

## Energy Plan Eyed By Texas Leaders

### \*\*\* TIPRO President Pans Carter's Energy Speech

Chester R. Upham Jr., president of the Texas Independent Producers and Royalty Owners Association, gave a statement to The Journal following President Jimmy Carter's energy speech to the nation.

Sunday night, The president said: "On the whole, he seemed more concerned with posturing for political advantage than providing substance for dealing with the energy crisis."

"While that address may help galvanize the nation into a new mood of urgency, the President is substance called for more not less government controls, when it was brought on the energy crisis."

"Mr. Carter, it seems, simply does not comprehend what a free economy can do for this nation."

"Long-range, there is no energy shortage in this nation. The problem is how to bridge the gap between now and the future of energy plenty. The President has ruled out increases from foreign sources. That leaves only two sources -- conservation and increased domestic oil and gas production -- to bridge the gap between now and the day when alternative energy resources can be delivered to consumers in significant quantities."

"He spoke of a crisis of spirit, and a return to former principles. Yet he refuses to recognize what controls and government bureaucracy are doing to create that crisis of spirit. "By cutting off any increased supplies from abroad, and again proposing a so-called "windfall profits" tax on domestic oil production, the President may well be guaranteeing even more severe energy shortages in the future."

"Mr. Carter is not only freezing import levels, he is freezing and reducing oil and gas production. The

### Around Muleshoe

Members of the Muleshoe Youth Activities Committee Inc. will meet at 8 p.m. on Monday, July 23 at the Bailey County Exhibition Center and Coliseum.

Interested persons are invited to meet with the group, which plans organized group activities for all area youth.

Sherry Ellis and Denise Wilson of Muleshoe are among the 96 athletes attending the Sunshine Girls' Basketball Camp at Eastern New Mexico University, July 15-20.

Designed to further the knowledge, skills and enthusiasm for women's basketball, the Sunshine Camp is in its fourth year of training women basketball players in grades seven through 12.

Marie Lenau has accepted chairmanship of the annual fall campaign on behalf of the Cystic Fibrosis Foundation.

She will be recruiting volunteers within the community to plan a "Breath of Life" campaign to take place this fall in Muleshoe.

Visiting in Muleshoe during the July Fourth holidays to attend a Class reunion was Mrs. Richard Mayer, the former Miss Cont. page 6, Col. 2

**ALL-STARS WIN TITLE IN TOURNAMENT** -- It took two extra innings to break the 2-2 tie, but the Muleshoe Little League All-Stars defeated the Sudan-Amherst Little League All-Stars Thursday night to take the district title in Muleshoe. Team members included from left, back row, Darin Shaw, Sox; Rudy Pena, Savers; David Vela, Lions; Eugene Shaw, manager; Ray Vinson, Cardinals; Trent Hysinger, Mustangs; Ector Flores Jr., Sox; Mike Hunt, coach; David Reid, Veterans and Jay Stovall, Veterans. Front row, from left, are Todd Jones second alternate, Veterans; Mark Moton, honorary all-star, Savers; Alex Laredo, K-kBars; Ronald Briggs, Sox; Mike Holt, Mustangs; Loy Triana, Sox; Adrian Perez, Mustangs and George Reynero, K-kBars.

## Feasibility Study Underway For Hutto Fuel Alcohol Plant

A group of central Texas farmers, members of Central Texas GPI, Inc., announced Friday that they have worked out an agreement to enter into a feasibility study for the design, construction and operation of a plant to produce alcohol from milo for use in gasoline.

Kenneth Johnson, a farmer near Hutto, and chairman of the board of the cooperative, made the announcement following the signing of the contract with GPI a marketing and

management consulting firm. According to the announcement, it is planned that 25 similar facilities, all farmer-owned cooperatives, will be built in the grain producing states of the nation. Discussions are already proceeding in other areas of Texas and the upper Midwest. This was the first agreement signed to proceed with the feasibility study, according to the GPI spokesman who called The Journal from

Washington, D.C. "The site for the plant has not been determined," Ron Wood of Hutto and coordinator for GPI said. "We are hopeful that the study will allow the plant to be operated in the Hutto area. It will use one of many energy efficient processes now available to transform grain into alcohol for fuel."

The plant would process 4,200 carloads of grain sorghum each year into 20,000,000 gallons of alcohol and sizeable amounts of high quality food proteins. The cost of the plant will be approximately \$30 million and will take 18 months to construct following ground-breaking. The feasibility study will take approximately three months, and if favorable, will take three months for a site selection and engineering.

GPI Inc. has permanent financing committed pending an feasibility study, said Kenneth Johnson. "If everything

### Community Revival Set For Muleshoe

A non-denominational group of local residents has scheduled a community revival to be conducted at the American Legion Hall in Muleshoe July 31 and August 1-4. Services are scheduled for 8 p.m. from Wednesday, July 31, through Saturday, August 4.

The spokesman said the evangelist will be Rev Israel Leon. He commented, "Rev. Israel Leon is a Mexican evangelist and he was born in Cardenas, Tabasco, Mexico. He was saved at the age of fourteen and one half years. Shortly after being saved, a very strong fever hit his body and he lost his life. He was dead for seven hours and three doctors declared him dead."

"At that time, God showed him what his ministry to be and how he, being uneducated at that time, would minister to thousands of persons in Latin America and all around the world."

"During the last 17 years he has preached a powerful message of faith. Thousands of souls have heard this famous preacher exhorting the wonders of the Lord."

"This man of God

### Government Red Tape Will Hamper Program

Sunday night, President Jimmy Carter pre-empted planned television schedules and unveiled his proposed energy plan for the nation. The reactions to his proposals were swift as political leaders from across the state and the nation voiced their cautious optimism or outright doubt as to the workability of such proposals.

He proposed the creation of an Energy security corporation 'outside the federal bureaucracy' to develop alternative energy sources, with an \$88 billion budget in the next decade.

### Little League Wins District; Play Continues

Going into the seventh inning Thursday night, and the first inning into overtime play, the Muleshoe Little League All-Stars were all tied up 2-2 with the Sudan-Amherst Little League All-Stars. Then in the eighth inning, and the second inning away from regulation action, Ector Flores connected with a home run ball to send the Muleshoe Little League All-Stars into the winners' column at 3-2 and winners of the bi-district action.

Tuesday night at 8 p.m., the Muleshoe Little League All-Stars will play the Morton Little League All-Stars at 8 p.m. at Morton, with the winner of that game scheduled to play the winner of the North District.

This will be followed by the finals for the state at Waco.

Muleshoe this week blasted Olton Little League All-Stars 18-0 on their first night of action, then came back to win over the Plainview Nationals, 7-2.

Ray Vinson was the winning pitcher in the Thursday night game, and was relieved by Trent Hysinger.

Also proposed by the President was an energy mobilization board to cut red tape blocking increased energy production and projects; a \$5 billion program to require utilities to switch from oil to coal and a \$2 billion plan for the companies to make low-cost loans to their customers to finance conservation improvements.

He also urged the improvement of mass transportation and research on more efficient automobile, at an estimated cost of \$16.5 billion in the next decade.

And, he proposed aid to low income Americans to help them pay higher energy bills at a cost of \$2.4 billion each year and an additional \$3.5 billion program aimed at producing 20 percent of the nation's energy needs from solar power by the end of the century.

Friday morning, by telephone from Texas Governor Bill Clement's office, "The President's address was an echo of past speeches, political in tone and lacking in specifics. We are beyond the time for sermons, the governor stated. Words are not enough. What the American public wants is a plan of action. We want some specifics, something we can get our teeth into. What we got from the president was a replay of the 1976 campaign speeches, rhetoric. There is no real plan to be distilled from it. We must mobilize our industrial base to solve the energy

Governor Clements continued, "The President has all the authority he needs. He doesn't need another advisory board, more red tape and more bureaucracy. The most vulnerable part of his speech was to freeze the oil imports to the 1977 levels."

"At the most, that has dire implications, an

**INTRODUCING THE QUEEN** -- Preceding the opening night of the 35th annual Earth Rodeo, Lena Templeton, daughter of Mr. and Mrs. Gene Templeton was crowned as the 1979-80 Rodeo Queen. She was crowned by outgoing queen, Carrie Been.

### 35th Annual Rodeo Well Attended At Earth

It was split-second timing and a lot of tumbles at the opening night of the 35th annual Earth Rodeo Thursday night.

From the annual barbecue, through the parade, and the pre-rodeo entertainment of gymnastics, square dancing and parachutists, the first performance of the annual rodeo was terminated a success.

Lexie Branscum, president of the Earth

### Football Practice To Begin

Strangely enough, it really doesn't seem long since school was out for the summer and baseball took over summer sports. But, this week, Mike Wartes, athletic director and head football coach for Muleshoe High School reminded that football is just around the corner.

Coach Wartes said physicals will be given for freshman through senior players on Sunday, August 5, at 2 p.m. at the field house at high school. He warned that it will be important for all prospective players to be there for the physical, otherwise, the individual player will be responsible for the cost of his own physical if they have to go to the clinic to have it.

First day of football practice will be August 13 for sophomores, juniors and seniors, with the first day of practice for freshman scheduled for August 20. Football equipment will be issued on August 8.

Meet the Mules Night has been scheduled for 8 p.m. on Thursday, August 23 at the football stadium.

Roping Club, expressed his personal appreciation to the persons who participated to make it such a success and cited the clear skies for the evening's rodeo performance.

During the day Thursday, rain fell and the sky was threatening to erupt into a downpour. However, by paratime, the sky started to clear and the sun was shining for the parade and barbecue.

A nearly packed grandstand watched the first evening of action, during which time the saddle broncs and the bulls were decided winners for the evening.

In the bareback bronc riding, Landon Carter was first with a 63. In second place was Carl Kenner with 61 and third was Scott Hopping, with a score of 58. Also scoring was Lonnie Clemmons, at 55 and Mark Muller with 55. With a fast 10.569, the split second timing of Gary Roland of Lubbock, put him in first during the first night of calf roping. This was followed by Eddie Stanfield, Clovis, with 19.029; Dwayne Kibbs with 19.029; and Russell Sealy of Lefors had a time of 23.918.

The saddle broncs proved to be the winners in that division Thursday night. Scott Hopping of Lubbock scored a 51 to be all alone in the saddle bronc riding as the other four riders were unceremoniously dumped before their ride ended.

Fifteen team ropers found it hard roping, but the team of Sterling Price and Sid Price of Earth was first in the opening go-round with 7.895; second was the team of Colen Lane and Wade Northcutt, Hereford with

Cont Page 6 Col 1

**HANGIN' ON TIGHT** -- With his legs outflung as he takes his bronc, Scott Hopping of Lubbock manages to cling, with one hand, to the back of his bareback bronc during the first night of action at the Earth rodeo. He completed his ride sitting in third place for his eighth seconds of work.

