### Loot Is Hauled Away in Truck

The Raymond Upton Grocery at South Plains was hard hit sometime Monday night when it was burglarized, the loot heavily loaded a pick-up used to haul it away, investigating officers of Floydada said.

Entrance in to the store was through a window, and the loot carried out through a side door.

The burglary was discovered by the owner Raymond Upton, when he opened for business Tuesday morning.

Lost as missing were a small amount of cash, 53 sport shirts, several pairs of ladies hose and anklets, 10 cartons of assorted cigarettes, the meat counter cleaned out, 100 pounds of potatoes, five 25 pound sacks of flour and four 10 pound sacks, one Admiral radio battery and electric combination, two wool blankets, three cases of jams and jellies and a variety of canned goods.

Deputy Ernest Huckabee said Tuesday the case was still under investigation. Assisting him at the scene of theft was E. H. Bolling, deputy from Lockney.

Mr. Upton who is also postmaster told officers that apparently the burglars had not disturbed the post office, located in the same building with the grocery.

Sheriff Walter Hollums and Ray Hardin of Lockney returned from Edinburg where they went to pick up two Latin-American boys, who were being held there after being apprehended in a stolen car.

The boys allegedly were driving a car that was reported stolen in Lockney on December 9. The two are now lodged in the local jail. Also a car stolen in Floydada January 5, has been returned to its owner, Charles H. Sigman, after it was located in McAllister, Oklahoma. The car was taken from in front of Davis Gin where Sigman was employed.

Sheriff Hollums said the car was stolen by another employee, Charles J. Gibson of Oklahoma, who is now in the McAllister jail on charges in Oklahoma. Gibson will be brought here later on the Floydada theft charge the sheriff said.

### Better Sign Up If You Plan To

If you plan to sign up for the cotton soil bank better do so right away, says Thos. L. Hutchins, office manager of the ASC.

The sign up was made available locally beginning Monday, and by Wednesday noon approximately \$100,000 in applications had been received. Apparently the offer of USDA to cotton farmers is attracting more than ordinary interest.

Hutchins said the reason for suggesting that the farmer who has in mind to sign up at all, to do so soon, is that the allocation of funds for the cotton soil bank is on a national basis and there is no way of knowing locally when the total will be taken up.

It is Hutchins' understanding the idea is catching on all over the south, including central and East Texas. However, the sign up period continues through March 7, and there is plenty of time if all the allotment fund is not taken up meanwhile.

### Auto License Plates Here

County Tax Assessor-Collector T. T. Hamilton announced that the new motor vehicle license plates have been received and that registration will begin on February 1. 1958 plates will have black background with white letters Hamilton said.

Floyd County passenger car plates will begin with number BH-1325, commercial plates IF-925 and farm plates with SD-1550.

A registration office will be opened at Lockney Auto Company on March 1, with Mrs. Austin Merriweather in charge, Hamilton said. She will issue plates with passenger number beginning BH-3900, commercial plates beginning IF-1575, and farm plates SD-2350.

There is something more important than any ultimate weapon. That is the ultimate position -- the position of total control over earth that lies somewhere out in space.

This is the future, the distant future, though not so distant as we have thought. Whoever gains that position gains control, total control, over the earth, for purposes of tyranny or the service of freedom.

The task is as tremendous as the challenge.

Americans are a "can do" people. We traditionally rise to our greatest heights of achievement when we are confronted with our most demanding challenge.

I have not the slightest doubt that we will do it this time.

Preparedness Committee, of which I am Chairman, we have learned this:

Control of space means control of the world, far more certainly, far more totally than any control that has ever been or could ever be achieved by weapons, or by troops of occupation.

From space, the masters of infinity would have the power to control the earth's weather, to cause drought and flood, to change the tide and raise the levels of the sea, to divert the gulf stream and change temperate climates to frigid.

The urgent race we are now in -- or which we must enter -- is not the race to perfect long-range ballistic missiles.

