Holdup In ASCS Disaster Payments

200 Farmers Need To Sign Yield Cards

Checks totaling \$92,000 were mailed from the ASCS office Wednesday to about 30 farms in the county for disaster payments on cotton, wheat and feed grains.

More Voters Registered

A total of 4,866 voters are registered and eligible to vote in the upcoming May 1 primary elections reports Mitchell County Tax Assessor-Collector C. G. (Skeet) Harkins.

The county's voter registration lists were updated Thursday and Harkins said people are still coming in to complete registration requirements. A person is eligible to vote by registering 30 days before an election.

The breakdown by precincts is as follows:

- Precinct One, 1,600.
- Precinct Two, 494.
- Precinct Three, 1,583.
- Precinct Four, 795.
- Precinct Five, 112.
- Precinct Seven, 282.

Harkins said the number could approach the 5,000 mark if enough people come in to register before April 1, 30 days before the May 1 primary. He said last count, the best he remembers, was about 4,500 voters.

and ASCS executive director Don Stewart says that at least \$100,000 more will be made in the near future.

A holdup in the final approval and payment has resulted from lack of verification and signature by farmers of their yield cards for the 1975 crop.

"Yield cards are in the office from the gins but we

Purchase Auto Tags

Deadline for purchasing 1976 auto registration tags is March 31 from the tax office in Mitchell County courthouse.

Mitchell County Tax Assessor-Collector C. G. (Skeet) Harkins requests that people not wait until the deadline to purchase tags but come into the office in the next few days to buy their trailer, cycle, truck, auto or other vehicle tags.

"If you put it on the wrong side, leave it alone but if you put the wrong tag on your car, for instance if you put the truck tag on the family car, then come into the tax office and get a replacement tag at a charge of \$1.30 each," he said.

Tags are to be placed in the upper left hand corner of the plate purchased last year," the tax assessor-collector pointed out.

need the farmers who haven't come in to the office to verify the cards and sign them to do that. There are about 200 farmers in the county who need to come in Monday and sign the yield cards," Stewart said.

Several important items are being held up by this lack of verification: farmers might have a yield adjustment coming and a low yield payment because of weather conditions or boll weevil damage; farmers won't get their 1976 yields or be eligible for disaster payments or other program benefits; cotton can't be leased or transferred with-

out the signature and the final county bale production can't be totaled until the yield cards are verified.

Program assistant Joan McCullom also said that some questionnaires have recently gone out from the ASCS office, mostly to out of town landowners, and those questionnaires also need to be filled out and returned to the office before payments can be made.

Applications for the 1976 ACP program are now being taken at the ASCS office. The county's allocation is \$35,000 for cost share payments for conservation practices. There are currently

18 applicants but Stewart says he is expecting more farmers to come in to the office to apply.

The ASCS office also mailed \$9,000 in ECM (Emergency Conservation Measures) payments to six or seven farmers who have received final approval for conservation work, mainly for re-building terraces. Stewart estimated that the final amount will be about half a million dollars in payments to farmers who are re-building terraces damaged by heavy rainfall last July and August.

"The final amount will be over \$225,000 and possibly \$500,000," he said.

Other ASCS reminders include the following:

--March 20 is the final date wheat acreage can be grazed and still be eligible for wheat program benefits.

--May 1 is the final date for releasing cotton acreage for lease or transfer. It is also the final date to make application for reapportioned acres. It is the final date for sale or lease of cotton acreage.

--March 26 is the last date for sign up for conservation practices.

--Notify the ASCS office of failed wheat acreage and make application for an appraisal.

CISD Budget Session Board Must Raise Additional \$150,000

A budget workshop session has been set for 7 p.m. Monday by the CISD board of trustees as they try to come up with about \$150,000 additional money for next year's budget.

The reason the additional money is needed is a raise in the local fund assignment from \$174,000 two years ago to \$397,000 for the 1976-77 budget--a result of HB1126 passed by the last session of the Texas legislature.

CISD Superintendent Lloyd McKee said that the legislature's action is the only reason for the need for additional money and the board has no recourse but to either raise taxes or change the ratio of assessment.

The board will probably change the ratio from 55 per cent to 67 per cent, raising about \$189,828, he said.

"Anytime the ratio is changed one per cent, it raises \$15,819 and the board will probably raise it 12 per cent to 67 per cent," he said.

Current tax rate is \$1.50 for maintenance and operations and 37 cents for interest and sinking fund, a total of \$1.87.

Tax rate for the next year's budget will be lowered to a total of \$1.81, \$1.50 for M&O and 31 cents for the sinking fund, McKee said, because the requirements fluctuate for the interest and sinking fund.

A sample homeowner in Colorado City, now paying \$51.41 on a home valued at \$5,000, would pay \$60.63 in school taxes next year.

"Most of the houses in Colorado City are valued in the \$5,000 range," he said, "and the raise will be about

nine or ten dollars for most people."

District valuation is \$110,819,140 but McKee said that HB1126 has put the CISD valuation at \$113,523,000, a figure higher than the local district actually operates on.

Absentee Voting Begins

Absentee voting for the April 3 elections for city council and school boards in the cities of Colorado City, Lorraine and Westbrook begins Monday at the various polling places.

Absentee ballots may be cast in the following places:

- Colorado City city council, City Hall.
- Colorado ISD board of trustees, tax office on Walnut Street.
- Lorraine city council, City Hall.
- Lorraine ISD board of trustees, office of the superintendent.
- Westbrook city council, office of the city clerk in the home of Mrs. Ruby Swatt.
- Westbrook School Board, office of the superintendent.

The new budget currently being considered by the school board is almost \$300,000 less than the budget for 1975-76. Budget for 1976-77 is estimated at \$1,970,999.58. This year's budget was \$2,268,557 and the difference between the two figures is \$297,558.

Largest expenditure is for salaries, which takes about 75 per cent of the total, McKee said. Other major items are transportation at \$87,000 and utilities at \$94,000, up about \$34,000 from the current budget.

"Most of the increase is due to the raise in local fund assignment," McKee said, "and the board is trying to keep expenditures and the budget as low as possible so that the taxes paid by citizens will be as low as possible."

The new marks were set by Colorado City trackmen as follows: Gary Hulme, 107.3" past the old record of 106.3" set by Saldivar of Post in 1974; Ricky Ornelas was timed at 28.8 in the 220 Intermediate hurdles faster than the 29.2 mark set by Slaton's Hudson in 1972; the 1320 relay team of Rudy Garcia, Ruben Garcia, Ricky Ornelas and Lupe Luera were timed at 2:41.5, breaking the mark of 2:42.9 set last year by Selvera, Franco, Garcia and Garcia of Colorado City. Ruben Garcia also tied the 330 dash record time of 38.0 set by Martinez of Colorado City in 1972 in the 8th grade division.

BODY CONDITIONING class taught as part of the Wallace Community Education program is a popular place to be each Monday night in Hutchinson Gym as instructor Janie Farda says that 41 women have registered for the 8-week course. There are always from 35 to 40 present for each class session, she said, and homework assignments are made to the group as they work on theory and exercises during class periods.

Farda Teaches Exercise Class

Exercise is the password in the Body Conditioning Class pictured above. A special eight week course being taught by Janie Farda encourages women to physical fitness by taking care of their figures.

Supplemented by home work, the forty-one women enrolled in this Body Conditioning Class learn the importance of nutrition, sleep

and just as important, exercise.

Given fundamental exercises as well as warm up exercises, the women learn that being physically fit does not necessarily mean looking like an athlete. It means moving gracefully, having a good posture and exercising on a general routine schedule to induce body toning.

The class is a Community Service Course through the Wallace Center meets each Monday in the Hutchinson Gym for two hours of instruction on maintaining physical fitness and participation in class.

Technology: Creatures Of Man

Roy Byrd

Pastor

First Presbyterian Church

Colorado City

"How terrible it will be for you that lie on luxurious beds, and stretch out on your couches, and feast on veal and lamb! You like to compose songs, as David did, and play them on harps. You drink wine by the bowlful, and use the finest perfumes, but you do not mourn over the ruin of Israel." Amos 6:4-6, American Bible Society's Today's English Version.

1984—that fateful year. By that time, George Orwell indicated in his book bearing that year as its title, men's minds will have become the losers. Applied science, technology, will have become the winner—in control and having authority in 1984 over the minds of men.

But wait, technology is not a creature. It is mindless, planless, blind and amoral. The applications of science in the form of computer networks, genetic engineering, and nuclear age-space age technology are the creatures of man. The human mind is behind these—they are obedient to the will of man. They accomplish only what men determine they should accomplish. It is a mistake to think of technology as gaining control and authority over the minds of men.

What, then, is to be done with our scientific skill? If we continue to apply it as we have been applying it—to the advantage of the affluent—then some Orwellian-like chaos is just around the corner even for the affluent, as the prophet Amos indicates.

To avoid such consequences and to make better use of our scientific skills, we could do no better than to heed the advice of Amos, who called for applications of justice and mercy.

Technology can be made to dominate us or serve us. Informed by justice and mercy, it can be made to work for us—the best in technology to help us solve such problems as over-population, inadequate food supplies, and energy resource depletion.

Let us each one, then through prayer, in conversation, and in other ways as we have opportunity, hasten the time when technology will be placed at the service of mankind. "Work for what is right, so that you may live. Then, the Lord God Almighty really will be with you, as you claim he is." Amos 5:14.

Seeps Present Serious Problem

Seepy areas are becoming a serious problem in Mitchell County according to Van Mills with the Soil Conservation Service. An estimated four thousand acres involving some of the best farm land in Mitchell County is being affected by the seeps.

The older seeps are getting quite salty, and the number of seeps is increasing each year. High rainfall in the late summer months may be one reason why the seeps are developing and spreading.

Rainfall during July-September from 1971 through 1975 averaged over 12 inches. You would only expect this much rain in two out of 11 years.

When precipitation exceeds crop needs, water percolates or trickles below the crops' roots, and accumulates above a dense layer of clay. Unable to penetrate farther, the water starts moving laterally and usually rises to the surface when there is a break or change in the slope. Once on the surface the water evaporates, leaving precipitated salts. These salts are usually sodium, magnesium and calcium sulfate. One soil test taken recently showed a high concentration of magnesium chloride.

Certain crops such as alfalfa, forage sorghums and various species of grass are able to grow and take up

large quantities of these salts.

Jimmy Harrison has announced that the SCS Plant Materials Center at Knox City is providing the Mitchell Soil and Water Conservation District with several species of grass for trial plantings on seepy areas. Harrison also stated that the district had contacted the Agricultural Research Service about doing research work on ways of reducing the spread of the seeps and ways of reclaiming the affected areas.

SALT SEEP being established to grass on the W. E. Smith farm south of Westbrook. Gregg Goode, SCS Range Conservationist, stands beside a clump of Eastern Gamagrass. This grass was made available to the Mitchell SWCD by the SCS Plant Materials Center at Knox City for testing on seepy and salt areas. Bermudagrass is also being established on this seepy area. Salt cedars in the background are also a problem on the seepy areas.

Campaign To Continue

Because of the steady growth in numbers of crippled children and adults in Texas, the Easter Seal Society for Crippled Children and Adults of Texas has stepped up its rehabilitation services.

George Womack, who is the Easter Seal Representa-

tive for the County, said 10,768 handicapped Texans received Easter Seal treatments during 1975.

"Despite medical scientific advances," Womack explained, "the rank of the crippled are growing. This is because of population growth, increased number of accidents and medical treatment which saves victims of crippling diseases who might not have lived in past years."

The largest group served includes those with major deformities of bones and joints, severe speech defects, cerebral palsy, arthritis, muscular dystrophy and multiple sclerosis and stroke. The Easter Seal Campaign, which provides funds for continuation of these services, begins March 1, and continues through April 18, Easter Sunday.

Only one cotton herbicide really fits the sandy soil conditions in West Texas.

Sancap® The cotton herbicide made for sand, loamy sands and sandy loams. Made for the soil conditions that make growing cotton in West Texas different from most any other place in the world.

Sancap controls your toughest weed problems. Carelessweed and Russian thistle.

And Sancap does the job without injuring your cotton. Just follow the label. There's no

guesswork about rates—no worry about applying too much or too little.

So build your weed control program around Sancap this year. Then watch your cotton come through clean and healthy. Because now you've got a herbicide that really fits your conditions.
