ANNOUNCEMENT OF A NEW $125,000 THEATRE BUILDING AT ROSWELL

Roswell is soon to have a new theater, to cost approximately $125,000, according to an announcement made last week by C. W. Bartlett of Artesia. While the final details have not been worked out, the building plans have been practically completed. The owners have three building sites in view, each site is 75 by 198 feet. A definite selection of the site is expected to be made between now and the 10th of October, at which time construction work on the building is to start.

The new theater will be financed by a stock company and will be under the management of C. W. Bartlett and son, of Artesia.

MRS. MAE WILKINS IS PAINFULLY HURT WHEN GOURED BY PET BULL

Is Attacked By Jersey Bull When She Attempts to go In Cow Lot—Mrs. Wilkins Is Here for Medical Treatment.

Mrs. Mae Wilkins, wife of E. S. Wilkins, a farmer of the Cottonwood community was seriously injured at an early hour Friday morning, as result of being gored by a pet Jersey bull. Mrs. Wilkins had gone to the cow lot to separate some mich cows, when the bull attacked her in an attempt to get out of the pen. He goured her body twice, once in the right leg and once near the hip. Mrs. Wilkins' body was badly lacerated and she sustained what is believed to be as painful an injury as it is possible to survive. The bull was not thought to have been mad, otherwise he would have killed the unfortunate woman before assistance arrived.

Mrs. Wilkins was rushed to Artesia, where she received medical attention. After the wounds were dressed she was removed to the home of Ross Conner, where she appears to be slowly improving.

PRODUCTION OF CRUDE OIL IS SHOWING GAIN

NEW YORK.—The daily average gross crude oil production in the United States increased 39,250 barrels for the week ended September 24, totaling 2,534,100 barrels, says the weekly summary of the American Petroleum Institute Tuesday. The daily average production east of California was 1,896,300 barrels, an increase of 40,550 barrels. Daily average production differences:

Oklahoma, 800,400, increase 18,000; Kansas 105,200, decrease 50; Panhandle, Texas, 93,750, decrease 4,000; North Texas, 81,400 decrease 850; West Central Texas 65,550 decrease 1,450; East Central Texas 100,000 decrease 28,250; Southwest Texas 30,400 increase 1,650; Coastal Texas 129,200 increase 1,750; Wyoming 51,800 increase 1,750; Montant 13,750 decrease 50; Colorado 6,800 increase 150 ;New Mexico 2,100 decrease 450; California 637,800 decrease 1,300.

CIVIL SERVICE EXAMS

Senator Andrieus A. Jones announces that arrangements have been made with the Civil Service Commission to hold an examination on Saturday, October 15, 1927, for the purpose of selecting a principle and two alternates to be admitted to the U. S. Military Academy. Those who are interested in such an examination should notify Senator Jones at once.

TULAROSA FOOTBALL TEAM HERE SATURDAY

The Tularosa high school football team will meet the Artesia high school Bulldogs on the West Main street gridiron here, Saturday afternoon at 2:30. Both teams are thought to be pretty evenly matched and an exciting struggle is expected. This will be your first chance to see the new Bulldog lineup in action.

REGISTER FOR CITY ELECTION

The board of registration has posted a list of the qualified voters, who are entitled to cast a ballot in the coming city election, October 14th, for the purpose of voting on the natural gas franchise of V. S. Welch. If you wish to vote and your name does not appear on the registration list, posted in the window of the Citizens State Bank, you should notify the registration board at once.

GINNINGS OF NORTH VALLEY TOTAL 2,206 BALES UP TO TUESDAY

The north valley gins had ginned a total of 2,206 bales up to and including Tuesday. The report by gins is submitted through the courtesy of Mr. Wilde, plant quarantine inspector. The ginnings follow:

Roswell Gin Co. (two gins)	198
Farmers Gin Co., S. Springs	216
Oasis Gin Co.	174
Greenfield Gin Co.	274
Hagerman Gin Co.	153
Farmers Gin Co., Hagerman	221
Lake Arthur Gin Co.	154
Association Gin, Espula	282
Association Gin, Artesia	185
Association Gin, Atoka	180
Farmers Gin Co., Artesia	169

TO THE METHODIST CONFERENCE AT EL PASO

Mr. and Mrs. J. E. Robertson and Rev. and Mrs. C. C. Higbee and possibly others, whose names we did not get, expect to leave the first of the week for El Paso, where they will attend the annual Methodist conference of the West Texas and Eastern New Mexico districts. The opening sermon of the conference will be delivered October 4th and this will be followed by a business session beginning Wednesday morning, October 5th. Bishop John M. Moore, of Dallas, Texas, will preside over the session. Bishop Moore has recently returned from Switzerland, where he attended an international religious conference.

At the El Paso conference, the ministers will be assigned to the various churches. Rev. Thomas, who is serving Dayton and Lake Arthur will ask for a change to a higher altituted, on account of his wife's health, it is understood. It is also reported that Rev. Z. B. Moon, of Hope will ask to be transferred to the northwest Texas district.

COOLER WEATHER

This week like the preceding one, started off with cooler weather. A norther blew up Monday and early Tuesday morning a slow drizzle set in, lasting well up into the forenoon. According to R. W. Bruce, weather observer, the precipitation amounted to .7 inches. The lowest reading of the thermometer was 41 degrees.

BAKING DEMONSTRATION

Miss Hewey, national domestic science instructor for the Red Star Milling Co., is giving a three day baking demonstration at the grocery department of Joyce-Pruit Co., beginning this afternoon. Miss Hewey will use a number of favored recipes, which will be of interest to every housewife. No admission charges. Refreshments will be served. See the announcement of Joyce-Pruit Co. appearing in this issue.

THE COTTON MARKET

The New York market opened this morning at 21.76c, the highest opening since the 16th of this month and has shown a consistent upward tendency, the market was quoted at the 9:30 call this morning at 21.87c. The market closed last night at 21.95c and indications point to a still higher market before the final call today.

JUDGE BRICE'S SUCCESSOR

So far as known, no action has yet been taken by Governor Dillon in the matter of appointing a judge for the fifth judicial district, to succeed Judge C. R. Brice, of Roswell, resigned. Herman Crile of Roswell has been mentioned by the local attorneys here as a probable successor of Judge Brice.

SELLS GROCERY AND MARKET

H. A. Denton has sold his grocery and meat market, located in the oil field to Wm. Howell, it was learned the first of the week. Mr. Howell took immediate possession.

OIL OUTPUT IS OFF FOR WEEK ENDING SEPTEMBER 17TH

The estimated daily average gross production of the Mid-Continent field including Oklahoma, Kansas, Panhandle, North, West Central, West Texas, East Central and Southwest Texas, North Louisiana and Arkansas, for the week ended September was 1,527,050 barrels, as compared with 1,540,400 barrels for the preceding week, a decrease of 13,350 barrels. The Mid-Continent production, excluding Smackover, Arkansas heavy oil was 1,448,600 barrels as compared with 1,461,600 barrels, a decrease of 13,000 barrels.

BULLDOGS OPEN SEASON BY DEFEATING THE LAKE ARTHUR ELEVEN 39-0

The Artesia high school Bulldogs opened the football season at Lake Arthur, Friday defeating the Lake Arthur eleven by a score of 39 to 0. It was not until the last half of the game that the Bulldogs displayed a real brand of football by uncorking a series of line bucking attacks, scoring almost at will. Their lighter Lake Arthur opponents played a remarkable game in the face of the fact that they were new at the game and were handicapped by lack of practice.

Neither side scored in the first quarter. Fumbles proved costly for both teams. Tee Pollard, who now appears to be a coming star for the Bulldogs was largely responsible for the first touchdown, when he made a rather sensational end run, which put the Bulldogs almost within striking distance of their goal line. This was Pollard's first game as quarterback. The score at the end of the first half was 6 to 0 in Artesia's favor.

Lenord Clayton starred in the third quarter when he returned a punt for a distance of about 35 yards, which was one of the features of Friday's game. It was not until the 4th quarter that the Bulldogs really hit their stride, shoving over three touchdowns in rapid succession.

The lineup:

Artesia		Lake Arthur
Williams	End	Harber
Shockley	T	Williams
Montague	T	S. Derrick
Littlejohn	G	Lee
Naylor	G	Waldon
McCaw	C	V. Waldon
House	E	P. Vincent
Pollard	QB	Beasley
Jackson	FB	M. Derrick
Yates	HB	J. Derrick
Clayton	HB	Lee Derrick

Substitutes, Artesia: Horn for Naylor, Withers for Montague.

CONSERVANCY PETITION MOVING SLOW

The petition calling for the creation of a conservancy district in the artesian basin, is being circulated rather slowly. Apparently no one has taken sufficient interest in the matter to see that the petition is signed by the property owners. If the property owners favor such a move, get your name on the dotted line without further delay. The petition is now at the Citizens State Bank.

LAKEWOOD DEFEATS OIL FIELD CLUB

The Lakewood Blues defeated the Oil field baseball club at Lakewood Sunday in a fast game by a score of 10 to 8. Another game is scheduled between the same teams, Sunday afternoon at 3 p. m. at the F. W. & Y. camp. If the day is warm lemonade will be served to all visitors, everybody invited.

CARNIVAL HERE

The E. P. James Shows, arrived in Artesia Tuesday and yesterday opened a four day engagement here. This is the second visit of the James Shows to Artesia and they have provided entertainment for both the young and the old. The shows this year have fifteen concessions and three riding devices.

MRS. MUMFORD DIES

Mrs. Frank Linell received a telegram Tuesday afternoon from Mr. Mumford at Ft. Stockton, Texas announcing the sad news that Mrs. Mumford had died that day of pneumonia. Mrs. Mumford and the children had left here some time ago to join Mr. Mumford at Ft. Stockton. The family have the sympathy of friends here in their sad bereavement.

HALSEY CATTLE SOLD

Walter Coates was a pleasant caller at the Press office Wednesday and reported the sale of the Halsey cattle, 250 head to Roswell buyers.—Penasco Press.

ATTENTION WELL OWNERS

The conservancy district is in the process of organization and every artesian well owner interested in this project is invited to meet in the office of E. C. Higgins, located at the rear of the Citizens State Bank building, Saturday evening at 7:30 p. m. A. G. Fiedler, of Roswell with the U. S. Geological survey will be present and will give some interesting lights on the progress made in the study of the Pecos valley underground water supply. This meeting is very important and every farm owner should attend if possible.

MRS. P. M. MAXWELL DIES HERE THURSDAY; BODY SHIPPED TO POST

Mrs. P. M. Maxwell, age 47, wife of W. P. Maxwell, died at the family home in east Artesia, Thursday afternoon, as result of heart failure. Mrs. Maxwell had been a resident of Artesia for the past eighteen months. The deceased is survived by a husband, W. P. Maxwell and three children, William Maxwell, Miss Evelyn Maxwell and Mrs. Maude Griffin. Mr. Maxwell and son have been employed in the oil fields near Pyote, Texas.

The body of Mrs. Maxwell was forwarded to Post, Texas, Friday, where burial was made in the Post cemetery.

AUGUST STRAUSS, A PIONEER RESIDENT DIES HERE THURSDAY EVE

Was Native of Prussia, Germany, And One of Two Surviving Union Vets of Community— Burial Was Made Friday Here.

August Strauss, age 87, pioneer resident of the Artesia community, died here Thursday evening, following a long period of invalidity. Despite his declining years, Mr. Strauss remained active until within a few months of his death, when he was strickened with frequent rheumatic attacks. Mr. Strauss was a native of Prussia, Germany and came to America when a young man. Shortly after his arrival in the United States, he enlisted as a union soldier in the Civil War and saw active service during the four years' struggle. He was one of the two remaining union veterans of this section.

He came here in 1903, when Artesia was yet a village and has played his part in the development of this section from the time of his arrival. The deceased is survived by two brothers, Herman Strauss, of Oldham, Illinois, and Fred Strauss of Baylis, Illinois. Funeral services were held Friday afternoon at the Presbyterian church, Dr. E. E. Mathes, of Clovis, former pastor of the church here, officiating. Interment was made in the Woodbine cemetery.

ARTESIA'S YOUNGEST HERO

Artesia's youngest hero is in the person of Ben Champion, Jr., eightenn months old son of Mr. and Mrs. Ben Champion. Recently when a member of the family left the oil stove burning too high and the flames from the stove flared up, threatening to envelope the kitchen in a blaze, young Ben Jr., apparently sensed the danger and although not able to enunciate clearly, made his mother understand the nature of the impending calamity. Mrs. Champion who was sewing in the front room ran to the kitchen and was able to extinguish the flames before any damage had been done.

DISTRICT COURT MONDAY

The regular October term of district court will convene Monday, October 3rd, when the grand jury has been called to convene. The petit jury has been called for a week later.

There are not many matters of great importance before this term of court. There is one murder case, in which Juan and Chapo Juarez are charged with the death of Manueal Olubis, who died as a result of a gunshot wound received during a quarrel at a party on the Harroun ranch a few months ago.—Current-Argus.

COTTON PICKERS FAIRLY PLENTIFUL

The cotton growers have experienced little difficulty in securing a sufficient number of pickers to meet the present needs. Early cotton grown with little water has opened rapidly, but the cotton with larger stalks has been rather slow in opening.

BRICK WALLS UP

The brick work on the new Smokehouse building is now practically complete. Work on the interior of the building is expected to start next week.

110 DIVORCES IN MINUTE IS RECORD

LONDON.—English justice has the reputation of moving fast, but Judge MacKinnon in divorce court stepped on the accelerator so hard that the bandage over the eyes of the goddess of justice almost blew off. In one minute he granted 110 absolute divorces.

One Boy Shot Result of Raid On Donahue Melon Patch

A. L. Donahue Arrested and Is Released on Bond— Two Shots Fired Thru Delivery Wagon Seat, One Hits Young Beall.

A melon expedition conducted by six Artesia youngsters Thursday evening was started in fun, but ended in a tragedy, when George Beall, Jr., age 13, was shot, as result of an alleged raid on the melon patch of A. L. Donahue, north of Artesia. Donahue has been arrested and released on bond, charged with the shooting.

