'All hail the power....'

Jim Haley, top photos, holds some of the baseball-sized hailstones that fell Thursday afternoon near the Nita Stewart Haley Memorial Library, 1805 W. Indiana Ave. The damaging hail left its mark in the form of dents and shattered windows

on vehicles. Charlie Alexander, bottom photo, picks up the pieces from the shattered back window of his Datsun, which was parked at the Petroleum Information building at 500 N. Baird St. when the hailstorm struck about 4 p.m.

'Jumbo' hail jars downtown Midland

By PATRICK DEAREN
Staff Writer

Baseball-sized hail pummeled portions of Midland in a brief span beginning at approximately 4 p.m. Thursday, and by the time it had subsided numerous vehicles had sustained damage in the form of dents and cracked windshields.

The storm apparently began in southeast Midland and moved in a northeast direction through the downtown and east Midland area, as numerous reports of hail flooded the National Weather Service.

At 4:04 p.m. 1- to 2-inch hail was reported to the NWS as falling in the Tall City, and by 4:10 p.m. baseball-sized hail was striking the downtown area.

At 4:20 p.m. mobile homes at Sherwood Mobile Home Park 2.8 miles east of Midland on East Highway 80 were struck by 2- to 2½-inch hail, while 25 minutes later the Arco plant on the east side sustained baseball-sized hail.

Hailstones of similar proportions, pounded agricultural fields along East Highway 80, completely destroying at least one farmer's cotton crop. Midland Farmers Co-op gin suffered cracked windows in a four-minute span as the storm swiftly swept eastward across Midland County.

Wilson Upchurch, who lives six miles east of Midland on FM 1140, may have received the biggest hailstone during the storm. Upchurch reported a softball-sized hailstone measuring 11½ inches in circumference landed in his yard at the height of the storm.

No estimate of monetary damage of the storm was available.

While Midland Memorial Hospital Emergency Room did not treat anyone suffering injuries from falling hailstones, there were confirmed reports of minor cuts and welts sustained in the downtown area.

Rain accompanied the hail, flooding downtown streets and stalling some vehicles. However, the NWS, located west of Midland at Midland Regional Airport, recorded only an official trace.

Most area towns escaped the rain and hail, with Lamesa reporting some pea-sized hail. Stanton also reported rain, but no amount was given.

The Permian Basin area again was given a slight chance of additional precipitation this afternoon, but weekend conditions should be favorable with fair skies and a high temperature in the low 80s.

Thursday's high was 84 degrees, 16 degrees shy of the record of 100 set in 1947. This morning's low of 63 didn't threaten the record of 41 set in 1938.

Will Reagan compromise on proposed tax cuts?

By CLIFF HAAS
Associated Press Writer

WASHINGTON (AP) — President Reagan, savoring a "resounding victory" in his first big budget battle in the House, now is hinting at compromise on the massive tax cuts he has pledged to deliver to the American people.

The \$688.8 billion budget blueprint for fiscal 1982, matching Reagan's call for deep spending and tax cuts, was endorsed overwhelmingly by the House on Thursday, with scores of Democrats defecting to join a unanimous Republican minority.

On two votes, the margins were 253-176 and 170-154 for the Reagan-backed plan crafted by Reps. Phil Gramm, D-Texas, and Delbert L. Latta, R-Ohio.

Those far outstripped the 51-seat majority that Democratic leaders had hoped would be their check on what GOP leader Robert Michel of Illinois trumpeted as a change of course for American government. And they left some of the president's opponents and supporters doubting that his less popular proposal for a three-year, 30 percent tax cut could be stopped.

Reagan, however, seemed to be relaxing his vow not to compromise on taxes.

"I happen to believe that what we have proposed is an integral part of the program and strive for all of that," he said when asked about a tax compromise, hours after the House vote as he prepared to welcome Japanese Prime Minister Zenko Suzuki to a formal White House dinner.

"But I don't know what other proposals might be made, just as Gramm-Latta came forth with a proposal with regard to the budget that, uh, even suggested more cuts," Reagan added.

House Budget Committee Chairman James R. Jones, D-Okla., whose budget proposal was scuttled in favor of the Reagan-backed plan, said after the vote that if president gives his tax-cutting recommendation "the same attention" as the budget plan, "I believe it will carry."

Reagan hailed his victory — just the first step on the congressional budget path — as a "historic moment of commitment to a government that can both serve the people and live within its means."

The next step is in the Senate, which is considering a \$699.1 billion budget resolution that differs little from the measure endorsed by the House. The Senate's Republican majority was almost certain to deliver on its proposal — also embraced by Reagan — perhaps by Monday.

In initial action Thursday, the Senate soundly rejected moves to strip \$100 million earmarked for legal aid for the poor and to add \$100 million for the Veterans Administration.

The tide in the House had been shifting Reagan's way for the past two weeks, but the margins were stunning. The president prevailed by 77 votes on the most critical roll call, drawing support from all 190 Republicans and 63 of the 241 Democrats to substitute the Gramm-Latta version for a Democratic leadership plan that would have given Reagan 75 percent of his recommended spending cuts.

Although interest up, economy showing signs of improvement

WASHINGTON (AP) — Despite renewed surges in interest rates, the economy shows signs of improvement, with receding inflation predicted for the rest of the year.

The current worldwide glut of oil has slowed energy price inflation, while spiraling housing prices have tapered off because of high mortgage rates, and several economists say the price trends are expected to continue throughout 1981.

As a result, some forecasters predict inflation will run below a 10 percent annual rate for the rest of the year, perhaps as low as 8 percent.

Consumer prices rose 12.4 percent last year, with energy and housing price rises leading the way.

The latest inflation pulse was to be taken today with the government's release of its report on wholesale price rises during April.

The government also planned to release its report on the nation's unemployment rate during April. The jobless rate stood at 7.3 percent of the workforce in March and has shown little change since jumping from 6.3 percent

7.6 percent during the spring of 1980. Economist Donald Ratajczak at Georgia State University, which issues its own price report each month, estimated that prices at the wholesale level rose at only a 7.5 percent annual rate during April, less than half the increase recorded for March.

Ratajczak said a long-expected surge in food prices still has not developed, while energy inflation is rapidly receding. In general, he concludes, "inflationary pressures definitely are moderating."

Inflation at the wholesale level rose at a 16.2 percent annual rate in March — the steepest increase in eight months — because of sharp jumps in energy costs and a new rise in food prices.

The wholesale report — which the government refers to as the Producer Price Index for finished goods — usually provides a good indication of future price trends at the consumer, or retail, level.

In March, consumer prices rose at an annual rate of 7.5 percent, the slowest pace since last summer.

Irish violence less than feared

BY ED BLANCHE
Associated Press Writer

BELFAST, Northern Ireland (AP) — Sniper fire, a gun battle and some rioting occurred in Northern Ireland after the Irish Republican Army buried its new hero, hunger-striker Bobby Sands, and renewed its vow to free all of Ireland from British rule.

In Dublin, police reported a bungled attempt to assassinate a former foreign minister of the Irish Republic, Garrett Fitzgerald, leader of the opposition Fine Gael Party and an outspoken critic of the IRA.

The violence in Ulster Thursday night was less intense than security chiefs had feared. But the 20,000 mourners at Sands' funeral cheered wildly when IRA political expert Owen Carron declared in a fiery graveside oration:

"Bobby Sands, your sacrifice will not be in vain.... We haven't got the

tanks and the guns but, please God, this will not always be so."

Police headquarters warned the province to be alert "in the days ahead...having regard to the known intentions" of the IRA's Provisional wing and the splinter Irish National Liberation Army. The police statement added: "This should be espe-

Related story
and photos, Page 8B

cially borne in mind by persons who occupy positions of prominence or influence in the community."

Mobs of young Roman Catholics lobbed gasoline and acid bombs at security forces in Belfast and Londonderry, as they have every night for more than a week, and in the border town of Strabane. Police said Strabane's municipal tourist bureau was gutted by firebombs.

Army and police patrols came

under sporadic sniper fire in Roman Catholic areas of Belfast and Londonderry. Officials said at least one policeman was wounded.

An army patrol fought a gun battle with four guerrillas near the border of the Irish Republic Thursday night. The soldiers captured one gunman and another was arrested by police in the republic. Unconfirmed reports said the other two guerrillas were shot and killed, but the army refused to confirm or deny it.

Sands, a 27-year-old member of the IRA Provos, died of starvation early Tuesday in the Maze prison near Belfast, where he had been serving a 14-year sentence for illegal possession of firearms. He had fasted for 66 days in a campaign to force the British to jailed IRA members as political prisoners rather than common criminals.

Three other convicted guerrillas remain on the hunger strike despite the British government's adamant refus-

al to give them political status. There were unconfirmed reports another prisoner would join them Saturday.

Francis Hughes, 25, was in the 55th day of his fast. Sinn Fein, the IRA's political front, claimed Hughes is in grave condition and in severe pain. But Prime Minister Margaret Thatcher's government once again vowed to stand fast.

"We are not prepared to concede the principle of political status for which Robert Sands was ordered to die, nor are we prepared to do so to prevent others taking the same course," said Humphrey Atkins, the Cabinet minister for Northern Ireland, in a TV broadcast.

The IRA's farewell to Sands, four weeks to the day after he was elected to the British Parliament, brought out the biggest funeral crowd the outlawed guerrilla army has mustered in nearly 11 years of sectarian warfare.

TEXAS AREA FORECASTS

West Texas: Partly cloudy most sections today with widely scattered thunderstorms mainly east today and southeast tonight. Fair most sections and cooler north Saturday. Highs mid 70s north to low 90s extreme south. Lows mid 40s north to mid 60s south. Highs Saturday upper 60s north to low 80s along Rio Grande.

North Texas: Mostly fair west, decreasing cloudiness central today. Scattered thunderstorms northwest today, spreading across most of area tonight. Decreasing cloudiness west to east Saturday. Warmer today, cooler west Saturday. Highs 80s to 90s. Lows 50s to 60s. Highs Saturday 70s to 80s.

South Texas: Partly cloudy and humid through Saturday with a slight chance of thunderstorms through tonight. Hill Country and South Central Texas, becoming more numerous and spreading eastward Saturday. Highs 70s upper coast, 80s and 90s elsewhere. Lows 60s and 70s.

Investigation begins into plane crash

WALKERSVILLE, Md. (AP) — Investigators trying to determine what caused a military radar jet to crash, killing 21 men and women, may never make their findings public, the Air Force says.

