LITTLEFIELD, LAMB COUNTY, TEXAS, THURSDAY, MARCH 13, 1930

No. 48

SERVICE BEGAN LAST MONDAY; 100 CONNECTIONS ARRANGED FOR TO DATE WILL BE BIG BOON TO BUSINESS CONCERNS

Old citizens who had fore-
have their homes piped dur-
ast month are now enjoying
ures and benefits of gas ser-
rding to H. S. Brown, local
who stated that gas was
to the city mains and service
at Thursday, March 6.
40 connections have already
to Littlefield homes, and
others made deposit on me-
connections to be made this
is probable there will be a
0 connections made during
year.

Several of the business concerns
are to use gas, including the tailor
shops, laundries and some of the gins.
A service department is to be in-
stalled by the West Texas Gas Co.,
and prompt connections, adjustments
and repairs will be made.
Littlefield will also be headquarters
for handling the gas service at Anton
Levelland, Amherst and Sudan.
The company now have their office
in the old Higginbotham-Bartlett lum-
ber yard office building, permanent
office headquarters having not yet
been arranged.

mental Conditions Here Are Better Than Ever Before; Concensus of Opinion

mentally, conditions in Lit-
and Lamb county generally
better than they were a
While prices of farm com-
this year will probably not be
according to present indi-
yet the general outlook for
1930 is indeed propitious.
generally is on a sounder ba-
section than ever before.

and the present status of business for
this time of the year is more prosper-
ous than at any other equivalent pe-
riod during the past. The farmer, the
backbone of the country, is in better
condition because of good crops last
year; he is living at home, almost lit-
erally so, and present demands from
banks are comparatively low, with the
prospects of remaining lower as the
crop year advances, than heretofore.

As the town grows older, the coun-
try more settled, and citizens become
better acquainted with each other,
learn the nature of the country, crops
etc., there seems to be engendered a
stronger feeling of confidence and a
larger spirit of cooperation. Diversi-
fication in this section is now well es-
tablished, farmers are getting more
stock about them, past crop successes
have enabled many of them to liqui-
date land notes and other indebted-
nesses, which has resulted in a strong-
er feeling of stability, assurance and
determination, and a brighter outlook
for successful future endeavors.

Bank statements are always a good
barometer telling the financial con-
dition of any given section, and the
fact that the banks of Littlefield went
through the past crop season without
having to borrow any money to in-
turn loan the farmers of this section,
speaks well for the present business
status. More money is now on deposit
in the local banks than at any pre-
vious time in their history. Credit, gen-
erally speaking, is better than ever be-
fore, while the prospects for a larger
development period this year is indeed
flattering.

JR. STUDY CLUB ENTERTAINS

The members of the Junior Study
club entertained the members of the
Womans Study club, at the home of
Ruth Courtney, Wednesday evening,
March 5th.

The theme of the program was Tex-
as Independence Day, and was also
carried out in the decorating and in
the refreshments.

Erma Simmons was leader for the
evening, and the following program
was rendered: "Origin of the Name of
Texas," Dahlia Hemphill; "Summary
of Past Programs," Erma Simmons;
Reading, "The House with Nobody in
It," Fannie Weaver; "Texas as a Re-
public," Thelma Killough; Song "My
Texas," Eva Gertrude Chisholm; "Tex-
as Enters the Union," Ruth Mat-
thews; "Texas During the Civil War"
Ruth Courtney; and song "Eyes of
Texas" by all. At the conclusion of the
program Mrs. F. G. Sadler, sponsor of
the Junior Club, and president of the
Womans club gave an interesting talk
in behalf of both clubs.

Delicious refreshments of ice
cream, star shaped cookies and punch
were served by Tommie Killough,
assisted by Eva Gertrude Chisholm.
Those present during the evening were
Mesdames E. S. Rowe, T. P. Wright,
T. Wade Potter, Reese, Harry Wise-
man, William Fulton, W. G. Street,
John Arnett, Chas. Harless, Jimmy
Brittman, E. A. Bills, Clyde Hilbun, F.
G. Sadler and Misses Ruth Matthews,
Corrine Wright, Erma Simmons, Fan-
nie Weaver, Thelma, Lucille and Tom-
mie Killough, Bessie Bellomy, Gladys
and Bernice Wales, Sally Pilkinton,
Lula Graham, Dahlia Hemphill, Ruth
Courtney and Grantham.

The sum of \$44.45 was paid into
the city office the past week from
fines paid for drunkenness, gambling
and traffic violations, according to W.
G. Street, city Clerk.

Better Call Off the Dog

By Albert T. Reid

Must Move Pumps On State Hi-way No. 7 Department Order

Orders were received Monday by
the city officials, from the State Hi-
ghway Department, for the removal
of all gasoline pumps, encroaching
upon State Highway No. 7, from the
highway property, which includes six
pumps at filling stations along the
pavement.

Further orders were also issued by
the department for the city to put "No
Parking" signs on the highway, also
stating that no cars will be allowed to
be filled with gas or oil while on the
highway.

Due to the fact that the pavement
along the highway is only 44 feet
wide, these orders are issued in an
effort to establish safety of traffic,
according to Mayor Otto Jones.

24 MEMBERS PRESENT AT ROTARY LUNCHEON THURS.

The Rotary club met Thursday at
their regular noon luncheon at the
Methodist Church with 24 members
present.

President C. C. Clements presided
and several short talks were made by
several of the members.

J. S. Hilliard, secretary, read a let-
ter from the director of the Advisory
committee of the census of manufac-
turers which is now being taken. He
urged all parties receiving blanks
from the department to fill them out,
answering all question correctly, and
send them in to the department im-
mediately in order that there might
be no delay in issuing the report.

Mrs. R. E. McCaskill, who was a
guest of the Rotary, took occasion to
thank the Rotarians, on behalf of the
Parent-Teachers Association, for the
funds received from the minstrel show
and assuring the club that the money
was being spent for the replacing of
school ground equipment of the Lit-
tlefield schools.

Mrs. F. G. Sadler, who was also a
guest, suggested that the club present
the minstrel show at some nearby
town for the benefit of the Woman's
Study Club. No definite action was
taken on the matter at this meeting.

Rotarian, M. D. Stanley, of Terrel,
and Amaker, of Lubbock, were other
guests at the luncheon.

The day after Mr. and Mrs. Samuel
Gregson of Glasgow celebrated their
golden wedding the husband was ar-
rested for throwing chairs at his wife.

A dog bred by John Cox of Black-
burn, Eng., and sold by him for \$28
brought \$8,500 from a fancier of wire
haired terriers.

HIGH SCHOOL HOME ECONOMICS CONTEST LUBBOCK, MARCH 24

The initial high school home eco-
nomics contest, with West Texas High
schools competing, will be held at the
Texas Technological College, at Lub-
bock, March 24.

The Home Economics Department
of the local high school expects to en-
ter the contest, which will be held at
the same time that judging contest-
ants from here in vocational agricul-
ture will go to Lubbock to take part
in the fifth annual judging contest.

For some time, superintendents in
West Texas have been suggesting
such a contest because of the distance
from these schools to the State cloth-
ing contest, Miss Margaret Weeks,
dean of school of home economics, of
the Tech stated in announcing the con-
test.

Appropriate prizes will be given to
the schools winning in 16 different
contests. The Lubbock Chamber of
Commerce is cooperating by offering
prizes which will consist of framed
pictures, books, pieces of equipment
and other useful articles that will be-
come the property of the home eco-
nomics departments that have win-
ning teams in the contest.

SHERIFF GETS MAN AT SPUR

Sheriff Len Irvin went to Spur
Sunday to get Claude Hall, who broke
jail at Olton eight months ago. He
was placed in jail at Plainview await-
ing trial which has been set for this
week.

Hall was charged with forgery of
checks given to Cuenod's dry goods
store and Shaw-Arnett dry goods
company, this city.

And the Parrot Said—

"Old Soak," the parrot brought
from the Philippines by Secretary of
State Simon, greets former Presi-
dent Coolidge at Santa Catalina,
Island, California.

Lums Chapel Will Entertain Plateau Singing Convention

"Singers and lovers of song are in-
vited to bring their lunch baskets
well filled, to assist the people of
Lum's Chapel in taking care of the
large crowd expected to attend the
Lamb county unit of the Plateau
Singing convention, to be held at that
place Sunday", says a committeeman.

This is a county wide affair and has
proportions that a community cannot
take care of without assistance, and
due to the fact that it is for the ben-
efit of the entire county, everyone
should assist in making the occasion a
success.

Special quartettes and trios from
various points over the county and
some of the best talent in the State
will be in attendance.

Everyone is cordially invited to at-
tend, and especially are the people of
Littlefield requested to be present,
and assist in this great Music festival,
which promises to be one of the best
ever held in this section, and also to
help the people of that community to
entertain the large crowd of visitors
expected on that date.

The committee is composed of H.
O. Carey, L. W. Jordan, Zed Robinson,
Lloyd Robinson and J. E. Brannen.

I. O. O. F. SHOWS GROWTH

The regular meeting of the I. O. O.
F. lodge was held Monday evening,
and an excellent session was held,
wherein Zack Isbell received initiatory
degree.

The Lodge has only been organized
18 months, however, it has grown
rapidly and many important things
have been accomplished.

A. L. Porter will leave Sunday for
Abilene where he will represent the
local lodge at Grand Lodge, March 17
18 and 19.

Mrs. Rodie Baird will also leave on
that date to represent the Rebecca
lodge at a meeting which will be held
at Abilene on the same date of the
Grand Lodge.

Sam Hutson, whose membership is
yet at Hereford, was a visitor.

MR. AND MRS. J. H. WARE HAVE NARROW ESCAPE

Mr. and Mrs. J. H. Ware narrowly
escaped injury Sunday while enroute
to their farm, 12 miles north of Earth
when a man, said to be intoxicated,
drove his car into the rear of the car
in which they were riding, puncturing
the gas tank and doing other minor
damages to the car.

Deputy Sheriff, J. L. Walraven,
came upon the cars and took the man
into Amherst, where he later paid \$25
for damage to the car and \$18 fine.

National Convention Of Methodist Women Convenes in Amarillo

At a meeting of the Missionary So-
ciety of the Methodist church Mon-
day, Mrs. R. B. Freeman was chosen
to represent the local society at the
twentieth annual national convention
of the Woman's Missionary Society
of the Southern Methodist Church,
which will be held in Amarillo, March
13th.

Mrs. W. H. Gardner was chosen al-
ternate.

Approximately 1,100 women are
expected to attend the meeting, ac-
cording to Mrs. Edward E. Adams, of
Amarillo, who is chairman of the en-
tertainment committee.

The first open meeting of the con-
vention will be held on the evening
of Thursday, March 13. A two-day
executive session will be held im-
mediately preceding the general confer-
ence.

Headquarters of the convention
will be at the Herring Hotel but all
meetings will be held in the Polk
Street Methodist Church.

Dr. Sidney Gulick of New York
City, secretary of the Commission of
International Justice and Good Will
of the Federal Council of the
Churches of Christ in America, will
be the principal speaker of the first
meeting of which "World Peace" will
be the general theme. He will talk
of "International Relations Around
the Pacific Basin."

Other prominent speakers will be
the Bishop W. N. Ainsworth of Ma-
con, Ga., and the Bishop John M.
Moore, of Dallas.

Hundreds of reservations have al-
ready been made representing nearly
every state in the Union. In spite of
the name "Southern," the church is
widely distributed over the northern
states as well, Mrs. Adams said.
Foreign countries will be represented
also by missionaries and native mem-
bers of the church.

The Polk Street Methodist W. M.
S. will be the hostess chapter. Mrs.
D. T. Leachman is president of the
society.

Deaconesses, missionaries and stu-
dents from the Scarritt College for
Missionaries at Nashville, Tenn., will
be special guests of the women of
the church.

The 1928 convention was held in
Washington, D. C.

ENTERTAIN S. S. CLASS

The Steadfast class of the First
Baptist Sunday school, entertained
Thursday evening for the Interme-
diate department in the home of their
teacher, Mrs. R. E. McCaskill.

Various games and stunts were
played, at the end of the evening Mr.
Lloyd Roberson organized a boys' class,
ten young men joining. A deci-
sion was made to have a party each
month. Mrs. P. H. Boone's class will
entertain in April.

Delicious refreshments of pineapple
sherbet and cake were served to Mes-
sies Olga Henson, Ruth Gray, Sue Bran-
nen, Frances and Gladys Seeley, Miss
Rook, Dorothy Fortenberry, Nora
Belle Grizzle, Mary Helen Smith; and
Messrs Hatton Simpson, Sidney Lucas,
Olin Wharton, A. C. Tremain, John
and Harvey Gibbs, Bert and Wilton
Lambert, Fred Weatherford and Bill
Street; Mr. and Mrs. Lloyd Roberson
and the hostess, Mrs. McCaskill.

FRALEY vs. JOHNSON

A boxing match is scheduled for
next Monday night at the Skating
Rink between Lee Fraley, popular
knight of the mitta, and Jack Johnson
San Angelo fist artist.

The fight comes as a result of a
challenge issued by Johnson at the
match nearly two weeks ago when
Fraley won the decision over Owens,
of Anton. Both men will weigh about
158 pounds and fans are promised
plenty of entertainment from the first
going.

Preliminaries between Jack Wheat,
of Amarillo and "Pinky" local middle-
weight, also between Dean Thornton
and Battling Johnson of Anton are
also on the bill.

The bill starts at nine o'clock.

John and Richard Weber, twin bro-
thers of Swansoo, Wales have a per-
fect church attendance record of 63
years.

Do not let the mail order houses deceive you!

SORE BLEEDING GUMS
Only one bottle **Leto's Pyorrhea Remedy** is needed to convince anyone. No matter how bad your case, get a bottle, use as directed, and if you are not satisfied druggists will return your money.
Stokes-Alexander Drug Company

SELLS YELLOW HOUSE GIN

D. G. Hobbs sold the Yellow House gin last Friday to W. L. Smallwood, of Levelland who took charge this week.
Hobbs states his future plans are yet undetermined, but he will not leave Lamb County.

Drinking may decline, but drinkers seldom do.

LUM'S CHAPEL

The Plateau singing convention is to meet with the Lums Chapel church Sunday, March 16. The entire day will be devoted to singing. Everyone is invited to come and bring their lunch.
We take this opportunity to invite everyone to come and worship with us. If you are a stranger in our community and are not attending a church and Sunday school, you are cordially invited to come and be with us. We take pride in boasting of the fact that we are a community where one can't tell a Baptist from a Methodist when there's work to be done.

The young people of Lums Chapel are full of pep. They are a bunch who are always ready for any religious work. It seems the parents are backing them in their work. This can hardly be said of every community.

A Sunday School social was given in honor of the young peoples class in the home of Mrs. Pierce last Friday evening. After we had enjoyed about two and a half hours entertainment refreshments were served to about 40 young folks.

Mr. Floyd, Earl and John Dee Jackson of Bula were visiting Mr. and Mrs. Otis Kilcrease, Sunday.

Owen Crow and Welton Thedford, Misses Inez Nance, Inez Crow, Iris New, Cloice Malone and Myrtle Nance took dinner in the home of Mr. and Mrs. Lightsey, Sunday.

Rev. Morgan of Anton and Rev. Etheridge of Littlefield delivered two fine addresses Sunday at Lums Chapel. Rev. Morgan speaking at the morning hour and Rev. Etheridge at the evening hour.

Mr. and Mrs. John Nance took dinner with Mr. and Mrs. J. R. New, Sunday.

B. Y. P. U. Meeting

The following is the program for B. Y. P. U. Sunday night:
Introduction—Bill Lightsey.

Conditions of Salvation—Otis Kilcrease.

Repentance Defined—Lillie Montgomery.

Faith Defined—Morris Pierce.

Look and Live—Owen Crow.

Two Elements in Faith—Mary Belle Montgomery.

Faith and Acceptance—Iris New.

Great Quotations on Repentance and Faith—Lee Banks.

Look and Live is our subject. Come and study with us.

BUSINESS IS GETTING BETTER

Men whose occupation is to keep their fingers on the pulse of national conditions report with a great deal of confidence that the outlook for business is better than they had expected to find at this time. There was a belief at the turn of the year that it might be midsummer before industrial conditions got back to normal. Now there is a general feeling that it will not be much after Easter before the slack has been taken up. Definite predictions with a time-limit are always doubtful, but the fact that intelligent investigators believe that the worst is over is of great significance and interest.

One of the most reliable indexes of business confidence is the volume of national advertising. Six of the largest advertising agencies recently reported that not only had there been no cancellations among their advertising clients, but that many of them had increased their advertising appropriations by from 10 to 15 percent.

There are several reasons why what looked in November like the beginning of a business depression did not develop as such things have done in the past. One was of course, that the sudden slump in stock values did not reflect any business or industrial condition but was the natural reaction of a speculative boom in which stocks were sold at from twenty to forty or fifty times their net earnings. Another was that there was no great mass of "frozen assets" on the shelves of merchants and manufacturers.

