# THE JUNCTION EAGLE

Volume 46

Junction, Kimble County, Texas, Thursday, August 15, 1929

Number 18

## CHEVROLET CO. HAS FORMAL OPENING

The noise of hundreds of balloons and the presence of ice cream cones in the hands of children and grown-ups Saturday afternoon told that there was something unusual in Junction. A casual glance revealed the fact that the new Highland Chevrolet Company was the center of the fun-making. It was the formal opening of the new home of Highland Chevrolet Company, and Mr. J. S. Farmer had thoroughly planned for the occasion, so that everybody enjoyed the afternoon. Matches and cigarettes were given the men, balloons to the children, and ice cream cones to everybody.

At 6:00 o'clock twenty presents were given away. Secretary E. V. Stewart was master of ceremonies. The following were awarded presents: L. W. Goben, four auto tires. Roscoe Stevenson, two auto tires. A. W. Browning, auto clock. B. B. Ragland, round trip bus ticket to San Antonio. Homer Livingstone, thermos jug. Asa Murr, thermos box. Harry Northcutt, cigarette lighter.

The following received five gallons each of Humble gasoline: Stewart Taylor, Earl Madrox, M. C. Stewart, A. G. Hill, W. L. Kothmann, Joe Ramsey, Tobie Buster, I. O. Weldon, Leslie Bessley, Albert Bartley and Frank Cowsett.

This new plant, opened Saturday, consists of a filling station, parts department, show rooms for the new Chevrolet, repair shop, storage building, bus station, and used car department.

One of the features of the filling station is a new Bowser pump which contains six different grades of oil. Pneumatic air pressure is used in this pump. There are three gasoline storage tanks, with a capacity of 1,035 gallons each. There are eight oil tanks, with a 55-gallon capacity each.

The private managerial offices of Mr. Farmer are situated on the second floor.

A fifty-foot addition to the main building will be constructed before the year is over, according to Mr. Farmer. The new storage house, 40 by 68 feet, and constructed of sheet iron and steel, has just been completed and placed in use.

An interesting item in the plans of the new building is a large perpendicular electric sign, 17 feet long. This sign will bear the Chevrolet trade mark and the name of the dealer here. This sign will be installed soon.

A beautiful waiting room, which will serve as the station for the Kerrville Bus Company, is one of the outstanding features of the plant.

## ROTARY ANNS LUNCH WITH THE ROTARIANS

The wives and daughters of members of the Rotary Club surprised the Rotarians today and were present at the Fritz Hotel to eat dinner with them when they arrived at 12:15. Very few of the Rotarians knew of the plan until they arrived at the hotel. A few weeks ago the Rotary Anns surprised the Rotarians with a picnic dinner at Kimble Courts, but more of the Rotarians knew of that surprise.

President Emil A. Loeffler called upon Mrs. Milton F. Hill and Mrs. George A. Pepper to give their impressions of the International Rotary which they attended in Dallas a few weeks ago. Both responded in their pleasing manner. Mrs. W. P. Riley also made a good talk. It was a pleasant surprise and still happier hour for the Rotarians.

Mrs. Cleve Stephen returns Tuesday from San Antonio, where she went to buy goods for the Model Shop. She plans to go to the Dallas markets at an early date.

## School Opens on September Second

Mr. Lester Hodges, secretary of the Junction school board, announces that the Junction schools will open on the first Monday in September. Superintendent Guy Moses expects to arrive in Junction this week and will devote the next two weeks to getting everything in readiness for the opening. The janitor assumed his duties this week and is busy with the buildings and grounds.

Many schools in Texas will begin on Monday, September 2. By beginning early in September the warm days the latter part of May are missed. It usually takes some time to get the organization in good working condition.

The Eagle is not prepared to give the program on the opening day, as Mr. Moses will not be here until the latter part of the week.

The following compose the literary teachers for the session: Guy C. Moses, Superintendent. Ross Brown, Principal. Earl Bowers, Coach. Miss Nellie Bennett. Mrs. Effie Roy Felps. Mrs. Margaret Dutton. Mrs. Grady Kindrick. Miss Mary Ellis Blackburn. Mrs. Earl Bowers. Miss Mary Willis. Miss Natalie Lowry. Miss Ruby Newman. Miss Austin Durst.

## TRAPPERS GET WOLVES AND BOB CAT

H. W. Bierschwalde, secretary of the Wolf and Cat Club in Kimble County, states that Ross Graves, a government trapper, caught one of the worst wolves that has ever been caught in the county last Friday night, and two or three days later trapped another one. Both these wolves were trapped a few miles north of Junction. Mr. Graves is on the Coleman Ranch, but the Eagle did not learn whether the wolves were trapped on the Coleman land or on Mr. Bolt's ranch. These were bad wolves and have been hunted several years. The catching of these two old wolves will mean much to the ranchmen in that section.

Carl Wolf was displaying on the streets of Junction last Saturday a very large bobcat that he had trapped on his ranch on the South Llano only a few miles from Junction. The trapping of this cat will mean a great saving to the ranchmen, as these cats are destructive to live stock.

The predatory animals are faring badly in this section. The local Wolf and Cat Club is encouraging the trapping of these animals. The last Legislature appropriated a considerable sum for the extermination of these animals. With the U. S. Government, the State Government and the local organization working together, it will not be many years until the predatory animals will be very scarce in this section.

## C. OF C. MEETING NEXT TUESDAY AT 8:15 P. M.

On Tuesday night, August 20, the Kimble County Chamber of Commerce will hold its regular monthly meeting in the Court House, at 8:15. Instead of holding a business session, the Rotarians and Lions will be invited and a general get-together meeting will be held. Out of town speakers have been invited, and an enjoyable meeting is expected. Refreshments will be served. Come.

The management of the Gillespie County Fair invites the people of Kimble County to attend the fair in Fredericksburg on August 23, 24 and 25. Lots of fun for everybody.

Necessity supplies courage to the most timid.

## COMMITTEE ON INSPECTION MISSION

Representative Coke R. Stevenson left last Friday to join the Texas Prison Commission for the purpose of making a study of a score of State penitentiaries ranged about a long loop that touches at Raiford, Florida; Sing Sing prison on the Hudson in New York; Michigan-City, Indiana; St. Paul, Minnesota, and concludes at McAlester, Oklahoma. Eleven of the eighteen member of the commission, Dr. F. E. Giesecke, professor of architectural engineering, who is going along as consultant; Executive Secretary Bob Barker and three newspaper correspondents, left Houston at 9:05 o'clock Saturday night for New Orleans.

The first prison inspection was to have been made at the Alabama State penitentiary near Montgomery on Monday. The tentative itinerary worked out by W. A. Padlock, chairman both of the State Prison Board and the Prison Centralization Commission, and Executive Secretary Barker calls for stops at the following cities on the dates shown:

Jacksonville, Florida, August 14; Raleigh, North Carolina, August 15; Richmond, Virginia, August 16; Washington, D. C., August 17 and 18; Baltimore, Maryland, August 19; Philadelphia, Pennsylvania, August 20 and 21; Trenton, N. J., August 22; New York, August 23 and 24; Albany, New York, August 25 and 26; Auburn, New York, August 27; Buffalo, New York, August 28; Detroit, Michigan, August 29; Jackson, Michigan, August 30; Michigan City, Indiana, August 31; Chicago, Illinois, September 1, 2 and 3; Madison, Wisconsin, September 4; St. Paul, Minnesota (Stillwater prison), September 5; Des Moines, Iowa, September 6; Kansas City, Missouri, September 8 and 9; Leavenworth Federal and Lansing State penitentiary; McAlester, Oklahoma, September 10.

The members of the Commission who are starting on the trip are: Chairman W. A. Padlock, Houston; Fred E. Horton, Greenville; Lee Simmons, Sherman; Dr. A. C. Scott, Temple, representing the Prison Board; Vice Chairman A. H. King, Throckmorton; Coke R. Stevenson, Junction; John F. Wallace, Teague; E. T. Murphy, Livingston; Senators W. A. Williamson, San Antonio, and Edgar E. Witt, Waco, representing the Legislature.

## Baptist Ladies Give Orphan Home Party

On Tuesday afternoon, August 13, the Baptist Ladies held their regular Buckner Orphans' Home birthday party at the home of Mrs. S. B. Kindrick.

Throughout the evening about forty guests, including a few of the ladies of the Methodist Church, were served with delicious punch. The following interesting program was rendered: Opening remarks, Mrs. Hickerson.

Vocal duet, Mildred Hodges, Vivian James. Reading, Mildred Hodges. Reading, Tom Aubrey. Vocal solo, Roberta Ragland. Reading, Mrs. Grady Kindrick. Piano selections, Mrs. Weaver Baker.

