All of the county and precinct officers are running for reelection without opposition with the exception of County Attorney Max Rogers who is contesting B. L. Rogers for his place as representative in this district in the state legislature. Judge Oscar C. Flowers is a candidate in a lone field to succeed Boyer.

LAUNDRY MOVES NEW QUARTERS

HELP-SELF LAUNDRY MOVES TO BUILDING ACROSS THE STREET FROM ITS FORMER HOME

The Help-Self Laundry this week completed moving to the building south of the Perryton Motor Co. across the street from its former location. The laundry's new home is several times larger than the quarters previously occupied and will enable the company to handle a larger volume of business, says W. R. Norris, owner. The laundry increase in business made it necessary to seek larger quarters, it said.

A water softener has been installed by Mr. Norris, which will furnish rain-soft water, and other improvements are planned. Clothes will be available both outside and inside the building, so that in inclement weather service may continue without interruption. Mr. Norris purchased the Help-Self Laundry in January from J. West who established it in the summer of 1935. Mr. Norris this week began operation of a similar laundry in Spearman.

Stovall were in Amarillo Tuesday attending a Soil Conservation meeting of representatives of the Federal Soil Conservation Service, County Judges and other officials of 14 Panhandle counties. The purpose of the meeting was to formulate a plan whereby the wind erosion agencies of the state of Texas might enter into emergency and long range soil conservation programs on a partnership basis with the Federal Government. Judge Shanks specifically pointed out that the plans contemplated would in no way effect the soil conservation work being done by the CCC camp, nor the soil conservation work of the AAA program. Judge Shanks said, in his opinion, the work under this cooperative plan would be the clearing of fence rows and lateral roads, which in some instances have been almost blocked by sand dunes. In Ochiltree county, it is reported there is 525 miles of roads to be (Continued on last page)

MUCH WHEAT IS LOST BY HAIL

ESTIMATE TWO TO THREE HUNDRED THOUSAND BUSHELS DESTROYED BY HAIL THURSDAY

That ever grim threat to the wheat farmer, a hail storm, claimed a total of from two to three hundred thousand bushels of wheat from Ochiltree county wheat farmers last Thursday afternoon. The area covered by the hail storm ranged south and west from Farnsworth, dipped down through the McMillen section and on into the south central part of the county. The storm tore through the best part of the wheat in the Perryton territory and took out at least a third of the limited crop that will be harvested this year.

Wheat prospects continue to increase over the small part of the acreage that has not been destroyed by drouth. Estimates of the total crop production as made in last weeks Herald will now have to be revised downward on account of the loss by hail. Very little of the wheat destroyed was covered by hail insurance.

JUNE CHECK WILL BE FINAL ALLOTMENT; SEVERAL TO RECEIVE TEXAS OLD AGE PENSIONS

Caldwell, case worker for Ochiltree County Welfare Association states that all persons who have been receiving direct relief from the Texas Relief Commission will receive their last check from Austin by the middle of this month. However, all relief clients will receive their entire June allowance in one check, instead of two as was formerly the practice.

There are nine persons in Ochiltree county who are on direct relief. Of this number five are eligible to the Texas Old Age Pension, and plans are being formulated for the disposition of other four cases. It is thought that two of the four will be certified to a WPA project.

At one time Ochiltree county had 190 on relief rolls, but all of this number, except the nine cases referred to, were certified to WPA projects or found other employment.

NEWS of the WEEK

NEW PREMIER ENDS STRIKE

Paris, France—Leon Blum, France's first Socialist Premier, succeeded in effecting an agreement by which a million striking workers, threatening a nationwide tie-up of industry, returned to work. Unions gain recognition, a 40-hour week is granted and wage increases range from 7 to 15 per cent.

N. Y.'S NO. 1 ENEMY CONVICTED

New York City—Charles ("Lucky") Luciano, dubbed by Special Prosecutor Thomas E. Dewey one of the nation's most dangerous racketeers, was convicted with eight confederates on 62 counts of compulsory prostitution. All face long prison terms, two of them for life as old offenders. Four more of the gang had already pleaded guilty and were brought from prison to testify for the State.