With the improvements in transportation facilities which have been made since the Armistice, business requires less capital investment in goods than used to be the case. One of the great mail order houses last year reported an inventory of only \$77,000,000 as against \$121,000,000 in 1921, yet the total volume of business done on the smaller inventory was four times as great as when the larger stock was carried. Something like that is reflected in the records of every merchant who runs his business on an up-to-date basis today. Small stock, speedily replenished on hurry up orders to manufacturers or jobbers, enable the retailer to make two to four times as many sales on the same amount of capital. He runs less risk of having money tied up in slow moving goods and by frequent recording keeps his stock fresh and attractive, besides keeping ready to respond instantly to any change in style or tastes.

Because this system of retailing has become almost universal, business credits were not materially curtailed even when the situation looked worst, and today are almost free as they have ever been. The trend of wages is still upward, unemployment is diminishing, and the general public will soon be, is it is not already, in better buying position than ever.

ORGANIZE UNION LEAGUE

The Epworth League of Sudan, Amherst and Littlefield met Sunday afternoon at the Amherst Methodist church for the purpose of organizing a Union League. Each of the three leagues were represented at the meeting.

Mrs. Gerald Hendrix, president of the Amherst Epworth League presided. The following officers were elected: President, Mrs. Gerald Hendrix, Amherst; vice-president Miss Sue Wilson, Sudan; secretary and treasurer, Miss Sybil Glenn, Littlefield; Program committee, Mrs. R. B. Freeman, Littlefield; Gerald Hendrix, Amherst; and Miss Lula Belle Wilson, Sudan. Recreation and Social Committee, Kenneth Hemphill, Littlefield; Miss Lura Shipley, Amherst, and Miss Bertha Vaneene, Sudan. Reporters, Miss Ruby Jenkins, Sudan; Miss Marguerite Hackey, Amherst; and Miss Eva Gertrude Chisholm, Littlefield.

A decision was made to have a meeting of the Union League the second Thursday of each month. The next meeting will be held April 10th, at Amherst.

The following Leaguers from Littlefield attended the meeting: Mrs. R. B. Freeman, Misses Maudie Joe Fields, Sybil Glenn, Irene Hobbs, Fleta Eagan, Grace Nixon, Fern Fraley, Eva Gertrude Chisholm, Naomi Freeman, Louise Chisholm, Lela Mae Freeman, of Portales N. M., Messrs. Kenneth Hemphill, Troy Foster and Howard Reed.

CARD OF THANKS

I desire to notify the public that I have sold my beauty parlor, known as the Singer Beauty Shop, to Mr. Isabell, and wish to take this means of thanking you for your past patronage.

Popular Thrift Factor in Eliminating of Poverty

BY S. W. STRAUS
President American Society for Thrift

The statement often made that this is a materialistic age, Americans particularly are criticised at times for their so-called materialism. Much of the world's progress, however, has been due to materialism. The construction of railroads, and highways and the building of great cities have, to a considerable extent been the result of materialistic impulses.

It may be said, moreover, that the spirit of our materialism has been softened by humanitarian impulses. This fact is borne in upon us with particular emphasis at this time of the year when there is so much activity in preparation for the holiday season and when such tremendous sums are being donated by charitably inclined persons to the needy and unfortunate. It is a fine commentary on our citizenship to find so much thought and attention given to matters of this kind.

It is not out of keeping with current thought, however, to call attention to the fact that a great amount of the poverty and distress of the world is due to sheer lack of thrift. An old philosopher once wrote that "the highest step and the summit of charity's golden ladder is to aid a man that he may earn an honest livelihood and not be forced to the dreadful alternative of holding out his hands for charity."

Truly it may be said that we help others most when we help them to help themselves. In the earlier development of thrift education there grew up, particularly in England, vast numbers of charity associations. Persons who were in need were given alms to alleviate their temporary condition. The knowledge developed out of these early activities that charity of this description often encourages idleness. As time advanced society learned that the best way to combat poverty was to encourage industry. Due to the popular development of thrift habits poverty is gradually being eliminated, although there always will be those who, temporarily at least, will need charity.

But we should remember that when we encourage thrift upon the part of any individual we most likely are removing him forever from the possibility of ever becoming a charitable object.

J. Fred Christensen of College Springs, Ia., and Marie Antrim of Kingman Kan., were adjudged the healthiest boy and girl in the contest for 4-H club members held in Chicago

COLLEGE NEWS

Everyone is busy around the college vicinity these days, and if the work continues, many good results will soon be evident. The college students are busy and doing good work so far this semester. They do not seem to find time for very many activities but they are still alive.

Quite a few prospectors interested in coming to Littlefield and interested in buying college property have been on the campus the last two weeks. Some made purchases and we hope the others will.

President Duckworth and Business manager R. O. Conner spent last week end in Lockney on business for the college. They left Friday to spend ten days in the interest of the college.

Mr. J. B. Posey, head of the history department spent the week end of March 1st with friends in Lubbock.

The High school Joy Makers club entertained the college on Friday night with a western program around the campfire in the country.

A weiner roast was enjoyed. They will entertain in the College assembly hall, Friday March 14th with an Irish program.

Misses Roxie Arnn and Edith Raliff spent the week-end of March 1st with friends in Lubbock.

Miss Bernice Wales was the guest of Edith Sanders in Anton Sunday, March 2nd.

Mr. and Mrs. O. O. Martin and little son, Billy, spent the week end with friends and relatives near Fieldton.

Mrs. R. O. Conner and children, Virginia and Roy, Miss Fields and Mr. Posey went to Lubbock Saturday afternoon.

Mrs. Rose Mickey and children, Mrs. Bertie Baker and little daughter, went to Lubbock Saturday.

Miss Stella Strange went to Lub-

bock last week end as the guest of her brother.

J. D. West has entered the college to complete his first year of college work.

SPADE ITEMS

Mr. Cleo Brock has substituted a tractor for horsepower on his farm. He is using tractor power entirely.

Mrs. Jim Seals and children, Henry Logan and family who live near Anton, visited with Mr. and Mrs. Joe Reed who live two miles northwest of the Spade Community church, Sunday.

D. A. Logan has completed a new addition to his home with the exception of the paint which will be applied later.

Mr. and Mrs. Winchester came to make their home on the South Plains. They have been living at Durant, Oklahoma for the past few years. This is Mr. Winchesters second trip to this part of the country. He expressed his surprise at the growth which Littlefield has made in the past two years.

Whitharral News

The farmers are getting their land ready for another crop regardless of the sandstorms.

We would be glad to see a nice shower real soon to settle the dust for a while.

The Gin closed down last Friday for the season.

School is progressing fine now. The play given by the teachers last Friday was enjoyed by a large crowd. Several from Levelland attended the play.

The infant of Mr. and Mrs. Tommy Howard was buried here last Tuesday evening. Bro. Kemp of Littlefield conducted the funeral services. They have the sympathy of the entire community.

Mrs. J. G. McClellan of Waco is

visiting her daughter Sylvia, one of the teachers in our school. Louise Hawk spent last week with homefolks.

Edd Lankford went to Lubbock last week on business. Mrs. C. B. Edgar and Mrs. Haines were in Lubbock last day afternoon.

The Women's Club met with Crownover last Friday evening. Ladies are invited to attend meetings.

Mr. and Mrs. C. B. Edgar, Mrs. Elton Hawk and Mrs. Haines attended singing at the Spade last Sunday evening.

Miss Juanita Keyhee of Lubbock spent last weekend with Juanita Hawk.

Mrs. Ode Lewis was caring for Lubbock sanitarium and opened last week. She is home now.

Misses Juanita and Evelyn spent last week end with homefolks in Lubbock.

Mr. and Mrs. Arch Harrell, Oklahoma visited their daughter Ode Lawlis last week.

The Baptist church is almost completed.

We are sorry to report Mr. Henderson on the sick list. He she soon recovers so she can go to school.

Mrs. Fred Sherrel went to Monday.

Mr. and Mrs. Travis Haines Jimmie bones went to Pampa Saturday to visit Mrs. Haines and wife.

Mr. and Mrs. Fred Newsom shopping in Littlefield Saturday noon.

Everyone is invited to attend Sunday School.

The Gas line is being dug. Whitharral this week.

Most of the war-time tenants have probably lived by now.

NOW OPEN FOR BUSINESS

"In Business For Your Health"

WHEN WILL YOU BEGIN USING THIS NEW OIL?

It is being rumored (and truthfully) that no other American motor oil has been so speedily accepted by motorists. Conoco Germ-Processed Motor Oil has smashed all precedents by its amazing reception. . . . And this oil is as unusual as its introduction. Its superiorities are so apparent, that even before its announcement was well under way, literally thousands of new users were appearing at Red Triangle stations.

CONOCO GERM PROCESSED PARAFFIN BASE MOTOR OIL

Its name seems to intrigue motorists and much conversation has dwelt on the Germ Process, and the whys and wherefores. . . . the story is this: Under exclusive Conoco-owned patent rights, a precious oily essence is added to a superbly fine paraffin base oil. This essence is lacking in all other oils, including the one you are now using. The Germ Process makes possible the metal-penetrating safety factor that we call "penetrative lubricity." And this oil, of all on the market, provides a safer, more positive motor protection, from the time you start the motor until you turn off the ignition. So . . . when will you begin using this new oil? . . . at the sign of the Red Triangle.

NEWS REVIEW OF CURRENT EVENTS

President Hoover's First Year Is Both Praised and Attacked.

By EDWARD W. PICKARD

WHETHER Herbert Hoover's first year as President is to be considered successful depends largely on the political bias and economic convictions of the one who does the considering. The varying views on the matter were expressed in the senate by Senator Simeon D. Fess of Ohio, speaking for the administration party, and Senator Pat Harrison of Mississippi, speaking for the opposition.

Senator Fess especially praised the president's efforts to combat business depression, saying: "I regard the handling of the economic forces that are playing toward disaster by the president as the most outstanding accomplishment in the history of the government of which I have any knowledge on economic lines." He said he was not entirely sure that it was possible to avoid the cycles of business in which a high business level is followed by a depression. "If it can be done," continued the Ohio senator, "we have the leadership in the White House that will do it; for the president has been working on the problem eight years."

In dealing with other features of the administration record during the year Senator Fess discussed farm relief, tariff, the naval armament conference, and other international questions, and prohibition.

Senator Harrison said he wished to congratulate Senator Fess "on his candor and nerve in speaking examinations of the misachievements of the administration during the last year."

"If the failure to solve big problems is an achievement, then this administration for the last year is a success," said Senator Harrison. "If disheartening the farmers of the land is an achievement, then this administration is a success. If disheartening labor is an achievement, then this administration is a success. If indecision upon the part of a President is an achievement, then President Hoover's first year is a great success."

UNEMPLOYMENT is of course one of the immediate concerns of the government and furnishes ammunition for the opponents of the administration.

Secretary of Labor James J. Davis, following a cabinet meeting at which the industrial situation was discussed, asserted that as a result of the President's activities unemployment has been held to less than one-half that of previous financial crashes. Other administration leaders expressed confidence that unemployment would be materially relieved within the next few weeks through the federal agencies called into action by the President.

OPONENTS of our prohibition laws closed their case before the house judiciary committee on Tuesday with the statements of a number of witnesses, the best known of whom were Breckenridge Long, former assistant secretary of state, and Dr. Stewart Paton, psychiatrist of Johns Hopkins. Three women also took the stand. Mrs. Robert W. Lovett of Boston, Mrs. Cortlandt Nicoll of New York and Mrs. Carroll Miller of Pittsburgh. Mrs. Lovett sounded the keynote of the testimony of all three with a declaration that the anti-prohibition women are seeking the same objectives as

the dry women, namely, protection of children, a decrease in crime, and abolition of the commercialized liquor traffic.

"But what have we today?" she demanded. "Drunken children, crime on the increase by leaps and bounds, and an illicit liquor traffic infinitely worse than the open saloon."

Mrs. Miller struck out at the W. C. T. U., which, she asserted, is corrupting legislative bodies with its political tactics.

Next day the dries began the introduction of testimony with the first of some fifty witnesses from all parts of the country and from all walks of life. They led off with Samuel Crowther, a writer who has been gathering information on the liquor question for a magazine; Edward Keating, former congressman from Colorado; Dr. Daniel A. Poling, president of the World's Christian Endeavor union, and Henry M. Johnson, Louisville lawyer.

Mr. Crowther said he had asked Thomas A. Edison and Henry Ford to attend the hearing but they were unable to do so. However, both sent telegrams warmly endorsing prohibition and the Eighteenth amendment.

It is noteworthy that so far most of the dries emphasize especially the economic benefits the country has derived from prohibition, while most of the wets dwell particularly on the alleged break down of morals resulting from it.

NOT at all to the surprise of those conversant with the grain trade, conditions in the grain market became such that the federal farm board found it necessary to modify its activities in bolstering up wheat prices through the Grain Stabilization corporation and the Farmers' National Grain corporation.

The change in policy, as announced by Chairman Alexander Legge of the farm board, consists in abandonment of the arbitrary loan price basis established by the board last fall. No more grain will be bought on that basis. Mr. Legge said, though loans will be made to co-operatives on the present crop until July 1. Prices for wheat during the week were unsettled and generally lower.

Later Mr. Legge was quoted as declaring that a real embargo against shipping wheat from farms to terminal markets will be put into effect unless farmers hold their stocks until storage facilities become available. He said the board is endeavoring to avoid such drastic measures during the present grain emergency, but that if railroads are unable to unload cars of grain at terminals an embargo would become imperative.

Officials of twenty-five grain and other farm commodity exchanges held a secret meeting in Chicago and gave out the word that so far as they were concerned the verbal warfare with the farm board was ended.

"We have decided to shut up and get back to business as best we can under the situation, despite what politicians and governmental spokesmen may say or do," said one of the Chicagoans who attended the conference. The general opinion of the meeting was reported to be that the grain trade was satisfied with the modified policy announced by the federal farm board, withdrawing the fixed prices for wheat paid to co-operatives only.

SECRETARY OF STATE STIMSON sprung a surprise on the world with a statement in London that the United States is willing to reduce its naval armament by more than 200,000 tons, if the fleets of the other naval powers are reduced accordingly. He said this in reply to reports that the naval conference was likely to result in an increase instead of a reduction in the tonnage of the navies of the world, and said his plan seemed to be acceptable to America and Great Britain.

France was still holding up the proceedings of the conference although Premier Tardieu obtained a good majority in the chamber of deputies. The French continue to demand a tonnage of at least 700,000 tons. If they are given this, Italy demands the same total. But Great Britain's fixed policy is to have a navy as large as those of any two continental powers, and to have 1,400,000 tons she must add 200,000 tons to the figure on which the agreement with the United States is based. That in a nutshell is the situation, though there are many complicating side features.

The subcommittee of the conference to which was referred Mr. Stimson's resolution on the limitation and "humanizing" of submarines reported it could do nothing until the French delegates resumed their part in the negotiations. Premier Tardieu sent Brind, Dumesnil and others over to London Thursday and went himself on Saturday, so there was a prospect of progress.

THURSDAY was denominated "international unemployment day" by the Moscow Communists and parades and other demonstrations by the unemployed were held in many cities in Europe and America. In some places there were bloody encounters with the police and in others there was no disorder worth mentioning.

Among the activities of the Communists should be recorded the instigation and management of a rebellion of 14,000 high school pupils in Manila. They struck nominally because of alleged insults by a woman teacher, and the Reds incited them to sanguinary encounters with the police.

ALFRED VON TIRPITZ, who was lord high admiral of the German navy during the World war and father of his country's submarine warfare, died in Ebenhausen of bronchitis at the age of eighty-one years.

Cablegrams from Japan told of the death in Kobe of Dr. Arthur T. Hadley, president emeritus of Yale university. He succumbed to pneumonia at the age of seventy-three years. Doctor Hadley was educated in Yale and Berlin universities and joined the faculty of his alma mater in 1879. Twenty years later he was elected to the presidency, retiring in 1921. He was considered one of the world's leading economists.

Other deaths included those of D. H. Lawrence, noted English novelist and poet, and Viscount Herbert Gladstone, youngest son of William E. Gladstone.

OIL, lumber and sugar combined in the senate last week and brought about a vote of 47 to 39 in favor of an increase in the duty on Cuban sugar from 1.75 to 2 cents per pound. Nine senators, most of whom are interested in either oil or lumber, switched their votes, and the resulting combination smashed the Democratic-Radical Republican coalition that has been having its own way in formulating the senate's tariff bill. During the exciting debate Senator Caraway and others charged that a deal had been entered into, and there were warnings that the oil, lumber and sugar trade would be made a campaign issue. The house bill increased the rate on Cuban sugar to 2.4 cents per pound, so an increase in this duty is virtually certain when the senate and house conferees fix up the final draft of the measure.

JOHN NORTH WILLYS of Toledo, Ohio, automobile manufacturer, is the new American ambassador to Poland. His name was submitted to Warsaw for approval, which it received, and the appointment was then announced by President Hoover. The senate had no objection to the selection.

We Select a National Flower

By ELMO SCOTT WATSON

LAST we are to have a national floral emblem. At least, we shall have one if the wishes of the people, made known as the result of a nationwide referendum, are translated into legislative action by congress. For, by a big majority, the American people have chosen the wild rose as the national flower in a voting contest, conducted by the American Nature association, which closed recently. When the ballots were counted it was found that out of a total of 1,067,676 the wild rose had polled 492,811 votes, almost twice as many as those received by the columbine, the nearest contender. So there seems to be no doubt as to the wild rose's pre-eminence in popular favor.