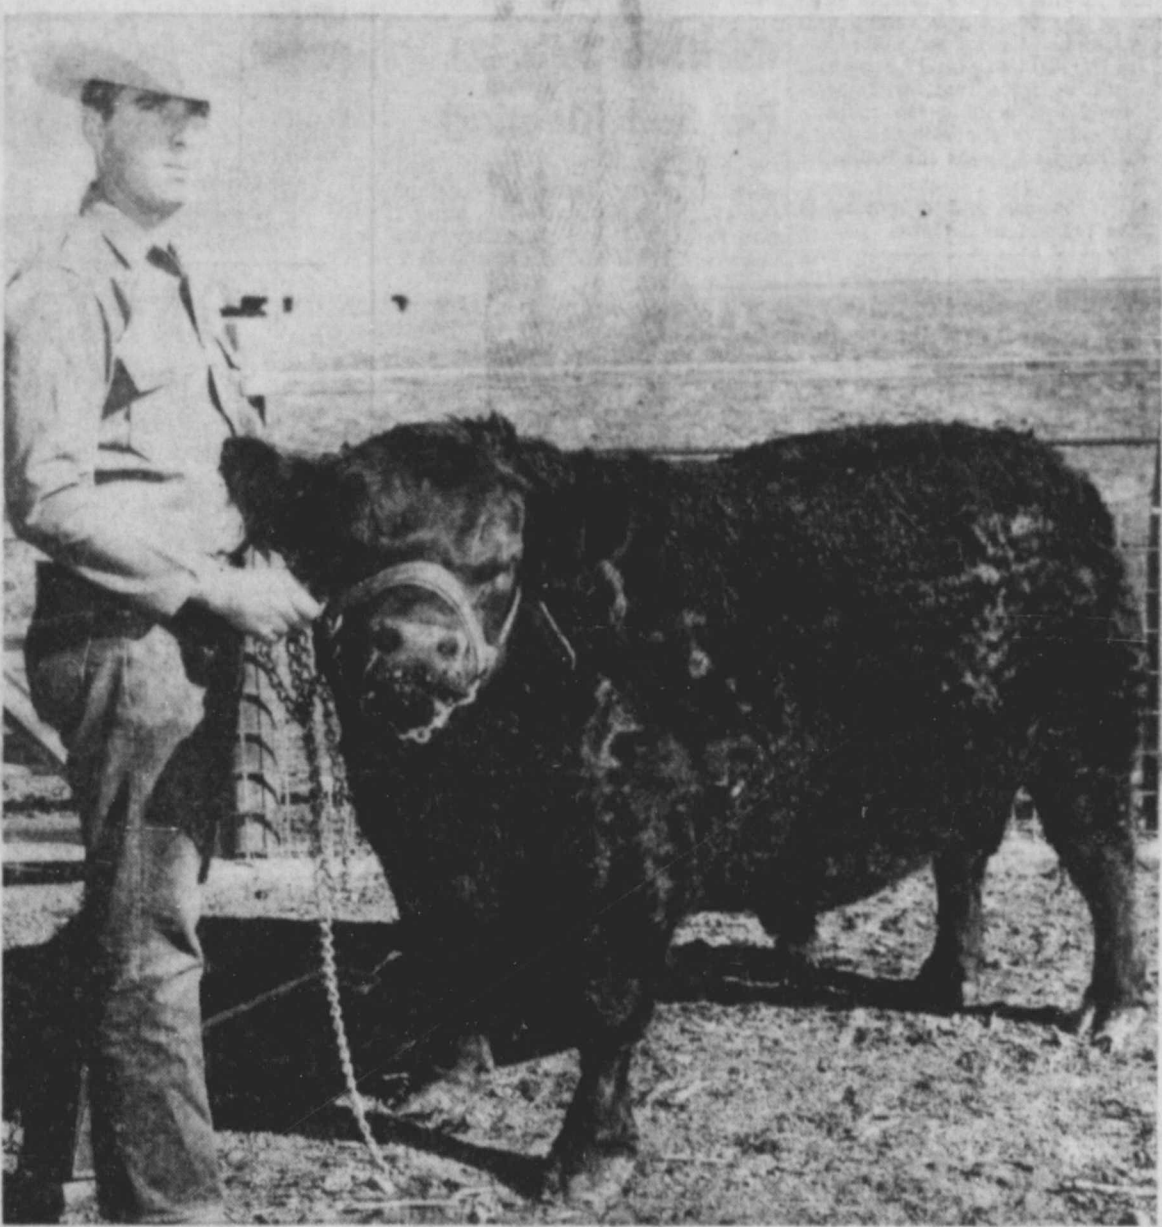

### Johnson Declares: Of Outer Space Means Control Of The World

enough so long as we lag behind the Russians in weapons development. We are behind at this time.

Our domestic economy is not strong enough so long as our farmers are caught in a tight economic squeeze -- so long as there are not enough jobs for people wanting work -- so long as small business enterprises continue to fail at an alarming rate -- so long as the cost of living keeps going up and the Administration's tight money, high interest rate policy places such a heavy burden on our people.

There is -- beyond our defense and economic needs -- a greater challenge.

### Normans Planning to Show At Amarillo And Fort Worth

Bill and Weims Norman who operate the Norman and Son Stock Farm at Dougherty have found their breeding stock much in demand in recent months. Bill Norman says that cattle men throughout the west are seeking stock that will put on a maximum amount of weight in a minimum amount of time.

Faced with a problem of furnishing herd sires to meet these demands the Normans have constantly been improving their herd and have met with some pleasing results.

At present the black Aberdeen Angus herd numbers 95 head and they are grooming several of their choice bulls to exhibit in the coming stock shows.

This week starting Saturday, January 18, the Normans will enter their Erica Lad the Twelfth in the senior yearling bull division at the

Amarillo show. Also to be shown there are Normans Master Prince and Black Bird's Best which will be entered in the junior bull calf division.

4-H and FFA boys at Spur and Post this year have five club steers from the Norman herd which are being fattened and will be shown at Dallas next year.

Since entering the registered Aberdeen Angus field in 1952 with 14 cows the Normans have had five well known herd sires. The first was Black Duke Kemp, then Prince Sunbeam 925 from Sunbeam farms at Miami, Okla., Home Place Ellemere 372 was from the J. C. Penney herd in Missouri, then Master Prince 2 Shahan from Brackettville, Tex.

Black Cap Marshall of Plainfax is the present sire and is owned jointly with Oscar Golden of Lockney.

At present the breeders are leaning toward the Earl Marshall strain which gives breeders the frame for rapid weight gains.