The investigation began Thursday after searchers who had spread out in human chains found the remains of the last of the 18 servicemen, a civilian contractor and two Air Force wives who perished in the fiery crash Wednesday.

Air Force Brig. Gen. Peter Odgers, interim chairman of the Air Force investigation, would not speculate on the cause of the crash. But he conceded during a news conference at the site, a remote barley field, that sabotage had not been ruled out.

Eyewitnesses said the jet looked like a "ball of fire" as it fell to the ground. But Odgers said there was no proof the plane had exploded.

Air Force M. Sgt. Cleveland Parker at Andrews Air Force Base said the results of the investigation will be "implemented into safety procedures."

"The results may not ever be released publicly," he said.

The plane, a \$50 million EC-135N, was only one of eight such planes built, and the first ever to crash, the Air Force said. It was attached to the 4950th Test Wing based at Wright-Patterson Air Force Base in Dayton, Ohio.

The aircraft did not have aboard a flight recorder like those used by commercial pilots to tape a continuous record of procedures, Parker said.

"On this airplane, it isn't standard procedure to have a flight recorder on board because this was a routine training flight," he said.

The Federal Aviation Administration said Thursday the aircraft was flying at more than 28,000 feet when it disappeared from radar.

Military authorities continued to deny reports that the plane was carrying classified documents.

"You cannot put classified (documents) on a mission with civilians that are not cleared," Parker said, adding that the two women aboard did not have the clearance required.

Meanwhile, the work of identifying the charred, torn bodies continued.

The two wives were identified as Peggy A. Emilio and Linda Fonke, who were killed along with their husbands, Capt. Joseph Emilio of Long Beach, N.Y., and Capt. Donald V. Fonke of Fayetteville, N.C.

Water bubbles up through a clogged street drain on Garfield Street Thursday afternoon after a hail and thunderstorm. The National Weather Service,

located at Midland Regional Airport, officially recorded only a trace of rain, but much more than that fell throughout Midland.

Missing youth found, in custody

ATLANTA (AP) — Fourteen-year-old Eric Thompson, who disappeared for two days and was the focus of an intense search in this city where 26 black youths have been slain, has been found and is in the custody of juvenile authorities, police said.

Thompson was found Thursday night and placed in the custody of suburban Cobb County officials, Atlanta Police spokesman Roger Harris said. Harris would not say where Thompson was found or why he was placed in a juvenile detention center.

A spokesman at the Youth Development Center in Marietta, about 10 miles northwest of Atlanta, confirmed that Thompson was in the center Thursday night, but refused to release other details.

Thompson's case had been investigated by the police missing persons unit, not the special task force investigating the slayings and disappearances that began 22 months ago. Before he was located, Thompson

last was seen Tuesday afternoon boarding a bus in downtown Atlanta.

He was reported missing Wednesday by Brandon Southern Jr., director of the Challenge School, a special state-run facility attended by at least two of the 26 slain blacks.

The boy had run away before and had missed classes in the past, but Southern said Thompson always had called to say if he would be absent.

Meanwhile, authorities in DeKalb County confirmed that they have subpoenaed a list of Boys Club employees in the Atlanta area. DeKalb authorities are investigating the slayings of four youths whose bodies were found in that suburban county. The task force is also investigating those slayings.

DeKalb Public Safety Director Dick Hand said police are conducting a "general background check" to determine who may have known or come into contact with the victims.

Bob Jackson, associate executive director of Metro Atlanta Boys Clubs,

said the 13 Boys Clubs in the Atlanta area employ a total of 125 staff members.

"I can see why they asked for it (the staff list)," Jackson said. "Most of the victims must have visited a Boys Club at some time."

In another development, an Atlanta man, Larry Marshall, 34, was sentenced to three years in prison on misdemeanor charges. Officials dropped an attempted robbery charge following his decision to cooperate with the task force investigating the slayings.

Marshall was extradited from Hartford, Conn., in April. Police said they wanted to question him about his relationship with one of the victims.

But after a session last week with the task force, Fulton County District Attorney Lewis Slaton said Marshall provided no new information. Marshall was sentenced Thursday for convictions on two charges of theft by taking and one count of defacing the mail.

Fraud probably cost government up to \$220 million

WASHINGTON (AP) — Fraud and illegal activities may have cost the government as much as \$220 million in 2½ years, but the actual losses may

never be known because most incidents go unreported, the General Accounting Office says.

The GAO, the investigative arm of

Congress, found evidence of fraud in the 21 agencies it surveyed. The study examined 77,000 cases where fraud was known or suspected.

The fraud found in the GAO analysis, which covered the period from Oct. 1, 1976, to March 31, 1979, ranged from actions committed with the help

of computers to simple theft of government property.

The GAO said it probably cost the government between \$150 million and \$220 million. "Actual losses due to fraud and other illegal activities will never be known because most go undetected," the report noted.

Theft was the most common type of fraud, making up nearly half the 77,000 cases checked. Among the least prevalent types of fraud were the failure to meet contract terms, extortion, private use of government property and kickbacks or bribes.

Some of the government's biggest programs — including food stamps, most Medicaid cases and most Aid to Families With Dependent Children cases — were not checked because those programs are under the jurisdiction of state and local authorities.

But the GAO did note that a 1977 investigation estimated that the government was losing some \$600 million a year in the food stamp program alone.

In the latest study, the GAO estimated that about 16,000 cases of fraud involved the Army and about 18,000 the Navy. The Postal Service accounted for 11,000 cases and the Social Security Administration for 13,000.

Among examples of fraud cited by the GAO were:

— A General Services Administration employee who set up a fictitious company which received about \$300,000 in payments for services never received.

— A clerk who issued 12 fraudulent payroll checks totalling about \$17,000 to two accomplices. Once her fraud was uncovered, three other employees of the same office confessed or were found guilty of collecting \$16,000 through fraud. Two others in the office were arrested for suspected fraud totaling about \$95,000.

— A real estate agent who allegedly bribed a Veterans Administration official to issue phony certificates saying home buyers were eligible for a VA loan.

The GAO said its analysis showed about 30 percent of the cases involved fraud by federal employees. Recipients of federal assistance accounted for 18 percent of the cases and corporate or business entities for 12 percent. In 30 percent of the cases, most of which involved theft, the perpetrator is unknown.

The agency said weak internal controls often contributed to cases of fraud and illegal activities. And it said the government recovered — even by the most optimistic estimates — less than 30 percent of the funds lost as a result of fraudulent practices.

TEXAS BRIEFS

Blockade threat between Juarez, El Paso retracted

EL PASO, Texas (AP) — The Mexican union leader who threatened to blockade the bridges between Juarez and El Paso says "it was never our intention at any moment" to carry out the threat.

Roberto Delgado Urias, head of the non-government Confederacion Revolucionaria de Trabajadores, threatened Monday to block all traffic coming into Juarez in eight days if "extremely slow and humiliating" border inspections were not corrected.

He said union members crossing to work in El Paso are often held up for several hours in the mornings, causing them reprimands and sometimes costing them their jobs.

About 8,000 union members possess "green cards" identifying them as permanent resident aliens who may work in the United States, primarily in construction, agricultural and manufacturing jobs, he said.

Delgado said he met with U.S. Immigration and Naturalization Service district head Al Giugni and inspection supervisor Henry McGehee Wednesday and asked them in writing to look into the problem.

Violent confrontations following an apparently spontaneous bridge blockade in 1979 left one Juarez girl dead when a car ran over her. That protest, which blocked the bridges for two days, came after INS officials deported more than 100 illegal aliens.

Ohio man stabbed to death on visit

DALLAS (AP) — Police say the slaying of a grocery manager found in a fashionable Dallas suburb was so cruel that it looked like the killer was out for revenge.

Michael A. Roop, 32, of Toledo, Ohio, died at 3:37 a.m. Thursday at Parkland Memorial Hospital. He had been stabbed about 30 times and apparently had been robbed. A construction worker found him in a fashionable neighborhood near Southern Methodist University.

"It was a brutal, brutal thing," said Highland Park police Chief Henry Gardner. "If he wasn't a stranger, you would think this was some sort of vindictive thing."

Highland Park police Sgt. Larry Gentry said Thursday police had no leads in the slaying. The body was taken to the Dallas County medical examiner for an autopsy.

Roop, a store manager for Centre Supermarkets, was in Dallas for the Food Marketing Institute convention.

"He was a stranger here," Gardner said. "His wallet was found there empty of money. A fellow traveling is bound to have some money on him. He didn't, so that's evidence they took his money."

Klan leader wants arbitration panel

HOUSTON (AP) — Louis Beam, grand dragon of the Texas Ku Klux Klan, says he will "offer a wreath of reconciliation" to Vietnamese fishermen at a KKK rally Saturday in Santa Fe.

Beam said he plans to propose that a four-member arbitration panel comprised of himself, American and Vietnamese shrimpers and a representative of Gov. Bill Clements be formed to discuss the long-standing dispute over fishing rights in Galveston Bay.

"I'm extremely satisfied with the practical results that have occurred from our participation in the dispute between the American and Vietnamese fishermen," Beam said. "With a little reasonableness on both sides, the problem can be solved."

At a Feb. 14 rally, Beam demanded refugee settlers leave the area before the shrimp season opens May 15 or the Klan "would take action" to resolve the

dispute.

About 60 percent of Vietnamese fishermen living in the area offered to sell their boats and move inland.

"I think a fair number of Vietnamese will be given licenses and will continue to be able to fish," said Beam, adding that no refugee need fear his life or property is threatened by the Klan.

Beam, other KKK leaders and several native fishermen were named in a lawsuit filed last month in behalf of Vietnamese fishermen, seeking federal protection against alleged intimidation and harassment.

"I'm not saying they have to drop their suit (for the offer of reconciliation to remain good)," Beam said. "If they feel they have a legitimate complaint, let them go ahead."

Masked men rob noted surgeon

HOUSTON (AP) — Three men wearing ski masks and wielding a pistol broke into the home of Dr. Denton Cooley, forced the noted Houston heart surgeon to lie down on the floor and robbed him of \$250, police said.

The bandits broke through a glass-enclosed porch and forced the surgeon to lie on the floor of the library, said Lt. D.L. Sitz.

Cooley's wife, Louise, heard a noise and went downstairs. When she discovered the bandits, she ran to a neighbor's house and called police, Sitz said.

Three suspects were arrested and questioned late Wednesday, but only one man — who carried a 9mm pistol — faces charges, the detective said.

