

The Gay Philosopher

By J. W. S.

MR. BUDDY DEEN, the 16-year-old Cisco High School student, won flight honors again Sunday in an area golf tournament. He won the second flight of the annual Breckenridge tourney. But he was unable to accept the prize as such action would be contrary to the rules and regulations of the Texas Interscholastic League.

A number of other Cisco golfers took part in the tournament. Mr. Jack Milner, who took over today as professional at the Cisco Country Club, competed in his last tourney as an amateur. He made the championship flight and was forced to quit before finishing the first match due to illness, caused likely by the excessive heat.

Mr. Aaron Robinson made the first flight and lost his first match to M. M. Tabor's brother-in-law. Aaron has played the same man on several other occasions in tournaments.

A number of other Cisco golfers took part in the tournament.

TO TAKE OVER at the country club today, Mr. and Mrs. Jack Milner moved to town late last week. They've spent Monday and Tuesday getting moved in at the house at the club.

Jack decided that he would like golf as a profession, and all the club members are delighted to have him begin his professional career at his home-town course. He will probably begin leading a Cisco team of golfers in the area pro-amateur meets soon. Let's all hope for him a lot of success in his new profession.

Understand the members of the country club and their guests will hold a family night covered dish supper at the club on the evening of July 4th.

NEXT BIG GOLF tournament in the area is the Abilene tourney over the July 4th weekend. And a number of Ciscoans will take part. Buddy Deen will play in the pro-amateur on opening day and then take off for a big Boy Scout event. He's an Eagle Scout. . . . Buddy and Aaron Robinson were pictured in the Star-Telegram over the weekend in Breckenridge tournament scenes.

CONGRATULATIONS are in order for Mr. Paul Mosley, who has been assistant football coach at Cisco Junior College for the past two or three years. He has accepted a position as head coach at Gail High School — a county-wide school in Borden County. He reports for duty there on August 15. Meanwhile, Paul is serving as lifeguard at the Lake Cisco Swimming Pool.

Paul is a native of Cisco and attended the high school and junior college here. He finished at McMurry. We all wish him well as he accepts the new position.

