The annual cry for rain is being heard these days.

This territory is fortunate to have enough underground water for partial irrigation of our farmland. There are perhaps many more farms that could go under irrigation.

To take full advantage of the water we have for irrigation crops other than cotton should be found that will make a fair return for the efforts put forth.

It doesn't make much difference what crops we irrigate other than cotton but in order to make full use of the water a year around program of irrigation should be arranged on every farm. Until we do we will not benefit fully from irrigation.

Less Than Fifth of Cars Been Inspected

Captain R. M. Hammett of the Motor Vehicle Inspection Service, Texas Department of Public Safety, advised motorists today that only 28% of the 469,911 vehicles registered in the 49 county Midland Region have been inspected and approved for the 1959 inspection period. Deadline for securing the new inspection stickers is April 15, 1959. As in previous years, it appears many drivers will be in for a long wait to get their vehicles checked. At the present time, most inspection stations are busy, but not rushed.

Of the 6,240 vehicles registered in Mitchell County, only 1,190 have been inspected, and issued an approval sticker for the 1959 inspection period by the 7 inspection stations in the county.

Captain Hammett reminded motorists that the law prohibits inspections during inclement weather, thereby reducing the time for inspections. There will be no extension of time to have vehicle inspected.

Passenger cars are inspected for headlights, tailamps, stop lamps, reflectors, horn, and windshield wipers. Commercial vehicles are inspected for the above plus other requirements as provided by law.

Anyone operating a motor vehicle after April 19, 1959 without displaying a 1959 inspection sticker will be operating in violation of the law and subject to a fine not to exceed \$200.00.

... the spark that flies off my kitty's fur is a kind of electricity. My dad says he wishes it had been that easy to get electricity on our farm. He says that he and some other people borrowed money at interest and did it themselves. Most important My Dad says nobody in the world knows more about Rural Electrification than the people who established these systems and we still have a lot of work to do in rural areas.

My Dad thinks we ought to have the same laws for us that apply to other business managed utilities. My kitty doesn't seem to care... he can see in the dark.