According to the story told by the boys on their return here, they had visited a melon patch north of town, securing six cantaloupes, they put the melons in a delivery wagon and were proceeding in the direction of Artesia. They stopped to eat the melons just north of the city dump grounds. Donahue, it is alleged followed them and as soon as the car stopped, fired two shots with a rifle. Both shots struck the back part of the car seat, barely missing two boys, who were seated in the bed of the car. The metal in the seat deflected one of the bullets, which hit young Beall, entering the body to the right of the backbone and ranging down, lodging just above the right hip.

Young Beall was rushed into town, where he received medical aid. His condition did not appear to be serious at first, but after an examination, it was decided to send him to a hospital at Carlsbad, where he underwent an operation for the removal of the rifle ball. Early reports following the operation indicated that the wound might prove to be very serious.

It was stated this morning that young Beall would be brought home today from the hospital at Carlsbad.

DEATH OF REV. ESTES

Rev. Simmons has received the sad news of the death on the 18th from pneumonia of the evangelist, Rev. R. L. Estes, of Shawnee, Oklahoma. Rev. Estes conducted a successful revival at the Baptist church here last November and made many friends who will be grieved to learn of his death, both from a personal viewpoint and also that a good man should have been cut off from a life of great usefulness.

FEDERAL LAND LOANS MAY SOON BE POSSIBLE FOR PECOS VAL. FARMS

The following item clipped from the Roswell Record of yesterday may be of interest to the farmers of this community.

Wyatt Johnson has just returned from Wichita, Kansas, and gave a detailed report before the Kiwanis Club at the noon day luncheon yesterday regarding a conference he had with the Federal Land Bank committee in regards to Federal Farm Loans for the Pecos Valley.

He said that after going over all of the different irrigation phases of the Pecos valley they gave very great encouragement in regard to making loans on lands under the Hagerman Canal, and asked him to send them at an early date all data as outlined by their engineer which is now being prepared for their consideration. In regard to the farms under artesian wells and pumping plants, this matter will be gone into upon the arrival of their engineer and an expert on values of irrigated lands, which will be in the near future.

They also reduced their requirement of four sections or more on ranch loans and granted permission to accept applications on 320 acres or over the same as in Lea and Roosevelt counties, the eleven applications submitted were gone over and accepted, but as it takes ten approved applications before a charter can be given it was requested that there should be a number of additional applications submitted so that there would be the required ten or over.

TELEPHONE NO. 7

TO LABEL OLD LINCOLN

Plans of the New Mexico Historical Society to label inconspicuously the historical spots of Old Lincoln, former home of Billy the Kid, are worthy and we hope this improvement will become more than just a plan; a completion without delay. As the quiet town now appears a stranger might easily pass through it without knowing what an interesting spot it really is. The idea as we understand it is not to bring crowds to Lincoln, but to see that those who do come can view the places of interest intelligently and to the best advantage. A bully idea.

ALMOST, BUT NOT QUITE

Almost, but not quite describes the big prize fight, Thursday evening, so far as the come back of ex champion Dempsy is concerned and Jack came a lot nearer staging a come back in the seventh round than most people gave him credit for when the radio returns were received here. Whether or not the protest of Dempsy's manager will avail him anything remains to be seen at this writing, but it is doubtful.

Few people view the profession of prize fighting with favor, yet most of us listened for the returns eagerly. Aside from a few long faces and empty pocket books, the town is again normal. Of the twelve or more heart failures reported over the United States as a result of the fight, not one occurred in Artesia.

DO WOMEN SPEND WISELY?

An army of women, perhaps a million in number, will spend a good deal of time this winter in discussing the question of family finances, in accordance with the recommendations made by the General Federation of Women's Clubs for this year's programs.

For several years women's clubs have been urged to organize thrift departments, and all the varied resources of government bureaus, university extension departments, and similar organizations, have been placed at their disposal. This year, through a series of printed booklets prepared by Anna Steese Richardson of the Good Citizenship Bureau of the Woman's Home Companion, they are to have adequate guidance and leadership in a whole concentrated winter's work on the subject of thrift.

Out of all this study, Mrs. Richardson expects that considerable new light will emerge on the mooted problem, Do Women Spend Wisely?

At the start, it has to be admitted that the average woman decides practically every financial problem that arises in her home, from the make of the car in which the family rides, to the price of her husband's neckties.

Women already hold the purse strings in America, Mrs. Richardson insists, and therefore it is worth a lot of time and trouble to help them to spend the family income to better effect. "Women influence directly the purchase of 95 per cent of all furniture," says Mrs. Richardson, "and theirs is the deciding voice in the sales of 83 per cent of all clothing for the family. They dictate 61 per cent of all sales of haberdashery for men, and are the deciding factor in the purchase of 90 per cent of the automobiles. If you question these figures, glance over the advertising pages of the newspapers and magazines. The writers of advertising appeal directly to Mother."

BOOST LOCAL PAPER

Some towns, or some citizens in some towns, think they can get along without either a Chamber of Commerce or a newspaper. And some towns do—but just look at 'em! Good roads are making it difficult to hold their own. When it is a difference of only ten minutes or half an hour between towns, the fittest will survive, the others become a place with weeds holding carnival on main street. When two towns are outwardly equal, which is the fittest and will be the survivor? The one with the most enterprise. That is the answer. And the one with the most enterprise is the one with a newspaper and a Chamber of Commerce—anyhow a newspaper. But no newspaper can sustain itself on the hand-shakes given the editor by his grateful fellowmen. If they do not give him advertisements, printing jobs and subscriptions to his paper he will have to move his outfit to a liver community. After he moves and no successor takes his place, goodby town! It is doomed to become a reminiscence. But if the newspaper is sustained, hello town! You are set to stay. A town that keeps its newspaper will keep its place on the map. It costs much money to carry on even a small newspaper business these times. The capital investment can hardly be less than $5,000. If the office is machine equipped it can hardly be less than $10,000. And the income of a machine-operated office must be several hundred dollars a month—nearly all of which is spent in the town. Hard work and good business management are now absolutely necessary in publishing a newspaper. Many publishers are more anxious to get out than to stay in. Towns which are indifferent to the press will find that the world is indifferent toward them. It works out that way. No two ways about it, no dispute about it.—State Press in Dallas News.

THE FIRST AMENDMENT

The Taxpayers' Association of New Mexico favors the adoption of the first amendment which will increase the salary of members of the state legislature from $5.00 to $10.00 a day.

The approval of the Association is based upon the hope that such increase will result in the selection of legislators of ability and character. Upon the willingness of such men to "run" depends the kind of legislature we will have. Even ten dollars a day will not do much more than pay actual and necessary expenses while attending the legislative session.

The total cost of the 1923 legislature was $46,699.91; of the 1925 legislature $50,518.54; and the 1927 session $49,622.74. Of the latter amount $22,770.00 was for salaries for members and $3,581.64 was for mileage allowance at the rate of ten (10) cents a mile in going and returning from the capital.

The increase in salary of members from five dollars to ten dollars a day will result in a total increase of $21,900.00 for each regular session, making the cost of such a session about $72,000.00 as compared with approximately $50,000.00 expended for the 1927 session.

The practice of distributing nominations for the legislature as "consolation prizes" should be discontinued by both parties. There has always seemed to be a notion in some sections that it makes very little difference what kind of men are sent to the lower house, because the senate will, after all, decide what laws shall be enacted. Good men are often elected to both houses, but their task is made extremely difficult on many occasions by the little minded and the selfish minded, the ignorant and the vicious. With an improved personnel of members, perhaps some of the graft involved in the selection of the legislative employees can be eliminated, the number of useless bills reduced, and the legislative session shortened and thus make savings to offset the increase due to doubling the salaries of members.

Weeds Looked On as Reservoirs of Wealth

At a recent meeting of distinguished botanists the opinion was voiced that great reserves of wealth are lying untapped in what we now regard as weeds. Though there are 500,000 known species of higher plants, the world's needs in food, fiber and timber are at present supplied by less than 100 species.

Another interesting fact that was brought out at this convention of botanists was that the cells of plants can be regarded as the most powerful forms of suction pumps in the world. As the result of research into the way in which plants draw water from their roots to their topmost leaves through fermentation that is taking place in their cells, an estimation was made that pumping power sometimes equals 500 pounds to the square inch.

Tunneling by Electricity

The new tunnel of the Great Northern railway under the Cascade mountains is literally being driven by electricity. Blasting shots planted in the rock are fired by it, shoveling machines are driven by it, rock and dirt are hauled out and materials hauled into the bore by six, ten and twenty-ton mine-type electric locomotives, and lighting and some special heating in and around the job are all done electrically.

Wedding invitations and Announcements, engraved or printed—The Advocate.

KOB TO BROADCAST STATE AUDITION

If plans of the state committee of the Atwater Kent Foundation for New Mexico's participation in the National Radio Audition are realized, at least ten cities of the state will arrange for local contests, out of each of which one boy and one girl will be certified to the state audition, to be broadcast from station KOB, at State College on October 14, under the management of Dean R. W. Goddard of the New Mexico College of Agriculture and Mechanic Arts.

Cities of New Mexico to which the invitation of the foundation has been extended to arrange for local sponsorship and the names of the persons to whom the invitations were addressed, are:

Albuquerque, Mrs. Grace Koogler; Carlsbad, Mrs. J. Franklin Joyce; Clayton, Mrs. D. A. Paddock; Gallup, Mrs. William Bickel; Las Vegas, Mrs. Charles O'Malley; Raton, Mrs. A. H. Darden; Roswell, Mrs. P. W. Helmig; Santa Fe, Mrs. A. W. Beckner; Silver City, Mrs. Victor Culberson; Tucumcari, Mrs. Earl George, and Las Cruces, Mrs. Louis A. Broaddus.

The state committee, of which Mrs. George W. Frenger, founder of the State Federation of Women's Clubs, and president of the Las Cruces Music Club, is chairman, is urging all interested communities to complete their local organizations at once, and arrange for the selection of their candidates for the State Audition. All local contests are to be held during September, and the State Audition in October is to be followed by a District Audition to be broadcast from Station WFAA in Dallas in November. The final or National Audition will be broadcast from New York in December.

Winners of the State Audition will have their expenses paid from their homes to the District Audition in Dallas and winners of the District Audition will have their expenses paid to the National Audition in New York. This will include travel, hotel and entertainment, and a trip to Washington, D. C. The national awards will total $17,500, of which the first will be a gold decoration, $5,000 in cash and two years' tuition in a leading American conservatory for one boy and one girl.

All candidates must be amateurs, between the ages of 18 and 25. They cannot enter the auditions except through a local committee. For this reason the state committee is asking all interested local communities to advance local organization as rapidly as possible to prevent the probable loss of opportunity to some ambitious boy or girl whose voice deserves the right to be heard.

GIVE YOUR DAIRY COWS PROPER FEED AND CARE

"Feeding Dairy Cows" is the title of a new Extension Circular by E. E. Anderson of the New Mexico Agricultural College. This circular deals with the feeding and management of dairy animals and gives advice on kind and quantity of feed, methods of feeding, management of herd, etc. The circular states.

"The person starting in the dairy game has the best chance to succeed if he will get the best possible foundation cows. The next step is to build up his herd by continually using good purebred sires, culling out the poor producers, raising heifer calves from his best cows, and intelligently and systematically feeding and caring for his herd.

"Over half the cost of dairying is ordinarily that of feed. This being true, it is only natural that we should attempt to feed our cows as economically as possible. It is a well known fact that it pays to feed a dairy cow liberally. Practically half the feed a cow eats is required to maintain her body. When fed all she can eat, the good dairy cow uses one-half for body maintenance and the other half for making milk.

"A cow is not unlike a human in regard to palatable feed. The more tasty it is, the more a cow will consume, up to the limit of her capacity. Ordinarily when a ration consists of several feeds, it is more palatable than just one or two feeds. This means a greater consumption and a greater and more economical production. In addition, a number of feeds will supply a greater variety of proteins and other elements, which are desirable, than will a ration limited to one or two feeds."

Several tables of suggested grain rations to be fed with different kinds of roughages are contained in the circular. If you are interested in dairying, write for free circular No. 94 to the Extension Service, State College, N. M.

INSIDE INFORMATION

Baked Stuffed Cymbling

Members of the squash family are sometimes overlooked by even the homemaker most anxious to vary her menus. The Bureau of Home Economics, U. S. Department of Agriculture, suggests baked stuffed cymbling as a good way to combine pork with a delicious vegetable. Try the following method of preparing it: 1 large tender cymbling; 1 1-2 cups dry bread crumbs; 1 tablespoon chopped onion; 1 tablespoon chopped green pepper; 4 tablespoons butter; Salt and pepper; 1-2 cup vegetable if desired, such as cooked peas, carrots, beans, or celery; Crisped bacon or cubes of salt pork. Wash the cymbling. Scoop out the pulp with a spoon, being careful not to break the outer skin. Cook the cymbling shell until tender in boiling salted water. Remove and drain. While the shell is still warm, rub the inside with butter so the flavor will go through the vegetable. Brown the onion and green pepper in the fat, add the bread crumbs, and stir until well mixed. Cook the inside of the cymbling until tender and dry; add to it the seasonings and the bread crumbs. Mix small pieces of the crisped bacon or salt pork and any of the vegetables mentioned with the other ingredients. Place the mixture in the shell and cover the top with buttered crumbs. Bake in the oven until hot through and golden brown on top. Cut in slices and serve at once.

The matter of variety and contrast in the texture and flavor of the foods combined in one meal is not always given sufficient thought. Serve something crunchy like toast or browned crumbs on a scalloped dish, something soft, as a white sauce or custard, something crisp and fresh, like lettuce or cold slaw, to give variety in texture. For variety in flavor some foods should be bland or mild, like potatoes or bread; some should have a pronounced flavor, as in the case of rare steak, roast lamb, ham, or cheese, or some of the vegetables such as cauliflower, cabbage, onions, green peppers; there should also be something sour in itself like tomato or pickles, or like spinach or beets, something that is ordinarily served with vinegar, or a salad with a French dressing. Sweet flavor is usually provided in the dessert, or it may be introduced elsewhere, as in candied sweet potatoes, or as jelly with meat. The five food groups should also be represented—vegetables and fruit, cereal or starchy foods, efficient protein foods, fats, and sugars. The relative proportion of foods chosen from these groups should supply sufficient protein of the right kind, calories, minerals and vitamins.