The columbine received 261,451 votes, which in turn was more than twice as many as those received by the runner-up—the violet, which had 96,403. Fourth place went to the goldenrod with 84,112 votes. The "big four" in this contest simply ran away from the other candidates. For the phlox, which early in the campaign was listed with the goldenrod as a strong contender, received only 30,942 votes. The American Beauty rose received 30,482, the daisy 16,890, the mountain laurel 13,082, and the dogwood 9,024. A total of 32,509 votes are listed as "scattering" since they were cast for various other flowers not named by the American Nature association in announcing the result of the election.

The wild rose won in every state except Colorado, Florida, Minnesota and Washington. Without any group actively working for it, with no "campaign committee" in any state, and with a number of organizations actively trying to defeat it, it withstood every assault upon the lead gained early in the campaign. The columbine, supported vigorously by the newly organized Columbine society during the last days of the referendum, had 261,451 backers, who threatened, during early December, to sweep under the rose in a flood of votes. When the contest closed, however, the leader was still gaining.

"How decisive was the choice of the people," says Arthur Newton Pack, editor of Nature Magazine, the official publication of the American Nature association, "is indicated by the standing of the seven other leading candidates. More than 65 per cent of the vote was divided between the two leaders and there is no question of these being the national favorites. The violet, goldenrod, American Beauty rose, phlox, daisy, dogwood and mountain laurel, which finished in the order listed, never had a chance of victory. All the other flowers, grouped under "scattering," received but 3 1/4 per cent of the total.

"The National Flower campaign was begun late in 1923, first to engender an interest and love for wild flowers; secondly, to promote their conservation, and thirdly, to direct attention to nature generally."

Mr. Pack also points out the fact that this referendum accurately reflects the sentiment of the nation in the matter of choosing a national flower since the million votes cast probably represent as large a proportion of nature lovers as do the totals in a Presidential election in representing the grand total of eligible voters. He regards it as significant that the proportionate vote cast for the leading candidates varied little after the 100,000 ballot mark had been passed, except in the last days of the campaign.

In addition to crystallizing sentiment in favor of a national flower, the referendum had other beneficial results, he believes. Concerning these, he says:

"The referendum has been eminently successful. A large proportion of

school children voted, along citizenship lines suggested by the association, in such a manner that there is no question of the benefit they derived. A typical campaign is the one conducted by the Franklin Junior high school of Green Bay, Wis., where all the state flowers and candidates were illustrated on the school bulletin board, and discussion preceded the actual voting by a month.

"Educators, who assisted the voting in more than a dozen states, have asserted that the campaign has fostered citizenship, by giving the school children opportunity to vote in a national event. It also created knowledge of history and nature.

"While the tracing of adult education is much more difficult, the association feels confident that the interest expressed through the votes was not merely for the moment. In more than thirty commonwealths, statewide campaigns were conducted by local organizations. The Garden Club of America, the Daughters of the American Revolution, the General Federation of Women's Clubs, the state and national organizations of Camp Fire Girls and Girl Scouts, the Columbine society, nature clubs and conservation groups scattered over the entire nation took a significant part in achieving the result."

In choosing the wild rose as our national symbol, new honor has been paid to a flower which has always been a favorite of mankind. Two thousand years ago in Athens the rose was crowned "queen of the flowers," but even before that the romantic songs and legends of the Babylonians, Persians and the Chinese testified to the fact that it was cultivated in the earliest days. It became the national emblem of England and in the Fourteenth and Fifteenth centuries it gave its name to a long series of civil wars, the War of the Roses, between the adherents of the House of York, who wore the white rose, and those of the House of Lancaster, who wore the red rose.

Early in the recent campaign, opponents of the rose used as an argument against it that it was the English flower. But this was refuted by the statement that that emblem is the cultivated rose, whereas the one for which votes were being sought was the wild rose which grows in different varieties in every state in the Union. The campaign did not designate one particular variety of wild rose, but left it possible for each community to feel that its local representative of the genus was the choice of the country.

Pennsylvania is the only state which does not have a state flower. Curiously enough, it was the Keystone state which led all the others in the total number of votes cast in the recent referendum. Pennsylvania's total was 111,236 votes. Ohio was second with 78,648, New York third with 63,835 and Wisconsin fourth with 59,779.

An analysis of vote by states in relation to state flowers reveals some interesting facts. Since the columbine is the state flower of Colorado, it was natural to expect that Colorado should

give more votes to that flower than to any other. And it did, although it gave only 707 more votes to the columbine than to the wild rose. Fourteen other states gave more votes to the Colorado state flower than did that state itself, Washington supporting it more vigorously than any other with 35,066 votes.

The votes by states for the rose, the winner, and the three leading contenders was as follows:

State	Wild Rose	Columbine	Violet	Goldenrod
Alabama	10,814	827	1,918	3,498
Arizona	1,020	524	124	15
Arkansas	1,933	86	265	37
California	14,597	8,091	3,293	2,898

Wyoming	22,405	846	270	407
No State	934	5,113	46	46

Totals - - - 492,811 261,451 96,403 84,112

The violet is the state flower of Illinois, New Jersey, Rhode Island and Wisconsin. Yet both Illinois and New Jersey gave more votes to both the wild rose and the columbine than they did to their own state flower. Both Rhode Island and Wisconsin gave more votes to the wild rose than to the violet, but both placed the columbine third in the running. A similar situation is shown in Nebraska and North Carolina where the goldenrod is the state flower. Both states voted for the wild rose over their state flower. In Nebraska the goldenrod was second with the columbine third and the violet fourth. But in North Carolina the state flower was placed third, beating out only the violet.

Another interesting development was the failure of the phlox, a leading contender early in the campaign, to make a good race for the honors, especially when it apparently had so many points in its favor, one of its strongest supporters was Dr. Edgar T. Wherry, a well-known government botanist and chemist.

SAMOANS USE NOVEL WAY TO ROPE SHARKS

Natives Lead Fish to Boat, Then Lasso It.

Pago Pago, Samoan Islands.—Perhaps in no other place in the world is shark fishing the sport it is some few miles out from Pago Pago.

No harpooning, spearing or trolling here. The old Samoans would refuse to take you to the shark fishing grounds if you dropped a hook. They have their own method. In a large outrigger canoe the good-natured Samoans set out from Pago Pago bay in the afternoon. On the way they offer solemn prayer that many sharks will appear and that their catch will be heavy. It is a religious rite with them.

A tin of salmon is emptied in the water—juice and all—as the first morsel to lure sharks. A stout stick is run through a hole in a half coconut shell and made fast. As a native thumps it up and down in the water a heavy, chugging sound is made which aids in attracting fish.

Native Offer Prayers.

A 75-foot line about the thickness of a man's thumb is put out. It has a piece of wood attached near the end and a good-sized chunk of decayed meat is fastened on for bait. The piece of wood keeps the bait very close to the surface of the water. The other end of the line is made fast to the boat.

If sharks fail to appear the natives offer further prayers. Excited cries of "a-afe" break the quiet of the tropical waters as a school is sighted. It is the native word for "come on" or "welcome." Soon a shark heads for the bait, but the native at the line draws it in just rapidly enough so that the meat is kept a bit ahead of the fish. A shovel-nose shark cannot match it in one gulp without turning over on its back, hence it is quite a simple thing for the man at the line to lead the shark to the boat.

The fun begins when the shark approaches the boat. Seated beside the native at the line are two others; one with a heavy, hempen noose and the other with a stout 5-foot pole. The line is pulled in rapidly and the bait raised out of water just before the shark reaches the boat. As the shark snatches at it a native slips the noose over the shark's nose and head and draws it taut back of the dorsal fin. The fish virtually has been lassoed.

Quite a Battle.

A 9 to 12-foot shark can do considerable kicking and fighting—almost sufficient to swamp or upset the boat. The native with the stout pole places it against the shark's mouth and as the fish opens its jaws the pole is rammed down its throat. The enraged shark puts up a tremendous battle but it quieted somewhat when its head is split open with a hatchet. A heavy club also is brought into play and later the shark is split open just above the tail and gradually bleeds to death. Sometimes they have been known to fight for several hours.

The natives find certain parts of the shark quite tasty and the return of a successful hunt often is the incentive for a feast among the Samoans.

Many of the young Samoans know nothing of this exciting sport, but the old men are past masters at it. Judge James Wilkes Foxall of West Chester, Pa., who is attached to the American naval base in charge of legal matters at Pago Pago, is one of the few white men who ever accompanied the natives on a hunt. He characterizes it as the "most exciting of sports."

Do You Want Boy or Girl? Try Algebra

Berkeley, Calif.—The sex of children no longer may be a matter of guesswork before birth, according to Dr. Herbert M. Evans, chairman of the department of anatomy at the University of California.

In a paper made public, Doctor Evans, famous as the discoverer of vitamins E and F, contended that the long hidden secret of sex determination had been discovered.

"If an X mates with a Y, the offspring will be a boy," Doctor Evans declared. The problem now, he added, is to ascertain whether you are dominated by the factor X or Y.

Sex of a baby, Doctor Evans said, is determined during the period of fertilization and the presence of one of two microscopic chromosomes is the determining factor.

Designating one as X and the other as Y, Doctor Evans explains that within a group of 48 chromosomes of a germ cell, a pair of minute germs will control the sex of the child.

Thus the algebraic formula for sex determination is: XY equal male; XX equal female.

Whether the factors of X or Y are more dominant in some persons than in others is not revealed in the report, but it is presumed research is being carried out to determine the predominance of X or Y and learn a method of selection.

Doctor Evans points out there are 48 chromosomes in both men and women. In the female there two X chromosomes and in the male there is one X and one Y.

Efficient Postmaster

Troy, N. Y.—Matthew Fleming, seventy-two, and his daughter, Mrs. Alice Tisdale of Richmond, Va., are reunited after a separation of 25 years through the medium of a letter sent by Mrs. Tisdale to "Matthew Fleming, Troy, N. Y., Postmaster Please Find." The postmaster did.

LIGHTS of NEW YORK

Stolen Steel

One of the most agreeable restaurants in the city is an establishment in the market zone on West street. Here one finds the freshest food, the most generous portions and the lowest prices. The place is never closed, and its busiest time is around 4 a. m., much as in the famous Halles of Paris. That hour is noonday for the truckmen and commission merchants, and their appetites are tremendous. The other night I visited the restaurant for a steak, and the waiter neglected to bring me a steel knife. I asked for one, and he came back with an ordinary silver knife whose edge had been whittled on a stone. "We have no more steel knives tonight," he said. "Our customers steal about three dozen a day, and we've run out."

Important Question

A certain spiritualist has built within the last few months a large, well-paying clientele from the ranks of New York's intellectuals. His specialty is to put himself in what he calls a mood and communicate with the dead. Artists, writers and society people are his customers.

The other night a group attended a seance, among them being a very wealthy, very well known society woman. She asked to communicate with her departed mother. The spiritualist went into his mood, and soon the voice of the mother spoke from beyond the grave. It was too much for the society woman, and she fell to weeping. She sobbed, sobbed and sobbed, until finally the medium warned her that his mood was leaving, and she'd better hurry up if she wanted to ask her mother anything.

Repressing her tears, the woman cried: "Tell me, mother, is there anyone else I know down there?"

Specialization

You can get a line on whither this age is drifting by visiting a certain parcel check room in the Times Square sector. At first glance it is just like all check rooms—filled with steel shelves just the right height to contain handbags and brief cases. But there is a difference. One shelf is of unusual size, and is devoted to drums—snare and bass. It is always full. There must be hundreds of jazz band drummers in town, and they have to park their instruments somewhere when they are not working.

Neat Trick

I have often been amused by the pretty silly idea of having a disabled airplane towed by another one. That is still impossible, but a pilot up in the Canadian woods recently thought of a trick almost as good. He landed on a frozen lake and found that another plane was marooned there. It hadn't quite enough power to lift itself off the snow. It would glide along on its skis, rise a few feet, and then squish back to the ice. So the newly arrived pilot, instead of giving the other plane a tow, gave it a blow. He placed his plane in front of the other one, and both taxied across the lake. The first ship left the ground easily, and was kept only two or three feet in the air. The backwash from its propeller really increased the air speed of the second plane, enabling this ship to lift itself free.

Old Stuff

St. John Ervine, the noted English critic and playwright says, "What jest is so new as the old jest? Every joke, indeed, is new to somebody, however, ancient it may be to you, and in a few years a generation grows up which has never heard the chestnut and is ready to agree with you that it is the funniest, and freshest, that ever was uttered."

That may be true in England but not even Englishmen can get away with that over here. A member of the young sophisticates reports that she heard Hugh Walpole in a lecture the other evening tell a story which she has already heard five times this winter. "Really, some one should tell him," was her reaction.

Sues Dentist for Not Filling Teeth With Gold

Butte, Mont.—All is not gold that glitters, and although his new false teeth glitter bright, Arthur Keyman is convinced they are not made of gold. So certain is Keyman that his "uppers" are not made of the precious yellow metal, that he has brought suit against C. N. Bucher, dentist, for recovery of \$475.

Great Britain Keeps Tea Drinking Record

New York.—Great Britain still holds the tea drinking record of the world, according to figures of the India tea bureau in the United States. This country is gaining in tea consumption, the statistics show. India furnished 73 per cent of the world's tea output, production for the year totaling \$63,000,000 pounds.

This amount, figuring 200 cups to the pound, means that 172,000,000,000 cups were consumed. Britons drank 424,000,000 pounds, or nearly 85,000,000,000 cups of tea in 12 months. Americans in the same period drank 18,000,000,000 cups.

GOTHAM DUPES PAY PALMISTS MILLIONS

"Hush Money" Part of \$25,000,000 Annual Toll.

New York.—Fortune telling nets \$25,000,000 annually in New York, according to John Mulholland, magician, lecturer and arch enemy of fraudulent fortune telling. Paris, he says, pays just \$8,000,000 for its glimpses into the past, present and future.

A major portion of this huge sum is nothing more than pure blackmail, Mulholland says.

"A man will tell his wife that he is going to work at his office, but he plays poker with the boys," Mulholland said, illustrating one form of blackmail. "The blackmailers get wind of it in ways which they alone can divulge. They make the man believe it is 'in his fortune.' They threaten to tell his wife he was seen in a cabaret with a blond."

"He wasn't with a blond, but he wasn't where he told his wife he was going to be—so he pays off."

"One group once worked three years to get its 'evidence.' A select girls' school was singled out. Its students were told 'Aunt Beatrice' would invite them to spend the week-end with her and send a liveried chauffeur to the school for her—all for a very nominal fee. The students took advantage of the opportunity and several visited 'Aunt Beatrice.'"

Pay Heavy Toll.

"Three years later, after they had been introduced to society and married, they paid heavily for the visit to 'Aunt Beatrice'—and a fortune teller claimed to have read their 'indications' in their palms."

"The blackmailing fortune tellers never collect toll from gullible persons, they scare vulnerable by threatening to tell an untruth that cannot be proved an untruth gracefully."

Mulholland will walk into your office, write something on a slip of paper and tell you to put it in your pocket without looking at it. He then causes you to write a series of letters, numbers and draw pictures on another piece of paper. You may write what you please at this suggestion, selecting what numbers, what letters and what pictures to draw. He then allows you to eliminate all but one number, all but one letter and all but one figure. You look at the slip of paper in your pocket and discover that you have left the same letter, number and figure that he wrote in the first place. He has caused you to do his bidding by suggestion.

Proof of "Power."

And to convince you that he knows his stuff he'll change a quarter to a half dollar, make it disappear and then reappear—all of this not six inches from your eyes, and the coin, apparently, never out of your sight until the moment it disappears.

But like all magicians he doesn't explain the trick to you. He tells you that he has mystified you in order to illustrate that magicians really know a lot about the phase of psychology which has to do with reactions. The magician's trick is knowing just what to do to make an audience react the way he wants to.

Jiki, Teiki and Nobe Are Tokyo Market Terms

Washington.—That the jargon of Wall Street, with its "bulls" and "bears," "trends" and "cycles" to worry the laymen, is not less intelligible than the vernacular of the Tokyo Stock exchange is indicated by a report of Japanese stock trading by Herbert M. Bratter of the Department of Commerce.

Three kinds of transactions are made—spot, known as jiki, deferred, or nobe, and teiki or long term. Spot deals form the least important group. The short-term deals are similar to the New York, while the long term are patterned after the London system.

Certain spot transactions called jikiya are effected outside of exchange hours by unlicensed brokers. The system has no official status.

Japanese traders have a significant barometer of market conditions in the stock of the Tokyo Stock exchange itself, known as Tokubu, which is widely traded in.

Japanese Stock exchange practices were modeled after the customs of the early rice exchanges.

Professed Vegetarian Runs Amok for Steak

Millville, N. J.—Obsessed by thoughts of succulent steaks, Leon Roun, fifty, a professed teetotaler in meat, fell off the vegetable wagon at sight of a plump Jersey cow in a pasture here, hacked the animal to death with a small pen knife and took about \$50 worth of beef home in a child's express wagon. He so testified yesterday when arraigned before Mayor Harry Jones.

When his housekeeper saw his cargo of meat she became irate, he said, and he threw it all in the Maurice river, maintaining his vegetarian status after all. Roun, a junkman, was sentenced to pay \$75 to the owner of the cow his brother paid for him.