Stockmen here and elsewhere are concerned about their show animals looking good at the early shows because of a skin or mange-like condition causing loss of spots of hair. Veterinarians have been somewhat at a loss to explain this but most believe it comes from some types

of feed. The complaint is widespread, however, and many will face the same disadvantage in showing their prize animals.

The Norman herd has been doing well on native pasture and recently their diet was supplemented with some 40,000 pounds of rough earrots which did not meet marketing standards. The carrots have proven a very good cattle feed. The herd comes running when they see the truck.

At the first feeding of carrots the whole truck load was dumped by mistake and had the stockmen worried that an overdose might cause some ill effects, but on inspection the next morning all were doing fine and still looking for more carrots.

Wedding vows will be exchanged in the First Baptist Church in Shamrock on February 15. Miss Smith is a graduate of Clarendon High School and is presently employed with Traveler's Insurance Co. at Lubbock.

The prospective bridegroom graduated recently from Texas A&M and is associated with an oil firm at Houston.

Mrs. Frank Ballard and daughter, Mrs. Bobby Cannon and son of Paducah, were visitors Monday in the home of Mrs. Ballard's brother, Mr. and Mrs. C. C. Burns.

The other day we read a news story about a woman who left her spouse because he'd gone off the deep end over raising dahlias. He was announcing publicly that he'd give up dahlias entirely if she would only return.

January is such a good month to take inventory. Are we in a rut? Maybe it's not dahlias, but most of us can profit by checking the time leaks in our days.

At our house, for months, we've had a chronic complaint: No time to read; no time to stop and listen to our own lives. Lately we've been taking time. Without making any hard-and-fast resolutions, we've simply stopped doing some of the things that had become habitual.

We don't turn on the radio or television the minute we get out of the house after the day's work.

We avoid what had become our favorite pastime, making a fourth at bridge.

The results have been amazing. We've read several books and some good magazines. We've opened the impulse to visit an old friend, to call someone on the telephone whom we used to see often. We've taken a long drive in the country, answered letters, rearranged the order of our desk. We've even sat still and felt the heartbeat of our home.

With the liberation of so many hours from unthinking habits, we've begun living again.

We do not argue against dahlias, radio and television listening, or playing bridge. We simply say that a habit that's wagging us has gotta go. The freedom which we guard so jealously for our country does us little good if we become slaves to habits which shut our eyes to the joys of free choice.

## County Agent News Letter

To those of you who are planning on soil test, this is a good time of year to send your test in. You can beat the pre-planting rush and get your samples back sooner. Some reasons for using a soil test are:

You can plan your fertilizer program early. Fertilizer can be ordered early. It takes the guess work out of what your soil really needs, and in some cases fertilizer can be applied early.

The following tests are run on all samples: It measures the organic matter, phosphorus, potassium, soil reaction and soluble salts. From these tests recommendations can be made on the amounts of fertilizers your soil needs.

There are information sheets, soil boxes for mailing soil and details on how to take soil samples, available in the County Agent's Office.

The proper time to control diseases of peach trees with a spray program should begin now. For the control of San Jose scale and peach leaf curl the use of 6-6-100 Bordeaux mixture should be applied now while the tree is dormant.

For a further guide in controlling insects and disease of peaches contact the County Agent's Office.

Plans are now under way for holding the annual Soil Fertility Day in Lockney, Friday, February 21, 1938. A good program is being arranged.

A vegetable meeting will be held in Floydada, Friday January 31, for all interested people. All phases of production and marketing will be discussed.

Many farmers who are planning cotton in the acreage reserve program of the Soil Bank, might well use a summer legume for soil building on the soil bank land. Cowpeas, soybeans, sesbania and others can add several tons of green manure and nitrogen to the soil and could mean increased yields the following year.

Guar, cowpeas and others could provide benefit to dryland.

## Watson Says 1958 Should Be a Good Year in Floydada

Floydada Rotary Club yesterday began operating under a new and more modern set of by-laws. The new by-laws were adopted after study and revision during the past month.

O. M. Watson, Jr., manager of Floydada Chamber of Commerce, had the day's program. The year of 1957 was one of great accomplishment for the organization and 1958 is viewed by officials as a prospective year of accomplishments, also, he said. This despite the fact that 1957 was disappointing in a business way for people of the county.

Watson passed questionnaires among the members asking for activity suggestions for 1958 and there was round table discussion of various proposals. The same questionnaire is being mailed to more than 300 persons in the community. The year's program of the Chamber of Commerce is most likely to be built around the ideas given in replies.

TONGGUK, Korea — Although he has served in the United States Army for 29 years, the assignment to the Presidio of San Francisco where he was scheduled to report last month, marks the first time that Master Sergeant Donald Dones of (3096) Kahaloa Honolulu, T. H. has ever been in the United States.

He has been on duty in the Philippines, where he was born, in Hawaii, on other islands in the Pacific during World War II, and in Korea.

"I'm going home to a country I've never seen" he said. "I wonder if I'll like it."

Q. What is the name of these cuts of meat?

A. Pork Rib Chops.

Q. Where do they come from and how are they identified?

A. They come from the loin section of pork and contain just one muscle. Depending on the thickness, they may or may not contain a rib bone. They are easily identified by the solid eye of loin.