TWO MORE EAGLE SCOUTS

Richard Wheatley and Fletcher Collins, members of the local Boy Scout troop, have filed applications to become Eagle Scouts with the Court of Honor. The Court of Honor meets in regular session Monday evening and the applications of Messrs. Wheatley and Collins will be acted upon at this time. Both lads have passed the twenty-one tests leading up to the Eagle Scout, but up to the present had not served the necessary time required to become an Eagle Scout.

If the applications are acted on favorably, Messrs. Wheatley and Collins will receive the second and third Eagle Scout badges to be issued by the local Court of Honor, the first Eagle badge was issued to LeRoy Crawford some weeks ago.

PARALYSIS EXPERT AT CLAYTON

SANTA FE.—Miss Mollie H. Honnelly, physio-the-rapist, employed by the state to attempt to restore to normal condition an estimated 100 persons left crippled by infantile paralysis, arrived Monday to begin her work, which will be started at Clayton.

Experience has shown that restorations may be expected to reach 40 per cent, she said. One new case of infantile paralysis was reported in Belen and two in Guadalupe county to the state health department.

TWO INCHES SNOW FALLS IN RATON

RATON, N. M.—A two inch snow, the first of the season and coming in the wake of thirty-six hours drizzling rain, fell here early Tuesday morning. The fall was almost entirely local and melted at sunrise. The precipitation here since Sunday noon has been two and one-fourth iches.

PICKED UP ON MAIN

In order to avoid a possible contest in the coming November election, democratic friends of M. W. Evans have urged him to take out citizenship papers so that he may establish his residence here.

The only unpleasant feature of Lindbergh's reception in El Paso, says an Artesia resident, was due to the fact that Lindy had to hold up the reception proper until J. S. Sharp, Calvin Dunn et al., could get there.

The multicolored dog of Ed Conner has long been a puzzle to his neighbors. Some mornings this fine dog would come out a pink color, the next morning a yellow, the next a blue and so on down the line. Local scientists have been stumped over the unusual phenomenon, until it was observed that the color of the dog resembled the color of Ed's tie. So it was concluded that the dog was akin to the chameleon (a specie of of the lizzard, which changes its color to harmonize with the color of its surroundings) Still more puzzleing however, is the fact that Ed is the first groceryman in Artesia to be able to afford more than one necktie at a time.

COUNTED CARS ON HIGHWAYS

A count of automobiles using the local highways during a period of 114 hours was completed by representatives of the state highway department of the past week, and reveal some interesting figures. The count included fifteen hours for six days, and twenty-four hours on September 16, the dates being the 9th to 17th.

Announcement of the count was made yesterday, as follows: The Carlsbad to Malaga highway No. 131A had a total of 9,991 cars in 114 hours, Federal aid project No. 18, Carlsbad to Lovington, had a count of 3,164 cars. The Carlsbad to Roswell highway had 2,803. With cavern travel slackened, only 688 cars were counted on this road, at the branch from the highway two miles south of town. From Malaga to Pecos the count was 1,467 cars.

The increase on the Carlsbad-Malaga highway from 5,472 last year to 9,991 this year indicates a very heavy increase.

The total on the three main highways is 15,985 for the 114 hours, or an average per hour during the time taken of slightly more than 140 cars per hour on the three, with the Carlsbad-Malaga having about 88 cars an hour.—Current-Argus.

HEAVY ENROLLMENT AT UNIVERSITY

According to figures released from the register of the state university at Albuquerque, last week, 550 students have enrolled in that institution, which is the heaviest yet recorded.

THE STYLE SHOW

What is more charming than a pretty young girl in a beautiful gown? Nothing but a "bunch" of pretty young girls in beautiful gowns. This is what the audience at the Majestic Theatre had an opportunity to see on Tuesday evening, when the Joyce-Pruit Co., gave its second annual Style Show. All the Joyce-Pruit stores were represented in the show, which featured various styles of wearing apparel for fall and winter. The "show" was given between the comedy and feature and the stage was artistically decorated in flowers, making an effective background for the pictures presented by the young ladies in costume.

Much credit is due C. Bert Smith, manager of the Joyce-Pruit Co. dry goods department, who through his untiring efforts, made the style show the outstanding success that it was.

Mrs. Price Gittinger, dressed in a fetching page's costume of white blouse, green trousers and white hose, acted as mistress of ceremonies. She first gave a brief history of the Joyce-Pruit Company and then introduced the attractions. She was assisted by Bettynell Lanning in a lovely pink taffeta dress.

The first number was a pretty flower dance by little Helen Hutcheon. The young ladies of the caste were on the stage during this number, adding brilliance to the scene in their lovely evening gowns.

The second number was a song "O Fair New Mexico" by Miss Elizabeth Hogue.

This was followed by the display of street dresses, each of the six stores presenting a costume.

Mrs. John Lanning followed with two vocal numbers—"Farther West" and "The World is Waiting for Sunrise," Ray Bartlett and his orchestra accompanying these and the previous numbers.

Street costumes were next displayed by the models beginning with dress coats, sport coats and dresses, and afternoon dresses. The program was varied by the introduction at this point of two gentlemen—Mr. Tex Hinson and Mr. Ray Smith, who displayed for the local store gentlemen's overcoats and business suits. The closing number was the display of evening dresses, a dazzling array of brilliant creations made a pleasing finish to the show.

The different stores were represented by the following young ladies. Roswell, Miss Lucile Cruse; Portales, Miss Pauline Pruit; Clovis, Miss Hortense Phillips; Carlsbad—Miss Adele Bujac; Hope, Miss Josephine Coffin; Artesia, Misses Marjorie Wingfield, Glenda Gray, Lulu Wilson and Helen Mann. Miss Wingfield went to Carlsbad to represent Artesia at the show there tonight.

BIRTHDAY PARTY

Rachel Dell Swift celebrated her seventh birthday anniversary with a party in which a large number of her little friends participated and all had a splendid time playing children's games. The party was on Saturday afternoon of the seventeenth. Rachel's mother, Mrs. Elzie Swift, served the children with ice cream cones and there was a lovely angel food cake surmounted with seven candles and lemonade to drink. Little baskets containing animal candies were favors that were thoroughly appreciated by the little people present, who were Lela Bess Mann, Wilma Paton, Mary Paton, Georgie Lee Williams, Joan Littlejohn, Florine Muncy, Charles Higbee, Anadelle Williams, Maxine Brown, Helen Meredith Gates, Clara Sinclair, Robert McRae, Nina McLean, Billy Paris, Harry Goodell, Lloyd Walker Evans, James Bates,, Clara Bess Bill, Dorothy Berry, Joe Smith, Emma Jane Brewer, and Betty Jo Brainard. Besides the children there were a number of grown-ups—Rachel's grandmother, Mrs. Dan Beckett and her teacher, Miss Helen Sage, also Mrs. Virgil Wells and baby, Helen Louise.

BIRTHDAY PARTY

Little Donald Pior was six years old last Saturday and celebrated the interesting event with a party from three until five o'clock in the afternoon. Six little boys, Charles Preston Dunn, Junior Phillips, Bobby McRae, Harry Goodell, Charles Higbee, and John Conner, were his guests and entered heartily into the games that make children's parties such happy events. Donald's mother, Mrs. Pen Pior, served cocoa and cake to the little fellows.

Men's Hair Long

Bobbed hair and truncated tresses may be popular in America and Europe, but the mode has not penetrated Asiatic Russia. Even the men in some parts of Turkestan wear long hair. In the "Heavenly Mountains" of Turkestan the Kalmucks, who are pure Buddhists, wear their hair in long, thick braids. They live in felt tents, eat mutton and drink "doumiss." Baldness is practically unknown among them.

TELEPHONE 217

FRIDAY

The Eastern Star holds an indoor picnic at the Masonic hall this evening. All Stars and their families are invited.

The First Evening Bridge Club meets at Mrs. Corbin's.

SATURDAY

Cooked Food sale of the Library Board at the Star Grocery beginning at one o'clock.

TUESDAY

The Fortnightly Bridge Club meets at Mrs. C. E. Brown's in the afternoon.

The Idlewhile Bridge Club meets with Mrs. Kipgan in the afternoon.

The Women's Club meeting for

WEDNESDAY

Wednesday is postponed to October 18th.

THURSDAY (NEXT)

The Baptist Missionary society meets at the church at 2 o'clock for a combined business meeting and state missionary program.

Presbyterian Aid Society at home of Mrs. Buckles.

RADIO PARTY

Mr. and Mrs. Albert Richards entertained at a radio party last Thursday evening. Following the returns from the Dempsey-Tunney fight a three course supper was served by the hostess, the remainder of the evening being devoted to bridge. The guest list included Messrs. and Mesdames C. R. Blocker, John Lanning and Bettynelle, A. C. Kimbrough, Ossie Coalson and C. Bert Smith, Mrs. Una Hutcheon and Miss Alma Norton.

CHRISTIAN LADIES' ASS'N.

The Association held its regular meeting at the home of Mrs. Wallace Merchant last Thursday afternoon. The chief business of the afternoon was planning for the Christmas bazaar, which will be held this year on the second Friday in December, instead of the second Saturday as has been customary. Refreshments were served by Mrs. Merchant and the joint hostesses, Mrs. J. B. Atkeson and Mrs. G. H. Eaton.

M. E. QUARTERLY CONFERENCE

The Fourth Quarterly Conference of the Methodist church was conducted by Presiding Elder J. B. Cochran at the church last Sunday afternoon. After hearing the reports from the year's work the presiding elder pronounced it the best year in the history of the church. Election of officers for the ensuing year was held and the entire board re-elected as follows: Stewards—J. E. Robertson, chairman, T. H. Ragsdale, secretary, A. L. Allinger, T. M. Bradshaw, M. A. Brown, Dan Eipper, George Frisch, J. H. Holloman, J. H. Jones and J. S. Sharp. Trustees—E. B. Bullock, J. H. Holloman, S. A. Lanning, C. B. McCree, Dr. Stroup, A. L. Terpening and S. S. Ward. Mrs. I. C Dixon was elected chairman of the Missionary Committee and E. B. Bullock, lay leader.

German Prison Reform

A movement is on foot, not before it is needed, writes the Berlin correspondent of the Christian Science Monitor, to effect some reforms in German prisons. Doctor Schmidt, the minister of justice for Prussia, has for some time past been paying unexpected visits to the prisons in several German cities.

One result is to be the brightening of the prison yards by planting flowers, and the prisoners themselves are to be allowed a flower in a pot in their cells. Doctor Schmidt is also introducing rewards for good behavior in the shape of books, permission to receive and write letters more frequently and other alleviations.

Study Your Ancestors

Prof. Rudolph M. Binder, head of the department of sociology of New York university, states that a consideration which should be kept in mind in the search for the proper wife or husband is a study of ancestral traits.

"Certain traits," says the professor, "known to the scientist as 'recessive traits,' often held in abeyance for several generations and entirely forgotten, will suddenly reappear in a child.

"The study of ancestry should cover at least five or six generations. Moral, mental or physical defects may assert themselves a hundred years after they have apparently disappeared."

The Laugh Diplomatic

"Does your boss ever tell you a funny story?" "No, but I don't dare to undeceive him."

COOPER—BUCK

The marriage of Mr. John Lee Cooper and Miss Violet Buck occurreed Monday evening, the 18th, Rev. John Sinclair, pastor of the Presbyterian church, officiating. The ceremony was performed in the cottage on Missouri avenue, just west of the Nazarene church, which the groom recently purchased and which will be the home of the young couple. The wedding was witnessed only by relatives of the contracting parties.

The groom is a son of Mr. and Mrs. Cooper of Cooper, Lea county, but with his sister, Miss Katie, and a younger brother, has been here a number of years while completing the course in our high school, which he did in 1926. The past year he has been employed at the Artesia laundry, but has accepted a position at Mount's and will begin work there Saturday after his return from the honeymoon trip. The bride is a daughter of Mr. and Mrs. Eli Buck and has also been a student in our high school.

Many friends join in wishes for happiness and prosperity for the young people.

"SHOWERY" WEATHER

Last Thursday the bride of the week, Mrs. John Lee Cooper, was the recipient of two "showers." The first was given by the ladies of the Church of Christ, of which the bride is a member, and occurred at three o'clock. It was a miscellaneous "shower," and at four o'clock the employees of the laundry, who have been associated in business with Mr. Cooper for the past year, appeared on the scene with another "shower," also of a miscellaneous character. Howard Whitson, manager of the laundry, who was out of town, presented the happy couple with a handsome gift of silverware. After the arrival of the second "bunch" the church ladies served delicious ice cream and cake to the assembled company.

MISSIONARY PROGRAM AND SUPPER

The members of the Presbyterian church enjoyed a social meeting combined with an interesting program at the church last Thursday evening. A light supper was served on the lawn by the church ladies and later a program was given in doors. This consisted of a talk by Miss Small, who was a missionary in China for fifteen years. She returned to this country two months ago and for two months previously had been fleeing for safety. She confined her talk principally to the Missionary work in China.

MRS. POLK HONORED

Mrs. Polk, who will leave shortly for Texas, was honored at the Eastern Star meeting Tuesday evening by a special social hour with refreshments. As a token of appreciation of herself and her services to the Star the members presented her with a handsome present. Mrs. Polk had filled all the offices, and her services as conductress had caused her many miles of travel. In making the presentation speech Judge Ferree said he had figured out the distance and it totaled over three hundred miles. Clearly Mrs. Polk had earned the present the organization was glad to bestow upon her.

FRESHMAN-PARENT PICNIC

The members of the Freshman-Parent club, which includes the parents and instructors of the Freshmen, held a picnic in the park last Friday evening. There was a good attendance of club members and children and they had a wonderful time playing out-doors games, Prof. Reid being master of ceremonies. The mothers served refreshments of hot dogs and pop.

Old Wall Paper Restored

The quaint wall paper which has been on the walls of the old historic Moffatt-Ladd house at Portsmouth, N. H., home of the Colonial Dames of New Hampshire, has been completely renovated by Edward A. Halbner of Dorchester. The paper was carefully removed from the walls and taken to Boston, where it was cleaned and reinforced. It was then taken back to Portsmouth and placed in its original position. Skilled scenery painters retouched the parts that were faded.

Had to Be Careful

Upon entering an English town famous for its sporting associations, Arthur Henderson, former British home secretary, went to a hotel and ordered tea for himself and his party. He was surprised when the waiter demanded payment in advance and did not hesitate to express his amazement.

