Out of town relatives here for the funeral included a brother of Mrs. Jones and his wife, Mr. and Mrs. Otho Fickes, of Buffalo, Wyoming; and another sister-in-law, Mrs. L. L. Purinton, of Alhambra, California.

Pallbearers were Kinder Farris, Glad Snodgrass, Mark Martin, Gordon Mayfield, A. M. Battey, Brentz Breed, Cleo Cates, Willie Lock, of Electra.

Second Round League Play Gets Under Way

In the second round of play in the city softball league, the same schedule will be followed that was used in the first round. The only exception will be that games scheduled to be early games in the first half are to be late games, those scheduled to be late games will be played early. In this manner each team will play seven early games and seven late games during the course of this half of play.

Second round play was scheduled to begin Monday night, with Hagoods vs. Grigsby Laundry, and Phillips vs. McCoy.

Tuesday night in the first game South Plains smothered the Footlight Club 19 to 1 in five innings. In the second game, Merchants beat Stansell - Collins 13 to 5.

Thursday night Grigsby Laundry will meet Phillips in a make up game the only one remaining in the first round of play.

Friday night, Merchants will meet McCoy in the first game and Phillips will take on Hagoods in the second.

Run Concrete For Addition

First concrete was run this week on the addition to the Andrews Ward School building which the school board hopes will form the major unit in solving scholastic housing problems by late fall.

The addition will be a north wing to the main building, which will exactly match the work already done, with larger heating unit, other additional facilities, an extended corridor, and a total of six more classrooms. The cost will be about \$72,000.

Haynes & Kirby are the architects and Jimmie Stiles, a member of the firm, will be general supervisor of the work for the school board. Sampson & Company are contractors.

Walter G. Collins, president of the school board, says the construction company has promised to do their utmost to have the addition ready for use this fall in a much-needed expansion program of housing facilities for the scholastic population.

Showers Dot Area Mon.--Wednesday

Showers ranging from a quarter of an inch to more than an inch dotted Floyd county Monday afternoon and again Wednesday afternoon and evening. The rainfall was not general. Southwest and western parts of the county appeared to be favored from incomplete reports.

At Floydada city hall 47-hundredths of an inch of rain fell Monday afternoon and 27-hundredths Wednesday.

Hail Hits Small Area An area north of Cedar that had about as good dry land wheat as was in the northeast part of the county was badly hammered by hail in the Monday afternoon storm. Johnnie Lackey, Calvin Steen, Charley Purnell, and Jim Conner had more or less damage. No rain at all fell on a considerable area about them.

Purnell said he had a quarter in wheat where the ground was really boggy the following morning. He will be ready to plow some of it as soon as it dries up, he said.

First Load of Wheat Monday The first load of wheat to be marketed in this area from the 1948 crop came from a field of C. T. (Dot) Hammonds. It was delivered shortly after noon to the Troy Leonard elevator at Boothe spur.

The trial run of wheat tested 58 pounds and was good and dry, reported.

But in some other parts of the county the land is going into row crops of one kind and another. Weather for the remainder of the summer will tell the story as to these plantings.

Floydada Cubs, Dads To Camp Post Saturday night and Sunday; Co'missioner Henry Gives Details

The South Plains council Boy Scouts of America, will offer again this summer the ever popular Cub Dad Pow Wows. The annual affair got underway at Camp Post, Post Texas, June 5 and 6. The Floydada cubs and their Dads are due to attend Saturday night and Sunday, June 12 and 13.

The camp will start with the evening meal on Saturday and will end with the noon meal on Sunday. All meals will be served in the Camp Mess hall at a cost of \$1.50 each for Dads and cubs. Reservations have been made for all who wish to attend by Jack Henry, district cub commissioner. Each Cub must be accompanied by his dad or a man representing his dad.