Q. How are they prepared?

A. They are most often cooked by braising, a moist heat method of meat cookery. They are browned on both sides, seasoned, covered tightly and cooked slowly. To cook pork rib chops cut 1/2 to 1 inch thick, it will take approximately 45 minutes to an hour.

## Harry Campbell To Author Book On Motley County

MATADOR, Jan. 14 — Harry H. Campbell of Matador, first white child to be born in Motley County, has signed a contract with the Naylor Company, book publishers of San Antonio, to publish his manuscript titled "Early Days of Motley County."

The early days in Motley County are principally woven around happenings at the Jingle Bob and Matador ranches, with both of which the author was well acquainted.

Motley County was later Texas territory and it is fortunate that this book is being written by a person who lived during the early days of the county.

The book will be written with many original scenes and people of the county.

We wish to express our appreciation for the interest and cooperation of the author who lived during the early days of the county.

## SOIL CONSERVATION DISTRICT NEWS

### OUR SOIL ★ OUR STRENGTH

Work is expected to be started on the first plan of operations under the Great Plains Conservation Program this week according to A. W. Dalrymple of the local office of the Soil Conservation Service in a statement issued this week.

To participate in the program you must have a workable plan of operation that incorporates:

1. Needed land use changes.
2. Needed cropping and grazing systems, and
3. needed soil and water conservation practices in proper combinations.

Your plan of operations includes a schedule that calls for carrying out all measures in a period not to exceed 10 years. You then enter into a contract with the Secretary of Agriculture to carry out your plan. The contract includes your plan of operation, your time schedule for doing the planned jobs, and the amount of cost shares to be paid by the Federal Government.

Cost sharing help will be provided as long as you reasonably need it. However, it cannot be less than three years nor more than 10 years. Measures eligible for cost sharing include:

Establishing permanent plant cover, field strip cropping, improving range cover, planting trees or shrubs for windbreaks or shelterbelts, establishing waterways, building terrace systems, chiseling or pitting rangeland, improving dams or ponds for irrigation, constructing wells for live stock, installing pipe, land leveling and controlling brush.

The amount of cost-share you will get depends on the cost of doing the needed work and the rate established by the State and County Program Committees. The maximum cost-share rate will not exceed 80 per cent of the average estimated cost of establishing each eligible practice.

There is no limitation on the amount of cost-shares you may earn per year under this program, except a limitation of twenty-five hundred dollars (\$2500.00) for cost-share for improving dams or ponds for irrigation.

Land in the Great Plains Conservation Program can be grazed consistent with good management. Contact any agency of the Department of Agriculture for information on the program or for application blanks.

## TAX-MAN SEZ

The tax folks say that thousands of us fail to send in a check for the tax we owe when we file our income tax returns.

They think a lot of people read the instructions, check their records, figure their tax, check their arithmetic, get all their W-2's attached, but then fail to enclose their check.

These fellows sure went to a lot of trouble to get their tax right and then forget to enclose a check.

Most of us know we have to pay the tax; Let's all save Uncle Sam time and money by putting in our checks with our return. Don't send in your check without identifying what the check is for.

The tax office has thousands of payments. They have trouble finding who to credit the payment to when you don't attach the check to your return.

## CHAT with PAT

Howdy Doody, Well - the "Winds" racked up two more. This time it was on Lockney! We play Spur there tomorrow night. It's a long ride to Spur but it would be worth it to see us win again.

The Floydada Athletic Department is sponsoring the Harlem Road Kings to play our "All Stars". We would like a big turn out. It starts at 8:00 tonite in the Graves Gym. This is one thing that should be hilarious. Can you imagine Mr. Jones, Coach Tyler, Coach Huntington; Ham Smith Jr.; playing?

Do you remember when Tommie Lois and Linda Hammons could swing higher than anyone; Buttons played like he was Mighty Mouse and Donita was his lover; Kelly King left the trash man a gift on New Years Eve (it was accidental); Kearney used spray net on his flat top; Billy G. didn't eat Wheaties for Breakfast; how that Joe Ed, Joy, Glee and Sally fried frog legs; Mary and Leora put their name and address on a balloon blew it up hoping someone in another state would receive it -- (The trouble was they forgot to put gas in it.)

The Junior Class had a bake sale last Saturday but it wasn't a very big success. We are going to take another stab at it on some Tuesday in the near future. Please help us to be able to give a good Junior and Senior Banquet this year. In order to do this we gotta have money-- money. ---

Oh brother, put on your best thinking caps because mid-term test are this Thursday and Friday. Best of luck to all of you F. H. S. kids who have to take tests.

Next semester everyone has to take them. They are also going to issue us some new kind of report cards which also grade on attitude. I imagine ole F. H. S. will be a lot quieter and nicer next semester.

These people were seen "motevating" around in their automobiles -- Linda Welborn and Vaughn Ginn; Judy Jackson and Bill Orman; Judy Wilson and Harvey Allen; Jane Tye and Weldon Pruitt; Mary Grace Dunn and Eddie Parks; Juanell Wood and James Teague; Suzie Nelson and Norman Davis; Elfa Womack and Price Pritchett; Billie Ann Goode and David Blair; Donita Milton and Arlis Fowell; De Anne Newberry and Rex Jones; Sue Ring and Gary Matsler; Glenda Morgan and Dale Lawson; Carol Lawson and Gary Hucka-

bay; Pat Allen and Jerry Battey; Randle Ring and Joe Ed Viney; Lois Ann Glover and Gary Sawyer; Sue Kendrick and Rannie Vickers; Jo Ellen Jackson and Jackie Myrick; Carolyn Cates and Dale Brown; Shirley Gregory and Donnie Taylor; Thelma Ferguson and Spencer Hatley; Nedra Jarrett and Eddie Childs; Bonnie Stought and James Badgett.

