Week Days 50
Sundays 100

Local Crafts Exhibit Well Attended

Lovett Memorial Library was "mobbed" Sunday for the four-hour stand of the Dr. Cabalero Student Crafts Show. People came from as far away as Boulder, Colo., to see the work of the 24 Pampa students of Dr. Emilio Cabalero, head of the Art Department at West Texas State College, Canyon.

The exhibit climaxed a ten weeks crafts course here in which the Pampans put their hands to glass, stone, wood, tile, metal, agate and enamel.

Dr. Carl Lang's mobiles, Mrs. Dewey Palmittier's sunset bowls, Mrs. Bethel Shirley's bowls and ash trays, Margaret Dial's and Charlie Neal Young's enameled copper ash trays, Mrs. John Weber's tile mosaics, Joan Smith's enameled tiles, Dewey Palmittier's agate and copper jewelry and Mrs. Harvey Nensiel's individual jewelry are just a sample of the show.

Madeline Pursley created a bright mosaic stand from a plow disc, as well as copper on silver jewelry and some molded stained glass and enamel on plate glass bowls. Lenora Sloan showed a copper enameled bowl, a copper enameled mosaic, a Palo Duro sandstone sculpture and a tile table.

Maryl Jones had a sculp metal ceramic based Thinker and a mosaic bowl.

Leone Davis showed some enameled copper ash trays, tiles with roosters or skyscrapers and some (See LOCAL, Page 3)

HST Asks Tax Cut, Spending

New Defense Setup Prospects Brighten

WASHINGTON (UP)—Prospects brightened today for approval of at least part of President Eisenhower's defense reorganization plan. A key senator reported the administration had "toned down" one of the plan's most controversial features.

Sen. John C. Stennis (D-Miss.), a member of the Senate Preparedness subcommittee, said Sunday that administration seemed to have taken "a far more realistic approach" to its request that the secretary of defense be given greater authority over military spending.

Stennis was acting chairman of the preparedness subcommittee when it heard Defense Secretary Neil H. McElroy outline the reorganization plan on April 3. At that time, the Mississippian and other subcommittee members were markedly cool to the proposal.

The overall reorganization scheme Sunday won approval of a major veterans group. The National Executive Council of Amvets ended a two-day meeting here by urging Congress to adopt the President's requests.

Amvets said reorganization of the nation's military was necessary because weapons "in the hands of hostile enemies" posed the greatest threat to American security in history.

Sen. Francis Case (R-S.D.), another preparedness subcommittee member, said he thought the plan had been "worked on a bit" in recent days to clarify and "sharpen" some aspects.

The statements by Stennis and Case indicated a change in the way in which congressional military experts interpret the defense plan.

When McElroy appeared before the Senate subcommittee he said the plan, as then contemplated, would give him broader authority to shift funds from one branch of the armed forces to another.

The secretary's statement brought many complaints that the plan would deprive Congress of its "power of the purse."

Stennis made his comments Sunday after noting that McElroy said in a speech last Thursday that the plan only asks authority for the secretary to transfer a "minor" percentage of the 40-billion-dollar defense budget from its congressionally stated purposes, to exploit "sudden technological breakthroughs."

Stennis, who predicted that Congress would never vote "absolute authority" over such spending transfers, said the secretary's new statements "sound all right."

COLLAPSES

In Massachusetts, the Navy's blimp ZPG-2 collapses under 11 tons of snow as a late-late spring storm drops up to eight inches of heavy, wet snow along the east coast. The ZPG-2 is stationed at Weymouth Naval Air Station. (NEA Telephoto)

Blue Skies In Return After Wet Weekend

Pampa received .42 of an inch of moisture over a wet week end but no more rain is in sight for at least the next two or three days.

The low reading here last night was 33 and the low tonight is expected to be 32 with the high tomorrow climbing up to 65 degrees. The expected high today is 56.

The weather forecast for the Top o' Texas area calls for generally fair and mild tonight and tomorrow and cool again tonight.

A violent thunderstorm dumped nearly an inch of rain and hail within eight minutes time on Austin Sunday night after it had peppered nearby San Marcos with marble-size hail and 1.7 inches of rain.

The Austin storm, officially measured at .86 inches, was the heaviest on record there for such a short period of time, but neither it nor the light to moderate hail caused any appreciable damage. The hail at Austin was one-half inch in diameter.

A heavy windstorm, accompanied by hail, struck rural sections of Angelina county southeast of Lufkin about 2 a. m. Two houses were damaged and garage and chicken house destroyed in the Old Homer community and winds in the 10-minute storm uprooted trees, blocking some rural roads, and ripped shingles from houses. There were no reports of major damage or injuries.

Locally heavy showers occurred over much of Texas, dotting the state with rainfalls of an inch or more, but the rain was moving out of the state at mid-morning and skies were clearing to the west.

Another Front Coming

The U. S. weather bureau said another surge of cool Pacific air was moving eastward across the country, however, and that shower activity would begin again late Tuesday in West Texas and probably spread across the state.

At daybreak, Houston was being pelted by a heavy thunder-shower and had recorded .83 inches up to 7:15 a. m.

Victoria also reported a thunder-shower, while light rain was reported at Port Arthur, Laredo, Cotulla and Junction and drizzle at Galveston.

Skies were cloudy east of a Wichita Falls-Abilene line and clear to partly cloudy to the west.

The mercury dropped to freezing in some sections of the upper Plains, where snow was (See BLUE, Page 3)

Twining Says US Tests 'Necessary'

WASHINGTON (UP)—Gen. Nathan F. Twining, chairman of the Joint Chiefs of Staff, said today that further U. S. nuclear tests are "very decidedly" necessary to improve the American nuclear arsenal.

He added his voice to the broiling argument amid these developments:

—Sen. Hubert H. Humphrey (D-Minn.) reported that there is a "great deal of evidence" to back up reports that Russia called off its own tests after a "disastrous accident" spewed large quantities of deadly radioactivity into the atmosphere.

—Humphrey also reported that Russia set off a nine-kiloton bomb, equal to 9,000 tons of TNT, in an underground explosion in Red China.

—Sen. Estes Kefauver (D-Tenn.) urged President Eisenhower to match Russia's offer to suspend tests by "offering to end our own testing of bombs following conclusion of the next series...in the Pacific."

—The crew of Quakers aboard the yacht Golden Rule told supporters by ship-to-shore telephone that they intend to defy the Atomic Energy Commission and sail into the Pacific test area to protest the new series of U. S. nuclear experiments, scheduled to begin soon.

—Protesting peace groups also planned to picket three diplomatic missions in New York and Cape Canaveral, Fla., missile launching site.

Twining said in an interview that further U. S. tests are essential both to make progress toward developing a "clean" nuclear bomb and to increase the "versatility" of the U. S. atomic arsenal of weapons.

Humphrey is chairman of a Senate subcommittee that opened hearings Wednesday on the possibility of halting nuclear tests.

Witnesses include AEC Chairman Lewis L. Strauss and Dr. Edward Teller, often called the "father" of the H-bomb. Both have urged that U. S. tests be continued to develop a "clean" bomb. Dr. Hans Bethe, nuclear physicist of Cornell University, also will testify.

ON THE BALL FOR TOMORROW

Shown to members of the Governors' Special Committee for Highway Safety during a three-day auto industry visit at Detroit, Mich., is the device above. The gearshift-like ball is the control for a General Motors all-purpose operating mechanism. A left-to-right motion of the ball steers the car; forward pressure accelerates the vehicle and a backward pull on the experimental device applies the cars' brakes. (NEA Telephoto)

Dog-Carrying Soviet Sputnik Has Apparently Disintegrated

CAMBRIDGE, Mass. (UP)—The Smithsonian Astrophysical Observatory, despite a contradiction from Moscow, stood pat today on its announcement that the dog-carrying Russian satellite disintegrated Sunday night over the Caribbean.

Dr. John White, observatory information officer, said "we have nothing to add" to the observatory's statement that the satellite disintegrated in a fiery plunge about 9 p. m. last night.

"We have not changed our assumption that the satellite is down," White said.

A dispatch from Moscow today quoted a Moscow planetarium spokesman as saying that Sputnik II still has not disintegrated and should pass over Moscow some time tonight on its dying orbit.

What was believed to be a fragment of the satellite, probably a rocket engine, was sighted as an "orange-red glow" over Denver, Colo., one hour 17 minutes later.

Dr. John White, information officer for the observatory which has correlated world-wide satellite sightings, said the fragment was not likely to have survived another orbit.

A blazing fireball with "a long tail of fire like a comet" was seen by hundreds of residents of Barbados, British West Indies, at 8:53 p. m. e. s. t. The flaming ball was visible for about a minute. One witness said it looked like "rockets falling through the air."

In the sea south of the Virgin Islands, three minutes later, the crew of a Dutch tanker saw a "fireball with a trail of sparks and smoke" falling toward the sea. The captain of the tanker Mitra radioed: "Presumably it was Sputnik II."

An hour before the Barbados fireball was sighted, a farmer near Montreal, Canada, said a flaming object the size of a cart-ridge fell on his farm, which he believed came from Sputnik II. Royal Canadian Mounted Police took the object for study.

The death of the "Muttnik" left only three U. S. satellites in orbit around the earth.

Report Accidents In Soviet Nuclear Tests In Paper

COPENHAGEN, Denmark (UP)—The conservative newspaper "Berlingske Tidende" reported today a recent Soviet nuclear arms test ended in a "disastrous accident." It quoted Moscow reports received through diplomatic channels.

The newspaper said the tests "disclosed" the Soviet Union has not succeeded in producing a "clean" atomic or hydrogen bomb.

It said a "dangerous increase in radioactive fallout over the Soviet Union was most likely the real reason Premier Nikita Khrushchev decided to suspend arms tests."