The Council will have all sorts of programs that will interest the Cub scouts and will give the Dads a real workout. The cubs and Dads are urged to arrive on Saturday afternoon so that the camp can be set up before dark. Supper will be served Saturday evening at 6:30. Articles that the cubs should bring are bedroll, toilet articles, tents if they have one, knife, flashlight, camera, compass, field glasses and canteens. The cubs are to wear their uniforms and the Dads should wear old clothes.

Menu For Pow Wow The menu that has been planned is:

Saturday night: Virginia baked ham, mashed potatoes, corn on the cob, jello, vegetable salad, bread and butter, lemonade, ice cream and cookies.

Sunday breakfast: tomato juice, dry cereal and milk, toast and jam, coffee, scrambled eggs and bacon, hot chocolate.

Sunday noon: meatloaf, baked potatoes, buttered peas, cole slaw, bread and butter, fruit punch, canned fruit and cake.

Mr. Henry, in urging the attendance of the cubs and their Dads, said "Don't disappoint your boy, bring him to the Cub Dad Pow Wow. If you Dads find that you can't come until the last minute, come anyhow, we want you there."

Plans are being made by the Cub scouts for their pack meeting which will be a picnic in the canyon on June 25. The project for the pack during the month of June is den shacks. Each cub is building a shack in his own backyard. The shacks will be inspected and judged by a committee the week preceding the picnic, when the awards will be made.

Mr. Leonard, and Hammonds immediately began preparations to combine and market the crop.

Wondered What Hit Him Greer Christian got a charge out of the thunderstorm Monday afternoon.

Mr. Christian and another man were standing on the farm talking, when the other man said he guessed he had better go home, because his wife might get scared. The next thing Mr. Christian knew, he was stretched out on the ground, wondering what had hit him.

"This rain nearly got me, even if it did bring a lot of moisture," he said.

Farmers Plowing Up Land Floyd county wheat is late and light.

Except for the irrigated area, where water last fall made the difference, that is the story.

In dry land territory weather in January and February was wrong on top of an obstinate fall weather condition. Scores of farmers in the south and east parts of the county in particular have plowed up their land and are summer fallowing. They are not going to plant to any other crop, many of them say. They still bet on wheat.

But in some other parts of the county the land is going into row crops of one kind and another. Weather for the remainder of the summer will tell the story as to these plantings.

Farmers Meeting at Sand Hill June 16

One of several regional meetings of the Texas Farmers union will be held at Sand Hill Wednesday night of next week, June 16, said Ed Holmes this week. Holmes urges everyone interested to be present.

Chase Meakins, well-known farmer and farm leader of Colorado, will be one of the speakers to tell Texans of the services the national Farmers Union has to offer the farmer.

Claude Jones, president of the Sand Hill Local Farmers Union, announced that refreshments will be served to every one present. Wm. Finkner, of Petersburg, one of the state directors, is responsible for getting the meeting at Sand Hill. He believes that farmers here can profit by the information they will get from the speakers at the meeting.

It appears now that E. M. Carmichael No. 1, General American test, will be Floyd county's first producing oil well.

That was the story yesterday from Petersburg where the pulse on south-west Floyd county developments is most pronounced.

Carmichael No. 1 is down close to 6,500 feet. It is about the depth where Byrd No. 1, a few hundred yards to the west came in a producer.

What has happened is that they have the sand they were looking for, have perforated the casing and set it ready for acidizing. The story will be told within a day or two.

Byrd No. 1, with which the new well is being compared as to depth, is producing about 119 barrels of oil as a pumpjack, with about the same amount of water. Byrd No. 2 has been called a failure. This is an off-set immediately to the west of the "discovery" well, which Humble abandoned in the summer of 1941.

Mayo Formation Is Lower The well on the Mayo land is running some 300 to 400 feet lower than on the first Byrd well and the Carmichael well. If they go into the "reef" it will be at a depth not yet reached. Tom Suites, associate editor of The Petersburg Journal, is hopeful that this will be a well. He said, however, that the Crump land well might be the better of the two. The Crump well is around 6,000 feet deep now and the formations are running about the same as the Byrd No. 1, which is a producer.