Cooley was unable to identify the suspects and a laboratory analysis of their clothing, shoes and hair was inconclusive, Sitz said.

Inmate threatens to jump from roof

HOUSTON (AP) — Authorities talked five hours with a "despondent and depressed" Harris County jail inmate who had threatened to jump from the rooftop of the eight-story building before the prisoner voluntarily surrendered.

The inmate, Dudley Shawn Prichard, 23, stood near the ledge Thursday until his attorney, sheriff's deputies, fire department officials and members of the Crisis Negotiating Team coaxed him back into the building.

Prichard had demanded to be given "some kind of uppers," said Lt. J. Glantzberg of the Harris County sheriff's department. Officials agreed to deliver the drugs "to buy some time" but the demand was never met, Glantzberg said.

The spectacle attracted a crowd of several hundred on the ground below, but after three hours of waiting, "the crowd kind of dwindled down," said Cpl. Tom Twardowsky.

Texans charged in illegal alien deal

BOSTON (AP) — Two Texans have been released on \$1,000 bail for a May 21 hearing on charges they illegally brought six Mexicans into the country to work for their Houston-based roofing company.

The two men were arrested earlier this week after police in Woburn discovered six Mexicans living in an old warehouse.

William Overstreet, 31, and Alvaro Nunez, 42, could receive \$2,000 in fines and two years in jail if convicted. The Mexicans, also released on \$1,000 bail after a hearing in U.S. District Court, could receive six months in jail and \$500 fines for entering the country illegally.

Plywood, two-by-fours taken from local construction site

A burglary and two theft complaints were reported to city police during the past 24 hours.

Thirty-two sheets of plywood and

Police, Fire Roundup

some two-by-fours were taken from a construction site at 425 Neely Ave., police were told. Value was placed at \$400.

A three-wheeled motorcycle worth \$1,000 was reported stolen from 1301 E. Mulberry, and Milton Taulton of 2911 W. Louisiana told officers a reel-to-reel tape player valued at \$150 was taken in a burglary of his residence. Entry was gained through an unlocked front door.

Fire of undetermined origin hevi-

ly damaged a tin storage building at 4707 Comanche about 5:30 p.m. Thursday. Five fire units responded to the blaze, which also destroyed the contents of the building, owned by James Cunningham.

A car owned by Charles Bishop sustained heavy damage in a fire at Garfield and Carter Streets about 7:30 p.m. Thursday. Seventy-five gallons of water were needed to extinguish the blaze in the 1980 Pinto.

Kirkland rails against review of safety rules

By MERRILL HARTSON
AP Labor Writer

BALTIMORE (AP) — AFL-CIO President Lane Kirkland, conceding that unions lack the political clout to reverse the budget-cutting fervor in Congress, is railing against the Reagan administration's move to review job safety regulations for their cost to industry.

Acknowledging Thursday that "we don't at the moment have the votes" to save cherished labor programs from the budget ax, Kirkland aimed his fire at Labor Secretary Raymond Donovan, whom he accused of reneging on a promise to consult labor in advance of major administration decisions.

Kirkland is presiding over a quarterly meeting of the AFL-CIO's top policy-making council, which was to receive a report today on agency moves to subject cotton dust and lead safety regulations to cost-benefit analysis.

The federation leader said decisions on job safety rules "all came as surprises. We were not consulted. We were not asked our opinion. We were not given the opportunity to explain our side of the case."

Donovan, who was meeting with building trades union officials at the Labor Department on Thursday, retorted in a telephone interview:

"I have no desire to get into an unproductive argument with Mr. Lane Kirkland. I did make a commitment to consult with labor before making major agency decisions which affect labor. I believe I have done so."

He had on at least one occasion told a labor group: "I will never blindside you."

Kirkland and Donovan crossed verbal swords in Bal Harbour, Fla., in February, two weeks after the labor secretary was confirmed by the Senate.

The two emerged from an executive council meeting with conflicting accounts of the degree to which the 35 union presidents on the policy-making body were willing to give Reagan's economic program a chance.

The AFL-CIO and the American Textile Workers

AFL-CIO President Lane Kirkland, right, closes his eyes as he winds up with the gavel in a make believe gesture of hitting Secretary

Treasurer Tom Donahue, prior to a meeting Thursday. The executive council opened a two-day meeting in Baltimore.

Union have assailed the administration's decision to withdraw the cotton dust standard, issued by the Carter administration in 1978 to protect mill workers against brown lung, a respiratory disease.

In the May edition of the Communications Workers of America's newsletter, union president Glenn Watts declared, "The health and safety needs of CWA members and other workers apparently will be considered only as an afterthought to business profit concerns."

Donovan maintained Thursday that the cotton dust standard is only being studied.

"When we have concluded that study, we will consult with representatives of organize labor as well as other affected parties before reaching a final decision," he said.

Members of the textile workers union and the Brown Lung Association staged a demonstration in Washington on Monday to protest the review of the cotton dust standard.

UMW, coal industry to talk through weekend

By G.G. LaBELLE
Associated Press Writer

WASHINGTON (AP) — Negotiators for the United Mine Workers and the soft-coal industry are considering talking into the weekend amid predictions it will take a "lot of tough bargaining" to resolve the six-week-old nationwide coal strike.

The representatives for the miners and the Bituminous Coal Operators Association met for five hours Thursday in a Washington hotel as sporadic violence again flared across the coal fields.

At the end of the session, B.R. Brown, chief negotiator for the mine operators, said bargainers on both sides should know today whether talks would continue into the weekend.

As for the progress being made, Brown would only say: "We've just done some visiting."

UMW President Sam Church said

"we're still talking" when asked whether the negotiations were going forward.

UMW spokesman Eldon Callen said a settlement before the weekend was possible but not at all likely.

"I know there's going to be a lot of tough bargaining," he said. "It could be done in a short amount of time, but I just don't expect it."

Callen said Church had been pushing continually for resuming the talks, which broke off three weeks ago. Church speculated that mine operators were getting nervous about losing foreign markets if the strike continued much longer.

A Commerce Department report issued late last month estimated, however, that the strike would not cause serious export problems unless it lasted another two months.

The 160,000 UMW members who work in the soft-coal industry went on strike March 27. Soon afterward, they formally rejected, by a 2-1 margin, a proposed contract recommended by their union negotiators and the BCOA.

After visiting the coalfields, UMW negotiators placed seven new demands on the table, and Callen said they still were at issue.

The union's major demands include restoration of a \$1.90-a-ton royalty payment to UMW pension funds for non-union coal purchased and processed by the companies. The expired contract included the provision, but it was omitted in the rejected contract.

The UMW also wants non-union subcontractors to pay wages comparable to prevailing union scales in their work areas.

Negotiations may be disrupted by a UMW district election next week. One of the union's negotiators, Walter Suba, was defeated in a similar district vote earlier this week, and another, Jack Perry, faces two challengers in an election next Tuesday.

DEATHS

Lillian B. Nix

ACKERLY — Lillian B. Nix, 71, of Ackery, died Wednesday in a Lamesa hospital after a long illness.

Services were to be at 2 p.m. today at the First Baptist Church in Ackery with the Rev. Roy Haven, minister of Ackery Methodist Church, officiating. Burial was to follow in Ackery Cemetery under the direction of Branon Funeral Home.

Survivors include two sisters, Zona Mae Miller of Coahoma and Nina Bell Moore of Azle; and two brothers, Fred Nix of Stanton and Troy Nix of Richmond, Calif.

She moved to Ackery in 1942 from Eunice, N.M., where she was a farmer in the Ackery community.

N. Ford Chapman and Stanley Moore, two electees to the Permian Basin Petroleum Museum's Hall of Fame, received certificates of election at the Hall of Fame dinner held Wednesday night at

Greentree Country Club. Guest speaker for the event was H.E. "Eddie" Chiles, who began his oil career in the Permian Basin in 1939.

Four oil veterans honored at Hall of Fame Dinner

By CONNIE W. HARDING
Oil Staff

Four outstanding oil veterans were inducted into the Permian Basin Hall of Fame Wednesday night before an audience of more than 450 at the Permian Basin Museum Hall of Fame Dinner at Greentree Country Club.

The Petroleum Museum began recognizing electees to the Hall of Fame in 1968. Outstanding individuals in the petroleum industry whose careers have contributed to the development of the oil and gas industry in the Permian Basin and whose characters or civic service have framed a worthwhile example for the industry are eligible for the honor.

A special committee chooses among names submitted by anyone and nominates no more than four who are then elected by the museum's volunteer boards.

This year's selection committee was chaired by Kenny Jastrow.

An audio-visual presentation "Four" recapped the career and personal lives of these inductees to the Permian Basin Museum's Hall of Fame with family album pictures and memorabilia. Certificates were presented to the following four honorees and their families by Maurice Bullock, partner in the law firm of Bullock, Scott & Neisig and currently chairman of the museum's Board of Executors:

N. Ford Chapman, Jr. who kept alive the art and lore of cable-tool drilling for oil, coupling the ancient skill with important discoveries in the Permian Basin.

Chapman drilled many wells for himself and found important fields in Reeves, Culberson and other counties.

An enthusiastic backer of civic projects, he was honored by the Schreiner Military Institute at Kerrville and supported the petroleum museum since its beginning in 1967.

Jessie Clement Barnes did well in several fields before beginning his oil career in East Texas in 1936.

One year later he began a career as an explorer and producer in Midland.

He extended the Keystone Field in Winkler County and assisted in defining the TXL Field in Ector County.

Known as a pioneer and advocate of deeper drilling, he opened the Emperor Deep Field in the Permian Basin and portions of the Anadarko Basin in Oklahoma.

A 32nd degree Mason, he gave generously of his time to civic and public causes and was active in his church. Barnes died in Fort Myers, Florida in 1975 at the age of 83.

Charles Vernon Lyman was a successful wildcat and producer in the Permian Basin.

He attended the University of Virginia and Sewanee and served in World War I.

He entered the Texas oil business in 1921 and opened fields in Winkler and other West Texas counties as well as in South Texas.

A true conservationist, he sought to save and use the tremendous amount of gas produced from his own wells when flaring was a common practice. His diverse personality was portrayed in his love of athletics and music.

He died in 1977 in Phoenix at the age of 83.

Stanley Moore attended Rice University in 1937, held several jobs and still had time to "court his wife" while finishing school. One writer said he "took a cut in pay" when he got his first engineering position with Hughes Tool.