The Berlingske Tidende said this information was supported by reports from Oslo and Stockholm that radioactivity in certain areas of those two countries had increased 25 per cent.

Several Items For Commission

The Pampa City Commissioners will have several items on the agenda tomorrow when they hold their regular weekly meeting in the Commission Room at City Hall, according to John Koonits, city manager.

Koonits said the commissioners will elect a board of electrical examiners and approve payment of the water and sewer contract 266 to Brodie — Enix. The commissioners will also discuss several other items of business.

Gray Commission Holds Meeting

The Gray County Commissioners held their regular monthly meeting this morning at 10 in the County courtroom.

The commissioners paid the monthly bills and set a date for the Board of Equalization to meet, which is done about this same time each year.

Last year the date was set for June 19 and it was expected to be set for approximately the same time this year.

Youth Center Divisions Meet Tuesday

All Divisions of the Pampa Youth and Community Center Building Fund Campaign will meet at 10 a. m. Tuesday in the Palm Room for another report meeting.

According to General Campaign Director Johnny Campbell, the Center now has pledges for over \$112,000. "As soon as we get a little more cash with the pledges," says Campbell, "We'll start digging the swimming pool."

The Campaign was reorganized Friday by the re-distribution of pledge cards from the Advance and Special Gifts Division.

Campbell is confident in Pampa and the people of Pampa and believes that the Youth and Community Center will become a reality.

"Young, Old Unite to Help" has been the theme of the Campaign ever since Samy Sue Cook turned in the winning slogan in the Center Slogan contest.

On April 18 in the High School Field House, the youth of Pampa will stage their annual Youth for the Youth Center Show. Rehearsals began last week for the sixteen varied acts with which the students hope to raise \$2,500 for the Center Building Fund. The Beaux Arts Dancers and the Million Trio are among the best known performers to be included in the show.

Cuban Fliers Hijack Plane

MIAMI (UP)—Three Cuban civilian fliers, who hijacked their own airliner with 12 passengers aboard, joined Miami's growing colony of Cuban pilots in exile today.

The hot breath of the Cuban air force draft apparently prompted the crew of a Cubana Airlines DC-3 to fly the plane to Miami Sunday instead of making their scheduled run from Havana to Santa Clara, in central Cuba.

On April 9, the crew of another Cubana plane — also scheduled on the Havana-Santa Clara run — flew 13 passengers to Merida, Mex.

There now are 29 Cuban civilian fliers waiting out the revolution from the safety of Miami.

Former President Has Day Before Committee

By VINCENT J. BURKE
United Press Staff Correspondent

WASHINGTON (UP)—Harry S. Truman today urged Congress to fight the recession by giving middle and low income families a five-billion-dollar tax cut and by stepping up defense and public works spending.

The former President made the recommendations in testimony prepared for the House Banking Committee.

He was the lead-off witness as the committee began five weeks of public hearings on ways of alleviating unemployment.

"Bold and vigorous action is necessary," Truman said. "...The Russians are looking over our shoulders with an economy—their economy, that is—which is growing at a rate of 7 to 10 per cent a year while ours is standing still."

—End "Tax Loopholes"

Truman recommended:

—A reduction of about five billion dollars in income taxes imposed on middle and low income families.

—Offsetting much of the revenue loss by eliminating "tax loopholes" and other "inequitable benefits" to privileged groups.

He said this would produce about three billion dollars in revenue.

—Making up the remaining two billion dollars by abandoning "high interest policies." He said these policies have harmed the economy and their abandonment would save about two billion dollars which the government is now paying in unnecessarily high interest on the national debt.

"These measures, in combination, would transfer five billion dollars of purchasing power to places where it belongs, both on considerations of equity and because that is where it would do the most good for the economy," Truman said.

Public Works Spending

The former President did not spell out in detail his recommendations for tax cuts. But he said Congress "should be careful not to pass out tax benefits to investors and well-to-do people who, if they are suffering at all, are suffering only because a average American families do not have enough purchasing power."

Truman testified before a standing-room-only audience. The crowd was so large that the committee had to move to a larger hearing room.

Looking fit and as jovial as ever, he read his prepared statement at a fast clip. He provoked a laugh when he said that a re- (See HST, Page 3)

Plane Crash Series-Takes Eight Lives

By UNITED PRESS

A series of week-end military plane crashes, one of them involving the Air Force's newest and biggest transport, has claimed at least eight lives.

Four men were killed when a C-133 cargo plane crashed in flames in the Ellendale State Forest near Georgetown, Del. The new four-engine plane, costing an estimated \$3,400,000, plunged to earth about 10 minutes after taking off from Dover Air Force Base.

Firemen battled the flames two hours before bringing them under control. Wreckage was strewn over a quarter of a mile.

The victims were identified as Raymond R. Barn, 37, Long Beach, Calif., the pilot; Lt. Herbert T. Pallasch, 25, St. Louis, Mo., co-pilot; T.Sgt. Marvin A. Aust, 29, Hays, Kan., engineer; and T.Sgt. Edward L. McKinley Jr., 33, Meridian, Miss.

Near Tacoma, Wash., three men were killed when their C-47 Air Force plane crashed during a practice landing at McChord Air Force Base. Observers said the craft cart-wheeled and crashed during a landing approach and burst into flames.

Reserve Capt. Wayne F. Reed, 38, Tacoma, pilot; Reserve Capt. Cyril E. Walmaley, 36, Shelton, Wash., and T.Sgt. Roy E. Craft, 28, Tacoma, were killed.

An F-100 jet plane crashed and exploded in an alfalfa field near Blanchard, Okla., killing the pilot, Lt. Richard L. Glassberg, 24, New Rochelle, N.Y.

Young Texas Pianist Wins Tchaikovsky Piano Contest

MOSCOW (UP)—Van Cliburn, of Kilgore, Tex., received a gold medal and the Russian equivalent of \$6,250 today as a prize ranking him among the world's leading exponents of Tchaikovsky's music.

The 23-year-old pianist won first place in the international Tchaikovsky piano contest that wound up here Sunday. Another American, Dan Pollack, of Los Angeles, finished in ninth place.

Other foreigners in the final round included Liu Shi-aun, a Chinese who tied with a Russian for second place; Bulgaria's Milina Mollava, France's Nadia Goddard and Japan's Toiaki Matsubara, who placed sixth, seventh and eighth respectively.

But the two Americans got an especially rousing reception.

They were applauded tumultuously whenever they played, and afterwards were besieged with requests for autographs.

"I wouldn't take a million for this trip. The people have been so wonderful, and I'll never forget them. It was real, Southern hospitality," Cliburn said.

Cliburn injured a finger during the contest, and he hasn't touched a piano since Friday, when he played the final concert that clinched the prize.

Pollack made his final appearance Sunday. He played Tchaikovsky's 1st Concerto — which was required of all the finalists — and Rachmaninoff's 2nd Concerto with a Russian orchestra.

"I'm simply glad it's all over," the Californian said as he left the stage after the 1½-hour concert. "All I want to do now is sleep."

Cliburn was unconcerned by the fact that all he really won was prestige. The Russians paid off the money prize in rubles—25,000 of them — which cannot be taken out of the country.

"Money doesn't mean anything to me," he said. "There are so many things you can't buy with it."

Soviet pianist Emil Gilels, who made the award, acclaimed Cliburn as "the best pianist of the younger generation." British composer-conductor Sir Arthur Bliss, a judge, praised the winner for his courage as well as his "remarkable piano playing."

The shy, lanky Texan, who has been hailed as a "young Rachmaninoff" by Soviet musicians, was too overcome to say much at the award ceremonies.

"I can't believe it," he said.

When the prize was announced, an audience of several hundred in the Moscow Conservatory began to chant "Van Cliburn, Van Cliburn" in unison in token of their approval.

Both Cliburn and Pollack have been urged to tour Russia, to make recordings and to pose for Soviet movie cameras. Right now, though, their immediate plans are simply to rest up after the grueling competition.

"But right now, I'd really like to go back to Texas," Cliburn said. "I'm just about to break down."

Drama, Musical Capture Awards

NEW YORK (UP)—A drama and a musical comedy Sunday night walked off with half of 18 "Tony" awards, the Broadway equivalent of the Hollywood "Oscar."

Dore Schary's "Sunrise at Campobello" and Meredith Wilson's "The Music Man" won a total of nine "Tonys" in the drama and musical show divisions. "Sunrise" won four awards and "Music Man" won five.

If it comes from a hardware store we have it. Lewis Hardware.

Congress Returns From Easter Recess

By RAYMOND LAHR
United Press Staff Correspondent

WASHINGTON (UP)—Congress returned from its Easter recess today with battle lines hardening for coming warfare over anti-recession and national defense measures.

First reports on the lawmakers' talks with voters at home indicated there still was no gree; public clamor for tax reduction — one of the major issues to be faced during the balance of the 1958 session.

Both administration and congressional leaders have held back from tax reduction as an anti-recession weapon. They want a later diagnosis of the outlook for business and the federal budget.

Some Reduction Likely

Even so the betting now is on some kind of tax reduction this year — at least a few excise (sales) tax cuts on automobiles, freight and other items. If business does not stage a recovery soon, a general reduction in income and excise taxes is likely.

The 85th Congress was ready to tackle other anti-recession bills. After passage of housing, highway and other public works bills with heavy bipartisan support before Easter, party lines have been stiffening on economic measures.

In the Senate the first order of business was a bill to provide a billion dollars in loans to communities for public works projects. Senate Republicans forced a delay on this measure before the recess.

The House Ways & Means Committee goes to work Tuesday on differing administration and Democratic proposals to provide extra unemployment insurance payments to persons who have exhausted their benefits. President Eisenhower prodded Congress on Sunday to "act as swiftly as possible" on the issue.