Cont. page 6, Col. 6

## Siphoning Gasoline Potential Problem

Gasoline poisoning has increased "tenfold" recently, according to Mike Ellis, director of the Texas State Poison Center, and Ellis says the upsurge seems to be directly related to the gasoline shortage in the area.

Ellis says his department is receiving an average of 10 calls a day about gasoline poisoning. "This time last year," he admits, "we were only getting about one call a day for the

same thing." The increased practice of siphoning, Ellis thinks, is a major connection between the rising number of gasoline poisoning cases and the gasoline shortage. He says adults, because of the shortage, are siphoning gas from car to lawn mower, from car to can to other car, and he calls this practice "dumb at the very least."

Gasoline siphoning can cause a person at least two

major problems, he says. Ellis says a person can swallow gas while transferring it, and the effects can be serious, even deadly. "Gasoline can go into the stomach," he says, "if the epiglottis slams shut and does not allow it to go into the

LENA KENNEY

### Funeral Rites Held Saturday For Lena Kenney

Funeral services were held Saturday, July 21 at 3 p.m. in the Chapel of the Chimes for Lena Kenney, 57, a resident of Muleshoe since 1955. Rev. Gene Prevo, pastor of the Trinity Baptist Church, officiated. Interment was held at the Bailey County Memorial Park.

Mrs. Kenney died July 19 at 5 a.m. in her home. She was born July 7, 1922 in Micawber, Okla. She was a member of the Trinity Baptist Church of Muleshoe. Glendon Kenney and Mrs. Kenney married June 20, 1939 in Durant, Okla. Mrs. Kenney was the retired owner and operator of Kenney's Cafe.

Survivors included her husband, Glendon Kenney; two sons, Glen Kenney of Port Neches, Texas and Kelly Kenney of Brockton, Mass.; two sisters, Mrs. Taylor F. Ross of Sherman and Mrs. Mary Woodall of Dallas; one brother, A.P. Sutton of Farwell and six grandchildren.

lungs." In the stomach it will be nauseating and may cause vomiting, he says.

"Once it is in the stomach," Ellis says, "it is absorbed, the aromatic hydrocarbons can sensitize the heart to any catecholamine, such as adrenaline. "What this means," he continues, "is with gasoline in the stomach and the heart sensitized, if a person becomes startled or afraid or experiences any sudden emotion that causes adrenaline release, that adrenaline can potentially cause the heart to go into ventricular fibrillation. That person can be dead in four minutes, unless remedial methods, such as counter-shock, are performed."

A second potential problem of gasoline siphoning is that of aspiration or getting it into the lungs.

"If a person coughs or chokes after sucking on the hose, he may possibly have gotten some of the liquid into his windpipe and a set of new and different problems will occur," Ellis says.

Upon entering the trachea and lungs, the gasoline is quite irritating. "The lung tries to take care of the irritating liquid by diluting it.

The most severe effect of gas aspiration, however, is that the oil-based product physically spreads out and coats the lungs. "Depending on how extensive the coating is," Ellis says, "will determine how much lung tissue is spared. It will determine if life can be maintained." In simple terms, aspiration can mean death.

"Children," Ellis says, "are more likely to aspirate petroleum products than adults." Ellis recently watched two

15-month-old girls, in unrelated cases, die of petroleum distillate aspiration. "We put them on respirators," he recalls, "but only about one-third of their normal body oxygen was getting through."

"Once a child ingests a petroleum product," Ellis says, "they're not out of the woods for 18 hours. We don't know whether they're absolutely clean

for 18 hours." Ellis says if gasoline ingestion does occur in the home, the first thing to do is call the Poison Center at 713-765-1420. "If there is

a lot of coughing or choking, we'll send the person in for an X-ray to see what the baseline looks like.

Mr. Carter--  
Answer Still Out

GUEST EDITORIAL

AS MORE DETAILS of President Carter's "make or break" energy program come to light, the magnitude of the problem, for the President and the nation, looms ever larger.

While giving the President good marks for "effort," majority opinion - among citizens and lawmakers - seems to be that of skepticism, coupled with a "give him one more chance" attitude.

Mr. Carter has proposed a program centered on conservation and finding alternate sources of energy. His problem is making it work is twofold: 1. A continued lack of confidence in his leadership, which his Sunday night and followup talks did not dispel, and 2. His "tax and spend" method of solving the energy crisis.

ON THE FIRST count, the President lapsed into his "born again" campaign rhetoric to appeal for support. At times seeming to "preach," the President made two assumptions which the people most likely won't buy.

One is that there is a crisis of confidence among Americans in their ability to "get the job done," whatever it might be. The other is that Washington is still an isolated island and that Mr. Carter as well as the people must get through to those who run the show there.

The crisis is confidence of which Mr. Carter speaks is not in the citizens' lack of faith in themselves so much as their disenchantment with the President as a leader. While admitting he has failed, Mr. Carter and those about him refuse to address themselves to the causes-bumbling inexperience at the highest levels of government, and continued interference by the bureaucracy in the everyday affairs of everyone.

AS FOR THE President's effort to "place the blame" on a Capital out of touch with the mainstream of America, where such a ploy worked for the Georgia "outsider" 2 1/2 years ago, it won't today, simply because most persons now perceive Mr. Carter as part of the Washington scene.

On the more concrete details of Mr. Carter's program, bits and pieces of the total picture are falling into place. Mr. Carter projects an outlay over the next 10 years of \$140 billion, most of which, he says, "must come from the windfall profits" tax on the U.S. oil industry.

The basic theme of the President's approach seems to be centered on "what already ails us," an emphasis on letting the government do what private industry must eventually do. His suggestion for an Energy Security Corporation and a national energy board hints of further federal encroachment into areas where too much government interference is already a major part of the problem.

THE PRESIDENT also has not addressed himself to other immediate problems-rampant, double-dig inflation and a foreign policy which has been in disarray from the day he took office.

This is not to suggest that Mr. Carter's suggestions should be rejected out of hand. On the contrary, at long last, the President recognizes he has problems, in his personal leadership, in rallying the nation. As we noted before he spoke, Congress and the American people should hear him out. But it is to say that there are alternatives to the President's proposals which also should be fully explored.

The months ahead aren't going to be easy. But, unlike the President, we have confidence the American people, and more importantly, American free enterprise can solve the problems if given the chance to do so.

(Lubbock - Avalanche Journal)

The Speaker  
Reports

by Bill Clayton

AUSTIN—During the sixty-sixth legislative session, the Committee on Environmental Affairs reviewed legislation dealing with a wide variety of subjects ranging from the quality of the air, the need for urban parks, to the problems of the salt-water fishing industry in Texas.

As a result of an interim study on the effect of the 1977 amendments to the Federal Clean Air Act on Texas, Rep. Tim Von Dohlen and Rep. Bennie Bock introduced H.B. 726. The Texas Air Control Board will study and evaluate motor vehicle inspection and maintenance, safety, and registration programs and will implement a voluntary pilot program of automobile inspection and maintenance with emphasis on Harris and contiguous counties. H.B. 726 will also amend the Texas Clean Air Act to conform with requirements of the 1977 Federal Clean Air Act.

The subcommittee on Urban Parks looked at several pieces of legislation this session which pertain to parks located near or in urban areas. H.B. 867 was passed and designated to help a specific urban area. H.B. 233 by Rep. Lance Lalor addressed the entire urban park problems. H.B. 233 is a vehicle by which Texas could participate in the Federal Urban Park and Recreation Recovery Act of

Because of the concern of the overharvesting of fish in Texas coastal waters, a variety of bills were introduced this session in regard to illegal netting in closed bays, bag limits for commercial fishermen, outlawing nets without floats, and requiring finfish to pass through a certified fish

house. S.B. 64 by Sen. Schwartz will prevent overharvesting of redfish or spotted seatrout caught during the winter from December 16 to February 28. During the winter of 1978 commercial fishermen in the Galveston Bay area caught 200,000 pounds of trout. During extremely cold winters the fish seek protection in deep water holes and are easily caught with shrimp trawls. Local game laws regarding the Uniform Wildlife

Regulatory Act were reviewed. One such bill, H.B. 2153 by Rep. Bennie Bock, will allow Comal County

Commissioners' Court to exempt the county from the uniform regulations for a year. Currently 27 other counties use this provision in the law to operate either under the general game laws or under the Parks and Wildlife Regulations from the previous year. The House approved H.B. 2153, the Senate approved H.B. 2153 and then sent it to the Governor who vetoed the

bill. The House then voted to override the Governor's veto by a vote of 90 to 42 followed by the Senate with a veto of 25 to 6. This was the first time in 41 years that a governor's veto had been overridden.

The environment of Texas has been foremost in the thinking of the Legislature for several years. The actions taken in this session continue to reflect that protective thinking is beneficial to Texas as a whole.

BROWN ON NEW DRAFT  
Defense Secretary Harold Brown has advised Congress to be wary of revising the draft because it would raise "severe social questions" and have little impact on the \$60-\$70 billion the Pentagon spends each

year on military personnel.

TRADE DEFICITS

The U.S. trade deficit, a major cause of inflation, grew substantially worse in January as Americans increased their purchases of foreign oil by \$484 million, the Commerce Department said.

DO WITH LESS

Alfred E. Kahn, the nation's chief inflation fighter, said that Americans are going to have to learn to do with less. The solution is restraint, not only on wages and prices but also on the American expectation that things always must get bigger and better.

1978. This legislation, creates a Texas Local Parks, Recreation and Open Space Fund supported by two cents per pack of existing state cigarette tax. No new or increased taxes are required. The fund is used for matching federal funds and rehabilitation and recovery grants for local parks, acquisition and development of state parks in urban areas and provides matching grants of one half of the cost of new local parks.

**4-HERS ATTEND CAMP** -- Bailey County 4-Hers and leaders are enjoying the high country this week while attending the 4-H Electric Camp, sponsored by Southwestern Service Company, located in the Sacramento Mountains, 28 miles southeast of Cloudcroft, N.M. Those from Bailey County are, front row, left to right: Jimmy Gleason, Della Shaw and Kelly Harrison. Back row, left to right: Tamara Gilliland, Tori Hunt and Jacinda Gleason. The Southwestern instructor is Bill Harr from Lubbock.