Moore founded Drilco and built its success on response to the technical needs of rig hands' complaints and suggestions. Drilco later became a part of Smith International.

Extremely generous, he has supported Rice University and many non-profit organizations in Midland.

Introduced by John F. Younger, H.E. "Eddie" Chiles, who began his oil career in the Permian Basin in Seagraves, Texas in 1939 with an oil

well acidizing company boasting only two trucks, was special speaker. Chiles' company has grown into a lucrative million dollar a day operation with 13 rigs drilling offshore by contract.

"Politics and Petroleum", a discussion of the past, present and future of the Permian Basin oil industry, was his subject and Chiles touched on the era of the mid-1950's and the petroleum boom during the Eisenhower administration.

The Basin saw 600 rigs working during that time, according to Chiles and "we see a similar period with 600 rigs again working in the Permian Basin, he added.

"The Bureaucrats must keep their hands off if this country is ever to be secure again", said Chiles.

"We need to get rid of two DOE's", he said. "The Department of Energy, we can save \$14 billion a year in waste and inefficiency and take 20,000 unemployed from that department for the army, and the Department of Education, which would save \$10 billion and give us 12 or 15 thousand people for the navy."

With the DOE's out, we wouldn't have so many bucks going up there."

Chiles advocates the removal of Price controls and the Windfall Profits Tax, which must be done by Congress, in order to make possible new endeavors in infield drilling in the Permian Basin. He commented that the Permian Basin could then utilize tertiary recovery methods, test deeper sections, enter old wells and drill holes between wells and enter a new era of greatness.

Chiles also recommended that the government be purged of liberals and socialists, that federal lands be open for leasing and accessible to oil company's for extraction of the hoard of minerals, that these lands not be utilized and available to only "back-packing hippies."

Chiles summed up his speech by recommending the 1982 election of conservatives and stating that he desires only three things:

"Guard our shores, deliver the mail on time and leave me alone."

Society to hear Clark

The West Texas Geological Society will meet Tuesday in the ballroom of the Midland Hilton for a lunch and program at 11:20 a.m.

Robey H. Clark, president of the American Association of Petroleum Geologists and group vice president of exploration and production, Diamond Shamrock Corporation of Amarillo, will speak. His topic is "Evolution of Prospect and Prospecting in the Northern Gulf of Mexico, 1950-1980." A native of Louisiana, Clark received his B.S. in geology from Louisiana State in 1943. After a tour of duty in the Naval Reserve, he completed his M.S. in geology at the University of Wisconsin and began his industry career with Magnolia (Mobil) in 1946. He joined Diamond Shamrock in 1971.

Clark has authored numerous publications on sedimentation, stratigraphy and basin analysis, is affiliated with numerous professional societies, and active in AAPG.

Reservations for the meeting should be made through the W.T.G.S. office (683-1573) before 5 p.m. Friday.

Activities filed for Howard, Pecos counties

A field test has been announced in Pecos County and a completion reported in Howard County by the Texas Railroad Commission District 8 headquartered in Midland.

PECOS COUNTY

The Three-B Oil Co. of Monahans has announced plans to drill a 2,100-foot field test in the Payton field of

ENERGY OIL & GAS

Pecos County, three miles south of Grandfalls.

The site is 7,637.6 feet from the south line and 330 feet from the west line of section 81, block 8 of the H&GN RR survey.

Location is 1,000 feet northeast of the No. 1 Atlantic, a dry and abandoned Mississippian (9,561 feet) and Devonian (10,306 feet) site, abandoned July 7, 1957 and just south of a Payton Pool Yates, South production unit.

HOWARD COUNTY

The McCann Corp. of Big Spring has announced the completion of a discovery well in Howard County, four miles southeast of Coahoma.

Producing from perforations made from 6,982 to 6,988 feet, fractured with 5,500 gallons, the well is potentialized at 45 barrels of 35 gravity oil and 60 barrels of water. The gas to oil ratio is 1335 to 1.

Drilling topped the following formations from an elevation of 2,298 feet: Canyon Sand, 7,320; Strawn, 8,406; Mississippian, 8,618; Woodford, 8,768; and Fusselman, 8,801.

Total depth of the well is 8,900 feet with a 4 1/2 inch casing set at 7,915 feet and plugged back to 8,600 feet.

Location is 660 feet from the south line and 467 feet from the east line of section 19, block 30, T-1-S of the Texas and Pacific Railroad Co. survey.

Dual discovery announced in Nolan County

Parallel Petroleum Corporation of Midland has announced completion of an oil and gas discovery 26 miles south of Sweetwater in Nolan County.

The No. 1 H.P. Arledge flowed on an initial potential test at a rate of 384 barrels of 45.5 gravity oil and 441,000 cubic feet of gas per day through a 16/64 inch choke, tubing pressure 450 psi, with no water.

Production was through Ellenburger perforations from 7,165 feet to 7,180 feet acidized with 500 gallons.

The project was completed at a total depth of 7,192 feet with ground level elevation reported at 2,483.3 feet.

Other tops reported were the Coleman Junction 3,550 feet, Noodle Creek at 4,000 feet, Crystal Falls 4,400 feet, Breckenridge 4,675 feet and the Odom Lime at 6,650 feet.

Location is 660 feet from the south and 660 feet from the west of section 15, block 1-A, H&TC survey 26 miles south of Sweetwater.

The site is six miles south of the nearest Ellenburger production.

Kubiak pushes gasohol bill

AUSTIN, Texas (AP) — Rep. Dan Kubiak says his years of fervent fighting for gasohol will face a fierce test next week when his colleagues decide whether the fuel should be exempt from the gasoline tax.

Kubiak said Wednesday he would fight the watered-down version of his bill approved by the House Ways and Means Committee and then will push his original bill.

Speaker Bill Clayton, who looked in on Kubiak's news conference, predicted House approval of the Kubiak version.

The Central Texas legislator says the gasohol industry will never get going in Texas if the state does not nudge it along by exempting the fuel from the five-cent per gallon tax. Twenty-seven other states exempt gasohol from the tax.

Gasohol is a mix of 10 percent alcohol and 90 percent gasoline. Kubiak, D-Rockdale, wants gasohol to be tax exempt until it is competitive with gasoline.

"We will either allow Texas to get into production of gasohol on a major scale or we will not have it at all in this state," he said.

The Ways and Means Committee, chaired by Rep. Bob Davis, R-Irving, was hostile to the bill, he said.

The Texas Good Roads Association has opposed the bill because it fears the tax exemption would cut road funds.

Dist. 7-C reports wildcats, finals

Tom Green County drew two wildcat locations, confirmers were finalized in Schleicher and Upton counties along with a strike reported in Runnels County in District 7-C of the Texas Railroad Commission.

TOM GREEN COUNTY

Ike Lovelady Inc. of Midland will drill the No. 2 Weatherford as a 5,200-foot wildcat in Tom Green County, 1.2 miles east of Veribest.

The location is one location north of its No. 1 Weatherford, a Strawn oil discovery, finalized May 5, 1981. Drillsite is 660 feet from the north and east lines of section 2216 of the F.W. Schultz survey.

Daniel Oil Co. of Houston will drill the No. 5 E.H. Jones "A", a 5,500-foot wildcat, eight miles southwest of San Angelo in Tom Green County.

Location is 1,400 feet west of the southwest corner of the J. Jung No. 888 survey and 840 feet north to location in the M.J. Fernandez No. 100 survey.

SCHLEICHER COUNTY

The Eldorado, South (Canyon) field of Schleicher County gained its fourth Canyon producer, two miles southwest of Eldorado.

Designated the No. 1 Green, Jack Huff of Midland completed the well for a calculated absolute open flow of 120,000 cubic feet of gas daily, with a gas to liquid ratio of 120,000 to 1.

Production was gained through per-

forations made from 6,348-6,457 feet acidized with 3,500 gallons and 115,000 pounds of sand.

Location is 467 feet from the south and east lines of section 106, block A of the HE&WT survey.

UPTON COUNTY

The Willrode (Cisco and multipay Strawn) field of Upton County gained its current second Cisco producer with the McCann Corp. of Big Springs No. 1 McElroy, 13 miles northwest of Rankin.

Producing from perforations made from 9,007 to 9,181 feet acidized with 3,000 gallons, the well is flowing 298 barrels of 40 gravity oil, no water, with a gas to oil ratio of 980 to 1.

Wellsite is 467 feet from the south and 660 feet from the east lines of section 140, block E of the CCSD&RGNG survey.

RUNNELS COUNTY

Clear Fork Inc. of Abilene has completed an upper Gardner discovery its No. 1 Williams six miles south of Lawn in Runnels County.

Producing from perforations made from 4,097 to 4,105 feet acidized with 500 gallons and fractured with 10,500 gallons, the well is potentialized to pump 24 barrels of 40 gravity oil plus one barrel of water. The gas to oil ratio is 667 to 1.

The well was drilled to 4,895 feet with a 4 1/2 inch casing set at 4,889 feet and plugged back to 4,874 feet.

The location is 467 feet from the north line and 1,320 from the west line of the L.D. Counts No. 2 survey (Abstract 1369).

DRILLING REPORT

WILDCATS

BORDEN COUNTY
Gulf Oil Co. No. 1 Edna Miller, et al.; total depth 8,543 feet, plugged back depth 8,414 feet, tested, test recovered no oil, 9 barrels water w/some acid gas.

CHAVES COUNTY
Mesa Petroleum Corp. No. 1 Foreman-Federal; drilling 7,388 feet, perforated 3,788-431 feet.

Amoco No. 1 State G.A.; drilling 478 feet in red clay.

Gulf Oil Co. No. 1122 W. N. Waddell, Jr.; total depth 9,490 feet, plugged back 9,331 feet, tested. 2nd report.

Gulf Oil Co. No. 1125 W. N. Waddell; total depth 9,300 feet, plugged back 9,250 feet, tested. Released packer, started pulling out of hole w/tubing.

ECTOR COUNTY
Cities Service No. 8 Johnson "A"; total depth 9,589 feet, ran 5 1/2" casing to 9,307 feet.

EDDY COUNTY
Perry R. Bass No. 86 Big Eddy Unit; drilling 11,175 feet in Atoka.

HCW Exploration, Inc. No. 1 Dor-state; drilling 5,385 feet.

Amoco Oil Co. No. 1 Federal Comm. "AD"; total depth 12,008 feet, moving out rotary.

Cities Service No. 1 State DR; drilling 964 feet in Anhydrite, ran 8 5/8" casing to 349 feet.