The above are some of the steady couples of F. H. S. Other dates were: Sue Flenniken and Bobby Christlan; Billie Holmes and Richard

# Evolves a Plan For Providing Needed Payroll

Floydada needs a payroll. Here is a plan. Give it a thorough going over.

We need a combination building for processing of vegetables which would include a dry shed, wet shed, packaging department for one and two pound plastic bags, cool and cold storage, freezing department and should have a capacity of at least 100 cars.

Rent this plant to some reliable company like Libby's, Hunts or California Packing Co., for a twelve year contract. The rent should pay for the building and give a good rate of interest.

It is customary for investors to build buildings for companies such as Sears or Furrs or the oil companies.

Probably no one here would build such a building but 250 men or less could build the building and have a secure loan invested for 12 years. Such safe loans are not easy to find.

Our farmers would profit by having a market for their products. As we can grow any number of acres of whatever any company would buy, some vegetable packing company could get in on a newly developing vegetable empire which has several million acres of smooth, rich, virgin land with over \$2,000 irrigation wells to assure yearly production.

It's a real opportunity for some company. And our people are willing to help them.

Every farmer and business man should be glad to buy a part of this building.

If you are interested in this idea encourage your Chamber of Commerce officials to start organizing a building committee. The Chamber of Commerce is always ready to help any organization or individual with their plans for the growth of Floydada. But they need your help too.

This is only a trial balloon. The question is are you willing to help your neighbors help you. Our farmers would have a market, Floydada would have a payroll, investors would have a secured loan, and we would be making progress.

This plan is sound and can be done easily. And we need it so badly.

Let's do something about it, please.

L. A. Marshall

P. S. If we can get a 10-year renter for this building would you help finance it?

**LEISURE IS NOT A LUXURY**

Food, clothing, and a place to sleep may be all anyone needs to keep alive, but there is a wide world of difference between only "keeping alive" and "living fully." Civilization has its roots in hard work, but it flowers in leisure. Many of the most useful and beautiful things man has discovered and enjoyed grew out of leisure time. Leisure hours means time you can use to stop, look, and listen, time to think about things, to develop an interest in, and appreciation of things. However, leisure does not mean so much to the sick person. To the sick, leisure generally means a time when they are not busy enough, either mentally or physically, to keep their mind off from their condition. As a result of this they usually feel worse, when they should be relaxing.

Good health is something we should try to achieve or keep. It is much easier to be happy when we feel full of energy than when we're all worn out or full of aches and pains. We enjoy our leisure time when we are feeling good.

Such is the case of this woman who previously suffered from Arthritis. Both hands, both feet, and neck and shoulder regions were affected and of course she suffered much pain and became limited in her activity. She had loved to work in her flower garden in her leisure time but since the Arthritis she had to give it up.

The reading of a newspaper article brought her to our clinic. Now, thanks to proper chiropractic care, she again enjoys good health and can once again spend her leisure time in her flower garden.

We write this article with sincere hopes that it will inspire another sick person to try to regain their health. Of course reading this won't make you healthier or happier but if you read it and think about what it says and then DO something about what it suggests, it really can help you add to the fullness of your life, both in health and happiness.

## Water Extension To Aid Davis Gin

Fire protection for the hard-hit Davis Gin in east Floydada will be provided by a new main being laid by the city eastward from the vicinity of the Q&A&P Railway station to 12th Street, a distance of about 900 feet, to which will be added 400 feet north on that street for a hydrant installation.

To put water from the city's line on to the gin property Davis is laying a two-inch line from 12th Street eastward. The service line will provide water on the spot to be used solely for fire protection.

Negotiations to get the added protection needed to combat the fire hazard were carried on by Dick Guest, manager of the gin.

# Coaches Adopt New NCAA Rule On Conversion

The NCAA football rules committee meeting at Fort Lauderdale, Fla., voted Sunday to change scoring rules. It is the first change in scoring for football since 1906.

Under the new rules college teams will line up on the three yard line following a touchdown, instead of the two. From the three they will have the option of running the ball over the goal, passing for the conversion or of kicking the conversion. The kick will count one point as in the past while the run of pass that is successful will bring the offensive team two points.

Some other rules changes were made though they were minor in comparison. They were penalty for out-of-bounds kicks, ineligible receivers to move with the throwing of pass rather than the catch, laxer substitution rules, limit player to making contact with one arm and hand on blocking and an effort to stop signal jamming by defensive teams.

There has been much discussion if the scoring rule in the past few days with most college coaches favoring the change and saying the fans will like it better.

No action had been taken by the Texas Interscholastic League early this week and local school authorities did not know what to expect in this line.

Superintendent I. T. Graves and Coach Preston Watson said such a change, if brought up, would probably be first submitted to the advisory committee of the league and if it received favorable action here would be presented to the individual schools in a vote by mail canvas.

Mr. Graves is a member of the advisory committee which would study such a proposal.