"I quite understand, sir," said the waiter, "but—well, you see, when the races are on we have to be very careful what we're about."

Let us send The Advocate to your boy or girl who is away to school—Special rates.

Starting on Mission of Safety

Two officers of Cleveland's unique Automobile Homicide Squad are shown leaving in their Chevrolet for the scene of an accident carrying their camera and portable typewriter to secure evidence on the spot. Cleveland officials credit this squad, said to be the only one of its kind in the United States, with materially reducing the number of traffic mishaps in that city. The Chevrolet is part of their official equipment.

SLOW ADVANCE IN ART OF MEDICINE

Only Recently Matter of Scientific Exactitude.

Behind the white-walled, sanitary hospitals of today, with their trained physicians, surgeons and nurses, lurks the shadow of the prehistoric medicine man and the nebulae of superstition, says Dr. T. K. Gruber, superintendent of the Detroit receiving hospital.

It is not over 75 years ago that medicine and surgery became a matter of scientific exactitude and not over 50 that it began to rise to its present high estate.

Superstition prevailed as the prime curative factor of ailments for centuries and perhaps has not been entirely removed until the last two or three decades. The medicine man of the Indian and the negro voodoo man are an outgrowth of our first physicians. A pain in the leg was subject to the treatment of certain incantations and weird steps; an inflammation was cured by mystic syllables and tokens spread about the cot of the sick. Some of these superstitions met death with the discovery of the true condition, but many traveled down through the ages to the times of our grandparents.

One of the oldest, which still is accepted with good-natured tolerance on our part, is that the heart is the seat of love. The actor still presses his hand to the left side of his bosom when addressing love messages to the heroine, and our vocabulary still includes such expressions as "heart aches," "broken hearted" and "heart throbs."

"In the early days of medical history the powers attributed to the heart were numerous," Doctor Gruber says. "The Chinese, among the first to practice medicine as it is understood today, held the wholly erroneous belief that the larynx connected with the heart and that our food passed into that organ. It also was said to be the seat of our intellect as well as our love." The same view was held by the Hindus, who also ascribed our intellectual powers to the spleen.

For centuries, probably from the beginning of man, illness was attributed to a spiritual power; the permeation of the body by some evil spirit, which in the early days the medicine men attempted to drive out with their weird caperings and toneless chants. It was not until comparatively recent years that the physical and the spiritual were disassociated in the practice of medicine and the theory of the body being a purely chemical formation was accepted

But in spite of superstitions and ignorance, medicine made some steps in the early years of its known history. China knew in the years before Christ of a preventative inoculation for smallpox.

Power at Long Distance

Cheaper electricity for everyone, because it can be transmitted economically thousands of miles where only hundreds have heretofore been possible, may be one of the results of a new system of handling electricity perfected by Frank G. Baum, San Francisco engineer. By it, reports Popular Science Monthly, electric power generated in the Rocky mountains may be sent to the Mississippi valley or even farther east, and the power of Niagara might span the country.

The new system divides the entire transmission line into sections of 100 and 200 miles, linked by rotary regulators, or condensers, each of which transmits the current onward with small losses. It promises to make possible the utilization of waterfalls which are now idle because they are in isolated localities.

Whine of the Failure

John D. Rockefeller gave a business girl a bright new dime the other day at Ormond Beach and told her a success story.

"Failures don't blame themselves," he said, "they blame the world. They never think their work is bad; they think it's exploited.

"I used to know a Cleveland office boy who has, of course, turned out to be a failure. His boss said to him one day:

"'Well, Timothy, I hope you save half of what you earn?'

"'How can I do that,' the boy whined, 'when I don't get half of what I earn?'"

NUMBER ELECTORS MAY BE UNABLE TO VOTE IN ELECTION

SANTA FE.—Numbers of newly qualified electors may not be able to vote in the special election on constitutional amendments to be held November 8, according to an opinion given secretary of state Miss Jennie Fortune by Attorney General R. C. Dow.

Dow holds that petitions to remove names from or add new ones to the registration lists of the last general election must have been filed forty-five days before the special election of Nov. 8, which time is now past.

He gave his opinion that in counties where the registration books have been porperly

LOCALS

Rev. Simmons left Monday on a short business trip to Deming.

Miss Connie Chilcoat spent the week-end at her home in Carlsbad.

Miss Zillah Simmons, who is teaching at Hagerman, was at home over the week-end.

Fint Stallings, of Clovis, special agent for the Santa Fe, spent a few hours in Artesia yesterday afternoon.

Dr. J. J. Clarke drove over to El Paso Sunday with Mrs. Clarke, who expects to undergo an operation at a sanitarium there today.

Mr. and Mrs. Dan Eipper and little grandaughter, Natalie Filbert, left Tuesday morning by auto to spend the winter at Moline, Illinois.

Mr. and Mrs. Ben Pior and children and John Wilkinson spent Sunday in the mountains, driving to Cloudcroft and back by Ruidoso with dinner at the Bonnell ranch.

Mr. and Mrs. R. G. Hill, who had been here ten days visiting Mrs. Hill's mother, Mrs. S. E. Ferree, and Mr. Ferree, left Tuesday for their home at Saginaw, Michigan.

Wm. Schneider, of Atoka, returned Friday from a visit to his sons, Art and George, in the Panhandle. He attended the Tri-State fair at Amarillo, Texas, during his absence.

Rev. Simmons closed his meeting at the Baptist church at Hope last Sunday evening. There were a number of conversions and much good was accomplished in the community.

R. E. Horne, who came home Saturday to visit home folks and especially to see his daughter, Mrs. Howard Byrd, who has been ill, returned to his work with the highway department at Newman, Texas.

Miss Jessie Glenn Bullock, after a week's visit at home, returned Saturday to her position at Ft. Worth, Texas. Her sister, Miss Helen Bullock, went with her to Ft. Worth and will study the Dunning Music System there.

The Artesia friends of the Olds family, now living at Alamogordo, will be pleased to learn that there is great improvement in the condition of Miss Maud's eyes, which were in a serious condition when the family left here. She will not be able to attend school this winter.

How Laundry Causes Fires

Records show that frequently the origin of laundry fires can be traced to a tightly packed clothes hamper. These hampers usually have been packed with clothes hot from the drying tumbler. The explanation is that carbon, being one of the principal constituents of cotton, combines with oxygen to form carbon dioxide. Ordinarily the air carries off the consequent heat, but where the clothes are tightly packed the heat is not carried off and sufficient temperature is raised to start a fire. Likewise poorly rinsed clothes cause fires.

We have a complete line of samples of social stationery—Artesia Advocate.

NEW BUILDINGS AT THE CAVERN

Money was available on July first for extensive improvements by the department of the Interior at Carlsbad Cavern, but due to the large number of cavern visitors, has not been undertaken up to this time.

Plans are now being worked out by the National Park Service to begin this work right away.

Three stone cabins for employees housing will be first on the program. It is also expected to build three more of these in the spring. They will take the place of present temporary tent accommodations, and furnish comfortable quarters. All new construction will be of native weathered stone, in keeping with present attractive buildings.

The plans being drawn and prepared on all this work are on such a basis that future growth will be provided for in uniformity and symmetry of general plan.

A 30x60 foot stone reservoir will be constructed on the top of the hill near the old parking space, and water will be pumped to it from the supply spring in Walnut canyon, and it will be piped to the various outlets from the reservoir.

A sewer system, including a sewage disposal plant, will do away with the present temporary structures and system.

The capacity of the light plant will be enlarged with a unit that will give current for lighting most of the Big Room.—Current-Argus.

Let us send The Advocate to your boy or girl who is away to school—Special rates.

K-F AMUSEMENTS TAKE OVER TRIEBS

The K and F amusement company, of Denver, Colorado, owners and operators of twenty-two theatres in Colorado and New Mexico and the largest theatre circuit in the inter mountain states is about to take over Trieb's Theatre Circuit, according to information given today by one of the representatives of the big film exchanges who was in Carlsbad this week. The possibility of Trieb either selling his theatres or aligning himself with a powerful circuit of theatres has been in the air for sometime as it has been known that Trieb has been anxious to move to Denver. A new thratre for Mexican patronage is soon to open in Roswell. J. A. Highsmith, who has been with Trieb since 1924 except for two years in the army will in all probability assume charge of the theatres in Roswell while Mr. J. M. Stevenson, of Hurley, N. M., will come to Carlsbad and manage the Cavern theatre. These changes are scheduled to take place on or before January first.—Current-Argus.

PLANT BASS SATURDAY

President Guy A. Reed of the Eddy County Game Protective Association, with assistants, planted twelve cans of bass in the Beach Park Lake and six cans in the south power dam lake, Saturday morning.

These came from the federal hatchery at Langdon, Kansas. There was also a large shipment of Crappie and ring perch, but these died in transit and none of them were left for planting here.—Current-Argus.

AUTHROIZED CHEVROLET SALES AND SERVICE—ARTESIA, NEW MEXICO

With After-Dinner Coffee

By CAROLINE B. KING
Culinary Expert and Lecturer on Domestic Science

MANY hostesses are omitting a formal dessert just now and in its stead are serving the after-dinner cup of coffee in the living room or library and accompanying it with some dainty morsel that may be either a savory or a sweet bite. This form of serving is very pleasant and chatty, and commends itself all around. Following are some suggestions for dainties that are very tempting with the demi tasse.

Cinnamon Whirls:

Roll biscuit dough one-quarter inch thick, spread with softened butter, brown sugar and powdered cinnamon. Chopped nut meats may be added, if desired. Roll and cut in one inch slices. Bake quickly in hot oven.

Switzerland Dainties:

Cut squares of pie pastry and cover with finely chopped genuine Swiss cheese. Lap edges toward center and bake in hot oven. When finished place a spoonful of jelly or jam in center of dainty.

Swiss Puffs:

Roll pie pastry thin and cut in circles with cooky cutter. Place a round of Switzerland cheese on each and bake until nicely browned. Garnish with a preserved or Maraschino cherry on top.

Jelly Wheels:

Roll pie pastry one-quarter inch thick, spread with softened butter, then with jelly, roll into a compact roll and cut in inch slices. Bake the wheels in a hot oven, then sprinkle while hot with powdered sugar.

Cheese Fingers:

Roll biscuit dough 1-4 inch thick. Cut in finger lengths and place a thin strip of Switzerland cheese between two layers of biscuit dough, sandwich fashion. Bake in quick oven, serve with plum marmalade.

Alpine Tidbits:

Heat small round crackers and serve with honey and genuine Swiss cheese.

Toasted Marmalade Fingers:

Toast slices of bread and cut in finger lengths. Butter and spread with orange marmalade, accompanied by Swiss cheese.

PROPERTY VALUES IN STATE THIS YEAR LESS THAN '25 BY $150,000

According to the figures upon which 1927 tax levies have been compiled, the total assessed value of property in New Mexico is $315,273,405, a decrease of about $150,000 under the valuation of 1926 which was $315,528,209. The figures do not include the private car companies' valuation for either year. For the year 1926 the private car valuation was $2,235,749 and the total assessment of property for that year was $317,763,958. About half of the counties show increased valuations as indicated below:

Valuations 1926 and 1927 compared:

	1926	1927
Bernalillo	$ 24,715,375	$ 26,225,430
Catron	2,700,000	2,496,004
Chaves	16,047,934	15,892,915
Colfax	26,621,841	26,212,308
Curry	10,671,251	10,938,664
De Baca	5,800,000	5,731,477
Dona Ana	17,092,975	17,447,107
Eddy	10,842,769	10,096,863
Grant	28,032,055	27,287,897
Guadalupe	7,732,153	7,284,565
Harding	4,076,580	4,148,993
Hidalgo	6,592,229	6,700,787
Lea	3,719,750	4,120,314
Lincoln	7,066,745	7,247,552
Luna	9,821,639	9,649,643
McKinley	13,390,501	13,137,442
Mora	5,201,917	4,267,918
Otero	7,354,127	7,510,537
Quay	11,750,344	11,942,215
Rio Arriba	5,609,000	5,036,201
Roosevelt	7,253,526	8,714,528
Sandoval	4,780,000	4,778,966
San Juan	4,800,000	4,097,384
San Miguel	15,818,855	14,870,866
Santa Fe	10,242,718	10,257,760
Sierra	4,017,067	4,077,315
Socorro	8,478,540	8,570,257
Taos	4,169,216	5,087,941
Torrance	7,362,661	7,585,102
Union	10,792,755	9,930,512
Valencia	12,963,446	12,535,240
Total	$315,963,446	$315,375,405

The valuations as given are those upon which levies were compiled for each year. It is known that the 1926 valuations were inflated in Sandoval county and they may have been inflated for 1927. It should also be noted that the 1927 total is practically the same as for 1926 in spite of reductions in grazing land values and increasing exemptions.

ASK ME ANOTHER

He: Do you know the difference between taxis and trolleys?
She: (expectantly): No.
He: (smiling sarcastically, heh-heh) Good. We'll take a trolley.

Wedding Invitations and Announcements, engraved or printed—The Advocate.

DAYTON ITEMS
(Mrs. W. H. Rambo, Reporter)

Mrs. Bob House was transacting business in Artesia Thursday.

Albert Wailes was reported having trouble with his eyes last week.

Joe Gifford, of Roswell and Louis Hellburg, of El Paso, were in Dayton Wednesday.

B. Tom Smith left for El Paso, Texas, Sunday to visit with his children a few days.

D. W. Eads, who has been visiting for a few days with his family, returned to Slaton.

J. B. Smith received word Sunday that a daughter had been born to his son, John Smith, and wife.

C. E. Poiner and family, of Wichita Falls, Texas, who have been visiting R. C. Horner and family, have moved to the Smith farm.

Miss Fay McLarry, of Atoka, who has been visiting with his friends and relatives in Texas for the past two months, returned home Sunday.

Mrs. Florence Miller was visiting with her brother, Tom Terry and family, of Cottonwood and Paul Terry and family, of Artesia, last week.

Mr. and Mrs. Hatfield, Mrs. Beeman and baby, and Miss Ethel Pipkin, of Carlsbad, were dinner guests of Rev. J. D. Terry and family, Thursday.

Lewis Howell, of Lakewood passed through Dayton Tuesday morning with his mohair clip en route to Artesia and reports this clip will net him better than $3000.00

Next Sunday will be the last Sunday that Rev. Thomas will preach at Dayton. On account of his wife's health he will request conference to move him to a higher altitude.