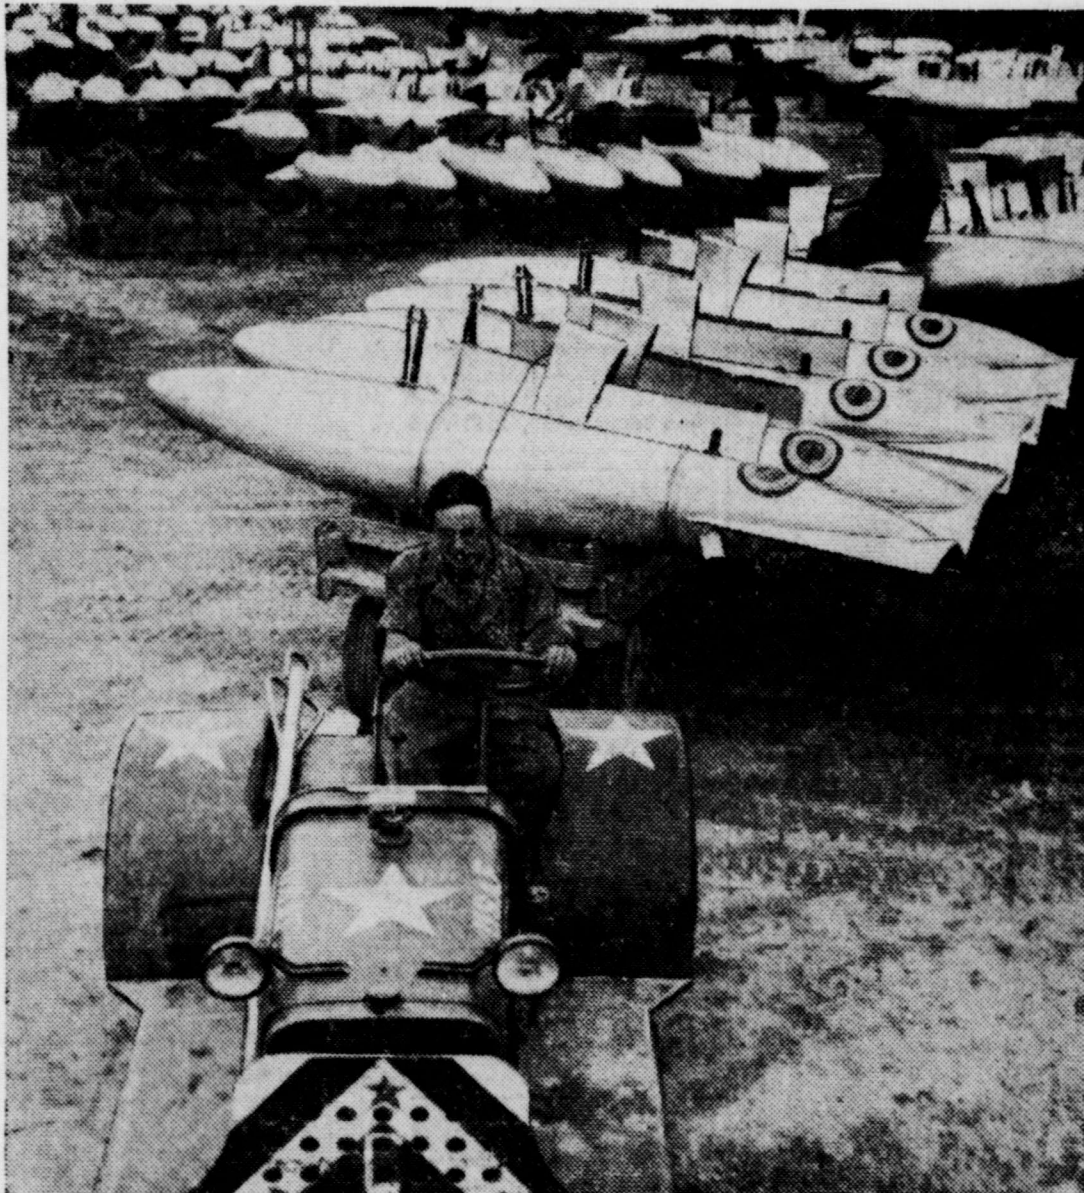

HAVE HEARD A lot of fine reports on the Monday night concert given by Miss Jane Huestis at the Methodist Church. It was an unusual program in that Miss Huestis was presented in a voice recital and in a piano recital. She finished at Cisco Junior College in the spring and, we understand, plans to continue her studies on a scholarship at McMurry College this fall.

A RECENT ISSUE of the Rising Star Record carried a nice story about a former Ciscoan — Mr. Guyle Greynolds — who has introduced farm irrigation to the area three miles south of Rising Star. Mr. F. D. Hicks, editor of the paper, made a personal inspection trip and reported that the dry weather wasn't hurting any of the Greynolds place.

Two wells there were furnishing adequate water to irrigate some 50 acres. Mr. Greynolds lived in Cisco for many years before moving to the 900-acre place. While here, Mrs. Greynolds was active in club work and community activities and Mr. G. was active in the oil business. They are enjoying living on the stock farm. In addition to farming, they have a herd of cattle.

Irrigation is something that a good many people in this area have been studying.

AREA RANCHERS ATTEND GRASS STUDY PROGRAMS THIS WEEK

Grass meetings held on the Boyd ranch Monday, June 29, and on the Jibby Donovan ranch Tuesday, June 30, were attended by a group of ranchers from the area north and northwest of Cisco. County Agent J. M. Cooper presided and introduced the speakers.

W. L. Garner, Soil Conservation Service technician, discussed the growth habits and value of the major grasses and demonstrated with samples how to identify the various species. E. E. McAlister, Soil Conservation Service Work Unit Conservationist at Eastland, discussed how proper management of grazing

land pays off for the rancher in more returns. He compared the production of grass to the growing of a field crop by pointing out that grass is the rancher's crop.

Bernal Hickman of Rising Star, a supervisor of the Upper Leon Soil Conservation District, explained the functions and purpose of soil conservation districts and explained how technical assistance is available to farmers and ranchers merely for the asking.

During the meeting on the Boyd ranch, a demonstration was conducted which showed that land covered with good bunch grasses and dead litter takes up approximately 8 times more water than land that is bare or nearly bare. It was pointed out that due to the fact that only the moisture that actually penetrates into the soil is available for plan use; the area that took up the large amount of water will produce proportionately more forage for livestock. Intermittent showers failed to deter the progress of the meeting.

On the Donovan ranch moisture penetration of the rain which fell the night before was checked. On an area covered with good grass and dead litter, the moisture penetration was approximately twice that of an adjacent bare area.

Giants and Cards To Play Thursday

The Little League Cardinals and Giants are scheduled to play at ABC Field on Thursday night after rain forced the cancellation of the Giant-Athletic game Tuesday night. The Tuesday night game has been re-scheduled for later in the season.

Plans call for the completion of the regular Little League season before July 29. The play-off series between the winner of the first half and the winner of the second half, if needed, has been scheduled for July 30 and 31 and Aug. 1. The Legion Indians were to play the Breckenridge Legion team at ABC Field at 3:30 p. m. Wednesday. The game was originally scheduled to be played in Breckenridge Tuesday but was postponed because of rain. The Breckenridge diamond was still wet today.

Friday at 8 p. m. the Indians play Mineral Wells at ABC Field. Mineral Wells held the strong Goldthwaite team to a 7-7 tie in a game last week that was called on account of darkness. The game will be re-played later in the season.

Cotton Classing Is Important For Best Fall Prices

Farmers get better prices for their cotton when they know three things before going to market, according to Mr. Sam W. Martin, head of the Dallas cotton classing office, U. S. Department of Agriculture.

He named grade, staple length, and knowledge of local price quotations. Then he explained that farmers armed with these facts are in a position to demand fair value, whereas those who only know that they've got a bale of cotton to sell are likely to get paid less.