BLACK LEGION THREATENS

Detroit, Mich.—Warned that his home would be bombed by the Black Legion, Mayor William W. Voisine, of Ecorse, a town of 17,000, was forced to take refuge in the Municipal Building. The bombing of his home ten months ago is now attributed to the organization of terrorists charged with wholesale murders throughout this State.

LIBERAL PLANKS DEMANDED

Cleveland, Ohio—Liberal elements within the Republican Party will make a determined fight for liberalized social and economic planks in the platform to be adopted by the National Convention now in session. Many go so far as to echo the suggestion of Ex-President Hoover that even the Constitution might be changed, "if necessary" to give the States control over wages and working conditions.

LEWIS ROUTS A. F. OF L.

Washington, D. C.—John L. Lewis, head of the United Mine Workers of America, out-generaled the American Federation of Labor in its scheme to unionize the 450,000 workers in the steel industry. Instead of the A. F. of L. policy of separate craft unions for each type of work, Lewis will attempt, through his new Committee for Industrial Organization, to organize steel men into a huge industry-wide union.

SOLVING HEADACHE MYSTERY

Atlantic City, N. J.—Because the brain itself cannot register pain, and because so many and varied causes are blamed for headaches, the delegates to the American Neurological Association's annual meeting took keen interest in Dr. Temple Fay's description of ten years' work in studying head-pains. He traced 547 possible irritating conditions, all attributable to the fluid balance of the body. His suggestion: fat people should reduce the amount of liquid consumed to a quart a day; lean, neurotic types should increase liquids to three or more quarts a day.

GERMANY IMPORTS CURBED

Washington, D. C.—Sensing an increase of 13 per cent in imports from Germany, an attempt to "dump" the products of the Reich on American markets at ruinous prices, the Treasury Department has announced "Countervailing" duties on German cameras, glass ornaments, toys, dolls, cotton, rayon and leather gloves, china, surgical instruments and many other products. American manufacturers complained of unfair trade practices on Germany's part, which the increases in duty ranging from 22 and one-half to 56 per cent seek to correct.

EX-CADDY WINS GOLF HONOR

Springfield, N. J.—Although he won only \$1,000 as first prize in the National Open Golf Championship, Tony Manero, ex-caddy and now a pro in Greenboro, N. C., will have a chance this year to make \$50,000 from endorsements, tours, radio contracts and "ghost-written" magazine and newspaper articles. Only 31 years old, he hung up a course record of 67 and won the championship with a card of 282.

COMMODITIES REGULATED

Washington, D. C.—With the Securities Exchange Commission in smooth operation, the Administration's Commodity Exchange Commission will now start to function. Composed of the Secretary of Agriculture, the Secretary of Commerce and the Attorney General, the Commission will seek to limit individual trading, prohibit fictitious transactions and eliminate other abuses in the purchase and sale of wheat, cotton, butter, eggs, rice, corn, oats, barley, rye, flaxseed, grain sorghums, mill feed and Irish potatoes.

AN ACT WITHOUT THE STAR

Rome, Italy—While all Italy paid homage to Marshal Pietro Badoglio, conqueror of Ethiopia, on his triumphal return from Africa, Benito Mussolini remained quietly at his

summer home. The occasion also celebrated the granting of the Italian Constitution, 88 years ago. While bands blared and legions of sun-browned Italians marched in Rome, Haile Selassie, the conquered, was welcomed in London by loudly cheering mobs, both white and colored.

CREATED THE MARCEL WAVE

Paris, France—While millions of women cling to the "marcel wave", few ever heard of its creator. He was Francois Marcel Grateau, a hair-dresser, and he just died at his chateau at the age of 84. He invented the process in 1872 because he liked his mother's wavy tresses. His charge for a wave started at the equivalent of 10 cents; when at the height of his fame a titled English woman paid him \$600 for one treatment.

TWO DEGREES IN YEAR

Chicago, Ill.—Determined to cram his way through college at a record pace, Donald McMurray, former New Yorker, has won his bachelor's degree from the University of Chicago in less than a year, expects his master's degree in August. He will then marry Evelyn Ehrlich and go to New York's Columbia for his doctorate. He studies 12 to 14 hours a day, munching candy bars and sipping black coffee.

OLD STORY STILL GOES

Palo Alto, Cal.—When a traffic cop stopped Edmund Lowe, movie actor, for speeding the screen star explained that he was so affected by a visit to his aunt at Stanford University he failed to notice his excessive speed. The cop let him go, but when the latter returned to the police station he found this 3-year-old entry on the blotter: Lowe, Edmund; speeding; said was visiting aunt at Sanford; put him in such mood didn't notice speed; released.

ELDER STATESMAN SPEAKS

New York City.—For 32 years, Nicholas Murray Butler, President of Columbia University has been a delegate to Republican National Conventions. This year he sailed for Europe on the return trip of the Queen Mary. Asked about the candidates, he summarized: Lowden "has all the qualifications"; Can they win with Landon? Brought an emphatic "NO!"; How about Hoover?—"Don't make me laugh."

ADVISES GRADUATES

Riverdale, N. Y.—Addressing a graduating class at the College of Mt. St. Vincent, Patrick Cardinal Hayes, Archbishop of New York,

followed the ceremonies with a brief informal talk to the class, in the course of which he urged those who planned further study to attend Catholic institutions. Not to do so, he warned, was to "take the chance of losing your faith." Even worse, he declared, they "almost defy God."

WEEK IN THE CAPITAL

Washington, D. C.—J. Edgar Hoover, head of the G-men has had his salary raised from \$9,000 per year to \$10,000. The Government will hereafter reimburse local governments for fire, police and other services rendered Federal low-cost housing projects, which are tax-exempt. WPA Administrator Hopkins issued final report of direct Emergency Relief for 1935-36, showing expenditures of \$4,096,433,367. The Federal Government supplied 70.9 per cent of nation's relief costs. The condition of the Treasury for the last fiscal year is as follows: Receipts, \$53,364,176.19; expenditures, \$151,636,961.64; Balance, \$2,327,379,873.352; deficit, fiscal year, \$3,019,532,358.88; public debt, \$31,677,185,878.13.

SPEEDY JUSTICE

Washington, D. C.—"Kidnaping is definitely out of the way, for a while at least." And J. Edgar Hoover, Chief of the Government's G-men, pointed to the swift clean-up of the last "snatchers" rounded up. While Alvin Karpis awaits trial in St. Paul Harry Campbell, kidnaper of St. Paul Banker Bremer, was sent to jail for life five days after his capture; Thomas H. Robinson, Jr. kid-

naper of Mrs. B. V. Stoll, of Louisville, drew a life sentence two days after capture. Released from pursuit of kidnapers, the Department of Justice men are now working on some big unsolved bank robberies and mail raids.

OLYMPICS MAY BREAK RECORD

Berlin, Germany—Estimate indicate that 52 nations will send 5,500 competitors to the 1936 Olympic Games this August. In 1900 the Paris Games drew only 500; at Los Angeles four years ago 1,700 athletes competed. Frederick W. Rubien, secretary of the American Olympic Committee, calculates that it will cost \$325,000 to transport, train and board the full United States team. So far, only \$120,000 has been raised.

WARRIOR'S LAST WISH

Vilna, Poland—The dying wish of Marshal Joseph Pilsudski, Poland's dictator, that his heart be buried with his mother, was fulfilled in the Church of St. Theresa, while 100,000

WILLIAM POWELL STARS IN MURDER MYSTERY

Murder mystery, comedy, and romance are mixed as only William Powell mixes them, in "The Ex-Mrs. Bradford," the new co-starring vehicle in which Powell and blonde Jean Arthur are to be seen. It is Powell's gift to jest carelessly while staring into a gun muzzle and romance gayly under conditions that would fray nerves of steel.

The mystery builds on the ap-

parently normal death of a police stricken while riding a horse. Discovering that it is murder, Powell gets in some of his nearest, most thrilling detective work setting a trap among seven suspects—one of whom has discovered a way to slay from afar, a way that leaves only a dab of poison on the victim's bodies to hint that the did not die of normal causes.

Keeping the entire picture light comedy mood is the romance between Powell and Miss Arthur, which the usual relations between lovers is amusingly reversed, moments being hidden behind constant kidding and prank-playing of the kind acclaimed in "The Thin Man."

FORD V-8 ECONOMY MEANS HIGH "Dollar Mileage"

(MORE MILES PER DOLLAR)

NO MATTER how you classify your expenditures for car up-keep—it's your total expenditure that counts. How much "dollar mileage" is your car giving you?

Dollars do go farther in the Ford V-8. Modern improved carburetion gives you unusual gasoline mileage with brilliant V-8 performance. Most owners of today's Ford change oil only every 2000 miles and add none between changes.

And after the first few thousand miles you begin to understand what Ford V-8 "dollar mileage" really means.

It gives you more miles per dollar because it gives you all-round economy—low first cost, low up-keep cost, low depreciation and long life—as well as low gasoline and oil consumption. All these are big items if you aim to buy the most economical car.

"Fury" Is Picture of Terrifying Mob Hate

A new romantic team of unusual appeal is introduced in the Metro-Gordwayn-Mayer picture, "Fury," now showing at the Ellis Theatre.

The co-starring leads are Sylvia Sidney and Spencer Tracy, and their acting in many of the difficult scenes of this powerful screen play approaches new heights.

The story, prepared for the screen by Lang and Bartlett Cormack from an original by Norman Krasna, is a hardhitting depiction of group lawlessness in America.

Tracy and Miss Sidney are a typical American couple planning to marry. He is arrested as a suspect in a community where a kidnapping has just occurred, and circumstantial evidence blackens his case.

Rumors spread, and trouble-makers in the town stir up a demonstration that ends in a furious attack on the prison in which Tracy is being held.

The mob in a frenzy when baffled in its efforts to drag out the innocent victim, fires the prison. But fate takes a hand and, guided by the vengeful spirit of Tracy and his two younger brothers, relentlessly pursues the men and women responsible for the murder on carefully concocted evidence. Twenty are convicted!

The denouement in the courtroom achieves a motion picture seldom equalled in motion pictures. It leaves you literally on the edge of your seat up to the fadeout.

Not since the "Big House" has such drama thundered across the screen!

Mr. and Mrs. J. B. Bockman returned to Roswell, New Mex., Saturday after spending several days in the home of her parents, Dr. and Mrs. W. J. Brewer. Mrs. G. W. Smith, sister of Mrs. Brewer, who has been visiting here several weeks, accompanied them to Childress, where she will visit with her daughter before returning to her home in Sulphur Springs.

ELLIS RANKS HIGH IN SOUTHWEST CONFERENCE

In last Saturday's Amarillo News, Frank Tolbert, sport writer, had the following to say about Drew Ellis, son of Mr. and Mrs. Carl Ellis.

"Drew Ellis, tackle and co-captain of the Texas Christian University football team, will be one of the greatest line men in the Southwest Conference this autumn, predicts Dutch Meyer, Horned Frog coach."

"Ellis came to Texas Christian from Perryton, an 185-pound strippling, who'd failed to make his high school club. Today the big boy from the Panhandle weighs 220 pounds and is rougher than a gorilla."

L. W. Lamb and son, Jim, Amarillo, were Perryton visitors Tuesday and Wednesday.

Dr. Oscar Schofield, formerly physician in charge at the local CCC camp, now located at the Fuqua camp, Amarillo was visiting in Perryton Friday.

Forrest Campbell and Walter Nie were Sunday visitors in Canadian.

Mr. and Mrs. Ira Pearson were Perryton shoppers Monday. They will leave the latter part of the week for Norman, Okla., and attend summer school at Oklahoma U. Mr. Pearson taught in the Spearman school the past year and will be with the Pampa school next year.

Triple seals in the front wheels and special diaphragm oil seals in the rear axle give perfect protection against grit and dirt. All controls located conveniently in front of the operator. ANALYSIS AND APPRECIATION

With this, that and the other thing given recognition by a week specially designated, or dedicated to it, we feel that at least a few paragraphs can be offered at least once in a great many years, concerning the home town newspapers.

Call it Newspaper Appreciation Week, if you will, or whatever, but stop to think what the home town paper means to you and to your community.

Though the newspaper's story is generally the same, each publication has its individual style, trend and characteristic make-up.

Consider this paper. Week after week, year after year it comes to the home as a daily messenger, bringing you news of the town, the personal items, church, school, fraternal, political and industrial activities; telling you of happy weddings, babies born, the Grim Reaper's call.

Analyze your home town paper sometime, don't "just read it." The first page is the "front window," generally well-dressed, and with a variety of attractions.

The merchants themselves have their various departments in which, day after day, they make contact with the reading public. This is an important feature of any newspaper, and of inestimable value to the merchant, the reader, and the paper. There is a lot of personality in it, for each advertisement is an expression of the man or business it represents.

The classified page is likewise a feature, far more than advertising alone. There can be read romance and tragedy, happiness and sorrow, failure and success, fortune, progress—in fact, it is a barometer of the times.

And so we could go on. But we ask you to make the analysis, and with that thought still in mind, will "sign off."—Southbridge, Mass. News.

LINDBERGH KING'S GUEST

at a small dinner party given by London, Eng.—Among the guests King Edward VIII at St. James's Palace were Col. and Mrs. Charles A. Lindbergh. It was the first time the American couple had been received by the new King.

IRISH REPUBLIC FORSEEN

Dublin, Ireland.—With the end of the Senate of the Irish Free State, President Eamon de Valera promises a new Irish Constitution by Autumn. His party favors an independent republic, but efforts to set up a republican form of government have been successfully blocked by the veto power exercised by the Senate over all Dail legislation. Finally the Senate was itself abolished, leaving the way clear to a liberalized constitution.

RICH DERRY WINNER

London, England.—The triumph of Mahmoud, entry of the Aga Khan, in winning the \$50,000 Epsom Derby, again drew attention to his fabulous owner. The income of the Aga Khan is estimated at \$3,000,000 a year, contributed by 100,000,000 Moslems who call him their spiritual leader. Every year he is weighed at Bombay, India and receives his weight in gold, worth \$125,000; every month his native city of Karachi contributes \$10,000 to his support. He owns \$5,000,000 worth of blooded horseflesh and employs more than a thousand servants on his Irish, French and Indian estates.

MARRIES ON HIGH SEAS

New York City.—A wireless announces the marriage of William B. Leeds, heir of "tin-plate King," to Miss Olive Hamilton, switchboard operator of Atlantic City hotel, whom he rescued from drowning six years ago. Cruising on his yacht, Leeds' captain performed the ceremony "according to the law of the high seas."

COPS REVEAL WEALTH

San Francisco, Cal.—As the city's graft hunt draws toward its close, residents have discovered some startling facts about its police force. One cop ran his thirty years' earnings \$53,000 up to a tidy \$100,000. A prodigious lieutenant suddenly remembered that his wife had given him a \$16,000 cash dowry 19 years ago. Another bluecoat attributed his \$80,000 stake to the uncanny ability of "a small, dark man named Monk" to pick winners for him at the races. At the height of things four city policemen were indicted for robbing a drug store owned by the Police Commissioner himself.

COMET ON ITS WAY

Delphos, Ohio.—Using a small home-made telescope, Leslie C. Peltier, local draftsman and amateur astronomer, has discovered five comets in eleven years. His latest find subject to congratulations from Harvard University Observatory, is 120,000,000 miles away and heading for the earth. Harvard astronomers calculated it will come within twenty million miles in July, then swerve away, but will be brighter than any comet since Halley's in 1910.

VALUABLE WALL PAPER

Chicago, Ill.—When stocks nosedived in the depression, the Union League Club of Chicago invited members to contribute "worthless" stock certificates to paper a private dining room. It took \$1,000,000 worth to cover the walls. So many stock have "come back" that the club is soaking the certificates off the walls, returning them to pleased former owners.

BIG VELOCITY TESTER

Langley Field, Va.—Scientists studied the new concrete and steel tunnel for testing airplane resistance. An 8,000 horsepower motor drives an air stream at more than 500 miles an hour, proves that an airplane's skin friction is reduced 25 per cent by eliminating rivet heads; also that above 175 miles per hour present wing designs lose most of their lifting power.

BANKERS GET RULING

Washington, D. C.—National banks and Federal Reserve members now have a ruling from J. F. T. O'Connor, Controller of the Currency, on what securities they may buy for investment. No bonds in default as to principal or interest are permitted; nor or bonds "in which the investment characteristics are predominantly speculative."

AFFAIRS IN THE CAPITAL

Washington, D. C.—The Secretary of Labor announced an employment increase of 225,000 workers in April representing a payroll rise of \$4,200,000. During the first four months of the year exports gained 12 per cent, imports 17 per cent. The Secretary of State announced the signing of a reciprocal treaty with Finland, the fourteenth pact of its kind negotiated by the present Administration.

OLYMPIC PLANS WELL ALONG

New York City.—Teams already chosen to represent the U. S. at the Berlin Olympics this summer include Basketball, Boxing, Fencing, Feminine Gymnastics, Marathon Walking, Wrestling and Yachting. Trials to be held during June and July embrace thirteen other sports, including baseball trials at Baltimore July 1 to 12, in the hope of sending over a team to demonstrate the great American sport in a series of games with a French team.

But Jesus could, like a lamb, lick the

the executioners could have been

we are glad to learn that upon obed-

may be pardoned and made new

III. "The Thief on the Cross"

One of the thieves ceased to rail

upon Jesus, and tenderly asked the

Christ to remember him when he

came into his kingdom. "Today shalt

thou be with me in paradise," said

the Lord. While Jesus was here on

earth in the flesh, he forgave sins

under a variety of conditions, some-

times not even making conditions

necessary on the part of the sinner.

The thief was not told to obey the

gospel because the gospel in fact

had not as yet been given. The world-

wide commission was given AFTER

Jesus' death, burial, and resurrec-

tion. For us to think we may be

saved today as the thief on the cross

was is to nullify this great commis-

sion which requires faith, repen-

tance, confession and baptism for

remission of sin.

cleared and 600 miles of fence damaged by drifting sands and wind. The invitation to local authorities to participate in the plan was extended by H. H. Fennell, regional conservator of the Soil Conservation Service. Mr. Fennell stated it was proposed that the SCS aid in the county programs by lending available machinery and contributing the services of technical personnel, also by furnishing certain seeds, materials and supplies for the most urgent erosion control jobs.

One of the most encouraging notes of the meeting, according to Judge Shanks, was a statement made by P. T. Collins, Houston representative of the Federal Land Bank. Mr. Collins who recently opened an office in Dalhart for the purpose of investigating loans in the North Panhandle said it was planned to refinance many Federal Land Bank loans and to pay delinquent taxes on some of the property against which the land bank holds mortgages.

State Sen. Imit C. Small, author of the bill which created soil erosion districts attended the meeting. He is reported to have said that in his opinion provisions for diverting tax money to finance soil conservation work in several additional counties may be made by the next legislature.

Following the closing of the meeting Wednesday the final approval of the memorandum was given to the county judges committee. This will detailed requirements of the prospective counties will be taken to Washington and presented to directors of the Soil Conservation Service by R. H. Musser and Y. L. Caston, SCS officials who went to Amarillo from the National capital to attend the meeting.

OLD AGE PENSIONS JULY 1ST

STATE DIRECTOR SAYS THAT OLD AGE ASSISTANCE PAYMENTS WILL START ON JULY 1ST

Orville S. Carpenter, executive director of the Texas Old Age Assistance Commission, announces that it is practically certain that the first pension payments will be made on July 1, as both the state and federal pension money will be in the Texas treasury by that time. Texas was recently granted \$1,181,250 by the United States government for that purpose.

Mr. Carpenter states that as far as he can estimate now, there will be approximately 65,000 people past the age 65 who will be eligible to receive pensions. Each one will receive up to a maximum of \$30.00 per month, or \$15.00 from the state and \$15.00 from the United States. However, payments will be based upon need because of the Federal Social Security Law and Texas Law.

People who do not need as much as \$30.00 will receive less. All payments considered, the average will

be around \$20.00 to each applicant who meets the requirements of the Texas law. It is expected that some payments will be as low as \$9.00 or \$10.00 per month.

Pyrotechnical Display Will Feature Fourth of July Celebration at Liberal, Kansas

Liberal, Kans., June 5.—Probably one of the outstanding features on the Fourth of July celebration program at Liberal will be the brilliant display of fireworks that will be presented in the evening as one of the closing attractions.

Other attractions will include a big street parade at 10:30 o'clock in the morning, amateur hour program at 1 o'clock in which \$50 in prizes will be awarded to outstanding entertainers, a free ball game at 3 o'clock between two crack clubs of the Southwest, and many other features.

without a name, "No Man's Land" came into its own.

A history that to many is even more interesting than the history of the white man's conquest is that of a people about whom little has been written, the first settlers of this vast region, the Indian.

Over 10,000 years ago the Polson man roamed the Plains hunting the pre-historic beasts and making himself a general nuisance to the other animals that peopled this section at that time. The flaking on the artifacts belonging to this man surpass by far any that has been done since that period of time.

Somewhere near 5,000 years ago again returning to this section we find the American version of the Cave Man, the Basket Maker, a people exhibiting a high degree of intelligence and civilization. They wove baskets and sandals from the yucca plant and used fire in everyday life. They lived in caves, the walls of which they decorated with picture writing.

Coming down to about 1,000 years ago we find that man has again changed his mode of living and his type of dwelling. He now lives in houses built of earth and rocks or stones and covered by a thatch-like roof. His dwelling resembled somewhat the Pueblo of today. The people did things in much the same manner as the Indian of today.

Although, comparatively little is known of the pre-historic races of this continent much work has been done in recent years and more will be done in the future. The Panhandle Museum is contributing to contribute its part to this vast work that is being carried on.

Much remains to be written of the history of the past of this vast region and of the future perhaps more will be said, but in either or both cases, I am sure one of the organizations that will take active and leading part in this work is the No Man's Land Historical Society, organized in 1934. Its Museum is located at Goodwell. This society is very active having at present a Museum containing more than 10,000 specimens and a membership of over 200.

Rubinoff Holds World Record for Broadcasting

Rubinoff and his violin—and Chevrolet—are a combination that few, if any, radio listeners in the United States have not received in their homes via the air. The famous violinist and his Stradivarius, stars of the Chevrolet Musical Moments programs, have the distinction of going on the air from more broadcasting stations than any other program in the history of radio. Three hundred and seventy-eight stations broadcast Rubinoff three times a week, a total of 1134 fifteen-minute programs. That figures out at 283 hours, and if one week's programs were broadcast one after the other, day and night, it would require 11 days. The illustration shows Rubinoff, carrying his precious violin, posing with his car after a special appearance at Detroit.