### Shop July For Sale Items

Christmas in July? Yes, if you want a "fight-inflation" plan for holiday gift giving, says Nancy Granovsky, a family resource management specialist. Start shopping for "sale items now and you can beat inflation, she says. Mrs. Granovsky is with the Texas Agricultural Extension Service, The Texas A&M University System. First, make a list of people you want to remember with gifts at Christmas. Then save some of those hot summer days for studying ads and shopping. Many stores have "clearance sales" after the Fourth of July and

other sales in August and more sales in the fall-to make room for fall and winter merchandise. You can save substantial amounts of money if you

shop carefully, but "careful shopping" is the key, Mrs. Granovsky stresses. Remember that sale items are usually "final"--with no exchange or refund privileges. Be sure you have the

right size and color, and make sure there are no defects in the merchandise, she cautions.

\*\*\*\*  
If we must have economy we can always save money on defense items and let the communists take over the country.

### Layette Shower Feted For Mrs. Newton, William Robert

Mrs. Steve Newton and son, William Robert of Enochs were feted with a layette shower Sunday, 2 to 5 p.m. at the fellowship hall of the Methodist Church. The serving table was covered with a linen cloth. A basket of yellow and white daisies with a doll accent centered the table. Mrs. Bobbie Adams made

the arrangement. Refreshments of yellow punch, cookies and nuts were served.

The hostess gift was a porta crib and bed.

Special guests included Mrs. Newton's sister-in-law, Mrs. Grady Casey of Oklahoma City, Okla., Mrs. Ray Caddo of Dimmitt and Mr. and Mrs. Benny Frey of Levelland. Hostesses for the occasion were Mrs. Bobbie Adams, Mrs. A.M. McBee, Mrs. Jim Richardson, Mrs. Bob Adams, Mrs. D.M. McBee, Mrs. John Fred, Mrs. Donnie Baker, Mrs. John Gunter, Mrs. A.P. Fred and Mrs. Zed Robinson.

### Gift Showers Held For Jim Allison

Saturday, July 14, the Pleasant Valley Community combined a weiner roast, ice cream family night with a gift shower for Jim and Nancy Allison to help compensate for their complete loss of belongings caused from a fire the night of July 4.

A money tree, decorated with butterflies, accented the table which held the gifts of linens, canned foods and miscellaneous items, including a set of pottery like the set the couple had received in their wedding shower about six months previously.

About 60 persons attended the event.

### Hobbyists Displayed Articles

Items displayed by the Muleshoe Hobby Club were, a resin arrow, keys and pencil holder, potted Boston fern, fake fur owl and frustrated pencil, yarn mops, set of antique butter dishes, wooden plaque

### Joe Leo Orozco Jr.

Mr. and Mrs. Joe Orozco of Earth are the proud parents of a new baby boy born July 15 at 9:42 a.m. in the West Plains Medical Center. Joe Leo Orozco Jr. weighed eight pounds and two ounces. He has one sister, Diane, age three. Grandparents are Maria A. Orozco of Morton and Mr. and Mrs. Carlos Delgado of Levelland.

### Seth Philip Gray

Seth Philip was born to Mr. and Mrs. Robin Gray of Muleshoe on July 17 at 5:22 p.m. in the West Plains Medical Center. He weighed eight pounds and one ounce. He is the couple's first child. Grandparents are Mr. and Mrs. P.E. Shanahan of New Mexico. Great grandparents are Mr. and Mrs. Seth B Gray of Las Vegas N.M.

with pheasant feather owl, egg beater net, pin cushion, crochet and tatted thread patterns, framed flower arrangement in cruel embroidery.

Ruth Bass won the hostess gift which was a candle and candleholder made of curled tin cans.

Members present for the July 19 meeting were Ola Epperly, Opal Ribison, Allie Barbour, Levina Pitts, Ethel Julien, Myrtle Chambliss, Mabel Caldwell, Vickie Hendricks, Hallie Briscoe, Verna Dement, Gertie Kirk, Ruth Bass and the hostess, Fiddle Shafer. The hostess served refreshments of coffee, tea and cokes.

Mabel Caldwell will host the first meeting in August.

### TOPS Has Weekly Meeting

Evelyn Moore was crowned the weekly TOPS Queen along with Clara Crane, first runner up and Ann Vinson, second runner up.

Clara Lou Jones, Leader, called the club to order on Thursday, July 19 at 6 p.m. in the Community Room of Bailey County Electric. The roll call was given by Evelyn Harris with 21 members weighing in. Members sang the TOPS Song and recited the pledge.

Sue Murphy and Evelyn Moore received material for three weeks consecutive weight loss. Lorene Whittenburg celebrated her birthday. The meeting was dismissed with the Goodnight Song.

### Wenona Gibson Brought Program For Home Club

Wenona Gibson brought the program on crafts at the Progressive Home's Club meeting in the home of Roxie Hoover. Seven members answered roll call with household hints and Vera Engleking read a poem entitled "He Maketh No Mistake". Wenona Gibson drew the hostess gift.

Refreshments were served to Zida Mae Black, Naoma Black, Vera Engleking, Lucille Harper, Norene Thomas and Wenona Gibson by Roxie Hoover.

The next meeting will be August 15 in the home of Lucille Harper.

\*\*\*\*  
A question which defies an intelligent answer is: How are things in Washington?

**AUGUST VOWS PLANNED--** Mr. and Mrs. Carl Houston wish to announce the engagement and approaching marriage of their daughter, Rhonda Lynn to JDan Sudderth, son of Mr. and Mrs. J.B. Sudderth of Farwell. The couple will marry August 17 in the First Baptist Church of Farwell.

### Welcome To Muleshoe

Mr. & Mrs. Steve Thrasher and Chris

We extend a warm welcome to Mr. & Mrs. Steve Thrasher to our fine town of Muleshoe. They have recently moved from Lubbock.

Steve is associated with the C.R. Anthony Co. and is now manager of our local Anthony's. Jamey will be teaching at Muleshoe High School in the English Dept.

They are both graduates of Texas Tech, attending high school in Andrews, Tex. Steve majored in business and marketing. Jamey majored in English and education.

Mrs. Thrasher enjoys writing and reading poetry, collecting antiques and also has a collection of dolls. Steve relaxes by water skiing and fishing. Chris is their 14 month old son and seems to enjoy just being a part of the family.

**READING ACHIEVEMENTS** - The awards ceremony was held Wednesday morning at the Muleshoe Area Public Library to conclude the 1979 Summer Reading Program. Children from the second grade and up received prizes, ribbons, pins or certificates for the number of books read. Pictured from left to right are, front row, Julian Chavez, third place; and Ruben Alfaro, first place; back row, Lisa Noble, first place, Lisa Bizzell, third place; Krystal Derrick, second place and Kim Fried, second place.

### Japanese, Texas To Exchange Visits

Japan and Texas will join hands this summer in a 4-H youth exchange program. Texas families will be hosting 149 Japanese youth for a month while two Texas youth travel to Japan. The youth will be participating in the 4-H LABO International Exchange Foundation program. The Japanese youth will be arriving in Texas July 22, and the Texas 4-H'ers will be departing the same day.

Texas youth who will be staying with LABO host families will be Keith Stephens of Ingram (Kerr County) and Timothy Butler of Barry (Navarro County). Dr. John Pelham, state 4-H and youth leader with the Texas Agricultural Extension Service, Texas A&M University System, said the foundation has sent several thousand Japanese youth to the

United States, primarily in the western states, over the past several years while numerous 4-H'ers from the states have traveled to Japan as part of the reciprocal program. "The purpose of the LABO Foundation program is for young people to learn another language and become familiar with another culture firsthand," said Pelham. "Texas is participating in the program for the second year. Last summer 68 Japanese youth visited our state. Texas is among some 18 states that will host about 1,700 young people this summer and fall."

The youth, between the ages of 12 and 18, will be accompanied by eight adult tutor-chaperones. All the Japanese exchange delegation members will live with Texas 4-H host families who have requested a visitor. The exchange program is designed to have the visiting young people live like one of the daughters or sons of the particular host family. Host families this year reside in Districts 1, 2, 4, 8, 9, 10, 12 and 13 of the Extension Service.

In addition to Japan and the United States, Korea and Canada participate in the LABO International Exchange Foundation program. The private non-profit, educational organization began in 1972. To date more than 8,000 people have participated in the program.

### Awards Ceremony Concludes '79 Reading Program

The Muleshoe Area Public Library Summer Reading Program has come to a close with Lisa Noble winning a treasure chest for first place in the second to third grade age group. She read a total of 182 books this summer. Her runners up Krystal Derrick, second for a total of 140 books and Julian Chavez, third with a total of 128 books. Books were presented to them for their achievements.

Those receiving honorable mentions were Kendra Wilson, 118 books; Susan Redwine, 103 books; David Rejino, 107 books; DeAnn Bizzell, 100 books; Kimberly Harris, 97 books; Mia Jennings, 96 books; Phoebe Green, 60 books; Amy Montgomer, 54 books;

Misty Taylor, 51 books and Bernie Valdez, 50 books. Prizes were awarded by Librarian Anne Camp as follows: 100 books, a gold pin; 75 books, gold ribbon; 50 books, silver pin; 25 books, red ribbon and 12 to 25, certificate.

In the fourth and fifth grade age group, Ruben Alfaro received a doggie bank for first place. He read a total of 122 books. Second place winner was Lyle Burk who read 105 books. Lisa Bizzell read 100 books for third place. Honorable mentions were received by Kristi Taylor, 79; Sue Haire, 75; Dianne Smith, 74; Christa Stanton, 50 and Annette Cruz, 50.

Winners for sixth grade and up were Robin Short, first place with 75 books;

Kim Fried, second place with 70 books and Ramon Valdez, third place with twenty-five books.

Those receiving certificates for their reading achievements second to third grade, Jennifer Guinn, 30; Nancy Ann Garcia, 29; Becky Black, 28; Brenda Roberson, 26; Jami Rogers, 25; Tracy Collum, 25; Leesa Frame, 25; Carol Copley, 25; Rhonda Perez, 25; Holly Huckaby, 25; Michelle Taylor, 23; Jonessa Jennings, 23; Rebecca Frame, 21; Michael

Kiggins, 21; Tina Parham, 19; Oscar Alfaro, 18; Michele Kiggins, 16; Jimmy Seales, 15; Betsy Seales, 14; Lucy Jaramillo, 13; Melanie Truelove, 12; Shonda Strahan, 12; Christy Pena, 12; Michelle Clayton, 12; Junior Olivarez, 12; Brandee Gallegos, 12; Salvador Olivarez, 12; Mychelle Stout, 12; Julie Crittenden, 12; Matthew Madrid, 12 and Ana Mendoza, 12.

In the fourth and fifth age division, those receiving certificates were, Daina

Groom, 33; Tiffany Parham, 31; Francisco Ybarra, 22; Robert McCormick, 12; Andy Olivarez, 12; Melissa Burnett, 12; Jerry Mendoza, 12; Chantel Robison, 12; Lisa Hamilton, 12; Zanna Huckaby, 12 and Sandy Reyna, 12. Chuck Bartholf won a horse and colt figurine in a drawing which concluded the reading program.

