Along The Waterfront

The marina basin at Sea Gun Sports Inn gave up redfish and trout to the hardy fishermen who braved the first blustering norther of the season.

Redfish and trout, seeking relief from the decreasing temperatures of the more shallow waters of Copano and Aransas Bays, migrated to the deep waters of channels and basins.

Dead bait on the bottom produced a large number of redfish weighing up to 10 pounds. A few nice trout added to the stringers of anglers lining the pier and bulkheads of Sea Gun marina.

Mrs. James Furlong Wins First In Art Contest

Mrs. James M. Furlong of Fulton, well known in this area as a talented artist, won the blue ribbon first place award for a painting she entered in an 11-county art exhibit Jan. 22 in Victoria.

This painting and winning entries in other divisions will be sent to Austin for state finals in February.

Furlong is the owner of Peg Leg's Superette on Fulton Beach Road.

Second place in the adult division went to Jim Whitfill of Rockport who submitted a water color painting. Third prize was won by Mrs. Laura Ritchey of Victoria.

The winners of the top three prizes are all students of Simon G. Michael of the Rockport School of Fine Arts.

Beautification Funds May Aid Aransas County

The Texas Highway Department's 1966-67 Highway Beautification Program, Texas' first major must under the recently enacted Highway Beautification Act, has been tentatively approved by the Texas Highway Commission.

This means it is likely that Highway 35, north of the city limits of Aransas Pass will be beautified by \$5,000 worth of trees and shrubs to screen junked cars from public view.

The \$10.8 million program, which will cover more than 300 projects throughout the state, will now be submitted to the Bureau of Public Roads.

The program, subject to approval by the Bureau, will be submitted over an extended period. Project plans will go to the Bureau as they are completed.

As prepared by the Highway Department, the program represents Texas' first large effort toward compliance with the Highway Beautification Act of 1965 which was passed by Congress and enacted into law last October.

The program proposes work in 321 projects at a total estimated cost of \$10,862,400. Of these, 122 projects are on the Interstate System and will cost an estimated \$7,486,600.

One hundred and ninety-nine of the projects are on the ABC system—federal-aid primary roads, federal-aid secondary roads and urban extensions of federal-aid systems. The ABC projects will cost an estimated \$3,375,800.

Of the projects proposed, 147 rest areas are planned; 19 scenic overlooks; landscape plantings for 133 projects; and right of way purchases for 64 projects.

Also, purchase of right of way easements for six projects; 68 comfort stations; 111 water systems; and lighting in 60 projects.

THE CROWDED WEST. It used to be that covered wagons filled with people rolled westward to escape the crowds of civilization. However, Mr. and Mrs. Al Whitrock of Riverside, Calif., have found that now it's the west that's become overpopulated. They've decided to head east for the open lands of Missouri. "All we're looking for is a little ranch with a little grass and some water," declares Mr. Whitrock. —WFS Photo

March of Dimes Campaign Continues Through January

"If you're reading this article, you're putting money to work for a good cause."

"If this message gets through to you, there will be even more funds available for the fight against birth defects in 1966," according to Ed Harper, Aransas County Chairman of the 1966 March of Dimes campaign.

He urged people in this area to give generously, suggesting that contribution checks be made out to "1966 March of Dimes," and mailed to him—Ed Harper, Key Allegro Estates, Rockport, or to the First National Bank, Rockport, care of March of Dimes.

Funds will be used in expanding the March of Dimes treatment center, scientific research, and other birth defect programs.

"During the past year," Harper said, "many babies were born with birth defects because their mothers caught German measles in the epidemic which swept the country. These unfortunate children were in addition to the 250,000 American babies who are born each year with other types of birth defects."

Harper also said that when you include prenatal deaths, birth defects annually destroy twice as many lives as cancer, in addition to leaving thousands of children physically disabled and mentally retarded.

Pilot to Publish Series on Zoning

Beginning with this issue, The Rockport Pilot will publish a series of articles on land use and zoning. As explained in another story, Mayor Hollis Collum has appointed a Zoning Commission and since this official action has taken place, The Pilot considers it a responsibility to review the history of Rockport and the future as advocated by William W. Anderson, a professional city planner and Director of Planning for the City of Corpus Christi.