Byrd No. 2 has been abandoned. The rig has been moved off and the hole plugged.

New Farm Credit Supervisor Named

William E. Anderson, of Amarillo, has been named county supervisor of the Farmers Home administration to succeed James Crump, who resigned and moved to Littlefield to become manager of a lumber yard the latter part of March. Mr. Anderson comes to Floydada with five years experience as supervisor of Farm credit. His supervision will include Crosby as well as Floyd county.

Mrs. Anderson will join her husband in Floydada Friday.

Baptist Camp Work Moving Fine

The mess hall is completed and the way to completion, say latest reports from the Baptist encampment being built in Blanco Canyon.

The mess hall, 32 x 74, and the new tabernacle, 64 x 96, both promise to be quite imposing structures. The tabernacle will be finished within a few days. The encampment consists of about 70 acres of land due south of Floydada in Blanco canyon. A road is being built from highway 207 to the camp.

The socks, filled with sandwiches, fruit and cookies were auctioned off at Irick by R. D. Williams, Jr. The Home Demonstration club served grape punch.

The Baker box supper was described as "quite and nice." Many of the candidates were present, and there was no program except the speeches. The boxes were sold to everyone for two dollars, with no auctioning. Herschel Green presided.

Lone Star Supper Tonight The Lone Star schoolhouse will be the scene of a good, old-fashioned, supper and candidate speaking Thursday night, June 10, at 8:30. It is being sponsored by the Home Demonstration club, and the public is invited.

All proceeds will go on the Clubs' project, which is to help furnish the Lockney Hospital. Supper will be \$1.50 per plate.

All candidates are extended a special invitation.

DDT Spraying, Done in Six Hours, Continues Fight Against Filth

The DDT spraying Friday was hailed as a big success by both an official of the Junior Chamber of Commerce and a city official.

Within six hours, the truck sprayed the entire town, including the city dump, the rodeo grounds, and the flats. It was thought to be one of the most efficient sprayings that this town has had. The crew had just completed spraying the entire city of Lubbock.

"Providing the people think it's worth while and the weather permits, we will spray again in two or three weeks," said Guy Glyn, chairman of the Junior Chamber of Commerce committee. Jess Patterson, city councilman in charge of maintenance and improvement, said he thinks we really need another spraying right away, and then it could go awhile.

Dent in Fly Population Most towns have adopted spraying, and paralysis is on the decrease. You can draw your own conclusions, but it is a known fact that DDT

has made a tremendous dent in the fly and cockroach crop in most places.

While many people stepped all over each other pulling their windows down when they saw the truck coming, Gwen Norman paid the men \$1.50 to back the truck up her driveway and give her house a good spraying from cellar to garage.

Made Calf Stiff, Nervous No harm in Floydada has been proved to result from the DDT, but last year some rather unusual complaints came in against it. One man said his calf was stiff for 30 minutes after the truck had passed, and the nervous condition was credited to the DDT. Another man's hedge seemed to absorb too much of the insect powder and died soon afterwards, he said.

A special effort will be made to keep the alleys clean, in this battle of the insects which will aid the town's appearance as well as the community's health.

Enough, that Blasted Foot the Hospital Authorities, Cornelius' Commencement

of his fighting the thing at minute, E. L. Cornelius spent the commencement of two youngsters flat of the Veterans hospital in

better, but they hadn't shown him the X-ray yet. He decided that he could get a pass from the hospital and take a bus to Lubbock.

Nobody was really surprised when he didn't arrive on the bus. If wishes were horses, Mr. Cornelius would certainly have ridden to that graduation exercise in style, but everyone just had to make the best of things under the circumstances.

As things stood, Mrs. Pierce King, Randall, and Leora had to represent the family on graduation night at Tech when Donald and Doris were awarded their degrees.