Portsmouth, England, Bans Movies on Sunday

Portsmouth, England.—The city council of Portsmouth has decided by a 30 to 15 vote not to grant seven day licenses to motion picture houses. The decision prohibits the showing of pictures on Sunday evenings.

FASHION STRONG FOR BOLERO; PAJAMA ENSEMBLES POPULAR

WHAT a multitude of "idens" is covered by that most important exponent of style—the bolero. Be it of any type whatsoever, or it may even pretend to be a bolero, the fact remains that the bolero, this season, is an unerring expression of chic.

There is really no getting away from the bolero. In some form or other it is everywhere present in the mode. The filmy lace robe, the evening gown of crisp silk, the simple washable daytime frock, the informal

been invaded by the bolero. In fact, the bolero-bouise is a very swagger spring item. These really very new blouse types indicate the bolero by means of plaited frills or narrow circular ruffles so stitched as to convey the feeling of a short jacket.

The Pajama Ensemble.

In the matter of color, diversity and intriguing detail pajama costumes designed for youngsters keep pace with those styled for their elders. Most amusing and most winsome do

Interesting Afternoon Dress.

afternoon dress of dark crepe, each has its bolero.

Often the bolero is detachable, which makes it "useful as well as ornamental" when worn with a sleeveless gown. Then again it enters into the very making of the frock, which is true in regard to the interesting afternoon dress in which Helen Wright, singer and a leading lady of the films, poses for the accompanying picture. This bolero rather suggests a deep yoke effect. The sleeves declare a new fashion which calls for fullness below the elbow.

Boleros are that versatile one cannot hope to describe them all. They range from the simple Spanish type which suggest an abbreviated jacket, to interesting versions which tie at the front in a soft bow, or are fastened with a jeweled buckle or buttons. In the softer materials such feminized touches are possible as sprightly ruffles and platings outlining the hemlines.

Advance models feature gay silk print frocks made with a bolero to

little tots look in these fantastic garments, and the vogue is gaining in popularity right along.

A variety of interesting fabrics enter into the making of pajamas for little tots, outstanding among which are shantung, pongee, cotton crepe and pique, both in print and in plain, but always highly colorful.

The new soft silky pique which is featured in every fabric display of note this season, makes up charmingly into children's pajama outfits. For the three-piece lounging ensemble pictured the designer chose bright red pique, bordering it with white. Yoke-top trousers with suspenders are worn with a tuck-in of the same fabric in white. Seeing that the little girl in the picture is carrying her coat, perhaps to proudly call attention to the cunning suspenders, there is no way of judging its length. As a matter of fact this negligee coat reaches almost to the ankles.

It behooves every mother who is interested in togging her little folks in the latest to turn her attention to

Three-Piece Lounging Ensemble.

match the skirt, a sleeveless blouse of pastel shantung or crepe or lace-trimmed net completing the costume. Even the flimsiest printed chiffon or lace dresses are made with cunning separate bolero jackets. The charm of these bolero-inspired frocks is that they serve for both afternoon and evening wear, for the bolero, being a separate item, supplies the sleeves according to the call of the social hour.

For many models, the bolero is merely simulated, by means of ruffles, narrow platings or bands of the material stitched along one edge to the bodice foundation.

Even the realm of the blouse has

the pajama theme. There are so many types of pajamas and they are as practical for playtime hours as for lounging and sleeping.

Dainty pajamas for wee tots have sleeveless short jackets which fasten to one side with tiny frogs. A pocket also is very essential to the success of a child's pajama-bouise.

Pajamas for the young miss of sixteen or thereabout accent gay stripes. Clever ones are made of striped cotton broadcloth, in such striking effects as orange on white, also red and white.

NATURE'S WAY TO HEALTH. Absolutely FREE. Our booklet, "HEALTH IS CALLING TO YOU," is well written, medicine, retains your youth, life, and chronic ailments disappear, seventy even letters and pictures. Regardless of your age or ailment you owe it to yourself to read this booklet. Write today and receive this paper. We are interested in HEALTH and not dollars. No money required. FREE. LOUISIANA RADIUM WATER CO., Post Office Box 817, Shreveport, La.

Named for French Monarch. Louisiana was named by Robert de la Salle, Mississippi navigator, in 1682 in honor of Louis XVI of France.

Don't Go to Extremes To End Constipation

When bad breath, or a coated tongue, biliousness or headaches warn of constipation, don't take violent purgatives. There's no use when a candy Cascaret will stop the trouble in a jiffy; will cleanse your system pleasantly, and completely.

The relief you get so promptly from Cascarets is lasting. Cascarets are made from cascara, a substance which medical authorities agree actually strengthens the bowel muscles.

So Cascarets are a blessing to old folks with weakened bowels; to children; to anyone in need of establishing regular bowel habits. Ten cents a box—all drug stores.

There would be a greater demand for free things if they didn't cost so much.

Girls, be Attractive to Men

Nature Intended You Should Be

If your stomach and bowels don't function properly, the bloom of youth rapidly disappears. Doctor Pierce's Golden Medical Discovery usually meets the need. It invigorates the whole system, corrects the irregularities of the digestive organs and makes the blood redder. You have pep, vigor and vitality. Your eyes sparkle—your complexion clears up and the bloom of youth is yours. All druggists.

Write to Dr. Pierce's Clinic in Buffalo, N. Y., for confidential medical advice. There is no fee.

Faith's Victory. Faith makes the discords of the present the harmonies of the future—Robert Collyer.

After Nervous Breakdown

"I had a nervous breakdown and could not do the work I have to do around the house. Through one of your booklets I found how Lydia E. Pinkham's Vegetable Compound had helped other women and I went to the drug store and got me six bottles. It has done me good in more ways than one and now I work every day without having to lie down. I will answer all letters with pleasure."—Hannah M. Meyer, 707 N-16 Street, East St. Louis, Illinois.

The KITCHEN CABINET

(© 1920, Western Newspaper Union.)

Socrates thought that if all our misfortunes were laid in one common heap whence every one must take an equal portion, most persons would be contented to take their own and depart.—Plutarch.

SANDWICHES ALWAYS IN SEASON

Many directions for sandwich making tell us to butter the bread before it is cut from the loaf. This is not necessary if the butter is creamed. Creaming the butter makes it go farther, has a smoother spread and is more saving.

A hot sandwich may range from a dainty toasted morsel to serve with a cup of tea, to a substantial variety which is a meal in itself. Watch the lunch counter, which in most cities one finds in drug stores, department stores and wherever hungry people may be found in any number, you will note that a square meal with a cup of hot drink or milk may be made from a hot sandwich. Two slices of bread with thin sliced meat and plenty of good gravy over it provides a fairly substantial and sustaining dish.

Hot Beef Sandwich.—Take one pound of chopped beef, one small onion and one green pepper (minced). Brown in a tablespoonful of butter, season to taste with tomato sauce and add a teaspoonful of flour. Place in buttered buns and place in the oven to keep hot.

Hot Tomato Sandwich.—Broil two thin slices of bacon until crisp. Toast two thin slices of bread—whole-wheat is preferred. Put sliced tomatoes on one slice, add the bacon and cover with another slice. Put into a hot oven or heat carefully on a hot griddle.

Broiled Open Sandwich.—Cut rather thick slices of bread, spread with creamed butter, lay on a thin slice of cooked ham, over this a thin layer of cheese. Place a thick slice of tomato on top and sprinkle with salt, pepper and mustard. Broil until the cheese melts. Serve at once.

Cheese and Pepper Sandwiches.—Pour boiling water over three large peppers, let stand a few minutes then rub off the outer skin and remove the pith and seeds. Put the peppers and a half pound of cheese through the food chopper, add one-half teaspoonful of salt, paprika and mustard and a dash of cayenne. Mix and blend thoroughly. Cut bread one-fourth inch thick and butter evenly. Spread half the slices with the pepper and cheese mixture, press on the top slices and toast in a hot oven.

AFTERNOON TEA DAINTIES

The cup of tea with a few congenial spirits, gives one an opportunity to enjoy a few moments of conversation, which in this day and age seems impossible over the bridge table.

Almond Sandwiches.—Mash one-half of a package of cream cheese with a tablespoonful of lemon juice, adding more if needed to give the right consistency and flavor. Now add one-eighth of a pound of ground almonds. Spread on buttered slices of white bread, cut into diamond-shaped pieces. Put three small pieces of candied orange peel down the center of each sandwich.

Date Sandwiches.—Take one cupful of ground dates, one tablespoonful of orange juice, mix well, add one-fourth cupful of ground pecans and one-eighth teaspoonful of cinnamon. Spread on buttered slices of bread into finger-sized pieces and decorate with half a pecan.

Small cakes, french pastry, cookies and wafers, vie with the sandwiches on the tea table.

Candies, preserves, conserves, as well as candy wafers, add to the delights of the afternoon cup of tea.

Lemon Ice Box Cookies.—Take one cupful of shortening, one and one-half cups of sugar, three beaten eggs, two tablespoons of lemon juice, one teaspoonful of grated lemon peel, five cups of flour, one-half teaspoonful of salt; candied orange peel, chopped nuts, or raisins may be used as top decorations. Roll up and place in the ice chest. Cut into thin slices in the morning and bake quickly.

Graham Fruit Bars.—Mix together one-half teaspoonful of salt, one cupful of flour, one cupful of graham flour, three-eighths cupful of water, one-half cupful of shortening, one teaspoonful of lemon juice. Take one-half cupful of chopped dates, one-half cupful each of chopped figs, raisins and walnuts, one-fourth cupful of sugar, the grated rind of a large orange and one-fourth cupful of orange juice.

Roll out the dough into very thin sheets and fit to the bottoms of square or oblong pans. Make a filling of the fruits and nuts, sugar and orange juice well mixed. Spread over the dough about one-fourth inch thick, cover with another layer of the dough. Bake in a hot oven until lightly browned. Cut into bars and let cool in the pans.

Neenie Maxwell

THREE INDIAN CITIES

In the Palace of the Mirrors, Lahore.

(Prepared by the National Geographic Society, Washington, D. C.)

THE movement toward the independence of India has thrown into prominence three of the pivotal cities of the peninsula. From Delhi, capital of India, the British officials are keeping close watch of developments; in Lahore met the All India Nationalist congress which issued the declaration of independence; and in Calcutta, greatest of the Indian cities, there was recently a huge demonstration in favor of independence.

If one spot were singled out in history-steeped India as most historic of all, probably it would be the city of Delhi, for both written records and oral traditions extending back for ages tell of power wielded from Delhi's site. New Delhi, constructed to be the seat of the Empire of India, has been built on ground where cities have risen and passed away through the centuries, and about which are situated beautiful and striking monuments of one of the world's most powerful empires of the past.

Though legend makes Delhi a place of importance from earliest times, history takes no account of it until about 1050 A. D., when it was the seat of a Hindu ruler. It was captured by Mohammedan invaders from Afghanistan in 1193, and from that time onward was the capital of a Mohammedan Indian empire. Delhi, in the days of the Mohammedan conquest, lay to the south of the present city, and there where the new power was set up, the first Mohammedan ruler, Kutub-ud-din, built in celebration of his conquest a tower of victory, the Kutub Minar, which stands today and has been called "the most perfect tower in the world."

Capital of the Great Moguls.

Timur the Lame (Tamerlane), the Tatar scourge of Asia toward the end of the fourteenth century, swooped down from Samarkand in 1398 and sacked Delhi; and in 1526 his lineal descendant, Babur, took the Tatar hordes again into India, captured the city, and founded the Mogul empire, through the fame of which Delhi is best known to western ears. In 1638 Shah Jahan, the Augustus of the Mogul emperors, built the present Delhi to the north of the old city and embellished it with mosques and palaces of great beauty.

Because of its rich history as the fountain-head of power in India, Delhi—not Calcutta, which was then the capital—was chosen in 1877 as the site of the Durbar, or gathering of native kings and princes, at which Queen Victoria was proclaimed empress of India. Again in 1903 Delhi was chosen when a Durbar was held to crown King Edward VII emperor, and once more in 1911 when George V assumed that title. On the latter occasion the new emperor announced that this ancient city of emperors would be restored as the capital of India and its 250,000,000 subjects.

The following year the viceroy and his administrative council moved into temporary quarters a few miles north of the city walls of Delhi. It is to the south of the Delhi of recent decades, near the site of the more ancient Delhi, however, that the new permanent capital, planned on an imperial scale, has recently risen. The city has been designed to cover approximately 36,000 acres and to house more than 50,000 people connected with the administration of the imperial government.

To the superficial observer of the work recently in progress it might appear that there have been rising the buildings of a great world exposition. Broad avenues have been laid out and planted with trees. A central feature is an imposing Processional way at the end of which rises the main building of the group, Government house, home of the viceroys of India. It includes guest chambers and spacious state dining rooms, ballrooms and reception halls. On either side of the Processional way are secretariat buildings.

Lahore is the capital of Punjab state, and one of the important crossroads of India. Not many curious travelers are found there, for the city

is off the beaten paths of tourist travel. Most tourists visit Calcutta and Bombay and perhaps the interior cities between them, but Lahore, lying about 200 miles northwest of Delhi, is a bit out of the way. Yet trains from important southern Indian cities connect with lines to the city; railroads from the foothills of the western Himalaya mountains touch it; there is a line from Lahore to the Afghan border on the north; and from the west come trains from Karachi, popular landing field for Europe-Asia aviators.

Lahore is Colorful.

Lahore is about as old as the Christian era and in some old, walled portions of the city there has not been much change since the city was first built. Some of the streets are so narrow that sightseers who engage elephants for a tour watch the natives scurry into doorways and, as the elephants pass, flatten themselves against the wall of unattractive houses that flank these byways.

Every house has at least one enclosed balcony or bay window and no two adjoining houses seem to have them protruding from the same floor. And no two balconies are the same size. This feature of Lahore house construction, and the further fact that Lahore's early builders apparently gave no thought to an even building line, make the native thoroughfares a jumble of uneven masonry and wood.

There are few women on the streets of Lahore but no matter how many windows a house has, nearly all of them frame a bronzed feminine face. Some of the women wear shawls, others adorn themselves with trinkets—stone-encrusted disks pierce the left sides of their nostrils, beads nearly cover the bright waists and bronzed necks of the wearers, and earrings dangle from the ear lobes to the shoulders.

At the bazaars, the travelers mingle with a colorful horde who watch crafty merchants drive home sales of hammered metalware and earthen vessels of all shapes and sizes, jewelry, and many other products of local manufacture.

Calcutta Huge and Busy.

Calcutta is one of the most progressive cities of the East, with all the modern devices to handle its tremendous commerce and entertain its native and foreign population. In less than 250 years it has become the largest city in India and second only to London in the British empire.

When Job Charnock of the East India company set up a trading station at Kalkuta in 1690 the insignificant native village occupied a narrow stretch of dry land on the left bank of the mud-laden Hooghly with fever-infested swamps surrounding it on the three other sides.

Charnock knew the products of the rich Ganges and Brahmaputra valleys could be routed through Kalkuta and the swamps would protect his station from unfriendly Indian neighbors, but his wildest imagination, perhaps, did not lead him to vision the Calcutta of the Twentieth century.

Today three important railroads converge at Calcutta. The treacherous shifty channel of the Hooghly is a parade ground for commercial vessels of all sizes, flying flags of the world. Nearly ten miles of modern wharves and warehouses, equipped with all modern devices, receive and export many millions of dollars worth of jute, tea, hides, oil seed, lac, cotton, coal and other products of Bengal and surrounding provinces. And many acres of the old swamp land have been reclaimed, forming beautiful parks and sites for government buildings and palatial residences of "jute kings" and "tea kings."

To the traveler who approaches Calcutta by water, its growth is a mystery. At the mouth of the Hooghly, the indigo blue water of the Bay of Bengal turns to a dirty brown. For much of the 80-mile trip mud flats and water-logged forests form the river-side scenery with no evidence of civilization save for the commercial craft plying the river. Only the most skilled pilot can steer a vessel up the shifty channel.

Needless Pain!

Don't be a martyr to unnecessary pain.

Lots of suffering is, indeed, quite needless.

Headaches, for example. They come without warning, but one can always be prepared. Bayer Aspirin tablets bring immediate relief. Keep a bottle at the office. Carry the small tin in your pocket. Then you won't have to hunt a drugstore, or wait till you get home.

And don't think Bayer Aspirin is only good for headaches, sore throats, and colds! Read the proven directions for relieving neuralgic, neuritic, rheumatic, and other aches and pains. Remembering, of course, that the quick comfort from these tablets is not a cure; for any continued pain, see a doctor.

Bayer Aspirin is genuine. Protect yourself by looking for that name. Always the same. Always safe. Never hurts the heart.

BAYER ASPIRIN

Aspirin is the trade mark of Bayer Manufacture of Monacoeleindorfer of Balleyleland

Record Potato Crop
An officially recorded crop of 1,145.17 bushels per acre is the present record. The average crop per acre for the United States is 115 bushels.

You can always bank on finding a well-filled pocketbook interesting.

A Calamity Looms
Doctor—Yes, my dear madam, this tincture of iron is going to make you twenty years younger.
Old Lady (Joyfully)—You don't say! But, goodness gracious, doctor, they might take my old age pension away from me.

