

On The BEAM

By J. W. King, Sr.

We are all having a lot of fun now trying to work the combination on our new boxes at the post office. There's a bright spot in all the difficulties of working the combination—a prowl or a meddlesome kid will not likely open the boxes and take out the mail.

By the way, our post office is real nice, one of the nicest in this part of the country and we are all proud of it. Even the Postmaster and his helpers are nice and helpful. If they hadn't been helpful a lot of people would not have learned to open their new box.

The weather has looked dreary the past few days, a hindrance to the gathering of the crops, but a blessing for the future. It is the kind of weather we need in the fall during the past few years.

Besides putting a good season in the ground for next spring the moisture is very beneficial to small grain and pastures.

Dangerous Season Is Here For Driving

Col. Homer Garrison, Jr., director of the Texas Department of Public Safety, issued a warning to Texas motorists today stating that "the dangerous season for week-end driving is here."

Saturdays and Sundays for the remainder of the year, he said, will be extra hazardous on the streets and highways of Texas.

Upon reviewing information compiled by N. K. Woerner, Statistical Services section of the department, Garrison said that from all indications 45 per cent of the forthcoming traffic accidents this year will occur on the 18 remaining Saturdays and Sundays in November and December. He said the other 55 per cent of traffic deaths will occur on the remaining 43 week days.

"Weekend days are more than twice as fatal for motorists this time of year as mid-week days. This is due to the increasing hours of darkness coupled with high week-end travel. Therefore I urge all of our citizens to devote extra attention to their driving."

He added that "common-sense judgment on the part of Texas drivers and strict adherence to our traffic laws are the best protection against traffic accidents." Woerner's statistical report predicted that 32 persons will die during the three-day Veteran's Day holiday between 12:01 a. m. Saturday Nov. 9 and mid-night Monday. Veteran's Day last year was on Sunday when 15 persons died in traffic accidents; 19 persons suffered fatal injuries the previous Saturday.

More persons were killed in Texas traffic accidents Nov. 24, 1956 than on any other day of that year. On that day 29 persons were killed in 16 fatal accidents. There were only five days in the entire year when no traffic deaths were recorded and the average daily death count was seven persons.

The state police director said football traffic and holiday driving, coupled with longer periods of darkness and bad weather were contributing factors to the increasing fatality toll.

"In this," he said, "Texas drivers should improve their alertness in driving and follow our traffic laws to the letter. The driver who is in the right, has every reason to expect other motorists are following the same rules-of-order for traffic. A person who violates one of these driving rules is creating a situation that will result in a traffic accident."

Mr. and Mrs. Gray Taylor of Falls spent Thursday night with Mr. and Mrs. Dexter Taylor and Mrs. A. C. Taylor returned to Falls with them Friday for a visit.

Wet weather has also stopped the harvest of maize which is about half completed.

Maize is at a critical stage right now. Following the early freeze the stalks will soon be falling over which will make harvesting difficult if not impossible. The number of cars shipped out of here from now on will depend on the weather.

Coon and Pratt, grain buyers, reported Tuesday they had shipped out between 50 and 55 cars of maize.

Bulldogs Lose A Heart Breaker

The Loraine Bulldogs won and lost a football game last Friday night, a heart breaking experience for both the fans and the players.

Rankin plunged over for the touchdown that would have won the game but fumbled the ball and the referee ruled that a Hermleigh player recovered it, a point that was disputed by some Loraine players and fans—but the decision stood.

Loraine scored first when Gary Parnell broke into the open and raced 63 yards for a touchdown. Don Templeton carried the ball over for the extra point.

Hermleigh came back in the second quarter to score on a 25 yard pass but failed to make the extra point. The score at the end of the half was 7-6.

Hermleigh scored again in the third quarter from 2 yards out after a sustained drive.

Loraine's final touchdown that didn't count but would have won the game, came in the fourth quarter after driving from midfield.

Both teams were even on first downs, 7 each. Loraine threw 4 passes and had one intercepted. Hermleigh threw 11, and completed 4. Loraine punted 4 times and Hermleigh 6.

The Bulldogs also got close to a score on another occasion in the first quarter when they penetrated to Hermleigh's 10.

This Friday night the Bulldogs go to Robert Lee for the final game of the season.

Cotton Ginning Delayed by Weather

Gathering of the big cotton crop is progressing slowly because of periodic wet weather and the lateness of the crop in opening.

Tuesday of this week the gins reported they had processed 2244 bales. The crop is estimated to be about 20 per cent gathered.

Mahon Disturbed Over Cotton Plan

Rep. George Mahon of the 15th District said this week he was "greatly disturbed" over a proposal to change the method of determining cotton allotments in Texas which is now pending before officials of the Department of Agriculture.

Mahon said in a statement from California, where he is currently on an emergency inspection tour of the nation's missile program, "I have wired officials in Washington and Texas once again, arguing that the whole matter be carefully reviewed and that the history basis of allotment be followed. This would give West Texas its equitable share of cotton acreage allotments to the state."

Mahon explained the history basis, if followed by the State A.S.C. Committee, would be helpful to West Texas by reason of the fact many East Texas farmers have not been planting their cotton acreage allotments.

"I had asked Washington officials to hold the acreage reserve figure for the 1958 crop year to 2 per cent and under no circumstances to allow it to be more than 3 per cent," Mahon said. The pending proposal would provide for a reserve of about 7 per cent and would "freeze" each county's 1958 cotton allotment at not less than 98 1/2 per cent of the 1957 allotment.

"I shall continue to keep in close touch with the situation," Mahon said, "and I will do everything in my power to prevent West Texas cotton farmers from being saddled with such an unfair distribution of allotments for the 1958 crop. I would like to urge West Texas farmers and farm organizations to continue to make their views known to USDA officials, and I would be pleased to have the benefit of their views and suggestions at any time," Mahon added.

The West Texas Congressman is in the midst of a nationwide tour designed to iron out difficulties in the lagging US missile program and keep the country abreast of Russian scientific developments. Highlights of the tour will be a meeting Nov. 20 at the Pentagon in Washington with Defense Secretary McElroy and others.

**BOLDEST ADVANCE IN 50 YEARS!****THE GOLDEN JUBILEE CAR!**

It's a revolution on wheels—boldly planned from the very beginning as a Golden Anniversary showpiece for Pontiac and General Motors.

This one you really must see—here is a car unlike any you have ever known! This Golden Jubilee Pontiac is actually an all-new breed of cars—in four brilliant series and 16 sleek models covering virtually every price bracket.

In all of them you'll find engineering advances so daringly different yet so basically sound that they will trigger the next big change in automobile design. You'll find a few of these ideas illustrated here, but even they can't begin to tell the full story.

Why not be among the first to discover the newest. When you meet this bold new Pontiac, you're in for a driving thrill that is impossible to duplicate in cars of conventional design. So make it a point to see your Pontiac dealer soon and prove to yourself that no car in history ever left yesterday so far behind!

**Ever-Level Air Ride***

The most perfect suspension system ever designed—and Pontiac's revolutionary Aero-Frame is specifically designed for it! Air cushions on all four wheels literally float you over the bumps . . . keep the car perfectly level regardless of load or road!

*An extra-cost option.

Aero-Frame STABILITY

Here is the biggest basic construction change since the early days of motoring. Pontiac's revolutionary new frame design is lighter, stronger, more stable than the conventional box type used on other cars.

**Quadra-Poise ROADABILITY**

Only the wheels know where the bumps are! Pontiac's new suspension geometry ends dive, sway and bounce to bring you the smoothest ride, easiest handling you've ever known!

Circles-of-Steel SAFETY

Pontiac's completely new body construction surrounds you with girder steel protection—above, below, fore and aft. Now you can drive with wonderful new peace of mind!

Tempest 395- PERFORMANCE

Try Pontiac's new jewel-action response! Scores of exclusive engineering innovations make Pontiac's hefty power plant a miracle of smoothness . . . and you can choose from four horsepower ratings including Tri-Power Carburetion* and Fuel Injection*.

ATTEND CONVENTION

Rev. Bobby Rine, pastor, and J. C. Wells, president of the local Brotherhood of the First Baptist Church, were in Fort Worth Tuesday to attend the State Convention. The Brotherhood session was held Tuesday. Others had planned to attend the convention but because of illness and other hindrances were unable to go.

They heard the Rev. Sterling Price, pastor University Church, Abilene, Gov. Price Daniel and Baker James Cauthen, Foreign Mission Secretary.

Mr. and Mrs. W. J. West spent Thursday with their daughter and family, Mr. and Mrs. Leon Duke, in Rotan.

There is no guessing when you read it in the paper. If you fail to get the meaning the first time, you can read it again.

Odd Shapes Rise In Nevada Desert

The Nevada desert, site of many an abandoned settlement, has sired a 20th century "ghost town."

No one lives there. And yet it is a town of the present and future—complete with modern underground parking garages without cars, huge doors leading to nowhere, and futuristic domes emerging from a landscape almost as barren as the moon.

This is "Survival Town"—a community dedicated to its own destruction as a test site for atomic blast effects on various shelter-type structures.

Constructed by the Federal Civil Defense Administration in cooperation with the Atomic Energy Commission and other private and public agencies, "Survival Town" includes underground home shelters and large urban shelters, new dome-type shelters being considered because they are easily built and cost relatively little, a small, blast-resistant "school" building, various types of doors and valves to close shelter openings against a nuclear blast wave, and even a complete bank vault.