Dang them Baptists: If you have trouble understanding, (we do not mean believing) the Baptist doctrine, there are others who do, too. If you understand and believe it, that's fine if that is the way you believe leads to salvation. Just forgetting all of that, don't you think well of their upstanding courage in just being what they are and not trying to "join" something or other or trying to impress somebody in Europe? Well, we do. Bless their hearts and blast their hides, if we may be so bold.

It is said the lords of capital and the lords of labor are getting nearer together now than ever before in a long, long time. For several years now it has become apparent it is not the man who toils nor is it the man who owns the plant, the stockholder, who is at outs. It is "management" and "labor" in the higher brackets who are trying to shackle the country's economic position, each to fit his own ambitions. Item: men of the typographical union who reach an agreement with employers on working terms have their agreements declared invalid by a hierarchy that says no. Item: the stockholders who would agree that their employees should have certain benefits find their desires stymied by management that says no also. Our impression is that sometime not too far away some kind of a reasonable formula is to be found so that the rights and the needs of each will be determined and respected.

Dim lighting, slow heating applies and poorly running motors may be the signal for the need for a new rewiring job on the farm.

What about the synthetics? Do you want to have this a fly-free America? Would you have the war-born discoveries free us of the pests which confounded our fathers and their fathers? And, perhaps, make this fine old world all over again? Well, some of the scientific fellows are beginning to worry. Maybe they misled us. Maybe, indeed, they may have done a horrible thing. Suppose you take into your system the meat of cattle that have been DDT'd for the period of their development before slaughter for human consumption. And do this all over again and again for 50 years or more. One morning you are unaccountably sick. You have some sort of paralysis or something else terribly bad—thrombosis would be a good thing to have, although it is a shame to use the word here and we do it only because it is a fifty-center or better. And it all goes back to the fact that for years after the war you absorbed infinitesimal amounts of this synthetic into your system until one morning you couldn't take it. And suppose two million of you—newspaper people couldn't go along, they have to get out the paper—were

hit all of a sudden. And all the doctors and nurses were sick, too, being a well-fed sort. Then what would be done? Go back, if we could, to flies and insects and bugs and ants in the butter, and gnats and mosquitoes and crickets crawling through cracks?

Following this line of logic one would be afraid to spray the weeds in his cowpatch for fear the baby would have a paralytic condition later on and the children wouldn't call him blessed on account of the grandchildren being ill from that terrible folly the old man engaged in back in those hectic days when everybody had a DDT complex or sprayed with two, 4-D. Or gave the baby an injection of that stuff called penicillin. A good way to do would be to dig a hole, crawl into it and pull the hole in on you. Thus there would be no responsibility, you would not have committed any crime against the future, except that unpardonable one of crawling into your hole and pulling it in after you.

(A contributed Editorial)

It is noted that General Dwight D. Eisenhower, in taking over his position as the President of Columbia University, assumes control of a \$50,000,000 institution with a faculty of 4,154 and a student body of 31,000. The ratio of students to faculty members will surprise those who are only familiar with the efforts of smaller institutions to secure a competent teaching staff. It illustrates what money will do, even for a university.

Motion Picture Contest for 4-H Club Girls

Four lucky 4-H Club girls, one from each Extension region, will win a screen test in Hollywood. These girls, with chaperons, will have an all-expense paid trip to Hollywood for the test.

Plans are now being made for a motion picture, "The Green Promise." It will tell the story of how 4-H Club work helps a twelve-year old rural girl and her family to win independence and a sense of personal achievement.

Any 4-H Club girl who has not passed her thirteenth birthday by June 30 of this year may enter provided:

1. She is now a bonafide 4-H Club member.
2. She has been an enrolled member of a 4-H club for two years. (1948 counted as one year)
3. She has done any one of these: completed a demonstration, now has a demonstration in progress, has held an elective club office, has completed all the co-operators' goals for one year.
4. She has the approval of her parents to fill in the entry blank which they will sign.
5. A photograph must be attached to the entry blank, preferably a snapshot or a photograph that has not been retouched.