Through these meetings, an organized effort is made to send a box to Buckner's Home. Thus far, donations amounting to approximately \$85.00 have been brought in. The box is still open, and your gift will be highly appreciated.

Mrs. L. E. Stockard and children returned Saturday from Waxahachie, where she received her degree from Trinity University the past session. She will teach the Segovia school the coming session.

## EQUIPMENT IS BOUGHT FOR STATION

One of the liveliest organizations in the city is the Junction Fire Department, which consists of twenty-two members. Since the new fire station has been completed and a new pump ordered, the boys have entered upon their duties with renewed zeal. They are so organized that two or more of the boys are at the station the greater part of the time. Quarters have been equipped so that they sleep at the station.

A list is being circulated this week, and is meeting with a liberal response, to buy athletic equipment and games, so that the boys can pass the time pleasantly. The Eagle hopes to be able to print the list of the names of those who contribute to this fund in the next issue. Each member of the fire department pays dues to the amount of \$2 each month, to provide the entertainment features needed at the station.

When the new pump arrives in the near future, more boys will be needed in the department, and all men and boys eligible to membership are requested to talk with the officers of the department about becoming active members. Only active members of the department will be entitled to the privileges of the hall.

The following constitute the active membership of the department at the present time:

John H. Hankins, Chief. Leon Powell, Assistant Chief. Howard Blackburn, President. Astor Wallace, Vice President. Lanan Bissett, Secretary-Treasurer. C. E. Barnes, Recorder. Royce Buster, L. D. Borden, W. B. Buster, Fred Coleman, Lee Craven, Fleming Felps, W. O. Gann, Guy Munn, Edgar McKay, George Savage, Carlos Taylor, Alex Wahl, Dennis Wallace, J. O. Wright, Marx Wiese, Forrest Welch.

## SCHREINER-HODGES CO. BUYS SPRING MOHAIR

Mr. J. M. Hodges, manager of the Schreiner-Hodges Company of Junction, began Tuesday to fill his warehouse with the fall clip of mohair. He received three clips Tuesday and expects it to be coming in rapidly from now on until the season closes.

Among those who brought in mohair this week was W. M. Keen, who clipped 79 suckling kids, from which he received 165 pounds. This is more than two pounds each, and some of them were born as late as April. If this is a type of what may be expected from the spring clip, the mohair business will be great this season.

## GOING TO COMFORT

The Kimble County Chamber of Commerce, accompanied by the band, is planning to attend the 75th anniversary gala day at Comfort Sunday. Mr. E. Holecamp, a former citizen of Comfort, is recognized as the head of the delegation. He is anxious for a large number of Kimble County citizens to go to Comfort. Next Sunday is the day. Badges will be furnished by the Chamber of Commerce. Get a badge and go.

Mr. Alex J. Hamer states that the fall clip of mohair is being stored in the warehouse. A good yield is expected this season, and if a good price is obtained ranchman will be happy. Mr. Hamer is in charge of the Junction Cattle and Loan Company warehouse, which handles large quantities of wool and mohair each season. Junction is the largest inland market for wool and mohair in the world.

Mr. B. B. Reese, one of our prominent Kimble County ranchmen, has become a member of the Kimble County Chamber of Commerce.

## Philip Joseph Will Open Store in Mason

Mr. and Mrs. Philip Joseph will open a large dry goods store in Mason about September 15. They leased a large building on the north side of the square several days ago, and the building is being remodeled to meet their requirements. They will install the most modern fixtures and have an up-to-date store in every particular. They have just returned from the markets, where they bought for their three stores, located at Junction, Rocksprings and Mason.

Mr. Albert Joseph of Lockhart, a nephew of Philip, will be manager of the Mason store. He is a young man of unusual executive ability and successful experience in the dry goods business.

Mr. Joseph's friends marvel at his success in the dry goods business. He came to Junction in 1911 and peddled goods over the country for a while, but soon leased a little building 18x24 and opened a store. His business grew, and later on he rented a building from Frank Baker on the spot where his present store stands. In 1925 he enlarged his store again, and this year he added another building for his men's store. Two years ago he opened the Rocksprings store, and is now opening the third store, at Mason.

## GRAF ZEPPELIN RETURNS IN 55 HOURS

Taking a new record for a trans-Atlantic dirigible crossing into her hangar with her, the airliner Graf Zeppelin reached home Saturday afternoon 55 hours and 24 minutes after leaving Lakehurst on the first stage of her globe-girdling flight. A small army of mechanics and helpers immediately began to groom the Zeppelin for the next stage to Tokio, on which she left this week.

Dr. Hugo Eckener celebrated his 61st birthday by bringing down the silver queen of the air at 7:03 a. m., Eastern standard time, with a journey of 4,200 miles to his credit in the log books. The Zeppelin made an average speed of 75 miles an hour for the entire trip, cutting the time for her crossing in 1928 by 13 hours and 22 minutes.

Friedrichsafen, which is used to thrillers connected with Zeppelins, had the sensation of its existence when the Graf Zeppelin breezed in almost before the citizens were aware of it.

The airliner described a graceful curve over the city and, less than half an hour after she had been sighted, came to the ground in one of the prettiest and cleanest landings Dr. Eckener has ever achieved.

Within another half hour the passengers were out of the gondola and the freight was being unloaded.

Before the thousands of spectators who thronged the aviation field and stood outside the fences could realize what had really happened, the radio announcer's voice informed them that the Graf had shattered all previous records for the Atlantic crossing. There was no happier man than Hugo Eckener himself. Although the Graf's commander kept his joy pretty much to himself, and declined to show himself anywhere to celebrate his birthday or his feat, evidence was not wanting from the Eckener home that he was delighted at having made the crossing in less than 56 hours.

Mrs. John S. Munn and Miss Ray and Gay and Max returned Tuesday from a trip to various points in Texas and New Mexico. They visited the Carlshad Cavern and many other places of interest in New Mexico and Texas. Like all others who visit the cavern, they are delighted.

## REV. J. N. M'KAY COMING FOR MEETING

Rev. Milton Hill makes the following announcement about the meeting that begins at the Methodist Church Sunday, August 17:

"The Methodist Church has been extremely fortunate in being able to secure the services of Rev. John N. McKay to conduct a revival in the church, beginning August 18 and continuing for two weeks. Plans have been made more than once for the meeting, and in each case conditions arose which made it necessary to set aside the arrangements made. The present, it seems, is the providential time for holding the meeting, and the conditions unusually favorable.

Bro. McKay has had very successful pastorates at Uvalde and Bishop, and was for several years a missionary in Mexico. In the last capacity, his work threw him with a large group of capable and promising young Mexican men, and his work and leadership with these is going to prove of great and lasting importance, both in their own lives and in the development and Christianization of their country. Previous to his entrance into the ministry, Bro. McKay had been a successful business man, and he is thoroughly conversant with the practical problems that confront men in their daily experiences. While a student in Southwestern University he held a position of large responsibility while doing his college work. Bro. McKay is a preacher of unusual ability, and will bring messages of vital interest to everyone.

"The music of the meeting will be under the leadership of Mr. Solv McCrless of San Antonio. Bro. McCrless is a splendid song leader and soloist, and has had a wide experience in revival work. During the recent Epworth League Assembly at Kerrville he led the singing with marked success. All who have heard him, speak in the highest terms of his ability and fine personality.

"It is earnestly hoped that this meeting will be of the greatest possible benefit to our community, and to every good interest among us. The co-operation of all, irrespective of denomination, is most cordially and sincerely invited, and it is hoped that the meeting will prove a blessing to every church as well as to our entire community. Those who sing, play any instrument, or possess other talents and abilities, are respectfully urged to come out and help us.

"The meetings will be held in the church each night at 8 o'clock. Morning services will be announced a little later. The many words of encouragement already received from the friends of the church are hereby gratefully acknowledged, and the co-operation, prayers and presence of all is earnestly urged."

## BONDS APPROVED FOR JUNCTION SEWER SYSTEM

The attorney general's department has approved the sewer bonds for Junction, and as soon as a few details can be worked out, actual construction will begin. The same company that installed the water system has the contract for the sewer system. The machinery is here and men are expected at an early date.

## RAILROAD MAN HERE

Col. Ed Kennedy of Houston, who was here recently in the interest of a railroad from Corpus to New Mexico, was here again this week, working out further details. The road as proposed by Mr. Kennedy runs from Corpus to Pearsall, Uvalde, Junction, Menard, San Angelo and into New Mexico. He is working up the route and states that he has it sold as soon as he can complete all details.

# County News

## LONDON LOCALS

Mr. R. O. Weaver has been overseeing the repair work at the gin. He had Mr. Howard Horn as helper.

The hot, dry weather, the boll weevil and the leaf worm has cut our cotton crop materially; yet we will make considerable cotton.