Cities Service No. 1 Federal N; total depth 11,750 feet, plugged back 11,705 feet, ran 5 1/2" casing to 11,750 feet morrow, perf. 11,680-11,630 feet.

GAINES COUNTY
J. C. Williamson No. 2 Dempsey Creek; pumped 12 barrels oil, 85 barrels water. Completed.

HARDING COUNTY
Cities Service No. 1 State D-1; total depth 2,343 feet, plugged back total depth 2,300 feet, ran 5 1/2" casing 2,342 feet.

Cities Service No. 1 State D-S; drilling 1,879 feet shale, anhydrite, ran 5 7/8" casing at 985 feet.

Cities Service Oil Co. No. 1 State D-1; total depth 801 feet, running casing.

Cities Service No. 1 State D-H; total depth 2,832 feet, plugged back depth 2,805 feet, ran 5 1/2" casing at 2,831 feet, tub perforation 2,764-2,772 feet. Waiting on completion unit.

LEA COUNTY
Zinke & Philby, Inc. No. 1 Spight, et al.; total depth 4,500 feet. Waiting on

pumping unit.
Marathon Oil Co. No. 4 William Turner; drilling 5,884 feet in lime, shale.

Amoco Oil Co. No. 1 State Comm. "IG"; total depth 15,520 feet, running tubing.

INGO Oil Co. No. 1-6 Vaca-Draw State; drilling 14,400 feet in shale, lime.

Union Oil Co. of Calif. No. 1 Ravenna Unit-State; drilling 7,388 feet.

Hunt Oil Co. No. 1-4 State; drilling 13,239 feet.

Amoco No. 1 Perro Grande Unit; drilling 2,245 feet in anhydrite, salt.

Gulf Oil Co. No. 1122 W. N. Waddell, Jr.; drilling 13,234 feet.

Gulf Oil Co. No. 1-33 Federal; total depth 18,380 feet. Shut in.

Gulf Oil Co. No. 1-38 Getty State; total depth 18,225 feet. Shut in.

Gulf Oil Co. No. 1-5 Getty Federal; total depth 384 feet. Riggging up rotary tools.

Gulf Oil Co. No. 1 North Bihlery in Federal; total depth 4,588 feet, ran 9 5/8" casing set at 4,538 feet, cemented w/2,022 sacks, plugged down, circulating cement. Waiting on cement.

LOVING COUNTY
Gulf Oil Co. No. 1 Ludeman "7-26"; drilling 5,385 feet.

Gulf Oil Co. No. 1-25-76 Top Lineberry; total depth 22,048 feet, jetting, testing.

Gulf Oil Co. No. 2 Tom Lineberry Strip; drilling 7,985 feet.

Gulf Oil Co. No. 1 Ave Parwell Trust; total depth 10,640 feet, waiting on completion unit.

STERLING COUNTY
Gulf Oil Co. No. 1 Black Terry; drilling 4,385 feet in dolomite, lime.

Who pays... when Congress says 'fill 'er up'?

By WILLIAM KRONHOLM
Associated Press Writer

WASHINGTON (AP) — Facing a \$3.9 billion tab it would rather not pay — at least directly — Congress is searching desperately for a way to fill the nation's Strategic Petroleum Reserve without taking the money from the federal budget.

The petroleum reserve is the nation's insurance against another oil embargo. It now holds 135 million barrels of oil, equivalent to some 20 days worth of imports, and the government wants to build it to 750 million barrels by 1989.

But the money needed to buy the oil — \$3.9 billion next year under President Reagan's proposed budget — is caught in the tangle of budget politics.

Under pressure to cut federal spending and move toward a balanced budget, both the House and Senate have voted to reduce appro-

priations for the reserve by \$3 billion next year on the assumption that some private financing scheme could be used to buy the oil instead.

Supporters of the spending cuts insist they want the reserve filled and are confident alternative ways can be found to do the job. The sticking point has been finding that alternative plan.

Plans have been proposed, and hearings have been held in both the House and Senate. But the schemes have been attacked by the oil industry, public and private economists and investment firms. Some ideas simply won't work, the critics say. Others just hide the cost of the oil.

House Energy Committee chairman Rep. John Dingell calls it a "budgetary shell game," and Senate Energy Committee chairman Sen. James A. McClure concedes that to some degree, "we're doing this with mirrors."

In effect, several of the schemes call for government purchases on separate ledger books, so the expenditures do not count on the federal deficit. But money for the oil purchases still would come from govern-

ment borrowing — or from new taxes.

The simplest solution, proposed by Sen. Bennett Johnston, D-La., would enact a new law declaring that money for the reserve "shall not be included in the totals of the (U.S.) budget" — meaning it would not count against budget ceilings.

Budget Director David Stockman told a Senate Energy subcommittee last week that the idea may be the preferable solution to the dilemma, although McClure calls the idea "a transparent mirror" in the game of mirrors.

A majority of witnesses — including Stockman and Treasury Secretary Donald Regan — have told Congress a straightforward appropriation would be the best way to fund the reserve.

But with the budget fight between Democrats and Republicans continuing — and with neither side willing to up their declared spending levels by (See FILLING, Page 2A)

Mitterrand's election ends two decades of conservative rule

By HARRY DUNPHY
Associated Press Writer

PARIS (AP) — Socialist Francois Mitterrand, who pledged economic change and pulled support from Communists and moderates, defeated Valéry Giscard d'Estaing's bid for a second term as president of France and ended an era of center-right government.

The French stock market plummeted in a tidal wave of selling today — a reaction to Mitterrand's vow of widespread industrial nationalization and the possibility he will give France's pro-Soviet Communists a Cabinet role. A harried broker said it was the worst selling wave he could remember.

The franc dropped to 5.45 to the dollar, approaching the lowest level since 1971 when the dollar was worth 5.32 francs. Gold soared. The Bank of France urged calm on the foreign exchange market.

Early today, with almost 98 percent of the votes counted, Mitterrand had 15,639,673 or 52.06 percent and Giscard d'Estaing had 14,396,439 or 47.93 percent.

In a victory statement Sunday night at Chateau Chillon, the 64-year-old Mitterrand said Frenchmen had endorsed his proposals for public jobs programs, nationalization of several large industries and higher corporate taxes. He proclaimed he had "no other ambition than to justify the confidence" of the French people during his seven-year term.

Stock selling orders on the floor of the Bourse, which opened 30 minutes late because of the flurry of unloading, were concentrated from nine major corporations in the front-line of Mitterrand's nationalization plans. Z half-hour later, traders could quote prices for only five of the 200-plus

French issues listed on the forward market.

The outgoing premier, Raymond Barre, said today he fears Mitterrand's election will lead quickly to "the deterioration of the domestic and international situation of our country."

Barre blamed the defeat on neo-Gaullists led by Paris Mayor Jacques Chirac — a former premier under Giscard d'Estaing whose support for his former chief in Sunday's election was lukewarm. Barre accused them

Related stories and photos
on Page 12A

of playing "double or quits with the fate of the Fifth Republic."

Chirac, expected to emerge as the new opposition leader, today appealed to the center-right to unite behind one candidate in each legislative district to offer the strongest possible opposition in Parliament elections expected to be called by the new president for next month.

Barre said he would work to ensure a smooth transition.

Mitterrand's victory — in his third run for the Elysee Palace — ends two decades of conservative government that began under Charles de Gaulle and brings the first transfer of power from right to left under the Fifth Republic, which de Gaulle founded in 1958.

It also set the stage for new elections, expected in late June, for the 491-seat National Assembly, where the center right has a majority. If Mitterrand does not win enough votes to support his program in the assembly, an institutional crisis could develop.

Mitterrand, who has promised profound economic change at home but

continuity in foreign policy, takes office at the end of May, but the exact date is still unclear.

A crowd estimated at more than 50,000 Socialists and Communists gathered at the Place de la Bastille, the traditional leftist rallying point in Paris, to cheer Mitterrand's victory. Cars honked their horns in the capital's streets into the early morning hours and there were smaller celebrations in other cities.

Giscard d'Estaing, 55, conceded defeat minutes after the last polls closed at 8 p.m. The president's brief statement stopped short of congratulating his opponent and said Giscard d'Estaing would speak out in the future in France's interest.

Before the legislative elections, Mitterrand will form an interim Socialist government that will rule by decree. Socialist leaders said Sunday night this government would move immediately to reduce unemployment — the main campaign issue — and raise the minimum wage.

The party leaders also said they would talk with all segments of society in this nation of 53 million to try to win support for Socialist programs.

During the campaign Mitterrand hit hard at unemployment, which has multiplied four times since Giscard d'Estaing took office, and at inflation, which is raising prices by 14.6 percent a year.

He also took advantage of a feeling in the electorate that another seven years in power for Giscard d'Estaing would be too much.

Mitterrand avoided committing himself on a key question — whether he would appoint ministers from the Moscow-oriented French Communist party.

Congratulating their candidate

Newly elected French President Francois Mitterrand is congratulated by supporters following his

victory on Sunday. Defeated in a bid for a second term was Valéry Giscard d'Estaing.

In Ireland, it's business (and terrorism) as usual

By VICTOR SIMPSON
Associated Press Writer

BELFAST, Northern Ireland (AP) — During the last explosion of sectarian violence in Belfast, Sarah Laverty, 24, would sit on the floor watching television fearing a bullet might come through the window. Now she simply tries to ignore the trouble.

"You would go totally insane if you didn't," Miss Laverty, a student counselor at Queen's University, explained.

Despite the violence and tension after the death of Irish Republican Army hunger striker Bobby Sands, most Belfast residents are going about their business as usual.

They have grown accustomed to the security measures introduced during the unrest of the 1970s — checkpoints for body searches on downtown shopping

streets, speed bumps on many streets to force cars to slow down, or the narrow slits on mail boxes to insure no bombs are dropped inside.

The city bus company buys second-hand buses, because so many vehicles have been hijacked and set ablaze. Stores are crowded, their customers often checked with metal detectors and watched by closed circuit television.

Despite the rioting over Sands' death, Belfast's fifth annual civic festival went off as scheduled last week, including a heavily attended parade of 18 pipe and drum corps and more than 40 floats.

Lord Mayor John Carson, receiving reporters at his office, said some news reports had made it appear the entire city was in flames. He said the outbreak of rioting and shooting had been confined to a few areas — police estimated a total of three square miles in a city of about 100 square miles.

"The vast majority of people want a normal life," he said, adding that Belfast is not the only city to suffer violence.