Dr. Rhea Williams, head of Texas Interscholastic League left little doubt about high schools following in line on the rules changes. Williams says all changes will be adopted except high schools will retain free substitution rule.

This yearly ensemble has proven an enjoyable occasion in the past with crowds to a full capacity attending. The program will get under way at 7:30 p. m. and the public is invited. There is no admission charge.

Mr. and Mrs. W. D. Reeves are expected to return home tomorrow from Fort Worth where they have been attending the Evangelist conferences held at Texas Christian University this week.

## IEWS AND COMMENT

**Cotton Makes Business.** It is a shame some way can't be figured out to get cotton raised on American farms back into the world's markets on a competitive basis. Many men have tried many plans to keep the cotton industry on even keel, principally by the quota system for domestic consumption. What makes cotton so good for everybody is that it multiplies itself in value as it goes along and everybody gets a lick at it. Cotton multiplies seven times as it moves through the channels of trade and processing.

**Next Door Neighbor.** We have no ideas on how to keep cotton production at a price level that will not break the farmer and at the same time be competitive in world markets. Nobody else seems to have come up with a scheme that will do it, either. Accordingly, while we protect the home market by law we put a lot of competitors into business throughout the world. For instance, in Old Mexico, there are no restrictions. Cotton moving from the rich farms in that nation through Brownville port in Texas have made that one of the busiest export cities in the cotton world.

**Cottonseed ought to bring farmers a good price this spring—or whoever the farmer sold his seed to.** Fertility of many bales of seed was adversely affected by the fall weather throughout the state. Accordingly the fellow who was in position to put away the better quality seed from his fields in the fall is likely to reap a good harvest in April and May. Extension Service authorities have noted this situation in recent bulletins.

**Only a few luxuries are taxed higher than the telephone service one buys in Floydada.** The list is short—liquor, tobacco, club dues and cabarets. American Telephone & Telegraph Company points up this fact in a recent statement to its stockholders. The company now pays a bill, which it has to take off the public, that amounts to \$20 per share—more than twice the amount it pays out in dividends. Not complaining, since it is recognized there are great problems involved in getting enough money to meet all the country's needs, and lawmakers are faced with the problem of spreading the tax so it will be equitable, if possible. But the company thinks that the extra, luxury, tax the telephone user pays on top of taxes that industries such as electricity and gas pay, should not be perpetuated. The point is that one necessity is thus forced to carry a load that others do not. The telephone tax load, stated another way, is equal to more than \$2 per month per telephone in use. If this sounds like carrying the torch for the telephone company, then let it be.

**Says Secretary Benson:** "High profits and wages in the farm industry (manufacturing plants) are being siphoned from the economic bloodstream of the nation at the expense of the American farmer." This he terms the major cause of the cost-price squeeze that constitutes the No. 1 farm problem of 1958. We agree with the secretary that "the entire nation should be concerned with stopping the price and wage spiral which is affecting adversely the income of the major segment of our population."

Many well-informed men maintain that there has been no lack of funds to carry on the development program for missiles and satellites. The hue and cry for economy in the last session of Congress is being blamed for the obvious lag in satellites and the apparent lag in missiles production. Not so. The lag has been due to unsatisfactory organization of research and development, absence of planning, interservice rivalry and failure to make decisions. But special interest lobbies and advocates of big federal spending generally see a golden opportunity, so they push the claim that economy is to blame.

**Washington has gone crazy.** The town is in a turmoil. The Commies did it to them. Our leaders are scared and worried. And we take it for granted they'll try, as they always have, to spend us out of our troubles. When a leader gets good and scared he is a poor leader. Besides those we have elected there are also in the big capital many who have authority and no voters to answer to. They help keep the mess messy. The folks are going to pay dearly for the big panic.

**Military cussedness is such that they try to make the civilians wish they hadn't,** any time an effort is made to get a bit of economy and make it possible for the civilians to pay the bill. For instance, all the national guard units in the country and the other training camps are clamped down on. Even the reserve flyers are "short" of gasoline and flying time. The brass fixes up the brass first, then comes anything else that is left as far as it will go. The military has its expensive traditions, some of which have come down from the time of George Washington.

**Wish We Could have said it department:** "If we could develop or impose greater efficiency on the military, squeezing out the waste, there would be no problem whatever in providing additional funds for missile research and development without any increase in over-all military expenditure." Credit to Senator McClellan of Arkansas.

**Get Into Teaching.** If you're a relative youngster get into the teaching profession for more pay, better economic future. Sputnik has scared the wits out of a lot of people in America, and the only way we know in this country to accomplish anything is to spend more money for it. We are going to buy ourselves smart. The fact that there is considerable complaint on the way the teaching profession is spending the funds Texas people are already providing will have no bearing on the outcome. If you are to graduate from college any time in the next two or three years or could now make a change that would not be detrimental otherwise, get into a good school system as quickly as you can.

**We should so live and labor in our time that what came to us as seed may go to the next generation as blossom, and that what comes to us a blossom may go to them as fruit.** That is what we mean by progress.

—Henry Ward Beecher

**All that is needed for evil to prevail is for good men to do nothing.** —Edmund Burke

Science and Math study in Tex-  
public schools will get a critical  
examination by a group of school  
principals with advice from busi-  
ness and industry leaders.