Pentagon Battle Seen

Conflicts cutting across party lines are coming up on other issues, particularly the President's plan to overhaul the organization of the armed forces. Despite opposition from powerful figures in Congress, Eisenhower has promised to keep slugging for his plan.

Party-splitting contests also are in the offing over two other major administration bills — to carry out its four billion dollar foreign aid program and to provide for a five-year renewal of the reciprocal trade law.

PIONEER, PHILANTHROPIST, PRECIOUS NEIGHBOR—were the words of introduction Rev. E. Douglas Carver, minister of the First Baptist Church, made in his Certificate of Recognition presentation speech at the Invitation Tea given yesterday afternoon in St. Matthew's Episcopal Parish Hall to honor Mrs. Inez Carter, who has been named by the Beta Sigma Phi Sorority as Woman of the Year for 1958. (News Photo)

"BECAUSE—we love you" were part of the presentation speech Mrs. R. H. Nienstiel, Woman of the Year for 1957 said in presenting the bouquet of Yellow Roses to Mrs. Inez Carter, Pampa's Woman of the Year for 1958, so honored at a tea given by the Beta Sigma Phi Sorority yesterday afternoon. A medley of favorite songs were sung to the honoree by Dr. N. J. Ellis. Mrs. Charles Duenkel gave the welcome to guests. (News Photo)

First Baptist Missionary Groups Meet For Study Of Bible Subjects

BETTY BOWLIN CIRCLE of the First Baptist Church met in the home of Mrs. O. H. Price, 1024 S. Banks with Mrs. S. E. Waters leading the opening prayer. Mrs. O. G. Trimble had charge of the business session. Bible study was taught by Mrs. Waters. Mrs. Bob Richardson dismissed the group with prayer. Nine members were present.

WINI TRENT CIRCLE met with Mrs. Hugh Ellis, opening with prayer led by Mrs. Lee Moore. Mrs. R. L. Edmondson taught the Bible lesson and dismissed with prayer. Eight members were present.

Mrs. Randall Howell was hostess to the MARY ALEXANDER CIRCLE, opening with group singing of "Jesus Saves." Mrs. Bob Hudson and Mrs. T. M. Knox led the opening prayer. The business session was conducted by Mrs. W. R. Bell. A report was given from community missions. The group voted to change the name of Mary Alexander Circle to Norma Jean Bradley, a home missionary. Mrs. Bill Clark taught the Bible

lesson on "Christ Winning A Sinful Woman." Mrs. E. D. Barnett led the closing prayer. Eight members were present.

VIRGINIA OWENS CIRCLE met in the home of Mrs. Orval Batson, 1012 W. Buckler. Mrs. C. E. Powell conducted the business meeting. Opening prayer was given by Mrs. Herman Whitley. The Bible lesson was taught by Mrs. Earl Dodson. Ten members were present. They were dismissed with prayer by Mrs. J. B. Davis.

LILLIE ROGERS CIRCLE met in the home of Mrs. J. A. McLain. The group was led in prayer by Mrs. W. B. Franklin. Mrs. L. V. Hopp had charge of the business meeting. Bible study was taught by Mrs. Owen Johnson. Closing prayer was led by Mrs. E. L. Anderson. Seven members were present.

DARLENE ELLIOTT CIRCLE met with Mrs. Lydia Ramsey. After reading the prayer calendar, Mrs. Doshia Anderson led the opening prayer. The chairman, Mrs. Ramsey, conducted the business session and the Bible study lesson. Closing prayer was given by Mrs. Lewis Hollar. Seven members were present.

JUNE PETTY CIRCLE met with Mrs. M. E. Stidham, 304 N. Banks. Following the business session conducted by Mrs. Stidham, the last lesson in the mission book, "Contentment in Commotion," was taught by Mrs. A. McClendon. The meeting was closed with sentence prayer for the coming revival. Three members were present.

OLETA SNELL CIRCLE met with O. D. Burba on Wednesday

SOCIAL CALENDAR

MONDAY

7:30—CWF Evening Circle, Lamar Christian Church.
7:30—Circle 6, First Methodist Church, with Mrs. Weldon Carter, 1906 Chestnut. Mmes. Irvin Wilson and Gene Steel, hostesses.
8:00—Exemplar Chapter of Beta Sigma Phi with Miss Gerry Caruth, 2208 Mary Ellen.

TUESDAY

9:30—Goodwill Home Demonstration Club with Mrs. Leland Diamond, 404 Lefors.
1:30—Pampa Art Club.
1:30—Worthwhile Home Demonstration Club with Mrs. Archie Maness, 431 N. Sumner.
2:30—Twentieth Century Cotillion with Mrs. Ralph McKinney, 1019 Christine.
2:30—Twentieth Century Allegro Club with Mrs. J. H. Franklin, 1809 Russell.
2:45—Parent Education Club with Mrs. L. L. Garren, 2120 Charles.
7:30—DMF Auxiliary with Mrs. C. D. Anderson, southeast of city. Mmes. Homer Scherer and Bob Brandon, hostesses.

WEDNESDAY

9:30—Circle 1, First Presbyterian, with Mrs. Martin Ludeman, 806 N. Frost.
9:00—Circle 2, First Presbyterian, with Mrs. R. E. Dobbin, 1909 Mary Ellen.
9:00—Circle 3, First Presbyterian, with Mrs. H. L. Meador, 1320 Starkweather.
9:30—Wini Trent Circle, First Baptist Church, with Mrs. R. L. Edmondson, 1101 Christine.
9:30—Mary Alexander Circle, First Baptist, with Mrs. Bob Hudson, 441 Hughes.
9:30—Lillie Rogers Circle, First Baptist, with Mrs. Roberta Woods, 608 E. Francis.
9:30—Darlene Elliott Circle, First Baptist, with Mrs. Manuel Spinnett, 710 N. West.
9:30—June Petty Circle, First Baptist, with Mrs. A. McClendon, 308 N. Banks.
9:30—Oleta Snell Circle, First Baptist, with Mrs. C. C. Matheny, 1120 S. Hobart.
2:30—Circle 4, First Presbyterian, with Mrs. R. F. Dirksen, 1607 Mary Ellen.
7:30—Cuppy Group, First Christian, Bible Study in the church.

THURSDAY

9:30—Harrah Methodist WSCS, Circle 2, Fellowship Hall.
1:15—Busy Bee Home Demonstration Club, with Mrs. Elmer Williams.
1:30—Lamar Christian Women's Fellowship, Lamar Christian, in Fellowship Hall.
2:30—Senior Citizens Center, Lovett Memorial Library.
7:30—Pampa Rebekah Lodge, IOOF Hall, 210 W. Brown.

morning at 9:30. The meeting opened with prayer by Mrs. G. L. Wilson. The business meeting was conducted by Mrs. A. D. Ackerman. Mrs. C. E. McMann gave the Bible lesson. Mrs. Parker Mangham dismissed the group with prayer.

Mrs. H. H. Hahn Gives Book Review At Twentieth Century Culture Guest Tea

Twentieth Century Culture Club entertained guests on Tuesday afternoon in the City Club Room at its annual Guest Day Tea.

Hostesses were Mmes. Jeff Bearden, G. L. Craddock, Philip Gates, J. L. Chase and Warren Hasse.

Guests were greeted and registered by Mrs. Michael Wilson. Refreshments were served from a tea table covered with a pink linen cloth centered with a spring floral arrangement of tulips and daisies arranged with pink-sprayed Devil's Claws.

Following an introduction of guests, Mrs. Myles Morgan extended a welcome to guests and introduced the afternoon's speaker, Mrs. H. H. Hahn.

Mrs. Hahn, who is a member of the club, as well as an active homemaker, church and civic worker, is well-known as a book reviewer. She gave a review of the

DEAR ABBY...

By Abigail Van Buren

DEAR ABBY: It is only April and already my folks are starting up with me about going to summer camp. I am 12 years old and hate camp. I went last year and had a terrible time. They say I am lucky that they are willing to spend the money on me but I think they are glad to pay it to get rid of me for two months. Mother says if I don't go to the camp I am going to sit on the porch all summer. And she can make me do it, too. Please help me.

CAMP HATER
Dear Camp Hater: Better go willingly, but first, get over the notion that you "hate it." It's a wonderful opportunity to learn to live with others. Appreciate it!

DEAR ABBY: Now what would you think of a grandmother who would send her grandchild a can of salted nuts, a cross-word puzzle and a comic book for Easter? I ask you because this child is only 13 months old. We don't feed her nuts yet. She can't work the crossword puzzle and doesn't read. Should I just skip it or do you think this woman needs a keeper?

INQUIRING
Dear Inquiring: Perhaps she got the presents mixed? If she is mentally incompetent, she doesn't need a keeper — she needs a doctor.

St. Paul's Society
Names Committee

Women's Society of Christian Service of St. Paul Methodist Church met Wednesday morning in the Fellowship Hall.

Opening prayer was given by Mrs. Kit Autry.

During the business meeting, conducted by Mrs. Joe Autry, president, announcement was made of a workshop of the United Church Women of Pampa to be held on April 23 in the educational building of the First Presbyterian Church. All officers of the group were urged to attend.

Appointed to serve on the nominating committee were Mmes. Bill Matejowsky, Joe Autry, Kit Autry and A. N. Rogers.

The meeting was adjourned with prayer by Mrs. Rogers.

Following the business meeting, a pink and blue shower was held for Mrs. R. A. Newton.

Attending in addition to those above mentioned were Mmes. J. H. Graham, James Scholl, W. J. Fletcher, Don Stephens, Bennie Waller, and W. F. Gaines.

Mmes. Joe and Kit Autry were hostesses during the social hour.

The next meeting for the Society will be Pledge Service and Luncheon on April 30 at 10 a.m. in the Fellowship Hall.

Europe's newest fashions will be previewed by probably the largest audience in history, who will see the latest, original gowns by "name" European designers on the occasion of the "Emmy" Awards telecast tomorrow night on NBC-TV from nine to 10:30 CST.

Millions of American television fans will be the first to see many new styles, including a "trapeze" original Paris Dior and a new "chemise" by Maria Antonelli of Rome... the most controversial fashion silhouettes of 1958.

The Paris Dior "trapeze" gown, of apricot-tinted gros de lorde, will be worn by movie starlet, Mary Beth Hughes. On the same show, Carolyn Byron will wear the original Antonelli of Rome, a draped "chemise" of blue satin organza. Both creations will be shown and described by actress, Laraine Day, hostess of the show's co-sponsor, Procter and Gamble's new Lilt.

To enhance each girl's appearance on the show, Lilt has created especially designed "ultra feminine" hair styles to complement these new fashion silhouettes.

The two dresses, which are valued at approximately \$7,000, are being flown from Europe to Hollywood for the gala event. Imported by Hannah Troy, they will be adapted for American women and will be sold in the finest retail shops in the United States.

Are you getting ready to do some Spring house-cleaning, or gardening, as soon as the rains let up. If these plans are included in your list of "important things to do" why not give your hands a wonderful beauty treatment while you garden, paint or do housework?

Before you indulge in such "do it yourself" activities, have hand lotion generously over your hands and fingers and don a pair of cotton or rubber gloves.

While you work the beauty-giving lotion will soften and smooth the skin and the gloves will protect your hands and nails from dirt, oils and friction.

Reserve your worn gloves for this purpose and wear rubber gloves when you are washing or scrubbing, and your hands will retain the pampered look of skin beauty that is so feminine and becoming.

After many years of squeezing sausage or hamburger patties into place, we find a simpler way to make them. Shape meat into a roll and then cut into slices. For freezing, insert waxed paper between each patty for easier separation.

Science Shrinks Piles
New Way Without Surgery

Finds Healing Substance That Relieves Pain, Stops Itching as it Shrinks Hemorrhoids

New York, N. Y. (Special) — For the first time science has found a new healing substance with the astonishing ability to shrink hemorrhoids, stop itching, and relieve pain — without surgery.

In case after case, while gently relieving pain, actual reduction (shrinkage) took place. Most amazing of all — results were so thorough that sufferers

Miss Betty Ruth Dickinson

Mr. and Mrs. J. P. Dickinson, McLean, are announcing the engagement and approaching marriage of their daughter, Betty Ruth to Curtis Joe Von Zandt of Wheeler. An early August wedding is being planned in the McLean Methodist Church.

GETTING UP NIGHTS

It worried by "Bladder Weakness" (Getting Up Nights or Bed Wetting, too frequent, burning or itching urination) or strong smelling, cloudy urine, due to common kidney and bladder irritations, try OXYTEX for quick help. 30 years use prove safety for young and old. Ask druggist for OXYTEX under money-back guarantee. See how fast you improve.

Slay-Home Strike Hits South Africa

JOHANNESBURG, South Africa (UP)—Prime Minister J. Strijdom mobilized South Africa's police today to try to break a stay-home strike by four million natives. The strike threatened to paralyze South African economy.

Police with submachine guns and batons were out in force on the streets of Johannesburg, Cape Town and other major cities. Strijdom promised that Africans who ignore the strike call will be given protection on their way to work.

First reports from the major cities indicated the strike was at least 90 per cent effective. Roads which at daybreak are often thronged with natives on their way to work were largely deserted today except for the police.

The strike was called for three days by the African National Congress, only voice of the country's 5,500,000 Africans. It ends Wednesday when the nation's white voters go to the polls in a general election.

Only the 3,500,000 white inhabitants can vote in the election, and Strijdom's Nationalist Party is considered a certainty to stay in power and pursue its policy of apartheid, the absolute segregation of white and colored.

Dr. J. Ivylo Bishop, assistant professor of religious education at Wayland Baptist College and former Southwestern Baptist Seminary, will be guest speaker for the Palo Duro Association of Brothhood meeting at the Calvary Baptist Church, Borger at 7:45 p.m. today.

Dr. Bishop, who has been at Wayland for the past two years as teacher of religious education and last year director of religious activities, holds the Doctor of Religious Education degree from Southwestern Baptist Seminary. While there he wrote his dissertation on "A Curriculum of Missionary Education through the Royal Ambassador Organization." Previously he had written a "Guide for Counselors of Royal Ambassadors Chapters." These grew out of his 13 years of experience as Southwestern Baptist publication. Before taking on the Southwestern Baptist Seminary, Dr. Bishop had served as secretary for Royal Ambassadors for Alabama, Mississippi and South Carolina.

As director of religious activities at Wayland, Dr. Bishop has led out on a progressive program for Wayland students. While at Wayland he has been in constant demand as a speaker in the South and the Southwest.

A fried chicken supper will be held at 6:45.

Dr. J. Ivylo Bishop, assistant professor of religious education at Wayland Baptist College and former Southwestern Baptist Seminary, will be guest speaker for the Palo Duro Association of Brothhood meeting at the Calvary Baptist Church, Borger at 7:45 p.m. today.

Rayburn Files For Re-Election

SHERMAN, Tex., April 14 (UP)—Sam Rayburn of Bonham, speaker of the U. S. House of Representatives and one of the most influential members of the Democratic party, has filed as a candidate for his 24th term as a congressman.

R. C. Slagle, Grayson county Democratic chairman, disclosed in Sherman that Rayburn is a candidate. Rayburn has now returned to Washington for the meeting of Congress after its Easter recess.

Rayburn is running from the Fourth District. His name will be on the ballot in the July Democratic primary.

The Top O' Texas Association of Life Underwriters Proudly Announces April 13 to 19 To Be LIFE INSURANCE Week in the Top O' Texas Area

Life Insurance Week Is Proclaimed

This week, April 14 through 18, has been designated as Life Insurance Week in Pampa by the Top of Texas Life Underwriters Association. It has been proclaimed as such by Mayor Lynn Boyd.

There will be speakers before most of the civic clubs speaking on topics pertaining to life insurance. Along with these speakers a few of the local underwriters will speak to the classes in Junior High and Senior High school.

Among the events taking place during the week will be Roy Reimann of the Great Southern Life Insurance Co., who will speak to the Optimist Club Monday evening at 8:30. Tuesday noon at the Jaycees luncheon, Farris Oden of Western National Life Insurance will be the speaker. On Wednesday at the Rotary Club and Thursday before the Lions Club, Ben Atkinson, past president of the Texas Association of Life Underwriters of Austin, will be the speaker. He will also speak to the Underwriters Banquet Thursday night at Johnson's Cafe.

On Friday, Durwood Walker of Great American Reserve will speak to the Kiwanis Club.

cession is when your neighbor loses his job, while a depression is when you lose your job. He praised Congress for its moves to step up public works spending to combat the recession. In an obvious reference to administration complaints over Congress' speed in acting on stepped-up public works spending, Truman said the congressional program is "all the more notable and praiseworthy" because of the "conspicuous lack of encouragement" received from some quarters.

Five Year Program

Truman called for still further congressional action in speeding up and increasing public spending. He proposed the following program for the next five years:

—An increase in defense spending of about three billion dollars above the level President Eisenhower originally proposed for the fiscal year starting July 1. Truman said Congress should plan now to increase annual defense spending to another five billion dollars or more by the fiscal year starting July 1, 1963.

—An increase in foreign economic aid to raise spending to \$1,500,000,000 in the year starting July 1 instead of the \$772 million dollars recommended by Eisenhower. Truman said Congress should plan to increase this to \$2,500,000,000 by 1963. He said "This is essential if we are to keep ahead of the Russians in the area of foreign economic development."

—An increase of \$1,700,000,000 in spending on domestic programs in the fiscal year starting July 1. Truman said "the bulk of this expansion would be for education, public health and public assistance." This would continue to be increased so that by fiscal 1964 outlays would total about 12 billion dollars for education, health and public assistance, and almost five billion for development of natural resources and housing.

In addition, Truman recommended federal aid to extend unemployment compensation for jobless workers who have exhausted their state payments.

He also urged Congress to increase social security benefits at its current session. "We can afford it economically, and certainly it is one of the most desirable methods of expanding purchasing power," he said.

Eliminates early

On The Business Scene

By UNITED PRESS

Congress reconvenes today ready for an all-out battle to beat back the recession. The Senate resumes debate on a bill calling for up to one billion dollars of loans for community public works. The fate of this and other measures including a tax cut depends upon opinion picked up during the 10-day recess.

Many of the nation's bankers do not look for any upturn in the economy until early 1959, according to the American Banker trade newspaper. About one out of eight bankers it surveyed said they expect a business upturn by fall while about 40 per cent said they believe it will not come before winter or well into spring of 1959.

Shipbuilding continues at a fast pace despite trends elsewhere in the economy. The Shipbuilders Council of America reported there were 102 vessels, aggregating 2,162,300 gross tons, under construction or on order in the nation's shipyards on April 1, against 102 vessels, amounting to 2,341,332 gross tons at the same time last year.

Steelmaking operations hit a new low in the current recession last week and failure of any show of strength has led producers to shelve hopes for substantial improvement until the fourth quarter. Steel magazine said, Modest upturns in late April and May are probable, however, the magazine said.

Navy Working On Vanguard

CAPE CANAVERAL, Fla. (UP)—Navy technicians worked today on a slender Vanguard rocket that is expected to leap skyward some time next week with another American satellite.

In the nose of this newest missile will be a 20-inch sphere designed to measure the intensity of X-rays in space.

Asthma Formula Prescribed Most By Doctors—Available Now Without Prescription

Stops Attacks in Minutes...Relief Lasts for Hours!

New York, N. Y. (Special)—The asthma formula prescribed more than any other by doctors for their private patients is now available to asthma sufferers without prescription.

Medical tests proved this formula stops asthma attacks in minutes and gives hours of freedom from recurrence of painful asthma spasms. This formula is so effective that it is the physicians' leading asthma prescription—so safe that now it can be sold—without prescription—in tiny tablets called Primatene®.

Primatene opens bronchial tubes, loosens mucous congestion, relieves taut nervous tension. All this without taking painful injections.

The secret—Primatene combines 3 medicines (in full prescription strength) found most effective in combination for asthma distress. Each performs a special purpose.

So look forward to sleep at night and freedom from asthma spasms...get Primatene, at any drugstore. Only 98¢—money-back guarantee.

Pre-Summit Talks Will Start Soon

By WILLIAM GALBRAITH

WASHINGTON (UP)—Secretary of State John Foster Dulles today voiced hope that pre-summit diplomatic talks with Russia will begin "in a few days" and that they may lead to "substantial" steps toward disarmament.

But Dulles quickly said he was not sure this would be the case. He made the remarks in a general review of world problems before the International Press Institute.

At the same time Western sources in London said the West will accept Russia's proposal to begin preliminary ambassadorial talks in Moscow—possibly as early as Thursday. But the sources said the West would not commit itself in advance to a summit conference—as Russia insists—regard-

less of the outcome of the preliminary diplomatic discussions.

A formal reply by Britain, France and the United States to the latest Soviet note is expected late today or Tuesday.

Dulles said it would be "illusory" to think that any dependable agreement on topics like disarmament can be reached with Russia "without preparatory work."

"The matter is extremely complex and extremely complicated and any meaningful decision requires preparation," Dulles said. "That is why we hope that the preparatory talks which may get started now within a few days—I don't know—that they permit a sufficient preparation so that some substantial, meaningful agreement could later be reached. That is our effort."

At another point, Dulles said the United States would "rush into" talks on disarmament with Russia "if they offered any reasonable hope whatever" of reaching solid and dependable agreements.

He said, however, that in today's world filled with distrust that it is "very difficult" to get a comprehensive agreement on checking the arms race. He said the United States thinks it may be possible to get reductions in "the field of nuclear weapons," including long range missiles which use outer space.

Dulles repeated his philosophy that until some dependable agreements are working out with Russia, the free world must depend on collective defense arrangements for protection.

Dulles repeated his philosophy that until some dependable agreements are working out with Russia, the free world must depend on collective defense arrangements for protection.

Dulles repeated his philosophy that until some dependable agreements are working out with Russia, the free world must depend on collective defense arrangements for protection.

Ex-Pampan Battles Robber

One time Pampa attorney Morris new manager of the C. R. Anthony store in Oklahoma City, Okla., slugged an armed robber last Tuesday who was after the day's receipts.

Until last November, Morris was the assistant manager of the C. R. Anthony store here.

Morris and his wife left the store at 9:15 p.m. Tuesday on their way home. He had the day's receipts and a sack of groceries. The gunman approached them as they reached their car, ordering them to "Get in the car and shut up and say nothing."

But as Morris started to get into the driver's seat he swung the grocery sack twice, knocking the gun from the man's hand. Picking up the gun, the thief fled with Morris after him. The robber fired one shot at a distance of five feet that went through the inside of Morris' unbuttoned overcoat. Another shot went wild.

At a roadside later police picked up John Neil Lemmon, 33, of 1224 N. Clackson, Oklahoma City, and his wife Lorette Louise and held them on suspicion. Lemmons was on parole for armed robbery. The couple was booked for vagrancy and investigation.

President To Inaugurate '58 Season

WASHINGTON (UP)—The President of the United States goes out to the ball game today to inaugurate the 1958 big league season and try to snap out of a personal pitching slump.

Dwight D. Eisenhower, a right hander, was set to do the honors by throwing out the ceremonial first ball a few minutes before the Washington Senators and Boston Red Sox started playing for keeps.

Today was the sixth straight honorary pitching appearance for the Chief Executive, a better-than-average outfielder in his West Point days but just a so-so pitcher as President.

Washington has won only two openers under the Eisenhower pitching administration. The President was in fact in the midst of a losing streak — he "lost" the last two season openers.

The President, fresh from a killing weekend in Georgia, and many members of Congress just back from a 10-day Easter holiday headed the official government delegation to the ball park.

The Supreme Court, which stayed in town, had some decisions to render before going to flag-bedecked Griffith Stadium.

The Attorney General William P. Rogers, put aside his crime-busting long enough to lead the march to the center field flag pole with American League President Will Harridge, Washington club President Calvin Griffith, Cookie Lavagetto, starting his first full year as Washington manager, and Boston manager Pinky Higgins.

The Eisenhower pitching stint — a single toss from the Presidential box between home plate and first base — perpetuated a precedent set in 1910 by President William Howard Taft.

Orton In Main Mat Event

In the main event at the Sportsman Club wrestling tonight, Big Bob Orton will return to the Pampa ring and appear in the main event. Orton is scheduled to battle Killer Joe Christie in the evening's finals, set for two out of three falls with a one hour time limit.

In the second event, colored girl wrestlers will be featured as Lule Mae Provo will tangle with Betty White. The semi-final will also go two out of three falls, and will carry a 45 minute time limit. In the opener, Gene LaBelle will meet Ont Wilki in a one-fall, limited to 20 minutes.

The wrestling matches are sponsored by the Pampa Shrine Club each Monday at 8:30. The Sportsman Club is located one mile south of town on the Lefors highway.

Admission is \$1.50 for ringside; \$1.25 for reserved seats; 50 cents for general admission adult and 20 cents for general admission children. Proceeds go to the Shriners Crippled Children's Fund.

This Is Promoter's Year In Baseball

By GEORGE M. TRAUTMAN
President, National Assn. of Professional Baseball Leagues
(Written for the United Press)
COLUMBUS, Ohio (UP)—This is the year of the "old pro" and the pro stands for promoter.

We're out to put America's baseball fans back where they belong, out at the ball park and away from the four-wall humdrum of their living rooms and those dancing images on the front of the 21-inch picture tube. We're going to treat them to real live ball players in action where they can escape from those "blue-by-blue" picture shows that are presented on a commercial-by-commercial basis.

"Do It Ourselves" Project
This is a job for men of strong hearts and durable will. It is a "do it ourselves" project and I'm cheered by the reports from everywhere in the National Association empire. Advance ticket sales are up. Substantial business men, civic leaders, housewives and school kids are on street corners selling tickets. There is a rebirth of community spirit that I have not witnessed in many years.

All of this rebirth of spirit didn't just happen. It came about through our intensified promotional efforts. Our people have come to realize that there is more in operating a baseball franchise than just opening the gates, throwing a few hot dogs into a kettle and hoping that folks will drop in for the evening.

We know there is more interest

Baseball Season Gets Underway Today

SPORTS

Bosox Grapefruit League Champs

By JOHN GRIFFIN
United Press Sports Writer

It's the Boston Red Sox as the Grapefruit League baseball champions of 1958 and as for a batting champion, how can you beat a "perfect" record like that of Bosox slugger Ted Williams?

The Red Sox, who have been described by Yankees' manager Casey Stengel as the rival he fears most in this year's American League pennant chase, made O'Case look good by winning 18 out of 22 games against major-league opposition this spring for a .727 winning percentage.

That's a comfortable lead over the brand-new San Francisco Giants, who had the second best record — a 21-11 won-lost record for a .656 percentage that topped all other National League teams.

Better Than Yankees
And it's a whole lot better than the losing 14-16 record of Stengel's Yankees. The world champion Milwaukee Braves were third in the spring standings with a .571 average, while the two Chicago clubs, Cubs and White Sox, tied for fourth at .543.

And how about that Williams? Sheer perfection. He went to bat only five times all spring—sacked two homers, singled once, and walked twice. An ankle injury prevented the amazing 39-year-old American League batting champion from playing more often and makes him a doubtful starter for today's big opening game in Washington against the Senators.

Of course, in sheer justice the spring training batting crown has to go to another "breaking veteran"—30-year-old Grady Hammer of the Philadelphia Phillies. Making a comeback as a third baseman, Grady whacked 29 hits in 58 at-bats for a cool .500 batting mark—tops for players who batted a fair number of times.

Top slugging honors, however, went to shortstop Ernie Banks of the Chicago Cubs. In addition to his .375 batting average, the slugger with the toothpick build hit 14 homers. Runner-up in that department was big Bill Skowron of the Yankees with 11.

Last Exhibition Games
Here's what happened in the wind-up exhibition games Sunday: Williams pinch-hit a homer but the Red Sox were beaten by the Richmond Virginians of the International League, 5-1, for the second straight time as Deron Johnson led the Yankee farmhands with a three-run homer; Jerry Lynch's eight-inning single drove in the winning run for Cincinnati in a 3-2 decision over Baltimore; homers by Yogi Berra, playing for the first time since March 31, and Hank Bauer led the Yankees to a 10-5 win over the Phillies.

Frank Thomas drove in six runs with two homers in Pittsburgh's 14-2 win over Columbus of the International League; Washington rallied in the last two innings to beat the White Sox, 9-3; Cleveland

scored five runs in the ninth to beat the Giants, 5-3; homers by Andy Pafko, Frank Torre, and Lew Burdette led Milwaukee to a 7-3 win over Detroit; Danny McDevitt's two-hit pitching for seven innings led Los Angeles to a 4-1 win over the Cubs; and the Kansas City A's swept a twin bill from St. Louis, 7-1 and 3-2.

In last-minute player switches: Milwaukee optioned outfielder Ray Shearer to their Wichita farm team; Cincinnati got down to the 28-man limit by announcing it will option pitcher Marty Kutyna to a farm team today; and Baltimore purchased 19-year-old shortstop Ron Hansen from their Vancouver farm club but stayed within the limit by optioning catcher Frank Zupo to Knoxville.

Pitcher Hopes To Equal Expectations

By ALEX KAHN
United Press Sports Writer

LAS VEGAS, Nev. (UP)—Don Drysdale, the 21-year-old Van Nuys, Calif., hurler who after only four seasons of professional baseball emerged this year as the choice of the experts to be the National League's leading hurler, said today he was honored by the distinction accorded him and hoped he could live up to it.

"The performance on the mound will prove whether the writers who took part in the United Press poll were correct," the youngster said.

"But you can bet I will be out there trying to justify their confidence in me by giving me that honor."

Could Make It 30

Drysdale was reluctant to make any predictions what his goal would be this season but when asked he was aiming at 30 games he replied, "If everything goes right maybe I can do it." Drysdale, who stands six feet, six inches and is as lean as a greyhound, still is not satisfied that he is in top condition and the Dodger coaches had to caution him against overworking on the final swing through Arizona and Nevada.

"I'll really have to work harder than ever," he said. "I've been trying to make up for the lateness of my reporting from service and I still feel I'm a little behind where I should be at this stage." Because he has not been working as long this year as he had in previous training sessions, he says his muscles still do not respond as well as he would like.

Pitching for Home Folks

Drysdale is enthusiastic about the Dodgers now making their home in Los Angeles. He is a hometown boy from San Fernando Valley, just over the hill from Los Angeles.

"I would say it was a little extra incentive to be pitching before the hometown folks, the kids I went to school with and who have followed my baseball work with a personal interest."

Eight Opening-Day Games On Tap Across The Country

By FRED DOWN
United Press Sports Writer

President Eisenhower lends his famous grin and apparently his equally-famous luck with the weather to baseball today to help get the major leagues' first coast-to-coast season off to a flying start.

By FRED DOWN
United Press Sports Writer

President Eisenhower lends his famous grin — and apparently his equally-famous luck with the weather — to baseball today to help get the major leagues' first coast-to-coast season off to a flying start.

Long-range forecasts of rain and cold weather in many of the nine cities involved in openers today and Tuesday were revised to indicate there would be clear skies and temperatures between 50 and 80 degrees, fair and mild weather was promised for Washington, D.C. today when Eisenhower makes his ceremonial first pitch.

Then the Boston Red Sox' Frank Sullivan and the Senators' Pedro Ramos take up the pitching duties before a sellout crowd of more than 28,000. Whether slugger Ted Williams would be in the Red Sox' lineup remained questionable. He is suffering with a severely twisted left ankle.

Open Title Defenses

Some 225,000 fans are expected to flock to Tuesday's eight openers when the world champion Milwaukee Braves and American League champion New York Yankees begin defense of their titles and the West Coast's long-awaited entry into big league ball becomes official. A sellout crowd of 23,000 will see the transplanted Dodgers and Giants open in San Francisco.

On Friday the two new teams switch their playing site to Los Angeles where indications are that a new major league record of more than 90,000 fans will be established.

The Yankees — overwhelming favorites to win a ninth pennant in 10 years under Casey Stengel — are sending Don Larsen, their 1956 World Series pitching hero, against the Red Sox' Willard Nixon in Boston. The Yankees' versatile Tony Kubek is sidelined with a pulled muscle in his left leg but his absence would be more than balanced if Williams doesn't play for Boston.

The Braves — with a sellout crowd of 46,000 assured at Milwaukee — will open with southpaw star Warren Spahn (21-11) opposing Bob Friend (14-15) of the Pittsburgh Pirates.

Probables For Openers

NEW YORK (UP)—Following are the probable pitchers, attendance and weather for the major league baseball openers:

Monday
Boston at Washington—Sullivan (14-11) vs. Ramos (12-16), 20,000 cool and possible showers.

Tuesday
American League
Washington at Baltimore—Stobbs (8-20) vs. Johnson (14-11), 28,000, rain expected Monday or Tuesday.

New York at Boston—Larise (10-4) vs. Nixon (12-13), 25,000, possible showers.

Detroit at Chicago—Bunning (20-8) vs. Pierce (20-12), 20,000, possible showers.

Kansas City at Cleveland—Garver (6-13) vs. Score (2-1), 32,000, 50 degrees, rain or light showers possible.

National League
Los Angeles at San Francisco—Drysdale (17-9) vs. Gomez (15-13), 23,600, clear and sunny.

Chicago at St. Louis (Night)—Brosnan (5-5) vs. Mizell (8-10), 20,000, cool and possible showers.

Philadelphia at Cincinnati—Roberts (10-22) vs. Lawrence (16-13), 30,000, showers expected.

Pittsburgh at Milwaukee—Friend (14-18) vs. Spahn (21-11), 46,000, partly cloudy and fairly mild, rain late Tuesday.

Detroit at Chicago
The remainder of Tuesday's program has Detroit at Chicago, Kansas City at Cleveland and Washington at Baltimore in the American League and Philadelphia at Cincinnati and Chicago at St. Louis (night) in the National League.

The big West Coast opener will find 21-year-old Don Drysdale, a native son, going for the Dodgers against Ruben Gomez of San Juan, P.R., and the Giants. A total of 110 reporters will cover this game. Drysdale had a 17-9 record while Gomez had a 15-13 mark in 1957.

Bob Goalby Winner At Greensboro

GREENSBORO, N.C. (UP)—Young Bob Goalby gave up three baseball bonus offers to become a professional golfer, and the payoff started Sunday — with a stunning win and \$2,000 in the 21st annual Greater Greensboro Open golf tournament.

It was the first tournament win for the little-known 27-year-old athlete who gave up his golf pro job at Darien, Conn., only two weeks ago after deciding it was "now or never" with him and circuit golf.

Goalby fired a brilliant final-round 68, five under par, for a 72-hole 278. He was two strokes ahead of the closely-bunched field who combined at Starmount Forest Country Club course for one of the most exciting finishes in the history of the \$15,000 event.

Goalby, who had been trailing Sam Snead of White Sulphur Springs, W. Va., by four strokes at the 54-hole mark, tapped his putter and said: "This is what I did."

Snead had to settle for a \$1,080 share of the second-place pot. Others in the second-place spot at 277 were Dow Finsterwald of Tequesta, Fla., Art Wall Jr. of Pocono Manor, Pa., Tony Lama of Napa, Calif., and Don Kanary of Eastland, Tex., whose amazing final-round 64 tied the course record.

WILLIE JONES' SON DIES

BROOMALL, Pa. (UP)—Timothy Jones, three-year-old son of third baseman Willie Jones of the Philadelphia Phillies, died Sunday of pneumonia.

Harvesters And Palo Duro Dons Tangle Tuesday

The Pampa Harvesters and the Palo Duro Dons square off at Harvesters Park tomorrow afternoon at 4 p.m. in a District 3-4A baseball game.

The Harvesters will be seeking their second district win of the season tomorrow as they downed Plainview Friday in extra innings, 5-4.

Pampa has compiled a 7-2 won-lost record, downing Mangum, Okla., 6-4; Childress, 6-4; Borger, 6-2; Frank Phillips, 9-3; Elk City, 12-3 and 7-4; and clipping Plainview in the district opener, 5-4. The Harvesters have lost to Childress, 7-4, and Borger, 12-7.

The Harvesters baseball park is located west of the football field.

Is There Way Out?

(Fifteenth of a Series)

When we are all through examining the logical and the illogical regarding government, we inescapably come up against an, as yet, insurmountable problem. Governments may be intrinsically evil; clearly they operate on the basis of tax predation. And with equal clarity we can discern that the collection of the tax money PRECEDES the dought protection thus dearly bought. But the fact remains that human nature being what it is, a certain amount of protection of our lives and property is desirable.

The world is not an ideal place. The people who go to make up our world are, in the main, neither idealists nor saints. Criminals do stalk our streets; viciousness, selfishness, inconsideration, stupidity and worse are all about us. We cannot completely forego the right to protect one's life and property.

Would that we could. But the facts of life are bloody and in altogether too many instances, an inability to protect ourselves defensively, would simply encourage the rise of organized aggression.

Therefore, we come to an impasse. When government is employed as a protective device, immorality of necessity appears. But, should we forego protection, at least at this time and place, the immorality might conceivably be expanded by even more brutality and cruelty.

And though it may be true, and there are some who will argue the point valiantly, that we actually require far less protection than we think we do, the fact remains that something must be done, some tool provided, which will offset man's belligerency, at least in individual cases.

Let us, then, state with certainty, that some tool of protection must be found. And if we can find nothing better than government, cruel, rapacious, immoral and unjust though it has proved to be in all of history, then, we must still have government.

However, let us suppose that we are able, by virtue of our advanced knowledge and by virtue of a renewed belief in moral virtues, to devise a tool of protection which is superior to government. Ah, there is a thought to conjure with.

We have shown that government is a tool. But in this respect, though it may provide a necessary service, it is no more unique than any other tool which also provides a necessary service. Government's distinct character comes from the peculiar manner in which it attains to force and power. It derives this power from the compulsive unification of all persons below its exalted level. No other tool occupies this strange elevation. Every other tool of man's devising is a tool which, if man can control himself, will become docile and tractable in his hands.

Government alone, of all man's inventions, is capable of independent life. Government alone, like Mrs. Shelley's terrifying creation of the monster born in Frankenstein's mind, has the power and the ability to turn upon its creators and destroy them.

The question which must one day demand our finest intellectual efforts, is: Can we invent or create a tool to protect ourselves from aggression without building into it so much power that ultimately it can turn against the very persons who create it and give it strength?

We cannot yet answer this question. However, avenues of procedure already suggest themselves as offering at least a partial remedy.

Is government the only device we know of self-protection? No, it is not. Voluntary insurance is another device. So are private policemen, private organizations such as the American Legion, night watchmen, merchant police, the Triple A and perhaps a score of others.

We have found for example, that we can protect ourselves from fire with fire insurance. This does not prevent the fire from occurring, but it can indemnify us from loss in the event the unwanted holocaust occurs. And, similarly, if we hire a private policeman, a private watchman or a private detective, these men cannot prevent a criminal tendency in the mind of another, but they can and will prevent a crime in some cases, and in others they can and do track down the criminal.

But can government do more? Quite frankly, it cannot. We could pass a law but fires will continue to occur. We can establish expensive and expensive police departments, yet the criminal mind will still function in its own warped way.

BETTER JOBS

By R. C. HOILES

Individual Responsibility

It seems to me that we have a nice example of the results that come from attempting to evade individual responsibility.

When the depression was on in the 20's and 30's, instead of letting those people reap what they had sown and thus learn from their bad judgment in not knowing who to trust and believe, we attempted to make it so they did not reap what they sowed. The result is that we never really got back to more sound principles that would permit continuous improvement at an ever-increasing wage.

Instead of letting those people pay for their errors and thus learn, we ran to the government and attempted to save the bankers and the depositors who over-expanded credit and over-borrowed and the result is that instead of having a sound dollar and a sounder banking system, we went off the gold standard because we could not tax enough or borrow enough to take care of the unemployed, and we have constantly depreciated the value of a dollar as a result of trying to evade individual responsibility for acts of individuals and of groups.

Frederic Bastiat, in his chapter on "Responsibility," explains how letting people reap what they sow is the most practical way of developing character and well-being.

Bastiat explains in this chapter how nations falling gives a chance for the improvement of society and of better nations. He puts it this way:

"Whatever may be thought of the fragility and fall of empires, it must never be forgotten that society, which in its aggregate represents the human race, is constituted upon more solid bases. The more we study it, the more we shall be convinced that it too, like the human body, is provided with a curative force, a vis medicatrix, which delivers it from the evils which afflict it; and that it carries in its bosom, moreover, a progressive force; and is by the latter urged on to improvements to which we can assign no limits."

"If individual evil, then, does not weaken or invalidate physiological harmony, still less does collective evil weaken or invalidate social harmony."

"But how are we to reconcile the existence of evil with the infinite goodness of God? I cannot explain what I do not understand."

"All I shall say is, that this solution, can no more be exacted from Political Economy than from Anatomy. These sciences, which are alike sciences of observation, study man as he is, without asking the Creator to reveal His impenetrable secrets."

Harmony Indefinite Improvement

Thus, I again repeat, harmony does not correspond with the idea of absolute perfection, but with that of indefinite improvement. It has pleased God to attach suffering to our nature, seeing that He has designed that in us feebleness should be anterior to force, ignorance to science, want to satisfaction, effort to rest, acquisition to possession, destitution to wealth, error to truth, experience to foresight. I submit with out murmuring to this ordinance, being able, moreover to imagine no other combination. But if, by a mechanism as simple as it is ingenious, He has provided that all men should approximate to a common level, which is continually rising, if He assures them by the very action of what we denominate evil — both of the duration and the diffusion of progress, then am I not only content to bow myself under His bountiful and almighty hand, — I bless that hand, I worship it, I adore it.

Changing Society

"We have seen certain schools arise which have taken advantage of the insolubility (humanly speaking) of this question to embroil all others, as if it were given to our finite intelligence to comprehend and reconcile things which are infinite. Placing over the portal of social science this sentence, God cannot desire evil, they arrive at the following series of conclusions: 'Evil exists in society; then society is not organized according to the designs of God. Let us change, and change again, and change continually this organization. Let us try about, and make experiments, until we have effaced all trace of suffering from the world. By that sign we shall know that the kingdom of God has come.'"

Liberty Implies Suffering

"Nor is this all. These schools have been led to exclude from their social plans liberty as well as suffering, for liberty implies the possibility of error, and consequently the possibility of evil. Addressing their fellow-men, they say, 'Allow us to organize you — don't you interfere — cease to compare, to judge, to decide anything by yourselves and for yourselves. We abhor the laissez faire, but we ask you to let things alone, and to let us alone. If we succeed in conducting you to perfect happiness, the infinite goodness of God will be vindicated.'"

Contradiction, Inconsistency, presumption, — we ask which is most apparent in such language?

"One sect among others, not very philosophical, but very noisy, promises to mankind unmixt felicity. Only deliver over to that sect the government of the human race, and in virtue of certain formulas, it makes bold to rid men of every painful sensation."

With These Umpires

Robert Allen Reports

Keep Eye On Hearings Of Space Committee

WASHINGTON — Keep an eye on those hearings the special House Space Committee gets underway this week!

You can learn a lot from them regarding that world-debated question as to why the U.S. is firmly insisting on going through with those two scheduled series of nuclear test — the first, this spring, in the South Pacific; the other, in the fall, at the great Nevada proving grounds.

Here is one significant example of what these hearings, under the direction of Representative John McCormack (D., Mass.) will bring to light:

The Nevada tests will include crucial aspects of the two most important missiles so far undertaken by this country — the highly secret nuclear-powered anti-missile projects "ROVER" and "PLUTO."

The only way these vitally essential missile "killers" can be developed is by tests. They are one of the basic reasons the U.S. is determined to conduct the score of nuclear tests at Epivotok and Nevada.

Immediately involved in the ROVER and PLUTO tests are prototype reactor engines for these anti-missile missiles. Two noted authorities will discuss their significance: Dr. Werner von Braun, of the Army Ballistic Missile Agency, and Dr. T. C. Merkle of the Atomic Commission's National Laboratory, Livermore, Calif.

The famed space and nuclear scientists will stress these points: Nuclear-powered missiles are the most effective answer to ballistic missiles.

Nuclear missiles will have several or more times the "thrust" of the best chemical missiles. Development of nuclear missiles is directly related to the development of both nuclear-powered places and space vehicles.

Nuclear-powered space vehicles will be the means by which man will go to the moon and Mars and return.

A PREVIEW — In a prefatory report to the House Space Committee, Dr. Merkle describes the PLUTO and ROVER tests in Nevada as "pre-flight trials."

Actual flight tests of these crucial anti-missile missiles are 12 or more months off, depending largely on the funds made available for these projects by the Atomic Energy Commission.

Primarily involved in the ROVER test is the "development of a nuclear engine to propel missiles and rockets." Purpose of the PLUTO test is to determine the "feasibility of applying heat from a reactor to ramjet engines for powering either missiles or planes."

The following are publishable highlights from Dr. Merkle's study on these projects to Representative McCormack's Committee:

"But if you do not accord a blind faith to the promises of that sect, then, bringing forward that formidable and insoluble problem which has vexed philosophy since the beginning of the world, they summon you to reconcile the existence of evil with Sound and you are right — it is Do you hesitate? they accuse you of implety."

(To be continued)

Hankering

By HENRY
McLEMORE

Middle-Aged Mac Is Full Of Romance

Who looks more romantic in a gondola, Cary Grant or an Iowa State sophomore?

Which one, riding up on a fiery horse, figures to make the feminine heart beat faster, Gary Cooper or a 27-year-old car salesman from Brooklyn?

Of the two, Clark Gable or an apprentice advertising jingle writer on Madison Avenue, which would a woman rather have defend her in a rough and tumble fight with villains?

My guess at the answer is Grant, Cooper, and Gable. And not necessarily in the order named. Gable could be in the gondola, Grant on the horse, and Cooper in the knock-down and drag-out, and the ladies would still be delighted.

All this is in the way of an answer to those movie critics, here and abroad who, of late, have criticized the casting of these three stars, along with others, in romantic roles.

Middle-aged men, the critics either infer or come right out and say so, are too old for romance. It appears to be their opinion that once he reaches 45 or over, a man is lucky to even spell romantic, much less look it or act it.

Either these critics are well on the sunny side of 45, or they have tired blood. There are few creatures more romantic than a middle-aged man. If you don't believe it, take a look at the ages of the men who are trying to get to the moon. I'll bet our top outer space scientists average middle-age or better. Unlike young men, they are not content to sigh

The Doctor

Says:

EDWIN P. JORDAN, M.D.

THE amount of material published on cancer each year is staggering. But this is a good thing because it shows not only the intense interest in the subject, but also it is evidence of research which is constantly extending knowledge on means of controlling and treating this dread disease.

The 1957 booklet on Cancer Facts and Figures put out by the American Cancer Society brings out both encouraging features of this battle and also defects. About 150,000 Americans were saved from cancer in 1957, the booklet points out. About 75,000 more might have been saved by earlier and better treatment, even with present knowledge.

Most readers know that the two treatments for cancer available today are removal by surgery and the use of radiation, either by X-rays or radium, or by radioactive preparations such as the cobalt bomb.

But scientists are by no means satisfied with these methods and are looking seriously for new and better means of prevention and treatment. These have generally not yet reached the stage of practical use, but some observations are promising for the future.

FOR EXAMPLE, the report from the Sloan-Kettering Institute for Cancer Research points out a number of important advances during the past two years.

Well persons have been shown to possess a natural resistance against implanted cancer not present in patients with the advanced disease. Furthermore, studies have indicated that this natural defense is related to a particular chemical found in the

under a moon hundreds of thousands of miles away. They want to get right on the moon itself.

Let me get highly personal for a moment or two. I'm middle-aged and while I don't look quite as romantic as Gable, Cooper, Wayne C. Grant, I'm as full of romance as a shelf of Walter Scott novels. Didn't I hire a canoe during a full moon last summer and take Mary for a paddle on the Arno in Florence? I certainly did, and if you don't think I remember all the details, let me tell you that the canoe cost me five dollars an hour, that I got back barely in time to prevent an overcharge, and that I did all the paddling until blisters broke out on my right hand.

Of course, I didn't have on Ivy League trousers, or remark that the Arno at night "sent me," or fritter away any of the five-dollar-a-hour time holding Mary's hands. But if romance didn't cause me to hire the canoe, what did? I'm certainly not a lover of single sculling, and I could have seen the scenery just as well from the banks.

I'll admit there are differences between young and middle-aged romance, but basically it's the same. It follows the same pattern. I don't send Mary a lone red rose these days, with no card in the box, but I do what I feel is better. I bring home a dozen cinnamon rolls (which we both love) for a surprise, or stay up two nights running for the late show, to show that sleep means nothing to me and that I'm ready for anything. Come to think of it, a man who can stand two nights straight of the late show can take anything.

Of course, our chin lines aren't quite as firm as they once were, and we have a few deep face lines, but we are ever so much more interesting.

At least, that's our story, and believe me, we are going to stick by it. I feel pretty romantic right now, and if I had a car with a rumble seat, I would like nothing better than to go for a fast spin.

CHIP BY CARLTON LEE

Call For Pak-A-Burgers... Your All-Time Favorites

Call for Pak-A-Burgers! Call for them at lunch time, snack time, meal time.

Call for them at Pak-A-Burger No. 1, at 1608 N. Hobart, MO 4-2885, where Mrs. Peggy Eckroat, manager, will serve them to you just the way you want them.

Call for them at Pak-A-Burger No. 2, at 910 S. Hobart, MO 9-9916, where Mrs. Hazel McDaniel, manager, will dress them up just right.

Drive in and call for them on the spot, or telephone in and have your Pak-A-Burgers waiting for you — ready to go with you, or ready for you to eat in the ample parking areas.

Love Pak-A-Burgers

Everybody loves Pak-A-Burgers: your family, your relatives, your friends, all the gang! Pak-A-Burgers are "right" for a quick, nourishing meal, for refreshments, for your party-giving, for lunches, for snacks.

At both Pak-A-Burger No. 1 and Pak-A-Burger No. 2 you get those delicious Pak-A-Burgers, Pak-A-Burger Juniors, Coney, French fries, malts, orange drink, soft drinks, the best coffee in town and rich, frozen, Swedish, flavorful cream in cones, pints, quarts, and gallons.

Phon for Pak-A-Burgers

To get your Pak-A-Burgers faster, just call Pak-A-Burger No. 1 at MO 4-2885 or Pak-A-Burger No. 2 at MO 9-9916 and have your Pak-A-Burgers and other goodies waiting when you drive in.

Hostesses enjoy their parties more when they telephone their orders because they delight their guests with Pak-A-Burgers, and because they enjoy their guests every second — without losing time to fix refreshments.

Your feet never touch the ground when you get your Pak-A-Burgers. You drive up to the loud speaker, give your order and then drive around the building to the delivery window, where you pick up your Pak-A-Burgers.

Pak-A-Burger Treats

There is nothing like a Pak-A-Burger after the game; after the movie, bowling, the dance or party. You get Pak-A-Burgers all the way, with all the works, or plain or with chili, mustard, onions, catsup. You get them any way you want them.

When the gang drops in for a platter session, when the card comes for a party, when friends or relatives visit by invitation or unexpectedly — then telephone for Pak-A-Burgers at refreshment time. Your Pak-A-Burgers will be waiting for you. Serve them hot in their individual wrappers.

MMM—PAK-A-BURGERS AT PAK-A-BURGER No. 1.—You'll love them. Everybody does! Taste these delicious, tantalizing Pak-A-Burgers, Pak-A-Burgers Junior, Coney and other goodies. Drive in and give your order through the loud speaker and then drive around the building and pick up your Pak-A-Burgers at the delivery window. Or telephone ahead and have your Pak-A-Burgers waiting for you. Drive in, call in often.

SOO GOOD! PAK-A-BURGERS AT PAK-A-BURGER No. 2.—Pak-A-Burgers are extra good at both Pak-A-Burgers No. 1 and No. 2. Call in, and have them waiting for you. Enjoy them at your leisure at either Pak-A-Burger, or enjoy them at home for a snack, a lunch or a quick, nourishing meal! Serve Pak-A-Burgers to the gang, to your bridge club, and Pak-A-Burgers will make you their favorite host or hostess! Get Pampa's favorite habit—the Pak-A-Burger habit.

Once you serve Pak-A-Burgers you will realize what a boom they give for home entertaining.

On your Sunday drive, when dinner is late, serve Pak-A-Burgers. Pak-A-Burgers will be the high spot in your day.

... Best For Pak-A-Burger ...

Both Pak-A-Burger No. 1 and Pak-A-Burger No. 2 always use the highest quality ingredients in all foods. Taste the chili and you taste the difference. Notice the fresh, crisp vegetables — treats in

Get Wheat Hail Insurance At H. W. Waters Ins. Agency

MR. FARMER, GET YOUR WHEAT CROP HAIL INSURANCE HERE—Get it now because it costs no more to insure your crop now, and you enjoy added protection. H. W. Waters Insurance Agency, 117 E. Kingsmill, MO 4-4051, represents three of the strongest and most reliable insurance companies writing crop insurance, and all three have adjustment service offices in Amarillo! You are assured of prompt, efficient, satisfactory adjustment service. Call on H. W. Waters Insurance Agency for complete protection: farm, personal dwelling liability; life, automobile, auto-fleet, travel, fire, casualty. Take advantage of 23 years in the insurance business—let H. W. Waters Insurance Agency help you plan your insurance protection.

Mr. Farmer, you can "play it safe" now by insuring your wheat crop!

"Your wheat is in a rapid stage of growth, and since it costs no more to insure your crop against hail at an early date, we urge you to insure now. — That is the advice of H. W. Waters Insurance Agency, 117 E. Kingsmill, MO 4-4051.

H. W. Waters Insurance Agency

The Waters Agency — with 23 years of experience in the insurance business — represents three of the strongest and most reliable insurance companies in the crop insurance field! And all three have adjustment service offices in Amarillo! They are the New England Insurance Company, the New York Fire Insurance Company and the St. Paul Fire and Marine Insurance Company.

The St. Paul is the originator of wheat crop hail insurance in the Texas Panhandle.

Outstanding Record

The chief adjuster for the New England and New York insurance firms in Amarillo has established

an outstanding record in his service as adjuster since 1932!

Adjustment service arranged by the H. W. Waters Insurance Agency for wheat crop hail insurance cannot be excelled. Prompt efficient and satisfactory adjustment service is assured.

One of these three firms, the St. Paul Fire and Marine Insurance Company, has established a special farm insurance department to constantly improve insurance offered to farmers, and to help farmers plan a low cost insurance program to provide complete coverage.

Other Insurance

Besides crop hail insurance, the H. W. Waters Insurance Agency can help you provide farmer's comprehensive liability protection; protecting you, your wife, relatives and any children under 21 living with you against:

Liability for bodily injury, death or damage to property of others arising out of farm accidents or family activities.

This comprehensive farm policy also provides for medical care (to policy limits) whether you are liable or not.

Other insurance protection available with H. W. Waters Insurance Agency includes: personal, family, dwelling insurance, life, travel baggage insurance, automobile, fire casualty, auto fleet insurance.

This year, remember travel insurance: when you travel by land, sea, or air for business or pleasure, enjoy the peace of mind insurance brings against injury by accident, loss of baggage and personal effects.

Travel accident insurance is issued for periods of from 3 to 180 days in amounts from \$5,000 to \$50,000 accidental death benefit.

Enjoy complete insurance protection — and be sure of your crop! Insure through H. W. Waters Insurance Agency, 117 E. Kingsmill, MO 4-4051.

Plans were made to have two days instead of one so Dollar Days will be held on the first Friday and Saturday of each month, instead of the first Tuesday. The first of the new Dollar Days will be May 2 and 3.

Present for the Dollar Day meeting and very enthusiastic about the new plan were George Saled, chairman; Charlie Pyles, Lawrence Good, Rod Newland, Carl Barrett, C. A. Sooter, Ken Riller, Bery Neeley, Vernie Farrington, Joe Schollenberger and Travis Baker, president of the Chamber of Commerce.

There is going on in New York a contest among models, dancers, actresses, and other leggy ilk, to find the most beautiful legs. Object: To put them on TV in an advertising. I went to the man in charge and asked how they decided what is a beautiful leg.

"In esthetics, it's a matter of taste—like judging food," he said. "Some like Picasso in his early years, some like other periods. So we have three authoritative judges—an artist, a fashion photographer and a lady ballet dancer—all famed in their fields."

All right, I'll take the artist. He ought to know. He's John Groth, who also teaches anatomy at an art school. What makes a leg beautiful?

"Each person has his or her own ideas," said the fashion writer.

There is going on in New York a contest among models, dancers, actresses, and other leggy ilk, to find the most beautiful legs. Object: To put them on TV in an advertising. I went to the man in charge and asked how they decided what is a beautiful leg.

"In esthetics, it's a matter of taste—like judging food," he said. "Some like Picasso in his early years, some like other periods. So we have three authoritative judges—an artist, a fashion photographer and a lady ballet dancer—all famed in their fields."

All right, I'll take the artist. He ought to know. He's John Groth, who also teaches anatomy at an art school. What makes a leg beautiful?

"Each person has his or her own ideas," said the fashion writer.