"In certain cities of America, you have had to call in the National Guard to keep whites and blacks apart," the mayor said.

Outside the riot areas lie neat houses, garden apartments and large estates. A mile away from the low income Twinbrook Roman Catholic housing project where Bobby Sands' family lives, a golf course is under construction.

On Falls Road, near the "peace line" separating the Protestant and Catholic communities, young girls in their violet school uniforms walk home after school, stepping around the glass, bricks and charred wood piled on the sidewalks after rioting the previous night.

At the Holy Trinity youth club in Turf Lodge, Roman Catholic youngsters play darts, pool and listen to disco music on a record player in the run-down clubhouse.

"We try to keep them away from the army, off the streets," said Brian Devane, one of the organizers.

Tax cut compromise possible

WASHINGTON (AP) — With Senate Republicans poised to do their part for President Reagan's budget, House Democrats and administration officials are showing the first signs of moving toward a possible compromise on tax cuts.

In a weekend of conciliatory comments, the chairman of the tax-writing House Ways and Means Committee offered to meet with Reagan; a top administration official said the president might be willing to consider a smaller tax cut; and the White House's chief lobbyist on Capitol Hill advised Democrats to "get the best deal" they can now.

At the same time, the leader of conservative Democrats who broke party ranks to support Reagan's budget-cutting plan in the House last Thursday said the group will meet this week to search for a "consensus...a bipartisan tax plan."

The Senate, meanwhile, was resuming consideration of the budget

today, and Majority Leader Howard H. Baker Jr., R-Tenn., said he hopes to complete work on it Tuesday. It is unlikely the Republican majority will have any trouble delivering the plan intact.

House and Senate negotiators will have to work out differences between the two budget blueprints.

The big difference is a Senate-endorsed plan for a \$7.9 billion reduction in annual cost-of-living increases for those covered by Social Security and Supplemental Security Income programs as well as railroad, federal and military retirees — about 44.1 million people in all.

That's not in the House measure, and the administration has not endorsed it, either.

A letter from Treasury Secretary Donald T. Regan and budget director David A. Stockman to Senate Democratic leader Robert C. Byrd reaffirmed the president's opposition to changing the nearly adjustment in

Social Security. Health and Human Services Secretary Richard S. Schweiker will come up with "a package of reforms designed to maintain the solvency" of the Social Security Trust Fund, they said.

The Senate budget measure calls for spending \$699.1 billion for the next fiscal year, starting Oct. 1, and a \$48.8 billion deficit. The House plan calls for spending \$688.8 billion, with a \$31 billion deficit.

Both the House and the Senate versions would accommodate the deep cuts in federal spending and taxes that Reagan wants, ordering individual committees to chop more than \$36 billion next year from the basic authorizing legislation underlying federal programs.

Reagan's tax plan, calling for a 30 percent reduction in personal income taxes over three years, is the least popular part of the program.

House Ways and Means Chairman Dan Rostenkowski, D-Ill., said Sunday he still believes his fellow Democrats on the panel will reject the Reagan proposal. Rostenkowski, interviewed on the CBS program "Face the Nation," said he favors a more flexible plan, and he added:

"I'd like to discuss my theory with the ranking (Republican) member of my committee, Barber Conable, (and) with the president if necessary.... I'm trying to work with the president within the parameters he has outlined.... I certainly don't think my door is closed."

That came a day after The Washington Post quoted Max L. Friedersdorf, Reagan's congressional liaison, as saying: "If I were Danny Rostenkowski, I would be coming in to talk with the president about his program and get the best deal I can before the tidal wave rolls over him."

One of the roads bordering the sinkhole in Winter Park, Fla. was almost undermined as it grew about 50 feet.

Sinkhole's appetite expensive

WINTER PARK, Fla. (AP) — Authorities fenced off a 4,000-foot area as a giant sinkhole — already several hundred feet wide after swallowing a house, half a swimming pool and six Porsches — threatened to devour some businesses perched on its edge.

Winter Park fire Capt. Gu LaGarde said authorities could only watch as the sinkhole continued to grow early today. "We have to let Mother Nature take its course."

"It has expanded two or three feet in a couple of places, but there have been no serious cave-ins," LaGarde said as authorities stood vigil overnight beside the enormous limestone hole.

Officials were afraid some businesses on the edge of the sinkhole would fall in next.

"There's a couple good-sized baseball fields nearby. We wish it would go in that direction if it's going anyplace," LaGarde said late Sunday.

A crowd of about 500 onlookers gathered at the hole, estimated at between 450 and 600 feet wide and 125 to 170 feet deep, grew 18 to 20 feet Sunday, said police communications officer Barbara Nuss.

Some enterprising spectators set up a lemonade stand. Others sold T-shirts with the message "Winter Park Sinkhole."

Winter Park Police Chief Ray Beary said five men were arrested on drunk and disorderly charges when they refused to leave the site.

The sinkhole appeared Friday night, gulping down a sycamore tree in its first bite. It opened rapidly Saturday when it ate a bungalow, cars, part of a foreign car lot and wrecked the city's \$150,000 municipal swimming pool. Damages exceeded \$500,000.

Three Porsche owners rented a Sikorsky S-58 helicopter in hopes of hoisting their cars from the hole but aborted the mission as too risky after a surveillance flight.

"Twenty thousand, forty thousand, whatever the car is worth is not worth getting someone maimed," said Bob Govern, whose Porsche 928 was in for repairs when the sinkhole swallowed it.

Sunday night, the ground began falling away from below a group of commercial buildings that lost their backs in Saturday's slide and were hanging at the edge of the pit.

"We're still losing some of the perimeter," LaGarde said. "It doesn't appear to get any deeper... it continues to eat up the roadway, power poles, anything that gets in the way."

Five police officers and a dozen firefighters were on the scene in the city of 22,000 just north of Orlando.

A state geologist told Winter Park officials that after the bottom stops falling, the sinkhole probably would grow another 25 or 30 feet, until the slope is gradual enough that the sides aren't in constant danger of collapsing, LaGarde said.

Engineers estimated it would take 10,000 truckloads of dirt to fill the hole. City officials said they probably would request federal disaster aid.

Sinkholes often develop in Central and North Florida when underground water tables are lowered and the ground above becomes too weak to support itself. They are most likely to occur during dry weather — such as the severe dry season Florida now is experiencing — when limestone bedrock creates cavities beneath the ground.

Ms. Nuss said Saturday an underground stream may have been a factor in the sinkhole's development.

Inmates bask in freedom after acquittals

CHICAGO (AP) — Three of 10 former Pontiac Correctional Center inmates found innocent of charges stemming from a bloody riot are free today while prosecutors reassess the case against six others accused in connection with the uprising.

The three defendants were freed because they have served out previous prison terms.

The July 22, 1978, riot at the maximum-security state prison, 90 miles southwest of Chicago, claimed the lives of three prison guards and caused more than \$3 million in property damage.

Two guards were seriously injured.

A Cook County Circuit Court jury deliberated less than five hours before returning the verdict Saturday night, claiming one of the longest and costliest trials in Illinois history.

Nine of the defendants were charged with murder, attempted murder

and mob action. The 10th, Albert Jackson, was charged with attempted murder.

Now prosecutors must decide whether they will attempt to bring to trial the other defendants indicted on similar charges.

C. David Vogel, state's attorney in Livingston County, where the prison is located, said Sunday he and the three special prosecutors who handled the case "have to evaluate the evidence we have produced against the remaining defendants and make a decision whether there will or not be further prosecution."

FTC backing away from regulating entire industries

WASHINGTON (AP) — The Federal Trade Commission, faced with budget cuts and a more conservative view in the White House, is backing away from exercising its authority to regulate entire industries.

In the last several months the FTC relaxed a proposed regulation aimed at used car dealers, withdrew subpoenas in a massive investigation of the auto industry and decided against a regulation of advertising for non-prescription drugs.

This is the same agency that raised the hopes of consumer activists and the hackles of business groups in the late 1970s by taking an aggressive pro-consumer stance.

Today, their positions are reversed. "Almost every week or two, they (the FTC commissioners) are backing away from something else," said consumer advocate Ralph Nader. "As the FTC gets weaker, consumers will pay more in the marketplace."

Jeffrey Joseph, director of regulatory affairs for the U.S. Chamber of Commerce, said the retrenchment at the FTC shows "the system is working. The FTC as a body is adapting to the world of today. They are newly cognizant of what will fly."

The chamber had strongly opposed the FTC when the chairman was Michael Pertschuk, an appointee of former President Carter. Pertschuk remains a commissioner, but his role is so subdued he declined to discuss the agency's current course.

When Pertschuk was chairman the agency shed its image as "the old gray lady of Pennsylvania Avenue" that avoided major cases against big business. Many of the cases and regulations on various industries actually were proposed earlier under Republican chairmen, but staff investigations took so long that they began coming to the FTC after Pertschuk's appointment.

DR. NEIL SOLOMON

Long-term antacid use should be checked

Dear Dr. Solomon: Is there any reason to shy away from antacids? I don't like to bother my doctor every time I have a little twinge, and I've gotten into the habit of taking an antacid when my stomach is upset. Do you see anything wrong with this? — Ron

Dear Ron: If, as you say, you've gotten into the habit of taking antacids, I have to assume that this has been going on for some time. If this is the case, I suggest you see your doctor. If your "upset stomach" has become a chronic complaint, it's about time you had a physical examination so that the exact problem can be determined.

While in most cases the occasional use of an antacid is harmless, large quantities can lead to a variety of

problems, depending on the particular type of antacid, including chronic constipation, or diarrhea, and kidney stones. Remember that any drug taken in large doses or used for a long period of time has a potential for harm. In addition, long-term use may mask a problem that should be receiving a physician's attention.

Dear Dr. Solomon: Recently I met a mother and daughter who literally looked like sisters; it did not seem possible that there was more than 10 years' difference in their ages, although there really was a difference of more than 20 years. The mother also seemed to be as physically vigorous as her daughter; for example, they spoke of having gone skiing during the winter. They got me to thinking about which is more important

from a health standpoint — how old a person looks, or how old a person actually is? Has anyone ever tried to study this? — Phil

Dear Phil: At one time or another many of us have had the experience of being surprised by learning that a person was much younger or much older than we believed him or her to be. Now the National Institute on Aging (NIA) says that this difference is of more than cosmetic interest.

According to NIA, an analysis of information gathered on more than a thousand volunteers indicates that people who look older than their chronological age may indeed be more like older persons biologically. For example, the findings showed that most of the volunteers who died since the start of the study had ap-

peared to the doctors to be older than other subjects who were the same chronological age.