For any BABY

We can never be sure just what makes an infant restless, but the remedy can always be the same. Good old Castoria! There's comfort in every drop of this pure vegetable preparation, and not the slightest harm in its frequent use. As often as Baby has a fretful spell, is feverish, or cries and can't sleep, let Castoria soothe and quiet him. Sometimes it's a touch of colic. Sometimes constipation. Or diarrhea—a condition that should always be checked without delay. Just keep Castoria handy, and give it promptly. Relief will follow very promptly; if it doesn't, you should call a physician.

All through babyhood, Castoria should be a mother's standby; and a wise mother does not change to stronger medicines as the child grows older. Castoria is readily obtained at any drugstore, and the genuine easily identified by the Chas. H. Fletcher signature that appears on every wrapper.

Ole Was Impressed
Ole, new in America, wrote to Sven in Sweden, "It's a great country, Sven. I went to church and the congregation arose, singing, 'Ole, Ole, Ole, Lord God Almighty!'"—Capper's Weekly.

Merely Incidental
"I hear that Gawlef has got a \$2,000 car."
"How did he get the \$2,000?"
"Oh, he hasn't got that yet."

Has Busy Eyes
"Is your husband interested in reading history?" asked the caller.
"No," replied his wife, "he is more interested in what is passing than he is in what is past."

Electrical Show Note
A reformer says he has lamped the current styles in bathing suits and found them shocking. And what's more, their scandal-power is high.

THE MANGOLDS, 391 Orvis Avenue • SAN JOSE, CALIFORNIA

What the automobile has taught women about household lubrication

Experience with motor cars has taught women that moving parts must be protected against wear by a film of oil. Many of them haven't learned, however, that moving parts of sewing machines, vacuum cleaners, lawn mowers, washers, and other mechanical devices must also be protected against dirt and rust.

3-In-One Oil not only lubricates; it also cleans and protects. It is different from all others, because it is a scientific blend of three high grade oils—animal, mineral and vegetable. 3-In-One is the oil you should use on mechanical equipment if you want best results.

Don't risk your expensive household devices by using oil that does only half the job. Insist on the old reliable 3-In-One. It costs little more to buy and much less to use. At good stores everywhere, in 15c and 30c sizes. For your protection, look for the trade mark "3-In-One" printed in Red on every package.

Mrs. S. C. Carr

Dallas Lady's Child Gained Weight Fast

Mrs. S. C. Carr's experience with her little girl is just one of the many cases which we hear about. Mrs. Carr says "My little Nettle Virginia had something like the flu. When it left, she was puny, had no appetite, and was very cross and feverish. I had known for years that Nature's Remedy is such a dependable medicine and I decided to give her a course of the Juniors. Nobody knows how happy I am to see her eat heartily again, and laughing and playing like she used to."

Very often those simple little chocolate coated Nature's Remedy Juniors (NR Jr's) are all the system of a child needs to straighten it out. Then the wastes can't remain in it to form the acids which sour the stomach, bind the bowels and rob the blood of the red corpuscles. It must have plenty of it to keep children from becoming puny, feverish, and pale. Any druggist will recommend NR Juniors to you for your child. Only 25 cents.

"Leftover" recipes encourage young housewives to cook more than is needed.

Denver Mother Tells Story

Nature controls all the functions of our digestive organs except one. We have control over that, and it's the function that causes the most trouble.

See that your children form regular bowel habits, and at the first sign of bad breath, coated tongue, biliousness or constipation, give them a little California Fig Syrup. It regulates the bowels and stomach and gives these organs tone and strength so they continue to act as Nature intends them to. It helps build up and strengthen pale, listless, underweight children. Children love its rich, fruity taste and it's purely vegetable, so you can give it as often as your child's appetite lags or he seems feverish, cross or fretful.

Leading physicians have endorsed it for 50 years, and its overwhelming sales record of over four million bottles a year shows how mothers depend on it. A Western mother, Mrs. R. W. Stewart, 4112 Raritan St., Denver, Colorado, says: "Paymond was terribly pulled down by constipation. He got weak, fretful and cross, had no appetite or energy and food seemed to sour in his stomach. California Fig Syrup had him romping and playing again in just a few days, and soon he was back to normal weight, looking better than he had looked in months."

Protect your child from imitations of California Fig Syrup. The mark of the genuine is the word "California" on the carton.

POULTRY

RAPID GROWTH IN RAISING TURKEYS

Fowls Utilize Areas of Otherwise Profitless Land.

The turkey industry has made a rapid growth in Idaho in recent years, says P. M. Moore, extension poultry specialist with the University of Idaho college of agriculture. It has grown since 1922, when turkeys were rather insignificant in volume, until now it has become an important industry in point of volume. The bulk of the original stock was small and of poor quality. There was very little native stock at that time which was suitable for breeding purposes. There were a few breeders in the state who had been importing good breeding stock, but the general average was of inferior quality.

The increased volume soon attracted the large produce dealers, who began bidding for the business. Grades, conforming to those in general use throughout the country, were applied. Not until then did the growers realize the value of breeding to improve the quality of the stock. The few good local breeders were unable to supply the demand for better breeding stock. Breeding stock was imported on a large scale. Some of it was of high quality while much was inferior, but most of it was an improvement over the average of the native stock. Improvement was rapid, which developed a rapidly growing interest in turkey breeding as an enterprise.

Demand for better breeding stock led to a system of accreditation similar to that attaining such success in the poultry industry. The popularity of this accreditation work in turkey raising, says Mr. Moore, is apparent from the growing demand for the service.

Clean Ground—Essential for Turkey Success

Recent findings have shown that the organism which causes blackhead in turkeys lives in the soil. Consequently if turkeys are raised on contaminated soil they can hardly escape the disease. The danger will to a large extent be averted if a three-year rotation is followed.

Experimental findings have shown that the cecal worm found in chickens is a menace to the turkey. It is believed that if the young turkeys are affected with cecal worms the injury they do to the lining of the intestinal walls is sufficient to permit the entrance of blackhead organisms into the blood stream, thus infecting the bird with the incurable disease and the one most dreaded by turkey breeders. The remedy, therefore, is to keep the young turkeys on clean ground and entirely separate from chickens.

Poultry Hints

To get best results, chicks of no breed should be hatched after the first of May.

If due attention is not paid to the vitamins in the ration, disappointments are in store.

The late hatched chicks are subjected to many parasites and diseases which the earlier ones escape.

Oyster shell, limestone or other lime-bearing material help to supply hens with the calcium they need.

The summer egg production from the early maturing pullets is just as good as from the late maturing pullets.

See that the house receives no moisture because of location, and make sure that lack of ventilation does not create moisture within.

Thorough examination of the interior of the poultry house for mites and bedbugs might reveal legions of these unwelcome guests. If they are present, paint the roosts, roost supports, and rear wall with pure carbolineum.

It is almost impossible to do a good job of culling if the farm stock has been improperly fed.

Most of the heavier breeds will give better results if hatched previous to April 1. The chicks not only grow better but the pullets will start laying earlier in the fall.

Experiments have proved that chickens can be kept in confinement throughout their lives, without restricting their growth or egg production.

Tuberculosis in poultry can be definitely diagnosed by a post mortem or by the tuberculin test given by a veterinarian.

Frequent culling of the slow-feathering and slow-growing birds during the range period makes the culling job easier when the chickens are housed.

Photoelectric cells have been applied to an egg candling machine. It automatically selects the bad eggs and rejects them as they pass on a belt in front of the cell.

Outdoor Exercise Very Best Tonic

Iowa Farmer Does All His Work With Horses, Keeping Daily Record.

Daily outdoor exercise is the best tonic ever prescribed and the cheapest insurance against sickness or death.

This might be a doctor prescribing for his patient, but it isn't. It is a farmer, telling in the Breeder's Gazette about the management of his work horses, of which at March 1, 1929, he had 35 head on a 720-acre farm in central Iowa. He does all his farming with horses, keeping a daily record of labor costs so that he knows just what it costs him to produce an acre of corn, or oats, or pasture.

Finds Daily Labor Cost.

In 1928 this farmer, Clarence Hill, counting his original investment in horseflesh, his labor, profits from sales of horses and from manure fertilizer, his feed and incidental charges, found that he had an average daily labor cost of only 61.3 cents per horse. The record involved 22 horses in harness with an average of 98.6 days of work each. When he computes his costs for the 1929 season (this fiscal year closes on March 1) he expects to find a cost of only 50 cents per day per horse.

Mr. Hill feeds his horses according to work performed. In the winter they

are pastured where they have access to stalk-fields, straw-stacks, and to blue grass; during February and March each horse is fed a sixth of a bushel of corn every day, while still out on pasture, to put him in flesh for spring work; and on heavy work he receives a ration consisting mostly of oats with some corn, and also mixed hay until grass becomes firm. Then the horses are turned out each night on good blue grass sod.

Azoturia Unknown.

"Azoturia is unknown," Mr. Hill declares, "simply because we are kind enough to turn a horse out, even in the rain."

Mr. Hill uses the 9 horse multiple hitch, tying his horses in and bucking them back according to the system taught by the Horse Association of America. He declares he is "operating more economically with horses in terms of final power cost per bushel produced" than he could by the use of any other form of power; also that use of his big teams saved him in 1928 more than \$200 in hired labor bills alone. He buys his horses as thin two-year-olds, turns them on to grass, puts them into harness as three-year-olds, and sells them as coming seven-year-olds when their market value is highest. In this way he finds his horses an investment, the same as steer calves or stock pigs, he declares.

OPEN SHEDS FOR DAIRY COWS PRACTICAL IN MILD CLIMATES

Provide Means of Preserving Fertilizer Elements.

(Prepared by the United States Department of Agriculture.)

The open shed or covered barnyard is a practical method of housing dairy cows in moderate climates, says dairy officials of the United States Department of Agriculture.

It provides the best-known method of preserving all the fertilizing constituents of the manure. When there is plenty of bedding, cows in open sheds keep cleaner than those confined in stanchions, even when manure is allowed to accumulate for several months at a time. At the experiment station of the bureau of dairy industry at Beltsville, Md., 68 per cent more bedding is used in the open shed than when the cows are stanchioned.

The open-shed method permits freedom of action of the cow and gets her off the hard floors of the cow barn. Also where a small milking barn is used, the open shed is a cheaper method of housing than the customary dairy barn.

The bureau of dairy industry is now building sheds at some of its field stations and dividing them into pens, so

the herd may be divided into small groups. Mangers with rigid stanchions are built at the feed alley, so the cows may be fastened and fed individually. This is desirable because timid cows are often fought away from feed racks when the cows are not fastened at time of feeding. Cows housed in open sheds should be dehorned.

Garden Transplanting Essential Operation

One of the essential operations of gardening is transplanting. When a man can start with 200 lettuce seedlings, put them through two transplantings and produce 200 lettuce plants in the garden, he must have some knowledge; that record isn't due to luck.

The first step in transplanting is to keep as much of the soil about the roots of the little plant as possible. Resetting may be such a great shock to a plant that its death will follow. Careless removal from the plant-bed means that practically all the feeding roots of the plantlet have been left behind and serious wilting is certain to follow the operation.

Do the work in the afternoon or on cloudy days. Make the hole in the row large enough to take the ball of earth about the plant. It is a good plan to put a small amount of water in the hole before resetting. Put the plant in its new home, raise in some dirt, and press firmly into the soil. Be careful not to injure the base of the plant with the thumb and fingers. Pour a little more water on top of the hole and after it settles cover with dry soil.

In warm climates, it is an excellent plan to put a shingle on the south side so as to protect from the midday sun. Also put a small paper collar around the plant to protect it from cut-worms. This latter is of special importance when transplanting tomatoes, peppers and plants of like character.

Cement Construction Is Increasing on Farms

Some of the modern farm buildings now being erected are practically free from fire risk. The use of cement, which has grown rapidly on farms, is doing a great deal to reduce the possibility of loss.

Not only is a concrete building safe from burning, but it adds to the safety of other buildings because it will not carry the flames that so often travel from one building to another until all are burned. It acts as a fire-stop, and helps greatly in controlling an extensive fire.

Agricultural Notes

If the soil moves away, yours is the next move.

Frozen silage should be fed immediately after it thaws.

Business farmers will answer letters just as promptly as will any other business men.

Skirted Dignity

A stunning black panne velvet gown with real lace yoke that points out over the shoulders and to a V in front has tremendous dignity in its long skirt that sweeps the ankles all around.

Lapin for Chic

Lapin is indeed one of the season's smartest furs and one sees it as a trimming for formal wraps as well as forming the most delectable of youthful fur coats.

Girls Adore Velveteens

Velveteen is a fabric every growing girl adores, for the reason that it has an air of chic that seems to the youthful mind very elegant. Printed velveteens or weaves with a misty fleckle of white or color may be included in the list of sturdy materials.

Mesh Hosiery

Mesh hosiery, in new evening shades, have mesh heels, too. The darker sunset shades are worn now more than any light ones.

Lesson for March 16

THE PARABLES OF THE KINGDOM

LESSON TEXT—Matthew 13:24-32.

GOLDEN TEXT—The kingdom of God is not meat and drink, but righteousness and peace, and joy in the Holy Ghost.

PRIMARY TOPIC—The Whole World for Jesus.

JUNIOR TOPIC—The World for Christ.

INTERMEDIATE AND SENIOR TOPIC—What Our Religion Means to Us.

YOUNG PEOPLE AND ADULT TOPIC—What Christianity Means to the World.

The things set forth in these parables only apply to the church in the measure that they permeate that body by virtue of its being formed within this period. It should be observed that they set forth the "mysteries" of the kingdom.

1. The Wheat and Tares (vv. 24-30, cf. 36-43).

The sowers. The sower of the good seed is the Son of Man (v. 37), and the sower of the tares is the devil (v. 39).

2. The growing crops (v. 26). There is a striking resemblance in the growing crops. The chief peril of the devil is that he transforms himself into an angel of light (II Cor. 11:14, 15).

3. The harvest (v. 30).

There comes a time when the fruit of the crop shall be gathered. The separation is made by the angels under the direction of the Son of Man. For the tares there is a furnace of fire. For the wheat there is the Lord's garner.

4. The Mustard Seed (vv. 31, 32).

1. Its unimportant beginning (v. 1). It begins as the least of all seeds. Not only was Christ, the King, of humble parentage, but His disciples were unlettered fishermen. Likewise, through the centuries, not many wise and not many noble have been called.

2. Its vigorous growth (v. 32). The work inaugurated by Christ has become mighty in power.

3. Its lodging capacity (v. 32). The birds which find lodgment in the tree do not represent the children of men who find safety and salvation in the church, but the predatory beings who have found shelter in the church, though they are no part of it.

4. The Leavened Meal (v. 33).

1. The meal in Scripture means something nutritious and wholesome. It was used in one of the sweetest offerings which typified Christ (Lev. 2:13, R. V.).

2. The woman.

The woman is the administrator of the home. Her responsibility is to take the bread provided by the head of the home and prepare and distribute it to the children. It means then that the woman, the administrator, has introduced false doctrine and thus corrupted the children's bread.

3. The leaven.

In Scripture, leaven is invariably a type of evil (Ex. 12:15; Matt. 16:6, 12; I Cor. 5:6-8; Gal. 5:8, 9). It means that in this age the truth of God would be corrupted by worldliness and unbelief.

4. The hidden treasure (v. 44).

1. The field (v. 38). Christ's own interpretation makes this the world.

2. The treasure. The treasure means Israel (Ps. 135:4; Deut. 7:3-8).

3. The purchaser. No one but the Son of God had sufficient resources to buy the world (John 3:16).

4. The purchase price. This was the precious blood of Jesus Christ, God's beloved Son (I Pet. 1:13, 19).

5. The merchantman seeking pearls (vv. 45, 46).

1. The merchantman is Christ. The Son of Man has come to seek and save that which was lost (Luke 19:10).

2. The purchase price. Christ impoverished Himself (Phil. 2:6-8) to purchase the one pearl of great price (Eph. 5:25).

3. The pearl of great price. This is the church (Col. 1:18).

4. The dragnet (vv. 47-50).

1. The sea. The sea in Scripture denotes peoples or multitudes (Dan. 7:3; Rev. 17:15).

2. The dragnet. The dragnet cast into the sea means the sowing of the seed by the Son of Man.

3. The dragnet drawn to the shore when full means that when God's purpose for the present age is full, account will be taken of the results.

4. The separation made by the angels. This will take place at the end of the age.

5. The destiny of the bad fish. The angels shall sever the wicked from among the just, and shall cast them into the furnace of fire where there shall be weeping and gnashing of teeth.

The Bravest Men

Our bravest men are often those of whom the world hears the least. Life to them is a constant struggle. They meet their obstacles every day and pass them in silence.—Presbyterian Record.

When You Are Right

When you are in the right stand up for it, no matter if the heavens fall; if you lose every friend you have, better—D. L. Moody

YOU HAVE A DOCTOR'S WORD FOR THIS LAXATIVE

In 1875, an earnest young man began to practice medicine. His family doctor, he saw the same harsh purgatives for constipation and began to search for something harmless to the sensitive bowels.

Out of his experience was born a famous prescription. He wrote thousands of times. It proved an ideal laxative for old and young. As people saw how marvelously it acted—stagnant bowels were moved and bad breath, headache, nervousness, nausea, gas, poor appetite and such disorders, are relieved—the prescription, it became necessary to put it up ready for use. Today, Dr. Caldwell's Syrup Pepsin, as it is called, is the world's most popular laxative. It varies from Dr. Caldwell's original effective and harmless formula. All drugstores have it.

DEVELOPMENT

Interesting stories of development are found in most every county of the South Plains. Newspaper news stories reflect the growth and development in a way that there is no mistake that the South Plains is undergoing one of the most remarkable growths that any community could hope for. We hear a great deal about hard times, and money is scarce. This is no mistake. It is a fact that actually faces this community, as well as all other sections, except possibly a local condition that might bring about a little better condition existing just now than ever before. There has been a great increase in the population of the South Plains during the past year. The school enrollments show this, the number of automobiles registered shows this to be a fact, and the number of poll tax receipts issued shows that there are many more voters in the counties this year than last. We have just read in the Lamb County Leader, published at Littlefield, that 4,164 poll tax receipts were issued this year compared with 2,977 last year. Other counties no doubt are in proportion, and means several things all of which is summed up in the one statement that the South Plains is growing and developing as possibly no other section of Texas is. This, too, in the face of what most of us have been talking—the closest times in many years.—The Plains Progress, Lubbock.

living in the west part of Littlefield, was found dead in bed about six o'clock Saturday morning.

Apparently the baby was in a healthy condition when its mother arose about five o'clock, it taking the usual amount of nourishment. According to report, one of the other children went up to the bed for something and discovered the lifeless form.

Interment was made in the local cemetery Saturday afternoon, Burleson & Co., undertakers, in charge of funeral arrangements.

GETS ADVANCE SHOWING

W. J. Chesher returned Friday from a business trip to Dallas. While there he was successful in securing for the Palace Theatre, of which he is manager, news service to be shown here in the future within three days after being issued.

This courtesy was extended Chesher due to the fact that he was associated with the Paramount company in their Dallas office previous to assuming management of the local theatres. Several much larger cities in the state will show the reels after being used here.

Help keep Littlefield clean!

LFD. SCHOOL NEWS

HONOR ROLL

The following students have made an average of 90 or above the past six weeks.

First Half of Plane Geometry.—Mary Jane Bird, Clara Nell Baldwin, Brown Chappel, Joe Hale, Darrel Hemphill, Jewell Hargrove, Willie Hukel, Ima Jewell Lowe, Hazel Tolar, Eva Lenora Bird, Jewell Byrd, Odell Crow, Agnes Hauk, Mavis Jones, Katherine Yohner.

Last Half Plane Geometry.—Dorothy Harrison, Hatton Simpson, Witty Davenport, Mary Bell Burt, Flavin Tolar, Edgar Walters.

Home Ec. II.—Fleddie Dunagin, Dorothy Harrison.

Spanish I.—Fay Allen, Billie Burton, Helen Rumbach, Inez Wallace, Virginia Staggers, Tilden Wright, Suzie Hiebert, Alcyone Jones, Bernice King.

Spanish II A.—Grace Alice Rook. **Spanish II B.**—Mary Bell Burt, Fay Jones, Lucile Aven.

Math I.—Sue Brannen, Ella Mary Gattis, Brady Hale, Ivy Lackey, Helen Rumbach, Sammie Williams, Inez Wallace, Morris Pierce, Beaumont Anderson, Eva Leta Coursey, Harris Evans, Travis Houck, Richard Herring, Nell Ross, Robert Stone, Leon Stansell, Tilden Wright, Hilborn Rogers, James Norman, George Lightsey, Frances Seeley, Mary Lee Stansell, Odessa Ranne, Earl Taylor and Rayburn Carpenter.

Math II.—Lilly Montgomery, Marie Banks.

First Half of Math III.—Mary Jane Chappel, Joe Hale, Darrel Hemphill, Jewell Hargrove, Willie Hukel, Ima Jewell Lowe, Hazel Tolar, Eva Lenora Bird, Jewell Byrd, Odell Crow, Agnes Horak, Mavis Jones, and Katherine Yohner.

Last Half of Math III.—Dorothy Harrison, Hatton Simpson, Witty Davenport, Mary Bell Burt, Flavin Tolar, and Edgar Walters.

English I.—Lois Noffsinger.

English II.—Nina Anderson, Ruth Gray, Corine Alexander, Bill Street, C. L. Harless, Ben Harrison, Fay Jones, Hazel Tolar, Leta Faye Woody, Carson Glass, Virginia Staggers, Glendon Shirley, Veneta Seely, James Walden.

Home Ec. II.—Dorothy Harrison and Fleddie Dunagin.

Biology.—Louise Campbell.

Latin II.—Carson Glass, Marie Terry and Edgar Walters.

History III.—Hatton Simpson and Verna Royce.

History II.—Faye Jones.

DEBATE TOURNAMENT

The debaters of Lamb County met at Lubbock, Friday, March 7th for a tournament to eliminate teams for County Interscholastic League.

The drawing took place, and immediately afterwards the Littlefield and Olton boys went to the Textile Building where they debated. The decision was 2-1 in favor of Olton, negative. At the same time the Littlefield and Amherst girls debated in the administration building. The decision being 3-0 in favor of Littlefield. (affirmative).

Immediately after these debates Littlefield and Olton girls debated, which ended in a decision in favor of Olton (negative) 3-0.

The second session began at one o'clock with Littlefield and Spring Lake boys debating. The decision was in favor of the Littlefield boys 2-1 on the negative. At the same time Amherst and Spring Lake girls debated. The decision being 2-1 in favor of the Spring Lake team (negative).

At two o'clock Littlefield and the Spring Lake girls debated. Littlefield won on the negative side 3-0.

Three o'clock, Olton and Spring Lake girls debated. Decision 3-0 in favor of Olton (affirmative).

The final percentage was taken, making Olton first and Littlefield second in both boys and girls. The judges were the members of the Tech debating club. Olton and Littlefield will again meet in battle, March 21, at Sudan to determine the championship in debating of Lamb County.

CLOTHING CONTEST

The second year Home Economics students completed their tailored dresses last week. At the close of the project they were judged in order to select the best one to be sent to the State Clothing Contest in Houston next May. Miss Georgia Chapman, the home economics teacher from Sudan, acted as judge. She complimented the work done by the Littlefield girls. The girls who won places were as follows:

Bobbie Fay Davis, first place; blue and white flannel sport dress.

Sidney Yantis, second place; green and white sport dress.

Mary Duncan, third place; yellow linen sport dress.

SPANISH CLUB ENTERTAINS

The Spanish club, sponsored by Miss McKee, entertained with a very

enjoyable program in Assembly, February 27.

The entire program was carried on in Spanish. Two songs, "La Paloma" and "When the Roll is Called Up Yonder" were sung in Spanish. Four members of the club dramatized "The Three Bears" in Spanish, but the event which seemed to be enjoyed most of all was a thrilling, blood-curdling, daring bull fight. The spectators seated in the balcony were intensely interested in the realistic view presented in the arena.

BASEBALL WORK-OUT

There was a representative number of baseball fans and players attending the first work-out of the coming

season, according to Arthur Mueller who, with others is taking an active part in the organization of the Littlefield team for this year.

While some of the last year's regulars were absent, the rest spent a busy afternoon in pepper games, batting practice and in infield workout. Indications are evident that Littlefield will have one of the strongest teams ever when the opening gong is sounded.

Tuesday night a meeting was called at the Texas Utilities office for the purpose of organizing the team for the coming year.

MISSIONARY MEETING

The Missionary zone meeting of the Methodist church was held at Am-

herst Friday, the 7th.

The following Littlefield ladies attended: Mesdames A. G. Hemphill, T. Wade Potter, W. H. Gardner, Whitaker, Baird, Luther Kirk, D. G. Hobbs and E. J. Eagan. Mesdames Potter and Gardner had numbers on the program.

The ladies of the church served refreshments at the close of the meeting.

As Mrs. Helen Rowland of Evanston, Ill., stepped down 6 inches she heard her leg snap and found she had suffered a fracture.

Nicholas Varstchall, a peasant living near Sofia, is the proud father of his 43rd child. He has been married five times.

A BIG POTATO YEAR

Regardless of how we may fare as to other agricultural products in 1930 promises to be a big potato year. Farmers intend to plant a larger acreage than they did last year, it is indicated by the U. S. Agricultural Bureau. Intended acreage is estimated now at 3,570,000 for harvest next fall, with the average yield expected to be 118 bushels per acre. The quantity of potatoes held by growers and local dealers in the 35 late potato states on Jan. 1, available for sale, was smaller than last year. In the 19 Northern states usually having a merchantable surplus for shipment, merchantable stocks were materially low last year, except holdings in Maine and Washington, and in the 16 "deficient" states stocks were on 47 per cent of the usually heavy holdings last year, the bureau says. So the 1930 crop is going to be heavy. All of which ought to be good news to the man who feels that if he has plenty of potatoes on the table the rest of the meal will take care of itself.

It has always been our belief that too much sympathy is wasted on early birds and henpecked husbands.

A DANGEROUS MOVE

What promises to become a nationwide problem is being uncovered in a number of states. It is the growing determination of many factory owners to discharge all workers who have reached the age of 45 years.

The seriousness of this new move is readily apparent. There are in the

industries of this country thousands of men and women over 45 years who are giving service that cannot be duplicated. Yet as new and improved machinery is installed younger workers are brought in to operate them and the cry of "fire at forty-five" is spreading among industrial leaders.

We don't need to get away from home to find out how senseless such a rule really is. Just look around Littlefield and you'll quickly see what havoc would be wrought if workers were forcibly retired when they reach the age of 45. Scores of men, combining skill with the experience a younger worker cannot boast, are doing work at 45—even 50 and 55—that those on the sunny side of 30 cannot do. We are glad to note that in several sections public sentiment has arrayed itself against such a deplorable move as that to limit the age of industrial workers. We hope these protests grow into a perfect storm. For its a sad state of affairs when any man or set of men fails in the belief that the experience of years is worth nothing, or that a man has lost his usefulness as a worker when he has passed the forty mark.

Man may be the efficient sex, but he can't undress by merely bending over and shaking himself.

"PLAYING HOOKEY"

Statistics show that 90 per cent of the criminals of today start on their criminal career by absenting themselves from school or, as older residents around Littlefield would define it, by "playing hookey." This beginning of waywardness develops until a crime is committed, and then the youth is sent to the reformatory, or penitentiary, where the state seeks to reform him.

Social service workers and school teachers who have made a study of the subject are convinced that very often the trouble is in the home, instead of in the child. Too often parents minimize the importance of education, and display an utter lack of interest in school work. As a result, the children are led to believe that securing an education really means nothing to them, and instead of being encouraged or forced to look upon it as the most serious thing in life they are permitted to have their own way about school attendance.

We seldom hear of a deliberate case of truancy in this community. For that we are thankful. But it is a subject that parents should not overlook. The seriousness of truancy must be constantly impressed upon the mind of every child who shows a tendency to slight school work. It is only thru the education of the boy or girl of today that we can hope to maintain a high standard of citizenship in this community in the years to come.

It isn't hard to tell the denomination of currency in the dark. Only the one-dollar bills are fully coated with automobile grease.

THE FRUIT CROP

Reports that much fruit was killed in various sections of the country by the severe winter weather of January are sure to create widespread regret. There has long been an understanding with housewives around Littlefield that a good fruit year meant a prosperous year generally. Of course housewives in other sections have so considered it. For that reason that peach buds were killed through the Ohio Valley; that the entire Illinois and Missouri fruit crops will be curtailed, and that East and South cannot hope for a bumper crop come as disagreeable news. It's a little too early to definitely determine the ex-

tent of damage, and reports may be somewhat exaggerated. Mother Nature has a way of working miracles when we are least expecting them, however, so it seems that the best we can do is hope that she'll work one in such a way that every part of the nation will be blessed with an abundance of fruit.

There'll never be equality in marriage so long as it's the wife who has to get up in the middle of the night and get the extra blanket.

THE AUTO-RADIO WAR

Littlefield motorists who keep posted on the new wrinkles in the auto world, and who have noted the move to equip cars with radio sets, will be interested to know that this latest bit of equipment is about to open up a nation-wide argument. Already New Hampshire and Massachusetts are refusing to issue license tags to those whose cars are equipped with radio sets. They go on the theory that radio might divert attention from driving and cause accidents; they argue the driver needs to give his entire attention to the car, instead of dividing it between the road and a radio set on the instrument board. On the other hand Connecticut has refused to endorse such a ruling. Other states are expected to take up the subject in short order, and then the Auto clubs may be counted on to get into it. So it looks as though motorists are going to have something to talk about this season besides body designs, horsepower and mileage.

There's another advantage in being poor. If you die suddenly nobody howls to have the estate audited.

LITTLE LEADERS

Another type we can't warm up to is the Littlefield man who thinks his wife got a prize when she got him.

Newadays the Littlefield girl who wants to marry a man to reform him certainly has a lot of material to pick from.

You can't wonder at the dumbness of Littlefield kids if they have parents dumb enough to blame it on the teacher.

A good way for any married man in Littlefield to acquire happiness is to learn how useless it is for him to make house-cleaning suggestions.

No one ever saw a Littlefield woman really excited unless they happened to be around when she discovered a bed bug that had dropped in for a little free board.

Now the long dresses have come back in favor, girls around Littlefield who want to preserve last summers models can do so by pasting them in a scrap book.

The Family DOCTOR

JOHN JOSEPH GAINES MD

NOTES BY THE WAY

When a reader find anything in this newspaper about hormones and vitamins and calories and food-units, and so on, I advise him to read it, if its author is known as reputable. I believe in one learning everything he can about the care of the body and the maintenance of health. But I prefer to talk about the common, everyday things, believing that I shall be better understood by a greater number of my people.

I recall a friend of mine who became a faddist; he was sure that people dressed too warmly in cold weather; he was absolutely certain that warm, comfortable clothing shortened life—and, that folks "dug their own graves with their teeth," and he himself went to the other extreme with even worse results to himself.

He ate only two meals a day—a light breakfast and a very heavy dinner any time between four and six o'clock P. M.; he went without an overcoat in the lowest temperatures; he wore no vest; believed in all the year around suitings. He also believed that with proper "physical culture" a man needn't ever be sick.

He took strenuous exercises and a plenty of cold baths, and, up to a certain point, he seemed in wonderful vigor and endurance. He was sixty-two years old; had retired from active duty.

He had quite a bit of hardening of the arteries, and was of spare build. His blood pressure was slightly above normal for a man of his age, and my modest warnings he took as just so many words wasted, even though he regarded me as a very good physician, one of the few in whom he had confidence.

I was shocked at his sudden death in Lincoln, Nebraska, some time ago: a "stroke" of paralysis cut him down. Here was a man who with rational care of himself, might have been alive and well as I am—today. There is no

Youngest Prosecutor

Edwin C. Hicks, District Attorney of Grant County, Oregon, is only 21 years old and didn't expect to be elected when he ran on the Democratic ticket.

argument in favor of the faddist, nor against right living. Our bodies must be kept comfortable at all times, especially those of fifty years and beyond.

BIBLE CLASS MEETING

Mesdames S. B. Jackson and Arthur James were joint hostesses to the members of the Bible class of the Church of Christ, Tuesday afternoon of last week, at the home of Mrs. Jackson.

The lesson was taken from the second Chapter of Acts.

Refreshments were served to the following members: Mesdames C. C. Beebe, Enloe Smith, J. W. Hale, Riley Collins, J. C. Hilbun, Hood, C. O. Stone, Miss Katie Hughes and visitors from Amherst, Mesdames Logan, Rolins, Daniels, Dugan and Garton.

It's great to be a Texan!

Protecting a man while he finds others in Chicago is called "racketeering." In Washington it is called "tax making."

Ella Dong, an American-born Chinese girl of San Francisco sold more than 13,000 tickets for a charity hospital and was crowned queen of a contest by Mayor Ralph.

Doctors Disagree

When children are irritable and peevish, grind their teeth and are restless, have digestive pains and disturbances, lack of appetite, and are lying eyes, nose and throat, doctors will not always agree that they are suffering from worms. Many mothers will not believe that their children brought up children can have worms. The fact remains that these symptoms will yield, in a great majority of cases, to a few doses of *Worms Out* medicine, the sure, pleasant and safe way to get rid of them. If your child has any of these symptoms, try this medicine, old and new, and you will see the difference.

SAVES EXPENSE

AS FINE a Lister as money can buy—is this Case 2-Row Cotton and Corn Lister.

Smooth-running, easily handled and does the fastest, cleanest job you ever saw. Plants and covers as uniformly in even ground as on the level—the heavy tongue truck with pan type wheels steadies the machine and prevents weaving motion and pole lashing.

Beams fixed to sturdy angle steel frame. Wide range of spacing between bottoms—easily changed. Axles crank forward

causing forward pull of team to aid in raising—also places bottoms in line with wheels which causes bottoms to penetrate uniformly over rough ground.

Single seed cell drop cotton and corn plates. Also plates for sorghum and other row crops. Tip over seed hoppers—you change from one kind of seed to another, quickly, or change plates from bottom without removing seed. Drops one seed at a time—no bunching; no cracking.

The purchase of a Case Lister is an investment for greater farm profits. Drop in soon and look it over. Try our service on all farm equipment.