Mr. John Fritz has purchased a Letz feed chopper, grinder and mixer combined. These machines are money well invested if you have any considerable live stock to feed.

We regret very much to note the run-down condition of the editor of the Graphic, Mr. Marvin Hunter, Jr., who is spending his time at Bandera, with his father, mother, and family physician. Notwithstanding the editor's absence, the Graphic came out on time, full of news items, for which Mrs. Hunter and her helpers deserve much credit.

Now that our school trustees have taken the forward step toward asking for an election to determine whether or not our school district shall be incorporated into an independent school district, let the Parent-Teachers' association show their hand by encouraging this move in every way possible, and at the same time put forth an organized effort to secure funds to establish a school library worthy of the name.

It is an easy matter to preach, but it is a different proposition to practice. To prove to you that I will practice my preaching, I here and now agree to pay into a library fund \$1.00 per month for twelve months, and more if need be. What will you people who have children who may reap a benefit from a school library give? It is necessary that you have a certain amount of the right kind of books in your library, as well as other equipment, before your school can be entitled to credits. Let's back up our trustees in this forward move and build our school up year by year until it reaches the position it should occupy and the pupils of this school get from it what they deserve and are entitled to receive.

Mr. E. V. Stewart, Secretary of the Kimble County Chamber of Commerce, was introducing Mr. R. E. Homann, the Kimble County Demonstration Agent, to our people Thursday of last week. We are glad the Commissioners' Court and the Kimble County Chamber of Commerce has decided to employ an agent. It is, in our judgment, the best money spent for the public, if our people will cooperate with him. If they do not, then it will be money wasted. We hope Mr. Homann will be able to organize cooperation at once.

Don't think that because you have gotten along with the old way, that there is no better. This man can teach you how to raise more produce on less land. He can teach you how to get greater returns for your produce by feeding some to your live stock in an intelligent way. In short, if you will cooperate with him, he will teach you the science of things, which will be of great value to you if you will only practice the same. His instructions relative to the planting and caring for fruit trees should be worth more to Kimble County than several times his salary.

So I would appeal to the stockman, the farmer, the fruit grower—in fact, to all citizens of Kimble County—to cooperate with Mr. Homann and learn many useful things, and our county will be greatly benefited by his employment.

Mr. Howard Horn is on the sick list, but we hope not for long.

Mr. G. T. May is one of our sick. He is reported some better at this writing, 8-12.

Mr. Ed Hagemann and family of Paducah is visiting relatives here.

Also Mrs. Dively, a cousin of Mrs. Cummins, was here for a few days.

The revival meeting of the Church of Christ is now going on. Good crowds are in attendance. Glen Wallace is conducting the services. Mr. Wallace is an interesting preacher and will interest you if you will come hear him. At least he will do you no harm. He will tell you

## John Munn Arrests Streeter Burglar

Eugene Myers of Dodge City, Kansas, was arrested last Thursday evening at Junction by Deputy Sheriff John Munn. Myers, a 16-year-old boy, was charged with robbing with firearms the Ellis Massey store at Streeter at about 10 o'clock Thursday morning. The boy is alleged to have driven up to the store and had the car he was driving, a Dodge 1928 model coupe, filled with gasoline and lubricating oil. Then pulling out a .380 Colt's automatic, he turned it on Ervin Massey, the 16-year-old son of Ellis Massey, who was taking care of the store, and backed him into the store building at the point of his gun, making him open the cash register from which Myers is said to have taken \$2.50. Then, still pointing the gun at young Massey, Myers took several other items, consisting of four bottles of soda water and some cans of soup and milk. He then left the store and drove toward Junction, where he was later apprehended.

T. A. Baker and Sam Wood, deputies of Mason, went to Junction and brought Myers here, where he confessed and was put under \$1,000 bond in Justice Ben Hey's court.

A deputy sheriff and county attorney of Wichita County came to Mason Monday and got the boy's car, which it is alleged he stole in that county, and Wednesday E. L. Kincaid, deputy sheriff of Archer County, came here with a bench warrant issued by Judge Allan D. Montgomery, judge of the 30th district court in Archer County, requesting that Kincaid be given custody of Myers, in order that he be taken to Archer County for trial August 8 on a charge of robbery with firearms. The custody of the boy was given to Mr. Kincaid.

The boy had two guns in the car with him. All the articles taken by him from the store were recovered, with the exception of one or two bottles of soda water. Myers said that he would be 16 years old in December, and that he had served one term in a Kansas reformatory. The youth claimed that his father is a minister in Dodge City, Kansas. Officers here have written to his parents.—Mason Co. News.

## Mad Puppies Bite Children and Stock

Sweetwater, Aug. 13.—The children are taking the Pasteur treatment and every head of live stock on the T. J. Dardin farm, three miles northwest of Maryneal, may be wiped out by the rabies, as result of a mad dog biting her two puppies.

Dardin's 18-year-old son and a baby daughter are taking the Pasteur treatments after having been bitten by the puppies. The first dog afflicted with hydrophobia was killed, with examination proving it to have been rabid. In the meantime, the two puppies, running loose on the farm, bit the two children and every head of live stock, including work teams, cows and hogs.

One cow has already become rabid and was killed, while serum is being given the other animals on the farm in what is believed will be futile attempts to save their lives.

Contracts for 120.3 miles of new highways, costing \$1,908,524, were awarded by the Highway Commission Thursday of last week. Contracts for maintenance work aggregated \$183,621. Contracts awarded Wednesday aggregated \$1,396,845, for 110 miles.

The internal revenue department reports that the five-cent cigar is coming back. But really it hasn't been away. Only the old price has been missing.

what he believes and why he believes it. You don't have to believe it or accept it if you don't want to.

The oil interest is practically unchanged for two weeks, except Carl L. Bryant is now drilling at near 700 feet. McLean has begun drilling again. The Lindsey Bros.' well has shut down, but was not plugged. We hear all kinds of reports concerning this well, but can't make any statement other than "they say;" therefore will say nothing except that operation has stopped at the well stands open under a guard.

## BEAUMONT MAN GAINS TWENTY-FIVE POUNDS

"Before I started taking Sargon I was down in weight to 140 pounds and was badly run down after years of suffering. Since taking Sargon I have gained 25 pounds and am back to my normal weight, which is 165 pounds.

"Up to a few years ago I had always been in fine health; then I commenced to be troubled with indigestion and constipation. It just looked like I couldn't digest anything. I put myself on such a light diet I became badly undernourished and lost weight rapidly. I lost my strength and energy, and it was all I could do to stay on my job.

"Almost as soon as I began taking Sargon I started eating again and took on weight rapidly. I tell you it's fine to sit down at the table and eat a man's meal again. I am as full of strength and energy as I ever was, and can do more work in one day now than I could do in two before.

"The Sargon Pills toned up liver, and I no longer suffer from biliousness and constipation.

"After gaining 25 pounds I am feeling like my old self again and I think that is enough to convince everybody the Sargon treatment is wonderful."

Joe N. Canizard, 348 Washington Boulevard, Beaumont, Texas. Sargon is now called "The Medicine With a Million Friends." It's marvelous record of achievement is without parallel in the history of the drug trade of this country. J. A. Heyman, Agent.

## SMALL FLOCKS SHEEP PAY FARMERS

College Station, Texas.—When more farmers in Texas add a few sheep to their farming operations as well as the cow and the hen, Texas will have a more balanced system of farming, Ernest Gibbens, of the animal husbandry department, A. & M. College of Texas, told those in attendance at the beef cattle, sheep and goats section of the Farmers' Short Course here. "No farm animal is capable of returning a greater net profit than sheep when given intelligent attention, nor of losing money faster when not properly handled," he said. Mr. Gibbens discussed "Sheep Breeding."

There are two phases of sheep production to be considered, the speaker pointed out in opening his discussion, range production and farm flock. Range production in Texas has changed much in the last twenty years, he went on to point out. "Production of sheep on the ranges of Texas is rapidly going through a transition period from production of a strictly fine wool type of sheep, as was the case some years ago, to the production of good mutton as well as fine fleece."

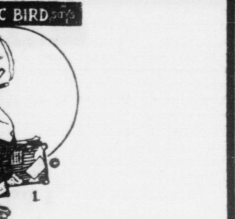

Touching on the farm flock phase of sheep raising, Mr. Gibbens said that many farms in the line prairie section of Texas should add sheep to their system of farming. "A small farm flock brings in funds in the spring at a time when most farms have little or nothing to sell," he continued. "No farmer should stock too heavily on sheep, however, but rather should keep just enough to eat his surplus weeds and turn them into money."

If the shoes hurt the face shows it.

ORNAMENTAL METAL WORK The sheet metals made for outdoor exposures have reached an excellence of quality and durability that makes them available for many purposes. This type of ornamental trimming lends itself to artistic effects as well as dependability. Let us go over your specifications for sheet metal work of every description and give you our estimate for your job.