State Board of Education set up  
the study which is to complete its  
project by end of 1959. Goal is to  
find means to enrich the schools'  
curriculum in some areas, set stand-  
ards in others.

Board has previously raised gra-  
duation standards in Texas high  
schools, taking away from the stu-  
dents the chance to pass up math  
and science in favor of "snap"  
courses. This action, taken before  
the current session, was  
"somewhat prophetic," commented  
one board member.

No Tax For Teachers would do  
more than scholarships and new  
buildings to raise level of instruc-  
tion, said the secretary to the Com-  
mission on Higher Education.

Jack D. Cox said exempting  
teachers from income taxes would  
have the effect of raising salaries  
without levying additional taxes.

Poor Pay For Profs was hit even  
harder by a University of Texas  
faculty member in an Austin talk.  
He cited salary incentives as crucial  
in comparing Russian and U. S.  
school systems.

According to Dr. B. H. Amstend,  
an American college professor can  
expect to double his salary in a life-

time; his Russian counterpart can  
achieve 15 times his beginning  
wage. American teachers make 10  
percent less than factory workers,  
said Dr. Amstend. Russian teach-  
ers 2 1/2 times more.

Proposed federal scholarships will  
be useless, he opined, unless there's  
also more money to attract people  
to run schools.

"Survival Depends on the quality  
of our schools," Sen. A. M. Alkin,  
Jr., of Paris told the Texas Associa-  
tion of School Administrators.

Alkin, leading legislative spokes-  
man for education, reported on the  
studies of the Hale-Alkin Committee  
of 24 set up by the legislature to  
make an over-all study of the state's  
school needs.

"Specific recommendations from  
the people of Texas on many im-  
portant school matters are needed  
by the study group," Alkin said.  
Success of the study depends on  
how well the people get behind it  
and participate, he added.

It was begun, said the senator,  
"before foreign development re-  
emphasized the fact that education  
is a vital part of our national de-  
fense."

Land Leasing Set - School Land  
Board has set March 4 for sale of  
oil and gas leases on public lands.

Some 34,000 acres of tidelands  
plus several hundred tracts on state  
prison farms will be offered for  
leasing.

It will be the first time tidelands  
leases have been offered since the  
federal government filed suit con-  
testing Texas' claim to land more  
than three miles from shore. State  
officials were unsure how attractive  
the land would be under the cir-  
cumstances.

Optometrists at Odds - Rival  
groups of Texas optometrists are  
apparently on their way to the Tex-  
as Supreme Court to settle differ-  
ences over what practices are legal  
for that profession.

Disagreement centers on two is-  
sues: (1) whether optometrists may  
advertise, and if so, who and (2)  
whether they may have offices in  
part of the space of a store.

Atty. Gen. Will Wilson ruled un-  
constitutional the portion of the  
Ophthalmic Dispensers law passed  
last spring that pertained to adver-  
tising. Reason, a familiar one:  
the topic was not mentioned in the  
bill's caption.

Members of the Texas Optometric  
Association disagree with the op-  
inion. They brought suit asking that  
the State Board of Examiners in  
Optometry be enjoined to enforce  
a no-advertising rule. Since the  
case involves constitutionality of a  
law, it can be appealed to the Su-  
preme Court.

Another suit was brought by a  
group of optometrists protesting a  
state board ruling that an opto-  
metrist's office cannot share space  
in a store.

Attendant publicity resulted in  
the resignation of Charles M. Babb  
of Austin as executive secretary to  
the State Board of Optometry Ex-  
aminers. Babb was criticized for  
holding that position while also  
serving as legal counsel to the Tex-  
as Optometric Association -- i. e.,  
serving both the regulators and the  
regulated.

**SHORT SNOTS**—Travis County  
grand jury gave state officials  
and employees a clean bill of health  
after two months' searching for  
"any further evidence of miscon-  
duct". It did, however, recommend  
tighter regulation of notaries public  
and insurance company officials  
handling company funds.

Railroad Commissioner Olin Culbertson  
made the first state-wide political  
announcement by stating he would  
seek a fourth term in his present  
office. . . . Persons wanting to buy  
under the veterans land program  
will have a chance Jan. 21, to buy  
land of previous owners who failed  
to meet payments. Forfeited land  
includes 58 tracts in 21 counties,  
said Land Commissioner Earl Ruder.  
... Lt. Gov. Ben Ramsey nam-  
ed Judge Joe J. Fisher of Jasper,  
Judge A. R. Stout of Waxahachie  
and Earl Smith of San Antonio to  
the Law Enforcement Commission  
created during the special legisla-  
tive session. Three were appointed  
to the commission by the governor,  
three more will be named by the  
House speaker. . . . J. T. Ellis Jr.,  
of Weslaco has been appointed to  
Governor Daniel's staff to assist  
with water, job classification and  
fiscal matters. Ellis resigned as state  
representative to take the post.

Recent guests in the home of Mr.  
and Mrs. George Wexler were their  
daughter, Miss Belva Smith of Lub-  
bock, Kenneth Wampler, Houston,  
Mr. and Mrs. Robert Smith and

# Farm Trends And Forecasts For 1958

Each new year brings new ex-  
pectations and speculations on  
things to come -- both good and  
bad. These are some of the pre-  
sents for Texas agriculture:

**LIVESTOCK** — Prices are good  
now on livestock, and producers  
are making good profits. Bumper  
feed crops have decreased costs  
while prices are way up from a year  
ago. However, this windfall may  
not last too many months. Eager  
hog raisers could glut markets later  
this year, depressing prices. Range  
cattle prices are up sharply, cutting  
profit prospects for grain feeding.

**SEED** — The Texas Department  
of Agriculture Seed Division reports  
good germination potential on Tex-  
as cottonseed and hybrid sorghum  
seed tested so far. However, germi-  
nation difficulties have been report-  
ed in many neighboring states,  
notably to the east of Texas on  
cottonseed and to the north of Tex-  
as on hybrid sorghums. Several  
states have lowered germination  
standards. There is plenty of good  
seed left and available in Texas.  
Best advice is to check seed tags  
carefully for germination ratio.

**EGGS** — A more profitable year  
is in prospect for Texas egg pro-  
ducers. Prices should be higher,  
feed costs lower, and sales are ex-  
pected to be only slightly under the  
record volumes of 1956 and 1957.  
Production is expected to be off at  
the start of the year but cheaper

feed and fair prices will likely en-  
courage many farmers to re-stock  
their henhouses. An added boon is  
anticipated for Texas producers  
in the form of the new Texas Egg  
Law, which should raise prices and  
standards at the same time. Also  
in the offing is a Texas egg market  
report which the Texas Department  
of Agriculture hopes to get under-  
way before spring. The proposed  
report would include egg prices in  
Houston, San Antonio and Dallas  
markets.

**COTTON** — Surpluses are down  
due to the weather foul-up of the  
1957 crop. Although it is too early  
to tell, prospects right now are en-  
couraging for 1958 cotton. Cotton-  
seed oil prices are way up and in  
good demand. Exports of American  
cotton indicate stocks may be way  
down at harvest time this fall.

# Albert L. Rains Dies In Abilene

A former long-time resident of  
Lockney, Albert L. Rains, 88, died

was with Masonic rites, Rev. Clay  
Munoy of Lockney, officiated.

Tennessee, and moved to Collin  
County in 1888. He came to the  
Lockney area in 1908. He was a

er until moving to Abilene in 1940.

grandchildren.

# Floydada Soldier Finds Giving The Key To Christmas

In a recent letter from Germany  
to Mrs. L. L. Clark, Dale Redd who  
has just recently been promoted to  
SP3 (or Corporal) told his grand-  
mother what it was like in Hannau  
at Christmas.

For celebrating Christmas the boys  
thought they would each select an  
orphan child and give them gifts  
of clothing and toys.

They put up a big tree and deco-  
rations in their mess hall, and the  
children seemed to enjoy it so much  
that it gave the boys the Christ-  
mas spirit.

Dale said that he needed some-  
thing to help his Christmas spirit  
since this was his first Christmas  
away from home, and it wasn't  
very pleasant. He hopes to be at  
home next Christmas.

Dale has been going to school and  
taking a course in Business Law.  
He is also on the Board of Gov-  
ernors for an Enlisted Men's Club  
in Hannau.

Mr. and Mrs. Charlie Warren  
and children, who recently moved  
back to their home here, from Al-  
buquerque, N. Mex., visited in An-  
drews Sunday with the L. W. Queen  
family, former residents of this city.

Mr. and Mrs. Dale Tanner of  
Lubbock are new parents of a son,  
born on Dec. 27. The baby has been  
named Bryan Dale and has a bro-  
ther and sister. He is the grandson  
of Mr. and Mrs. J. N. Richardson  
of this city and Mr. and Mrs. Ray-

# Modern Housewife Has Many Electrical Servants

**MODERN ELECTRICAL LIVING** begins with a full quota of housepower—  
enough outlets and switches to carry the electricity needed to properly operate  
today's many appliances. Four out of five of today's homes still have low  
housepower. Many new electrical appliances have been added but little  
thought has been given to the necessity for adequate electrical wiring. Ask  
your electrical contractor to take an inventory of your home's wiring. You too,  
may need more housepower.

# Watt's Going on in Your Home?

(An Electrical Quiz)

In this age of modern electrical conveniences, even though we use  
more and more electricity, it is estimated that four out of every five homes  
suffer from low **HOUSEPOWER** (not enough wiring, switches and out-  
lets).

Do your fuses blow often? Appliances take too long to heat up? Does  
your TV picture shrink when other appliances are started? Are you en-  
snared by endless feet of unsightly extension cords and double sockets  
plugged into double sockets? If you're afflicted with any of these sym-  
ptoms, you should have an electrical contractor examine your electric system  
and make a complete **HOUSEPOWER** rating for your home.

This little quiz may give you an idea of the watts (electricity) needed  
to operate the appliances in your home. Match the appliance in column  
one with the correct wattage in column two.

Yes, you're right! The correct answers are directly opposite. How  
well did you do?  
But here is an even more important method of scoring: pick out from  
the list the appliances you now own and add up their total watts from the  
answers. If the total is 20,000 or less, you should have a three-wire, 100-  
ampere service. If over 20,000 you need more than 100 amperes. If you have  
more than one of these appliances, don't forget to multiply. If you have other  
electric appliances, compare them with a similar type appliance listed above  
in determining the total wattage.
