THANKSGIVING FALLS UPON ORIGINAL DATE

WASHINGTON, Nov. 26—America's first national Thanksgiving observance was called for 142 years to the day and date by George Washington. It fell 142 years to the day and date before next Thursday.

The George Washington Bicentennial Commission disclosed these historical points today in outlining the fate of the first presidential Thanksgiving proclamation, issued October 3, 1789.

William Jackson, Washington's secretary, wrote the message in long hand and Washington signed it, asking all to observe Thursday, Nov. 26, as the date.

The proclamation, lost for a century, was found in 1921 at an auction sale in the American Art Galleries in New York. It now is in the Library of Congress.

It was the forerunner of similar proclamations issued annually by succeeding presidents.

ATTENDING STATE TEACHERS MEETING

Mr. B. J. Brannan. Superintendent of Sanderson Public Schools, left the first of the week to attend he State Teachers Convention which is being held in Amarillo during the Thanksgiving Holidays. Mr. and Mrs. S. E. Nelson, accompanied by Miss Louise Noble left Wednesday noon for the Convention. Due to the remoteness of Amarillo from this section of the State, the trip would have had to have been made by automobile; consequently, it was impossible for many of our teachers to attend.

Sanderson Schools are glad to report a hundred percent membership in the State Teachers Association.

Miss Ruth Smith and nephew, Booby Morris, left Thursday for El Paso where they will visit their sister and mother, Mrs. Celeta Morris.

J. Riley Dunman, who has been working at the Del Rio Evening News, has acceptd a position with The Times as a linotype operator.

Mr. and Mrs. J. C Lester and baby have returned to their home in Robstown following a visit here with his brother M P. Lester and family. While here J. C. was successful in killing a deer.

AN ULTIMATE CONSUMER

This baby in a drought stricken section of West Virginia was one of the ultimate consumers of the foodstuffs given by the American Red Cross in the past year. More than 2,750,000 persons were fed by the organization.

Tax Payers Are Given Until November 30th To Take Advantage Of Split Tax

Only a few more days remain in which tax payers may take advantage of the law regarding split-tax payment. Those desiring to pay their taxes in two payments must pay on or before November 30, which is next Monday, their first payment. The initial payment must include poll taxes. W. D. Hunter, deputy county tax collector, states.

If taxes are not paid on or before November 30, then the split payment priveleges are lost, and the entire amount must be paid on or before January 31, 1932, in order to avoid penalty of 10 per cent and interest of six per cent.

If the first half of the 1931 taxes are paid on or before this coming Monday, November 30, 1931, the tax payer then has the privelege of paying the balance on or before June 30, 1932, without incurring penalty for intrest.

However in order to vote the poll tax must be paid prior to midnight of January 31, 1932. And one has the privelege of paying his poll tax without the property tax, but he cannot pay the propery tax and leave off his poll tax. It is expected that this year quite a large number of poll tax receipts will be issued as this coming year is election year from county officers on through national officers.

Several large tax payers have already taken advantage of the law and have paid part of their taxes. The T. & N. O. Railway, the largest taxpayers in the county, have paid one-half of their county and state taxes, and all of their school tax.

THOUGHTS FOR THE WEEK

HAPPINESS A REWARD

Miletus Garner, manager of the Ohio State Life Insurance Company, in a recent memorandum to salesmen of the company says:

Life is not made for happiness, but for achievement.

We believe that all knowledge comes through one's experience and senses. At birth, the mind of an individual is a clean slate, but as he advances along life's pathway sense—experience writes upon it in unnumerable ways until sensation generates memory and memory generates ideas.

The mind is an active organ which molds and coordinates sensations into ideas. An action is good when done in obedience to our inner sense of duty. The only thing unqualifiedly good in this world is good will, the will to follow the moral law regardless of profit or loss to itself.

Nevermind your personal happiness Do your personal duty; make yourself worthy of happiness.

The problems of one's life are the things responsible for the greater part of one's achievments. Struggle is the law of growth.Character is built in the storm and stress of the world. An individual reaches his full height only thru compulsions, responsibilities and sufferings. Never grumble about life's problems. These are merely part of the hardening process that is necessary to make one capable of carrying through.

J. S. Hines. of Oklahoma City, was fined in Justice Court here last Friday morning for hunting on a game reserve and without a hunting license. A. Nole, state game warden made the complaint. The fine amounted to $19 with the cost.

We received this past week a copy of the Cactus Chronicle a high school paper published by the students of the Tuscon Arizona high school. The paper is well edited and a very newsy paper.

15,700 Fish Placed In Lake by Finley

Fish numbering 15,700 were placed in the lower lake at Devil's River Friday by O. Z. Finley, game warden of this section.

Bass, cat fish, perch and bream were brought here from the hatcheries at Fredericksburg on an order from the Game, Fish and Oyster Commission of Texas. —Val Verde County Herald.

Miss Eva Chaffin left Wednesday afternoon for her home in Alpine where she will spend the Thanksgiving holidays with relatives and friends.

Parent-Teachers Association To Meet Next Week

Community Is Urged To Attend Session To be Held At Night

Sanderson Parent Teachers Association will hold its regular meeting at the High School Auditorium, Thursday evening December 3rd. at 7:30 o'clock. An unusually interesting program has been arranged. All members of the organization are urged to attend this meeting. and all patrons and citizens who are not members are cordially invited to be present. The Commercial Night School will not hold classes on that particular evening, but will meet Wednesday evening, December 2nd, instead.

A BEAUTIFUL THANKSGIVING SERVICE SUN.

Sunday School Class Of First Methodist Church Portrays Pagentry

Those who attended the opening exercises of Methodist Sunday School last Sunday were filled with a deep sense of appreciatipn for the Beautiful Worship Service in charge of Mrs. A. D. Medlin, and her Young Peoples Sunday School Class.

It was in the form of a Pagentry worked into the great Thanksgiving Psalm. From the Ancient Nations of the Orient, to the European Nations and into America. The Pagentry Story came from the old Oriental Nationl Festivals to the Harvest Conception, to the Jubilee of Tabernacles. and into the English Harvest Home, and American Thanksgiving Conceptions of the Beautiful Spiritual Conceptions of the Psalms was beautifully Portrayed.

Each member of the Class was dressed to the Nations of Earth. From Ancient Egypt to modern America. From the beginning to the end worshipful spirit, and the Spiritual significence was manifested, and portrayed. Mr. C. J. Watts who is Superintendent, and Mrs. A. G. Medlin who is teacher of the class and each scholar deserve commendation for such a service.

Start Construction of Kinney County Over Pass

Construction of the over-pass on the east end of Highway 3, where the highway goes over the Southern Pacific railway, was started last week according to the Brackettville News Mail.

The construction work, which is chiefly with concrete, will take sometime to finish and will employ a number of men. As much as possible Kinney county labor will be used the contractor states.

The over-pass contract was let some weeks ago by the Highway Commission at Austin, and is the last of the contracts on Highway 3 through Kinney county. This highway over-pass will be approached by a new cut-off route, already under construction and the sharp dangerous curves will be taken out, while the over-pass itself will leave no railroad crossing whatever on Highway three thro Kinney county.

Construction work on the base of Highway 3 east is continuing slow, due to the rock base that is being put down there the News Mail further states.

TURKEY SHOOT HELD

Last Saturday afternoon a turkey shoot, sponsored by Lee Cook and Johnnie Whistler was held one mile east of town. A large crowd was out, and several tried their luck at shooting. Jim Nance was the only successful marksman and was fortunate in getting three turkey.

Messrs. Cook and Whistler sponsored another shoot Wednesday afternoon and will have another on Christmas eve.

BIG BEND CLUBS MET IN MARFA LAST WEEK

Delegates From Clubs In Davis Mountain, Big Bend Section

At the meeting of the Davis Mountain Federation of Clubs which was held in Marfa last Saturday Sanderson was honored by having the next president and secretary of the Federation. Mrs. Fred Montgomery was elected president and Mrs. A. E. Creigh Jr., was elected secretary.

A very interesting and worthwhile program was held at the assembly halls in the Christian Church. At noon a luncheon was served at the El Paisano Hotel and the members at this time enjoyed an interesting and well prepared program.

The next meeting of the club will be in May and will be held in Fort Davis.

Those from here who attended the meeting were Mr. and Mrs. Fred Montgomery. Mrs. A. E. Creigh Jr., and Mrs. H. R. Laurence., Representatives from the various clubs in Marathon, Alpine, Fort Davis, Fort Stockton, Shafter and Marfa were present.

Both Mrs. Montgomery and Mrs. Creigh are members of the Sanderson Culture Club and have been most active members of the club since its organization several years ago. Mrs. Montgomery is the past president of the Sanderson Culture Club and Mrs. Creigh was the first secretary of the local club.

Single Train Handles Ten Thousand Sheep

One of the largest train movements of sheep and cattle to be handled over the Southern Pacific Lines in many months took place on October 25, when one train assembled and moved over the El Paso division into San Antonio a total of 10,853 sheep and 35 head of cattle. From San Antonio the train moved to Hearne and thence to Denison over the Southern Pacific Lines. It was destined to Kansas City markets.

The 10,853 sheep required 72 cars, while the 35 head of cattle were handled in one car, making a total of 73 cars for the one train. To assemble this movement required picking up both large and small shipments at Sanderson, Marfa, Alpine and other stations on the El Paso division. The movement, although one of the largest of this kind to be undertaken in months was handled on schedule.

S. P. BULLETIN.

SECOND SIX WEEKS OF SCHOOL ENDS

This week ends the second six weeks of school. Due to the fact that there was no school Thursday and Friday of this week, examinations were given Tuesday and Wednesday. Report cards will be given out the first of next week. Some students are doing excellent work, while others are not doing as well as they should be. Each Monday morning a list of students who have failed in their work the week before is turned into the superintendent's office. This is done for the convenience of parents who wish to check on the work done by their children in school. We are glad at any time for parents to call for reports on their childrens' work.

SCHOOL HAS HOLIDAY

The Sanderson public schools closed Wednesday of this week and will not open again until Monday. This was in order that the students may observe the national holiday, Thanksgiving, and so the faculty could attend the State Teachers Meeting in Amarillo, if they so desired.

This week marks the end of the second six weeks of school and the students will receive their report cards next week.

L. C. Charlton of El Paso spent several days here the past week with his brother, N. E. Charlton and family. While here Mr. Charlton and his nephew, Fred, spent several days hunting.

IN THE MATEER OF FRIENDSHIP

All that can be expected of any man is to make the best use of the things that are within his power. Only the contented man is rich; so we must look for the things that bring contentment and first of these is to find a friend, and if you find two friends you are indeed a lucky man, and if you find three friends—real friends— then you are a rich and powerul man. In prosperity it is easy to find a friend, but in adversity it is most difficult of all things. No matter how small a man's means may be, if he gives of what he has to his friend it is the same as if it was a great amount. A man's pleasures are insured by sharing them with a friend and his griefs are reduced by securing the sympathy of a friend. The council of a friend is the best council because it will be true advice; for, when received from a mere acquaintance, it may be so filled with flattery that its value will be destroyed,and faithful and true counsel rarely comes excepting from the true friend. It is said that in youth we have vision and in old age dreams, and the vision and the dream may give us an ideal of perfection; but experience and large contact with me compel us to accept the man who measures in his virture only to the substantial average. If we view a man as a whole and find him good as a friend, we must not be diverted from the happy average— the everyday, human average— by using a magnifying glass upon his faults or frailties. We must, in order to have and hold a friend, accept him as he is, demanding one thing in return for affection—his fidelity.

—Harry B. Hawes in Pathfinder.

THANKSGIVING

We celebrate this week one of two distinctly American holidays.

The first Thanksgiving was a spontaneous outburst of gratitude to Him who had delivered the Puritans safely out of the bondage of Old World intolerance and oppression, through the perils of a trans-Atlantic passage, into a New World of limitless freedom and opportunity. In 1863, when it began to appear that a "nationof the people would not perish from the earth," President Lincoln proclaimed a day of Thanksgiving patterned after the old New England festivel of the Puritans. Since that time, the precdent has been followed every year by our presidents.

This year Texans, particularly, have much to be thankful for. Statisticians estimate that Texas sold almost seven million dollars worth of Thanksgiving turkeys. Texans lands have produced abundantly. We harvested enough cotton to clothe, and enough wheat to feed, many times our own population. In Texas there is no need for any man to go naked or hungry. And there are numberless other things for which to be thankful. The bumper cotton crop has made our ports veritable beehives of activity; all over the state there is evidenced an industrial awakening, commerce is taking on new life; building is on the upgrade. As fog before the sun, the depression is being dissipated by the trmendous reserve resources contaied within the Lone Star State.

Like the Puritans in another era of American history, Texans today stand in the midst of a land of plenty, upon the threshold of a magnificent future. We would be ingrates, indeed, did we fail to give voice to that gratitude that is in our hearts. —The Editorial Digest.

A TOOL THE DEVIL WANTS TO KEEP

It was once announced that the Devil was going out of business, and would offer all of his tools for sale to anyone who pay the price. On the night of the sale they were all attractively displayed, and a bad looking lot they were.

others. I can pry open and get inside a man's conscience with that ments of evil were attractively spread out, each one marked with its price. Apart from the rest lay a harmless looking wedge-shaped tool—much worn— and priced higher than any of the others.

Someone asked the Devil what it was.

"Thats Dicouragement", was the reply.

"Why have you priced it so high?"

"Because," replied the Devil, "it is more useful to me than any of the Malice, hatred, envy, jealousy, sensuality, deciet and all three implewhen I could not get near him with any of the others—and when once inside I can use him in whatever way suits me best. It is much worn because I've used it on nearly everyone and very few know it belongs to me."

It hardly need be added that the Devil's price for discouragement was so high it was never sold.

He still owns it—and is still using it. Is he using it in your business now that summer is over and most all of us have our day. Let's forget this tool and get to work. The business is here if we will work for it. Will you get yours or will you let the people of some other city get all the trade. If you are wise you will trade at home and you will prosper. Trade away rom home and you will go down. When a businessman shops out of town it makes people afraid of his merchandise. The first thing your customer will think of is that your merchandise is not what it should be or you would trade at home. When you show people you have confidence in your line, you can make other people interested. Trade at home if you want prosperity for your own town. —Journal, Mominy, Oklahoma.

OLD REMEDIES STILL HOLD GOOD

In the stress of these depressed times many folks have almost lost their heads in seeking some method by which we can come back out on the plane of normal times. Freak methods, isms, panaceas, legislation and all that sort o thing are just so much delay in the path of prosperity. The old remedies still hold good and it is not by hitting on something new but by getting back to the old, the sound and fudamental principles upon which America was founded,that we are going to work out our future.

Hard work, sacrifice, honesty, privation, saving, management and the principles of the Christian religion are the rules for success which our forefathers used to conquer a wilderness and lay the foundation for the greatest nation in the world today. Prosperity brought with it the dreams of short cuts to fame and forune. America chased the bubble until it burst and now most of us are sitting down trying to think of some short cut or scheme to get on prosperity's road again. We need rather to get back sound common sense.

The world has changed but the principals upon which civilization was founded have not changed. The unequalities under which we are now chafing are the result of our disobeying the fundamental principles listed above. Instead of further fooling ourselves by following some of the many who are proposing unsound ideas about the return of prosperity, let's get back to the old remedies. They still hold good, if we but apply them.—News, Lenoir City, Tennessee.

THIS AND THAT
By JIMMINY

Governor Sterling has been criticized severely for some of his official acts during his term of office, but last week he used his authority to deal out justice to a man who deserved it. The man had been convicted on a liquor charge in 1929 and was sentenced to serve one year in the penitentiary. He was permitted by the sheriff of the county in which he was convicted to go to Houston to await commitment papers before entering the penitentiary. A year passed and he had not heard from the sheriff or the prison officials. He had been working and otherwise conducting himself as a free citizen of the state. But his conscience was not clear; he had a prison sentence hanging over him during that time. Finally, tired of waiting on official red tape, he proceeded to Huntsville and asked permission to pay his debt to society. He was refused admission to the penitentiary because there was no record of him having done anything. He went back to Houston and appealed to the courts to make him a free man, because he had made an effort to pay his debt to society. The court was without authority to turn him free, and he was remanded to the sheriff — according to law. He made his plea for a pardon to the governor, who considered the evidence and circumstances and set him free.

• • •

That's one good act that Governor Sterling has done during his term of office, if he never does another. Chalk it up! Probably the governor figured the man had been puished enough during that two years of thinking about having to go to the Texas penitentiary. And probably he was right in thinking it; the Texas penitentiary likes a whole lot in being an ideal place to live. Most people are not interested in Texas penal institutions and the manner in which they are conducted because the majority of the people never expect to spend any length of time in them.

• • •

But last week, through the agitation of social welfare agencies and Texas editors, the prison board lifted the ban against daily newspapers in the penitentiary. There is much that could be said for this decision of the prison board and but little to be said against it. If a man, sentenced in 1901 to serve 30 years in the pentitentiary, was set free today, he could hardly be expected to meet modern methods of living. He wouldn't even know how to dodge in and out of congested traffic, and would in all probability, stay next to the curb when making a righthand turn —which would be legal and according to law, but unusual, to say the least.

Newspapers are a part of society, and if society hope to restore criminals back to society, it must give these criminals a chance to get acquainted with the way the free world is doing things in 1931—and up.

A FEW WORDS TO THE LADIES

"You are the purse - holders. What a relief that this job is yours! It is a job entirely suited to you, and let it be stated without stint that you have been a worthy and a truly solicitous guardian of that great national institution the family purse.

"The man-mind is unsuited for successful family purse supervision. It is, perhaps, well that this is so. Where you get the man who practices family purse supervision, one of two things happens. He either makes a dreadful mess of the job, which is natural and good to hear, or he makes a success of it, which is and should be extremely unusual and is bad to hear. A purse loving man is a fellow few natural minded men want to meet. He is a poor social unit. Keep him in a back room, please.

"Ah! ladies, hold this vital job forever to yourselves. We men don't want it. Speaking as a family man, we are not capable of successfully handling the job.

"Men readers of this newspaper please lift your glasses this evening to the toast:

"To Our Beloved Purse Protectors, the Women, God bless them!"

In addition to my Ready-to-Wear and Hats, I have a line of novelty gift goods for bridge prizes and Christmas gifts.

Positive Proof of FORD ECONOMY

City of Detroit purchases 137 new Ford cars
Hundreds now in use prove low cost of operation

THESE 137 new Ford cars represent one of the largest deliveries ever made to a municipality at one time.

21 radio-equipped Ford scout cars were traded in on this purchase. They had been operated day and night for two years in heavy traffic and all kinds of weather.

Their individual records ranged from 78,134 miles to 143,723 miles with a grand total of 2,283,097 miles. The operating cost of the 21 cars was 2.284 cents a mile — less than 2 1/3 cents. This cost included all fuel, oil, tires, repairs and every other item except depreciation and insurance.

Of 577 Ford cars in Detroit City service, the 300 in the Police Department traveled a total of 6,591,937 miles during the past fiscal year, at an average cost of 2.9 cents a mile.

Many claims have been made on operating costs, but here in the carefully kept motor car records of the City of Detroit is positive proof of Ford economy.

In the paragraphs above, it is seen that 21 Ford scout cars averaged less than 2 1/3 cents a mile and 300 Ford cars in all branches of Detroit police work averaged 2.9 cents a mile!

Day and night, twenty-four hours a day, these Ford cars are in operation. Few branches of transportation demand such grueling service. The records show that low fuel and oil consumption is but one of the Ford's many economies. Ford materials, simplicity of design and accuracy in manufacturing provide unusual strength, stamina and freedom from replacements and repairs.

The individual car buyer as well as the purchasing department of a city or a business cannot afford to ignore the proved economy of the Ford car.

RECIPES AND MENUS

By Department of Home Economics
Texas State College for Women
(CIA)

DENTN, Nov. 26—Years ago our Puritan forefathers began the custom of setting aside the last Thursday in November each year for the day on which to offer special thanksgiving for the favors God has granted during the past year. They commemorated this day by praying and feasting. Now we find a great tendency to make this day a day for football and various ohtre frolics.

In those early days housewives spent days and even weeks in preparing for this feast but today we must strive for menus which can be prepared in much less time. Then, too, we must strive to produce the best flavor possible.

In menu number one, cider ice is used to add a desirable flavor to the meat. In menu number two, currant jelly is used with ham. There is a certain tartness in currant jelly that we do not find in the usual meat sauces or in jelly.

The following are some suggested menus for Thanksgiving Day:

MENUS

MENU NO. 1

Fruit cocktail, roast turkey, dressing, candied sweet potatoes, Brussels sprouts, Cider Ice, rolls, carrot and English pea salad, cheese straws, pecan pie, coffee.

MENU NO. 2

Bouillon, crouton, baked ham, currant jelly, creamed cauliflower with parsley, Spanish rice, olives, biscuit, butter, stuffed tomato salad, saltines, pumpkin pie, coffee. Use pimento in Spanish rice and stuff the tomatoes with celery and apples.

MENU NO. 3

Cream of asparagus soup, celery hearts, stuffed olives, radish roses, roast turkey, stuffing, gravy, mashed potatoes, green string beans, cranberry jelly, hot rolls, butter, cold slaw, date pudding, coffee.

RECIPES

DATE PUDDING: 1 c flour, 2 t baking powder, one-half t. salt, 1 c sliced dates, one 1-2 c nut meats, one egg, one cup of sugar, one half cup milk, 1-2 t vanilla and 1-2 t lemon extract. Sift together the flour, baking powder and salt, Add sliced dates and chopped nuts. Beat the eggs and continue beating while adding the sugar gradually. Sift in the milk and flavoring. Add the dry ingredients and mix thoroughly. Spread the mixture over the surface of a well oiled, shallow baking pan form a layer about one inch thick. Bake in a moderate oven for one hour. Cut in squares when cold and serve with whipped cream or a tiny ball of vanilla ice cream. This will serve six.

PUMPKIN PIE: 1 1-2 c steamed strained pumpkin, 2-3 c brown sugar, 1 t cinnamon, 1-2 t ginger, 1-2 t salt, 2 eggs 1 1-2 c milk, 1-2 c cream 1-4 c shredded cocoanut. Mix in order given and bake in one crust.

Grandmother at 32

Although she is barely thirty-two years old, Mrs. Pearl Downward of Rushville, Ind., holds the distinction of being the youngest grandmother in her state. At any rate, she is the youngest to claim the honor. Mrs. Downward was married at fifteen and become a mother a year later. Her daughter, Mrs. Verdi Stevens, now of Dallas, Texas, recently duplicated her mother's record.

Charlie Pingenot and W. H. 'Bill' Gaines of Del Rio were Sanderson visitors Sunday.

ON TEXAS FARMS

By W. H. DARROW
Extension Service Editor

Sam Davis of Rule, the first man in Haskell county to terrace his farm, has averaged one-third bale of coton per acre on his 420 acres every year since terraces were constructed in 1925.

As a result of demonstrations by the county agent in killing ants in citrus groves, 6264 acres of citrus have been signed up in demonstrations of ant control using thallium sulphate or calcium cyanide treatments.

A 500-pound bale of cotton could be bought each week with the egg money from 400 pullets laying for Charlie Morrow, Houston county, poultry demonstrator.

C. C. Steadman of Cedar Hill Community, Dallas county, says that 20 pounds of butter net him as much as one bale of cotton. He delivers to Dallas customers at 40 cents per pound.

Eighty-five per cent of home demonstration club members in Jefferson county report enough canned food for balanced meals all winter, and that their families have learned to like many new vege tables.

Mrs. K. M. Foster, garden demonstrator for the Marshall Home Demonstration Club in Hardeman county, has served fresh vegetables every since May 1st and has enough canned for winter from her garden which she says netted $127.85.

A saving of two cents per tree was made by Henderson county farmers by ordering paradichlorobenzine cooperatively for the treatment of 3000 peach trees for borers, in demonstrations with the county agent.

Japanese Swim Star

Japan's new swimming star is Koji Yamazaki, sixteen-year-old high school boy, who broke the Japanese record for the 100-meter swim by splashing through the distance in 59 1-5 seconds, during the national championship meet at Tokyo. He is assured of a place on Japan's swimming squad in the 1932 Olympic games at Los Angeles.

SIMPLE CAKE RECIPE VARIED IN MANY WAYS

Every woman needs a simple, economical cake recipe which may be varied and used in many different ways. Such a cake is the following:

One-Egg Cake.

Scant half cup butter (wash free)
½ cup milk
1½ cups self-rising flour
1 teaspoon flavoring
½ cup sugar
1 egg

Cream butter and sugar together; add whole egg and beat thoroughly; add milk and flour alternately; put in flavoring; pour in greased and floured cake pan, and bake in a moderate oven (350 degrees F.) about 30 minutes.

That is the foundation recipe. One of the many ways it can be varied is to make it into an apple cake. After the batter is in the pan, press into it slices of a good baking apple, place in rows fairly close together. Sprinkle the top of the batter with sugar and cinnamon and bake in a moderate oven (350 degrees F.) about 35 minutes. Serve as a pudding with sauce or cream, or as a cake. This is excellent for school luncheon.

Another way to use the same recipe is to add spices and cook it in muffin rings or paper baking cups, to make little drop cakes. By substituting one-fourth cupful of flour with one-fourth cupful of cocoa, you may make chocolate drop cakes.

This recipe calls for self-rising flour which will save from 25 to 50 per cent of the time in making cakes. After the ingredients have been collected one should be able to make this cake in less than five minutes.

Self-rising flour not only saves the cost of the baking powder, but is healthful to use, too, because it supplies calcium and phosphorus for building and preserving bones and teeth.

Peach cake is another delightful way to serve this same simple cake. Bake the cake in a stem pan. Split the cake crosswise and put in a thick layer of sliced and sweetened peaches. Replace the upper half and fill the center with peaches. Cover the entire cake with a thick layer of whipped cream beaten very stiff. A few peaches may be used to decorate the cake. This makes a very attractive, delicious and nourishing dessert especially suitable to top off a light meal, such as vegetable dinner.

Arranging Peach Short-Cake. This is One of a Number of Delicacies That Can Be Made From One Simple Self-Rising Flour Recipe.

Churches

BAPTIST

The pastor will preach at both services Sunday. Sunday Nov. 29th thru Dec. 6th is the time designated for our people to make their subscriptions to the church budget. We hope that all of our members will come prepared Sunday to make their subscription. The budget is small and now is the time for all of us to show our love and loyalty.

The other services as usual.

—Ira Harrison, Pastor

Rugs Stocked by Stores Made by Farm Women

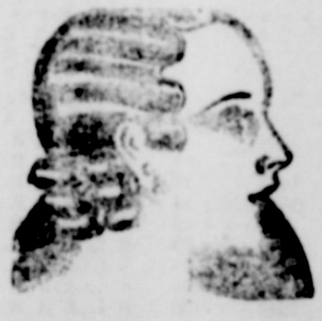

COLLEGE STATION, Nov. 25—An order for 100 hooked rugs made from wool and wrought into beautiful colored designs by Texas home demonstration club women has been placed by the manager of one of the largest department stores in Dallas for sale to the Christmas trade, it is announced by Miss Mamie Lee Hayden, specialist in home industries in the Extension service of A. and M. College and the United States Department of Agriculture.

The showing will be representative, she says, as women in 40 counties are polling some of their home-made rugs to fill this order.

Gay colors predominate in these rugs which are made of wool, appropriately dyed and hooked into patterns which are mostly two by three feet and two by four feet in size, with a few rounds and oblongs included. The prices received will pay the makers about 30 cents per hour for the time spent in manufacture, Miss Hayden states.

This is one of many old-fashioned home industries which the Extension is introducing to Texas farm women as a means of supplying the need for beauty in the home, and to obtain additional revenue from sales. Carefully protected for quality by home demonstration standards, a wide variety of these products are sold privately, in stores and in special markets in Texas under the distinctive "Better 4 - H Products" label. Among the articles thus far standarized and offered for sale by farm women are canned and other food products, household linens, handkerchiefs, quilts, and hand-tooled leather goods. Thus far these products have found a ready market.

Texas Is Praised By Southern Magazine

"Nine deep-water ports make the Texas Gulf Coast the front door to the world's markets for half a dozen great states, and give Texas a rank second only to New York as an exporting state. Exports and imports moving through Texas ports in 1929 amounted to $732,000,000, and coastwide trade was only a little short of a billion dollars," writes T. C. Richardson in his article on Texas which is published in the December issue of HOLLAND'S, the Magazine of the South. In further reference to Texas, Mr. Richardson says, "The greatest manufacturing enterprise in the state, very naturally is the refining of petroleum. Standing at the top of the list as an oil producing state—the average for 1929-1930 was 295,000,000 barrels — refined products run approximately half a billion dollars. The East Texas oil field, of now stormy history, has been called by geologists the greatest proved field in the world, with a potential production of about 1,300,000,000 barrels. Naturally, new refineries have sprung up in the shadow of the derricks, and pipe-line connections have been made from the new field to the greatest refining district in the world, among the Houston-Beaumont-Port Arthur deep-water facilities, whence the refined products go all over the globe. "Texas has long been a billion-dollar state in agricultural and ranch products; and, about 1924 she topped the billion-dollar mark in manufactures. Next to petroleum refining, in the order of total value of the products, come meat packing, eighty-five million dollars; cottonseed products eighty millions; flour and grain mill products forty-nine millions; lumber and timber products, forty-four millions. Car construction and repairs, foundry and machine shops, printing and publishing, wood preserving, cotton goods, bread and other bakery products each contributes from twenty to forty million dollars to the total."

Lake Cowden, 1100-acre body of salt water in Crane County, is the site of a salt factory which is installing equipment that will produce nearly 300,000 pounds of salt a day and give employment to thirty men.

WHAT WE NOW ARE

By THOMAS ARKLE CLARK
Emeritus Dean of Men, University of Illinois.

Grover is quite discontented with the curriculum which the college has laid out for him. He has in mind certain things which he will be doing ten or twenty years from now, and so far as he can see a great deal of the work which he is required to do in college will be of no practical benefit to him at that time. He sees no use in Latin or English literature or military drill and a half dozen other things with which his course is cluttered up.

"We none of us set out with the intention of being what we now are," a shrewd observer of human nature has said, "and we have all of us had to adapt ourselves to our situation from time to time."

Possibly his statement is a little sweeping, but in my own case it is strangely true. I have never done anything that I planned to do, and no position which I have ever held did I go after. It was chance or opportunity or the request or the insistence of my friends that put me into one position or another. I think it is so with many people. They plan to do one sort of work or another and then settle down for life in something entirely different. For these reasons I believe it makes little difference what one studies in college, just so he chooses those branches of study which give him mental discipline and breadth of view. Whatever makes a man think is the best thing for him.

There was Brown. He had made up his mind before he was out of the grades that engineering was the thing for him. He ate up mathematics and physics and chemistry. He was miserable until his mother bought him a set of tools, and then he fixed everything in the neighborhood which needed mending or readjusting. He was on the honor roll in college in engineering, and was elected to Tau Beta Pi in his junior year. He is very likely a successful engineer now, you say. Not so. He is the president of a bank.

Aid for War Veterans

More than 430,000 ex-service men and their families were aided through 3,008 Red Cross Chapters and the national organization during the year ending June 30, 1931. Dependent families were cared for, veterans' claims were filed, hospitalization obtained and many other services given. Part of each contribution during the American Red Cross annual roll call, Armistice Day to Thanksgiving Day, goes toward supporting this vital work for veterans of the World War and other wars in which the United States has engaged.

Books for the Blind

Through American Red Cross Chapters, 3,827 volumes of novels, class books and others, transcribed into braille for blind readers, have been added to libraries, in the past year. These books are to be obtained through the Library of Congress and city libraries. This activity, carried on by a great number of devoted women volunteers in Red Cross Chapters, had its inception in preparing books for war blinded.

Plaster of Paris

Plaster of paris is made by baking gypsum, thus driving off the water and leaving a fine dry powder. One part of this powder added to two parts of water creates a thin paste, which hardens quickly on exposure to the air. By adding a small quantity of lime to the paste a very hard marble-like substance called calcine plaster is produced.

THE FUTURE OF TEXAS INDUSTRY

(Editorial from Houston Cronicle)

Under the leadership of John W. Carpenter of Dallas the Progressive Texans, Incorporated, are planning an agressive campaign to further and promote the industrial expansion of the state. Co-operating with this group of business leaders are the chambers of commerce of East, South and West Texas, also those many private citizens who are interested in the success of their project.

We are too prone to consider Texas as a purely agriculture state. In the past we have maintained a great lumber industry and have evolved from nothing in the past generation a large and growing petroleum industry. So far as manufacturing is concerned, however, this state never rivaled North Carolina, or Tennessee or Alabama We have produced many raw materials in large quantities, but textile mills and steel plants have been located somewhere else.

That situation is gradually changing and the forward-looking leaders in Texas commerce and industry are fostering the idea that Texas cotton and wheat and wool and mohair and oil should be transformed into the manufactured product right here. And the group which Mr. Carpenter heads is backing its belief in the manufacturing future of the state to the tune of $100,000 a year to be expanded within Texas boundaries. Their headquarters at Austin will cooperate with the chambers of commerce in all cities of the state, finding out where new plants and industries can be located to advantage, ascertaining general business conditions in the various sections of Texas.

According to the 1930 census figures, Texas has made notable industrial progress during the decade just ended. Last year the state produced $1,450,000,000 worth of manufactured goods as compared with $1,000,000,000 10 years previously, when thecountry had just finished the world war and had greatly expanded industries of all kinds. In 1910 this state's industrial output was a mere $273,000,00, and at the beginning of the century $93,000,000.

Texas today is eleventh among the states in the number of its factories, thirteenth in the value of itsproducts, fifteenth in number of wage earners, sixteenth in total payrolls, and thirteenth in horsepower used for manufacturing. According to the 1930 census, its people and paid them $197,000,000 in wages. The figures do not show, of course, that the petroleum industry is mainly responsible for the respectable showing made in recent years.

Until we can attract textile mills and other forms of industry, the manufacturing interest of the state will be comparatively small in comparison with those in such states as New York, Illinois, Ohio and Pennsylvania. The Progressive Texans, Incorporated, as an organization, have a chance to perform some real pioneer work in the future. Their preliminary steps have been taken. It remains for their leaders and those cooperating with them to develop the plan they have outlined.

IS WINNER IN MEAT CONTEST

Texas Youth is one of the National Winners in Contest Sponsored by Well Known Stock Breeder

CHICAGO, Ill., Nov. 26 — The Texas state winner in the National 4-H Meat Animal Livestock Project Contest is Howard O'Daniel of Tulia, Swisher county, state club leader, M. T. Payne reports to the National Committee on Boys and Girls Club Work.

Howard will receive a 19-jewel gold watch in recognition of this achievment from Thomas E. Wilson, prominent livestock breeder, packer, chairman of the National Committee on boys and Girls Club Work, and sponsor of this contest. His project record will be judged along with those of state winners in the southwest extension division of the United States to determine a sectional winner. The sectional winner will be awarded an educational trip to the Tenth National Boys and Girls 4-H Club Congress in Chicago,November 27th to December 5th, during the same week as the Intrenational Live Stock Exposition.

The records of the four sectional winners will be judged in Chicago. During the week of the Club Congress, Mr. Wilson will award a $200 and $100 agricultural college scholarship to the three national winners in the order of their rank.

Howard is 20 years old and has been a club member for three years. During his first year in club work he fed two Hereford calves. Last year he fed six calves. This year he increased his project to feeding 20 calves and produced 11,287 pounds of beef.

His total net profit from his 4-H feeding enterprises totals $1,229.49. He has also won $665.00 in premiums. Howard now has 40 head of good Hereford calves on full feed that will be ready for market in 1932. This is his last year in club work, but he expects to continue marketing home grown grains by feeding it to livestock.