The county commissioner is doing some good work on the road from Dayton to the oil field and will make it passable in bad weather having put in a small bridge and some rock spillways and some grading work.

The Dayton Epworth League met at the home of Tom Burrows and family last Sunday. A very interesting lesson was given on mission work by Miss Gladys Burrows. Those visiting the League were Miss Emogene Kaiser, Miss Frankie Wailes and Miss Velma Owens. As next Sunday is the last day that Rev. Thomas will be with us the League is requested to meet at the Methodist church for their meeting from 3 to 5 p. m. Everyone is welcome.

YES—YES INDEED

Gerald: "How long is it since you were abroad?"
Julia: "Three husbands ago."

LOCALS

Mrs. W. R. Hornbaker was a Carlsbad visitor Tuesday.

W. E. Ragsdale is looking after business affairs at Pyote, Texas.

Francis Painter, who has employment at Roswell, spent the week-end at home.

Mrs. Albert Richards left yesterday to visit her parents at Laddonia, Missouri.

Mrs. Keller and Mrs. Dick McDonald, of Hope, were shopping in town Tuesday.

Ben Dunn accompanied a party of traveling men through the Carlsbad Caverns Tuesday.

G. H. Coleman, of Knowles, this state, was attending to business matters here yesterday.

Mr. and Mrs. D. W. Sellery have returned from a short visit with relatives in Nebraska.

Mrs. W. P. Cox and Mrs. James Nellis and little daughter, Margaret, motored to Roswell Sunday.

Mrs. Lewis came down from Pinon Monday to visit her sister, Mrs. Dave Sterman, for a few days.

Mrs. R. L. Collins, of Hagerman, was here Tuesday visiting her parents, Mr. and Mrs. S. G. White.

Mr. and Mrs. Ernest Sidwell and family are attending the Oil Exposition in Tulsa, Oklahoma, this week.

Frank Wilson returned home Friday after a short visit with his mother, near Colorado Springs, Colorado.

N. T. Kelly and sons returned yesterday from the vicinity of Kenna, where they had been contracting an oil rig.

Calling cards, 100 for $1.75, paneled stock.—The Advocate.

DID YOU EVER STOP TO THINK?

By E. R. Waite

THAT the wide-awake business man never hesitates.

THAT he knows those who hesitate never arrive.

THAT he knows the business that hesitates is often lost.

THAT business men must be up and doing all the time.

THAT they must be constantly originating new ideas and advertising plans and put them into effect.

THAT they know that by so doing they produce improved business.

THAT the right advertising at the right time increases business.

THAT good ideas increase business. They do not hunt the business men, but the business men have to think them up themselves.

THAT many varieties of ideas are handed every business man, but the success of ideas depends on the decision of the business man.

THAT the man who succeeds is not the man who waits for business, but the man who makes up his mind to succeed and then goes ahead and does it.

The better a business serves the public the better business they will have.

OFFICIALS IN SERIES

CHICAGO.—President B. B. Johnson of the American League Monday appointed R. F. Nallin and E. T. Ormsby to officiate in the coming world's series.

He calls his former girl friend grapefruit, because when he squeezed her, she hit him in the eye.

LINGERING GOLDEN AGE

She: "Which do you think are the most interesting age of a woman's life?"

He: "The first two or three years that she is twenty-one."

Leave your kodak rolls at Rodden's. In at 9 a. m., out at 5 p. m.

Turn the key! *and* your Buick *is* Double-Locked

No lock could be safer! One turn of the key locks both *ignition* and *steering wheel*. But merely turning off the ignition *does not* lock the wheel. You may shut off the engine and coast, if you like, and still have your car under perfect control.

And no lock could be more convenient! It is illuminated and located within easy reach, where the steering column meets the dash.

The Buick double-lock is an exclusive Buick feature—one of many important refinements which characterize Buick for 1928.

HOSPITALS IN INDIA SPREAD THE LIGHT

The missionary hospital in India has an unique value, says Albert E. Moore, M. D., English Baptist missionary in Palwal, North India: "The days of blasphemy, scorn and sneers are largely over, and India is awakening to the supreme beauty of Christ and all He signifies. There is a wonderful growth of the spirit of service which is manifested in the highest degree in a mission hospital. The people stand around and watch loathsome sores being dressed, pariah and Brahmin receiving equal attention; they watch minor operations being performed, and the consequent relief of pain; they hear no demand for money, and they hear the reason for it all in the evangelist's address. A striking corroboration of this aspect of medical missions is given in a letter from the chief magistrate of the district, who wrote to me: 'India is now beginning to wake up, and now is the time when clean, self-sacrificing, unselfish work like that of your mission can be of infinite value in setting a standard for the people.'"

Chimpanzees Slow to Pick Up Human Speech

A chimpanzee might be taught to talk with its fingers, as deaf people talk, more easily than it could be taught to imitate sounds of human speech, in the opinion of Dr. Robert M. Yerks and Margaret S. Child of the Institute of Psychology at Yale university. Several scientists who observed and studied higher apes have tried to teach them to say words, but without much success, these psychologists state in reporting in the Quarterly Review of Biology what is now known about anthropoid behavior. "Perhaps the chief reason for the ape's failure to develop speech is the absence of a tendency to imitate sounds," Doctor Yerkes explains. "Seeing strongly stimulates to imitation, but hearing seems to have no such effect." He believes that the sounds made by apes are not language, but are primarily emotional expressions, which are not learned by imitation.

"House of Absentees"

It would be hard to rouse much enthusiasm in England for a house of lords which has become so largely a house of absentees. Many peers so seldom show their faces in the gilded chamber that the very attendants do not know them. When the great rally of the house of lords was made in order to defeat Mr. Gladstone's second home rule bill, one member was stopped by a doorkeeper who asked him if he was really a peer. The answer was: "Do you think if I weren't I would come to this blankety blank hole?"—New York Times.

Woman's Way

The Concord (N. H.) Monitor reports an episode to be included in the history of American elections, if anyone is going to write one.

The driver of an automobile, who was chartered to take voters to the polls, called by appointment at a certain house only to be told that the mistress found herself so busy that she couldn't spare the time to go to the voting place. "But," she continued, "you bring my ballot here and I will mark it, and you can take it to the polls for me."

River Being Harnessed

The Isargo river, in Italy, is being taken from its bed near Brassanone and carried through a tunnel to within two miles of Bolzano, where it will be dropped 700 feet. The new electric station there will generate 220,000 horsepower, and its current will light the country as far south as Florence, 800 miles away. Two subsidiary stations in lateral valleys also will be constructed and the total horsepower of the district will be 315,000, or three-fifths of all the estimated hydro-electric potentialties of Scotland.

Takes Movies of Plants

The slowest motion pictures ever made are those of the United States Department of Agriculture which portray the growth of plants. This is done by the use of a "time-lapse" machine, invented by Howard Greene, that exposes only one frame of film at a time and regulates the time between such exposures. These periods usually are about 20 seconds, so that in an hour only about 180 pictures would be taken.

To Get Power From Sea

A floating factory to draw power from the sea is an idea conceived by French engineers. It is to be operated by turbine-driven generators, converting into power water driven through pipes plunged 1,000 meters into the sea. The floating plants would be hexagonal in shape and are planned so that ships may be loaded or unloaded on bridges at the edges.

To Combat Rheumatism

Rheumatism is said to cost the world as much as tuberculosis in loss of wages and labor. The malady is much more important economically than is generally believed, and an international society to combat it has been organized.

All in Good Time

Ted—Don't worry, old man, your turn will come next.—Answers.

LOCALS

W. C. Kneale, geologist for the Texas Co., has been transferred to Carlsbad and is moving his family to that place tomorrow.

Mrs. Addie Webb, who lived here some seventeen years ago, has been here the past week from Greeley, Colorado, looking after her property interests.

Minor Huffman, of Roswell, Boy Scout area executive, was a guest of the Artesia Rotary Club and made a short talk on the summer scout camp located in the Sacramentos.

Glenn Bish, who has been employed with the Ohio Oil Co., here for several months, has been transferred back to the Ohio office at Casper, Wyoming and left yesterday to assume his duties with the Casper office.

Rube Dunn, Calvin Dunn, J. S. Sharp and Dick Atteberry combined business with pleasure when they went over to El Paso Friday to see "Lindy" and transact business. At Alamogordo they were joined by Aubrey Dunn, who went on to El Paso with them.

Carlos Dunn and family arrived last Friday from Texas City, Texas, to visit their relatives, the Dunns and look for a new location. Mr. Dunn is a brother of Preston and Rube Dunn. On Tuesday Mr. and Mrs. Dunn, leaving their four children with the relatives here, went over to Alamogordo to visit another brother, Aubrey Dunn.

Little George, the garage mascot, was visiting his aunt. He found the cat in a sunny window purring cheerfully.

"Oh, Auntie, come quick," said little George, "the cat has gone to sleep and left his engine running."—Annapolis Log.

Philip: "I hate those revolving doors."

Morris: "So do I. You can't slam them when you're mad."—Princeton Tiger.

Camel

The most popular cigarette in the United States

Quality put it there—quality keeps it there.

Camel smokers are not concerned and need not be concerned with anything but the *pleasure* of smoking.

IT'S REMODELING TIME

Now is the time to do those remodeling jobs that you have put off so long.

—to replace the old rattling windows with new up-to-date sash.
—to repair the leaks that have sprung in the old roof.
—to put the concrete floor in the garage or a convenient walk in the back yard.
—to make a dozen and one other improvements which will add to the comfort, convenience, and value of your property.

Let us work with you in making these improvements. Our service department is at your disposal with plans, and reliable builders information.

Within New Buick Foundry—Most Modern in World

Lower Left: Aisle in main building showing central conveyor which brings cores from core room in distance. On either side are mold conveyors on which core and flask are assembled. These lines move toward foreground of picture, where pouring occurs.

Upper Right: Pouring engine castings. Note that workmen merely guide operations, ladles being suspended from electric hoists running on monorails above. Two big ladles, on electric overhead trucks which brought them from cupolas, may be seen in background. The pouring workmen are on a moving platform which keeps pace with the conveyor carrying the flasks. Note the conveyor entering steel hood which shields the room from the castings' blazing heat and gas after pouring.

Upper Left: The maze of cooling conveyor which "kills time" between foundry and cleaning plant, giving hot castings time to cool before they are handled. It doubles back and forth, huge castings hanging from it every few feet. With the portion inside the buildings, it is 4½ miles long.

Lower Right: Core making with modern pneumatic equipment. Core sand is delivered to the benches automatically by conveyor, and finished cores are carried to core ovens and thence to core assembly by conveyor racks at left.

Center Inset: The six big cupolas are charged mechanically, as shown here. The hoist at right hauls loaded bucket up from loading platform below, pushes it into the cupola, and dumps it.

$165,000 IS PROPOSED TO BUILD HIWAYS AND BRIDGES IN SAN JUAN CO.

FARMINGTON, N. M.—Advocates of a proposed $165,000 bond issue for building highways and bridges in San Juan county are holding conferences on the proposal with the Farmington chamber of commerce executive committee.

It is proposed to float the bond issue this fall and hold the bonds in readiness to match state and federal funds when made available.

The million dollar highway extending from Hogback, 22 miles west of here, to Shiprock and Gallup, a distance of more than 100 miles through the Navajo reservation, will be completed by the federal government before winter this year. The remainder of the road between Gallup and the Colorado line, including 18 miles of hardsurfaced road between Farmington and Aztec, is projected as a federal aid highway but at present funds are not available to complete it.

Proponents of the $165,000 bond issue would raise the money to meet the county's share in obtaining federal aid, and to rebuild bridges washed out this year. The estimated cost of the uncompleted highway between Hogback and the Colorado line is approximately $500,000, of which the federal government would pay 67½ per cent, the rest to be met equally by the state and county. The completed highway not only would bring tourists over the picturesque Indian reservation route but would give the San Juan basin a trucking outlet for its products into the rest of New Mexico, Arizona and Colorado.

PORTION NATIONAL DRY LAW INVALID

OMAHA, Neb.—That portion of the national law which permits a court to grant personal injunctions has been held unconstitutional by Federal Judge Woodrough, sitting here.

Judge Woodrough's ruling was made Monday in answer to a petition which asked a personal injunction be granted against Fred Cunningham of Scottsbluff, Nebraska. The petition charged Cunningham with five offenses against the prohibition laws, involving sale, transportation, possession and solicitation of orders for whiskey.

The personal injunction, if granted would have made it possible for a court to send Cunningham to jail for contempt if he at any time should be found selling or in the possession of liquor.

His Last Cowboy "Stunt"

William Hartsock, nine, of Lewiston, Pa., is done playing cowboy. With a lasso tied about his waist he tossed the loop over a tire carrier on an automobile driven by Robert Fisher. He was dragged a quarter of a mile through the streets before a following car could attract Fisher's attention and release the boy.

ALONG LIFE'S TRAIL

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

PERFECTION

I USED to hold to the idea, when I was younger than I am now, that men and women were either good or bad—there was no middle ground. We were a good deal addicted to the revival meeting in our community during the winter months when farm work was slack, and when some old sinner became converted and took out church membership I supposed that from that moment he had separated himself from all evil thoughts, acts, or intentions, and for the rest of his days lived a perfect life. Much as I still have faith in the efficacy of those old meetings, and their power to stimulate to the virtuous life, experience has taught me that no human being is either wholly good or wholly bad. There is no such thing as perfection.

There was an obituary notice in a country paper not long ago, of one of the local celebrities who had just passed to his reward. Among the list of virtues of which the departed had possessed it was stated that "He had been a Christian off and on for more than fifty years." There was no continuity in his profession, it seemed; sometimes he was serving the Lord and at others he devoted himself to Mammon. He wasn't perfect.

Cowley had just been caught in a raid by the police in one of the worst places in town. He admitted having been guilty of all the sins of youth excepting stealing, and this was not his first offense. He had intelligence and he was not lazy. His delinquencies amazed me.

"What do you do on Sunday?" I asked in an attempt to get at his character.

"I usually go to Sunday school, and church," he said, "and in the evening I've been attending Christian Endeavor."

He was a curious mixture of dissipation and religious fervor, and he was not illiterate or ignorant, and he seemed to be as true to form in one as in the other.