There's a simple way for farmers to get this information, he pointed out, and at no cost. They can sign up with a cotton improvement group under the Smith-Doxey program. To do this, a farmer must contact his county agent, nearest cotton classing office or gin.

After his group is organized the elected group leader files one application with the cotton classing office covering all of its members.

"Once this is done," Mr. Martin said, "members will get free classing service on all their cotton. And in addition, they can get USDA's price quotations each week. This service is mailed free upon request."

And when their cotton is classed by USDA, Mr. Martin stated, farmers will get back a green classing card showing grade and staple length. With this card they can sell their cotton without bothering to submit samples to buyers.

Mr. Martin reminded interested farmers to sign up before the August 1st deadline to insure their place in the 1953 program.

Miss Hamilton Back From Rainbow Meet

Miss Wanda Hamilton, Worthy Advisor of the Order of Rainbow for Girls, returned early Friday morning from Galveston, where she attended the thirtieth session of Grand Assembly of Texas. The session, attended by 3,090 Rainbow Girls of Texas, and visitors from the Grand Assemblies of California and Louisiana, was held June 22, 23, and 24, at the City Auditorium.

Miss Hamilton attended a breakfast honoring the Grand Cross of Color members at the Galvez Hotel. She was also a voting delegate for the Grand Officers of 1954.

Miss Hamilton went with the Abilene assembly of Rainbow Girls, and on her way back, visited the San Jacinto Monument and Museum, the Battleship Texas, and Houston.

Rain And Federal Aid Expected To Benefit Area Cattle Prices

Spring Pig Crop Below Average In State And Nation

The 1953 spring pig crop in Texas, estimated at 566,000 head, is 39 percent below the 924,000 spring crop a year ago according to a United States Department of Agriculture report. This year's crop is less than half the 10-year average and the smallest since records began in 1924. Litters averaged 6.5 pigs, compared with 6.6 pigs last spring and the 10-year average of 6.1 head.

Number of sows farrowed at 87,000 is 38 percent under last year's previous record low spring farrowings of 140,000 sows. Hog production has been curtailed drastically in all parts of the State during the past two years as droughty conditions reduced grain crops.

Reports on breeding intentions indicate fall farrowings on Texas farms of 90,000 sows. This number is 22 percent less than last year and also the lowest of record.

The number of pigs saved in the United States during the spring season of 1953 (December 1, 1952 to June 1, 1953) is estimated at 50,726,000 head. This is 5,631,000 head or 10 percent smaller than the spring crop last year and is the smallest since 1948. It is 12 percent smaller than the 10-year average. The number of sows farrowing in the spring of 1953 is estimated at 7,449,000 head or 12 percent smaller than last year and 19 percent smaller than the 10-year average. The 1953 spring farrowings are about 1 percent higher than indicated by farmer's reports on intentions last December.

The number of pigs saved per litter at 6.81 is the highest on record for the spring pig crop. This is 3 percent more than the previous spring high of 6.64 pigs saved in 1952. Weather conditions over most of the important hog producing States were very favorable during the spring farrowing season and rising hog prices encouraged better care.

Reports on breeding intentions indicate that 5,054,000 sows will farrow in the fall of 1953. This is 264,000 sows or 5 percent less than the number farrowing last fall. If these intentions are realized, the number of sows farrowing during the fall season (June 1 to December 1) would be the smallest since 1947.

MRS. LANGSTON, RESIDENT OF CISCO 62 YEARS, DIES TODAY

Mrs. J. F. Langston, who passed her 90th birthday on September 18, 1952, died at her home at 301 Ave. H. at 3:15 a. m. Wednesday. She had been a resident of Cisco for 62 years.

She had been in ill health for a number of years and had been confined to her room since breaking her hip in a fall in December, 1949.

She was born Mary Frances McLaren in Rusk County, Texas, on September 18, 1862. She was married to J. F. Langston on February 6, 1881 and moved to Cisco with her husband in 1891. She had lived here almost continuously since that time and had watched Cisco grow from a community of 800 people to the present city of modern conveniences. She saw her community destroyed by the devastating tornado of 60 years ago and had watched it emerge from ruin to become a better place in which to live. She and Mr. Langston contributed much to the growth of the town. Mr. Langston preceded her in death in 1906.

Mrs. Langston was active in the work of the First Baptist Church here until ill health forced her to limit her activities.

Funeral services will be held at 5 p. m. Thursday at Thomas Chapel with the Rev. F. C. Bradley, pastor of the East Cisco Baptist Church, in charge of the rites. Burial will follow in the Oakwood Cemetery with Thomas Funeral Home in charge of the arrangements.

Survivors are two sons, G. B. Langston of Cisco and D. L. Langston of Fort Worth; two grandchildren, Frank Langston and Mrs. C. R. Cogswell, both of Dallas, and three great grandchildren.