Chief of Police Bob Hewes reported the 11th accident of this month occurred on Monday near the intersection of Highway 35 and 1st street. Involved were Byron Hardeman of Rockport and W. E. Gunter of Aransas Pass. Both vehicles had approximately \$100 of damage.

Chief Hewes said this was the 11th accident for Rockport so far this month and if the rate keeps up we will far surpass last year's record number of accidents.

On Saturday afternoon at about 4:10 p.m., Wilhelmina Bracht and Maria R. Gaitan, of Rockport, were involved in an accident at Magnolia and Cornwall. Chief Hewes investigated this accident and reported approximately \$550 in auto damage. Grace Rodriguez, a passenger in the Gaitan auto, was taken by Deputy Sheriff Stautzenberger to Dr. L. G. Wood's office for treatment, while Sheriff Joe Earl Hunt and Deputy De la Garza assisted Hewes with traffic at the scene of the accident.

Hewes told the Pilot that the Aransas County Sheriff's officers, under the direction of Sheriff Hunt had been a great help to his department in many accidents with traffic and reducing chances of other accidents.

The Immigration official urged aliens who have not yet filed their address reports to do so no later than Jan. 31 to avoid possible penalties.

It was the seventh victory of the year in district for Rockport, while Tuloso-Midway is now 5-2 following a game that could have pitched the race into a two way tie at the top.

Thomas Lewis led the winners with 22 points, while Leon Bernson and Larry Plimber paced the losers with 11 each.

In a girl's game Tuloso-Midway won, 68-25, and in a B game the Warriors emerged winner, 35-11.

Hollis Collum, the present mayor whose term is expiring, told The Pilot, "I am considering running for mayor again."

Maley is the alderman from Ward No. 1 whose term of office is expiring. Sorenson, a plumbing contractor, has not sought or held public office in the past.

The term of another alderman, Ernest Harriest of Ward No. 2, also is expiring. He said this week, "I haven't as yet made up my mind whether to run or not."

At the city council meeting Jan. 24 Mayor Collum read the order for the city officers' election, named those whose terms are expiring (himself and Alderman Maley and Harriest), and reported the deadline for filing to get names on the ballot is March 5, 1966 at the City Hall.

The first day for absentee voting is March 16 and the last day is April 1. The election will be held April 5 with voting at the City Hall from 8 a.m. to 7 p.m.

To be eligible to vote, a person must:

Each student has attempted to attack and solve a problem of interest in one of the fields of science. Projects on rocks, minerals, insects, animals, plants, human diseases, telegraphy, and astronomy have been presented. These are a few of the categories that were selected. Science projects will be divided into three main sections; biological, geological, and physical.

On Feb. 1, the work will be judged by local men who have had a great deal of experience in the fields mentioned above. Ribbons will be awarded to the six best projects in each section. A total of 18 ribbons will be awarded. Judging will take place in the early afternoon, and projects will be on display until 5:30 p.m. in the eighth grade wing of Aransas County Junior High School. Interested persons are welcome to view the projects between 3:30 and 5:30 p.m.

It is hoped that a basis may be established for the further development of the science program in the Junior High School. Students may pursue their fields of study in high school on an individual and voluntary basis during their high school years if they so desire. If their attainment is satisfactory, they may go on to exhibit on a national basis in the National Science Fair International.

Instructor for the science projects is Albert Patton.

Chief of Police To Gatesville for School

Chief of Police Bob Hewes went to Gatesville, Texas, for the Central Texas Regional Conference on Crime and Delinquency last Thursday and Friday. The school was held at the chapel of the Mountain View School for Boys.

Among the speakers were Mack Morris, assistant superintendent of the school; George Adams, superintendent of the school; Lieut. Gov. Preston Smith who spoke on "Minors with Major Problems;" Dr. J. A. Turman, executive director of the Texas Youth Council at Austin; Raymond E. Towns, assistant director of the Texas Youth Council and Dr. Orval Fillebeck of Abilene Christian College.

Chief Hewes stated that Smith reported that only 3% of the boys who have been sent to Gatesville have gone to the penitentiary.