One of the worst rounders I ever knew was most faithful in his religious devotions immediately following his derelictions. If he came home jagged, he was always sure to say his prayers before going to bed.

All I am meaning to say is that experience has taught me that each of us is a mixture of good and bad—of Dr. Jekyll and Mr. Hyde—and that there is no such thing as perfection either of evil or of good.

COLD FACT

Goldstein: "Wherever in the world you go, you'll find us Jews are the leading people."

O'Sullivan: "How about Alaska?"

Goldstein: "Vell, Iceberg ain't no Presbyterian name."

Small town constable: "Say, don't you know enough to dim your lights going through town?"

Motorist: "Sure, I do. How far is it to where the town begins?"—The Wheel.

LAKE ARTHUR ITEMS
(Mrs. Ned Hedges, Reporter)

The Lake Arthur water main is being extended this week to include the Santa Fe holdings.

Guy Tonkin and Dr. Wilson, of Laredo, Texas, are visiting at the home of Dick Spence this week.

Mr. and Mrs. J. P. Shinneman and Lee Shinneman and children were visitors at the Harry Porter home in Dexter Sunday.

The prevailing damp weather has put a quietus to cotton picking for a few days and of course the gin has necessarily been shut down.

Roy Moots has been transferred to Carlsbad and while his furniture is being shipped, he with his wife and baby are visiting his mother here.

Roberta Bailey, who is an infantile paralysis sufferer, is reported improving and as far as can be determined now, will be left with no ill effects.

Brit Pearson and family moved here from Tulia, Texas last week, and at present are occupying the Frank Johnson house in the north part of town.

Oscar Moore and wife moved here from Texas this week and are occupying the M. W. Evans property. Oscar has taken charge of the Just-rite filling station.

Mrs. Moss Spence moved her furniture into town this week and will live this winter with her mother. Price Spence, an uncle, and family, have moved out and will take care of the crop.

Mrs. M. S. Brown left last week for Dallas upon receipt of a telegram stating that Miss Margaret, who had just recently gone to Dallas to enter college, was suffering from an acute attack of appendicitis and would probably be obliged to undergo an operation.

The Lake Arthur-Cottonwood sample booth will be open for inspection Saturday in Shinneman's store. Everyone urged to bring their exhibits early as it is probably well known to the readers the best of the exhibits in this booth are to be taken to Roswell to be placed in the Lake Arthur-Cottonwood booth during the Cotton Carnival.

D. A. Goode, accompanied by his sister and cousin, who were visiting in the Goode home last week and Mrs. Goode's sister, Miss Opal Ridgway, were visitors at the Carlsbad Caverns last Friday. Mrs. Howard, Mr. Goode's sister, stopped in Carlsbad in order to catch the train to her home in Dallas. Miss Goode left Saturday for Lubbock, where she will visit a while before going on to her home in Brownwood, Texas.

The Home Economics class, accompanied by their teacher, Miss Stewart, were visitors in Portales Monday. Among the places of interest the class visited were the Home Economic class at the high school, the cannery, and the sweet potato kiln. Mrs. Lee Shinneman, who is also a member of the class, took the crowd in her car. The girls going were: Louise Harber, Zeena Shinneman, Jerline Flowers, Zenobia Whinnery and Bonnie Bell Bradley.

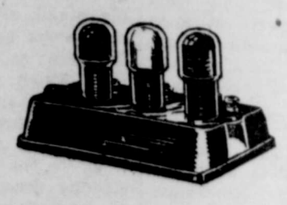

If you are not already a subscriber to The Advocate write or telephone us this week. Get on the list and receive the "Newsy" newspaper regularly.

FOUR TOWNS HAVE NAMES ON ROOFS

SANTA FE, N. M.—Four municipalities now have their names painted on roofs for guidance of aviators, Gov. R. C. Dillon has been advised in response to his request that this be done.

They are Santa F Fort Sumner and C preparing to have si mediately are Raton, gordo and Portales.

Sam, a Neighbor of His

Last summer at a West side daily vacation Bible school, the pastor told the children the story of Samuel and his mother. The next day, in reviewing the story, he asked a small boy who Samuel's mother was. Bob scratched his head for a moment, looked puzzled, then answered:

"Well, they used to live next door to us, but I can't think at all what Sam's mother's name was!"—Indianapolis News.

JUDGE KIKER HOLDS THAT HANNETT'S SUSPENSION IS VOID

SANTA FE.—An order holding the state bar commissioners' suspension of former Governor A. T. Hannett from the practice of law for one year is void will be issued Tuesday by District Judge H. A. Kiker, he indicated here Monday afternoon.

Hannett was suspended by the board after he had made criticisms of District Judge Reed Holloman in his column in the Albuquerque Journal. Hannett then contested suspension in district court, contending the law under which the bar commission operates is unconstitutional.

Judge Kiker indicated he will hold only the supreme court can suspend an attorney and may rule also Tuesday on whether the bar board has the authority to hold hearings. If he does not rule on the right of the board to hold hearings, the board may submit the proceedings of the Hannett case to the supreme court for its action, attorneys said.

Will Seek to Revive Father-to-Son Letters

Letter writing by fathers to sons who are away from home, especially during school days, is becoming a lost art, the revival of which will be urged during the coming year by a group of educational and religious organizations.

Although closer companionship between father and son is constantly being emphasized, it is asserted that there are few parents in these modern times whose correspondence gives the continuous counsel concerning homely virtues that was customary in the last century and is contained in the collected works of many great men of the country.

A model father-to-son letter has just been discovered by the Women's Home Companion in some unpublished letters of Robert E. Lee. It was written 75 years ago, and says:

"You must study to be frank with the world; frankness is the child of honesty and courage. Say what you mean to do on every occasion and take it for granted you mean to do what is right.

"Nearly a century ago there came 'the dark day' when the sun was slowly extinguished as an eclipse. Members of the legislature of Connecticut in session shared the general awe and terror, believing the Day of Judgment had come. Someone, in the consternation of the hour moved for adjournment but an old Puritan leader, Davenport Stanford, declared that if the last day had come he wanted to be found at his place of duty. He moved that candles be brought so that the house could proceed.

"There was quietness in that man's mind—the quietness of heavenly wisdom—an inflexible willingness to obey present duty. Duty, then, is the sublimest word in our language. Do your duty in all things like the old Puritan. You cannot do more. You should never wish to do less."

Marries, Recovers Memory

Just after his marriage to an English girl recently, Gabriel Henri Remon, a Frenchman, learned, after many years, his identity, lost as a result of the World war. Twelve years ago, Gabriel, then thirteen, ran in terror when the German troops rode into Merlincourt, his home village. He tramped to Calais, and was put on a ship for England. The vessel was blown up by a mine, and he was wounded and rescued. He landed at Folkestone, where he lost his memory, worked for $1.25 a week, was "adopted" by a milkman, and now has a position with a wine firm in London. When he married it was necessary to communicate with the French consul, who learned sufficient details of his life to bring back the man's memory completely.

Say It With Stories

"If you want a child to remember anything, say it with stories," suggests Dr. John L. Elliott of the Ethical Culture school of New York city, in Children, the Magazine for Parents. In an article in the magazine Doctor Elliott writes: "Notice the next time you are in an audience. When is it that every one is still, when for a moment the speaker has his hearers, when there is a real though unconscious unity? Nine times out of ten it will be when he is telling a story, reciting some incident. Why do older people rush to the theaters and the oldest and youngest to movies? Simply to see or hear a story. If you regret that the movies have such a strong hold on your child, give him something of the same thing at home."

Violet Ray Windows

School room windows equipped with a new kind of glass which transmits ultra violet rays are producing "taller and fatter" English school boys, according to the London correspondent of the Journal of the American Institute of Architects.

"If the education committee of Smothwick, in Staffordshire, is correct in its assumptions, the physical welfare of England's youth is henceforth guaranteed," he declares.

Loose-leaf binders, special ruling and stock forms—Advocate.

In Wake of 'Twister'

Bruce Johnson, of Texhoma, Okla., had just driven into his garage when a terrific Oklahoma windstorm pitched the ten-inch concrete sidewall upon the car, with Johnson seated inside it. Thanks to sturdy Chevrolet construction, Johnson escaped without injury and the car came through with no damage other than dented fenders and body marks. The block resting upon the rear of the body weighed one ton. A derrick was required to release the car.

LOCALS

Roy Hurd and wife were in town from Carlsbad yesterday. The Hurds are former residents of Atresia.

Carl Wills, of Rankin, Texas, is spending a two weeks vacation here with his cousin, E. H. Perry, and family.

E. H. Perry and family and Ed Phillips and family were dinner guests of Mr. and Mrs. Pat Moyer in the field Sunday.

Mrs. R. D. Compton and children, Louise and Kenneth, motored to Roswell Monday for a short visit with William and Stewart Compton, who are students at the Military Institute.

The Library Board is planning to keep the library comfortable this winter by putting on a new roof and installing a new stove. They will need your help, you can begin by patronizing their cooked food sale Saturday.

Mrs. I. D. Brown is here from Coleman, Texas, visiting her daughter, Mrs. J. D. McCann, and Mr. McCann. Mrs. Brown's son and his wife, Mr. and Mrs. Russell Brown, who accompanied her here, have returned home.

Mrs. G. M. Winans will leave Sunday to attend the 28th Biennial Supreme Convention of the P. E. O. Sisterhood, which will be held in Oklahoma City, October 4, 5, 6, and 7. Mrs. Winans, who is president, goes as a delegate from the local organization, Chapter J, New Mexico. She expects to visit relatives at various points in Oklahoma before her return.

Heroic Sleeping

Sir Norman Rae said:

"I like everything American except your sleeping porch. The American winter climate is a very cold one and to sleep out in the open with the thermometer at zero is a dangerous thing to do.

"'And you mean to say that you sleep on this sleeping porch all winter long?' I said to a frail-looking lady in a western city.

"'Yes, all winter long,' said she.

"'Isn't it frightfully cold?'

"'Cold?' said the lady with a shiver. 'Indeed it is cold. Why, when Doctor Gore took out my appendix last winter it was chapped.'"

Huge Electric Furnaces

Electric furnaces which are great tubes sunk in the ground are used to heat ship's guns in order to expand them to take new barrel linings. In the giant 16-inch guns these linings have to be replaced after each 100 discharges of shells using explosives of war strength. They will endure about 300 shots in peace-time target practice such as was engaged in by the Atlantic fleet off Guantanamo bay, in the Caribbean sea last spring. The guns are lowered into and withdrawn from the furnaces by electric cranes capable of lifting 380 tons.

A woman likes to be praised for qualities she knows she has, even if you exaggerate.

It is the people who have to do the fighting who want their rulers to be cautious about ultimatums.

"My Daughter Never Does Things Like That"

You've heard it. You've probably said it. And still you wonder. For she is away from home a great deal—going to parties, to theatres, maybe (you shudder) even to that awful "club" you've heard about. And she gets home so late!

How much nicer it would be if she would bring friends home occasionally for a pleasant time in-doors! How happy you would be to help her entertain them! Just see her eyes brighten when you show her the newer suites displayed here! Hear the plans she'll make for having her friends call when new furniture brightens her home! And see, too, for your own satisfaction, how very little it costs!

LEGAL ADVERTISEMENTS

NOTICE

In the Probate Court of Eddy County, State of New Mexico.

IN THE MATTER OF THE ESTATE OF FRANK M. ROBINSON, Deceased.

Notice is hereby given that the undersigned, was on the 8th day of September, 1927, appointed administratrix of the estate of Frank M. Robinson, deceased, by Hon. D. G. Grantham, Probate Judge of Eddy county, New Mexico.

Therefore all persons having claims against said estate are hereby notified to file same with the County Clerk of Eddy county, New Mexico, within one year from the date of said appointment as provided by law, or the same will be barred.

ANNA MAE ROBINSON,
39-4t Administratrix.

PROCLAMATION AND NOTICE OF SPECIAL ELECTION TO APPROVE OR REJECT THE PROPOSED GAS FRANCHISE OF THE TOWN OF ARTESIA.

Whereas, at a meeting of the Board of Trustees of the Town of Artesia, New Mexico held on the 20th day of September, 1927, a resolution was duly passed and adopted providing for a special election to adopt or reject a gas franchise and the contents of which resolution is as follows:

"RESOLUTION APPOINTING BOARD OF REGISTRATION, DESIGNATING PLACE OF REGISTRATION, APPOINTING JUDGES AND CLERKS OF ELECTION AND AUTHORIZING AND DIRECTING ELECTION PROCLAMATION AND PUBLICATION OF PROPOSED GAS FRANCHISE.

"BE IT RESOLVED BY THE BOARD OF TRUSTEES OF THE TOWN OF ARTESIA, NEW MEXICO:

"Section 1. That whereas application for a franchise to furnish gas to the Town of Artesia and the inhabitants thereof according to the terms and conditions of the proposed franchise hereinafter set out has been made by V. S. Welch and whereas prior to the granting of the said franchise by the Board of Trustees of the Town of Artesia the said franchise should be submitted to the voters of the Town of Artesia at an election called specially for this purpose, there is hereby appointed, J. T. Collins, S. E. Ferree, and Carl Cunningham to constitute the Board of Registration for the said election; and the place at which qualified voters of said Town may register shall be the office of Gilbert and Collins on Roselawn Avenue. The registration books shall be open to registration of voters at 9:00 A. M. o'clock on the 21st day of September, 1927, and will be closed at 6:00 o'clock P. M. on the 1st day of October, 1927, and a certified list of the voters registered will be posted for a period of six days thereafter outside the door of the building wherein the registration books are kept, during which time any person noticing that his name is not registered may apply to have the same placed upon the books and added to said list.

"Section 2. That there is hereby appointed as judges of said special election, E. B. Bullock, Thomas S. Cox, and Fred Spencer.

"Section 3. That there is hereby appointed as clerks of the said special election, Richard Attebery and Merrill Sharp. That the time of holding the said election shall be on Friday, the 14th day of October, 1927, and the voting place shall be at the office of the Town Marshal in the Shuster building.

"Section 4. That the Mayor and Town Clerk are hereby authorized and instructed to give notice of the foregoing special election, the appointment of the Board of Registration, the judges and clerks of election and notice of the terms and conditions of the proposed franchise to be voted upon, copy of which is attached hereto, the said notices to be published in the next three issues of the Artesia Advocate, a paper published weekly in the Town of Artesia.

"This resolution shall be in full force and effect from and after the date of its passage. Passed and approved this 20th day of September, 1927.

"Signed:

"C. E. MANN,
"Mayor.

"Attest:
"EDWARD STONE,
"Town Clerk."

Notice is hereby given of the election called for October the 14th, 1927, and of the contents of the foregoing resolution.

The terms and conditions of the proposed gas franchise are as follows:

ORDINANCE NO———

"AN ORDINANCE GRANTING TO V. S. WELCH, HIS HEIRS AND ASSIGNS, OF ARTESIA, NEW MEXICO, A FRANCHISE FOR THE CONSTRUCTION AND OPERATION OF A GAS DISTRIBUTING PLANT OR SYSTEM IN THE TOWN OF ARTESIA IN THE COUNTY OF EDDY FOR A TERM OF TWENTY-FIVE YEARS, AND FIXING RATES AND CHARGES FOR NATURAL GAS SERVICE AND COLLECTION THEREFOR, AND THE USE OF THE STREETS, ALLEYS AND PUBLIC GROUNDS OF SAID TOWN FOR THE PURPOSE OF LAYING GAS MAINS AND LATERALS IN AND UNDER SAME FOR DISTRIBUTING GAS TO THE VARIOUS CUSTOMERS AND INHABITANTS OF SAID TOWN.

BE IT ORDAINED: BY THE BOARD OF TRUSTESS OF THE TOWN OF ARTESIA:

1.

THAT V. S. WELCH OF ARTESIA, NEW MEXICO, his heirs and assigns are hereby granted and given the right, privilege and franchise in the town of Artesia, New Mexico, and over the streets and alleys thereof, to transmit, transport and distribute, erect and maintain such system as he may deem necessary for the purpose of transmitting, transporting and distributing natural or artificial gas to the inhabitants of the said Town of Artesia, New Mexico and for the purpose may acquire, own, construct, reconstruct, maintain, use and operate in, over, under and across the present and future streets, highways, alleys, bridges and public ways of the said Town of Artesia, New Mexico, pipes, pipe lines or any other system for the purpose of transmitting, transporting and distributing gas to the said citizens and erecting and maintaining suitable system therefor, with all the necessary and desirable appurtenances, including regulating stations, vent pipes thereto, gate valves, gauges, stop boxes, manholes, mains, low, intermediate and high pressure mains, pipes, feeders, service pipes and conduit and service pipe extension and such other things as may be necessary for use in operating said system for the purpose of transmitting, transporting, conducting, conveying and delivering gas into, within, through and out of the Town of Artesia, New Mexico, and of supplying such gas to the Town of Artesia, New Mexico, and the inhabitants thereof and to corporations, industries, and manufacturies therein for light, heat, power and other purposes, (including any purpose for which gas is now or may hereafter be used) it being expressly understood that all and singular the rights, privileges and franchises herein granted and conferred upon V. S. Welch of Artesia, New Mexico are so granted and conferred not merely with reference to natural gas, but also with reference to the manufacture of both natural gas and manufactured gas, as per terms hereinafter set forth.

2.

THAT the said Grantee in laying, maintaining and inspecting its pipes and mains, and installing its system for transmission, transportation, conveying and delivering gas to the various consumers of the said town shall so construct, repair and maintain said system and lay said pipe lines and mains so as to interefere with the use of the said streets and alleys of the said town as little as can reasonably be done; and when said pipe lines, mains and system have been installed, altered, repaired, or inspected, said streets and highways shall be placed in as good condition as before the said highways were disturbed by laying of the said mains and pipes and installing said system, transmitting, transporting, distributing and conveying gas as hereinbefore provided and that said Grantee shall interfere with the use of said streets and alleys of said town as little as possible in constructing and maintaining systems, vent pipes therefor, gate valves, gauges, stop boxes, man-holes, low, intermediate and high pressure mains, pipes, feeders, service pipes, conduits and service pipe extension.

3.

Upon request of any person, joint stock association, partnership or corporation, owning or occupying property in said Town on which is situated a building in which said person, joint stock association, partnership or corporation contracts with grantee to use gas, the lines on whose premises shall be along the route of any low pressure main of said grantee and abutt on the street, alley, or public road so occupied by said low pressure main, the grantee shall at its own cost and expense construct a service pipe of proper size and capacity from such main to the curb line of said premises nearest to that main to furnish such person, joint stock association, partnership or corporation connection with such low pressure mains of said grantee, provided said curb line shall not exceed a distance of one hundred (100) feet from such low pressure line. Said grantee may be required in any instance to extend then existing low pressure mains a distance of not more than two hundred (200) feet to supply any person, joint stock association, partnership or corporation with gas, such extension to be at the expense of said grantee and in no instance shall it be required at its expense to extend any such main a greater distance than two hundred (200) feet for each customer, contracting to use gas aforesaid. In those cases wherein said grantee is required hereunder to extend its low pressure mains not exceeding said two hundred (200) feet aforesaid, provided that said grantee shall never be required to connect or allow any connection for any service pipe with any intermediate or high pressure mains and further providing that said grantee shall not be required to run any service pipe from any main to any curb except at right angles to such curb and main, the grantee shall never be required at its expense to lay or construct any service pipe extension beyond the curb lines of any streets or alleys. THE ENTIRE EXPENSE FOR labor and material for such service pipe extension beyond the curb line of any street shall be borne solely by the person, joint stock association, partnership or corporation or industry or manufacturing concern or any other customer desiring same. However, the said grantee at its option and without obligation hereunder may construct said service pipe extension from the curb lines to the point desired by such consumer with necessary connection to the meter provided such consumer shall first deposit with said grantee the reasonable estimated cost of the labor and material required in constructing such service pipe extension beyond the said curb line and out of such sum so deposited, said grantee shall first pay all cost of all labor and material used in the construction of said service pipe extension beyond the curb line, together with a reasonable sum for the overseeing such construction and the remainder of such sum, if any, shall be by it promptly returned to such consumer depositing the same. The said grantee shall not be required to furnish gas to any person, joint stock association, partnership or corporation, industry or factory unless and until such person, joint stock association, partnership, corporation, industry or factory shall have properly piped the premises in which gas is desired as required by said Town as certificate thereof furnished to said grantee showing that the said premises have been properly equipped and properly piped and appliances have been installed therein for the reception of gas therein and thereon before the said grantee shall be required to furnish gas to such proposed customer.

4.

The said grantee shall never be required to furnish or continue to supply gas to any customer when the designated official or inspector of said Town shall have reported to it the piping, appliance, fixtures or any part thereof on such consumer's premises as being improper, unsuitable or unfit for gas to be supplied to or through the same to such customer, and in such event said grantee upon notice from such officials shall cease to supply gas to such customer without notice, until such pipe, appliance or fixture on such premises shall have been properly repaired and approved by such official inspector and certificate issued by him and furnished to the said grantee showing the proper repairs of said pipe, appliance and fixtures. The grantee shall at all times furnish gas for light, heat and power service to said Town and inhabitants thereof, and persons, joint stock association, partnership and corporations therein requesting same, in sufficient quantities to meet all reasoable demands and so far as commercially practicable without undue interruptions or fluctuations, provided, however, that said grantee shall not be liable for interruptions or fluctuations in service caused by acts of God, the public enemy, strikes, riots, bursts of mains, dimunition or failure of supply of natural gas or other unavoidable contingencies which could not ordinarily have been forseen and prevented or remedied by said grantee.

5.

Gas meters shall be read at least once a month and said grantee shall render monthly to its customers bills for gas so furnished and services rendered during the period between such meter readings. Said grantee shall have the right to discontinue service to any customer who shall fail to pay any bill for gas and services rendered within ten days after issuance of bill therefor, which shall be sufficient notice when the bill aforesaid has been placed in the United States mail, addressed to the subscriber to the place where said gas has been used, and in case said bill is not paid within the said ten days and said grantee disconnects its lines and discontinues its services to said customer, then said grantee shall have the right to charge for reconnection of its lines and for re-establishing its services to such consumer the sum of One ($1.00) Dollar for such reconnection, and for each reconnection so made as herein provided, which charge for such reconnection shall be paid in advance, and said grantee shall also have the right to discontinue the services of gas to any customer who shall use gas of grantee not contracted for with said grantee.

6.

Meters shall be furnished by grantee as hereinafter provided. The said grantee shall have access to customers' premises at all reasonable hours to install, inspect, test or read a meter, and to repair, remove or replace the same or any property of said grantee situated on the customer's premises. Customers shall permit no one other than an agent, official or employee of said grantee to install, change, remove, connect or disconnect the meter or other properties of said Grantee. The grantee shall never be required to furnish gas or services to any customer who is in default in the payment for gas or services furnished by said grantee either at the same premises or elsewhere until the arrears have been fully paid and settled for.

7.

The grantee shall furnish gas to the said Town and the inhabitants thereof, as herein provided at the rate of ONE DOLLAR ($1.00) per thousand cubic feet, same to be paid monthly as bills are furnished as hereinabove set forth to its customers, and in case such bill is paid on or before ten days after issuance, the same shall be discounted at the rate of ten per cent (10%) per thousand cubic feet. Said bills shall be payable at the office of the grantee in Artesia. Said grantee shall furnish gas to industries or factories within the said Town at such rate as may be agreed upon from time to time by them and such customer, subject, however, to the laws of the State of New Mexico in such cases provided.

8.

Each customer shall deposit with the said grantee in advance and before it makes connections with the premises of such customer for each meter furnished to such customer the sum of $10.00 upon which said grantee shall pay such customer interest at the rate of six per cent per annum where such deposit is left with said grantee for a period of at least six months and in addition to the charge of ONE DOLLAR ($1.00) per thousand cubic feet as hereinabove provided, it being agreed, however, customer shall be entitled to a return of the deposit upon termination of his contract with grantee, grantee being privileged to with-hold from consumer the amount of any unpaid debt of consumer to it.

9.

The minimum charge for each customer for gas and meter per month shall be Two Dollars ($2.00).

10.

The said grantee shall have the right to excavate along, across or under any of the streets or alleys or bridges in said Town for the purpose of laying its pipes and mains and installing its system to furnish gas to said Town and the inhabitants thereof, and to lay its pipe lines, mains and install its system across, under and on such streets and alleys of said Town, provided however, grantee shall deliver to the Town of Artesia at the office of the Town Clerk a blue-print or map prior to the laying of any mains, gas lines, or the commencement of any other plan of construction contemplated within the corporate limits of the Town of Artesia, showing the exact location of the said mains, lines or other structure and before the said works shall be commenced the said plan of construction shall be approved by the proper officer designated by the town of Artesia.

11.

Grantee in accepting this Franchise subject to conditions express and implied and promises express and implied agrees to begin construction of its pipe line and mains into said Town within ONE HUNDRED EIGHTY days from the passage hereof, and agrees to have its line and mains into said Town by one year after passage hereof and agrees to continue the laying of its lines, mains and laterals for the purpose of furnishing gas to said Town and the inhabitants thereof with reasonable dispatch after its lines and mains have been constructed in said Town. In event that those things enumerated in this paragraph, by the Grantee to be performed, be not done within the time limit provided for herein or if the Grantee herein fail to furnish and maintain a reasonably adequate supply of gas, or to render reasonably satisfactory service, nothing in the foregoing Franchise to the contrary, the Town of Artesia may after having given written notice to the Grantee of its complaint declare forfeiture of this Franchise after six months from the day of the giving of the said notice, provided the cause of the said complaint for forfeiture shall not have been corrected.

12.

Rights and Franchises herein and hereby granted shall continue for a period of TWENTY-FIVE years from the date of the granting hereof."

By order of the Board of Directors of the Town of Artesia this 20th day of September, 1927.

C. E. MANN,
Mayor.

Attest:
EDWARD STONE,
Town Clerk.

COTTONWOOD ITEMS

(Mrs. M. K. Funk, Reporter.)

Ed Crow has returned from a week's visit to points in Texas.

Mr. and Mrs. Jess Funk went to Roswell Tuesday to attend to business matters.

James McMartin left for his home in Clovis Monday after a visit to Mr. and Mrs. Cotton.

Miss Annie Parker has returned from Roswell, where she spent a few days visiting friends.

Mr. and Mrs. Malone and family left for El Paso last week, where they will spend a few days.

Mrs. Anna Goode returned home with her sister, Miss Ruby Lee Hall, of Ft. Worth, Texas this week.

Mr. and Mrs. Poke, of Austin, Texas, left for home Sunday to arrange their affairs to move here soon.

Mr. and Mrs. J. C. Nelson and daughters, Misses Lena and Irene, of Lincoln, Nebraska, left for their home last week.

Houston Felton is running quite a crew picking and packing apples this week. He is selling his apples to Messrs. Gable and West.

T. J. Alexander, of Abilene, Texas, owner of the farm where W. W. Parker and family reside, arrived here to attend to business matters this week.

Mrs. Dub Andrews, of Hagerman and her guests, Misses Harvey and Chisenhow, of Ft. Worth, Texas, were visiting Mrs. Glenn O'Bannon last week.

Buster Knowles returned Saturday from a visit with his sister, Mrs. Archie McDonald at Lakewood. He plans to enter school in the New Mexico school for the Blind at Alamogordo.

600 POUNDS ALFALFA SEED PER ACRE

Mr. Roy Van Arsdol is probably the champion alfalfa seed producer of the Middle Valley this year, having threshed over seven thousand pounds of seed off of twelve acres.

We understand that Mr. Van Arsdol sold his seed crop for 9½ cents, which is a very low price compared to the average price for recent years, but the heavy yield partially made up for the low price—at least that is the way Mr. Van Arsdol looks at it.—Hagerman Messenger.

SPEAKING OF HOLIDAYS

Head of the House (to colored maid): Chloe, yesterday you told me that your matrimonial life was very unhappy. I've been thinking about that.

Chloe: Yes, ma'am?

H. of H.: What was the trouble? A case of December wedded to May.

Chloe:- Good Lawd, no, honey! It was Labor Day wedded to de Day of Rest!

A. C. Kimbrough drove over to Lovington Sunday with Mrs. Kimbrough, who, on Monday, accompanied her mother, Mrs. Russell, to the hospital at Temple, Texas, for treatment for goitre.

Miss Peggy Mitchell, who has beeen connected with the Sweet Shop Music Department, since its inception some months ago, has accepted a position with the Ginsberg Music Co., of Roswell and plans to leave tomorrow to assume her new duties.

Mr. and Mrs. J. S. Mobley and little daughter, of Alamogordo, spent the week-end here, visiting Mrs. Mobley's son, A. A. Malphures, who is working as a relief manager at the local office of the Western Union, in the absence of Manager T. W. House who is on a two weeks vacation in El Paso.

J. M. Gil, publisher-printer and N. F. Lucero, manager Gas Co., both of C. Juarez, Mexico, were visitors in Artesia the first of the week and while here paid the Advocate a pleasant call. Mr. Lucero is interested in the natural gas possibilities of this section and spent Monday inspecting the gas wells in the field.

REDUCTION OF FREIGHT RATES ALMOST ASSURED FOR N. MEX. AND ARIZ.

SANTA FE.—Substantial freight rate reductions on interstate shipments in less than carload lots into New Mexico and Arizona are practically assured, Charles Lamb, clerk of the State Corporation Commission, said Thursday.

At a hearing held by the Interstate Commerce Commission in Phoenix, April 11, 1927, the New Mexico and Arizona Corporation Commissions and others asked that these rates be placed on a level with those affecting Texas differential territory. Examiner Alfred A. Haggarty of the Interstate Commerce Commission has submitted a proposed report ordering reductions asked and these reports usually are adopted, Lamb said, although it may be 60 days or more before the reductions will become effective.

MORE INFANTILE PARALYSIS

(State Health Department)

As the infantile paralysis outbreak subsided in this state, we essayed the treacherous role of prophet, saying that we appeared to be "through with this malady for the present." As if to mock our temerity, the disease flared up again, last week. Eleven new cases, with one death, were reported. This week eight additional cases have been discovered. Yet we continue to regard this as only temporary, for the usual history of these epidemics is that they rise to a peak in July or August and decline by the middle of September.

An erroneous impression has arisen that 300 or 400 cases were reported to us and that about 115 still exist in the state. This is not true. So far, since June 26, a total of 123 cases has been reported. From this and from our inquiry in the field, we estimate that there were probably between 300 and 400 cases all told, the most of them non-paralytic and never recognized nor reported. Not more than twenty cases are now in isolation as still active.

"In this world, where rushing and bustling is the order," says a Texas exchange, "about the only quiet place we have been able to find is in the store of the merchant, who does not advertise."

OIL FOUND IN HAMMOND WELL
(Continued from first page)

tion Co., sec. 22-26-37, in the extreme southeastern portion of the state will succeed. They have had the tools near the top of the hole several times, only to have them slip back or the fishing tools fail to hold. Another important test, in Chaves county, the McQuigg Bros. Nies No. 1, center NW NW sec. 7-5-29, in the Olive basin is rigging. Lea county also has an important test rigging, the Midwest Oil and Refining Co., No. 1, sec. 9-19-38.

The Empire Gas and Fuel Co., it is understood have made another location on their Henry Russell permit, sec. 35-17-27, but the exact drilling site has not been announced.

Reports this morning from the Jackson No. 1 of the Texas Production Co., sec. 4-20-34, state that the hole is full of water, which is coming in from a water sand found at 3745 feet.

HOME BREW IS HARD LIQUOR

WASHINGTON.—Home brew is liquor, as far as federal prohibition officials are concerned.

Prohibition Commissioner J. M. Doran said home made beer falls in the same category as gin, whiskey, rum, bourbon and other hard drinks and that it's manufacture is illegal. Rules relating to intoxicating beverages govern it, Dr. Doran explained to the Press.

In the opinion of dry authorities there is no private brew made within the legal one-half of one per cent alcohol requirement.

Manufacture of home brew is illegal without permit and the government will not issue permits.

Dr. Doran said all production is under government supervision—except home brewing—and the federal forces could not concentrate on the small manufacturers.

TO PLAY ALBUQUERQUE

Coach Priest at the Artesia high school announced this morning that a football game between the Artesia Bulldogs and the Albuquerque high school had been arranged for on October 15th to be played at Albuquerque.

WHAT YOU SHOULD KNOW

The development of processes for low temperature distillation of coal, involving the recovery of various by-products and the preparation of a different type of fuel from various grades of coal, is receiving increased attention.

The consumption of rayon formely known as artificial silk, now surpasses that of natural silk. It is the only man-made textile. The output last year was close to 62,000,000 pounds.

There is an increasing use for coated textiles which are sometimes known as Fabrikoid or leather substitute. It has been calculated that it would require an acreage in grazing land equal to all the states west of the Mississippi river to support the herds necessary to furnish hides equal to the world's consumption of leather substitutes.

Amateur movie rule number one is: Always hold the camera absolutely steady while taking a scene.

Then suggestions are: Keep the camera in operation for not less than eight or ten seconds on any subject.

When making a scenic panorama where there is no moving object to be followed, the camera should be moved very slowly and evenly.

When panoraming to secure a picture of a moving subject such as a running horse or a speeding motor boat, the motion of the camera depends upon the rapidity with which the subject moves. The subject must not be close to the camera. The moving subject should be kept as nearly in the center of the finder as possible.

The most effective pictures are those in which not more than one-third of the picture area consists of sky, sea or very light foreground.

When making a distant view the best effects are obtained by having some nearby object in the foreground.

Keep the lens clean. A soft linen or cotton cloth, free from lint, wrapped around the end of a match, may be use for this purpose. At the seashore or on ocean voyages the lens requires frequent cleaning.

The amateur moving-picture camera is more fun, more useful and a greater boon to those who love to take pictures than the kodak—and that is "a thing of joy forever."

PIECE GOODS

We are showing a variety of new fall colors in piece goods. Materials in silks, satin backed crepe, pebble crepes, flat crepes and charmuse.

NEW WOOLENS

We are also showing the latest in new wools, flannels, jerseys, tweeds, etc.

It's a pleasure to show you whether you purchase or not.

Child Training That Has Harmful Effects

Too much or too little affection of parents is equally harmful and both spoil character. The training that produces docile obedience spoils the child's native aggressiveness and leaves him to be easily beaten in the later competitions of life by minds superior only in their inner preparation. The authority of a parent is a responsibility rather than a privilege.

Another risk assumed by parents, which is not so commonly understood, is that of hurting their children by affection. With human beings the love attitude may persist in such a way that the child never actually matures and comes to have a fully developed self-life, or indulgence heaped upon the child by the parent may spoil the zest of life and keep the child emotionally infantile. He may become fixed upon the parent so that he is essentially parasitic in his inner emotional cravings and cannot maintain normal relationships in business, social contacts or later family life if he ever attempts to establish a home of his own.—From "Social Problems of the Family" by Prof. Ernest R. Graves.

Famous Brigade That Served "Lost Cause"

Two reasons are given for the naming of the Orphan brigade of the Confederate army. Kentucky tried to be neutral when the Civil war broke out, but neutrality was violated and many Kentuckians decided to fight for the South. The famous Camp Boone was formed near the Kentucky line, a few miles north of Clarksville, Tenn. Fifty companies from 84 counties in Kentucky enlisted. These composed the larger part of the First Kentucky, better known as the Orphan brigade.

One of the reasons why this command was called the Orphan brigade was because so many commanders were lost, either by reason of promotion or by death on the battlefield, says a contributor to the Pathfinder Magazine. Another is that the members were away from Kentucky during nearly all the time of their service and so cut off from communication with friends or family.

Meal Time in China

The Chinese consider the stomach the source of intellectual life, and therefore the fattest man goes for the wisest one. They affect to believe that foreigners come to China to eat because they have not enough to eat at home. It is considered a mark of refined politeness to treat a guest or a visitor to a meal at any time of the day. For the most part only those who have families take their meals at home; the rest eat at hotels. They usually have two substantial meals a day—one an hour after getting up in the morning, the other between three and four o'clock in the afternoon. The well-to-do class take three or four meals a day. Often the father alone eats meat, while the rest of the family have to be satisfied with rice.

Feeling Like a Lord

I have a cottage in Colebrook row, Islington. A cottage, for it is detach'd; a white house, with six good rooms; the New river (rather elderly by this time) runs (if a moderate walking pace can be so termed) close to the foot of the house; and behind is a spacious garden, with vines (I assure you), pears, strawberries, parsnips, leeks, carrots, cabbages, to delight the heart of old Alcinous. You enter without passage into a cheerful dining room, all studded over and rough with old books, and above is a lightsome drawing room, three windows, full of choice prints. I feel like a great lord, never having had a house before.—From "Letters to Barton, 1823," by Charles Lamb.

Wonderful Alpha Rays

The Alpha rays from radioactive matter, it appears, consist of veritable atoms of matter projected at a speed averaging 6,000 miles a second. It is the great energy of motion of these swiftly expelled masses that gives rise to the heating effect of radium. Yet they do not go far. The swiftest alpha particle travels seven centimeters in air, under ordinary conditions, before it is stopped. But on its way it plunges straight through every molecule in its path, producing positively and negatively charged ions in the process. On an average, an alpha particle, before its career of violence is stopped, breaks up about 100,000 molecules.—Washington Star.

His Own Religion

I often wonder at religious men. they have such varying ideas on the subject. I was talking lately with a prominent man—one whose name is really a household word—and he said: "I was brought up in a religious family. I have chosen to accept religion in my own way, but never bother others with it. I have no desire to convert the world. I wouldn't give a d—n to convert anybody tomorrow."—E. W. Howe's Monthly.

Wren's Sweet Song

While Jenny Wren is incubating, her mate perches nearby, untiringly warbling his sweet song, says the Nature Magazine. After the young are hatched there is little rest for either of them. Caterpillars, beetles, bugs and spiders must be supplied in astonishing numbers all the time, until the youthful wrens are ready to help in the hunt.

NO INJURIES IN AUTO COLLISION ON MAIN STREET FRIDAY P. M.

Friday wasn't the 13th, but it proved unlucky for a couple of motorists, when two cars collided Friday evening in front of Grover Kinder's dwelling on West Main street. Two Oklahoma tourists were driving out of town and were without lights except a small lantern on the order of a flash light, which one man claims he was holding in front of the car. Thermon Davidson, who was driving a Buick into town, had his attention called to the side of the car just as he neared the Ford driven by the Oklahoma tourists. As he looked up, it was too late for him to dodge the oncoming Ford and a collision resulted.

The impact of the colliding cars took the left front tire from the Buick and fearing that a sudden swerve of the steering wheel might prove diasterous, Mr. Davidson permitted his car to come to a stop in Mr. Kinder's front yard.

Both cars were wrecked, the tires of the Ford appeared to have fared about as bad as any part of the car.

LEA COUNTY LEASE SALES ARE ACTIVE

The sale of acreage and leases in Lea county, were very active following the gas strike of the Texas Rhodes well in the southeastern part of the state, according to a recent announcement from the state land office. The transfers and sales have been slowing down somewhat during the last few days, but the southeast area appears to retain favor with many of the buyers and operators, who are hopeful that the Rhodes well will prove a connecting link with the New Mexico and Winkler county, Texas fields.

MOTOR ACCIDENTS DUE TO CARELESSNESS, SAYS NATIONAL SAFETY MEN

CHICAGO.—Violent deaths are so prevalent among chilren that a boy between 5 and 14 is more likely to die in an accident than because of disease, the safety committee of the National Safety Congress reported to the congress at its opening session Monday. The meeting will continue through September 30.

Motor accidents, almost wholly, are attributable to carelessness, the committee found. Statistics it compiled showed that most accidents occurred in the day-time, under clear skies and at spots where vision was unobstructed.

LINDBERGH PASSES OVER PORTALES

Col. Lindbergh, permier American flyer, passed over Portales at an early hour Monday morning en route from Santa Fe to Abilene, Texas.

SUNSINE CLASS PARTY

The Sunshine class met at the home of Mrs. Ben Pior Friday.

Bible study was led by Mrs. C. R. Blocker, completing the book of Luke. The following officers were elected for the new year, beginning October 1st: President, Mrs. C. R. Blocker, reelected; vice president Mrs. E. T. Jernigan; secretary, Mrs. John McCann; treasurer, Mrs. Reed Brainard.

Books have been ordered for the study of Acts for the new year.

Mrs. Pior was assisted by Mrs. Reed Brainard and Mrs. John Gage in serving delicious refreshments.

GYPSY TO MAKE POTASH TEST

It was learned here this morning that the Gypsy Oil Co., are moving materials for a potash test in Twp. 19, range 30, but the exact location has not been announced. The location is said to be in the area of the old Wells well. The Gypsy is the second oil company to undertake a potash test, the Snowden-McSweeney interests being the pioneers in this field of endeavor.

Try This On Your Piano

A colored woman elbowed her way through the crowd in the ten-cent store aisles to the music counter. Put when the clerk asked her what she wished, to her embarrassment, she had forgotten the name of the piece she desired to buy.

She thought for a moment with a troubled expression; then her face brightened, and she asked the clerk, "Have you got that new piece, 'Vasaleena'?"

Where Fishing Is Good

A catch of about 4,000 pounds of halibut a day is brought into one of the Labrador fishing towns.

No Superlative

An English teacher was making it a practice of giving an 8A class a review of a certain point in grammar each day. One day she said, "You may compare the adjectives I shall give you."

The entire class looked puzzled. To the first girl the teacher said, "high." There was a little pause and finally in a little hesitant voice, the girl said, "hello."

Never Fails

Jerry—You say your wife is on this train. Are you sure?

Dave—Why, there is no doubt about it. The train is one hour late.

MARRIED COUPLE IN SPOONING CASE AWARDED $3,000

CLEVELAND, O. — Cleveland's parkways were laid open to spooning husbands and wives yesterday by a jury which awarded Mrs. Lillie Mack 23, $3,000 damages because she and her husband were arrested for petting in their automobile.

Mrs. Mack testified she and her husband were arrested by a policeman for petting in public and were forced to spend a night in jail. The ignomity of being falsely arrested she said, was worth the damages.

The jury's verdict reduced the requested $15,000 to $3,000.

STATE COLLEGE RADIO PROGRAMS

STATE COLLEGE, N. M.—The following are the forthcoming programs of the State College broadcasting station WOB, 394.5 meters, 760 kilocycles, 5,000 watts:
