I want to take this opportunity of thanking the people for the large vote that they gave me last November. Representing the people of this district at the special session of the Legislature in February of this year, the most impressive thing to me about it was the importance of the Legislature to our people.

\$10,562 Is Average Income Of County FHA Farm Borrowers

FHA Records Show 13 Families Ahead On Land Payments Net Worth Of Farms Increasing Under Improved Methods

Total income for thirteen farm ownership borrowers families in Lamb County who are aided by the Farmers Home Administration loan program was \$137,308 last year, according to reports made following the annual farm ownership borrowers meeting held Wednesday in the Veterans Vocational School in Littlefield.

The average income per family was \$10,562, Truman Jones, FHA supervisor, said. Net worth increase of farms cultivated by the thirteen F. O. families amounted to \$35,462, with an average of \$2,728 per family.

The families are ahead of schedule on land payments in the total amount of \$23,721, or an average of \$1,821 per family.

Better Methods
The group has decided that since cotton acreage allotments have been cut, they will attempt to produce just as much cotton from fewer acres by using better farming methods.

They resolved to be better prepared for insect control than they have been in past years, and decided that if and when they can find the proper legume crop for this area they will plant a good percentage of the cultivated acres annually in legume crops for soil-building purposes.

Loan Program
Purpose of the F.H.A. program is to help the class of farmers who are unable to get adequate credit from any other source. Several types of loans including water facility loans, irrigation loans, farm loans, production and subsistence loans and farm housing loans, are included in the program. Gov. Shivers Gives His Approval To Canadian River Water Project

The big Canadian River water project has been given new state approval.

Governor Shivers recommended favorable consideration, concurring in the original indorsement given last July 6 by the late Governor Jester.

Shivers' approval was voiced in a letter dated March 18, to Michael W. Straus, commissioner of the U. S. Bureau of Reclamation.

Shivers said the report of the Bureau of Reclamation, presented for his study, "appropriately presents the water problems of the Panhandle-High Plains area of Texas."

Only Surface Source.
"The water of the Canadian River is the only surface water available as a future supplemental supply to the present underground water now supplying the entire

High Plains area," Shivers said. "It is apparent that there is water supply on the High Plains for the purpose mentioned in the report and also that a potential flood condition exists along the river."

"It is my understanding that the impounding of water in the Canadian River reservoir at the contemplated site would not be determined to prior appropriators on the stream below the dam site."

Vital to Area
"Local interests have advised that a project of the nature proposed in the report is vital to the economic life of the High Plains area, and that they are willing to pay reimbursable costs of construction, along with the related cost of operation and maintenance. "It is understood that when the

session, which was marked by a full attendance.

Commissioners instructed City Secretary W. G. Street and Engineer Ralph Douglas to revise the sewer and water works ordinance, working out a suggested form to submit to the commission at their meeting.

Make Two Provisions
Two provisions made by the commissioners Wednesday will be incorporated into the revised sewer water ordinance, and will take effect immediately.

In the future not more than one house of any kind will be permitted on one water or sewer connection. Heretofore, as many as six houses have been hooked up to one connection. In addition, a private cut-off will be required for each building before water will be turned on.

To Lay Sewer Line
Commissioners instructed the engineer to lay a sewer line north of the railroad to serve oil mill property, and ultimately to serve all property north of the railroad. The project will cost about \$1800, and will start within two or three weeks.

The order to remove the word "holiday" from parking meters is expected to eliminate confusion by meter users. The original ordinance designated Christmas, Independence Day and Thanksgiving Day as holidays, but motorists report-

Ribbon Awards

Ribbon awards will be given according to market classifications as follows: blue rosette ribbons to boys with calves and swine in the first prize group, red ribbons to the choice class; and white ribbons to the good class.

Judging will be by Walter Rice and a Mr. Boswell, both of the Fort Worth stock yards. Rice will judge calves and Boswell, swine.

Keep Records

Boys were required to keep detailed records on all expenditures connected with the project, and must make the records available upon request of the show manager. A summary of records will be given to the show manager within 10 days after the trip to Fort Worth is completed.

"The commercial feeding project on which the show is based was planned by the Chamber of Commerce in the belief that the present practice of milk feeding show calves is not practical; that it gives the boys a distorted idea of the value of finished beef. The plan assumes that the best calves for show competition are not necessarily the best for commercial feed lot operations.

Cotton Acreage—

(Continued From Page One)
increase will be about 643,000 acres.

Provisions of the bill include:

1. Despite other provisions of the acreage allotment act, no individual farm quota allotment for 1950 shall be less than the larger of (A) 65 per cent of the average planted to cotton and war crops in 1946, 1947 and 1948, or (B) 45 per cent of the highest acreage planted in any one of the three years.

Allowance is made for the so-called war crops to protect those farmers who, at the request of the government, took some of their regular cotton acreage to plant other crops which the government especially wanted, it was explained.

2. No cotton allotment so increased thereby shall exceed 40 per cent of the total crop land in the farm.

3. Farmers may voluntarily surrender all or part of their allotments which they will not plant to cotton and the Agriculture department may re-allocate this unused acreage to other farmers needing it under the 65-45 proviso. No farmers thus surrendering any acreage will lose it on the record for any future computation of allotments.

me to this office it is with a full realization that whoever the people elect has the responsibility of making the laws that govern over 6,000,000 people of the state of Texas. These laws directly affect the daily lives of practically all of us and serious thought and consideration should be given to each and every law that is passed by the Legislature. It is my humble judgment that men who fill these places of responsibility and in whom we place our trust and confidence, should be experienced, honest, sincere and capable.

"All of us are interested in the progress and welfare of our

Representative District and of the State as a whole and we have a right to expect our fair share of those things for which our tax money is spent. These include educational assistance, police protection for our families, and property, assistance for our aged and needy people, a good system of state highways and more paved farm to market roads. All of these items of state governmental help make our district a better place in which to live and rear our families.

"Among the subjects which no doubt will be considered by our next Legislature is a program to pave more rural roads. We, in this district, are particularly interested in any such program. Another matter which we are vitally interested in and which will have to be closely watched by us because of its importance to us is the question of our underground water. The meeting held in Amarillo a few days ago is illustrative of the thinking of some people of our state.

"Having served as county judge of Hale County from 1933 to 1939, and district attorney for six counties of the eight counties in this district from 1942 to 1949, having practiced law in this district for twenty years, I believe that this experience should qualify me to represent the people of this district.

Dates Set For Jaycee Extension Week

ABILENE, MARCH 25—By proclamation of E. M. Kirkpatrick, Jr., Baytown, President of the Texas Junior Chamber of Commerce, the week of April 2-8 has been set aside as Texas Jaycee Extension Week. Kirkpatrick, in his proclamation, pointed out that the growth of the state organization is dependent on the present member organizations extending the tools of the Junior Chamber of Commerce to young men in communities where there are no Junior Chamber of Commerce organizations.

During this special week all member clubs of the state organization will devote their luncheons and weekly meetings exclusively to the field of extension by inviting guests from prospective Jaycee towns so that they can be given the basic fundamentals of the Junior Chamber of Commerce.

According to State Chairman Rayburn Bell there are at present 130 local organizations with a state membership of over 15,000 young men. Bell said that "Texas has extended 10 new clubs since July 1, 1949 and hopes that Texas will be the winner of the National Jaycee Extension Contest."