A tour of the Mountain View facilities and dinner in the school dining hall were included. A student assembly was held for the visitors and put on by the boys at Gatesville. "It would be of great value to all to see the work carried on in rehabilitation of these youngsters," Hewes said.

A grand prize will be awarded on Sunday, May 1 for the largest fish caught during the tournament. The grand prize will be a complete fishing weekend at Sea Gun.

Prizes will be awarded for the largest fish caught by each of three divisions. Division I will be for men, division II for women and division III for children 16 years of age and younger.

Weekly prizes of fishing equipment will be awarded each Sunday afternoon. Monthly prizes will be awarded on the first Sunday of the following month. They will consist of an Ambassador reel for division I, a Garcia spinning reel for division II and a Zebco rod and reel for division III.

GET YOUR POLL TAXES

Mrs. Margaret Weber, County Tax Assessor-Collector, again reminds residents of Aransas county that if they want to be sure to be qualified in local and state elections, they had better pay their poll tax.

And Monday, Jan. 31, is the last day.

The Tax Assessor's office in the court house will be open Monday from 8 a.m. to noon and from 1 p.m. to 10 p.m.

Unless a federal court suit designed to eliminate poll taxes is settled by Jan. 31, Texans who have not paid their poll taxes may not be able to vote on strictly local or state issues, unless their age exempts them from paying the tax.

Through yesterday, only 703 poll tax receipts had been issued and there were 14 exemptions.

Over \$1100 Raised In Palsy Campaign

More than \$1100 was contributed last weekend by generous people in this area to aid the never-ending medical battle to conquer cerebral palsy.

So many people contributed and so many people helped raise the money that it would be impossible to name names. However, it should be noted that the Rockport Lions Club, the Rockport Volunteer Fire Department Auxiliary and the Boy Scouts performed important roles in the campaign.

The focal point for this drive was KZTV (Channel 10), Corpus Christi, which conducted a telethon Jan. 22 and 23. Two Rockport men, Elva Mullinax and Dick Fox, spent long hours at the coliseum in Corpus Christi assisting with the campaign.

LAND USE AND ZONING

Publishers' Note: This is the first of a series of articles on land use and zoning as related to Rockport.

The manner in which the land in Rockport is used is of great significance to every citizen of the community. How land is used in any community determines, to a very large extent, the kind and character of the city and has a significant effect upon the tax structure and livability of the city. Therefore the plan for the use of land within the community is probably the most important single element of a city plan.

Once errors are made in the location of any urban function, its correction is very difficult and, if corrected at all, the costs usually very high. The best and most practical method for correcting land use mistakes is to prevent them from happening in the first place.

Therefore a land use plan is one of the most important and thought provoking matters to be considered by any community. Few people want to deliberately do anything that would be harmful to the city, but lacking an acceptable

plan for guidance, each individual must act on his own initiative as he sees fit, with little regard to the effect on others and the community as a whole.

Likewise, because a city has the power to regulate the use of land, this does not mean it may prevent the land from being used at all, or regulated unreasonably. Land use regulations must be based on careful and thorough studies.

Also, unless there is an earnest desire on the part of its citizens to achieve an efficient, attractive and economical community, any amount of land use planning will not produce significant results.

Therefore, public discussions of the proposed plan are desirable and all citizens are urged to take part in the discussions concerning the plan and for the future of their city.

In spite of the fact that cities vary in size, social organization, political organization, economic activity, and in type and number of institutions they contain, the amount of land they require for various purposes or urban functions are comparable to each other to a remarkable degree.

The distribution and relationship of land uses result-

LETTER TO THE EDITOR

If this is supposed to be a growing tourist town for people coming in to buy homes, it doesn't offer too much courtesy in the line of utilities, especially water.

Why can't the utility companies extend a little courtesy and pick up a phone to see why a bill hasn't been paid instead of going out under peoples noses and just cut off without a word.

There are people that care nothing about paying bills and there are others that pay each month.

Is it possible that the utility companies are so perfect that they never make mistakes? Is so, let Rockport as a whole say hurrah for folks that never make mistakes.

—A very disgusted Home Owner.

The city council passed a building permit ordinance, amended the present building ordinance and hired a city secretary. THIS AND THAT

By

JOHN R. KINSEY

This is the true story of why former President Harry Truman stopped wearing matching tie and pocket-handkerchief combinations, especially his one-time favorite, the blue polka dot.

Some of you — especially fashion-conscious men — may remember how Mr. Truman dressed when he was thrust into the presidency in 1945 following the death of Franklin D. Roosevelt.

In all photographs taken by newspaper photographers and newsreel and television cameramen, Mr. Truman always was shown wearing a tie and pocket-handkerchief that matched. By match, I mean exact match—dots, checks, stripes or whatever the pattern was, and of course the color was identical in both items.

Now there was at least one newspaperman in Washington who hated perfect matching ties and pocket-handkerchiefs. He hates them now and he hated them then. And he almost becomes violent when he sees a matching polka dot combination.

This man's name is Edwin A. Lahey, whose articles are syndicated by the Chicago Daily News and sent to many papers throughout the country, including the Corpus Christi Caller-Times.

Without consulting anyone, Lahey decided on a course of action he thought would cause Mr. Truman to stop wearing the tie-handkerchief matchers. Lahey is a Democrat, so politics had nothing to do with it.

Here's what Lahey did: Every time the President held a new conference and announced some news—important or otherwise—Lahey would start out his story something like this:

"Wearing his customary matching blue polka dot tie and pocket — handkerchief, President Truman today announced (etc., etc.)."

Maybe a week later Lahey would write:

"President Truman and Prime Minister (So-and-So) today conferred on the vital subject of (etc., etc.) The Prime Minister was wearing a gray flannel suit, etc. The

President wore the usual matching blue polka dot tie and pocket-handkerchief to set off his dark blue suit."

Lahey's constant reference to Mr. Truman's choice in neckties and pocket-handkerchiefs became a topic of conversation in Washington, apparently even in the White House.

Because one day the President stopped wearing the matching outfits. Instead of a handkerchief matching his tie, he wore in his breast pocket a white handkerchief folded rectangularly so that a straight edge showed about a half-inch above the top of the pocket.

Believe it or not, this started a style for men that lasted several years.

I'm sure that many people in Rockport have wondered and worried about why Mr. Truman switched from the matching kerchief to a white one. Now you know and can store this information with other vital facts.

STATE DRAFT CALLS 1,372 TEXANS

Austin.—State draft boards are scheduled to induct 1,372 men into the armed forces in February, Col. Morris S. Schwartz, state Selective Service director, said Tuesday.

This compares with a quota of 1,475 in January and 1,523 in December. The February quota of 1,372 is the Texas share of a national call for 29,400 men, 26,400 for the Army and 3,000 for the Marine Corps.

Colonel Schwartz also announced that 8,640 men will be forwarded to examining and entrance stations during February to undergo the draft physical and mental examination.

Local board quotas for both induction and examination already have been figured and sent to the state's 137 local boards.

The February quota for induction will be filled with single and childless married men, 19 through 25 years old, and volunteers who have not attained the age of 26.

No married man with children, or an expected child, will be selected to fill the February call.

"Draft boards must have the information about children of course," Colonel Schwartz said, "and an unborn child must be certified by a physician. Otherwise, a young husband may find himself selected."

MISS LOLA BONNER—A LADY OF MANY TALENTS

By JOHN R. KINSEY

Miss Lola L. Bonner is quite a gal—in many ways! She is five feet 11½ inches tall (during the interview she said, "why don't you just say six feet even.")

By observing a Spartan diet, she stays pencil trim, weighing only 124 pounds. Makes her look sort of like a tallish Audrey Hepburn.

She is a topflight lawyer. She is president of the Rockport Chamber of Commerce.

She is an expert pistol shot. She is a fine tennis player.

She was the first woman in Texas to take up parachuting as a hobby.

But let's begin at the beginning and briefly trace this remarkable woman's life and career, as it reads up to now with Lola 33 years old.

She was born in Gregory, Texas, July 13, 1932, daughter of Mr. and Mrs. William K. Bonner who now live in Taft where Mr. Bonner is a rancher-farmer.