### "MAGGIE AND JIGGS" MAKE TRIP THROUGH TEXAS TOWNS

A clever interpretation of "Maggie and Jiggs in Texas" was sent to the Democrat-Voice this week by Marie James of Route 3, Coleman. For most of her descriptive expressions she uses the names of Texas towns. All the words capitalized are the names of such towns. Read the following and see if you get the idea:

"Maggie and Jiggs, on their holiday, entered Texas and were given Welome. Jiggs came to Hunt White Deer, Turkey and Tiger, but she made the Trip for Joy to see Dan. They came in their Ford Sedan. Jiggs used his Noodle and wore Caps, Coates and Tye made of Cotton and bought at Cost.

"She was adorned in Silver Sash and Flowers and she curled her Bangs and looked Dressy. They spent some time in Comfort, for Jiggs had Cash. She was highly entertained by the Canary and Blue Bird; and he enjoyed a Newharp.

"They spent a Goodnight in White. On Munday Maggie bathed in Sweetwater and dressed in Canyon; at the same time Jiggs bathed in Shallow-water and dressed in Plainview. For lunch she wore a Bibb and ate Okra, Rice and Pancake, with an Orange, Raisin and other Fruit until she had a Payne. He ate a Slide of Bacon, and Salmon and Quail, seasoned with Sage. She refused him More, and he thought it Tuff. She drank Redwater and he drank Cherry and got Topsy.

"Jiggs saw Lovelady and wanted to Seymore. He wanted Liberty and Freedom, but had no Shield; so he took Ropes and rounded up Hereford and Durham and caused a Stampede. He then ran across Bridges into Brownsfield and later in

Brownwood. He hid in the Bottom.

"Maggie gave Chase, but Jiggs ran Swift. He would not answer her Call, so she got Hot and made Advance with a Pan-handle in one hand and a Paint-rock in the other. He retreated, gave her the Dodge and hid behind Post. Like Caesar, she prepared for battle. With an Armstrong she threw a Mule-shoe at his Legg and broke his Lem.

"She called him a Liar, and like a Cyclone she took him by the Baird and beat his Crown with a Spade. He heard Bangs and the Echo, and saw Sparks, Star and Rising Star. His Payne was terrible, and he had no Lov-ing. He offered her Love, a Blossom, a Violet, and even his Birthright, but she raised Cain and threw him off of Oak Cliff at Dawn. He showed Grit, but soon Lost Hope. Receiving no Help, he went Happy to Gloria.

"The Day was Raney and Snow was on the ground. Maggie drove a Paige. She needed gasoline and her engine had Knox. She stuck in the Mud. She had hoped to reach Paradise, but got on the wrong road and went to the Dickens."

And Miss James forgot to say that the moral of the story is: If Maggie had less Pirde and more Art and had done her Best to be Thrifty, Jiggs might have made Moore Progress. And if she had used less Satin and Silver and had made him a Sweet Home and given him a Beaukiss and a Blessing once in a while, it would have been easier to Prosper. Jiggs might have been Ideal as a King, but without a Prospect and Flat broke he fell by the Wayside.—Coleman Democrat.

### FOREMAN FATALLY HURT NEAR JUNCTION

P. Winslow, foreman of teams for a construction gang on the highway near Junction, was fatally hurt in an accident Saturday evening, and died from his injuries Monday evening at Junction. Mr. Winslow was recently in the employ of the L. E. Myers Construction Company, and worked with that company when it constructed the power line for the West Texas Utilities Company connecting Mason to the Central Power and Light Company line at the Gillespie-Mason county line.

The accident occurred about ten miles west of Junction, when the car in which Mr. Winslow was riding with several other men in some way ran into a ditch. Ernest Hofmann, Mason undertaker, was called to Junction Monday night to assist in taking care of the body, which was later taken to Hayes County for burial.—Mason County News.

### BEGIN RIGHT

Youth is the time of beginnings. It is so much better to begin right than to begin wrong and then attempt to change. It is always easier to prevent an evil than it is to make a cure.

I have seen men work themselves into nervous prostration who were warned repeatedly by little signs that told them they should take a rest. A few days would have set them right. A brief trip would have restored them to good health. Eventually they spent months in a sanitarium, months away from their office, months away from their families; and at the end of these months found themselves still far short of what they used to be.

Of course the principle applies morally as well as physically, and to government as well as to individual practice. It is easier for us to observe a law than it is for the police to enforce a law against a single one of us who breaks the law.—J. C. Penney.

We are giving tickets on the Shaw Sport Speedster on display at the Schreiner-Hodges Co. for cash purchases. 16fc Heyman Drug Store

### KERRVILLE GETS 50 PER CENT LIGHT AND POWER REDUCTION

Kerrville, Aug. 3.—A seven-year contract has been closed by the city with the power and light firm operating here, for municipal electric service at a reduction of practically 50 per cent of the rate that has been in effect.

As a result of the saving, plans have been made for a white way system in the business district, and city officials announced that materials had been ordered for more residential section lights.

The major development will be installation of about 20 new lights along Water street, and removal of wooden poles, to be replaced by 11-foot metal standards. Bracket lights on Water street will be removed to increase lighting facilities in other parts of the downtown district. First new residential district lights will go up on Broadway, Water and Park streets.

The city will be able to maintain the increased lighting equipment at less cost than heretofore, according to official report. The reduction also will apply to the city pumping plant and fire station.

### DEDICATED TO MEN

Man comes into this world without his consent and leaves it against his will. When first he comes everybody wants to kiss him; before he goes they want to kick him. In his infancy he is an angel, and in his manhood he is everything from a hizard up. If he is a poor man he is a poor manager; if he is a rich man he is dishonest. If he is in politics you can't place him. If he goes to church he is a hypocrite; if he stays at home he is a sinner. If he offers assistance to the widows and orphans he is a flirt; if he donates to foreign missions he does it for show; if he doesn't he is stingy. What can the poor man do?

A new electrical safety razor cuts the beard with parallel shearing plates, revolving 120 times a second.

Well! At last we have convincing proof that there are a lot of patriots full of pep, power and persuasion.

# 3 NEW CHRYSLERS THE NEW 77 THE NEW 70 THE NEW 66

PRICES RANGE FROM \$1200 TO \$2300 Delivered Fully Equipped

These automobiles are new in the fullest sense of the word—new in design, new in construction and new in performance. Chrysler, in these new cars—the "77," "70" and "66"—antiquates even its own accomplishment—and sets a new standard which the future cannot fail to acclaim the most astounding revolution in all motordom's history.

The new six-cylinder Chrysler "66"—at the lowest price of any six to bear the name of Chrysler—takes its place in this newest and greatest group of Chrysler cars as a typical Chrysler value. In its own field, it achieves results fully as revolutionary as the "77" and "70" achieve in theirs.

## A Few New Chrysler "77" and 70 Features

- MULTI-RANGE GEAR SHIFT—Gives new pleasure to driving; makes gear-shifting a joy even to the inexperienced; widens the power range; shift gears as always, but with new ease; new quickness; new quiet.
- DOWN-DRAFT CARBURETOR—Not merely a gravity manifold, but a new principle of fuelizing; complete carburetion; smoother power; higher mileage; quicker operation. Extra large mechanical fuel pump.
- SYNCHRONIZED POWER SYSTEM—Engineered as a unit from radiator to rear axle; new flexibility; smoothness and economy; still longer life, life.
- LARGER ENGINES—Greater piston displacement; greater horsepower, torque and operating economy; seven-bearing counter-balanced crankshaft; Invar Strut pistons; full pressure lubrication; oil filter.

**THE METHODIST CHURCH**

Sunday marks the beginning of the revival, notice of which is given elsewhere in this paper. All the energies of the church will be bent toward making the meeting a success.

Sunday School meets at 10 a. m. Let the teachers and officers of all classes make a special effort, not only to have out a full attendance Sunday morning, but to secure the interest and attendance of classes upon the revival.

The morning service begins at 11; evening service at 8:15. Epworth League, with a fine service for young people, meets at 7:15.

Revival services will be held every night of the week, and morning service as announced. Rev. John N. McKay of Bishop, Texas, will preach, and will have the assistance of a capable song leader.

It seems strange in this efficient modern world, but nobody ever encourages the hen that delivers two eggs in one wrapper. —Los Angeles Times.

**LEAGUE PROGRAM**

Where Does Christ Come In—In the Commercialized Recreation That We Patronize?

Leader: Ramsey Randolph. Hymn. Scripture Lesson: 1 Corinthians 4; 9, 15; 32, 33.

Hymn. Prayer. Special Music.

Unusual number of ball and roller bearings used in the new Ford

NEW FORD SPORT COUPE \$550

(F. O. B. Detroit, plus charge for freight and delivery. Bumpers and spare tire extra.)