Nazarene Pastor And Family On Vacation

The Rev. D. M. Duke will be absent from his pulpit at the Church of the Nazarene on July 5 and July 12 while he and his family vacation in California. It was announced today. They planned to visit Mrs. Duke's parents, Mr. and Mrs. P. E. Bawcom, in Galt, California.

The Rev. W. J. Campbell of Abilene will preach at the local church on both July 5 and July 12.

Swimming Pool Notes . . .

WEST TEXAS TOWN SHOWS HOW POOL CAN BE BIG CIVIC ASSET

By W. P. KNIGHT

What could happen in Cisco is happening in Ballinger, right now. This thriving West Texas city backs its new swimming pool practically 100 per cent. Just opened May 29, ticket sales the first month will be over \$6,000.00, Ballinger city secretary Fred Underwood reported Saturday, while visiting in Cisco at the annual Underwood reunion, which group stayed at the Presbyterian Camp.

Since the total cost of the new pool was about \$59,000.00, this gross return of 10 percent the first month is some achievement, even for a Texas town. Between two and seven Sunday afternoon, June 21, 992 swimming tickets were sold, Mr. Underwood said.

Utilizing an old water plant, the pool installation includes a filtration system. The size of the Ballinger pool is 60 by 120 feet, with a 5 foot depth except for a portion at the bath-house end, which is 3 feet deep. Along one side of the pool a diving area 40 feet square was added, with a depth of 10 feet. Three diving boards are at the farthest edge of this section.

The pool is managed and life-guarded by two Ballinger High School coaches. While no suits are rented, children's life-jackets are leased at 15 cents.

We often wonder what our big pool would cost to duplicate, in comparison with Ballinger's pool at \$59,000.

With the largest man-made, concrete-bottomed pool in the nation, we believe that Ciscoans should get behind their pool a little better, and follow the example of Ballinger. Ciscoans should come out and swim and support the big Cisco Pool.

Some day we are going to ask Luke Swindle to relate the history of the Lake Cisco recreational area. He and his dad each managed the pool. Luke just returned from a very successful fishing trip along the Llano River at the State Park 10 miles northeast of Mason. Formerly this was a Civilian Conservation Corps camp.

Their catch included lots of carp weighing from 20 to 35 pounds, plus plenty of 14 and 15 inch bass. Luke plays those fishing expeditions safe, since we saw his group before they left Cisco with plenty of good eats just in case the fish were not cooperating.

The water well which the John Wm. Butts Post 123 drilled on halves with the city is helping maintain the water level at the swimming pool. This well, called the Charley Roberts No. 1, is named for the oil man who did the geology on the water well.

Thanks to a two-inch rain and water from the Legion well, the water level at the swimming pool rose quite a lot Monday after-

Turn To Page Five

Ranchers To Hold Meeting To Study Federal Program

Cattlemen of this West Central Texas area were optimistic today that Monday night's rain and action this week by the federal government in their behalf would return stability to the cattle market.

President Sam Kimmell of the West Texas Ranchers Association, which serves several counties in this region, reported that ranchers generally were more hopeful than they have been in several months. All the counties served by the association, including Eastland County, were placed in the drought disaster area to receive federal aid.

Mr. Kimmell announced that the directors of the association would meet Thursday night at Eastland to discuss the situation.

In action this week, the government announced several projects that are designed to bring relief to cattlemen who had been faced with a growing scarcity of range grass and feed and sagging prices. The action included:

1. The government will buy 200,000,000 pounds of beef designed to halt a decline in cattle prices stemming from forced sales in the drought stricken southwest.

2. The president formally designated 152 counties in Texas and 40 in Oklahoma as a disaster area. This makes cattlemen in the areas eligible for a share in an \$8,000,000 drought relief fund.

3. The Interstate Commerce Commission gave railroads the authority to reduce freight rates on carload shipments of hay, feed and livestock to and from western drought areas.

The beef purchasing program was due to begin immediately with the government buying 10,000,000 pounds a week for some 20 weeks. The beef will be bought for government sponsored lunch programs and other public institutions, for the Greek army and other purposes.

The good rain, which covered all of the counties served by the ranchers association, will be a big help, Mr. Kimmell said, but it came too late for immediate relief. Much pasture land was bare and grazing will not be worth while for some time.

An immediate upward trend in the cattle market was indicated in sales rings Tuesday. Prices were up somewhat at Fort Worth, and the Eastland sale attracted only a small run, indicating that ranchers have called a halt to the sale of foundation herds. Prices at Eastland were from \$3 to \$4 per 100 pounds over quotations for last week in some classes.

The rain came in time for stock farmers to plant fall feed crops in this area, and planting work was due to begin as soon as the ground is dry enough.

Mrs. Cleveland Is Called By Death

Mrs. Minnie Lee Cleveland, who would have been 75 years of age on July 7, died in a local hotel at 5 p. m. Tuesday. She had made her home at the Mobley Hotel for the past few years. Thomas Funeral Home took the body overland to Grandbury. Funeral services will be held Thursday afternoon at Acton, near Grandbury.

She was born in Acton on July 7, 1878, and came to Cisco 12 years ago from Josephine.

Survivors are a son, Doyle Cleveland of Dallas; two daughters, Mrs. Herbert H. Brown of Fort Worth and Mrs. J. C. Hudgens of Yellville, Arkansas; four grandchildren and a number of sisters and brothers.

MEETING CANCELLED

The Word Home Demonstration Club meeting previously announced for Thursday, July 2, will not be held due to death in the family of one of the members.

SHACKLES OF VICTORY

Who is boss of the Executive Branch of the government? The obvious answer, of course, is that the President has this power, and discharges it through his cabinet members and other top-level appointees. That is theoretically true. But, in actual practice, the situation isn't nearly so simple nor clear-cut.

In one of his Newsweek columns, under the significant title "The Shackles of Victory," Raymond Moley wrote: "A conquering general who turned statesman, the Duke of Wellington, once said that 'nothing except a battle lost can be half so melancholy as a battle won.' Another victorious general turned statesman, Dwight D. Eisenhower, is probably thinking something exactly like that. For this warrior who hurled armies across Europe is beating futile blows against the rubber wall of bureaucracy. . . . He cannot as of this date administer his government because he lacks the very vitals of control. He can and has appointed a group of what are technically called top policy-making officers. . . . They, like the President, are Gullivers bound down by Lilliputians, without whom they can know nothing and do nothing but because of whom they cannot effectively carry out the policies and promises of their party."

FOR SALE

Large house on 18th St. A wonderful buy.

Wonderful buy on 8th St. Corner lot. Needs to be sold at once.

240 acres, well improved land, 3 1/2 miles south east of Cisco.

Wonderful buy in a service station with a nice trailer park and nice home. Small down payment. See me at once.

A beautiful new home that's never been lived in. Small down payment, small monthly payments. Needs to be sold at once.

SOCIETY AND CLUBS

AND NEWS OF INTEREST TO WOMEN

Calvary Baptist WMU Has Meeting Tuesday

The Calvary Baptist W.M.U. met Tuesday, June 30, at the church for their regular weekly meeting and a Royal Service Program.

The meeting opened with a song and prayer by Mrs. W. L. Lewis who also led the devotion. Mrs. John Willett was in charge of the program which was followed by a short business session. The meeting closed with prayer by Mrs. I. D. Hodnett.

Those attending were Mrs. I. D. Hodnett, Mrs. Leroy Taylor, Mrs. W. L. Lewis, Miss Mattie Evans, Mrs. John Willett, and two Sunbeams, Jeannie and Judy Willett.

Miss Pence Honored With Dinner Monday

A three course dinner honoring Miss Carlene Pence, bird-seed of Bob Powelson, was served at the Victor Hotel Coffee Shop Monday evening with Miss Catherine Cunningham and Mrs. Roy Huffmyer as hostesses.

The table held a centerpiece of red and white carnations, chosen colors of the honoree. Corsages of red and white carnations were presented the honoree and her mother, Mrs. Carl Pence. At the conclusion of the dinner wedding gifts were presented the honoree by the hostesses.

Those attending the dinner were Mrs. Carl Pence, Miss Patsy King, the honoree, and the hostesses.

Miss Rice Will Wed Mr. Steffey July 14

Mr. and Mrs. J. O. Rice, 1206 W. Bliss Street, have announced the engagement and approaching marriage of their daughter, Dorothy, to Fred A. Steffey, Jr., son of Mr. and Mrs. Fred Steffey, Sr., of Cisco.

The wedding date has been set for 5:30 p. m. Tuesday afternoon, July 14, at the Wesley Methodist Church with the Rev. Robert Sanders officiating in the ceremony.

Miss Rice is a graduate of Cisco High School and attended Cisco Junior College. Mr. Steffey is also a graduate of Cisco High School and attended the University of Texas.

The couple plans to send out no formal invitations, but issued an invitation to all their friends to attend the wedding rites and the reception which will follow in the Methodist parsonage.

Lutheran Missionary League Has Meeting

The monthly meeting of the L. W. M. L. of Grace Lutheran Church was held Sunday afternoon at the home of Mrs. A. O. Lenz.

The meeting opened with scripture reading from Acts 2 by the Rev. James Hennig who also led the topic discussion on missions. Routine business matters were transacted and the meeting closed with prayer.

Those attending were Mrs. Max Witt, Mrs. Marie Fricke, Mrs. W. J. Prange, Mrs. Fred Stroebel, Mrs. Ed Wendt, Mrs. Ernest Reich, Mrs. Fred Wendt, Mrs. Winona Lambam, Mrs. O. J. Weiser, Mrs. Paul Weiser, Mrs. Alvin Stroebel, Mrs. R. H. Danning, Mrs. Carl Stroebel, Mrs. Lena, Rev. Hennig, and a visitor, Mrs. Hennig.

By VERN SANFORD
Texas Press Association

AUSTIN — Federal officials are taking action on emergency drought relief for Texas as requested by Governor Allan Shivers.

Secretary of Agriculture Ezra Benson conferred with the governor and toured drought areas from Lubbock to San Antonio.

More than half of Texas has been labeled a disaster area by the Southwest's soil conservation chief at Fort Worth.

President Eisenhower had previously notified Shivers that the Federal Civil Defense Administration and the Department of Agriculture had been put to work on the drought disaster problem.

"The western half of the state is now in the fourth year of drought. Conditions continue to grow worse," the governor reported. He asked for "credit extension and other relief" for farmers and ranchers.

The governor said that reports indicate at least 123 counties seriously affected. A survey among livestock producers showed a growing sentiment that government aid, either by purchase of cattle or the sale of feed at disaster prices, may be necessary to prevent wholesale bankruptcy.

Republican Committeeman Jack Porter of Houston and other

state leaders urged maximum federal assistance.

Farmer and rancher groups from various counties discussed the emergency with Secretary Benson, who was in Lubbock to speak before the American Cotton Congress. Among other things, Benson discussed ways of preventing dumping of beef cattle on markets from the Southwest.

Texas Commissioner of Agriculture John C. White says that the three-way squeeze of continued disastrous drought, falling prices and rising costs has made the farm outlook this year "grim." He urged farmers to tighten their economic belts in order to get through this year.

The outlook for the cotton crop is about 3,663,000 bales, White said, or half of the potential of an average year. A wheat crop of 20 million bushels is expected in place of a normal yield of 60 million bushels.

A fund is already available to drought-hit farmers and ranchers, according to the U. S. Department of Agriculture. The federal loan aid which they've been receiving for the last year is still available for seed, feed, fuel, groceries and other operating expenses.

A few solutions to water shortages have been offered by State Health Officer George W. Cox. He says that if the state had built reservoirs on Texas streams we wouldn't have a water problem.

"More than 85 percent of our storm waters reach the sea," he said. "That means that only 15 percent is soaked up by our parched earth."

There is no reason, Cox said, why these waters cannot be captured and transported to areas of scarcity.

The heat wave spread to Texas politics. Two Democratic Party organizations were getting steam-heated up over a complete break between national and state party machinery. And the beefed-up Republican Party was trying to consolidate its gains, capitalize on the Demo split, and grab congressional and state offices next year.

The five-day visit in Texas this week of Stephen A. Mitchell, national Democratic chairman, apparently gives the national party blessing to the supporters of Adlai Stevenson in the last presidential race. Mitchell conferred with this group, recently formed as the Democratic Organizing Committee.

On the other side of the fence are Governor Shivers and the Democratic State Executive Committee, who supported Eisenhower for president.

Since the Republicans gave Governor Shivers an overwhelming vote under the cross-filing system, they will have to hold primaries next year.

The Texas GOP could make further use of cross-filing, which is strongly opposed by Stevenson Democrats. The Republicans could join forces with the Shivers group to put across the same

congressional candidates on both tickets.

Attorney generals from Texas and New Mexico met in Austin to iron out several problems between the two states.

Among other issues is one over water rights. Texas has filed suit against New Mexico in the U. S. Supreme Court to compel the release of water in the Rio Grande River for irrigation in Texas.

New Mexico is reported ready to sue Texas for draining underground water across the border with numerous water wells.

Simple driving courtesy on the highway would greatly reduce the accident rate, according to one traffic expert.

D. A. Weaver of State College, Pa., speaker at the first annual Motor Fleet Management Institute, explained that a man drives as he lives. A man who has a sense of social responsibility tends to be a better driver than anti-social people, he said.

The institute is sponsored by the Texas Motor Transportation Association and conducted by the University of Texas Division of Extension and Texas Education Agency.

When the minister-president of Bavaria, Dr. Hans Ehard, called upon Governor Shivers recently, they found agreement on one thing: both are opposed to any movement toward a "powerful, centralistic federal government."

SHORT SNORTS: An Austin livestock auction official sums up the price situation in this way: "The cow people are hurt so bad they aren't even talking; some come up to get their check — and that takes their breath."

The Texas Supreme Court held its session a day earlier this week in order to attend the State Bar convention in Fort Worth July 1-4. . . . Rep. John Crosthwait of Dallas predicts that Rep. Jim T. Lindsey of Texarkana will be the next speaker of the Texas House, claiming over 100 signed pledges of support. . . . Criminal District Judge Henry King of Dallas says he is thinking of running for the Court of Criminal Appeals next year, if Judge Harry Graves steps down from the bench.

Mr. and Mrs. W. C. McDaniel have returned after a week's visit in the home of their daughter and family at Tulsa.

Mr. and Mrs. W. B. Wright and children returned Monday after spending ten days vacationing in Galveston.

Joseph Sweeney invented the banjo, so called because he was dubbed a one-man-band.

Ever Thought of This?

... If you buy real estate without an abstract the chances are good that you will be required to furnish one when you sell or borrow money. It is customary for seller to furnish buyer with an abstract as he usually adds cost of same to the sale's price. So for many reasons all in your favor get an abstract and have it examined by your attorney when you buy real estate.

Got a good idea for a new invention floating around in the back of your mind? Better take care, or someone else may beat you to the patent office.

Many people have good ideas about new or improved machines or gadgets, but never do anything about them because they don't know how to protect their rights while perfecting such items and going through the necessary patenting procedure. Here's what you can do to protect your invention before you have it patented.

Under the patent laws of the United States the person who first conceives of a new and novel patentable idea is entitled to it. Therefore, if conflicting claims arrive as to who is entitled to a patent, it is necessary to establish who first had the idea, not who filed the first application for patent.

Of course, it is always advisable to make application for patent as soon as possible in such cases. But don't forget to protect yourself while you are completing your final drawings and ultimate plans and making such tests as may be needed to perfect your patent. To do this, you should, as soon as you conceive the idea, make a written record of the facts, dating the same, including a general statement of the nature of your invention, and a rough drawing if possible. This should be witnessed by two persons who could be called on later on to certify that they witnessed the same on the dates set out in the instrument you have drawn.

Some inventors place such witnessed statements and drawings in an envelope. This they seal and mail to themselves by Registered Mail. Their post office stamps each seam of the envelope in such a way that any opening of same can be detected. Upon receiving the registered envelope and its contents, the in-

ventor merely files it away in a safe place unopened. Then, if a contest should later develop, postal records will lend additional support to the testimony of his witnesses.

By taking the above precautions, you will establish a preliminary date showing the time when your original idea was conceived. After that you can continue with your work, perfect your idea, and after the same is perfected, make application for a patent, if you feel that you have a patentable idea.

One should not just make a preliminary sketch and put it away and think that is sufficient to protect his rights. That is just one additional bit of evidence to help him establish his right to the patent. The patent should be sought as soon as one possibly can after conceiving his patentable idea and working out details of the same.

Vets Questions
And Answers

Q — If I sign up for institutional on-farm training under the Korean GI Bill, how much actual instruction will I get?

A — You will receive a minimum of 200 hours a year of group instruction in school, plus at least 100 hours of individual instruction. A minimum of 50 hours of the individual instruction will be on your own farm.

Q — I'm the widow of a World War II veteran, and I've been getting a pension. However, it

stopped because I forgot to mail in the questionnaire asking about my annual income that VA sent me. Is there any way I can get the payments to start again?

A — You should submit the questionnaire, or other evidence of your annual income to VA. If VA receives this within one year from the date it originally issued the questionnaire, and if your income does not exceed the legal maximum, the pension may be payable from the date of the last payment you received. If more than a year lapses, the payments if otherwise in order will start as of the date VA gets the new questionnaire or a new claim.

Q — I understand that with credit controls lifted it's possible to get a 30-year GI loan with no down payment. But I can't find anybody who will lend me the money on those terms. Aren't lenders required to do that, under the law?

A — No. Although such terms are permissible, it's still up to the lender to make his own decision as to the terms of the loan.

Q — I've just been separated from service. I haven't yet applied for the GI term insurance available to Korean veterans. How long will I be covered by the free indemnity that protected me while I was in uniform?

A — The free indemnity protects you for 120 days after your separation from service. If you want the GI term insurance, you must apply to VA for it and pay your first premium within that 120-day period.

Swimming — — — From Page One

noon and evening. The hot winds and the hot sun had evaporated much water over the past few weeks.

Some adult swimmer is going to win a Mystery prize on July 4th for guessing closest to the number of adult tickets sold that day. The number of adults who will swim that day is a mystery, as is the prize. The swimmer wearing the oldest bathing suit will win a prize, as will the

largest family group and the swimmer whose home is the farthest from Cisco.

While we have no trouble remembering names, we have difficulties with initials. A Mr. Clements from North Cowden, near Odessa, said he wished he had a place like our pool and rink in the vicinity of Odessa, Monahans or Midland. He figured it would do at least a million-dollar annual business in that area where people think nothing of driving a hundred miles to get

in a swim or two. He is visiting his dad at Cisco for a short while. While residing here, he pumped wells for the Hickok interests north of Cisco.

Every day, former Ciscoans visiting the pool, tell us about how other towns would greatly appreciate a place like we have at the lake.

Charles Cofer, Arlington insurance man and former local realtor, still feels that the Lake Cisco Pool and rink, along with other features, should net \$20

Safety Council Says 'Play Safe And Stay Alive'

CHICAGO, July 1. — Play safe on the Fourth — be alive on the fifth!

This warning was issued today by the National Safety Council as the nation approached one of its most dangerous — Independence Day.

Motor vehicle accidents always lead the list of Fourth of July accidents, the Council said, and this year 40 million vehicles are expected to jam the highways and roll up close to four billion miles.

Of the 75,000,000 persons taking vacation trips this year, 66,000,000 will go by car — and many of them will use the mid-summer holiday as the beginning or end of their regular vacation periods. This, plus the increasing number of new cars on the road and the substantial rise in gasoline consumption, indicates a heavy toll of dead and injured unless extra care is used by both motorists and pedestrians.