Some of the results of the NIA project could have been anticipated. For instance, it makes sense that a person who is markedly overweight and in poor health is going to look older than someone the same age who is trim and in good health and, obviously, the person in good health should live longer.

However, NIA noted that lifestyle factors also played a part in a person's appearance. For example, marriage and participation in sports were associated with a more youthful appearance. In addition, a genetic component seemed to be involved; if a father seemed to be older than his actual age, his son also appeared to be older.

Loving, Andrews counties file field test, completion

A field test in Loving County and a completion in Andrews County have been filed in District 8 of the Texas Railroad Commission, headquartered in Midland.

The Sun Oil Co. of Oklahoma City will drill the No. 1 James J. Wheat in the Moore Hooper (Ellenburger) field to a total depth of 21,921 feet.

Located 1,320 feet from the southeast and 1,670 feet from the southwest of section 88, block 1 W&NW RR survey, the site is 3 1/2 miles north-east of Mentone in Loving County.

Adjacent to the No. 1 Wheat, Fusselman gas production at a 505al depth of 22,025 feet, the site is 4,500 feet north-west of the No. 1 D W. Johnson, Jr. et al a wildcat gas discovery and 3,000 feet north of the No. 1 C.W.D. Johnson, Fusselman gas discovery drilled to a total depth of 19,200 feet.

ANDREWS GETS COMPLETION
Maralo Inc. of Midland has completed a Deep Rock (Devonian) field test, the No. 4-2 W.H. Sloan.

Total depth of the test was 10,121 feet with plugged back depth at 9,180 feet and ground level elevation of 3,173.6 feet.

Activities filed in Dist. 7-C

Gage & Co. of Fort Worth has announced plans to drill two wildcat projects as confirmers to the opener and lone producer in the Silver (Odom) field of Coke County.

The 7,500-foot test are located 1 1/2 miles northeast of Silver.

The No. 1 J.S. Walker "B" is 1,979 feet from the south and 1,945 feet east of section 255, block 1A, H&TC survey and No. 1 J.S. Walker "A" is 659 feet from the north line and 2,090 feet from the west line.

RUNNELS COUNTY

The No. 1 Puckett will be sited by Muleshoe Exploration of Abilene as a 5,600-foot wildcat test.

The site is 1 1/4 mile east of the depleted one-well Gay Hill (Capps) field and 1 3/8 mile east of the depleted Seitz (Fry sand) field and 3 1/2 miles northwest of Wingate.

Casing of 5 1/2 inches was set at 10,121 feet with production through perforations of 10,111 feet to 10,165 feet.

The well pumped 15 barrels of oil per day, 1,000 cubic feet of gas and 15

barrels of water with gas to oil ratio of 67.

The well is 1,000 southwest of the No. 1 Lowe, a Devonian discovery and 2 miles north of Devonian production in the same field.

Scurry wildcat planned

U.F.O. Co. of Abilene has announced plans to drill the No. 1 G. W. Brock as a 3,500-foot wildcat in Scurry County.

Located 1,971 feet from the south line an 467 feet from the east line of section 399, block 97, H&CC survey the site is 1 mile west of Dormot.

Ground level elevation is reported to be 2,577 feet.

The operation is 3,500 feet south of the No. 1 Andrew Scrivner which was plugged dry and abandoned July 14, 1956 at a total depth of 3,004 feet, east of production in the Drillexxco field and west of the BS&N field.

DRILLING REPORT

WILDCATS

BORDEN COUNTY
JEM Pet. Corp. of Midland No. 1 Good, drilling at 4,200 feet in line and dolomite.

Gulf Oil Corp. No. 1 Edna Miller et al, total depth 5,543 feet, plugged back depth 8,414 feet, swabbing and testing, recovered 170 barrels of water and released crew 5-5-61.

CRANE COUNTY
Gulf No. 1125 W.N. Waddell, total depth 9,300 feet, plugged back 9,330 feet testing.

Gulf No. 1122 W.N. Waddell, Jr., total depth 9,400 feet, plugged back depth 9,351 feet, testing, released crew.

DAWSON COUNTY
Kelroy Co. of Tex. Inc. No. 1 W.B. Dubose, total depth 11,500 feet, circulated, ran in hole for drill stem test No. 1.

ECTOR COUNTY
A.G. Kaspar No. 1 Lunch, total depth 5,999 feet, cement 5,106 feet.

EDDY COUNTY
Exxon No. 1 New Mexico "DA" No. 1, drilling 722 feet, spudded 4-30-61.
Exxon No. 1 Lukens-Federal, total depth 10,000 feet, plugged and abandoned.

GARZA COUNTY
Tipperary Oil & Gas Corp. No. 1 Guilliams, waiting on casing pulling unit.

KING COUNTY
Energy Reserves No. 1 R.B. Masterson, total depth 5,903 feet, plugged back 5,922 feet, waiting on completion unit.

LEA COUNTY
Getty No. 1 "C" Comm Well No. 1, drilling 13,417 feet.

Getty No. 1-28 Getty State, total depth 13,285 feet, shut in.

Getty No. 1 North Billbrey 18 Federal, set slip, install head, testing blow out preventer.

Getty No. 1-15 Getty Federal, move in and rig up rotary.

LOVING COUNTY
Getty No. 1 Ludeman "7-26", drilling 5,772 feet.

Getty No. 2 Tom Lineberry Strip, drilling 7,285 feet.

Getty No. 1-25-76 Tom Lineberry, jetting and testing.

PRFOS COUNTY

Getty No. 2 Mendel Estate, drilling 2,220 feet.

Getty No. 1 P.T. Hudgins, drilled to 1,700 feet, circulating and conditioning, trip out of hole, ran logs.

PRESIDIO COUNTY
Union Oil of California No. 1 Lykes State, condition hole, drilling at 3,332 feet.

ROOSEVELT COUNTY
Energy Reserves No. 1 Radcliff, drilling 7,798 feet, dolomite and shale.

STERLING COUNTY
Gulf No. 1 Black Terry, drilling 4,083 feet in Dolomite and line, circulate samples at 4,531 feet, 4,618 feet and 4,631 feet.

TERRY COUNTY
Wildcat and Leeper, Exxon No. 1 Harold Coons, total depth 8,400 feet, plugged back depth 5,900 feet, testing on pump, pumped 11 barrels of oil and 3 barrels of load water in 24 hours.

Union Texas Petr. Corp. No. 1 Crown, swabbing 1066 fluid, last swab run 96% oil, fluid level 11,000.

WARD COUNTY
Union Texas Petr. Corp. No. 1 Dunagan, drilling 17,245 feet, evaluating test.

Union No. 1 China Lake, total depth 17,283 feet, potential calculated absolute open flow 159,000 cubic feet of gas per day.

Threshold-Blocker Venture No. 1 Thelma Nelson, waiting on electricity, total depth 5,458.

FIELD TESTS

ANDREWS COUNTY
Means, Exxon Oil Co. No. 1968 Means S.A.U., total depth 4,571 feet, completed 4-24-61. Pumped 31 barrels oil, 48 barrels water in 24 hours.

Means, Exxon Oil Co. No. 2062 Means S.A.U., drilling 685 feet. Spudded 4-28-61.

Means, Exxon Oil Co. No. 9272 Means S.A.U., total depth 4,667 feet, cored, set 5 1/2" casing at 4,646 feet w/80 sacks.

Means, Exxon Oil Co. No. 9273 Means S.A.U., drilling 330 feet. Spudded 4-29-61.

Means, Exxon Oil Co. No. 972 Means S.A.U., total depth 1,518 feet, preparing to swab. Perforated 31-4, 309-4, 177 feet, Ac 2,000 gallons.

Means, Exxon Oil Co. No. 1382 Means S.A.U., total depth 1,520 feet, moving O. rotary, set 5 1/2" casing at 4,518 feet w/850 sacks.

Means, Exxon Oil Co. No. 1576 Means S.A.U., total depth 4,500 feet, testing on pump, pumped 91 barrels oil, 82 barrels water.

Means, Exxon Oil Co. No. 858 Means San Andres Unit, total depth 4,533 feet, moving off rotary.

Means, Exxon Oil Co. No. 958 Means San Andres Unit, total depth 4,565 feet, preparing to acidize. Perforated 28-4, 435-4, 538 feet.

Fullerton, 3017 Fullerton C.F.U., total depth 7,405 feet. S.I.

Fullerton, Exxon Oil Co. No. 2317 Fullerton C.F.U., total depth 7,400 feet. S.I. Perforated 100-6, 108-7, 200 feet. Ac 20,895 gallons.

Fullerton, Exxon Oil Co. No. 1825 Fullerton C.F.U., total depth 7,402 feet. Testing on pump. Pumped 12 barrels oil, 25 barrels water in 24 hours.

Fullerton, Exxon Oil Co. No. 1819 Fullerton C.F.U., total depth 7,401 feet. S.I.

Fullerton, Exxon Oil Co. No. 1535 Fullerton C.F.U., total depth 7,400 feet, preparing to move in swabbing unit.

Fullerton, Exxon Oil Co. No. 1235 Fullerton C.F.U., total depth 7,406 feet, plugged back 7,280 feet, S.I.

Fullerton, Exxon Oil Co. No. 1017 Fullerton C.F.U., total depth 7,410 feet, plugged back 7,270 feet, preparing to install pumping unit. Acidized w/29,500 gallons, perforated 6,100-7, 054.

Fullerton, Exxon Oil Co. No. 437 Fullerton C.F.U., total depth 7,405 feet. Completed 4-25-61, pumped 218 barrels oil, 12 barrels water.

Fullerton, Exxon Oil Co. No. 427 Fullerton C.F., total depth 7,403 feet, plugged back 7,200 feet, running production tubing, perforation 5,988-6, 967 feet.

COKE COUNTY
Jamison, Exxon Oil Co. No. 10 Lou E. Johnson, total depth 7,000 feet, testing on pump. Pumped 43 barrels oil, 38 barrels water.

L.A.B. (Penn.) Exxon Oil Co. No. 520 L.A.B. Unit, total depth 7,550 feet. Moving in completion unit.

CRANE COUNTY
Cordona Lake, Exxon Oil Co. No. 62 Cordona Lake Unit, total depth 3,700 feet, testing. Flowed 39 barrels oil, 0 barrels water.

