

BOY'S STATERS—Seven qualified applicants drew four available spots this morning for the American Legion's Boy's State in Austin this June. Frank Stephenson, chairman of the Legion's Boy's State work is standing with the successful candidates, who are Robert Thomas, Danny Aycock, Jimmy Wilson and Jimmy Feather. Shown in front are Edward Schulz, Scooter Harbour and Glenn Ward, who drew the "short straws" but will be available as alternates in the event some of the others are unable to attend.

New Terms Launched By Three Councilmen

Three city councilmen were sworn in for new terms immediately following the city election last night.

The council, after canvassing the returns from the election and administering the oath to the newly-elected members, then went through a modest business agenda.

There were no contested races on the election ballot, and only 65 votes were cast. Bobby McCormick received 72 votes for Place 1, councilman, M. L. Brogan 80 votes for Place 3, councilman, and Marshall Erwin 78 votes for Place 5, councilman.

A sprinkling of write-in votes were tabulated. Receiving one vote each for council posts were Rex Fields, R. H. Mellon, Jack Craft, R. H. Emerson, Marth Brooks, Worth Sawyer and J. R. Hickabee.

In the business session, the council renewed contracts of Arthur Blanchard, city attorney; Dave Adams, corporation court judge; and Edgar Taylor, special collector of delinquent taxes.

Councilman D. D. Sheltaine was elected to serve as mayor pro tem for the coming year.

An ordinance was passed on first reading to close an alley in Block 32, Gross Subdivision of Scarborough Addition. This action has been requested by Frank Stephenson.

After considerable discussion, the council voted to remove the traffic signal at Twenty-fifth Street and Highway 290.

Three persons—Arthur Duff, W. R. Bowlin and Ed Thompson—appeared before the council and urged that the traffic signal be retained.

The council noted that traffic surveys at the intersection showed over 3,000 vehicles on Twenty-fifth Street and only about 200 on Avenue J during an eight-hour period. Also, it was noted that police records showed 16 traffic accidents at the Twenty-fifth and Avenue J intersection during the past two years, with 30 of them accounted for by vehicles hitting others that had been stopped by the traffic signal.

Bids were opened on proposals to purchase some surplus equipment advertised for sale by the city and bids on two items were accepted. The City of Lamesa bid of \$523 for a 1944 model half-ton power shovel was accepted.

And Haynes Camp's bid of \$228 for a well-propelled mower was accepted.

All bids on cement mixer and on a garden tractor with blade and mower were rejected.

A resolution was passed requesting the Texas Highway Department to widen U. S. 190 from Avenue Z to El Paso Avenue, and the city manager was authorized to seek bids on a new billing machine for the city utility office.

A request by Roy Lashaway to purchase the city's parking meter coin at cost, plus two per cent, was presented to the council. The council members of that board are R. H. Mellon and J. L. Downing.

The council conferred briefly with J. D. Hinton, architect employed to make a feasibility study with a view toward constructing a combination Emergency Operating Center and Fire Police building. Hinton presented some preliminary floor plan drawings, and the council expressed approval of the work so far.

Soviet Lunik 4 Speeds On Course

MOSCOW (AP)—The Soviets said today Lunik 4 hurtled 134,913 miles in the first 24 hours of its flight toward the moon and is speeding along on course.

A broadcast communiqué carried this progress report on the lunar research vehicle reported fired from an orbiting multistage rocket Tuesday on 238,850-mile journey.

With speed slackening somewhat after the initial boost, it was expected to reach the area of the moon in 10 to 12 days.

"Exactly" the "Soviet" supposed to remain a Soviet secret.

The instrument-laden, 3,100-pound Lunik 4 could give the Russians a big lead over the United States in the race to land a man on the moon. The American program, stung by three spectacular failures last year, is far behind schedule, but officials in Washington said there is no need for Americans to panic.

Scientists speculated that Lunik 4 is intended either to land an unmanned observation station on the moon or orbit the moon to take detailed photographs and in gather other data.

Such preliminaries are indispensable to landing a man, and "a big range of studies must be carried out before a man flies there," wrote astrophysicist Yuri Lipysky in Pravda today.

However, the Soviet government gave no hint of Lunik's mission. Close studies of statements by Soviet scientists who should know turned up few clues.

Nikolai Barabashov of the Kharkov Observatory mentioned the lunar mission in an article in the Soviet newspaper Pravda.

He strongly opposed to the U. S. move toward the Soviets.

U. S. Flatly Rejects Soviet Charges On Raids By Cubans

WASHINGTON (AP)—The United States flatly rejected today Soviet charges that this country was responsible for two Cuban refugee raids on Soviet ships in the area of Cuba.

In a note delivered in Moscow, the United States also sharply reminded the Soviet government of its opposition to Soviet military involvement in Cuba.

By its rejection, the United States also turned down in effect a Soviet demand in notes late last month that it pay damages arising out of the two incidents.

Assuming that the United States is in the way, the Soviet government strongly opposed to the U. S. move toward the Soviets.

The U. S. government is taking every step necessary to insure that such attacks are not launched, manned or equipped from U. S. territory.

The text of the brief note was released by the State Department four hours in advance of President Kennedy's news conference. Kennedy was expected to discuss at the conference his reasons for deciding to crack down on raids against Cuba, including Soviet agents and installations.

The action, made public last Saturday, has drawn both support and criticism in Congress.

Russia had denounced as "pirates" the two Cuban raiding parties on March 17 and the merchant vessel Base on the night of March 22.

Soviet policy encouraged the United States of encouraging Cuban anti-Castro groups to make the attacks, and said the United States bears full responsibility.

"The U. S. government categorically rejects this charge," the U. S. reply said. "It wishes to remind the government of the Union of Soviet Socialist Republics that immediately after the recent attack on Soviet merchant vessels and official spokesmen stated that the U. S. government is strongly opposed to it and is in no way associated with such attacks."

The note added that there were no U. S. ships or personnel involved in the attacks.

The U. S. government said it was "launched, manned or equipped from U. S. territory."

Redistricting Bill Gets Consideration In House

Sullivan Is Named To C-C Board

Guy Sullivan was appointed last night to serve as a director of the Snyder Chamber of Commerce.

The appointment was made by R. C. Patton, chamber president, at the regular board meeting. Sullivan will fill the vacancy created by the resignation of Tom Sinclair.

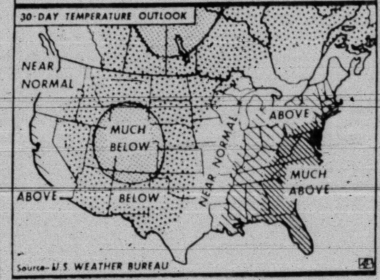

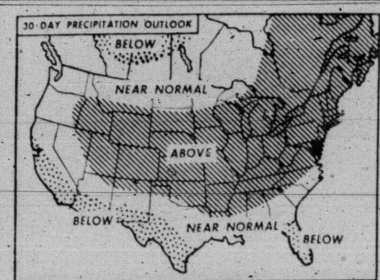

During the business session the board heard a report from Harold Lack on work toward developing "third level" air service to Snyder.

The chamber is now working directly with a company to offer the service, with the first step being to undertake a survey of businesses and individuals to determine who would be interested in contracting from the service. Minimum contracts would represent the equivalent of five round trips to Dallas per year.

Planes now being considered for use are Cessna 441s with a possibility that the new tandem engine Cessna Skylaster would be used. Proposed service would be direct to Dallas with emphasis on computer use.

Badger Robertson, chairman of the junior college study committee, lists six things which he said an individual may do for the college program:

1. Come to the public meeting April 9 in the high school auditorium. If unable to attend obtain accurate information on the proposal.
2. If you are for the junior college proposal, sign petitions.
3. Help the committee get as many people as possible to appear before the state board in Austin when petitions are presented.
4. If and when the state board conducts a hearing, be present.
5. Be present in Austin when action is taken on results of the hearing.
6. Vote for the college if the election is authorized.