Travel in resort and park areas — always heavy on holidays — is growing steadily. National parks clocked 41,516,664 visitors last year, which was twice the number in 1946. The most heavily visited and traveled areas last year were the Shenandoah National Park in Virginia and the Great Smoky Mountains National Park in North Carolina-Tennessee. The Lake Mead National Recreation Area of Arizona-Nevada was third.

"Wherever you're going over the Fourth, start early," Ned H. Dearborn, president of the Council, said, "and take it easy. Don't be in too big a hurry to get there. Obey legal and common sense speed limits and keep your car under control at all times. Keep a safe, clear stopping distance between you and the car ahead. Slow down at sundown, and hold your nighttime speed below the maximum at which you can stop within the range of your lights."

"After you arrive, don't overdo in exercise, eating or exposure to sun. Don't swim alone, know the depth of the water, wait an hour after eating, and don't show off in the water or in boats."

"Play safe on the Fourth — be alive on the fifth!"

thousand annually. And if located between Fort Worth and Dallas, it would make several million dollars easily every year, Charley believes. He has to swim in municipal pools while at his new home.

Mrs. Karl Armstrong wonders if hers is the only Cisco family in which three generations have swam in the pool. She, her daughter Mrs. Richard Vickers from Odessa and the latter's small son were all in swimming one day last week.

Parents generally have little trouble getting their children into the pool but getting them out is something else, from what we hear and see. The last place the kiddies want to go is home. We have had some children stay in the pool from two till nine on a Sunday afternoon. That's what we call quite a bargain for 15 cents a child!

Visiting here from their new home at Baton Rouge, Louisiana, Mrs. Bill Ussery and children were pool visitors last week. Bill, Sr., is an engineer with Transcontinental Pipe Line, while Bill, Jr., starts his freshman year at Baton Rouge High School this fall.

While calling to thank Bill Huestis for sending out that big truck-tire innertube with his sister-in-law, Mrs. Ussery, we noticed a Department of Agriculture official testing Bill's gasoline pumps. We were informed that every gas pump in town is periodically tested.

That refreshing bluegreen color of the water at the pool is fooling people. Some of whom asked whether we had a salt-water swimming pool. If this were the case, floating would be easier, as would swimming.

BRIEFLY TOLD

Mrs. L. T. Bains and sons, Randolph, Walter, Earl, and Russell, of Odessa were expected today for a visit with her parents, Mr. and Mrs. W. C. Spoon.

Allen Austin Withee of Irving is visiting with his grandparents, Dr. and Mrs. N. A. Brown.

Steve and Ann York of Wichita Falls are visiting their grandparents, Mr. and Mrs. Carlton Holder.

James Porter left this morning for Palestine to accompany his brother, Phillip, who has been working there, home for the summer.

Mr. and Mrs. Austin Flint went to Temple today where he was to receive a medical checkup following a recent operation.

Mrs. Ray Irving and son, Ricky, have returned to their home in Fort Worth after visiting in the home of her mother, Mr. and Mrs. I. H. Skiles.

Mr. and Mrs. Carlos Turner and son, Johnny, planned to leave early Thursday for Rochester, Minn., where she will go through the Mayo Clinic. They expect to be away for about two weeks.

Mr. and Mrs. Jeff Grogory and children spent the weekend in Dallas with her mother, Mrs. Lorraine Churchill, who accompanied them home for a visit.

Dr. and Mrs. N. A. Brown attended the wedding of their nephew in Wichita Falls Sunday.

Mr. and Mrs. John Holder of Stanton spent the weekend in the home of Mr. and Mrs. Carlton

Holder and daughters. They were accompanied home by Janice Holder for a short visit.

Mr. and Mrs. Dick Spoon of Odessa have returned home after a two week's visit with their parents, Mr. and Mrs. W. C. Spoon.

Spoon and Mr. and Mrs. Omer Fenley, and other relatives.

Mrs. John McGee and children of Fort Worth are visiting her parents, Mr. and Mrs. Jay Warren.

Mr. and Mrs. Otto Hageman were in Brownwood due to the death of their nephew, Bobby Smith. They were accompanied home Sunday evening by Mrs. Hageman's brother and wife, Mr. and Mrs. Allen Smith of Odessa.

Mrs. Hageman and Mr. and Mrs. Smith attended the funeral services in Brownwood Monday.

Mrs. Garland Lassiter and children of Abilene visited relatives in Cisco Monday.

Martha Lanham is visiting Peggy Isbell in Brownwood this week.

Recent visitors in the home of Mr. and Mrs. I. H. Skiles were her foster sister and family, Mr.

and Mrs. Raymon Warren and daughter, of Fort Worth.

Mrs. R. G. Milling and Miss Orlena Milling of Fort Worth visited in the home of Dr. and Mrs. N. A. Brown last week.

Carlene Holder spent last week in Wichita Falls with her sister and husband, Mr. and Mrs. K. W. York and children.

Inhabitants of the Isle of Man are called Manxmen.