A "tongue" of snow and ice appears to be sticking out from a length of drill pipe used by Conoco Inc. to drill a test well for a group of companies on Alaska's North Slope. The group reports the probable discovery of a commercial oil

field at the site called Milne Point. Exploratory drilling in the remote Arctic regions must be done during the winter when sub-zero temperatures freeze the ground solid and the snow cover protects the fragile tundra.

Activities filed for N.M. Wildcat

A discovery, one confirmers and one extenders have been finaled in Chaves County, N.M. and a producer in Eddy.

Coronado Exploration Corp. of Lubbock has announced completion of a San Andres oil discovery in Chaves County nine miles southwest of Elkins.

Designated the No. 1 Duncan Federal (amended from the No. 1 Duncan), the well has been potentialized to pump two barrels of oil plus 12 barrels of water from perforations made from 2,274 to 2,282 feet, acidized with 4,000 gallons.

The well has a total depth of 2,300 feet with a 4 1/2 inch casing set at 2,299. The plug back depth is 2,294 feet.

Well site is 1,980 feet from the north line and 660 feet from the west line of section 31, township 8 south, range 28 east.

Mesa Petroleum Co. of Midland has completed the No. 1 Salt Federal, 35 miles southwest of Elkins as its fifth producer in an undesignated Abo gas field in Chaves County.

Producing from perforations made from 2,918 to 3,052 feet, the well has been potentialized for a calculated absolute open flow of 1,120,000 cubic feet of gas per day.

The site, a 3/4-mile east-northeast extension, is located 660 feet from the south and 1,980 feet from the west lines of section 8, township 8 south, range 23 east.

Yates Petroleum Corp. of Artesia has announced the completion of a two mile extension south of an undesignated Abo gas discovery and 27

miles west of Boaz in Chaves County.

Producing from perforations made from 3,678 to 3,806 feet, acidized with 1,500 gallons and fractured with 20,000 gallons and 50,000 pounds of sand, the well flowed 450,000 cubic feet of gas through a 1/2-inch choke.

Scheduled as a wildcat, it was drilled to 4,450 feet with a 5 1/2 inch casing set at 4,400 feet and plugged back to 4,392 feet.

Location is 660 feet from the south and east lines of section 9, township 8 south, range 25 east.

Nolan, Fisher projects filed

Two 7,500-foot wildcat projects will be drilled by Wes-Tex Drilling Co. of Abilene in Nolan County as outposts to the multipay Canyon field.

The sites are 10 miles west of Maryneal and located in section 49, Block 1A, H&TC survey.

The No. 6 Compton is 3/8-mile northeast of Canyon oil production and is 504 feet from the north and 2,380 feet from the east lines.

The No. 7 Compton is one location east of Canyon oil and is located 1,705 feet from the north line and 2,582 feet from the east line.

A stepout and two outposts to the JMM field will also be drilled by the same company.

The projects are located in section 52, block 1A, H&TC survey and will be drilled to a total depth of 6,500 feet.

The No. 1 Compton "A", 2,310 feet north and 467 feet from the south and west lines.

Aminoil brings in discovery well

HOUSTON — The discovery of an estimated 3.3 million cubic feet of gas per day and 168 barrels of condensate per day was made during the drilling of an Oklahoma well in which Aminoil USA, Inc., holds interest.

Located in Dewey County, western Oklahoma, the Johnson Farms No. 1 well, which was measured through a 1 1/4 inch choke is in a state where Aminoil conducts an aggressive exploration program.

The well was tested in the Morrow formation with perforations from 10,128 feet to 10,144 feet and from 10,188 feet to 10,194 feet. The company is waiting on a pipeline connection.

The discovery well is located on the Covey Prospect. Aminoil's operations in Oklahoma also include three natural gas processing plants — in Aline, Fox and Lucien, which remove petroleum liquids and impurities from produced natural gas and compress the remaining dry gas for transmission through natural gas pipelines.

A subsidiary of R.J. Reynolds Industries Inc., Aminoil is the nation's third largest independent oil company. In addition to domestic exploration and production, and natural gas processing, Aminoil markets crude oil, natural gas and petroleum products and develops and supplies geothermal steam.

Exploration & Production Opportunities

The Coastal Corporation is a broadly based, 5.1 billion dollar energy supply company operating worldwide. A position with our organization is always a challenge due to the extensive amount of responsibility that goes along with it. This philosophy combined with our outstanding growth record and the desirability of our locations should make the following opportunities extremely attractive to you.

GEOLOGISTS: Requires BS in Geology or Geophysics with 3-5 years oil & gas experience. Responsibilities will include recommendations for drilling of exploratory or developmental wells and preparation of geological studies.

GEOPHYSICISTS: Requires BS in Geophysics or Geology with 3-5 years oil & gas experience in interpretation of seismic data and preparation of subsurface maps.

DRILLING ENGINEERS/DRILLING FOREMEN: Requires BS in Petroleum Engineering or equivalent experience with 3-5 years drilling or production experience.

E & P ACCOUNTANTS: Requires BS in Accounting with a minimum of 2 years exploration and production accounting experience. Exposure to joint interest, joint venture, revenue, profit and analysis and cost allocation accounting procedures are required.

The Coastal Corporation provides highly competitive salaries, benefits and a generous relocation package. Please forward your resume including current salary history to: Dept. MR-511, The Coastal Corporation, Nine Greenway Plaza, Houston, Texas 77046. An equal opportunity employer, m/f.

The Newspaper BIBLE

YOU KILLED HIM: BUT NOW HE'S ALIVE!

Peter stepped forward with the eleven apostles, and shouted to the crowd, "Listen, all of you, visitors and residents of Jerusalem alike! Some of you are saying these men are drunk! It isn't true! It's much too early for that! People don't get drunk by 9 a.m.!"

"No! What you see this morning was predicted centuries ago by the prophet Joel: 'In the last days,' God said, 'I will pour out My Holy Spirit upon all mankind, and your sons and daughters shall prophesy, and your young men shall see visions, and your old men dream dreams. Yes, the Holy Spirit shall come upon all My servants, men and women alike, and they shall prophesy. And I will cause strange demonstrations in the heavens and on the earth—blood and fire and clouds of smoke; the sun shall turn black and the moon blood-red before that awesome Day of the Lord arrives. But anyone who asks for mercy from the Lord shall have it and shall be saved.'"

"O men of Israel, listen! God publicly endorsed Jesus of Nazareth by doing tremendous miracles through Him, as you well know. But God, following His prearranged plan, let you use the Roman government to nail Him to the cross and murder Him. Then God released Him from the horrors of death and brought Him back to life again, for death could not keep this man within its grip."

BUSINESS MIRROR

Social Security: That's still nation's question

By CHET CURRIER
AP Business Writer

NEW YORK (AP) — What are we going to do about Social Security?

That exasperating question has been asked over and over again in the past few years, but no final answer has yet appeared.

In the vast family of government programs, Social Security is one of the severest problem children. Born, like many others, in President Roosevelt's New Deal, it has since grown and grown.

But along the way, it has developed a voracious appetite for money from the wage-earning segment of the public. And even though the feedings have been increased repeatedly, the experts report that Social Security is sick, and getting sicker all the time.

Some people argue that Draconian measures — severely scaling back the program or gradually eliminating it — are the only solution.

But no politician has ever found such ideas to be workable in the real world. Even President Reagan, elected with a presumed mandate to make heavy reductions in government spending, has taken pains to keep Social Security sheltered from the budget-cutting ax.

The millions of Social Security recipients represent a powerful political force, quick to flex their muscles whenever threatened.

And who is to say that people who have contributed to the system for years don't "deserve" fair treatment when their turn comes to start collecting from it?

Indeed, the defenders of the system say it has made a major positive contribution to American society, saving countless people from the fear of winding up in the poorhouse.

"The Social Security system is sound in principle and, of all alternatives, is the best structure of income support for the United States," a

commission appointed by Congress recently concluded.

If we want to keep it, however, we're going to have to pay for it. During President Carter's administration, sharp increases in the payroll tax that supports it were enacted. Yet a crisis still looms.

"In the short term, the Old Age and Survivors Income fund is likely to become insolvent in 1982, if Congress does not take action," says Buck Consultants, a New York employee benefits consulting firm.

"In the long run, the 'graying of the population' could lead to prohibitively high tax rates to keep the system in the black."

Because of wide fluctuations in birth rates, the "youth explosion" that occurred in the two decades or so after World War II is over. Now the average age of Americans is rising, shifting the Social Security balance steadily away from the contributing side of the system to the receiving side.

"It is clear that taxes must be increased or benefits decreased or both in order for the Social Security System to make a go of it financially over the long run," Buck said.

"The trick is to find the right blend of tax increases and benefit decreases that will be politically palatable and yet put Social Security on a sound footing."

Congress is now grappling with that task, considering a wide range of possible measures. One of the most prominent is a proposal to raise from 65 to 68 the age at which workers could retire and begin drawing full benefits.

Meanwhile, suggestions for changes in the system's structure pour in from all sides. As the debate continues, almost everyone agrees, the problems get worse.

"The resources of the United States are finite and the graying of the population is inexorable," Buck noted. "Some hard choices must be made."

Floors were cracked, sagging before condominium collapse, workers say

COCOA BEACH, Fla. (AP) — While officials continue investigating the Harbour Cay condominium collapse, workers on the project have told a newspaper that serious stress cracks were seen in the building's floors before they fell.

Besides the cracks, the five-story structure's heavy concrete floors were visibly sagging between support columns, the workers told the newspaper TODAY of Cocoa.

Construction workers interviewed by the newspaper requested that their names not be revealed, saying they feared losing their current job.

The unfinished building collapsed in a pile of metal and concrete March 27, each of the five floors falling virtually straight down and creating a "pancake" effect. Eleven workers were killed, another 23 injured.

The newspaper reported Sunday that the workers also said:

—Wooden 4-by-4 reshorings beams, used to support the floor slabs until the concrete set, often cracked and bowed under the weight of the million-pound slabs.

—A few hours before the building collapsed, workers began removing those beams from the third floor,

where they were supporting the fourth floor. Workers have said the fourth floor was the first to fall. A supervisor reportedly had ordered reshorings beams put in, but witnesses said they didn't know whether they were.

—A piling test on the south end of the building had failed. The steel and concrete pilings are driven into the ground to form the foundation.

Mike Mervis, spokesman for Towne Realty and Univel, the corporations that supervised the Harbour Cay construction, confirmed the test failure, the newspaper said but said the pilings were reinforced and passed later tests.