Lacy scarfs continue to be very popular and they are quite expensive. The thrifty Miss can crochet scarfs in many colors to match outfits. Pattern directions are available.

## Rodeo...

Cont from Page 1

7,909 and third were Ken Smith and Sid Price of Earth, with a time of 8.838. Sid Price and Sterling Price also had a time of 12.407.

Also winners without question were the bulls. Of the fourteen riders, who barely managed to get out of the chutes aboard their fierce carriers, only one completed the ride. He was Ivan Thompson of Amarillo, who scored a 53 for the opening go-round of bull riding.

The rodeo was to conclude Saturday night with a performance at 9 p.m. there was also the mid-performance at 9 p.m. on Friday.

In pre-rodeo ceremonies, Outgoing rodeo queen Carrie Been, crowned the new queen in arena ceremonies. She is Leesa Templeton, 16 year old daughter of Mr. and Mrs. Gene Templeton. First runner-up was Vonda Stephens, 14, daughter of Mr. and Mrs. Gaylon Stephens; second runner up was Karla Taylor, 16,

daughter of Mr. and Mrs. Robert Taylor and Miss Personality was Kim Spencer 13. Others in the contest were Michelle McCarty and Cheryl Clayton.

A pre-teen square dance group from Muleshoe, the Merry Mixers, entertained in the arena prior to the rodeo and the High Plains Jumpers, a group of parachutists from the area, including Don and Freddie Locker of Muleshoe, jumped. Momentary confusion occurred when one parachute plummeted to the ground from a great height. However, it was a parachute that failed to open and the jumper utilized his auxiliary chute for the descent.

## Energy...

Cont from Page 1

ominous ring. It would mean a cycle of no roads, stagnation of the economy, fewer jobs and more inflation. The proposal is like an ostrich sticking its head into the sand. We cannot possibly restrict imports to the 1977 level without increasing our domestic production through specific programs."

"Conservation will not solve our problem, Gov. Clements said. "We must move forward with programs to produce more energy. We're the land of opportunity and we will continue to meet the future as we go to work toward this goal."

Gov. Clements also said, "The President failed to mention nuclear power in his speech. Nuclear energy is obviously a piece of the picture. The President skipped it entirely because it is politically sensitive. That is not the kind of leadership the nation needs."

On Monday afternoon, Senator Kent Hance called the Journal from his office in Washington, and made the following statement concerning the President's proposed plan, "The Energy Mobilization Board plan, if it is drawn up properly, will work. If it is drawn up properly, then I will be a strong supporter, because it will cut red tape and bureaucracy such as has held up the pipeline from the west coast to Midland, and attempting to bring oil from Alaska, and also the northern tier pipeline to take oil from the northwest Pacific down the Pacific to Chicago."

"OSHA and other agencies have requested so many permits, and have held up the pipelines for years. As a result, they have successfully held up completion and operation of the pipelines."

"I have doubts on the energy security fund," he added. "Because it will cost approximately \$140 billion, and Congress is trying for a balanced budget, I have reservations because deficit spending has hurt us."

"Most things, like synthetic fuels, proposed by the President, will only supply long range answers," he concluded. "The short time answer is full scale and increased production of the oil and gas we already have in this nation."

Although Senator John Tower said his office has not received the full plan for energy conservation and production as proposed by the President, he said from Washington Thursday morning, "The President himself, said that American people are looking for honest answers, not easy answers. Yet, He obviously has turned to something he thinks is easy by setting up private industry as the scapegoat. "Blaming the oil industry for the problems created by his own administration is a cop-out. He is trying to make up for the failure of the administration by more government intervention in an industry, that for years, has produced a lot of cheap energy for the

## TIPRO...

Cont from Page 1

gasoline lines can be expected to be longer if his plan prevails. If we insist on penalizing the domestic oil industry with new taxes and controls, we almost certainly will experience rationing with all its regimentation, and even possibly a very deep recession."

"By taxing oil and gas producers to provide revenue for other purposes, the President is delaying the day when the industry can make its maximum contribution to the well being of this nation. If more taxes are necessary from oil and gas, they should be levied at points of consumption, not production. Consumers pay the tax regardless of where it's placed. By taxing producers, the President is simply compelling consumers to pay higher prices without getting any benefits in the form of increased oil supplies."

nation. Most of the problem in industry are directly traceable to government intervention. He continued, "Regarding the \$140 billion pricetag that the President put on the fight for energy security, all federal funds would come from a permanent windfall profits tax." Tower said it appears the President wants to require the oil companies to finance the nationalization of the oil industry in this country.

"We do not yet know what a windfall profit is, but apparently the President is willing to pose any punitive tax necessary to finance his scheme for fuel development," added Sen. Tower.

On import quotas, the senator said, "You can't set quotas without some assurance of a domestic production. It is tantamount to shrinking the economy and retarding economic growth. Tower said he would wait for the specifics of the administration's proposal, but said it was apparent from the information thusfar, "Virtually every action recommended by the President amounts to unconscionable intervention to private industry, economy and the government of this country."

## Alcohol...

Cont from Page 1

Muleshoe for the formative stages of a cooperative here.

A temporary board, with Guy Austin as president, has been formed, and farmer sign-ups are underway here. Roy Whitt, at Whitt Chevrolet, has been named secretary, and reports that local sign-ups of farmers to construct a plant near here, is approximately 20 percent complete at this time.

GPI Inc. is an organization of grain farmers who have conducted research into the economics and marketing of alcohol fuel and related products, it was explained. The purpose of the organization is to assist farmers in producing and marketing their products. According to Ron Wood, "This is a real opportunity for farmers through their cooperatives to produce fuel as well as food. If the farmers do not do it, some of the corporate giants will."

The gasohol concept is not a new one, but has become feasible with recent increases in the cost of oil imports.

In the past two years, the refining systems for this source of fuel have been developed which process the grain into alcohol with a yield of fuel far in excess of the fuel consumed in the process, it was explained. The mixture of 10 percent alcohol and 90 percent gasoline, regular or unleaded with the fuel alcohol, will fuel any car which normally operates on regular gasoline or unleaded gasoline.

The fuel alcohol manufacturers say it does not require any modification of the automobile and thus can be readily marketed.

REV. ISRAEL LEON

## Revival...

Cont from Page 1

preaches in bullrings, stadiums, civic centers and revival tents.

"He has been in the ministry all these years and is an ordained minister. He works in the Charismatic Movement and also is a minister of the Full Gospel Men's Fellowship."

"God spoke to Rev. Leon to come to Muleshoe to be a blessing to everyone, and we want to welcome everyone to the meetings."

## Red Meat Supply Steady to Lower But Still Adequate

AUSTIN—Predictions that red meat supplies will level off or decline in 1979 appear to be on target, Agriculture Commissioner Reagan V. Brown said recently, judging from the first two months of the year.

"Commercial red meat production in the state dropped by some 21 million pounds during January and February from the same period last year," Brown commented. "The largest decreases have come in the areas of cattle and calf slaughter, due to sharply reduced herds in Texas and other cattle-producing areas."

## Panhandle Antelope Population Stable

CANYON-- The antelope herds are monitored each year by personnel of the Texas Parks and Wildlife Department and a recent aerial count in the Texas Panhandle found the herd population up a little from 1978.

"Antelope are open-country animals which makes them easier to count from the air and we tallied 2,256 animals on a recent aerial survey in the Panhandle," said David Dvorak, project wildlife biologist.

"The P-WD will probably issue the same number of antelope permits to the are

landowners as were issued last year which was 353," Dvorak continued.

The wildlife biologist noted that the traditional antelope range observed during the survey was in excellent condition with plenty of forb plants available to the animals.

The survey crew also counted 142 coyotes while flying the ranechs which is a marked increase over last year's count of the predators.

The 1979 antelope season for the Panhandle, Permian Basin, and Trans-Pecos regions has been set for Sept. 27-Oct. 7.

MULESHOE, TEXAS 79347

Three phase power supplied to a center pivot from the power company is generally of two basic types grounded and wye. If the supply is the grounded type, it is imperative the grounded leg be bused or jumped to provide a grounded source to the meter pole. A wye power supply is much preferred in its safety to the operator because it only produces 277 volts compared to ground. It always requires three fuses and a fourth grounding electrode. Adequate wire sizing and a conscientious power company should always provide sufficient voltage to the machine. In addition to protecting the machine, fused disconnects should be installed at both ends and an underground wire installation to forestall power loss due to an underground fault. Adequately fused, these disconnects will open should a short occur preventing bleedoff to ground.

## Wheat Residue Used To Stop Soil Erosion

### Soil Conservationist

Did you know that wheat residues protect the soil surface from wind and water erosion, affect soil temperature, provide cover and food for wildlife, and protect young seedlings from the effects of blowing sand?

Yes, the modest wheat residues can take the credit for doing all of these.

The wheat residues provide a protective cover on the soil surface to deter wind and water erosion. The residues provide a 'buffer zone' on the soil surface which keeps the forces of the wind from

eroding the soil particles and causing soil movement on the surface.

Residues act like a cushion in stopping the force of the falling raindrop, the initial step in water erosion, from breaking down the stable soil particles. Soil crusting is deterred and water infiltration is enhanced. Also, the residues on the surface help to retain soil moisture.

Soil temperature is affected by the residue cover. On a hot day, the temperature under the residue will be several degrees cooler than the surrounding bare ground. When the following years wheat crop is

planted into the existing residues through minimum tillage operations, the residues provide protection for the seedlings from the damage caused by flowing sand particles.

The farmer, through good residue management, can reap the benefits. However, he is not the only one. Wildlife can also benefit. The wheat residues provide part of the habitat for such wildlife as dove and quail. The cover provided as well as the food source from waste grain are a part of the habitat needed for

wildlife.

In preparing your wheat-land for next years crop, consider using this years wheat residue to its maximum use controlling erosion, conserving rainfall and providing a habitat for wildlife.

This information is provided by the Soil Conservation Service at 111 East Avenue D in Muleshoe, working with the Blackwater Valley Soil and Water Conservation District. Assistance is provided to all landusers. Remember to think conservation and support the Blackwater SWCD.

## Grasshoppers Plague All Of Western Texas

Hordes of grasshoppers are stripping rangelands in the Texas Panhandle and have their sights on pastures, ranges and crops to the south and east.

Some 1.5 million acres of rangeland have already been treated or will be treated shortly in the Texas Panhandle, report Dr. Mike McWhorter and Dr. Phil Hamman, entomologists with the Texas Agricultural Extension Service, Texas A&M University System. Counties in the spray area have a grasshopper count ranging from 32 to 54 per square yard. A count of eight adult grasshoppers per square yard is considered serious enough for control measures.