FRICITIONLESS ball or roller bearings are used at every point in the new Ford where they will contribute to smooth operation and long life.

Spiral roller bearings, for instance, are used in the rear hub and on the drive shaft at the universal joint. Taper roller bearings are used in the front wheels. Steering is easier because of the roller thrust bearings used on the spindle bolts.

A ball thrust bearing is used for disengaging the clutch and the front end of the clutch shaft is carried in a radial ball bearing in the flywheel. Another reason for the ease of shifting gears in the new Ford is the use of ball and roller bearings in the transmission.

Throughout the new Ford you find this same quality and careful attention to every detail that contributes to good performance. In the words of the experienced mechanic, "the new Ford is a sweet mechanical job."

Note these low prices:

Roadster, \$450 Phaeton, \$460 Tudor Sedan, \$525 Business Coupe, \$525 Coupe, \$550 Sport Coupe, with rumble seat, \$550 Fordor Sedan, \$625

(All prices f. o. b. Detroit, plus charge for freight and delivery. Bumpers and spare tire extra.)

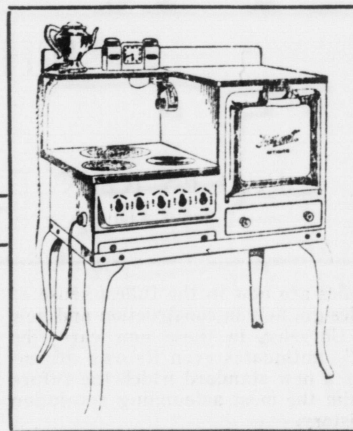

Loeffler Motor Co. JUNCTION, TEXAS

**There IS a Difference**

YES, quite a difference when one cooks electrically...gone are tedious hours of bending over a "hot" range in a stuffy kitchen...overcooked and burned foods are unknown...and the kitchen is always clean and cool when cooking is done on a Hotpoint Electric Range.

The All-White Hotpoint Priced at \$132.50

Convenient Terms to those who desire

—This automatic Electric Range makes cooking a pleasure...too, it makes recreation a reality...an entire meal can be placed in the oven, time and temperature controls set and the Hotpoint does the rest...you can go wherever you wish; upon your return the entire meal will be cooked to perfection.

—Learn to cook this scientific way... then every meal will be more delicious than you can imagine.

—With each Hotpoint Electric Range priced from \$132.50 on up, a wonderful Steam Pressure Cooker is included... get your today.

West Texas Utilities Company

# COMFORT WILL CELEBRATE NATAL DAY

An all-day celebration August 18 will mark the seventy-fifth anniversary of the founding of Comfort, the pretty little Kendall county town that nestles in the Guadalupe valley between verdant hills.

Comfort was founded September 3, 1854, but the committee in charge of the celebration had to set a premature date to prevent conflict with one of the Hill country's fairs.

The celebration will consist of a parade and pageant, depicting each quarter century in the little town's history. Alex Brinkman, of Comfort, is in charge of this phase of the celebration. He is the unofficial historian of Comfort and possesses a library on Texas history, especially that part of it centering about the German settlements of which Comfort is one.

The present townsite of Comfort originally belonged to John F. C. Vles, a cotton merchant of great wealth and influence in those days, who made his headquarters at New Orleans.

Texas had a land boom in 1850 similar in many respects to the rapid development that is taking place in South Texas today. Sensing a market for a townsite, Mr. Vles gave authority and power of attorney to Ernest Altgelt, a San Antonio attorney, to create the townsite of Comfort and to sell the lots.

Frederick Brothaus surveyed and laid off the townsite on a level tract of land along the Guadalupe bank. Boerne had been platted the year before.

All lots were one-half acres in size and sold for the uniform price of \$25 each, and that was a lot of money in those days.

Each buyer paid cash. Two stumps with a roughly-hewn board formed a table where the deeds were signed and delivered. The first building was put up by Theodor Wiedenfeld in 1852, a couple of years prior to the actual laying out of the townsite. It was not on the present townsite, but further up the river.

The original list of settlers, with few exceptions all of German ancestry, looks like a muster roll of prominent San Antonio and Kendall county families of today. Many of these people still own the original lots that their forebears bought in 1854.

The chief industry of the town was shingle making. Immense cypress trees bordered the Guadalupe. These were cut down and hewn by hand. The early storekeepers at Comfort one of whom was Mr. Brinkman's father, accepted shingles as cash in the purchase of merchandise and had freighters haul them to San Antonio.

When Kerr county was created, Comfort was the county seat. That was in 1860. But in 1862, Kendall county was created and the county seat was moved to Boerne, a town named after the German poet.

## MOLTING HENS

The same poultry feeds that give good egg production are best adapted to grow new feathers. During the molt, mash, which is the egg-producing part of the ration, should be fed freely. Scratch feed should be fed sparingly, so that the hens will eat more mash than scratch feed. The mash should make up from one-half to one-third of the total feed. Increased mash consumption may be induced by feeding one light meal of moist mash in addition to keeping dry mash always before the hens. Mixing the moist mash with milk instead of water increases its palatability and tends to increase mash consumption. Sudden changes in the ration or in the method of feeding should not be made, as this may throw the hens into a premature molt. Such changes as moving them to a new house, or closely confining them after being on free range also tends to induce molting.

The first postoffice was established at Comfort July 12, 1856, with Theodor Goldbeck, a merchant, as postmaster. He was not rushed with business. Postage to Europe then was 40 cents and few letters were written. The first white child born at Comfort was Julius Lindner, November, 1854. The Lindner family is one of the most prominent families of Comfort today. The founders of Comfort were chiefly highly educated men, some of them of German nobility.

Being men of education, the first thing they did was to build a crude school house. The first teacher was John Glass of San Antonio, of American parentage. He opened the school in the winter of 1856. He was later succeeded by Gustav Steves, a brother of Ed Steves of the present Steves family.

Comfort is today unique among the South Texas towns. The pretty little town with well-kept yards, clean streets, beautiful trees and hedges, has remained a model community life. Comfort has no jail, no police force, not even a justice of the peace.

Abstracts for your lands can be secured on short notice from E. Holekamp; 25 years in business; we know how. (adv)

## A LESSON ON TYPHOID AND THE HOUSE FLY

1. Question—Is the house fly known by any other name?  
Answer—Yes. It is sometimes called the Typhoid fly, because it has been found to spread so much typhoid fever.

2. Question—Is the fly the only means of carrying typhoid fever?  
Answer—No. This disease is also distributed by water, milk and other foods if the germs get into them. Typhoid germs always come from the solid and liquid materials thrown off the body.

3. Question—Does the typhoid fly spread other diseases?  
Answer—Yes. It helps to spread cholera infantum, dysentery, tuberculosis and many other diseases.

4. Question—How many flies live over winter?  
Answer—Only a few survive the winter months.

5. Question—What do flies do in the spring?  
Answer—They begin feeding actively and soon commence laying eggs. For this purpose they seek the dirtiest, filthiest places that can be found. They have good noses and can find these places by smell, even though people may not notice the odor.

6. Question—How many eggs does a fly lay?  
Answer—From 120 to 150 at a time. A fly may live to lay six times.

7. Question—How long does a fly live?  
Answer—From two to three months in summer. They may live longer in winter.

8. Question—How old is a fly before it begins to lay?  
Answer—About two weeks old.

9. Question—Does every neighborhood raise its own flies?  
Answer—Yes. The number of flies in a community is an excellent index to the sanitary condition of that community.

10. Question—How do flies carry disease?  
Answer—They eat and walk over the filth and get germs on their feet and proboscis or bill then they walk over our food or get in our milk. The typhoid germ does not multiply anywhere outside the human body except in milk.—Texas State Board of Health.

## U. S. YEARBOOK OF AGRICULTURE ISSUED

The Agriculture Yearbook of 1928, issued by the U. S. Department of Agriculture, is just off the presses of the Government Printing Office.

Congressman Claude B. Hudspeth requests the Eagle to advise its readers that he has an allotment of this publication for distribution among his constituents and will be glad to send a copy to anyone desiring the book. Mr. Hudspeth's address is House Office Building, Washington, D. C.

In his foreword, the Secretary of Agriculture has the following to say regarding the yearbook:

"This is the third in a series of yearbooks intended primarily to inform the practical farmer about what is new in agriculture. Like the preceding volumes, it contains numerous short articles dealing with the research and regulatory work of the Department of Agriculture and chronicles other developments in agricultural science and practice. This feature of the yearbooks for 1926 and 1927 has been widely commended.

"Effort has been exerted to make the book as nearly up-to-date as possible, so that it may be properly entitled a yearbook. It is meant for the general reader rather than for the general technician or the student. Hence popular presentation and variety of interest have seemed more desirable than exhaustiveness in the selection of material. Its wide scope has necessarily involved some sacrifice of detail; but this has not entailed a sacrifice of accuracy or of scientific significance. Each article has the endorsement of a consensus of experts, and many of the articles announce important discoveries. The work should have reference value as well as popular interest. I know of no other equally comprehensive and authoritative book treating current agricultural problems."

### THE TOWN DOCTOR

(The Doctor of Towns)

says

#### THE TRUTH OFTEN HURTS

To tell a man of his good points seldom if ever tends toward his betterment. It may sort of perk him up a bit, but usually it makes him vain, and always lowers his resistance in the battle of doing things by throwing him off his guard.

Flattery is an ensnaring quality, and leaves a very dangerous impression. It swells a man's imagination, and his head as well; it entertains his vanity, and drives him to a doting upon his own person.

Some communities get so full of ego, and become so puffed up from "soft soap" and blarney handed out by individuals who usually have an axe to grind, that the residents think theirs is the essence of perfection.

"Stuck up" communities are as bad as "stuck up" people. They get so cocksure of themselves that they are blind as a bat to everybody's imperfections but their own.

When a community gets to the point that all it is interested in is conversation about its own wonderfulness, that community is due for a fall.

It is a serious mistake to court only the society of those who choose friends altogether from those who flatter. The ones who

those who flatter, the ones who are truthful will be of real benefit, for they will tell you the truth—things you ought to know.

The truth often hurts, and there are some who are not BIG enough to take it. Such people are small-minded; they wince at the pain, get sore, sulk and pout, overlooking the fact that the real test of qualities for permanent success is ability to gain by criticism. The man who seeks to better himself accepts constructive criticism as such; he offers no alibis and doesn't try to "crawlfish."

Yours IS a good town — in question about that. It has many fine features, many attractions, a multitude of good, hard-working boosters; in fact, it's an even chance that your community has advantages that, because you are so familiar with them, you lose sight of, underestimate and fail to appreciate. But it is the things that REPEL that retard progress—those things that invite will take care of themselves.

(Copyright, 1919, A. D. Stone. Reproduction prohibited in whole or in part.)

This Town Doctor article is published by The Eagle in cooperation with the Lions' Club.

#### DRINK MORE MILK

Milk is a mixture of fats, carbohydrates, proteins, salts, plus intangible almost impalpable and relatively mysterious substances, such as vitamins, enzymes, oxydases, and reductases, besides albumins, globulins, and perhaps an animal principle or energy which at the present time is unknown. It may be that there are also protective substances which prevent the growing child or animal from contracting certain infections. At any rate, we know that milk undergoes a very marked alteration in its composition when it is subjected to heat, even far short of boiling.—Selected.

A Scotch salesman traveling his territory in a flivver had a breakdown and discovered that it would take three days to fix the car. He wired his firm in Edinburg for instructions. The reply came: "Start your vacation as from yesterday."

Every dairyman knows that if the dairy cows production decreases in hot, dry weather because of insufficient feed, it is difficult if not impossible to get production back to normal during that lactation period. Most regular pastures are short in July and August, and supplementary feeds should be provided in the form of silage, supplementary pasture crops, soiling crops, or good legume hay.

#### NEWSPAPER BARGAINS

The Fort Worth Star-Telegram is making a special offer for the next three weeks to send the Telegram for three months for only \$1.90. For those who are not taking the Telegram it will give them an opportunity to get it until the winter bargain rates are on for only \$1.90. The Eagle will give the Eagle for ONE YEAR and the Telegram for three months for only \$3.25.

Junction year-round playground

A visitor is always at a disadvantage. His host can stage the scene and then, if he thinks it to his advantage, put on a condescending air as if his guest were a book agent or some other sort of pest armed with no excuse for existence.

And once more and in the interest of good understanding let it be repeated: We are perfectly willing to obey implicitly the biblical injunction, "Love thy neighbor as thyself." If we fail to do it, it will be her fault and not ours.

## Another Record!

# a Million

### SIX CYLINDER CHEVROLETS

#### on the road in less than eight months!

Less than eight months have elapsed since the first Chevrolet Six was delivered into the hands of an owner—and already there are more than a million six-cylinder Chevrolets on the road! And the reasons for this overwhelming success are easy to understand.

Into a price field that had hitherto been occupied exclusively by four-cylinder cars—Chevrolet has introduced a six-cylinder car of amazing quality and value. Not only does it offer the smooth, quiet, velvety performance of a great six-cylinder valve-in-head motor—but, from every standpoint, it is a finer automobile than was ever before thought possible at such low prices! Its

beautiful new bodies—which are available in a variety of colors—represent one of Fisher's greatest style triumphs. And its safety and handling ease are so outstanding that it's a sheer delight to sit at the wheel and drive. In fact, the new Chevrolet Six has completely changed every previous idea as to what the buyer

of a low-priced car now has a right to expect for his money.

You owe it to yourself, as a careful buyer, to see and drive this car. For it gives you every advantage of a fine six-cylinder automobile—in the price range of the four and with economy of better than 20 miles to the gallon! Come in today!

### T. A. KINCAID HEADS SHEEP AND GOAT MEN, BRADY GETS 1930 MEET

Mr. T. A. Kincaid of Ozona was elected president of the Sheep and Goat Raisers' Association of Texas at the recent meeting at Del Rio. He was elected by acclamation and without opposition.

Sam Ashburn, that prince of good fellows among ranchmen, had the following to say about the election and meeting, in the San Angelo Times:

"T. A. Kincaid was named president of the Sheep and Goat Raisers' Association for his sixth term by his fellow flock-masters, at the close of the business of the fourteenth annual convention, the honor to Mr. Kincaid coming by acclamation and without opposition.

"Brady gets the 1930 convention, its campaign, headed by Raleigh White, James Brook, Curtis Norman and others, making its selection over San Antonio, the rival city for the honor, an easy victory. The final action of the convention program was a meeting of the executive committee held at 7 o'clock last Friday in the Roswell Hotel.

"Attendance at the business meeting was good, and the city of Del Rio gave splendid entertainment to its thousands of visitors, men who came in high-powered automobiles and who said when asked what they thought of the farm relief bill: 'I don't know anything about it.' Then they climbed from their cars, walked into the hotel, ask the clerks for a little spending money and offered a check for \$100 or so.

All the old officers of the organization were re-elected without opposition, but three new names were added to the executive committee. These include A. D. Brown of Sanderson, James Peril of Harper and Berald Bryson of Comanche.

"Mr. Kincaid, in his speech of acceptance, urged the members to give a thought to marketing conditions, as well as the tariff, citing that much had been said during the hours of the business session relating to the tariff, but little relating to marketing. He emphasized it as one of the large problems confronting the industry."

The Eagle regrets to learn that J. Marvin Hunter Jr. is out of the Graphic office for a time undergoing treatment. Mr. Hunter is getting out a good paper for the London people, but the Eagle is frank to admit that his wife is getting out a fine paper in his absence. The editor of the Eagle would not have known from the paper that Mr. Hunter was not on duty had it not been stated in the Graphic. We congratulate Mrs. Hunter on the good paper last week, but hope that Marvin will soon be able to relieve her.

The only steps remaining that pedestrians may take to protect their rights are fast ones.

### APPROPRIATION BILLS CUT \$3,016,000

Governor Moody cut \$3,016,000 from the major appropriation bills, a list of vetoed items filed with the Secretary of State showed.

His reduced the aggregate total of the money measures to \$44,776,935, and will probably permit the fixing of the ad valorem rate at 22 cents, the amount of the levy for the past year, and not more than 25 cents at the outside.

Of the six new buildings proposed for State colleges, he let appropriations for only two stand, those of the teachers' colleges at Commerce and Alpine. He vetoed new construction for the School of Mines at El Paso, Teachers' College at San Marcos, College of Industrial Arts at Denton and Texas Tech at Lubbock.

The Alpine building will cost \$150,000 and the one of Commerce \$175,000.

He cut out the Texas Agricultural and Mechanical College extension service appropriations for construction, including superintendent's residences, incident to the establishment of a dairy experiment station and others, in the Ninth Senatorial District, Winter Garden section, and within 50 miles of Abilene. Establishment of these was authorized by the regular session of the 41st Legislature.

In eliminating buildings at Texas Tech and other schools and colleges, the Governor said he was "not convinced that there is urgent need" for these buildings.

New A. & M. sub-station elimination included provisions for superintendent's residence, assistant's cottages, laborers' cottages, barns, pens, farm machinery, feedstuffs and miscellaneous equipment.

He permitted the item of "contingent expense" for salaries in A. & M. College to stand, although vetoing some salaries.

"If the authorities of the school wish, each salary vetoed can be replaced from this contingent fund," the Governor said.

He commented that the "contingent expense" item "means an increase in salary expense, and is more than I feel can be allowed at this time," but realizing that some of it should be allowed, and because he could not reduce the amount, he permitted all of it to stand.

### HAS ATTENDED OVER 3,000 LODGE MEETINGS

San Francisco, Cal.—A record of having been a Mason for sixty-eight years and attended a Masonic meeting on an average of once a week is claimed by Henry E. Mathews, a member of Oriental Masonic Lodge No. 144. Mr. Mathews believes he has attended on the average of fifty-two meetings a year since being made a Mason in 1861. This would be a total of 3,500. He is 89 years of age and expects to attend many more meetings before heeding the last call by the Great Architect of the Universe.

Denied use of either the roof of Broward County jail or the courtyard, Federal officials are without a place to erect a scaffold and gallows for the hanging of Horace Alderman, convicted slayer of three government officials in a sea fight off the Florida coast in 1927.

In crossing streams, deep water, pulling mud, deep ruts, and sailing up the long, high hills, NONE of them pass the New Ford. Wonder why? SAVE the DIFFERENCE to buy something else or lay it aside for a NEST EGG. The DIFFERENCE will pay the running expense of your Ford for a year, and some of the DIFFERENCE will run it for FIVE years. LOEFFLER MOTOR CO.

Of the 13 sizable rivers in Texas, eight have their watersheds entirely within the State. Runoff water in the Canadian and Red goes into other rivers and then into the Gulf of Mexico; the others empty directly into the Gulf.

## STATE GAME LAWS WILL BE DISTRIBUTED SEPTEMBER 1

Austin, Tex., Aug. 13.—Will J. Tucker, State Game, Fish and Oyster Commissioner, has completed a revision of the State game laws, which will be mailed about September 1 to sportsmen throughout the State. About 15,000 copies will be distributed, Tucker said.

The pamphlet will contain changes made in the game laws by the Forty-first Legislature, and new statutes created by the lawmakers.

Present laws allow open season on bear in all counties from November 16 until December 31.

White tail deer may be slain from November 16 to December 31, and black tail deer east of the Pecos River during the same period.

West of the stream the animals may be killed only from November 16 to 30. Bastrop, Hemphill, Roberts, Hutchinson, Callahan, Eastland, Stephens, Palo Pinto and Parker counties have been closed to all deer hunters until 1934.

Mourning doves may be hunted from December 1 to January 16 in the following counties: Red River, Bowie, Delta, Hopkins, Titus, Franklin, Morris, Cass, Wood, Camp, Upshur, Marion, Harrison, Gregg, Smith, Van Zandt, Panoia, Rusk, Cherokee, Henderson, Hood, Erath, Hamilton, Coryell, Freestone, Anderson, Robertson, Leon, Houston, Nacogdoches, Shelby, Sabone, San Augustine, Trinity, Madison, Walker, Grimes, Brazos, Burleson, Washington, Lee, Bastrop, Fayette, Austin, Waller, Lavaca, DeWitt, Goliad, Victoria, Calhoun, Fort Bend, Montgomery, San Jacinto, Polk, Jasper, Newton, Orange, Jefferson, Hardin, Liberty and Chambers counties.

In Cooke, Denton, Grayson, Collin, Fannin, Lamar, Kaufman and Rockwall counties the season will extend from September 15 to November 1.

The State wide season on whitewing doves covers the period from August 8 until October 31.

Ducks, geese, brant, snipe, gallinules and mud hens may be hunted in the south zone of the State from November 1 until January 31, and in the north zone from October 16 to January 31.

Wheeler and Collingsworth counties have been closed to prairie chicken hunting until 1931. In all others, September 1 to 4.

In both zones the quail season will extend from December 1 to January 16.

Shooting of turkey gobblers has been prohibited by legislative action until 1934 in Callahan, Eastland, Stephenson, Palo Pinto and Shackelford counties, and in Cameron, Hidalgo, Star, Willacy, Kennedy, Brooks, Kleburg and Nueces counties until November 16, 1930. The remainder of the State is open from November 16 to December 31.

Tucker invited attention to the new north and south zone limit, which begins at the Rio Grande west of Del Rio and extends eastward along the Southern Pacific Railroad to San Antonio. From this point the zone boundary follows the H. & T. C. Railroad east to the Brazos River, turning north to where the Beaumont branch of the Santa Fe Railroad crosses the stream. The line then follows the Santa Fe east to Cleveland, and along the H. E. & W. T. Railroad to the Louisiana border.

KEEPING MILK COOL IS NECESSITY IN SUMMER

Cold water! Hot days of summer. Visualize what they mean—a mountain stream—cold water trickling over rocks—the old moss-covered pump house, cool and shady, where the milk and cream is kept sweet, solving the problem of summer time—that of keeping the milk and cream from souring. We gather these very interesting thoughts in reading the current issue of the Feeders' Purinagraph, a Purina Mills house magazine, which contains some timely information on this subject.

Clean utensils—buckets, cans and strainers—are very important," the article says, "because in summer cans are more apt to become fouled. Have a simple rack to sun all buckets and cans every day. Scald buckets and rinse all cans when they are returned, and then put them on the rack to sun.

"A great deal of sourness and spoiled milk is caused by dirt falling into the milk at the time of milking from the udder of the cow. Clip the hair on the flanks and udder of each cow, and then wipe them off with a damp cloth at each milking," the article reminds us.

"The quicker you can cool the milk, the better and colder you keep it, the longer it will stay sweet.

"A milk cooling tank is of absolute necessity on the farm. It can be hooked up between the pump and the stock tank and fresh, cold water can be kept in it without wasting the water. If you have a pressure water system, you can use a spiral cooler or a corrugated cooler. If you do not have such a system, a cone cooler with ice water is good.

"All that has been said of cooling milk will apply to cream. However, thick cream will not spoil as rapidly as thin cream. Set your separator to produce 30 to 3 per cent cream."

The Feeders' Purinagraph concludes its article with the ever important admonishment to "Cool each batch of cream before adding it to the can."

DON'T OCCUR OFTEN

Dr. Adcock: "What is that strong odor I smell?"

Dr. Watson: "Oh, that's just moth balls."

Dr. Ardelman just opened his pocketbook."

And then there are a lot of folks always trying to do favors—with a string tied to them.

## Federal-Aid Highways Improved Last Year

During the fiscal year 1929 the Federal government cooperated with the States in the improvement of 7,022 miles of Federal-aid highways, bringing the total mileage of the system improved with Federal aid to 78,096, according to figures of the Bureau of Public Roads of the United States Department of Agriculture. This year's mileage was improved in the 48 States and Hawaii by State highway departments working in co-operation with the Federal bureau. There are approximately 188,000 miles of main interstate and intercounty highways in the Federal-aid system, of which the above mileage and approximately an equal mileage built by the States without Federal assistance is now improved.

The 7,022 miles improved include 1,056 miles of graded and drained earth roads, 563 miles of sand-clay, 1,293 miles of gravel roads, 189 miles of water-bound macadam, 728 miles of bituminous concrete pavement, 3,101 miles of Portland cement concrete pavement, and 48 miles paved with vitrified brick. Forty-four miles of bridges and approaches were also constructed.

In addition to the improved mileage, at the end of the year there were under construction with Federal aid 9,526 miles, 8,358 of which were undergoing initial improvement, and 1,168 were being given a higher type of surface than was provided in original construction. The estimated cost of the mileage under construction is \$238,158,395, which includes Federal funds in the sum of \$96,500,347.

At the end of the year there were also approved for initial construction 1,833 miles of highways and a further 1,055 miles to receive a higher type of surface. The total cost of the approved mileage is estimated at \$61,500,674, to which Federal funds in the sum of \$24,137,546 have been allotted.

At any rate, nothing contributes quite so much to induce folks to be neighborly, and hence make frequent calls, as does curiosity.

THE "WRIGHT" WAY TO HEALTH

Fall and early winter production of eggs is the keynote to profitable poultry raising. Since the pullets are practically the only source of eggs at this time, they should get a good growing ration during the summer, so they will be well mature and in good condition by October. They should be put in the laying pens about the middle of September, in order to be accustomed to the new conditions when ready to lay. If there is a tendency for the pullets to begin laying too early, it is well to reduce the amount of protein in the ration. Pullets that commence to lay too early (4 to 5 months of age) are inclined to lay very small eggs; or they may lay a few eggs and then go into a molt.

Lots of folks are prone to boast that they feel "just like a two-year-old." But they fail to give a definite meaning—whether a bad egg or a colt.

### Junction Trade Notes

A motorcade over the Old Spanish Trail from San Augustine to San Diego is scheduled to be made early in October, when one hundred cars will start from Florida, and it is expected 500 cars will form the motorcade before it reaches the Pacific coast. It will be a trip of inspection, for the purpose of making recommendations to improve the highway. Straightening of the O. S. T. west of Junction, so as to shorten distance as well as remove the roadbed out of the river, is under way and nearing completion, according to local reports.

