasoline truck unit of equal power in high-mileage, low-cost performance—for these basic reasons:

- Highest Compression Ratio** of any standard gasoline truck engine ever built—accelerates faster, delivers higher sustained power output.
- Develops 27% More Horsepower**—from regular fuel—than its famous "work horse" predecessor.
- Maximum Power-to-Weight Ratio**—weighs only 3½ pounds per horsepower—as much as 300 pounds less than other engines of equal power—due to new high-efficiency design.
- More Ton-Miles Per Gallon**—less dead weight with higher efficiency means more pay load, more profit in every mile with new "302"-powered GMC 2½ and 3 ton models.

### Shooter

(continued from page one)

to take a sugar cane stalk and after all the sugar content has been extracted use the residue for the cast, pound, washed and broken into tiny fibers, which are fed through a paper-making machine. After all this has been accomplished the "concoction" smells and tastes like tobacco. But the doctor faces a snag. The Federal government is receiving a tax of \$1,500,000,000 from the real tobacco, and should the Doc's new discovery go on the market it would sell at a cheaper price, by far, than real tobacco, — a very decidedly losing proposition for the government. The government collects almost 8c a pack on cigarettes.

THE BIG SPRING DAILY HERALD of last Sunday carried pictures of two tanks, capacity 10,000 barrels of water each, that have been completed ready to be filled with water pumped from the 13 wells that have been drilled in Central Martin County. Two other tanks, holding about 500,000 gallons of water have been installed at the site of the Martin County water field, waiting to be filled. The work on pipe

laying from Odessa to the Martin County water field is being rushed in the hope the line will be ready to provide Odessa with water by June 1.

### BENTLEY'S ADD NEW SERVICE DEPARTMENT

Addition of an electrical wiring and contracting department at Bentley's Home and Auto Supplies, was announced this week by Jack and Coats Bentley, owners. It will be in charge of the stores' heavy appliance manager, Valton Laird.

The store also has added equipment for field servicing of farm implement tires.

The Bentley brothers recently purchased the stock and fixtures of the Firestone Store from John Pinkston and are operating it along with their original Furniture and Appliance business.

Bentley personnel consists of Harold Ervin, paints, floor coverings and venetian blinds; Marvin Byerley, radio technician; James Biggs tire service department supervisor; Mary Winslow, traffic appliance manager; Mrs. Blanche Ford, general office manager; Jack Lacey, used furniture; and Tom Johnson, Mrs.

### STUDY CLUB HOLDS MEETING IN BELVUE DINING ROOM

The Stanton Study Club met last Thursday in the dining room of the Belvue Restaurant, with Mrs. Dee Carter, as hostess.

Mrs. R. B. Whitaker explained Parliamentary Procedure to the members. She stated that most clubs make the mistake of discussing an issue and then asking for a motion. The correct procedure is to ask for a motion. A second to the motion, and then a discussion before the vote. She concluded her program with a comic example of the minutes of an imaginary women's club.

Forum Representative Named During the business hour, it was announced that Mrs. J. E. Moffett had donated a box of

Celia Jasso, and Roosevelt Williams.

### Tommy Davis Feted With Party On Ninth Birthday

Mrs. John Davis gave a birthday party last Saturday for her son, Tommy, on his ninth birthday. Cynthia Mashburn of Midland, assisted with the refreshments.

The large birthday cake was white with pink decorations and individual cakes were served to the guests. After the refreshments were served, those present attended a movie.

Attending were Jo Ann Jones, Dorothy Hull, Barbara Puckett, Cynthia Mashburn, Alfred Johnson, Dwayne Thompson, Lee Standefer, Dick Standefer, Ronnie Evans, Jimmy Hamilton, Helmet Penno, Bill Edwards, Eddie Standefer, Eugene Posey, Weems Williams, Eddie Seago, Terry Shanks, Betty Hedrick, Joan Deavenport, Linda Nichols, Carolyn Manning, Jerry Henson, Porky Britton, Franzelle Britton, Cynthia Britton, Warner Walker, Freddie Houston, David Petree, Betty Petree, Bonnie Messher, Billy Davis and the honoree.

books to the Martin County Library. Mrs. A. E. Murr resigned as the club's representative of the Martin County Forum and Mrs. S. W. Wheeler was elected to fill the vacancy.

This was the last business meeting of the year. A spring luncheon will be held in the dining room of the Belvue Restaurant at 1 p. m., Thursday, May 22.

Apple pie a la mode and coffee were served to Mesdames R. B. Whitaker, S. W. Wheeler, Glenn L. Brown, Dee P. Carter, Dave Foreman, Houston Woody, Millard Hall, J. E. Kelly, Herbert Riley, J. H. Billington, S. A. Wilson, B. F. Smith, A. E. Murr and Miss Maude Alexander.

### McMORRIES' HOST TEACHERS' PARTY

Martin County Judge James McMorries and Mrs. McMorries were hosts Monday night at a party for the Martin County Teachers' Association and other guests given in the I. O. O. F. Hall. Approximately 75 attended.

The fried chicken dinner was prepared and served by the ladies of the Rebekah Lodge. Games were played.

### ALPINE JUDGE

(Continued From Page One) dustry and the men who work in it.

Interest in Juvenile Delinquency Judge Fraser is a member of the state committee for considering legislation for better protection for children. He is known throughout the state for his interest in juvenile delinquency problems and crime prevention. He has addressed many organizations on the subject of juvenile delinquency throughout the state, and presented his plan of Crime Prevention Through Education, in England, Scotland, Norway, Germany, during and after the war.

In addition to the various offices held by Judge Fraser, he has been a regional director of the Big Bend Boy Scout movement and served as president of the Alpine Chamber of Commerce.

He is seeking the post now held by Associate Justice Claude R. Sutton who has announced that he will retire after this term. The district takes in 22 West Texas counties including Martin.

Judge Fraser was admitted to the bar in 1932 and practiced for a while in Austin before moving to Alpine. He is married and the father of one child, Margot, 16, a high school student.

### Stanton Will Be Long Remembered by Beaumont Oil Man

W. H. Stewart of Beaumont, on his return home from making a trip to Midland stopped in Stanton Saturday morning to make a pop call on his friend, J. E. Kelly, of The Reporter force. He stopped at the office, and as is usually the case, Kelly was down at a coffee shop sipping a cup of coffee. But that sort of a rendezvous was right up the alley of Kelly's friend, for he soon joined Kelly. But there was one trait about Kelly his friend Stewart was familiar with, and that was "framing" the other fellow to pay for the coffee. Mr. Stewart was an easy prey — at least he paid for the coffee with Beaumont money.

The sitting at a comfortable coffee table and the stimulant that a cup of coffee provides the body from sipping it put Kelly's friend Stewart in a frame of mind to reminisce on his early day introduction to Stanton and Martin County. It was about 30 years ago when Mr. Stewart lived in Midland, for it was in the year 1925, Mr. Stewart experienced an incident that happened to him on the road leading through the Slaughter ranch in the north part of Martin County as he was traveling in a Ford car on his way home to Midland from a trip he had made to Lubbock. At the time a freezing norther was raging, and arriving at this particular spot in the road on the Slaughter ranch his car went

"dead." The time it required Mr. Stewart to get his car started lacked only a very short time for the dry blizzard to freeze him to death. He managed to make it in to Stanton, and putting up for the night at the old Flanagan Hotel, that has long since been torn down and moved away, he hugged the old coal burning stove that was red hot in the hotel office. Warm enough he thought he went to bed, but no use, the frigid air clung to the marrow of his bones and down stairs and back to the hot stove he went and remained there until it was light enough in the morning to see how to travel to his home in Midland.

Just what another cup of coffee would have brought out of Mr. Stewart, Kelly doesn't even want to be quoted as making a guess.

Mr. Stewart had brought his daughter, Margaret, from their home in Beaumont to Midland, where the daughter has employment with the KCRS radio station. Margaret joined Franchelle Moore, granddaughter of Mr. and Mrs. J. E. Kelly of Stanton, in sharing an apartment in Midland. Franchelle is employed in the advertising department of the Midland Reporter-Telegram. The two young ladies graduated from Texas State College for Women, Denton, the same year.

From Stanton Mr. Stewart went to Snyder for a three-day stay on oil business for his company in Beaumont.

### BUY STOCK FARM NEAR PARIS

Mr. and Mrs. Oliver Boyce, have moved to a small stock farm they purchased recently, near Paris. Mrs. Boyce is the daughter of Mr. and Mrs. Dudley Anderson of Stanton.

Dudley Anderson, speaking for the young couple, says the grass up in the Paris section is shoe-top deep and cattle were lying down in it with just their ears showing, "full as ticks", enjoying their culds, and in perfect contentment. But what caught Dudley's eye, was not far from his son-in-law's farm, was the fine fishing lake.

Mr. and Mrs. Anderson have recently returned from Paris, where they helped the household effects of Mr. and Mrs. Boyce and help them get settled in their new home.

### PERSONALS

Mr. and Mrs. G. A. Bridges celebrated their 40th wedding anniversary Sunday.

Those present were their children, Mr. and Mrs. Bascom Bridges and sons of Big Spring, Mr. and Mrs. Henry Bridges and daughters of Lamesa, Mr. and Mrs. Al Baugh and Patsy of Stamford, Mr. and Mrs. Walter Graves and Granville of Stanton, and Henry Holmes of Big Spring.

Weekend visitors in the home of Mr. and Mrs. Dan Green were their children, Mr. and Mrs. C. L. Clonimer of Fort Worth, Mr. and Mrs. Otis Green of Lamesa, and Mr. and Mrs. Leo Green of Midland.

"Where Your Dollars Have More Cents"

Stanton, Texas

Every 1/2 Gallon of each year in fact, is only a coat Can you think of buying?

## WATER SPREAD OF THE W. E. KELLY IRRIGATED FARM WEST OF TOWN

To people living in the areas of West Texas who have been suffering from the long period of drouth, and whose only sight of water is that drawn from a well, providing a meager supply at that, it would have done their "hearts and souls good" to have seen the water spread in pictures printed in a recent issue of West Texas Field and Ranch, a magazine supplement to the Big Spring Daily Herald.

**Grass Shoe Mouth Deep**  
The front page of the magazine carried a large picture of the irrigated farm of Walter E.

Kelly, located on highway 80, five miles west of Stanton. The picture showed a channel (but to this writer it looked more like a ship canal through which tugboats navigate) brimful of water, and off to the left the picture showed a part of the Kelly irrigated farm, with rows full of water. On the inside pages were individual pictures of the Kelly farm. One showing water flowing from one of the eight-inch wells, from a depth of 145 feet. Another picture of a drag invented by Kelly, drawn by a tractor used for levelling off a plot of land preparatory to receive water to be spread over it, and then planted to crops. A picture of a man standing shoe-top deep in grass was shown. The Big Spring writer said: "The 11 acres of irrigated pasture on the Kelly farm grows too fast for the cattle that are on it and the cattle outnumber the acres." The grasses include Kentucky Rescue 31, perennial rye, orchard grass, Hardin-grass, Broome grass, alfalfa and Madrid clover.

### Wins Many Honors

And it's no wonder that Bobby Owen Kelly, son of Walter Kelly, won an assortment of honors in the last calf show season with one steer, when the steer had free access to all that fine food, and Bobby feeding it to him together with lots of fresh water. As the Herald writer said: "Like the rest of the Kelly place this lot is as clean as a feed lot can be kept and is chicken proof."

The picture that set your "mouth watering" was the one showing eight long rows on the farm full of water. There were many rows running parallel but the water in them was not visible in the picture. To the south of these rows was seen a long Texas and Pacific freight train pulled by one of T&P's modern diesels engines, heading east into Stanton. The rail line of the T&P and highway 80 run along this field — the highway running between the Kelly farm and the T&P railroad.

This field was being prepared for planting. And the picture that would bolster the rather depressed mind of the individual battling this long period of drouth, was the one showing cattle grazing on the Kelly irrigated pasture land, also drew from the mind of the Herald writer these quoted lines appearing under the picture: "Cattle on this pasture don't graze long before they lie down in the sunshine and start chewing their cuds," evidently very contented cattle while their "next of kin" are wondering from where their next blade of grass is to come from.

**Leader in Conservation Farming**  
The Martin-Howard Soil Conservation District named Walter E. Kelly, its outstanding conservation farmer for 1951.

Winding up his page of pictures and writeup of the Kelly farm the Herald writer said:

"And the technicians of the Soil Conservation Service will tell you that they have learned

a whole lot from Kelly since that day three years ago when he came to them for advice. His experiments have been improvements on suggested methods in many cases. At the same time Walter Kelly will as quickly confess that these technicians are still teaching him a few things. All of which adds up to the perfect conservation team — cooperating SCS technicians, a cooperating farmer and a cooperating district supervisors."

The individuals responsible for creating the project that covered a page devoted to one of Martin County's outstanding dry land farmers and now the outstanding farmer of the Martin-Howard Soil Conservation District with his irrigation method of farming, appearing in West Texas Field and Ranch, were pictured as W. S. Goodlett of the

Big Spring office of SCS; Martin Vavra of the Stanton office of SCS; Owen Kelly, son of Walter Kelly, and Walter E. Kelly, himself.

## PERSONALS

Mrs. L. B. Russell and Mrs. Fred Eaker of Big Spring visited Sunday in the home of Mr. and Mrs. R. H. Kelly.