According to McWhorter and Hamman, the spray program for rangeland involves use of the insecticide malathion and is being conducted on a cost-share basis with ranchers, the Texas Department of Agriculture, and the Animal and Plant Health Inspection Service of the U.S. Department of Agriculture. Spray applications are made after grasshoppers hatch and before females start laying eggs.

The entomologists encourage farmers and ranchers as well as homeowners to check for grasshopper infestations along roadsides, fence rows or idle, undisturbed ground where the pests may be hatching. A key to

effectively suppressing grasshopper numbers is to treat these hatching areas early before young hoppers begin to migrate.

A bait mixture using toxaphene has been effective in controlling grasshoppers along field margins and roadsides, point out McWhorter and Hamman. The formulation calls for 100 pounds of mill-run bran, 1-1/3 pints of Toxaphene 6E, 7 to 8 gallons of water, and 2 gallons of blackstrap molasses. Sawdust may be substituted for up to 3/4 of the amount of bran. Distribute the bait while still moist at 10 to 20 pounds per acre.

Another product, Hi-Plains Border Bait, is a ready-to-use formulation that is registered in Texas but currently has no distributorship.

To prevent extensive grasshopper damage to crops and home gardens, McWhorter and Hamman recommend the following insecticides:

Cotton-Malathion EC or ULV and Sevin 80S; Corn-Alfatox EC, Diazinon AG 500, Malathion EC or ULV, Sevimol 4, Sevin 80S, Sevin 50 WP and Sevin 4 Oil; Sorghum-Malathion ULV\* Sevimol 4 Sevin 80S and Sevin 50 WP; Wheat and Other Small Grains-Malathion EC or ULV, Pennac-M, Sevimol 4 and Sevin 4 Oil;

## The Sandhills Philosopher

editors note: The Sandhills Philosopher on his Johnson grass farm on Sandy Creek talks around the energy problem this week.

Dear editor:

When you're surrounded by something like the energy shortage and can't figure out how to talk your way out of it, a sensible scientist or Congressman or columnist will turn his attention to something else.

For example, woodpeckers.

Scientists have been studying woodpeckers and are bewildered by the birds' ability to pound away with machine-gun rapidity at a telephone pole without suffering brain damage.

Using high-speed film they photographed one in action and report his beak hits the wood with an impact speed of 1,300

miles per hour. This, they say, means his head then snaps back with a force 1,000 times the force of gravity. A car, they point out, hitting a brick wall at 35 miles per hour hits with a force of 10 times that of gravity.

How, the scientists wonder, can a woodpecker's head sustain a blow 100 times that of a car

Why is it that people who can't speak, speak--and are invited to speak?

smashing into a brick wall without suffering brain damage?

This doesn't bumfuzzle me. Any creature trying to get something to eat by drilling a hole in a telephone pole with its beak already has brain

damage. Probably born with it.

Changing the subject, how many kids do you suppose will tell their teachers next fall they were late for school be-

cause their bus had to wait in line to get gas?

Have you stopped to think that if the estimated 50 million people owning

power lawnmowers would shut them down and let their grass grow, we'd save at least 500 million gallons of gasoline this

summer and produce enough hay to feed 300 thousand cows next winter? I'd accept a few hundred bales if it's delivered.

Yours faithfully,  
J.A.

## Home Landscaping Can Benefit From Attractive Native Plants

By Robert L. Haney  
TAES Science Writer

Homeowners in Texas, and others interested in landscaping, may be missing a good bet if they fail to include use of plants that are "native Texans."

The merit of this idea will be readily understood by anyone who has nursed a prize rose or a choice camellia through a searing summer or a bone-freezing winter.

Hardy native plants that have been selected by thousands of generations to withstand our extremes of climate can thrive in conditions that cause many newcomers to wilt and die.

Major obstacles to the use of these plants have been their unavailability in the nursery trade and public unawareness of their value.

Use of native Texas plants in landscaping has vast potential. Very little breeding work has been done on even the most promising native plants, and there is little information on adaptability

and cultural requirements.

Scientists with Texas A&M University and the Texas Agricultural Experiment Station (TAES) are advocating expanded use of plants they call "native Texans."

Texas has over 5300 species of plants which include about 300 trees and an equal number of woody shrubs.

It's estimated that somewhere between 300 and 450 of these could be used as ornamental plants.

To widen the base of native plants that might be of value to Texas nurseries and homeowners, preliminary screening was started in 1973 at the Texas Agricultural Experiment Station at Dallas.

"We first selected plants for their ornamental desirability," according to Station Research Scientist, Benny J. Simpson.

"If needed, reproduction methods were explored and

then the plant was field tested for adaptability and resistance to insects and diseases."

Simpson says that examples of native plants already widely offered in the nursery trade are live oak, red oak, southern magnolia,

flowering dogwood, bald cypress, cedar elm, American elm, pecan, sweet gum, red maple, Arizona cypress, yaupon holly, and cenizo.

Less often found are willow oak, white oak, laurel oak, mesquite, Texas mountain laurel, desert willow, American holly, black gum, anqua, wild olive, Texas ebony, and sweet bay magnolia.

Hundreds of native plants are being tested at the Experiment Station in Dallas. Some of them are:

The Board of Directors of Lubbock-based Plains Cotton Growers, Inc. July 11 adopted a 1979-80 fiscal year budget of \$245,650, elected one new member and re-elected five members to its Executive Committee and appointed five new members to the board from counties where directors had either resigned, moved from the area or become inactive.

In addition members of the 50-man board discussed PCG legislative and regulatory activities and heard a report on a trade mission to the Far East by PCG Executive Vice President Donald Johnson.

The new budget, only \$1,900 above the \$243,750 budgeted for 1978-79, authorizes major expenditures for agricultural and utilization research projects, export and domestic market development, legislative activities, publications and area and international advertising.

PCG has one elected member on its Executive Committee from each of six districts. The newly elected member of the committee, chosen to represent producers in District 2 (Bailey, Cochran, and Hockley Counties) is Claude Nowell of Morton, replacing Lloyd Miller, also of Morton, a long-time PCG Director who chose not to stand for re-election to the board in the 1979 Cochran County election.

Re-elected to the committee were: District 1 (Deaf Smith, Parmer, Castro, Swisher and Briscoe), W.L. Edelman of Friona; District 3 (Lamb, Hale, Floyd and Motley), Kenneth Wofford of Lockney; District 4 (Lubbock, Crosby and Dickens), Tommy Fondren of Lorenzo; District 5 (Yoakum, Terry, Lynn and Garza), Gerald Caswell of Brownfield, and District 6 (Gaines, Dawson, Borden, Martin, Howard and Midland), Frank Jones of Lamesa.

Appointed to fill the vacancies on the board were Leroy Bodkins and Marvin Payne, both of Hereford in Deaf Smith County; Joe M. Thacker of Roaring Springs in Motley County and Riley Harris and James Davis, both of Silverton in Briscoe County.

Legislative discussion centered around ongoing efforts in Washington to develop and pass a bill which would phase out the current disaster program in favor of an expanded and improved all-risk Federal crop insurance program. PCG is working to get the disaster program extended for as long as possible, at least until the proposed crop insurance program has been proven an acceptable alternative.

On a controversial "failure to certify" rule in farm program regulations, Johnson told the board "We have nothing in writing but we now have reason to believe that the most onerous effects of the rule can be avoided."

The regulation in question, if enforced to the letter, would make hundreds of High Plains farm operators and landlords ineligible for farm program benefits for reasons completely beyond their control.

Oaks: Of Texas' 43 species and 2 varieties of oaks, the following seem to have the best potential for the western two-thirds of Texas: the Lacey, Mexican blue, Hinckley, Gray, Emory, Coahuila scrub, Tonney, shrub live, netleaf, sandpaper, Vasey, silverleaf, graceful, and Chisos red oak.

Maples: Bigtooth, southwestern bigtooth, Uvalde bigtooth, eastern sugar, southern sugar, and chalk maple can be widely grown in Texas. Except for red maples, the Texas maples seem to do well on varied soils.

Needle evergreens: Ponderosa, Mexican pinyon, remote Mexican pinyon, Colorado pinyon, and southwestern white pine along with the blue Douglas-fir have merit for the High Plains and the high country of the TransPecos.

Texas Madrone and

Chisos Rosewood are premier evergreens for Dallas-Austin-San Antonio and further west.

Cenizos: Texas has three species of this evergreen shrub, the Texas silverleaf, Big Bend silverleaf, and violet silverleaf.

Salvia: At least four of the shrubby, woody salvias have desirability as landscape plants.

Because of Dallas' soil and climate the plants on test are mostly of western origin and best suited to use west of Interstate Highway 35.

Native plants suited to East Texas also deserve the same care and concern presently being expended on western plants but at present have no comparable facility.

A start has been made on the horticulture farm at Texas A&M. Dr. Ed McWilliams, horticulturist with A&M and the Agricultural

Experiment Station, says he has red maple, fardale, Texas pistache, blackberries, plum, Carolina buckthorn, Mexican buckeye, and several oak species growing there.

In addition, McWilliams has worked closely with the Brazos County Arboretum, founded in 1976, which contains many native plants. More will be added in the future and their growth observed by McWilliams and other Station scientists.

Readers who are interested in the use of native ornamental plants in their landscapes or who have ideas and suggestions concerning the potential of natives versus exotics are encouraged to correspond

with Dr. Ed McWilliams, Department of Horticultural Sciences, Texas A&M University, College Station, TX. 77843.

Be on Lookout for So-called Bargain Stolen Herbicides

AUSTIN--So-called "bargain" herbicides may really be stolen goods, warns Agriculture Commissioner Reagan V. Brown.

Brown said thefts of herbicides are up this year in Texas and asked farmers to buy the weed killers from reputable dealers only.

Though some herbicides are sold for \$6-\$10 a gallon, those used on row crops range from \$20-\$70 a gallon.

"Farmers may find a bargain," said the Commissioner, "but may not get the product they think they are buying. Anyone who steals is also likely to water the

product or contaminate it in some way. The only way you can be sure of getting what you pay for is to buy from a reliable dealer."

## Official Chili Cookoff To Be Held At Reese AFB

West Texas chili cooks will have a chance on

**View From  
The Plains**  
by J.D. Peer  
LIFE Field Officer

The next Texas game warden academy will be held in Austin beginning in October and persons interested in this outdoor career opportunity should apply by July 31, 1979.

Application forms may be obtained at the Texas Parks and Wildlife Department's offices in Abilene, Amarillo, Lubbock, Midland, and Wichita Falls, or write the P&WD, 4200 Smith School Road, Austin, Texas 78744.

Game warden applicants are required to have graduated from an accredited senior high school and the applicant must be at least 21 years of age and possess good health and vision.

The P&WD's game warden training program will encompass 1,000 hours of study and training in fish and game laws and identification, Texas Penal Code, defensive driving, wildlife habitat study, civil defense, hunter and water safety, and self defense.

Upon successfully completing the training program 4½ months later, the officers will be assigned duty stations across the state.

The new wardens will then perform work involving the enforcement of all game and fish laws, Texas Water Safety Act, water pollution laws, and sand, shell, and gravel laws within an assigned area.

All P&WD game wardens maintain a 24-hour on-call status which means they may leave home before sunup and not return till late at night. Many game and fish violations occur at night and to stop this type of thief, the game warden will work at night during these peak violation periods.

The P&WD is an equal opportunity employer and hopes all persons interested in a game warden career will apply in July.

Saturday, August 4, 1979 to prove their chili-know-how and possibly earn points towards qualifying for the World Championship Chili Cookoff at Arriba Terlingua, Texas. The occasion will be an open chili cookoff at Reese Air Force Base, Texas during the base's two day Open House, August 4th and 5th. The day's activity begins at 10 a.m. and will end at 6 p.m. Judging will last from 4 to 6 p.m.

The cookoff will be conducted in accordance with official chili cookoff rules using the Frank X. Tolbert Super and Secret Judging System.

Entrants in the Reese cookoff will be awarded points toward qualification for the Arriba Terlingua Championship on the basis of three points for first place, two points for second, and one for third. It takes six points accumulated at Chili Appreciation Society International (CASI) sanctioned cookoffs to earn a spot at Terlingua.

All chili must be cooked from scratch on site the day of the cookoff. Regular commercial chili powder is permissible, but complete commercial chili mixes are not permitted. As the cookoff will be held on a paved area, there will be no open fires. Entrants are asked to bring their own burners, Coleman stoves, or barbecue pits.

Chili will be judged by taking all criteria, such as aroma, color, taste and consistency into consideration.

In addition to the chili judging for CASI points there will be awards for chili showmanship. Showmanship will be judged on theme, costume, booth setup, action, and audience participation. The judging will be continuous throughout the cookoff by anonymous person.

Winners will accumulate points towards the chili showmanship division of the World Championship Chili Cookoff. The top military winner will advance to the Air Force-wide Chili Cookoff at Goodfellow AFB in San Angelo, Texas. The winners of that contest will go on to Terlingua. Other

events during the cookoff will include a hot chili pepper eating contest and a moseying contest.

Cookoff and showmanship winners will receive trophies. To enter the cookoff write 1st Lt. Tony Nunez, Box 8727, Reese AFB, Texas 79489, or call Lt. Nunez at 885-4551, Ext. 504 or 885-3487. There will be a \$15 entry fee.

An Ol' Fiddlers' contest will take place between 2 and 4 p.m. near the cookoff.

This year's Reese Open House will run Saturday and Sunday, August 4 and 5, 1979. It will be celebrating the 30th Anniversary of Reese AFB as an active U.S. Air Force Base. The U.S. Air Force Thunderbirds Aerial Demonstration Team will be the featured attraction of Sunday's activities when they perform from 3 to 4:15 p.m.

For more information on the Reese AFB Open House, please contact Bill Tynan at 806-885-3410 or 3236.

## Anti-Busing Amendment Passes House

An anti-busing amendment, sponsored by Congressman Jim Collins of Texas, passed the House by a 209-190 vote. Collins said "forced busing is wasting gasoline and decreases educational standards for all our students."

The Collins Amendment was attached to the Justice Appropriations Bill. "Congress had stopped HEW from using any of its funds to mandate forced busing, however HEW has

managed to continue its busing plans by simply referring all its cases to the Justice Department.

"My amendment has closed the loophole these two agencies have used to continue their policy of forced busing when it was clearly against the intent of Congress," Collins said.

According to a study done by Collins of nine major metropolitan areas, busing for the purpose of achieving racial balance accounts for 63% of all the fuel used in transporting public school children.

"The average student bused travels 144 miles per year, but many of the school district transportation directors we spoke to admitted that students are often sent 40 miles per day to schools participating in cross-city, cross-county busing plans," Collins said.

The Texas congressman also noted that 80% of the school buses currently in use are less efficient gasoline users. He noted that only the newest programs have the more

efficient diesel equipment. "People all around the country are raising their opposition to court-ordered busing. Massachusetts has approved by a 3-to-1 margin an anti-busing measure that would prohibit assignment of children to a school on the basis of race. In the State of Washington, the voters approved by a two-thirds margin a ban on the compulsory transfer of pupils to any school but the school nearest the pupils' homes," Collins said.

The Collins Amendment does not effect the handicapped, disabled, gifted, talented, or rural school children. The Justice Department Appropriations Bill will not go to the Senate.

There are many different kinds of bath soap--clear, castile, cocoa-butter, fruit, deodorant and more, a clothing specialist says. Use one that doesn't dry your skin--and remember to rinse thoroughly, advises Nancy Brown with the Texas Agricultural Extension Service, The Texas A&M University System.

## Made-To-Order Hybrid Cotton To Soon Be Here

Higher-yielding cotton plants that can be genetically engineered to provide the desired fiber length, strength, and micronaire, as well as disease and insect resistance, are just around the corner for cotton producers.

That is the word from several researchers who have been striving to develop hybrid cottons.

"In the next five years, commercialization of hybrid cotton will expand to where it is a common product in the marketplace," comments Dr. Wolfgang Wessling, director of genetics and breeding research for Cotton Incorporated.

Cotton Incorporated since the mid-1970s has been funding research on hybrid cotton with Dr. Dick Davis of New Mexico State University in Las Cruces and with Dr. J.B. Weaver at the University of Georgia.

Cotton Incorporated is the fiber company of American cotton producers. Supported by producers' per bale assessments, it works for each producer through programs of research and marketing.

The biggest obstacle in developing hybrid seed that could be commercialized has now been overcome, says Wessling. That obstacle was developing fertility restorer lines that are necessary for seed breeders to assure complete fertilization in the hybridization process. The restorer lines provide the trait that assures adequate pollen production in the hybrid plants, Wessling explains.

New Mexico State University has turned over

to five commercial seed breeders seed of one restorer plus the A and B seed lines necessary for the breeders to develop commercial hybrid cottons.

"With the hybrid seed, we will eventually be able to find the parent plants that can give us a wide range of properties for the marketplace," says Wessling.

"With the hybrid cottons, cotton will become more competitive with synthetic fibers because we will be able to provide mills with made-to-order fibers in a much shorter time span than is conceivable now with conventional seed breeding programs," he adds.

"While getting increased yields, we will be able to manipulate the plant to give us the desired fiber length, strength, micronaire and fiber uniformity. We will also be able to obtain a range of maturity groups and also incorporate disease or insect resistance into the hybrids," he explains.

Increased yields are one

of the most attractive features of the hybrid cottons, say researchers.

Increases of up to 20 per cent and greater have been reported, according to Wessling. But he cautions that when hybrid seeds become commercialized, producers could expect about a ten per cent increase in yields.

Weaver reports that his research with hybrids has given him yields comparable to the best Coker seeds used in Georgia, but with a 20 per cent increase in fiber length and strength.

"The fiber length and strength are excellent and essentially the same as the extra long staple types such as Pima and Egyptian cotton," he says.

His research involves crossing Pima cottons with upland cottons. The challenge for researchers, he explains, is to create a hybrid by crossing an upland cotton with an upland cotton while getting the same fertility that is currently available in the upland-Pima cross.

Weaver reports that a genetic factor that insures good fertility has been transferred from Pima to uplands for use in an upland-upland cross.

A cross of upland with upland should give an increase in yield and earliness as well as better disease resistance, more tolerance to certain insects and better seedling vigor, says Weaver.

Davis feels it is just a matter of time before researchers successfully create a hybrid from an upland-upland cross.

He explains that for hybrid cotton to be of value beltwide the researchers have to develop successfully a match of upland cottons with full fertility and excellent combining ability. Combining ability is the ability to transfer selected characteristics to the offspring, he explains.

"Achieving full fertility must come first," he comments. "I suspect it will come in three years," he adds.

His work with a cross of Upland and Pima cottons

has resulted in a long staple hybrid cotton with 15 per cent more fiber yield than the best Acala 1517 and 20 to 25 per cent more seed, he says.

The effects of successful hybridization will be revolutionary, predicts Davis.

"We are going to have far more versatility with hybrid cottons than we can have with conventional breeding programs," he says.

He also speculates that development of hybrid cottons will result in the reconsideration of aspects of cotton production, from row spacing to irrigation to harvesting, ginning and spinning.

### NEW FORD HEAD

DETROIT -- Henry Ford II said recently he was resigning as chief executive officer of the auto firm his grandfather founded 75 years ago. Ford said he will turn the reins over Oct. 1st to Philip Caldwell, the company's president since last fall when Lee A. Iacocca was fired. Iacocca now is president of the rival Chrysler Corp.

## Consumer Food News

Best buys at Texas grocery markets this week include poultry products, pork cuts, soft summer fruits and several vegetable items.

Also, many hot-weather cooking items are on special, according to Gwendolyn Clyatt, consumer marketing information specialist with the Texas Agricultural Extension Service, The Texas A&M University System.

**POULTRY** Chicken, turkey and eggs head the "BUDGET MEAT" LIST THIS WEEK.

In fact, poultry and eggs are priced about the same -- or just slightly higher -- than they were last year.

**PORK** -- Most smoked cuts are good values.

Also, specials appear on Boston butts, center chops, quarter-lobes cut into chops, loin-end roasts, spare-ribs and liver.

**FRESH FRUITS** -- Good values include peaches,

plums, nectarines, bananas and grapes. Northwest cherries coming to market indicate a record crop.

Other budget items are cantaloupe, watermelon and honeydew melons, but their prices are still only at the moderate level.

**FRESH VEGETABLES** -- Best buys are potatoes, onions, cucumbers, carrots and cooking greens.

Other good buys are soft-shell squash, okra, peppers, blackeye and purple hull peas, broccoli

and corn.

Moderate prices appear on head and leaf lettuces, cabbage, radishes and green onions.

**GROCERY MARKET AISLES** -- Specials include cake and pizza mixes, tea bags and drink mixes.

Also, catsup, barbecue sauces, pickles, stuffed olives, peanut butter and jelly.