Lola is the "Baby" of the family (I'm a little six-foot baby," she explains), having four older sisters and two older brothers.

In 1949 she was graduated from Gregory Independent School District High School, and that fall entered Texas College of Arts and Industries at Kingsville. She was graduated in 1953 with a major in health and physical education and a minor in speech. ("What a combination," she laughs.)

During her four years at A&I she was the first woman to be elected president of the student body; she was listed in "Who's Who in American Colleges and Universities," she was a member of Delta Theta sorority and a forensic society.

In the fall of 1953, Miss Bonner became a teacher in the Beeville Independent School District. During the next two years all she did was:—Teach physical education

to all high school classes (one class had 77 students), which included such little tasks as training the cheer leaders, being in charge of the pep club, coaching the girl's basketball, softball, volleyball and tennis teams (our basketball team won the district championship in 1955, she proudly recalls).

—Teach speech, drama, debating, poetry and extemporaneous speaking.

—Sponsor the senior class, senior class play, senior banquet, senior trips, etc.

After two years, Lola said to herself, "God bless all those dedicated, hard working school teachers, but this is not for me. I'm going to become a lawyer."

So on Sept. 17, 1955, she entered the University of Texas School of Law and for the next three years worked about 12 hours a day. In 1958 she received her bachelor of law degree.

Along about this time restless Lola had taken up parachuting, receiving instruction from Jacques Istel of France and Lew Sanborn who introduced the sport to the United States and have patents on their own make of parachute.

"I truly loved this sport," Miss Bonner remembers, "and the thrill was indescribable—sort of like complete freedom, like being a bird."

"But, my practical father pointed out that if I planned to open a law office, my clients would have more confidence in me if I kept my feet on the ground. I knew he was right, so I gave up parachuting."

In July of 1958 she hung up her law shingle in Rockport. In November, attorney Ellis L. Clark suggested the formation of the Clark and Bonner Law Firm, which was done in January, 1959. Clark was elected County Attorney and assumed this position in January, 1961, which necessitated

Income Tax Data
Now Available

"Your Federal Income Tax," the latest official information on Federal taxes, is now available at 50 cents a copy, Asa L. Crow, administrative officer of Internal Revenue at Corpus Christi, announced today.

The 160-page booklet covers in detail the Federal income tax laws as they apply to individuals. The language is non-technical and contains many examples to illustrate the application of tax laws to actual situations. The material is especially helpful to taxpayers who have unusual tax situations, or for those encountering an item of income or deduction for the first time.

Check lists of taxable and non-taxable income, and of allowable and non-allowable deductions are included, along with a detailed index which helps pinpoint answers to tax problems.

Also available for the businessman for 50 cents a copy is the helpful booklet, "Tax Guide for Small Business," designed to simplify for the proprietorship, corporation and partnership problems involving income, excise and employment taxes.

These two booklets may be obtained from any IRS office or from the Superintendent of Documents, U. S. Government Printing Office, Washington, D. C. 20402.

ORMAND PROMOTED TO
ELECTRICIAN'S MATE

Raymond H. Ormand, United States Navy, son of Mr. and Mrs. Willam Ormand, was promoted to Electrician's Mate Third Class while serving aboard the anti-submarine warfare support aircraft carrier USS Intrepid, operating out of Norfolk, Va.

His promotion was based on time in service and rate, military appearance, performance of duties and passing the Navy-wide test for promotion.

The Intrepid, currently in the Norfolk Naval Shipyard, Portsmouth, Va., arrived there two weeks ago following the completion of a five and one-half week refresher training cruise at Guantanamo Bay, Cuba.

When deployed for operations, the Intrepid operates as the hub, or nerve center of an anti-submarine warfare group composed of surface, subsurface and air anti-submarine squadrons designed to destroy submarines in time of war.

Caren, Susan and Brian Schmitt of Houston spent last weekend visiting their grandmother, Mrs. A. C. Shivers.

Bobby R. Edwards who enlisted in the U. S. Army on Dec. 28, has been sent to Fort Polk, La., for basic training.