Lamb County Farmers Ship Cotton and Will Participate in the Federal Farm Relief

Saturday of last week three Lamb county farmers living near Fieldton, shipped more than 300 bales of cotton to Texas Farm Bureau Association.

The 16 1/4 c loan value on middling 1/2 cotton, delivered Houston, less the freight and estimated overhead expense is still in force through the Texas Association, on the seasonal pool cotton, according to J. W. Hammock.

J. Pickrell shipped his entire crop, from the first bale to the last, consisting of 140 bales.

H. C. Pickrell had the next largest amount of 128 bales.

C. E. Pickrell had sold all of his low-grade cotton, but shipped 54 bales of the very best produced of the 1929 crop.

These farmers report an average yield of three-fourths bale per acre the past season, which shows that Lamb County can produce cotton equal to any part of the State, as far as yield goes, and without fertilizer.

The farmers of Texas who have cotton on hand at this time, may still sign the marketing contract, and ship to the Texas Association, if they wish to take advantage of the 16 1/4 c loan made possible by the farm Board loan Hammack, said. The freight is about 100 points and the overhead seems to be about 75 points so that would still leave the farmer a net sum of around 14 1/4 c loan value on his cotton, whereas the price paid at this time seems to be from 12 1/4 c to 13 c for middling cotton.

The good part of the transaction, that seems hard for the farmers to get used to, is, that in case cotton goes below what the grower has drawn on his cotton, he will not be required to pay back a part of the money he has drawn. The risk is all being shouldered by your Uncle Sam, through the Agricultural Marketing act and the Federal Farm Board.

Lamb County cotton growers, who have cotton on hand and do not know what to do with it, should ship it at once for the pool may be closed soon.

About the best thing to do, it seems would be to give Chicago back to the Indians. But not without an apology to the Indians.

If there's anything easier than a woman's ability to make a monkey of a man it is fashion's ability to make a fool of a woman.

If St. Patrick really drove the snakes out of Ireland, why not look up his recipe and give it to the Coast Guards of our country.

A folding airplane designated as "fool proof" is to be manufactured at Peterboro, Ont., at a cost of about \$3,000.

Future Farmers Have a Father and Son Banquet

With tables decorated in a color scheme of green and white and laid for 52, the members of the Littlefield Future Farmers club entertained their Dads at a banquet given in the High school building Wednesday night of last week. The girls of the Home Economics classes were caterers for the occasion.

Invited guests, other than the Dads were Mr. Harrison, Superintendent of School, who spoke briefly; Mr. Adams County Agent, whose subject was "Possibilities of Feeding in Lamb Co." Mr. Cundiff, who told of the "Merits of Dairy Cows," and Mr. Hale, secretary of the Chamber of Commerce, who made a very inspiring appeal to the boys to train themselves for their

future places in the agricultural world. R. A. Box, Vocational Agricultural teacher and advisor of the club talked on "Essentials of a Successful Project". Other speakers were Mr. Roberts, who responded to the "Welcome given to the Dads" by Dumas Haynes; H. B. Hutson, whose subject was "Examples of Marketing Grain Sorghums Through Livestock"; Morris Pierce, Royce Beebe and R. C. Malone. Mr. Hilburn, president of the First National Bank and Mr. Arnett Ford dealer, were also guests of the club. Paul Roberts, President of the Future Farmers, acted as Toastmaster.

The following "Dads" were guests of their sons: Messrs. C. C. Beebe, Roy Hutson, Mitchell, C. R. Smith, A. Clark, J. W. Emfinger, V. B. Pierce, C. O. Roberts, T. B. Woods, J. R. Knowles, Tim Thedford, H. F. Walden, R. N. Carpenter, Harrell, Ed Haynes, R. H. Brantley, C. D. Mansell, C. E. Purvis, G. P. Malone, J. H. Hodges, V. G. Pierce.

The Home Economics girls who prepared the meal under Miss Collins direction were Regina Crow, Edna Pearl Cox, Jewell Glover, Ruby Curry, Fletta Eagan, Billie Atkinson, Varrie Humphries, Ruby Clark, Marie Banks, Choice Malone, Liddle Barton, and Lily Montgomery.

Mileage of American aircraft doubled in 1929.

Immediate cut in battleships now seems certain.

Baked Caramel Custard Excellent for Dessert

Custard desserts appear more frequently as eggs become abundant in the spring. One does not want them all the same flavor, however. Caramel custard is usually an acceptable variation, and is easy to make. The syrup with which it is flavored may be kept on hand, or it may be cooked as wanted. Half a cup of granulated sugar is allowed to brown or caramelize over the fire, while in another pan, some water is brought to the boiling point. Add half a cup of boiling water to the caramelized sugar and simmer 5 minutes. The bureau of home economics gives the following directions for making caramel custard:

1 quart milk 1 tbs. caramel
8 eggs 1/2 cup sugar
1/4 tsp. vanilla

Heat the milk slightly with the sugar, salt, and caramel. Be sure the caramel is entirely dissolved before this mixture is poured into the lightly beaten eggs. Add the vanilla. Pour the mixture into custard cups, and add a small piece of butter to each. Bake in a pan surrounded by water in a moderate oven. Test by placing the point of a knife in the center of the custard and if it comes out clean remove the cups of custard at once from the hot water. The custards may be served either hot or cold with caramel syrup if more of the caramel flavor is desired.

Carrier pigeons now used to carry dope from Mexico.

TAKE IT FROM DAD

By Frank H. Chelley

What Is a Slacker?

"Dad, we had a great argument today at lunch."

Got pretty hot, too! Had to choose an umpire. Somebody called Billy Hughes a slacker because he refused to represent the school in the state oratorical contest. He said it was an ugly word; that he wasn't going to be forced and that the school could go hang; that the war was over and being a slacker was a matter entirely of personal opinion. You don't have to have war to have slackers do you, Dad?

"Well, I should say not, Bob," laughed Mr. Smith. "True, the word slacker is of war origin. It came into being during those terrible days when men by the million the world over were being called upon by government after government to determine which came first in the life of a citizen, his personal pleasure and choice or his country's need. While there is no doubt at all that much false sentiment and even false loyalty is developed and pushed into the forefront, nevertheless there were a great many pure unadulterated slackers who for no other reason than their own safety and because of a yellow streak, sought to pass the hazards of war onto some other fellow while they stepped safely out. In tense times, with a world's peace and happiness at stake, it did come to be an ugly word, filled not only with utter contempt, but hatred, and the idea has survived."

"But the world has always had slackers, and unfortunately, still has them; that group of men and women, too, who put personal privilege and convenience and safety first and the larger welfare of others, school, club, city, state, nation and humanity last."

"We might say, strictly speaking, that a slacker is one who is disloyal to the best interests of the social group to which he has given allegiance. In days past patriotism in the popular mind was making a lot of noise and waving a flag frantically on holidays. During the war it took on a more far-reaching significance."

"Loyalty is a great big word. To be loyal to every person he believes in, and to every worthwhile institution in his community is just a natural attitude for a healthy boy. In his language it just means playing the game fairly and squarely and for all he is worth. Loyalty is good sportsmanship. A slacker is a poor sport. What more despicable thing could we say of anyone?"

"A patriot is loyal to his home, because of all the sacrifice and devotion on his behalf it represents and all the good fellowship and unselfish life-sharing it provides from day to day. A slacker forgets all of these things."

"A patriot is loyal to his church because it is one of the greatest and most valuable of our modern institutions providing him as it does with exceptional opportunities for inspiration, worship, training and service to his brother man. A slacker forgets all of these things also!"

"A patriot is loyal to his group because in this friendly circle, he has a real opportunity to learn to live happily and helpfully with others, to help other boys and to gain help for his own life. A slacker forgets even all of these things!"

"A patriot is loyal to his country because it makes all his opportunities possible. He serves his best interests with his talent, his training, his money, and if need be, his life."

"A patriot is loyal to himself, taking care of his health, making the most of his time and keeping himself the right kind of a citizen against any sort of an emergency which may arise. The boy scout oath sums it up beautifully—to keep oneself physically strong, mentally awake and morally straight."

"A patriot is loyal to all the best interests of mankind regardless of color, creed, or class; loyal to whatever is good for mankind whether in Europe or Asia, Africa or South America. The slacker is provincial, national minded and says America first at all costs and me first in America!"

"I was reading the other day of a famous American named Solomon Willard. Did you ever hear of him? He is quite symbolic to me, my boy, of what a slacker is not. You won't find much mention of him in your history, and his name is not in the Hall of Fame, but here is his story: One hundred years ago Solomon Willard, architect and builder, started something in East Boston that should never be lost sight of. He designed and built the Bunker Hill monument. As a patriotic gift to his country, he devoted 18 years of his life to superintending the erection of that great shaft, absolutely without remuneration of any kind! What this country of ours needs most desperately is more Solomon Willards who have great ability coupled with great loyalty—men who are eager to give their best to their country and to mankind, and who are not primarily concerned with tapping the public till."

"Just one other thought, Bob. Too much stress has always been placed on dying for one's country to prove one's loyalty."

JONES BROTHERS MOTOR COMPANY

JUST A LITTLE LATE CLUB

By Bruce Barton

When I was a commuter I sometimes went to the station early to catch the other commuters running to the trains.

I came to know many of them by sight.

There were ladies and old men, infrequent visitors to the city, who arrived long before time.

There were business men who arrived a minute ahead.

And—just as the gate was about to open—there would come piling across the station the members of the Just a Little Late Club.

I used to sympathize with them at first, supposing them to be unfortunate who had missed a car or lost their watches.

But after two years of watching I grew different.

The membership of the Just a Little Late Club does not change from day to day. Membership is not a misfortune; it is a habit. And one of the most exasperating habits in the world. I was lunching with a friend the other day when a "captain of industry" passed us. He began work twenty years ago as an office boy, and today was one of the great manufacturing concerns of the city.

"A wonderful fellow," said my friend. "Last year I had a long series of negotiations with him about the formation of a new company. It was necessary for us to meet practically every day for three months. In all that time he was never late but twice—and then only for a few minutes. And each time he sent word to me from his office telling me that he would be late."

J. P. Morgan figured that every hour of his time was worth \$1,000, and he had no patience with men who were late for appointments, or who when they came to see him, did not give him his money's worth in exchange for the time they took.

"It is not necessary for me to live," said Pompey. "But it is necessary that I be at a certain point at a certain time."

And Lord Nelson said: "I owe all my success in life to having been a quarter of an hour before my time."

I hold up the record of these famous men, in the faint hope that it may do some good.

And yet, the hope is very faint. The habit of unpromptness is very tenacious.

If I am fortunate to be inside when the pearly gates are closed on judgment day, I shall know what to expect.

Five minutes later there will be a terrific battering on the gate. St. Peter may be surprised, but I shall not be.

When the gates swing open again, there they will be—some of the most humble and exasperating people who ever lived—panting, apologetic, explanatory to the last.

RUBY CLUB HAS MEETING

The Ruby club met with Mrs. Carpenter March 7, at 2:30 o'clock, only a few of the regular members were present, Mrs. Bird, Mrs. Carpenter and Mrs. Clark. Nine visitors were present, Meedames Long, W. A. Henson, Geo. Neely, Houton, Bernice Houton, Elmer Condrey and Miss Moody.

Miss Ruby Mashburn demonstration gave an interesting talk on color scheme in the living room.

Mr. R. R. Reppert will give a lecture at Amherst school building, March 2 at 2 o'clock on "Garden Bugs."

Now is the time to begin to think about making their braided rugs for the fair. There is a cash prize for the best rug. Next meeting will be with Mrs. Bird, 9 miles northwest of Littlefield at 2:30 March 20. A new secretary will be elected and the officers. Don't forget. We can't do without you. So don't forget to come. —Reporter.

PEP PARAGRAPHS

A few cases of small pox have broken out in this community. Measures have been taken to quarantine the homes in which the epidemic has appeared. The school rooms have been fumigated and it is hoped that these measures will serve to check the spread of the disease.

A. H. Dersing and two of his sons, Victor and Edward, are here from Rhineland. They are improving their farm near Pep. They are making their home with L. H. Albus while in Pep.

Five children from the Primary grades took part in the preliminary try out for the "Tiny Tot" story telling contest. The children taking part were: Rubymae Gentry, Benj. and Jimmy Greene, Jake Flood, and Bertie Stengel. The pupils of the intermediate and the higher grades acted

as judges in the contest. The vote showed Bertie Stengel and Jimmy Greene as the winners. It was difficult to decide who were best as every one of the little ones spoke well.

Chester Smith of Knox County is visiting the family of J. A. Borgdon.

Last week many of the farmers around Pep vaccinated their cattle against blackleg.

Alvin Allison was absent from school last week because of illness. It is thought he has the smallpox.

H. C. Welty broke an axle on his car last week by running into a hole in the road between Pep and Amherst.

R. M. Murley moved into this district recently. He will make a crop on C. T. Logsdon's place.

W. P. Lupton moved his sheep and other stock to a pasture in Yoakum county near Bronco.

The following pupils in the intermediate grades won places on the

spelling honor roll: William Brogdon, Venson Carr, Ethel Demel, Alvin Robt. Gerik, Wilma Gerik, Valeria Jungman, Edlie Silhan, Felix Silhan, Clara Beth Williams, Mildred Logsdon, Benjamin Greener, Leroy Carr, Alton Hutchinson, Bertie Stengel and Donal Lee Welty.

Miss Jewell Walters of Clovis visited Miss Elizabeth Lupton over the weekend.

PUPIL SHOOT COACH

Stanton, Ky.—Belgrade Harr, 16, high school student, shot Ernest Byrd, coach, after an argument over admission inot a basket ball game.

The British Army has a new one-man tank equipped with both caterpillar and rubber tired wheels, capable of firing more than 100 shots a minute.

CARD OF THANKS

The women of the County Home Demonstration Council wishes to publicly express their sincere appreciation to the ladies of the Presbyterian Auxiliary of Littlefield, for the use of the church building, lights, stoves, silverware, dishes and cooking utensils

used at the buffet supper on the night of February 21, 1930.

Ruby Mashburn C. H. D. M.
Mrs. J. C. Morgan.
Mrs. Jim Aldridge.

LITTLEFIELD

THINK OF YOUR AUTOMOBILE IN TERMS OF TOMORROW

*Ultimate cost is as important
as first cost in the purchase
of an automobile*

WHEN you purchase an automobile you are making an investment of a considerable amount of money. It is essential, therefore, that you give careful thought to the best selection and know what you are getting for your automobile dollars.

The first cost is important because it may mean an immediate, satisfactory saving. Of equal importance is the ultimate cost after thousands of miles of service. This ultimate cost is the true measure of automobile value.

THE first cost of the new Ford is unusually low not only because of economies in manufacturing, but because the same principles that inspire these savings are extended to every other step that means greater service to the public. It is easy to see that economies in production would be of little value if they were sacrificed later through high charges for distribution, selling, financing and accessories.

The Ford dealer, therefore, does business on the same low-profit margin as the Ford Motor Company. His discount or commission is twenty-five to fifty per cent lower than that of any other automobile dealer. You gain because he makes a small profit on many sales instead of a large profit on fewer sales.

The difference in selling cost, combined with the low charges for financing and accessories, amounts to at least \$50 to \$75 on each car. This is as important as economies in production in keeping down the price you pay for the new Ford.

THE low ultimate cost of the new Ford is the result of sound design, quality of material and unusual care in manufacturing. Friction and wear are reduced by the accuracy with which each part is made and assembled.

These factors combine to decrease the cost of operation and add months and years to the useful life of the car. The good performance and low yearly depreciation of the new Ford are indicative of the enduring quality built into it at the factory.

SERVICE charges are on the same fair, economical basis as the making and selling of the car and replacement parts are always available at low prices through all Ford dealers. In two, three or five years, depending on how much you drive, the saving in operating and maintaining a new Ford will amount to even more than the saving on the first cost.

Think in terms of tomorrow, therefore, when you purchase an automobile. For tomorrow will reveal its true worth.

AMERICA IS THE WORLD'S RICHEST NATION

Average Wealth of Each Man, Woman and Child in U. S. Is Three Thousand Dollars in Property

We are the richest people in the world.

Almost everybody knows that, but few realize just how rich we are and what our wealth consists of.

The national Industrial Conference Board has just figured it out. The national wealth of the United States is \$360,100,000. Three hundred and sixty billion, one hundred million! The figure is just too large for anyone to grasp. Nobody ever saw that much money. There never any such amount as that in money anywhere in the world at any time.

It would take a whole year for a thousand regiments of a thousand men each, every man collecting a thousand dollars a day, to gather so much money together, even if it existed.

But the figure of the Conference Board leaves out money entirely. Wealth is one thing, money is another. Money is merely a symbol of wealth. Counting all the Treasury notes, Federal Reserve notes, National bank notes, gold certificates, silver certificates, and gold, silver and copper coins, we have only about five billion dollars of money in circulation in the United States.

That is all we need for the purpose of exchanging one form of wealth for another. The rest of our business is carried on by means of bank checks and credits. But what makes our money worth its face value is the wealth behind it, nearly \$72 of assets back of every dollar in circulation.

There are no exact figures of the wealth of other nations. The total assets of the entire British Empire, including Great Britain and Ireland, Canada, Australia, South Africa, India and the rest of the British possessions, was estimated a few years ago at about one hundred billion dollars, about one hundred times as much as ours.