If a Texas girl should be selected as the representative of the southern region, she must then compete against the representatives of the other three regions for the final selection.

Those 4-H Club girls who are eligible and want to enter the contest may get their entry blanks from Miss Lela Petty, County Home demonstration agent.

JERSEY HERD RATED FOR T. G. HERRING OF CROSBY

The American Jersey Cattle club, whose headquarters are at Columbus, Ohio, recently classified for type the registered Jersey herd owned by T. G. Herring, Crosbyton. Classification was made by F. W. Atkinson, Kansas State College, an

official classification inspector of the Cattle club.

Animals are compared for type against the breed's score card under the Jersey Herd classification program. This allows 100 points for a perfect animal. Ratings of excellent, very good, good plus, good, fair or poor are given the animals in accordance with the number of points

which they receive on the basis.

Classifications of the herd in the Herring herd are good plus for an average of \$2.50 per cent.

Yes, fellows (dads, too), it's fun to fly your model planes on control wires. Most of the time your wires are short enough to go under power lines. But if they don't—well, once is enough for a bad accident! The best way is never to fly ANYTHING near any kind of lines. Then you'll be sure you won't tangle with them.

By the way: If you go in for "free flight," your plane may get hung up in the lines or atop a pole some time. Don't try to rescue it yourself. Call your Public Service office for a lineman or serviceman to handle the job. When you're flying model planes, be a careful pilot—always!

Cars and Trucks Damaged in Field Day of Ill Fortune

Two cars and two trucks were driving down the highway, minding their own business, last Monday afternoon after the shower.

The first car ran out of gas. The second car stopped to push it.

The first truck saw the cars and slowed down.

The second truck didn't see the others, and ruined everyone's day.

The first car had the back part bumped up a little. The second car, a black Ford belonging to S. F. Sharps of Happy, had both the front end and back end bumped up pretty badly, having to be hauled in to Bishop's garage for first aid.

The first truck, driven by Ed Whitaker of Flenot, was shaken up to the point of needing several new accessories, such as back wheels and fenders.

The second truck, belonging to the Hamilton Construction Co., was in the worst fix of all. The steering wheel was lying idle in the front seat. When they say their motor was missing, they mean it literally. It had to be hoisted back into the truck before it could be hauled into town.

James Edwards, Johnny Campbell, and Floyd M. King were riding in this unlucky truck. None of them were badly hurt.

What happened to the first car, the one that ran out of gas? The Hesperian has been unable to learn.

Conscience Stricken Patron Restores 2-fold to Partnership

"It has been a hurtin' my conscience and I want to make amends and will you forgive me," was the plea of a letter Clarence Foster got last week.

Yes, it has been a long time. Thirty years, to be exact. Someone now living in a southwest Texas town cheated Mr. Foster and his brother, George Foster, who is now in business in Lubbock, out of \$20 when they were in business together here. This was 30 years ago.

Enclosed in the letter were two \$20 bills, one for each of the partners. This was paying exactly twice the amount the partners were cheated of.

The letter appeared to have been written by a woman and dictated by a man.

"I'd like to send them their money back," said Clarence Foster, the former dry goods partner still living in Floydada, this week. "I sure do have a curiosity to know who it is. I have heard of that kind of thing all my life but never ran into it before."

The Foster Bros. partnership ceased to exist in August of 1918, when the brothers sold out and went into other lines of endeavor.

SOLICITOUS WIFE STRICKEN WITH APPENDICITIS, RIDES HOME IN SAME AMBULANCE

Mr. Henderson was ill in a Wichita hospital, when Mrs. Henderson had to have an operation for appendicitis while there with him.

They are both doing well, according to a friend of the family.

more plowing with less power

Actual field tests have proved that the Krause One-Way has up to 30% less draft than other plows. There are several reasons for this... lighter weight, Timken bearings on discs and wheels, rubber tires. There are a lot more reasons too. And they all add up to a lot more plowing with less power, less cost. But this is only one of the many advantages and features you get with a Krause One-Way. See it at your dealer's store. Compare. High School Freshmen Can Make College English

STATION. — Future freshmen should have no trouble with English if their high school teachers adopt a program designed to adequately prepare them for college.

A program has been proposed by the means of integrating the study of English in high schools and colleges, according to Dr. T. F. Head of the Texas A. & M. Col-

lege English department and chairman of the ten-member committee which has studied the program. Noting that a minority of high school graduates attend college, the committee included in their proposal only such procedures that would benefit all students equally.

It is the aim of this program to stress clear, concise, and correct writing based upon a functional knowledge of the fundamentals of English, and to stress effective, comprehending, and enjoyable reading so the student may know the main points of what he should read within his age and interest fields.

To give the student knowledge of writing, several recommendations were made: in a 4-year high school, all freshmen and sophomore students should be required to write a minimum of eight themes totaling not less than 1,000 words, and

Mrs. Gullion Rests In Good Spirits at Plainview Hospital

Mrs. J. N. Gullion, in Plainview hospital since May 21 for a second surgical treatment of a broken hip, is in good spirits this week, Mr. Gullion reported.

Her hip broken in a fall on March 4 during a sleet storm here, Mrs. Gullion had been at home for several days when the second operation became necessary. The bone had to be re-set.

Contributing largely to her good spirits has been the visit of two of the children in the past week. John E. Gullion, son of Tulsa, was here Friday to Monday, and Mrs. Annie Ruth Nelson, of San Diego, California, also arrived Friday to spend several days.

Her husband, J. N. Gullion, said yesterday that so many friends had been so good to them in so many ways, since Mrs. Gullion's injury, he couldn't pay back the many kindnesses in a hundred years, if he had the chance.

all juniors and seniors should write eight themes totaling not less than 2,000 words. College freshmen should write 20 themes with at least 8,000 words or an average of 400 words per paper. Themes should be fairly simple and on subjects within the student's own experience, observation, and reading. Each theme, after being criticized and marked, should be revised by the student for regrading.

Reading comprehension can be acquired not by reading alone but by discussing the material read. The committee recommends requiring all high school junior and senior classes and college freshmen to do four assignments each term in reading analysis based on articles from reputable magazines. Before class discussion on reading assignments objective tests aimed at comprehension and vocabulary should be given.

The committee has submitted this program to the English teachers of Texas for their approval and adoption. If the school year 1947-48 proves successful, the program will be extended and broadened.

Tooley, left Saturday for Colorado Springs, Colorado where he is finishing his college work in actual training in Petroleum engineering in the mountains. Mrs. Martin was formerly Miss Edwina Tooley. She is remaining with her parents for a longer visit.

The Tooley family was greatly surprised Friday night when cars began turning in their drive-way until almost the entire community was gathered for a surprise party with ice cream and numerous cakes of various kinds. Due to the immensity of the crowd, they went to the school lunch room for the party. The Tooleys expressed their deep gratitude for being the honorees at such a lovely affair. Such acts of kindness and friendship will not soon be forgotten. It is expressions of appreciation like this that make the lives of teachers well worth living and furnishes them courage and zeal to go on.

Danger Lurks in Unused Doses

Don't overlook the family medicine chest while doing your spring housecleaning, warn safety experts of the Accident Prevention Department Association of casualty and surety companies. The advice goes for career girls and bachelors as well as housewives, because a sip from the wrong bottle can be fatal.

Two main rules to remember regarding your medicine chest or the shelf where you keep the family dosages is (1) keep poisons away and (2) discard leftover medicines as soon as you stop using them.

Turn Lights On

Most adults are careful enough to keep medicine chests high enough to be out of reach of small children, the Department reports, but there remains the danger of adults grabbing the wrong bottles when they sleepily reach for something in the middle of the night. A lethal bottle of poison may feel like the cough medicine in the dark, but the results get rid of you as well as the cough. Always turn the light on when getting something out of your medicine chest, warns the Accident Prevention Department, and take the double precaution of marking poisons on bottles, no matter where you store them. One good method is to tightly tie on the tops of poison bottles with double-knotted cord. This makes opening the bottle difficult enough to cause even the sleepiest person to glance at the label.

Old Medicines Tempting

Old medicines should be thrown out because they are often either useless or dangerous. Some lose their strength in time and may prolong or aggravate your illness. Others — tincture of iodine, for example — become too strong as a result of evaporation of water or alcohol. Besides, if medicines are not thrown away when you are through with them, there is a dangerous temptation, next time you are ill to take a few more swallows without first consulting a doctor to see if you are suffering from the same ailment.

With the exception of tooth pastes, shaving lotion and other such harmless toilet articles, nothing should be put into the medicine chest without the advice of your physician. He'll advise you that boric acid, vaseline, a good ointment for burns and aromatic spirits of ammonia are considered good standbys to have on hand for emergencies. Adhesive tape and sterile gauze might also be placed in the medicine chest. But remember that after the wrapper is broken the gauze is no longer sterile.

Bell Will Be Back On the Job Soon; Two Others Are Ill

For the second week, three Floydada citizens are reported to be ill. Fred Bell, who hurt his back while loading his pickup, will be back on the job soon. His son, Ted Bell, has been delivering his mail most of the time while he was ill.

J. A. Jameson is said to be improving, but it is only gradual. During most of this week, he merely held his own, but he's doing a little better now, friends of the family reported. Mr. Jameson has a condition very much like an apoplectic stroke.

S. H. Horn was reported to be not doing so well as might be hoped. He had a light stroke, with paralysis developing. He is at his home on West Crockett street.

Conservation District News

Like harvesting will get any day now. This year a lot of folks have said that they are going to do that much more after they got the boys at the District office so they can schedule you in to get the lines run.

The Soil Conservation Service technicians assigned to the District are out to the L. B. Brandes farm to assist in locating several high spots and making preliminary survey for an elevated ditch.

Some of you are expecting to plant alfalfa this fall, so here are a few words of advice which we believe might be helpful. You know you will keep land in alfalfa several years so you better have it in good shape as you might have several years of mean watering ahead of you. Spend the summer killing weeds, and leveling and floating. You can find out how good a job you did by trying to water. Generally, enough low or high spots will show up to pay you to do another floating.

S. Sgt. John C. Colville, of Fort Worth, spent the week-end with his parents, Mr. and Mrs. James D. Colville.

son, a Lubbock attorney and former state senator, represented Mrs. Wagner in the insanity trial in county court, and is the attorney of record in the suit in district court. J. B. Stapleton, district attorney, acted for the state in the county court trials, the first of which resulted in a mistrial. Monday's jury was composed of Pay Pinner, E. D. Jackson, V. L. Webster, L. A. Hooten, W. G. Talley and Frank Roberson.

Any further effort of Mrs. Wagner to obtain her freedom, unless she is dismissed by the hospital authorities would have to come through habeas corpus proceedings in the county where she is to be hospitalized, presumably Wichita, in which proceedings she would have to establish the fact of her sanity. However, in case of recovery, hospital authorities usually release patients, an authority which they may exercise at discretion.

Now Father's Day Came to Be So Called

Once upon a time there was a civil war veteran named William Smart. William had six children to raise alone after his wife's death. All of these children loved their father very much, and after they grew up, one of them, Mrs. John Bruce Todd, of Spokane, Washington, thought of the idea of Fathers day in honor of her dad.

Mrs. Todd wrote the president of the Spokane Ministers association, and suggested that on the third Sunday in June, sermons be given throughout the city stressing the importance of a father's place in the home. The idea was unanimously approved.