**BEEF** -- Specials are chuck cuts, corned beef, ground beef, rib roasts and liver.

## Texas Tech Studying Agri-Economic Effect

No one knows how many people on the Texas High Plains hold jobs that are dependent on water and energy. No one knows what the current economic impact would be if all employment either directly or indirectly dependent on irrigation and petroleum disappeared. But Dr. Arthur Stoecker, an agricultural economist jointly employed by Texas Tech University and the Texas Agricultural Experiment Station, is trying to find out. Stoecker and some of his

students are tracing the economic chain reaction of revenues and expenses in a 54 county area extending from the Oklahoma line southward to Pecos and Reeves counties. Assisting Stoecker this summer are Texas Tech students David Booth, graduate student from Amherst; Eluned Jones, graduate student from Wales, United Kingdom; Joe Lovell, junior from Dumas; and David Pyles, junior from Graham. The collected data will be organized by the Texas Department of Water

Resources into an "input-output" model indicating cash flow into and out of businesses, how all types of business and industry are interrelated, how they are dependent upon water and energy, and how they are connected to state, national, and international markets. Results will show a clear picture of economic impacts of future changes in the area's energy and water resources, said Stoecker. Investors, planners, and policy makers can use the data to prepare for the future -- developing wind and solar energy, adjusting to limited irrigation or dryland farming, finding new sources of business activity, and determining

whether bringing water into the area would be worth the cost. Changes in water and energy related business in the High Plains send out economic ripples that effect the whole state, he said. Everyone from Dallas bankers to small town homeowners is affected. Results from the Texas Tech study funded by the Texas Department of Water Resources will be used in the Texas part of the Six State High Plains Ogallala Aquifer Area Study funded by the United States Department of Commerce. The six state study began in October 1978 and will continue through March 1982, investigating effects of declining water and petroleum resources from the years 1980 to 2020 in

Texas, New Mexico, Oklahoma, Kansas, Colorado and Nebraska. While economists determine what the area would be like with limited irrigation and energy, the

### Three Way News

By Mrs. H.W. Garvin

Mr. and Mrs. S.G. Long visited Mrs. H.W. Garvin Thursday evening.

Jody Flowers of Muleshoe spent last week with her grandparents, the Adolph Wittnes.

Mr. and Mrs. H.C. Toombs visited her sister, Rev. and Mrs. Joe Yates. Thersie Reed of Muleshoe went with the Toombs to see her sister, Rev Yates preaches each Sunday at Grassland in the Methodist Church.

Mr. and Mrs. George Tyson were in Portales, N.M. Saturday night for a Senior Citizens meeting.

Mrs. Jack Hodnett spent the past week at Lubbock with her father who was a patient in the hospital.

inside bula corn Mr. and Mrs. E.C. Bellar invited grandchildren, Jeryl Jr. and Cheryl Ann Bellar and their cousin, Jackie Mayhew, to enjoy a fish supper with them in Muleshoe Friday night.

Sunday afternoon, Mr. and Mrs. Jeryl Bellar took their children, Jeryl Jr. and Cheryl Ann and their cousin, Jackie Mayhew, to Morton to cool off at the swimming pool.

Mr. and Mrs. E.C. Bellar went to Clovis Sunday to visit her brother, Mr. and Mrs. L.W. Coleman. Bellar returned home later. Mrs. Bellar and the Colemans will leave Monday morning for Roswell, N.M.

Visiting in the home of Mr. and Mrs. John Latham Thursday and Friday was his mother, Mrs. Lillie Flowers of Lake Thomas.

Mrs. Ruby Weaver entered the Amherst Hospital Friday.

Army Corps of Engineers will study methods and costs of bringing in water from different sources to various parts of the six state area, said Stoecker. Routes of water diversion under consideration are (1) from the Arkansas River across Oklahoma to the Texas High Plains (2) from the Arkansas, White,

Oachita, and Little rivers in Arkansas across Texas to the Texas High Plains (3) from the Niobara and Missouri rivers to areas of Nebraska (4) from the Missouri in Nebraska and South Dakota to areas of Nebraska and Colorado (5) from the Missouri on the Kansas and Missouri border to southwest

Kansas, and (6) from the Missouri in Montana to the Nebraska Panhandle. The first two sources could provide water to the Texas High Plains. The last four, though possible sources of water for portions of the area now served by the Ogallala aquifer, would not affect Texas even if developed, he said.

## REBATES UP TO \$2,500 LEASES DOWN TO 7.50% LEASE RATE

Buying a Valley irrigation system this summer could be the smartest thing you could do all this year. We are offering you a choice of either big rebates or long-term leases at rates that are hard to believe. On Valley linears and corners the rebates are as high as \$2,500. On regular systems rebates are as high as \$1,250. You save the most by acting now, not later, because rebates decline in value after August 17th.

For Valley linears and corners, make a 10% down payment. We'll put the system on your farm and you won't have to make the next payment until January, 1981! The lease rate is an unbelievable 7.50% in July and goes to 7.63% on August 17th. You can make about the same deal on a regular system and the rate is 8.64%. If you don't want the January, 1981 second payment plan, the rate is 8.24%. We even have an interest free finance plan to January, 1980. See your Valley dealer, he has all the facts.

If you wait, you're losing money.

## STATE CAPITAL HIGHLIGHTS

By Lyndell Williams  
TEXAS PRESS ASSOCIATION

AUSTIN—Energy—how to produce more of it—remained the topic of state officials in Austin, as well as at Camp David where President Jimmy Carter was meeting with his staff to draw a new energy policy for America.

Texas Governor Bill Clements fired more criticism at Carter last week while attending a National Governor's Association meeting in Louisville, Kentucky. A governor's panel there rejected a recommendation backed by Clements for a Carter-supported plan for a windfall profits tax on higher-priced oil at 50 percent.

Clements had proposed a 100 percent tax on windfall profits that would not be reinvested in some form of energy development. Clements told the group even the oil companies are against his version because it is too restrictive.

Earlier on "Issues and Answers" television interview, Clements said he favored production of synthetic fuels, including gasohol, but would do all in his power to defeat Carter in 1980.

### In The Same Boat

Meanwhile, back home in Texas Sen. Jack Ogg, D-Houston, rapped Clements for his constant criticism of Carter, saying both men share similar energy policies.

"As far as I'm concerned, there's not a bit of difference between the president's ineffectual leadership and Gov. Clements' actions," Ogg said. Clements' recent statements that fuel would be channeled to the cities and also saying that rural areas would not suffer were "as inadequate and confusing as the president's."

"First, he (Clements) vetoes a gasohol program for Texas. Then, on national television, he calls for production of alternative energy

sources."

Ogg said in reality no solutions have been offered by either of the two leaders.

### Hearing on Fuel Shortages

A Senate subcommittee hearing on fuel shortages in Texas suffered a shortage of its own—no oil producers showed up to testify.

The absence of a witness to testify for the oil industry

prompted Consumer Affairs subcommittee chairman Sen. Ron Clower of Garland to blast the industry's invited spokesman for "not showing the people of Texas the courtesy to come here and present the oil industry's side of the story."

Clower was referring to Bill Abington, general counsel for Texas Mid-Continent Oil and Gas Association.

Those who did testify included representatives from the U.S. Department of Energy, the governor's office, service station operators, tourist development groups, businessmen, labor, consumer groups, farmers and truckers.

All testified the gasoline shortage is having serious and adverse effects on the state.

### English Inevitable

Secretary of State George Strake said Wednesday he would like to see a "serious,

honest" debate on bilingual voting and bilingual education in Texas.

The Republican's remarks were made in response to a Federal Election Commission report that said Spanish-speaking Texans are poorly served by state and local election officials. The report's data "are old and on a fairly small sample" and ignored other facts about Texas voting, he said.

Strake said he does not favor immediate repeal of a federal law requiring bilingual ballots, but "if the Mexican people come to the conclusion that they don't want it, I would be in favor of dropping it."

"It seems to me the longer you continue bilingual training the more you're continuing the inevitable. The sooner you get (Mexican-Americans) into an English world, the better it will be for them," Strake said. He stressed he would do all he could to involve all Texans in the political process.

### Death Penalty Upheld

Texas Supreme Court rejected convicted murderer David Lee Powell's arguments that the state's execution procedures were illegally adopted and should be overturned.

The Court upheld without comment lower court decisions on Powell's appeal.

### Nursing Home News

By Joy Stancell

C.W. Wilhite and other members of the Senior Citizens came to play '42' with the residents Thursday afternoon. Those participating were Grace Kemp, Effie Splawn and Willie Steinbock. Other residents came to the dayroom to observe the players and enjoy a snack of popcorn.

Mable Caldwell and Mrs. J.U. Dawson came Friday morning to demonstrate how to make an owl plaque. Taking part in the craft were Edna Henderson, Grace Kemp, Orpha Bartlett, Marie Patton, Marie Engram, Maggie London and Archie Scarlett.

Andy Rogers and members of the Lazbuddie Church of Christ came Friday afternoon to sing and give a devotional to the residents.

E.B. Wilson came to hold Bible Study with Maggie London, Docia Parish, Marie Engram, Dottie Wilterding, Marie Patton, Edna Henderson and Archie Scarlett, Sunday morning.

Women from the Hospital and Nursing Home Auxiliary came Tuesday morning to work in the beauty shop. Those having a shampoo and set were Grace Kemp, Marie Patton, Docia Parish, Maggie London, Edna Henderson, Marie Engram, Bulah Connell, Docia Dykes, Birdie Phelps, Onnie McDaniel, Orpha Bartlett, Carrie Boydston, Dora Slaughter, Mary Wedel, Eva West, Clara Angeley, Mechela Escobedo, Effie Splawn and Lottie Hall.

Tuesday morning, Skeet Bradshaw gave manicures to seventeen of the residents.

Mrs. Bobby Browles gave the Nursing Home four magnifying glasses.

Tuesday after lunch, Homer Milsap took the residents riding in the Senior Citizens van. Returning home, they stopped at Dairy Queen for an ice cream cone. Residents going on the outing were Edna Henderson, Marie Patton, Maggie London, Marie Engram, W.W. Parker, John Crim, Docia Parish and Abe Mallouf.

Toni Eagle brought her squar dancing group to perform for the residents Tuesday afternoon. The residents later visited with the children.

Annie Brown has not felt well this week. Her daughter, Sybil Simpson and Maude Kersey visited with her.

Jody and children visited with Effie Splawn.

Mrs. Laney received a visit from her husband.

Visiting with Clara Weaver were Cherl, Joey and Bobby, Eula Dale and Pat, Johnnie Weaver and Terri Nelson.

Marie Patton received a visit from her daughter, June Gore, Jimmy, Roxanna, Billy and Stacey came to see he also.

Friday was Carrie Boydston's Birthday. Her family gave her a party in the dining room. He family that attended are Dorothy Knight of Lubbock, Mr. and Mrs. Leland Boydston of Brownwood, Opal Talley, her granddaughter, Linda Boydston of Ralls, Geniva Henxson of Lubbock, Vickie Selman, Cheryl and Solne Stanton of Farwell, Ricky and Shelia Salman and Christopher henxson.