August 8th the Attorney General's department approved bonds of the City of Junction, \$45,000, for installation of sewer system.

New brooms, light brooms and warehouse brooms, 45c up to \$1.25. Gann Grocery Company.

Staley's table syrup, golden and white, vanilla flavored. Gann Grocery Company.

Cattle grow faster in the spring and summer than in the fall and winter. Cattle weigh in March about the same that they did in November, though they may have grown a little taller. The growth of frame in cattle reaches its peak at 3 1/2 to 4 years, while growth in weight continues until 6 or 7 years. That is a summary of eight years of investigation at State Experiment Station, conducted to determine the advisability of winter feeding of cattle.

Dr. L. Hirschfeld and family of San Antonio are vacationing at beautiful Kimble Courts, on the Llano. Mr. and Mrs. Earl Wilson of Houston are vacationing in Junction and visiting their relatives, Mrs. L. H. Jetton and family. Lester Cox and family of Coleman are vacationing on the Llano and visiting the M. N. Harrisons.

The first fine assessed for violation of the new truck law intended to curb theft of livestock, was paid Monday in Justice Walter Beck's court. Stafford Thomas, transporting bucks for R. C. Tatum, was the innocent offender. He failed to get a transportation permit from the vendor of the sheep. The minimum fine of \$25 was assessed, plus costs of \$10.

Local August showers are falling this week in Junction territory. We have seed barley in stock for early planting. Gann Grocery Company.

Traveling men, as a rule, are reliable crop reporters. Following is a brief summary: Feed crops on Texas plains are practically a failure, due to lack of rain, and the same applies to plains cotton prospects. East Texas cotton has been stripped by leaf and boll worms, while in the coast country they are making some cotton. There is a short bean crop in New Mexico and Colorado, with resultant higher prices for "red beans." The weather throughout Texas for several weeks has been seasonably hot, and hundreds of people have sought the shades of the Llano for relief, and to swim and rest. Swimming is recognized as one of the most healthful and enjoyable exercises for the young and for adults who would continue the joy of playing a healthful sport. All Texans should come to the Hill Country to rest and swim, for beauty, for health, and for pleasure.

**Gann Grocery Company**  
"Everybody's Store."  
For a firm guarantee that counts, go to the Powell Motor Company and buy a Brunswick. No better tire made for the money and a guarantee that counts. 12c

#### SCHOOL NOTICE

All patrons having children under school age will please see Superintendent Guy Moses during the week beginning August 19 about sending them to school this session. 18c

Our special sales price on GOODYEAR tires continues during August. Get that set of Goodyears NOW. More people ride on Goodyear than on any other kind.

### PICNIC PARTY

On Monday night of this week an enjoyable picnic party was held at the Franks' Tourist Camp on the North Llano. Barbecued goat and cowboy stew and all the good things that go to make a feast were served to the following:  
Mr. and Mrs. W. M. Keen, Mr. and Mrs. Dave Goben, Lola Mae and Marie Goben, Mr. and Mrs. Sid Cade, Mr. and Mrs. John Davis, Marywill Davis, Miss Joe Simmons of Pear Valley, T. J. Meredith of San Antonio; Mr. and Miss Taylor and Miss Vina Taylor of Roosevelt; Mr. W. O. Dickerson, Roosevelt; Mr. and Mrs. Howard Stephenson and family and Will J. Wyatt of Eola; Will Hight, Buster Cade and Jimmie Serber. Everyone present spent an enjoyable evening.

### PICNIC PARTY

Mr. S. R. Wood and children, and Mr. and Mrs. Ross Brewer and children of Breckenridge, were honored with a picnic on the A. N. Wood ranch this week. It was an enjoyable affair, and noon lunch was served under the beautiful trees.  
The following were present at the picnic:  
Mr. and Mrs. Ross Brewer and children, Gene and Jack; Mr. S. R. Wood and children, Richard and Effie; Mr. and Mrs. W. W. Wood; Mr. and Mrs. Avery Stewart and sons, Ray and Loyd; Mr. and Mrs. L. T. Wood and son, Ray; Mr. and Mrs. Alfred Wood; Mr. and Mrs. Alex Wood and daughter, Barbara; Mr. and Mrs. Cap Wood and sons, Willard and Harold; Mrs. J. T. Herring, and Mr. and Mrs. A. N. Wood and son, Tunney.

### COTTON INSECTS

The leaf worm and boll weevil situation over the county has approached a rather serious state. While leaf worm infestation is spotted, the weevil infestation is pretty general. Poisoning is being practiced in most sections, but because of droughty conditions has not been very successful. The following poisons may be used to good advantage:

Commercial calcium arsenate applied in dust form, from 4 to 6 pounds to the acre, depending on the size of the cotton, is a very effective control.  
Arsenate of lead for insect poisoning, applied 2 pounds to 50 gallons of water, makes a good spray.  
Paris green, 1 pound to 20 pounds of flour or slaked lime, and apply when plants are damp from dew or rain. As a spray, 1 pound to 100 gallons of water.  
It has been my observation that under the present conditions where fields have been sprayed the best results have been gained.

A slight boll worm infestation is evident. However, there is no practical control for the boll worm other than to catch the worm and moth and destroy by burning. R. E. HOMANN, County Agent.

### YOUR COUNTY AGENT

Your County Agent is an agent of service. He is maintained in your county by federal, state and local funds. Use him, but do not abuse him. Your agent stands ready to help those who will help themselves.

County demonstrators are employed to demonstrate the better methods of farming and ranching. Before such demonstrations can be successfully carried to an end, those receiving the service must profit by it, and in turn help others.

The value of feeding or breeding demonstrations in livestock, the improvement of native pecan groves; the eradication of insect pests and the control of diseases are invaluable to a community and county. Hundreds and thousands of dollars are saved annually by progressive minded farmers and ranchers of our State who desire to and do employ the better methods advocated by, and in co-operation with, the County Agent.

## Smoker Given by Lion's Club For Business Men

Last Thursday night the Junction Lions' Club entertained the business men of the town with a smoker at the Baptist Church building. Approximately 35 men were present.

The Lions' Club is noted for its accomplishments, but it excelled itself last Thursday night. It put on an entertainment that attracted every resident Protestant minister in Junction. The Rev. Milton F. Hill, Elder J. S. Newman, Rev. G. W. Crofoot and Rev. G. W. Crabb were present and took their part on the program.

The smoker was opened with everyone singing "America." The Rev. G. W. Crabb delivered the invocation.

Mr. Alton Miller, president of the Lions' Club, made the address of welcome. Response to the address was made by Elder J. S. Newman, pastor of the Church of Christ.

Old-time songs were sung throughout the evening, with Mr. K. G. Durst leading.

Judge Weaver H. Baker made an interesting talk on the "Value of Civic Organizations to a Community." He stressed the importance of co-operation among the various fraternal and civic organizations of the city.

A balloon fight and an old-fashioned spelling match were two interesting features of the evening's diversion.

One of the most interesting talks of the evening was made by Mr. Emil A. Loeffler. He spoke of the improvements which have been made in this community through the co-operation of the citizenry and the various organizations. Especially did he stress the importance of the Chamber of Commerce and the large amount of good which it is accomplishing for Kimble County and Junction.

Cigars and cigarettes were passed out during the evening. Punch, candy and sandwiches were also served.

Judge Baker, Rev. G. W. Crabb, Mr. M. K. Durst, Rev. Hill and Rev. Crofoot, who were sitting on a bench of honor, all arose simultaneously to make a speech when a wee small current of electricity was shot through the bench. Judge Baker swore vengeance on every member of the Lions' Club, and said it was a long road which has no turning.

Everyone present enjoyed the evening of fun. Messrs. Lester Hodges, Alton Miller and Ovie Buster found some of Eddie Lowgren's famous boot leather in their sandwiches. As well as being excellent hosts, the Lions are shrewd fun-makers.

### Junction Trade Notes

A motorcade over the Old Spanish Trail from San Augustine to San Diego is scheduled to be made early in October, when one hundred cars will start from Florida, and it is expected 500 cars will form the motorcade before it reaches the Pacific coast. It will be a trip of inspection, for the purpose of making recommendations to improve the highway. Straightening of the O. S. T. west of Junction, so as to shorten distance as well as remove the road-bed out of the river, is under way and nearing completion, according to local reports.

August 8th the Attorney General's department approved bonds of the City of Junction, \$45,000, for installation of sewer system.

New brooms, light brooms and warehouse brooms, 45c up to \$1.25. Gann Grocery Company.

Staley's table syrup, golden and white, vanilla flavored. Gann Grocery Company.