So the first Fathers day was started in Spokane, Washington in June, 1909.

Fire Destroys Home of Krauses During Storm on Monday

The home of Mr. and Mrs. H. A. Krause, which they built 35 years ago, was totally destroyed by fire after lightning struck it during the thunderstorm Monday evening. Damages were estimated at \$10,000.

The fire occurred about 2 o'clock, according to the numerous neighbors who had electric clocks stop at that time. Mr. Krause was just driving up when it struck, and Mrs. Krause was working in the kitchen.

"It seemed to be everywhere at once, but I believe it struck in the basement and spread upward," said Mrs. Krause.

In a matter of minutes, the entire house was filled with smoke, probably because of the butane system quickly becoming ignited. The family was able to save nothing.

The Krause home was located about 16 miles southwest of here on highway 54, in the Allmon community.

The Krauses have made no definite plans yet, but they are considering building another home in exactly the same place.

As A Farm Woman Thinks

(By Nellie Witt Spikes)

Our bird neighbors have been very, very, busy the past two weeks. Trees and bushes and the grapevines all have a nest of some kind. The big walnut tree has two nests built by the mockingbirds.

I tied strings up and down a binder twine and tied to stakes over the young beets and lettuce plants. One day I saw the strings flying like mad and there was not any wind stirring. I investigated and found two mockingbirds pulling at the strings. They would pull off a raveling and fly to their nest under construction. Margaret Nell and I tore up strings and hung them on bushes.

A pair of scissor-tails have their nest in a dead tree in front of the house. They wake me up every morning with their monotonous cry. There have been four tiny killdeer bobbing their heads as if bowing thanks for the water and bugs and tender greens in the garden.

A rust colored little bird hatched four birds in the grapevines. Wilma and Margaret Nell and I went close to her nest when she was on it and if we had reached out six inches farther we could have touched her. She looked at us with all confidence in our honesty.

Doves like to build near houses. Some nest on the ground and others low in trees. Many sparrows are back after a year's absence, quarreling as usual and making messy nests of sticks and feathers in tall trees.

The bull-bat is here. He always waits for real warm weather. I like to watch them late of an afternoon as they gracefully fly and dip to catch bugs and millers.

There have been four bull snakes killed here this year. Two were in the henhouse and had filled up on eggs. I turned the one on his back that we killed this morning with the childish hope of rain. Wilma killed two of these large snakes, also. One had eaten a big chicken.

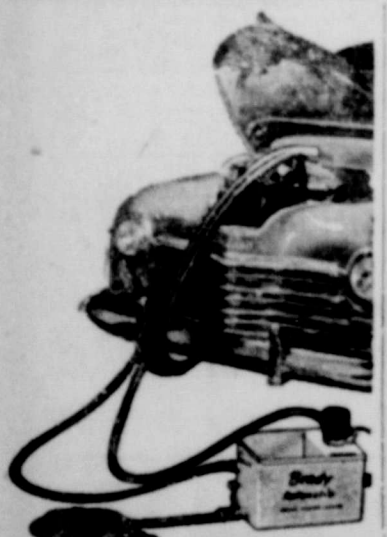

Cast critical words upon the public and you will get back three brand new beautiful feed sacks. Or at least that is what happened to me after complaining about getting out letters on sacks. Mr. Howard Robertson of Lubbock left them with Charlie Berry with the note, "Here are three sacks, hope the lady will like the selection." Thank you, very kindly Mr. Robertson.

"Thou art gone from our gaze like a beautiful dream," Mrs. Rachel Loflin was my friend. Many times she told me, "Mrs. Spikes you were our first lady customer when we came to Ralls." And that always was a sort of special tie that lasted all the years which came and went so swiftly I knew this gracious lady. Right in the midst of a busy useful life our friend was called. God's finger touched her and she was gone.

The death change comes. Death is another life. We bow our heads. At going out, we think, and enter straight. Another golden chamber of the King's. Larger than we leave, and lower.