Mr. and Mrs. Elmer Cornelison and Mr. and Mrs. Marshal Head visited with Dottie Wilterding.

Mildred Head took her out to get her hair set Friday afternoon.

Terry Bouchelle visited the Nursing Home this week.

Visiting with Guy Nickels were Blake and Lois Deavor of Bliffdale and his brother from California, Fred Nickels.

Erma Wilemon, Laverne Stevens, Mrs. Murl Stevenson, Barbara Milburn and Opal Tally visited with Marie Engram.

Mr. and Mrs. Ronald London visited his mother, Maggie London Sunday. They brought her a cake and gifts to help celebrate her birthday. She also received gifts from the residents.

Glenda Jennings and Sandra Gregory came Wednesday afternoon to have a sing-a-long with the residents.

Ed Clark was visited by his son Wayne Clark.

Margaret Jones and Pete Wilemon are in the hospital.

Willie Steinbock spent the weekend with his son and daughter-in-law, Rex and Betty Stenbock.

Thursday, July 26 will be the monthly birthday party. Residents that will be honored are Carrie Boydston, Maggie

London, Eva West and Grace Kemp.

The Nursing Home has three new residents. They are Lozars Escobedo of Muleshoe, born December 3, 1903. Also Micaela Escabed who was born March 1897 and Odessa Pritchard of Arizona who was born February 20, 1896.

Select processed fruits packed in light rather than heavy syrups to save money, advises Gwendolyn Clyatt, a consumer marketing information specialist with the Texas Agricultural Extension Service, The Texas A&M University System.

## Cotton Today

TEXAN WORKS OVER-SEAS: Harry Arthur, spinning technologist with the Texas Tech Textile Research Center, Lubbock, and John

Maguire, Cotton Council International Far Eastern director, are giving on-the-scene technical assistance to mill customers of U.S. cotton in the Philippines, Indonesia, Thailand, and Bangladesh. During the period of July 11-24, Arthur and Maguire will conduct textile

seminars and visit mills to assist spinners and weavers make better cotton products to compete more strongly with man-made fiber products in their domestic markets. The visit is one of CCI's trade servicing activities to build good customer relations with foreign buyers and increase consumption of U.S. cotton abroad.

**COTTON SLEEPY TIME:** According to the Washington Post, the children of Environmental Defense Fund (EDF) spokesman Dr. Robert Harris sleep in pure cotton night-clothes made by his mother-in-law. EDF is the consumer group that led the fight to Get Tris-Treated children's sleep-wear taken off the market. Tris, a chemical once used to treat man-made fabrics for flame retardance, was banned because of its cancer-causing properties.

**GAS MAY BE SHIFTED FROM RURAL AREAS:** THE Energy Department has ruled gasoline supplies may be redirected within states or from state to state to solve the problem of severe shortages. The ruling may result in possible movement of gasoline supplies from rural areas to cities and urban areas. The National Cotton Council states cotton farmers should not be affected since the agriculture priority for gasoline remains in effect.

**EXPORTS RISE:** Exports of 146,500 running bales during the week ended July 1 brought the season's total to 5,521,000, compared with 4,854,200 a year ago. The week's new sales of 15,200 bales pushed total commitments for the current marketing year to 6,864,500 compared with 61,496,800 a year ago. New sales of 177,800 running bales for 1979-80 delivery brought the total to 2,051,200 thus far. China was the principal buyer 107,500 running bales, raising the total commitment for next year to 113,500.

**WORLD PRODUCTION TO RISE:** The U.S. Department of Agriculture has estimated the 1979-80 world cotton crop at 62.7 to 64.9 million bales, up 3.0 to 5.2 million from the 1978-79 crop of 59.7 million. This season's production in the U.S. was estimated at 12.0 to 14.2 million bales, compared with 10.9 million produced in 1978. The total foreign crop for 1979-80 was placed at 50.7 million bales, up 1.9 million from 1978-79. The report indicated that Russia, People's Republic of

China, Pakistan, and Brazil are expected to account for most of the estimated increase in the foreign crop.

## Tax Booklet For Appeals Is Reprinted

State Comptroller Bob Bullock Monday said widespread acceptance of a new system for handling tax appeals in the Comptroller's office has caused a need to reprint a booklet detailing the procedure for taxpayer use.

Recently, Bullock established a special hearings section to handle taxpayer appeals that cannot be satisfactorily resolved without a formal hearing.

The process has been praised by tax officials and attorneys as a great stride forward in tax administration taxpayer rights.

Richard Nevins, a member of California Board of Equalization, wrote Bullock that the system is "a very clear and easily understood appeals process."

The hearings section created by Bullock is comprised of three administrative law judges separate and apart from the tax collecting functions of the Comptroller's office.

The process was established to assure that taxpayers receive a full and fair hearing when they disagree with departmental decisions involving tax liabilities.

"The essence of our efforts is to make sure when a taxpayer disagrees with us there is an unbiased person to listen to the taxpayer's side of the story and render a decision that's as fair as possible," Bullock said.

He said a 27-page booklet, "Rules of Practice and Procedure," will be available for distribution during the first week in August.

The booklet outlines the rights and options a taxpayer may follow in appealing a tax determination. It contains the complete text for all rules and includes a seven-page "plain-English" narrative explaining the rules used in the agency's appeals process.

Taxpayer appeals were previously handled by the

**COMING AROUND --** During action Thursday night, the Muleshoe Little League All-Stars copped the district title, 3-2 in overtime, from the Sudan-Amherst LL All-Stars. Here a runner rounds a base as the third baseman for Muleshoe watched for the ball to be thrown his way.

Comptroller's Legal Services Division. Under the new plan, Legal Services Division attorneys represent the various tax divisions before an impartial and independent administrative law judge. Copies of the "Rules of Practice and Procedure" may be obtained by writing the Comptroller of Public Accounts, P.O. Box 13528, Austin, Texas 78711. Texas residents may also call, toll-free, from anywhere in Texas by dialing 1-800-252-5555.

**How True!**  
Too many people itch for what they want without scratching for it.

Keep a car well-tuned longer by keeping engine filters clean and using the gasoline octane and oil grade recommended for that car, advises Claudia Kerbel, a consumer information specialist with

the Texas Agricultural Extension Service, The Texas A&M University System.

## Enochs News

By Mrs. J.D. Bayless

Mrs. Dale Nichols took her daughter, Paula to Canyon Wednesday to spend the rest of the week with her brother, Mr. and Mrs. Donnie Nichols. They brought her home and visited his parents, the Dale Nichols during the weekend.

Mr. and Mrs. Harold Johnson and grandchildren, Jimmy and Julie Basswell Yucaipa, Calif. were guests in the

home of her uncle, the J.D. Bayless' Tuesday until Wednesday afternoon. They drove to Muleshoe and visited her uncle, Roy Bayless. Mrs. Bayless accompanied them.

Rev. Charlie Shaw, pastor of the Baptist Church will move to Seminole where he will be pastor of the Trinity Baptist Church.

Beckie Petree is visiting her grandparents, Mr. and Mrs. Chester Petree.

Steve Newton played on the Babe Ruth All-Star baseball team at Morton. They played in Lubbock for championship and

received second place.

Mrs. W.M. Bryant of Littlefield visited in the home of Mr. and Mrs. Dale Nichols one afternoon last week.

Visitors at the Baptist Church Sunday were Mrs. Seth Shaw and Mrs. Charles Shaw of Muleshoe, Mr. and Mrs. Mayfield of Littlefield, Mr. and Mrs. Donnie Nichols of Canyon, Beckie Petree of Clovis, Mrs. Albert

Bryant of Littlefield, Mrs. Troy Price and daughters of Morton and Mr. and Mrs. Danny Shaw of Post.

A dinner was served at the Methodist Church Sunday. Rev. Marvin Gregray of Morton brought the message. There were several visitors from Morton, Stamford and Lubbock.

Mrs. E.N. McCall hosted a birthday dinner with cake and pink ice cream for

her grandchildren, Kerry and Kim on their eighth birthday. Mr. and Mrs. Don Vanlandingham, Chris, Kerry and Kim of Lubbock were guests for the party and spent the night. Kerry remained for an extended visit.

A dinner and fellowship was given for Rev. and Mrs. Charlie Shaw following church services Sunday. The church members presented them with going away gifts.

**FOR EVERY PROBLEM, THERE IS A SOLUTION**

Such a predicament! Stuck in mud a foot deep! What to do? Just sit in despair? Wring your hands? Of course not! There is a solution. Obviously, this is a simple predicament. But what about the enormity of some of life's problems? There is an answer. There is help. God is "a very present help in time of trouble," the scriptures say. Try Him — Jesus. Feel His presence and let Him speak to you in church

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny, the truth which alone will set him free to live as a child of God.

Coleman Adv. Ser.

**Card Of  
Thanks**

The complete destruction  
of a major fire is a very  
traumatic experience, but  
the concern and love of  
neighbors and friends who  
care makes it bearable.  
There are really no words  
to express how much we  
appreciated all the town of  
Muleshoe and the Pleasant  
Valley Community did for  
us during the painful  
experience of losing  
everything in an  
apartment fire. Thank you  
for the many gifts, tghe  
money, the clothes, the  
canned goods, all so freely  
and lovingly given, but  
especially for the special  
"West Texas brand" of  
understanding love. Jim  
and Nancy Allison along  
with Jean and Harold  
Allison.

**LEARN  
TO READ  
YOUR  
ELECTRIC  
METER  
AND SAVE!!!**

It will let you determine how many kilowatt hours you use in a given period of time... an hour, a day, a month or a year. That's how electricity is measured -- by kilowatt hours (kwh) used.

**Your residential electric meter will have either 4 or 5 dials**

Electric meters are easily read from right to left as you look at the meter. If the pointer on a dial is between two numbers, write down the smaller number. When the pointer is directly on a number such as one (1) (see center dial above) then read it as 1 if the pointer on the next dial immediately to the right has passed zero (0). However, read it as zero (0) if the pointer on that dial to the right has not reached zero.

The dials above read (from left to right): 9-3-1-1-5. If, however, the pointer on the second dial from the right above was between 9 and zero then the center dial would read as a zero.

**Now let's read the same meter 24 hours later**

The later reading is 9-3-1-3-8. Subtracting the first reading, 93115, from the new reading of 93138 -- the answer is 23. Thus you would have used 23 kilowatt hours in the 24 hour period. Each kwh costs approximately five cents.

When you learn to read your electric meter, you will be able to see where your energy dollars go... then learn to use energy wisely & save!