The biggest single item in the list of things which make up our national wealth is real estate. Land and improvements in the United States are valued at \$198,100,000,000 more than half of the total wealth. That does not include real estate owned by railroads and public utilities.

These institutions together with shipping and canal facilities, account for another \$4,900,000,000 of land value, with improvements worth \$22-100,000,000 and equipment which has a value of an additional \$12,500,000,000.

Farms and factories, including all property and equipment, constitute \$27,200,000,000 of our national wealth, according to this latest survey.

Personal property constitutes about one-ninth of the total wealth. Furniture, clothing, jewelry and items of that sort owned by people of the United States are worth \$44,700,000,000. And that doesn't include automobiles, which are a comparatively small part of the whole less than ten billion dollars covers the present value of the nation's automobiles.

Manufactured and natural products total \$40,600,000,000. This includes everything from carpet tacks to gold in the mine blocked out but not yet mined.

Gold and silver bullion—that is, gold and silver which have not been coined or made into jewelry, tableware or other commodities is worth around \$9,000,000,000. More than half of that is gold held by the U. S. Treasury, the Federal Reserve Bank and other banks as a reserve against currency. This gold reserve alone constitutes the largest amount of the precious metal ever gathered under one flag in the history of the world.

Out of the entire volume of national wealth about 1-16, or \$23,000,000,000 worth, is exempt from taxation. This includes all property used for public services by the Federal, state and local governments, and the property of religious, charitable and educational institutions exempt by law from taxation.

The total wealth of the country, divided by the number of inhabitants, gives us the average per capita wealth. And this is also far in excess of any other nation, amounting to around \$3,000 for every man, woman and child.

The wealth is unequally distributed among the states however. Nevada has the greatest wealth per person, not because it has the smallest population,

for there are seventeen states having fewer inhabitants, but because of the immense wealth in Nevada's mines of gold, silver, copper and other metals. Nevada's average wealth is \$7,338 per person.

Alabama has the lowest per capita rate of wealth distribution amounting to only \$1,284 for each person. This is because Alabama's natural resources are comparatively undeveloped and its industrial development, while large, has not yet caught up with the growth of its population.

New York, richest of all the states in total wealth is only about average in the per capita figures. The ten million inhabitants of the Empire State are worth an average of \$3,513 each.

The figures of the National Industrial Conference Board are for the year 1928. The nation is probably richer now but it takes a year or more to compile the figures, which will always be that far behind. The last estimate made by the United States Board of census was in 1922, when the national wealth was estimated at \$320,800,000,000. In 1912 the Government figures were only \$186,300,000,000. In sixteen years, therefore the wealth of America nearly doubled. And even allowing for the fact that a dollar today represents a smaller amount than it did in 1912, nevertheless we have made pretty good progress. Very carefully worked out calculations made by the United States Department of Labor continuously kept up to date, show that the purchasing power of the 1930 dollar is about 67 cents as compared with the dollar of 1912. So our actual increase in wealth in sixteen years as a nation is about 37 per cent.

And that is doing pretty well, thank you!

When James Glynn appealed to the Detective Bureau in Chicago for aid, he said the only thing he remembered was that he had been robbed of \$5000 in St. Louis.

Andrew Farquar of Barry, Wales, left his \$60,000 estate to charity cutting off his wife and four children.

Do not let the mail order houses deceive you!

Natural Gas a Community Buried Treasure Of Inestimable Value to Every Household

Now that gas has come to Littlefield, local citizens are naturally interested in it and during the coming months there will be hundreds of homes in this little city that will have it piped in to enjoy its benefits. Gas is a decided benefit and valuable asset to any community, as anyone will say who has enjoyed its use. So great, in fact, that every town and city with in available reach of a gas pipe line is anxious to secure its services.

Three-fourths of the gas burned in the United States today is of the natural kind that comes from deep down in the earth, and its estimated value is around \$400,000,000 a year and increasing rapidly each year, due to its relative low cost, high heat value, convenience and reliability.

Rich indeed is any town or community that lies within the radius of this wonderful utility brought up as buried treasure from deep down with in the earth for the benefit of mankind. And the remarkable strides which have been made by this particular industry during the past six or eight years has made it possible for multiplied thousands of people to enjoy it. This is especially true in the Southwest where abundant supplies of natural gas have been released from nature's storehouse. And not only has this buried treasure benefited thousands of home owners, but it has also made possible unheralded industrial expansion in many towns and cities.

A few years ago only those towns within the direct neighborhood or nearby radius of the gas well enjoyed this benefit, but now through the organizations of large companies pipe lines are being laid hundreds of miles in length for service to more remote sections for the accommodation of numerous more people. While there are many who may take gas service as something commonplace, yet in reality Littlefield citizens may consider themselves fortunate in being favored with this, one of the nation's greatest assets and useful household commodities.

MRS. BOLES ENTERTAINS

Mrs. F. O. Boles entertained the W. M. U. of the First Baptist church Monday afternoon at her charming new home.

The program taken from "Royal Service" consisted of the problems of our rural churches. Mrs. Joe L. Grizzle gave the devotion followed by Mrs. Acree Barton who introduced the discussion. Following her, Mrs. Lloyd Roberson talked of the debt we owe to the country church.

Mrs. J. E. Brannen gave the reasons for the great changes in the country churches, and Mrs. Lena Howard told of other changes wrought by progress.

The program closed with a round table discussion led by Mrs. R. E. McCaskill.

Lovely refreshments of salad, pie and tea were served.

Among those present were Mesdames T. L. Matthews, Lloyd Roberson, Lena Howard, M. E. Jones, J. N. Price, J. E. Barnes, J. H. Lucas, J. E. Brannen, Jess Seale, Mid Seale, Acree Barton, Theo Parker, Carl Smith, G. G. Hazel, R. E. McCaskill, Ike Griffin, J. R. Coen, John Woodmore, Joe

L. Grizzle, the hostess Mrs. Boles and Mrs. Milton Cross, of Brownwood, who is the house guest of Mrs. Mid Seale.

With a gale blowing all the way and water ankle-deep over most of the road, Miss Louise E. Daly won the 53 mile roller skating race from London to Brighton, England.

R. C. Stephens of Glasgow bequeathed \$5,000 and his \$10,000 car to his chauffeur.

Many a man who has "gone over the top" would shrink from acting as a judge of a baby show.

TABERNACLE BAPTIST CHURCH
Sunday night services were well at-
tended. Eight new additions were
made to the church. One by baptism,
seven by letter.

Rev. R. E. Hanna will hold ser-
vices Sunday in the absence of the
regular pastor, Rev. Roy A. Kemp,
who, with his family is visiting their
parents at Sunset.

Rev. Mat Hardy, of Falls, will con-
duct a two days service here next
Monday and Tuesday.

THE STATE OF TEXAS-
COUNTY OF LAMB:

WHEREAS, by virtue of an execu-
tion and order of sale issued out of
the District Court of Lamb County,
Texas, on a judgement rendered in
said court on the 23rd day of Decem-
ber, A. D. 1929, in favor of L. R.
Crockett and against W. S. Brandon,
and Julia T. Brandon, said cause be-
ing numbered No. 470 on the docket
of said court, I did, on the 5th day of
March, A. D. 1930, at 10:00 o'clock
A. M., levy upon the following de-
scribed tract or parcel of land situated
in the county of Lamb, State of Tex-
as, to-wit: Being all of lots Nos. One
(1), two (2), and Three (3), in Block
No. Sixteen (16) in said city of Little-
field, in Lamb County, Texas; accord-
ing to the map or plat thereof record-
ed in Vol 6, pages 500-502, Deed Re-
cords of Lamb County, Texas, refer-
ence to which is here made for a more
particular description of said land; the
same having been so levied on by me
as the property of the said W. S.
Brandon and Julia T. Brandon; and
the said order of sale having been is-
sued on said judgement foreclosing
the vendor's lien on said land, in favor
of the said L. R. Crockett; and on the
1st day of April, 1930, being the first
Tuesday in said month, between the
hours of 10:00 o'clock, A. M., and
4:00 o'clock P. M., on said day, at
the courthouse door of said county, I will
offer for sale and sell at public auc-
tion, for cash, all the right, title and
interest of the said W. S. Brandon and
Julia T. Brandon in and to said prop-
erty.

Dated at Olton, Texas, this 5th
day of March, A. D. 1930.

SHERIFF, LAMB COUNTY, TEXAS

John Holsten of Derby, Eng., has
been ordered to pay for a window he
broke getting out of a church in
which he had been locked.

Just Like An Ostrich
A medical authority says that a
person who tries to cover up skin
blemishes and pimples with toilet
creams and powders is just as foolish
as an ostrich that buries its head in
the sand to avoid danger. Skin eruptions
are nature's warning that con-
densation is throwing poisons into your
blood stream and weakening your whole
constitution. Remove the cause of the
condition and you will strengthen your
system against disease and clear up
your disfigured skin. The best way to
do this is with a course of Herbine, the
vegetable medicine that acts natu-
rally and easily, which you can get at

BANKERS REPORT DROP IN SAVINGS

Lure of Stock Market Partly to
Blame, but Slackened Specula-
tion Expected to Bring Return
to Thrift.

The first recession in the nation's
savings account in banks in the twenty
years during which records in this
field have been kept by the American
Bankers Association was disclosed for
last year in the recent annual compila-
tion prepared by its Saving Bank
Division. The shrinkage amounted to
over \$195,000,000, on the basis of fig-
ures for the year ending June 30, 1929,
whereas a year earlier the reported in-
crease was over \$2,300,000,000, the
largest ever recorded. The number of
savings depositors also decreased
during the year covered by more than
500,000 accounts. The lure of the
stock market and affiliated activities
are cited as part of the explanation
for these changes.

The association's statement says
that savings deposits in banks and
trust companies of continental United
States on June 30, 1929, stood at \$28,
217,656,000. The recession in savings,
it declares, indicates a fundamental
change in the savings situation, irre-
spective of whether it is temporary or
not.

How Savings Used to Grow
"In 1926 savings deposits increased
\$1,562,000,000, in 1927, almost \$1,400,
000,000 and in 1928 over \$2,300,000,
000," it says. "It appears now that
some influences in one year have taken
the gain that might reasonably have
been expected in savings deposits for
1929 and lowered them from the high
mark of the preceding year. This re-
cession is not one coming as a result
of drouth, famine, unemployment or
conditions outside of the United
States.

"A year ago it was stated: 'The year
closing June 30, 1928, registered the
largest gain in savings deposits in
banks and trust companies of conti-
nental United States ever recorded
in the history of this country.' What
a difference one year makes! From
a gain of more than 2 1/4 billions of dol-
lars in savings deposits to a loss of al-
most 200 millions!

"The loss in savings deposits is re-
flected also in the loss of savings de-
positors. The year 1929 showed a to-
tal of 52,664,127 depositors, against
53,183,348 for 1928, a loss of 524,221.

"Industrial production was much
higher last year than the preceding
year. Factory payrolls were consid-
erably greater. In production, em-
ployment and trade, advances were
made over the preceding year. In the
farm areas the improvement noted for
1928 did not recede in 1929 and the
livestock industry in all its branches
was prosperous.

The Causes of the Drop
"The causes of the recession are
possibly multiple. There is scarcely
any reason to doubt that one of the
important factors draining away sav-
ings and decreasing depositors has
been the lure of profits to be made in
stocks. For a number of years the
people have been regaled with stories
of profits made in stocks in all types
of companies. During the last few
years there has been a specious phi-
losophy preached that panics such as
formerly occurred were no longer pos-
sible.

"If it was the lure of profits in
stocks which caused the recession in
savings, then a factor in future sav-
ings will be the success attendant
upon this venture of savings deposi-
tors in stocks. If the experiment did
not prove generally successful, then
another year will doubtless witness
an increase in savings deposits as well
as in savings depositors."

HELPING YOUNG FOLK
TO BECOME BANKERS

Through the American Institute of
Banking, which is the American Bank-
ers Association's educational section,
the banking profession is educating
35,000 bank men and women in the
technical and scientific departments
of their work. These students are en-
abled by this institute, which is entire-
ly non-commercial in its operations, to
obtain a grasp of the finer points of
banking without interrupting their
employment or interfering with their
earnings, in their bank jobs.

The courses given, including bank-
ing economics and law and bank ad-
ministration in all the departments,
have been worked out under the di-
rection of senior college educators
and the lectures are always given by
practical men, such as lawyers in the
legal courses, experts in banking op-
erations and college professors in the
economics courses. There are chap-
ters with meeting rooms in over 200
cities and also a number of smaller
study groups are fostered with cor-
respondence aid.

It has been said that the A. I. B., as
it is familiarly known throughout the
banking field, is the greatest adult ed-
ucational organization in the world
and is supplying the banking business
with the largest supply of trained
workers each year that any compar-
able line of business is receiving. The
organization holds an annual conven-
tion attended by hundreds of young
bank workers as well as senior bank
officers actively interested in further-
ing the institute's educational work,
at which numerous technical subjects
of practical banking application are
presented and discussed. This year's
convention will be held at Denver,
Colorado, June 18 to 20.

MISS WILLIS ENTERTAINS

Clyde Willis Jr., entertained sever-
al of her friends with a party in hon-
or of her 12th birthday, at the home
of her parents, Mr. and Mrs. C. E.
Willis, Saturday afternoon between
the hours of three and five.

Many games were played, at the
close of which refreshments of cake
and punch were served to the follow-
ing guests:

Opal Yeary, Alice Lynn Street, Ann
Marie Harless, Oma Carpenter, Mil-
dred Street, Lela Leone Hays, Joyce
Griffin, Ergle Wiles, Opal Carpenter,
Clyde Willis, Sybil Reese, Marie An-
derson, Grace Scott, Olene Robins,
and Dorothy Stripe.

George Webster, 78, won the an-
nual club race in Hempstead, England
swimming in water filled with ice.

Took Soda 20 Years For Gas—Stops Now

"For 20 years I took soda for indi-
gestion and stomach gas. One bottle
of Adlerika brought me complete
relief."—John B. Hardy.
Adlerika relieves gas and sour
stomach at once. Acting on BOTH
upper and lower bowel, it removes
old waste matter you never thought
was in your system. Let Adlerika
give your stomach and bowels a
REAL cleaning and see how good you
feel! Overcomes constipation.

While in the city he visited the Leader office and renewed his subscription for another year. He is one of the oldest subscribers of this paper. And says he would not be without a copy of it every week.

B-2 CLUB MEET

The B-2 club met Tuesday evening at 7:30 at the home of Mrs. E. A. Bills, with 11 members present and 8 new members were initiated into the club.

The president, Lorena Joseph presided and after business session, Wilma Wilkerson took charge of the program, the topic being "Stories."

Nora Belle Grizzle gave two hymn stories; Rae Barber gave a Bible story Louise Campbell gave a legend story; and Blanche Brannen gave a fairy story.

The following members answered roll call with a current event of the day:

Rae Barber, Blanche Brannen, Sue Brannen, Margaret Argain, Nina Anderson, Louise Campbell, Bobbie Fay Davis, Laura V. Bills, Eleanor Hodges Ruth Gray, Lorena Joseph, Nora Bell Grizzle, Grace Alice Rook Wilma Wilkerson, Ina Bell Wharton, Mildred Wharton, Winifred Willis, Dorothy Varner, Naomi Whitaker.

The next meeting will be March 25.

BOTSFORD TO HAVE STORE LOCATED ON STATE HIWAY

E. M. Botsford, formerly of Mulhall, Okla., is this week building a store and camp house on Highway No. 7, about one mile north of town, and near the filling station at the forks of the road.

The store building is 24x50 feet, and the camp houses will be 110 ft. long. A full line of groceries and camp supplies will be carried. He expects to be ready for business in about ten days.

Botsford was for 23 years connected with the Miller Bros. 101 ranch at Mulhall, and for several years was interest in their Wild West show.

FIRST BAPTIST B. Y. P. U.

The B. Y. P. U. of the First Baptist church met Sunday evening at 7:00 o'clock. An enjoyable program was given by the Junior group. The Senior group will have charge of the program next Sunday evening as follows:

Introduction—Group Leader.

Scripture Reading—Four members of the Junior group.

"Conditions of Salvation"—Thelma Warren.

"Repentance Defined"—Eva Joe Cornichal.

"Faith Defined"—George Rothell.

"Look and Live"—Lucille Killough.

"Two Elements in Faith"—Carl Thornton.

"Faith and Acceptance"—Bessie Bellemey.

Great Quotations on Repentance of Faith—Thelma Killough.

May this extend an invitation to all young people of Littlefield that the B. Y. P. U. need and want their attendance.

A French chef declares that his most appetizing dishes are inspired by music. Jazz should inspire a wonderful new brand of hash.

In his write-up of a home-talent play an Oklahoma editor commended a neighbor for his "clever impersonation of a gentleman."

A Boston man promised to retire when he had made a million, and he kept his word. We are sometimes tempted to make a similar vow.

It's great to be a Texan!

Chris Rogers, a drunken teamster, walked up to Policeman R. A. Kane, in Chicago kicked him in the leg and broke the bone.

A cat saved the lives of Timothy Ryan jumping on the bed and when the house caught fire.