WEATHER OUTLOOK FOR APRIL—These maps, based on those released by the Weather Bureau, show expected temperatures and precipitation for the next 30 days. (AP Wirephoto Maps)

Air Fight In Revolt Looms

By ROMAN JIMENEZ

BUENOS AIRES (AP)—The Argentine air force announced today that it was ready to fight against any rebellion.

The navy claimed new jet victories today and the navy feared the prospect of a new battle in the skies.

The 30 jet air force warned of all-out action against any rebel ships. The rebel radio claimed that the aircraft carrier Independence, still 22 jets, was speeding toward the capital with supporting ships.

A rebel radio at Bahia Blanca denied reports in Buenos Aires that the forces rebelling against President Juan Peron were in retreat. These reports had said the rebels were fleeing to the south.

Rebel forces moved out of the capital Tuesday night after a day of fighting in the city.

The air force chief, Brig. Carlos Arana, said his planes would go to the day. They also abandoned key points taken earlier in the day at La Plata, 33 miles south of Buenos Aires.

Rebel forces moved out of the capital Tuesday night after a day of fighting in the city.

The air force chief, Brig. Carlos Arana, said his planes would go to the day. They also abandoned key points taken earlier in the day at La Plata, 33 miles south of Buenos Aires.

Necessary, Says Price

AUSTIN (AP)—The House began consideration of a congressional redistricting bill today which the sponsor said is necessary to head off federal intervention.

Rep. Rayford Price of Frankston, the sponsor, said, "In Texas we have one of the largest and the smallest congressional districts in the United States side by side."

"This bill is an important piece of legislation. Those districts leave us wide open to the federal courts coming in and taking over redistricting of the state."

Earlier the House passed to the governor a measure to raise automobile speed limits to 70 miles per hour and limit the use of radar hours.

However, Rep. James Cotton of Weatherford began a move to kill the bill for reconsideration.

His motion was still pending when the congressional redistricting bill came up for consideration.

The House also passed and sent to the Senate a bill to permit the state to purchase space in federal water storage facilities.

The Senate, scheduled to consider House bills, had on its calendar an omnibus bill to raise the price of Texas sulphur from \$1.40 per long ton to \$1.60. Supporters said this will even the Texas tax with that of competitor Louisiana.

Also on the Senate calendar was a House-passed measure to merge the State Parks Board and the Texas Game and Fish Commission.

The new agency, to be called the Parks and Wildlife Commission, is backed by Gov. John Connally as an economy measure.

As approved by the House Redistricting Committee, the Price bill gives Dallas County a second congressman.

Rep. Wright Patman of Texas and Ray Roberts of McKinney in the same district would be ousted.

Gives South Texas a new district running from Central, Goliad, and Gonzales counties southwest to the Rio Grande.

Adds to the West Texas district of Rep. O. C. Sawyer to make it larger than 23 others.

Keeps Fort and Midland counties in the same district with El Paso County to be the largest metropolitan district with 530,441 population in eight counties.

Extends Rep. Clint Stenerson's district into a narrow north-south area running from Ellis County to the north to Lavaca County in the south.

Cuts down the size of the district along the industrial Gulf Coast.

Could Rites Set Thursday

Funeral services will be held at 10 o'clock Thursday for Claudia Laid Gould, 61, who died last night of a heart attack.

Mr. Gould died at Cogdell Hospital at 1:45 p.m. Tuesday. Born Aug. 26, 1901, in Good, Ark., he had been a resident of Snyder County since 1949. Prior to his retirement Mr. Gould had been employed by Scurry County. He was a member of the Northside Baptist Church of which Mr. Gould was a member. The Rev. Jack Dean will officiate. Burial will be in Snyder Cemetery under the direction of Bell Funeral Home.

Mrs. Gould died unexpectedly Dec. 11, 1962, while visiting Mr. Gould who was hospitalized at Cogdell Hospital at the time.

He is survived by his mother, Mrs. J. H. Gould of Plant City, Fla.; a daughter, Mrs. J. M. Burns of San Luis Obispo, Cal.; three sons, John Clark Gould, Jr., and David Allen Gould, both of Snyder, two sisters, Mrs. J. M. Murphy of Chickering, Ark. and Mrs. Helen Young, of Plant City, Fla.; one brother, Troy E. Gould of Plant City and seven grandchildren.

Palbearers will be Deacy Meyers, Hardy Gaffney, Buddy Whittemore, Richard Lewis, Kenneth Gentry, Bob Haskell, J. C. Vinson and F. B. Massingill.

Probe Of Coed's Slaying In Arizona Spreads To Texas

PHOENIX (AP)—Sheriff J. B. Kline ordered laboratory tests today on blood taken from the slaying of a Phoenix slaying.

One of the prisoners is Ronald St. John, a fugitive from an Arizona mental hospital. The other is Ralph Casey, 27, a former employee of the Phoenix institution who admitted helping his companion escape.

Acting on a tip from Phoenix authorities, Goliad, officials seized the pair Tuesday in a house trailer at a fishing camp near here.

"Sheriff's officers said there were spots of blood on the shirt and shorts of St. John. A pair of jeans trousers, showing a large amount of freshly laundered clothing in the men's luggage, appeared to bear a similar stain, deputies said."

Kline asked St. John if he killed Jane Langford, 24, a Texas Christian University coed, whose body was found March 23 in an abandoned house near Phoenix.

The sheriff's men, St. John and Casey, were being questioned by Sheriff Burton Fleming said a Dallas man, 35, was being questioned about the Phoenix slaying.

He reported that a woman, blood took the man into custody at the international airport Tuesday as a suspect, sought for deportation in Arizona, Ark. and Illinois.

Fleming said a woman's white blouse which had been torn and stained was found in a motel room occupied by the Dallas man and two women, who had been riding with him. He refused to name the man in custody.

The prisoner at first denied he had been in Phoenix. Fleming said he had admitted being in the Arizona city recently after officials found a pack of matches bearing the name of a Phoenix "form in his car. Fleming said FBI agents said that St. John's mother, Mrs. St. John, was the daughter of Judge Dick Langford of Texas and that she had been in Phoenix.

St. John then claimed the blood spattered on his clothing as he was cutting a book from a fish sweater on a night ago.

Kline said Casey was asked where St. John got blood on the clothing and Casey asked if it was someone's shorts. Told that it was Casey then told the shorts were his own and he had cut himself accidentally. The sheriff said.

Senate Defeats Lower Amendment

WASHINGTON (AP)—The Senate today defeated 56 to 41 a states' rights amendment to the \$600-million mass transit "authorization bill."

The amendment by Sen. John G. Tower, R-Tex., would have provided that any arrangement worked out by the administrator of the Interstate Commerce Commission for the purchase of new rail cars by states would have to be consistent with state and local laws.

WEDDING DATE SET—Mr. and Mrs. Paul B. Hayes, 2115 Thirty-fifth Street announce the engagement and approaching marriage of their daughter, Barbara, to Ronald Brewer, son of Mr. and Mrs. E. L. Brewer, 2704 Thirty-fourth Street. The wedding date has been set for April 11. (Photo by Craft Studio)

TALENT COMMITTEE—One of the most difficult jobs in a stage production is getting the right talent and enough of it to put on such a show as will be seen Friday and Saturday nights in the High School auditorium, when "The Follies of 1963" will be presented. Some of the ladies not only recruited the large cast but are participating in it themselves. A great job has been done by the four ladies above. From left, Martha Hartley, Marianne Robertson, Helen Dillaha and Billie Brice.

If your kitchen counter space is limited and you like to bake, get in the habit of measuring and sifting dry ingredients as the first step in your baking. Then you can put away the containers holding the dry ingredients and have free counter space for the rest of the procedure.

No Nagging Backache Means a Good Night's Sleep

Nagging backache, headache, or muscular aches and pains may come on with over-exertion, emotional upsets or day to day stress and strain. And folks who eat and drink unwisely sometimes suffer mild bladder irritation...with that restless, uncomfortable feeling.

If you are miserable and want to be rid of these discomforts, Don's Pills of ten help by their pain-relieving action, by their soothing effect to ease bladder irritation, and by their mild diuretic action through the kidneys—tending to increase the output of the 15 miles of kidney tubes.

So if nagging backache makes you feel dragged-out, miserable, with restless, sleepless nights, don't wait, try Don's Pills, get the same happy relief millions have enjoyed for over 60 years. For convenience, ask for the large size. Get Don's Pills today!

EXPECTING?

Are you one of the fortunate ones who is expecting? Or do you know someone who is — possibly your best friend, daughter, granddaughter? You'll be thrilled to know about the complete maternity department at Rogers, Inc., where you can shop leisurely for yourself or for that just-right gift.

A lot of how you feel depends on how you look. We all recognize that there is a definite connection. That's the reason that our fashion buyer of maternity wear has gone to all lengths to bring you fabulous good looks combined with exquisite comfort...and she usually needs look no further than the famous master designer, Mr. Phil Jacobs. (as you probably know he is the foremost designer and producer of fashionable maternity wear in America today.) His designing includes a wonderful group of distinctive sportswear, including pedal pushers and slacks.

"Marion Sue" offers a complete line of "so soft" lingerie combining comfort features with a charming feminine daintiness. You'll also find the famous Beaufort nursing and maternity bras! They're all at Rogers, Inc., on the west side of the square. Adv.

SATURDAY

Zeta Lambda Chapter and Delta Psi Chapter of Delta Kappa Gamma birthday luncheon, 12:30 at Civic House, Colorado City.

Is Life Of Heiress Tough?

JOHANNESBURG, South Africa — It's tough when you're the daughter of a millionaire these days.

That's the impression given by 19-year-old Mary Oppenheimer, daughter of South Africa's diamond and gold mining magnate.

While aspiring to become a writer, Mary is at the moment learning her father's business the hard way. She is spending several months in each department of the Johannesburg headquarters of her father's multi-million dollar empire.

Working the regulation 9 to 5 shift, she is at present training in the accounts and bookkeeping department of one of Harry Oppenheimer's major mining companies.

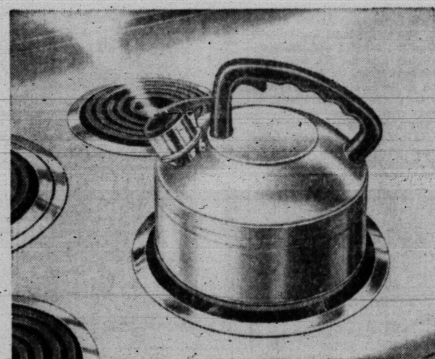

As a trainee Mary earns \$140 a month, learning the complicated routine of handling accounts worth many thousands of dollars. Mary, who recently returned from Paris where she studied French civilization, is still unacquainted and is considered South Africa's most eligible young woman.

Although her trainee program leaves little time for pleasure she manages a morning swim and a little riding before setting off for the office together with thousands of other weekly wage earners.

Women who cook electrically know...

Electric cooking is FAST because it's flameless

Today's electric ranges start heating instantly, reach cooking heat in seconds. Flameless electric surface units put heat directly into the pans, not into the room, so practically all the heat goes into the food being cooked. That is why electric cooking is fast.

The flameless electric oven reaches baking or roasting temperature quickly. Since it is insulated all around, including the bottom, heat stays inside where it belongs. And because electric heat is instant, the broiler requires no preheating. This means your meals can be cooked in a minimum of time.

Electric cooking also is clean, cool, accurate and economical. Select your flameless electric range at your dealer's now and enjoy all these benefits. Electric cooking is one of the nicest things about living better...electrically!

Parkinson Inspires Robb To Develop A Law Of Her Own

BY INEZ ROBB

There isn't a legislator in the English-speaking world who gets as many laws on the books as C. Northcote Parkinson, the British writer and economist.

To his first two laws, "work expands to fill the time available" and "Expenditures rise to meet income," Parkinson has just added a third, equally profound. This time, Parkinson has tackled language and such crooked, pinky circumlocutions as "comin' control officer" for dispatcher, "utensil maintenance man" for dishwasher, and "custodial manager" for janitor.

"The printed word expands to fill the space available for it," Parkinson's Third Law, aimed at windy and ornate substitutes for blunt, serviceable terms, "Mortimer," for underling in my bet-nor, followed by "passed on" or "passed over" for died.

I have no quarrel with Parkinson's Third Law, for it sets me off on a train of thought that has resulted in a wholly new statute, to be known as Robb's Law, to wit: "Language expands to fill man's expanding horizon." That is, language expands to explain man's constantly changing and rapidly growing world. In fact, this is a corollary of Robb's Law.

In the 20th Century language has probably expanded at a rate unprecedented in history. This late 19th Century development

expansion is the necessary chain reaction to a revolutionary century in which change is the only constant.

Innumerable new vocabularies have been added to the language by man's perfection of such 20th Century accomplishments as the automobile, radio, airplane, television, radar, electronic brains and automation. Even our immediate ancestors could scarcely have made sense of such commonplace expressions as "Get a horse!" "We're not tuned to the same station." "The countdown started an hour ago." "He's revving up his motors" or "She's been in orbit ever since she met him."

One of the most interesting and widely used new vocabularies was born simultaneously with the split stem less than a quarter of a century ago.

One of the most picturesque of the new vocabularies, a dialect familiar even to the kindergarten, was born 10 years ago with the space age. We now "blast off" instead of leaving or departing. The beatniks and Jack-wits, "Language expands, to fill man's expanding horizon." That is, language expands to explain man's constantly changing and rapidly growing world. In fact, this is a corollary of Robb's Law.

In the 20th Century language has probably expanded at a rate unprecedented in history. This late 19th Century development

that literally left its pad and went into orbit in this century. That is the language of psychoanalysis. The Freudian concept "all but developed a language of its own."

Everyone, even the savage in the jungle, has been in analysis at some time or another, and whether he understands it or not, the individual who used to have a "screw loose" now, more fashionably, "carries his couch with him."

If Sigmund Freud bequeathed a new language to the world, so did one of his contemporaries, Albert Einstein. But the Einstein root has been absorbed in the atomic and now in the space vocabulary.

Language constantly expands and enriches. Even diplomacy has a brand new language, that of the 20-20 eyeball and bit-nessman. Language is a precision tool, but one of its continuing characteristics is elasticity. It is as vivid, exciting, picturesque, detailed and explicit as the world man constantly expands. It is one of the miracles of language that it must explain to man what he hath wrought in the first place.

What Robb's Law boils down to is a language grows with need, speed and persistence to fulfill the demand for it. It may need condensation, as Parkinson says, "Language expands to fill man's expanding horizon." But that is the ballooning of language rather than true expression.

When language ceases to expand, it will only be a matter of time until it, man and his world are dead.

Great Novel Faces Yet Another Delay

By HAL BOYLE

NEW YORK (AP)—The sad news for the literary world today is that there has been another delay in the creation of the great American novel.

The fact is—it's been interrupted again.

Some 50 years or so ago this century was assailed the next came up against two dire jacks.

"What this country needs is a good five-cent cigar," said an all-but-forgotten U.S. vice president.

"What America needs is a great American novel to give it world cultural status," said many intellectuals of that distant time.

Well, any young fellow in his right mind knew it was an economic impossibility ever to make a good five-cent cigar.

So the eager beavers of half a century ago assailed the next possibility—the writing of the great American novel.

Actually I didn't set out to achieve this goal until about 40 years ago, but I have been hot on the trail ever since.

My difficulty has been finding a place to write. I feel that to write the great American novel you need a room of your own.

Early in my married life I confessed to my wife that my great aim in life was to write the great American novel, and she went right out and bought me a \$5 dictionary to help the work along.

Every half-hour or so for years after that she would inquire solemnly, "How about that great American novel? When are you going to finish it?"

"Finish it, woman?" I always replied. "How can I ever begin it until I get a room of my own?"

Well, about 10 years ago we finally moved into an apartment large enough for me to have a room of my own. Then our daughter arrived.

The other day, after a decade of pacing back and forth and sharpening my pencils I sat down at my typewriter to write the opening sentence. My daughter opened the door of my sanctum sanctorum, and said:

"Daddy, I'm a big girl now, and I have to have a room of my own."

I sighed, closed my typewriter, and moved out.

But, looking ahead, I estimate my daughter will be grown up and married in another dozen years, and then I can move back again into that room of my own again.

After that, I figure the creation of the great American novel will be simply a matter of time.

There's no real problem to anything—once you firmly make up your mind to do it. In this world there is no substitute for victory.

Junior Editors Quiz on COUNTIES

QUESTION: Why is a state divided into counties?

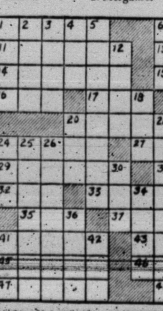

ANSWER: In order to bring government and various services down to the local level where they can affect each one of us. Certain cities govern themselves. Some, like New York and San Francisco, are controlled by a combination of county and city governments, but generally the county governs a separate area. Each state decides how its county system works, and this is generally written into the state constitution. Our illustration shows some of the important ways a county helps and protects its citizens. The county seat is usually an important town. Here, county affairs are handled by a board of county commissioners or supervisors. There are usually three or five of them though sometimes as many as 30, who serve four years. They can impose taxes, appropriate and borrow money for county use. Frequently they have licensing and zoning powers. They appoint various county officers and employees. County officers elected by the people include the sheriff, treasurer, clerk, coroner, tax assessor, superintendent of schools, engineer and recorder of deeds. Other services are provided by the county agent, who advises farmers; the home agent, who helps solve home and family problems, and social welfare workers who aid the needy.

FOR YOU TO DO: Keep an eye open as you read your local newspaper for mention of your county government. See if you can find out different ways in which it works.

(Baron Murray of Cambridgeshire, Mo., wins the weekly grand prize of a set of Britannica Junior Encyclopedia for this question. Mail yours on a postcard to Junior Editors in care of this newspaper and you may win a set too, or the daily prize of \$10.)

WHAT IS POOLING?

In spite of all the jokes about "oil-rich Texans," most Texans aren't rich. Relatively few of them have even one oil well.

All Texans have a stake in the oil business, however, because it makes jobs, puts money into circulation, and pays taxes.

Texas oil operators have to compete with those in other states and foreign countries. This competition is tough and growing tougher. Improvements in production methods for greater efficiency are necessary in Texas. It is a question as to whether Texans prefer to do this job themselves or let the federal government do it.

Many of the most responsible people in the oil industry believe the Texas Legislature can solve some of the most troublesome problems by passing House Bill 510, an oil and gas pooling bill. "Pooling" in oil field language simply means putting separately-owned pieces of acreage together, sharing costs of drilling a well, and splitting any income proportionately.

A fair pooling law would create drilling blocks of uniform and proper size (according to the spacing pattern of the field). It would help the industry to cut down on unnecessary development drilling and thus free capital for more "wildcat" drilling. It would provide a legal way for landowners to divide their minerals in proportion to their holdings.

An outcry has been raised against House Bill 510 by the professional "small-tract drillers" who for many years have enjoyed the legal sanction to produce oil and gas which rightfully belonged to someone else. Advocates of pooling do NOT think that property rights should be confused with the "right" to take another man's property—or that free enterprise should cover the FREE CONFISCATION of another's oil and gas.

Contrary to claims of persons who, for reasons of their own want to retain the outmoded methods of the past, House Bill 510 does NOT tie up large blocks of acreage with one well; it does not affect any wells already drilled or reservoirs already developed; it does not take away the landowner's bargaining power or change the terms of any lease except to the extent necessary to form a drilling block. House Bill 510 would merely give all landowners an opportunity to have their properties developed when some owners cannot be located or one owner seeks to obtain an unfair advantage. The rights of all would be EQUALLY protected.

Ask your Senator and Representative at Austin to support House Bill 510—so Texas, too, will have a reasonable and legal way to assure each landowner his FAIR SHARE.

(For further information write Committee for Equitable Development of Texas Oil & Gas Resources, 341 Mellic Esperson Building, Houston 2.)

Tigers Scalp Indians

SEMINOLE — Dalton Walton, a senior right-handed chucker, received credit for his second victory of the year here Tuesday as he buried his Snyder Tiger teammates to a 7-5 conquest over the District 3-AAA defending champion Seminole Indians.

Walton tossed the first four frames—helping his own cause with a bases-empty roundtripper to left in the first—before stepping down in favor of Raymond Matthews. Matthews was hit on the throwing arm by a pitched ball to lead off the seventh, so that Walton was re-inserted on the mound to finish out the contest.

The Tigers increased their lead to 6-0 going into the bottom of the third before the Indians were able to break the scoring line. Sparking the three-run second uprising were a pair of doubles by catcher

O'Toole Stretches Scoreless String

By MIKE RATHER
Associated Press Sports Writer

Jim O'Toole is no mopey leaver, but with a little assist from a left-hander, the cocky Cincinnati left-hander has been pulling goose eggs out of a hat.

O'Toole stretched his string of scoreless innings to 22 Tuesday, holding the Chicago White Sox to two singles in an eight-inning prep for his opening '44 pitching assignment as the Reds posted a 7-0 victory in an exhibition game at Tampa.

And O'Toole, who publicly stated he was out to get next Monday's opening day assignment and

three innings for the Tribe, was the loser. Bobby Wicker came on in relief and allowed the Tigers just one run during his four-frame mound job, as Matthews came around to score in the seventh after being hit by the pitched pellet.

Walton whiffed three and walked two during his five-inning tour of duty. Matthews, in his two-frame stint, struck out one and walked none. Seven Tiger fielding bobbles hampered the team effort considerably, however. The one run relinquished by Matthews was a unearned, while one of those charged against Walton was also of the unearned variety.

The victory gave Walton, who has won both of the Tiger games to date, a record of 2-0 on the eve of Friday's district opener. At that time, the Bengals will be hosting Colorado City at Towns Park beginning at 4 p.m.

In other Tuesday action, Colorado City opened defense of its 3-AAA title on a sour note at home, falling to Lamesa, 5-3, while Brownfield had little trouble stalling out Sweetwater in the other opener of the day, 15-1.

District 81-B Meet Set Here

Loraine Bulldogs will launch defense of their District 81-B track and field title here Thursday and Friday on the Tiger Stadium oval.

The Bulldogs copped the championship last year by amassing 152 points. Hermleigh was second with 104, followed by Westbrook (94), Lufkin (65), Hobbs (52), and Fluvanna (21).

Ira reigned supreme in the freshman division of competition. The upcoming meet competition will be on three levels—varsity, school, freshman and grade school. The top two finishers in each high school event earn the right to compete in the regional meet of April 20 in Odessa.

Preliminary events are tentatively scheduled to begin at 9:15 a.m. Thursday, with the final event of the morning set for approximately 11:30. Several finals are on tap for Thursday morning, also, including the high school pole vault and discus and the freshman and grade school high jump, broad jump and shot put.

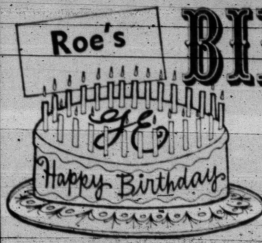

The bulk of the final events are to be reeled off Friday afternoon beginning at 12:30, however. For more high school standards were written into the book last year during the annual meet, and a similar run on the existing records could very well be the case this week. The marks as they stand now are as follows:
